REVISED EDITION

HARPERCOLLINS

BIBLE DICTIONARY

PAUL J. ACHTEMEIER

General Editor, With the Society of Biblical Literature

USA $47.50
CAN $71.50

"[This is] a magnificent Bible dictionary . . . a mine of information for the beginning Biblical student, the seasoned scholar, and the layperson."
—*Biblical Archaeology Review*

The HarperCollins Bible Dictionary, Revised Edition, is the most complete, up-to-date, and accessible guide for the study of the Bible available today. With more than 3,700 lively, informative, and easy-to-use entries, this essential reference book provides all the information you need to fully understand the Bible.

Whether you're a member of the clergy or a student of Scripture, you'll find all the important names, places, and subjects that make Bible study come to life. From *Aaron* to *Zurishaddai,* here are all the people, events, and ideas of biblical times—whether it's the ages of the patriarchs, judges, kings, and prophets or the world of the New Testament and the early church. Other significant topics include the Dead Sea Scrolls, the Nag Hammadi Library, the archaeology of the biblical world, and the history of the English Bible, as well as new sections on African-Americans and the Bible, feminist interpretations of Scripture, and a completely updated pronunciation guide. More than a quarter of the articles in this book are new or totally revised from the first edition of the *Bible Dictionary.*

Each of the 193 contributors to *The HarperCollins Bible Dictionary*—Protestant, Catholic, and Jewish affiliates of the Society of Biblical Literature—is a leading authority in his or her field. Each entry presents the nonsectarian, consensus view of those most knowledgeable in the area.

(continued on back flap)

(continued from front flap)

Filled with explanations of biblical beliefs and language and insights into the culture and customs of the people who lived in biblical times, *The HarperCollins Bible Dictionary* will help anyone interested in Scripture more fully appreciate the meaning and message of the Bible.

PAUL J. ACHTEMEIER, Th.D., is Professor of Biblical Interpretation at Union Theological Seminary in Richmond, Virginia. A widely respected authority on the Bible, he is the author or coauthor of fourteen books, former editor of the quarterly *Interpretation,* and New Testament editor of the *Interpretation* Biblical Commentary Series. Professor Achtemeier has also been chief executive officer and president of the Society of Biblical Literature and president of the Catholic Biblical Association.

The Editorial Board of the revised edition of *The HarperCollins Bible Dictionary* includes associate editors Roger S. Boraas, Ph.D., Professor Emeritus of Religion, Uppsala College; Michael Fishbane, Ph.D., Nathan Cummings Professor of Jewish Studies, University of Chicago Divinity School; Pheme Perkins, Ph.D., Professor of Theology (New Testament), Boston College; and William O. Walker, Jr., Ph.D., Professor of Religion, Trinity University.

The Society of Biblical Literature is a seven-thousand-member international group of experts on the Bible and related fields.

THE HEBREW SCRIPTURES

(The Masoretic Text, MT)

The Law	*The Prophets*	*The Writings*
Genesis	*Former Prophets*	Psalms
Exodus	Joshua	Job
Leviticus	Judges	Proverbs
Numbers	Samuel	Ruth
Deuteronomy	Kings	Song of Songs
	Latter Prophets	Ecclesiastes
	Isaiah	Lamentations
	Jeremiah	Esther
	Ezekiel	Daniel
	The Twelve:	Ezra-Nehemiah
	Hosea	Chronicles
	Joel	
	Amos	
	Obadiah	
	Jonah	
	Micah	
	Nahum	
	Habakkuk	
	Zephaniah	
	Haggai	
	Zechariah	
	Malachi	

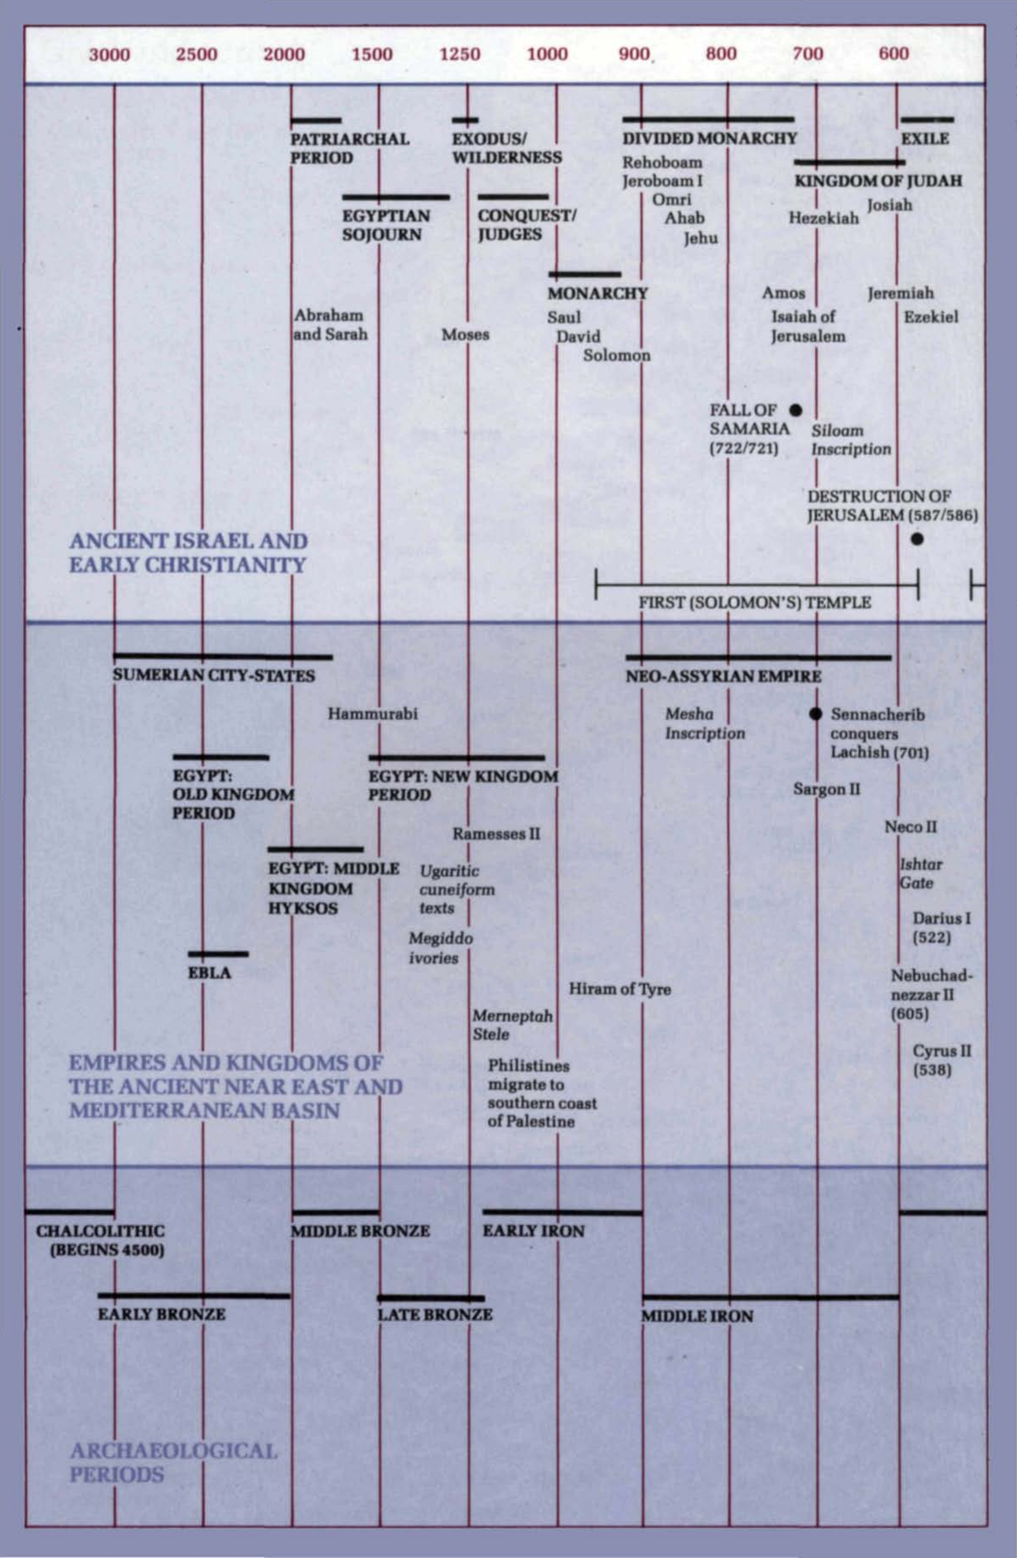
THE SEPTUAGINT (LXX)

(The Greek Version of the Hebrew Scriptures)

Law and History	*Poetic and Prophetic Books*	
Genesis	Psalms	Nahum
Exodus	Odes	Habakkuk
Leviticus	Proverbs	Zephaniah
Numbers	Ecclesiastes	Haggai
Deuteronomy	Song of Songs	Zechariah
Joshua	Job	Malachi
Judges	Wisdom (of Solomon)	Isaiah
Ruth	Sirach (Ecclesiasticus)	Jeremiah
1–4 Kingdoms (1–2 Samuel; 1–2 Kings)	Psalms of Solomon	Baruch
1–2 Paralipomena (1–2 Chronicles)	Hosea	Lamentations
1 Esdras	Amos	Letter of Jeremiah
2 Esdras (Ezra-Nehemiah)	Micah	Ezekiel
Esther	Joel	Susanna
Judith	Obadiah	Daniel
Tobit	Jonah	Bel and the Dragon
1–4 Maccabees		

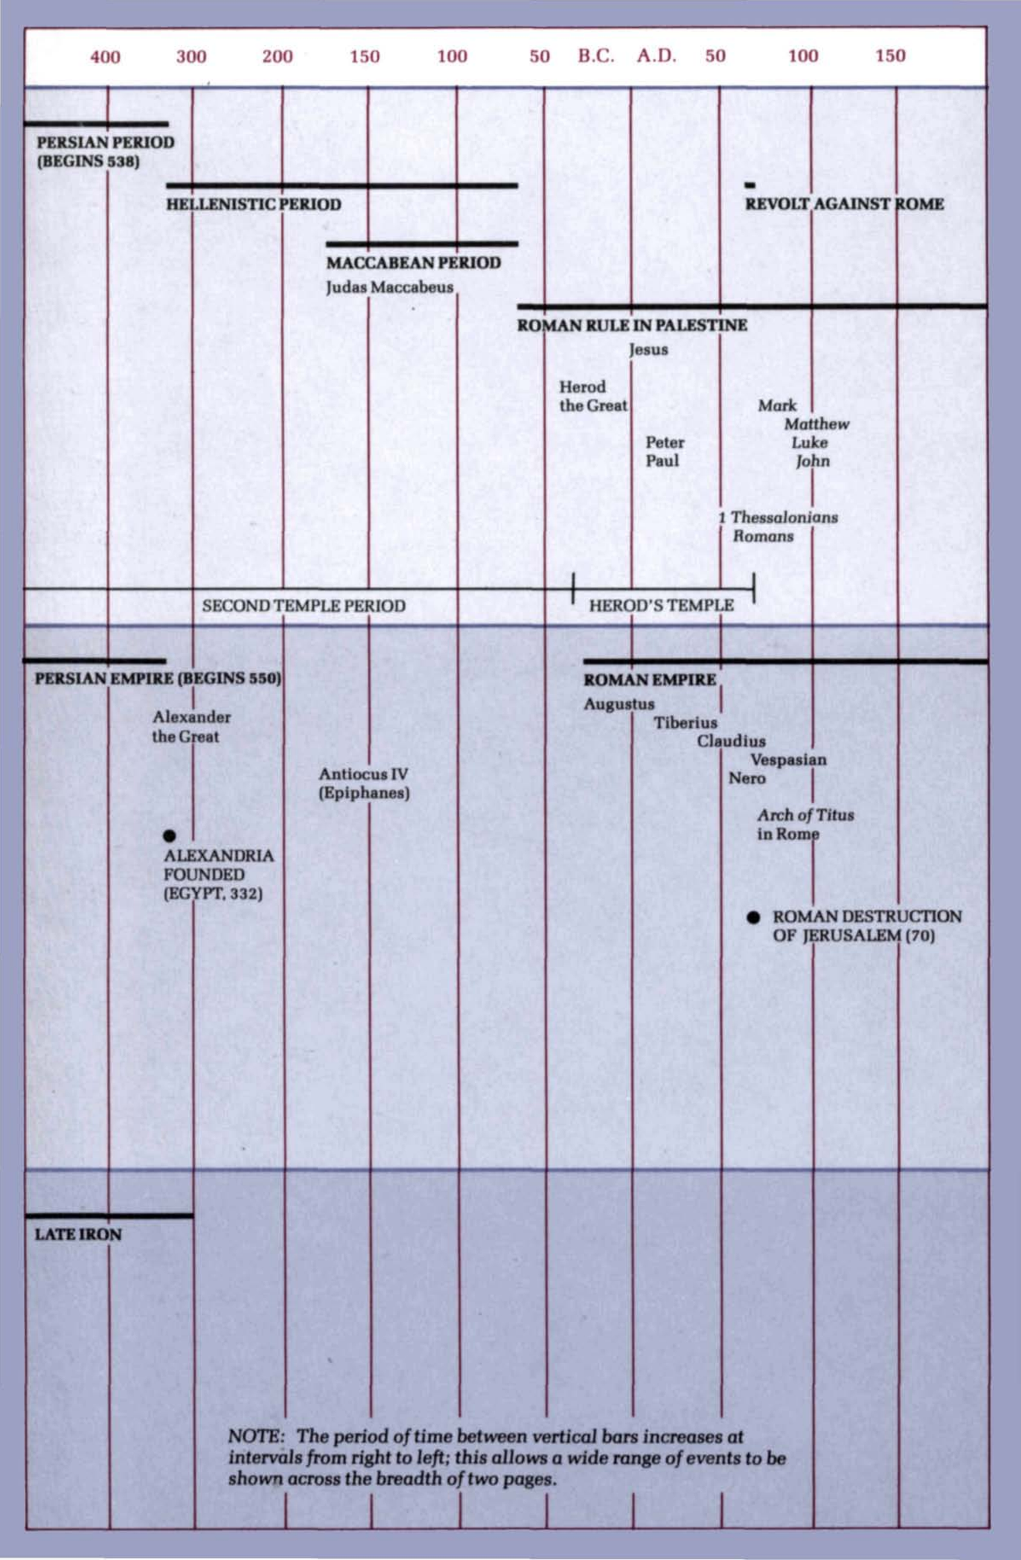
THE OLD TESTAMENT (OT)

Genesis	2 Chronicles	Daniel
Exodus	Ezra	Hosea
Leviticus	Nehemiah	Joel
Numbers	Esther	Amos
Deuteronomy	Job	Obadiah
Joshua	Psalms	Jonah
Judges	Proverbs	Micah
Ruth	Ecclesiastes	Nahum
1 Samuel	Song of Solomon	Habakkuk
2 Samuel	Isaiah	Zephaniah
1 Kings	Jeremiah	Haggai
2 Kings	Lamentations	Zechariah
1 Chronicles	Ezekiel	Malachi



THE NEW TESTAMENT (NT)

Matthew	Ephesians	Hebrews
Mark	Philippians	James
Luke	Colossians	1 Peter
John	1 Thessalonians	2 Peter
Acts	2 Thessalonians	1 John
Romans	1 Timothy	2 John
1 Corinthians	2 Timothy	3 John
2 Corinthians	Titus	Jude
Galatians	Philemon	Revelation



Deuterocanonical Books/Apocrypha: In Roman Catholic Bibles, the OT includes the following deuterocanonical books: (following Nehemiah) Tobit, Judith, Esther with the additions, 1–2 Maccabees; (following Song of Songs) Wisdom, Ecclesiasticus; (following Lamentations) Baruch including the Letter of Jeremiah; (following Ezekiel) Daniel with the additions.

In addition to these books, the Bible of the Greek Orthodox community includes 1 Esdras, the Prayer of Manasseh, Psalm 151, 3 Maccabees, with 4 Maccabees as an appendix.

Protestants regard the deuterocanonical books as not part of the OT canon and either do not include them in their Bibles, or print them in a separate section ("Apocrypha") following the OT or at the end of the Bible.

REFERENCE / CHRISTIANITY

"THE BEST COMPREHENSIVE, ONE-VOLUME DICTIONARY NOW ON THE MARKET." —*Biblical Archaeologist*

The HarperCollins Bible Dictionary puts the latest and most comprehensive biblical scholarship at your fingertips. Here is everything you need to know to fully understand the Old Testament, the Apocrypha, and the New Testament. An unparalleled resource, *The HarperCollins Bible Dictionary* explains every aspect of the Bible, including biblical archaeology, culture, related writings such as the Dead Sea Scrolls, the Bible's influence on Western civilization, biblical history, theological concepts, modern biblical interpretations, flora and fauna, climate and environment, crafts and industry, the content of individual books of the Bible, and more.

The HarperCollins Bible Dictionary features:

• Contributions by 193 noted experts on the Bible and the ancient Near East • More than 3700 entries covering the Bible from A to Z • Outlines for each book of the Bible • 590 black-and-white photographs • 53 color photographs • An updated pronunciation guide • 72 black-and-white maps • 18 color maps • Dozens of drawings, diagrams, and tables •

R.E.M. Roland E. Murphy, S.T.D.
George Washington Ivey Professor of Biblical Studies, Emeritus
The Divinity School
Duke University
Durham, North Carolina

C.A.N. Carol Ann Newsom, Ph.D.
Professor of Old Testament
Candler School of Theology
Emory University
Atlanta, Georgia

J.H.N. Jerome H. Neyrey, Ph.D.
Professor of New Testament Studies
University of Notre Dame
Notre Dame, Indiana

J.M.O. Julia M. O'Brien, Ph.D.
Associate Professor
Meredith College
Raleigh, North Carolina

K.G.O. Kevin G. O'Connell, S.J., Rev., Ph.D.
Jesuit Center
Amman, Jordan

S.B.P. Simon B. Parker, Ph.D.
Associate Professor of Hebrew Bible
School of Theology
Boston University
Boston, Massachusetts

L.E.P. Laurie E. Pearce, Ph.D.
Lecturer, Department of Classical and Modern Languages
University of Connecticut
Stamford, Connecticut

L.G.P. Leo G. Perdue, Ph.D.
Dean and Professor of Hebrew Bible
Brite Divinity School
Texas Christian University
Ft. Worth, Texas

D.M.P. Dana M. Pike, Ph.D.
Assistant Professor
Department of Ancient Scripture
Brigham Young University
Provo, Utah

J.R.P. Joshua R. Porter, M.A.
Professor Emeritus of Theology
University of Exeter
Exeter, England

J.L.P. James L. Price Jr. Ph.D. (D.)
Professor Emeritus of Religion
Duke University
Durham, North Carolina

J.D.P. James D. Purvis, Th.D.
Professor of Religion
Boston University
Boston, Massachusetts

C.Q. Corethia Qualls, Ph.D.
Archaeological Consultant
Kuwait National Museum
Kuwait City, Kuwait

A.F.R. Anson F. Rainey, Ph.D.
Professor of Ancient Near Eastern Cultures and Semitic Linguistics
Tel Aviv University
Tel Aviv, Israel

S.R. Susan Rattray, M.A.
3624 Richmond Blvd.
Oakland, California

S.B.R. Steven Breck Reid, Ph.D.
Associate Professor of Old Testament
Austin Presbyterian Theological Seminary
Austin, Texas

H.E.R. Harold E. Remus, Ph.D.
Associate Professor, Department of Religion and Culture
Wilfrid Laurier University
Waterloo, Ontario
Canada

J.H.P.R. John Reumann, Ph.D.
Professor Emeritus of New Testament and Greek
Lutheran Theological Seminary
Philadelphia, Pennsylvania

S.L.R. Suzanne Richard, Ph.D.
Adjunct Associate Professor of Old Testament
Drew University
Madison, New Jersey

K.H.R. Kent Harold Richards, Ph.D.
Professor of Old Testament
Iliff School of Theology
Denver, Colorado

J.J.M.R. J. J. M. Roberts, Ph.D.
William Henry Green Professor of Old Testament Literature
Princeton Theological Seminary
Princeton, New Jersey

C.J.R. Calvin J. Roetzel, Ph.D.
Arnold Lowe Professor of Religious Studies
MacAlester College
St. Paul, Minnesota

A.R. Alexander Rofé, Ph.D.
Professor of Bible
Hebrew University
Jerusalem, Israel

J.W.R. Joel W. Rosenberg, Ph.D.
Associate Professor, Hebrew Literature and Judaic Studies
Tufts University
Medford, Massachusetts

A.J.S. Anthony J. Saldarini, Ph.D.
Professor of Early Judaism and Christianity
Boston College
Chestnut Hill, Massachusetts

J.M.S. Jack M. Sasson, Ph.D.
Kenan Professor of Religious Studies
University of North Carolina
Chapel Hill, North Carolina

M.M.S. Marilyn M. Schaub, Ph.D.
Professor of Old Testament
Duquesne University
Pittsburgh, Pennsylvania

B.E.S. Bruce E. Schein, Ph.D.
Associate Professor of New Testament
Trinity Lutheran Seminary
Columbus, Ohio

L.H.S. Lawrence H. Schiffman, Ph.D.
Professor of Hebrew and Judaic Studies
Skirball Department of Hebrew and Judaic Studies
New York University
New York, New York

D.S. Donald Senior, Ph.D.
Professor of New Testament
Catholic Theological Union
Chicago, Illinois

P.L.S. Philip L. Shuler, Ph.D.
Professor of Religion
McMurry College
Abilene, Texas

D.J.S. Daniel J. Simundson, Ph.D.
Professor of Old Testament
Luther Northwestern Theological Seminary
St. Paul, Minnesota

D.M.S. Dwight Moody Smith, Ph.D.
George Washington Ivey Professor of New Testament
The Divinity School
Duke University
Durham, North Carolina

R.H.S. Robert H. Stein, Ph.D.
Professor of New Testament
Bethel Theological Seminary
St. Paul, Minnesota

D.W.S. David W. Suter, Ph.D.
Professor of Religious Studies
Saint Martin's College
Lacey, Washington

M.A.S. Marvin A. Sweeney, Ph.D.
Professor of Hebrew Bible, School of Theology at Claremont
Professor of Religion, Claremont Graduate School
Claremont, California

C.H.T. Charles H. Talbert, Ph.D.
Distinguished Professor of Religion
Baylor University
Waco, Texas

R.C.T. Robert C. Tannehill, Ph.D.
Academic Dean and Professor of New Testament in the Harold B. William Chair of Biblical Studies
Methodist Theological School in Ohio
Delaware, Ohio

H.M.T. Howard M. Teeple, Ph.D.
Executive Director
Religion & Ethics Institute, Inc.
Evanston, Illinois

P.Th Pamela Thimmes, Ph.D.
Assistant Professor of Religious Studies
University of Dayton
Dayton, Ohio

J.W.T. James W. Thompson, Ph.D.
Professor of New Testament
Abilene Christian University
Abilene, Texas

J.H.T. Jeffrey H. Tigay, Ph.D.
Ellis Professor of Hebrew and Semitic Languages and Literatures and Chair, Jewish Studies Program
University of Pennsylvania
Philadelphia, Pennsylvania

L.E.T. Lawrence E. Toombs, Ph.D.
Professor Emeritus of Religion and Culture
Wilfrid Laurier University
Waterloo, Ontario
Canada

W.S.T. W. Sibley Towner, Ph.D.
The Reverend Archibald McFadyen Professor of Biblical Interpretation
Union Theological Seminary
Richmond, Virginia

P.T. Phyllis Trible, Ph.D.
Baldwin Professor of Sacred Literature
Union Theological Seminary
New York, New York

G.M.T. Gene M. Tucker, Ph.D.
Professor Emeritus of Old Testament
Candler School of Theology
Emory University
Atlanta, Georgia

J.B.T. Joseph B. Tyson, Ph.D.
Professor of Religious Studies
Southern Methodist University
Dallas, Texas

J.U. Jeremiah Unterman, Ph.D.
Director and Professor
Hebrew College
West Hartford, Connecticut

J.M.W. James M. Weinstein, Ph.D.
Lecturer, Department of Classics
Cornell University
Ithaca, New York

D.B.W. David B. Weisberg, Ph.D.
Professor of Bible and Semitic Languages
Hebrew Union College-Jewish Institute of Religion
Cincinnati, Ohio

J.L.W. John L. White, Ph.D.
Professor of Theology
Loyola University of Chicago
Chicago, Illinois

R.A.W. Robert A. Wild, S.J.
President; Associate Professor of New Testament
Weston Jesuit School of Theology
Cambridge, Massachusetts

M.M.W. Marsha M. Wilfong, D.Min., Ph.D.
Associate Professor of Homiletics
University of Dubuque Theological Seminary
Dubuque, Iowa

S.K.W. Sam K. Williams, Ph.D.
Associate Professor of Religion
Colorado College
Colorado Springs, Colorado

R.R.W. Robert R. Wilson, Ph.D.
Hoober Professor of Religious Studies and Professor of Old Testament
The Divinity School
Yale University
New Haven, Connecticut

V.L.W. Vincent L. Wimbush, Ph.D.
Professor of New Testament and Christian Origins
Union Theological Seminary
New York, New York

D.P.W. David P. Wright, Ph.D.
Assistant Professor of Hebrew Bible and Ancient Near East
Brandeis University
Waltham, Massachusetts

Preface

THE PURPOSE OF this dictionary is to make more widely available, and to an audience of nonspecialists, the results of the best of current biblical scholarship. In pursuing that goal, technical language has been avoided wherever possible, and where technical terms are used, they are carefully defined. When persons or places are mentioned, they are identified, and their dates are given with as much precision as is possible. Words in the biblical languages are defined and translated, with the result that information can be gleaned from the articles by persons of widely varying educational backgrounds. Those who know biblical history will learn here the latest results of the best scholarship; those who will here experience for the first time the thrill of the pursuit of historical knowledge will have opened up to them a whole new world of information.

This dictionary stands as the latest in the long line of Harper's Bible dictionaries that have provided help in understanding the world of Scripture. This is, however, a totally new edition. All of the articles have been newly written, illustrations newly selected, and maps newly designed. It also represents a unique venture in the field of publishing since it is the result of a cooperative project between a major learned society, the Society of Biblical Literature (SBL), and a major publishing house, Harper & Row. In this joint effort, the Society of Biblical Literature has assumed responsibility for the content of the Dictionary, while Harper & Row has handled matters of format and editorial style. This has assured the widest circulation of what is surely the most authoritative volume in its field.

Contributors: The 179 scholars who have contributed their knowledge and skills to this volume come from some seven countries, and are acknowledged experts in the fields about which they have written here. They were chosen because of their knowledge and their ability to communicate to scholars and nonscholars alike. They span the spectrum of religious thought within the Judeo-Christian heritage, and the majority of them have published either books or articles, or both, on the subjects about which they have written for this dictionary. The authors do not, however, write from any confessional perspective, but rather from the broad perspective of expert biblical knowledge. Their intention is not to convert the reader to a particular religious point of view, but rather to provide information and to aid understanding.

The result is a highly readable, authoritative, and reliable summary of the best of contemporary knowledge about the Bible and the world from which it emerged.

The articles, while written by experts who are in the forefront of their respective fields of knowledge, are nevertheless designed to give the reader a consensus of current scholarly opinion. If novel theories are expressed, whether those of the author or of others, they are clearly

identified as that. Because the articles represent great care in reaching conclusions only where the evidence will support such conclusions, much of what was once considered certain will be shown to rest on the smallest foundations of factual knowledge, while other things about which the reader may have been in confusion will be shown to have enough evidence to clear up the difficulties. Scholarship is an adventure in learning, in which new facts constantly open new horizons of information, and the pages of this dictionary reflect that adventure.

Many of the articles have been written by just those people whose discoveries in archaeology, literature, history, art, music, and language have contributed to the explosion of knowledge about the Bible and its world—discoveries that have been reported in the newspaper as well as the scholarly journals within the past two decades. Because some of the discoveries are so recent, sufficient time has not elapsed for a consensus to form on their meaning. For that reason dates for the same event may differ by a year or two in different articles, but in every case they rest on expert evaluation of the most recent evidence available. The designations B.C. and A.D. are still the most widely recognized way of identifying historical dates, and they have been used in this dictionary. They are used here as historical conventions and are not meant to be interpreted as confessional statements.

Because the authors are experts in biblical languages as well as history, they have often made their own translations of the original languages of the Bible. When published translations have proven adequate, they have been used, most often the Revised Standard Version of the Bible, but other translations have been cited as well. When the authors give their own translations, it provides for the reader a new insight into the meaning of the published translations most frequently used.

Range of the Articles: The articles themselves represent every name used in the Bible three times or more, and those important names mentioned even less frequently have also been included. In addition to all important names of persons and places found in the Bible, there are articles on all important theological terms, on every book in the Bible, including the Apocrypha, on all major archaeological sites, and on all of the words used in the Bible in an important or unusual way. In addition, there are general articles on the impact of ancient cultures on the language and history of the biblical peoples, articles on Assyria, Babylonia, Persia, Greece, and Rome, to mention but five. There are articles on the languages of the Bible, and on the kinds of literature the Bible contains, articles on the economics of biblical times, on the music and art, and on the sociological structures of biblical and nonbiblical peoples. There are major articles on the Temple in Jerusalem, on the historical geography of the biblical lands, and on the worship practices of ancient Israel and those of its neighboring cultures. There are definitive articles on Moses, Jesus, and Paul, and on the various manuscripts of the biblical books, from which scholars must determine which most closely represent the lost original copies of those writings. There are highly informative articles on the history of the translation of the Bible into English, and on the ancient writings that reflect the Judeo-Christian heritage, but which were not included in the Bible, such as testimonies attributed to the patriarchs Abraham,

Isaac, and Jacob, and writings attributed to disciples such as the Gospel of Thomas.

Of major importance are the archaeological articles, all of which are newly written, often by the people who led or participated in the expeditions that provided the latest data. There are major articles on the history of biblical archaeology, on its methods, and on its results. There are articles on major archaeological finds of the recent past: Ebla, a vast empire of the third millennium B.C. whose existence was unknown until the discovery of its archives in the recent past; Nag Hammadi, with its original writings of a kind of Christianity, Gnosticism, which had heretofore been known principally through secondary references. There are also authoritative evaluations of the best current thinking on such famous archaeological finds as the Dead Sea Scrolls, and the ancient royal correspondence from such sites as Tell el-Amarna, Nuzi, and Mari. How they affect our understanding of biblical history and the clues they give to a better knowledge of the languages of the Bible will be much clearer to the person who reads these articles carefully.

Format and Illustrations: The format of the articles is designed to yield the most information to the reader. When the article concerns a term that is unusual, or based on an ancient language, the pronunciation and derivation of the word are given, along with its meaning in the original language, if that meaning is known. The word is defined in terms of its use in the Bible, or its relevance to the biblical materials, and the body of the article then discusses the meaning that term has for our understanding of the Bible. Cross references will often be found at the end of the article, showing where to look to find more information. Longer articles also frequently have bibliographies appended to them, which inform the reader about books or articles where more information can be gained than can be included in the limited space of a dictionary. If the article concerns a book in the Bible, an outline of the book will also be given, except in the case of a few books where the contents do not lend themselves to such treatment.

In addition to providing completely new articles, the pages of this book are also filled with illustrations, both photographs and line drawings, which act as a further aid in learning about the Bible. The illustrations have been chosen with great care, many of them of ancient art and artifacts contemporary with the biblical writings themselves, and in many cases the illustrations are those recommended, or even provided, by the expert authors of the various articles they illustrate. The maps, both black and white, and color, have been carefully chosen for clarity and accuracy, and many have been commissioned especially for this dictionary. In all cases they have been brought up to date on the basis of the latest archaeological and geographical information. Such maps and illustrations will be found both in the pages of the dictionary and in special sections within and at the back of the book. In every case, the captions indicate the significance of the material, and to what article or articles it is related.

Even the tables of abbreviations contribute to the authoritative nature of this dictionary. They give the complete tables of abbreviations for all materials and texts cited by those who study and write about the Bible. Their presence alone makes this book a valuable reference tool.

Obviously, such an undertaking could not be brought to completion without the cooperation of many people. Not all of them can be named here, but some who have given special help must be cited. The names of the associate editors and the contributors, without whom of course none of this would have been possible, are listed at the beginning of this dictionary. Their willingness to share their expertise has made it possible to publish this one-volume dictionary of unparalleled authority. The people at Harper & Row have shown great patience in dealing with the eccentricities of scholars, and here John Shopp, Shelley Thacher, Dorian Gossy, and Steve Dietz must receive a special word of appreciation. The editor's tasks would have been far more difficult without the ready help of Martha Aycock, the reference librarian at Union Theological Seminary in Virginia, and the secretarial expertise of Brenda Lee. The Society of Biblical Literature, under whose scholarly supervision this dictionary was produced, has been most cooperative, under the leadership of Prof. Kent H. Richards, the executive secretary, and Dean Leander E. Keck, who was chairman of research and publications for the Society when this project began.

All of these, and many more, have contributed to this adventure in scholarship and publication. Readers will benefit from their contributions as the strange yet familiar world of the Bible parades before them from the pages of this book. Ancient customs, ancient dress, ancient gods and goddesses and the worship practices accorded them, ancient business practices with their coins and measurements, ancient cities and peoples and empires, ancient thinkers who pondered for their times the meanings of human life—all these and more will parade before the attentive reader of these articles, allowing that ancient world of the Bible to achieve a liveliness and clarity available only to those who have access to such information. A whole world awaits exploration in these pages. The scholars of the SBL invite the readers of this dictionary to share that adventure with them.

THE GENERAL EDITOR

Preface to the Revised Edition

LIKE ITS PREDECESSOR, *Harper's Bible Dictionary,* published in 1985, this revised and enlarged volume places in the hands of its readers reliable, authoritative, and readable articles on all important names and places in the Bible, along with discussions of the major disciplines used by modern biblical scholars in their continuing pursuit of knowledge about this ancient collection of writings.

All of the major articles and entries on biblical books have been reviewed and, where necessary, revised. Bibliographies have been updated where necessary, and some articles have been lengthened in light of additional information available in the last decade. Where appropriate, new archaeological evidence has been taken into account, and many of the maps have been brought up to date. In addition to such revisions, about 100 new articles have been added on such diverse topics as land, judges, the emperor cult in Rome, and Masada as well as articles on some of the newer methods being used in the interpretation of the Bible, such as narrative criticism and feminist and liberation hermeneutics. In all, some 108 scholars have taken part in these reviews and revisions, many of them persons who had also worked on the first edition, but also a number of younger scholars who have risen to prominence in the past decade.

As before, this edition of the Dictionary can be used with all major English translations of the Bible. In addition to those available when the first edition was published in 1985, some references have been added from the New Revised Standard Version (NRSV) where, in the opinion of a given author, a significant difference in the translation has occurred.

The editorial staff has remained the same, with Pheme Perkins and Michael Fishbane serving as editorial consultants, and Roger Boraas and William O. Walker, Jr., sharing editorial responsibility with the general editor.

This volume represents a further step in the ongoing effort of the Society of Biblical Literature to make available in responsible form the results of scholarly biblical study to a wider audience. The intention of this revision and enlargement has been to make a useful tool for biblical studies better and to bring it up to date. The editors along with the Society of Biblical Literature believe they have achieved that goal.

Opposite: Assyrian slingers attacking the Judean fortress of Lachish. The Assyrian king Sennacherib's conquest of Lachish in 701 B.C. was recorded in bas-relief on the walls of his palace at Nineveh.

1

2

3

1 In 701 B.C. Assyrian king Sennacherib conquered most of Judah including the fortress-city of Lachish. The victory was recorded in remarkable detail on bas-reliefs at his Nineveh palace. This scene is poignant testimony to the plight of his victims, who were deported with only what they could carry on their backs.

2 Tell ed-Duweir, the site of ancient Lachish viewed from the air, appears as an imposing mound in the foothills of Judah. The Judahite palace-fort, razed by Sennacherib, is the rectangular raised area on the far side of the top of the mound. **3** The storming of the Lachish gate-tower. On a track of logs a siege engine equipped with a spearlike beam batters the city gate. One of the Assyrian soldiers within the engine pours water on its front from a long-handled ladle to extinguish firebrands thrown by the Lachish defenders atop the walls. From a door in the tower emerge men and women fleeing the doomed city.

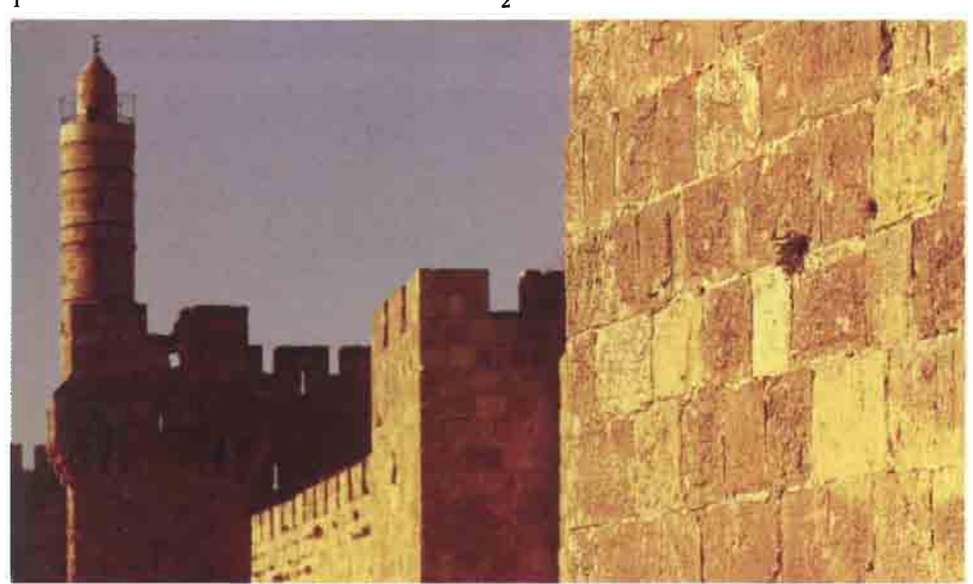
2

3



1 The Black Obelisk of Shalmaneser III (858–824 B.C.). This detail shows King Jehu of Omri—the name the Assyrians gave to ancient Israel—prostrate in obeisance before Shalmaneser. **2** A copper crown, one of 416 copper objects found in the "Cave of the Treasure," in the Nahal Mishmar in southern Palestine; fourth millennium B.C. **3** Hill of Shemer. Strategically located beside major routes to Jerusalem on the south, Megiddo and the Jezreel Valley on the north, the Mediterranean Sea and coastal plain on the west, and Shechem and the Jordan Valley on the east, it is here that King Omri built the city of Samaria, capital of the northern kingdom of Israel, in the early ninth century B.C.

1

2

3

1 The stele of Hammurabi. From the reign of the Babylonian king, 1728–1686 B.C., it is inscribed with the "Code of Hammurabi," a prologue, 282 laws, and an epilogue, which parallels in some respects the ancient Hebrew Covenant Code. In the scene at top, Hammurabi worships the enthroned sun god Shamash.
2 Statue head of Gudea, *ensi* or local governor of the city-state of Lagash from 2141 to 2122 B.C. Lagash was close to Ur, traditional home of the biblical Abraham.
3 Section of the wall of the Old City of Jerusalem. The tower, today called the Tower of David, rises from the foundations of the original Phasael Tower, constructed by Herod the Great after 40 B.C. to protect his palace at the vulnerable northwestern corner of the city.

2a

1, 2a, 2b Fresco paintings from the western wall of the third-century A.D. synagogue at Dura-Europos, a city on the Euphrates River in Syria. The top panel, "The Consecration of the Tabernacle and Its Priests," is dominated by the figure of Aaron, portrayed as high priest in his robes of office. Beside him is a templelike structure, the Tabernacle, with the *menorah*, an altar, and incense burners aflame in front. At his feet is a stone wall representing the synagogue courtyard with its three entrances (cf. Exod. 40:2–8). To his left are two trumpeters (cf. Num. 10:2–3) and sacrificial animals—a humped bullock and a white, fat-tailed ram. The bottom "Exodus" panel, which begins its narrative at the right (2b), depicts Moses three times, from far right to left: Moses strides toward the Red Sea with staff upraised leading the ancient Israelites out of Egypt, represented by the wall with the red and black columns in front, which symbolize the pillars of fire and cloud that led the Israelites through the wilderness by

(Continued on facing page)

2b

(*Continued from previous page*) night and day (Exod. 13:21–22). In the middle Moses holds back the sea while the people cross. Finally, on the left side, under the protective hands and forearms of God appearing at the top of the panel, Moses holds his staff down to touch the pool of Marah (Exod. 15:23–25a). The twelve figures to his right represent the numbering of the tribes of Israel (Num. 1).

1 Part of the limestone gable of the oldest known Holy Ark (third century A.D.), which sheltered a wooden Torah shrine at the synagogue of Nabratein in Upper Galilee. Shows two rampant lions surmounting the decorated gable. A hole is pierced in the center for a chain from which to hang the eternal light. The pediment weighs one thousand pounds and was toppled to the ground by an earthquake; it was reused, upside down and unrecognized by excavators until 1981, in the foundation of a later synagogue prayer platform.

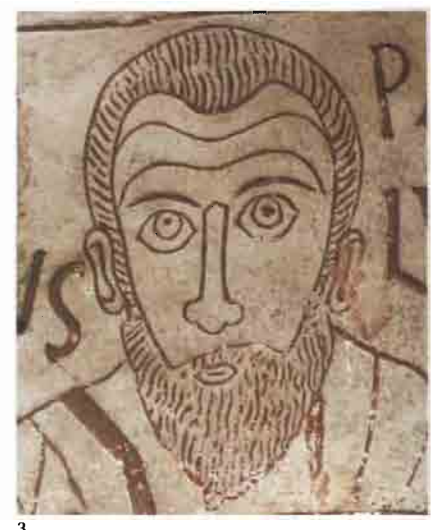
1

2

1 Jesus washing Peter's feet (John 13:3–11). Manuscript page from *The Four Gospels*, twelfth century. **2** White limestone remains of the synagogue at Capernaum, late second to fifth century A.D. Beneath it has been excavated an earlier synagogue of black basalt —contemporaneous with the ruins of the first-century houses seen in the foreground—in which Jesus may have preached (cf. Mark 1:21; John 6:59).

1

2



3

1 Jesus as the Good Shepherd was a favorite symbol in the catacombs and on the sarcophagi of early Christians (cf. Ps. 23; Luke 15:4 – 6). This wall painting is from the third-century catacomb of St. Priscilla, Rome. **2** Jerusalem, view of the Temple Mount (site of the ancient Temple) from the Mount of Olives. From the time of its capture by the Israelites under David nearly three thousand years ago, Jerusalem was the key city in biblical history. According to the NT, Jesus entered Jerusalem from the Mount of Olives in the climactic final week of his ministry.
3 The river Jordan just above where it empties into the Dead Sea. The Moabite hills rise in the background. The NT tells that Jesus was baptized by John in the Jordan (Mark 1:9).

3

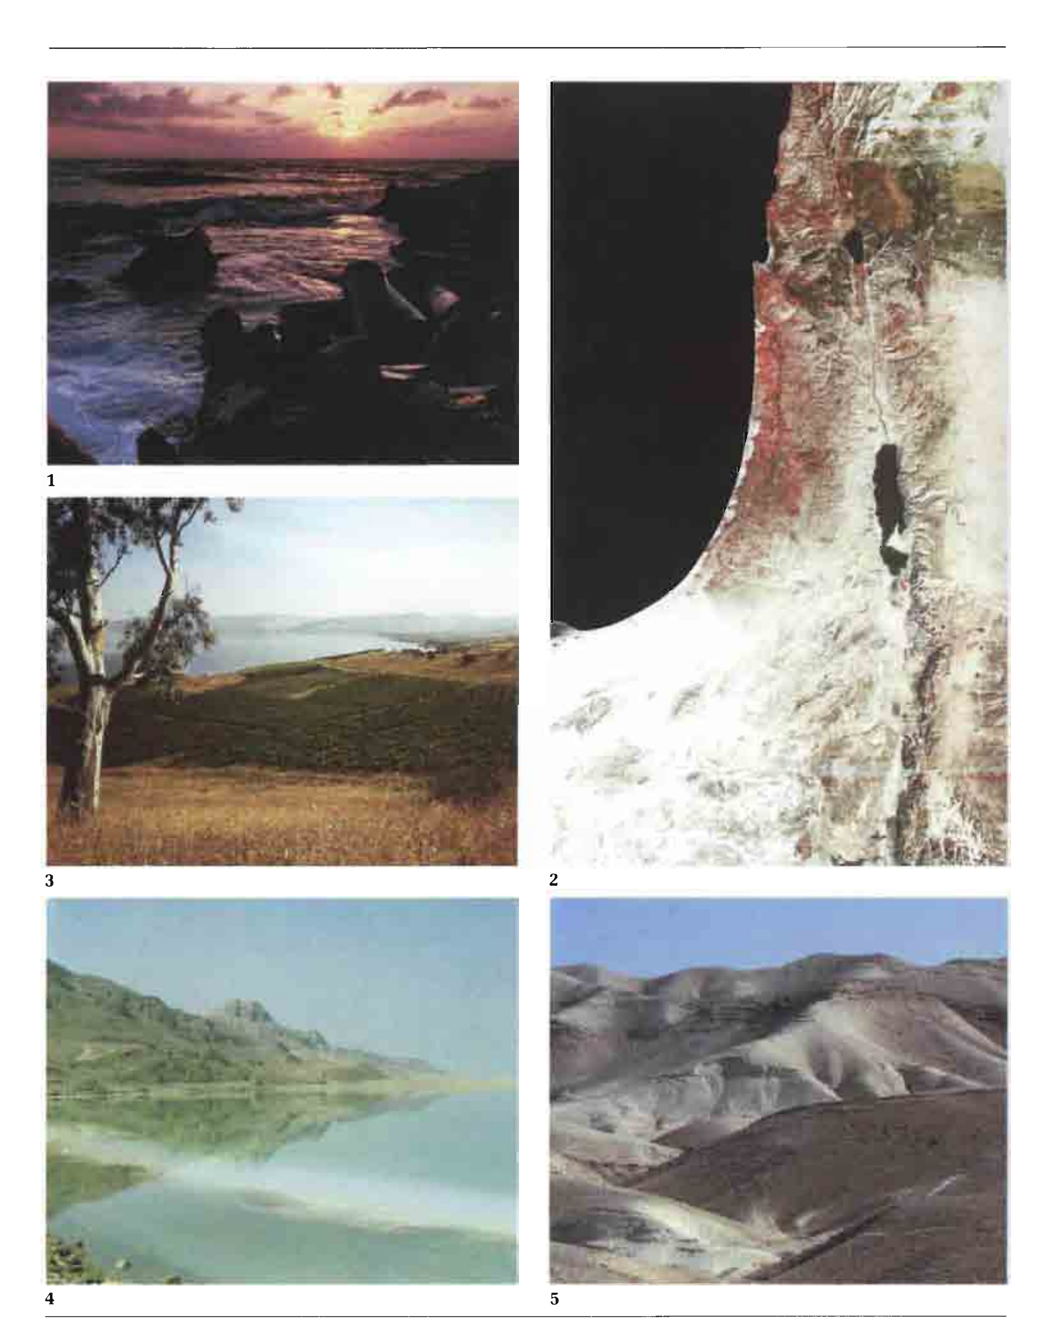
1 Aerial view of ancient Ephesus from the southwest. The agora (foreground) and theater seating twenty-four thousand behind it date from the first and second centuries A.D. when Ephesus was the fourth largest city of the Roman Empire. In this or an earlier theater, Paul's opponents in Ephesus gathered to defend their worship of Artemis (Acts 19:28–41). **2** Corinth, first founded in the tenth century B.C., was an important city in the NT. In the foreground is the *bema*, or platform, situated in the center of the city forum and probably Gallio's "tribunal" before which Paul was brought (Acts 18:12–17). Behind the *bema* rises the Acrocorinth.

3 Paul, as depicted in the sepulcher of the child Asellus, ca. 313, Rome.

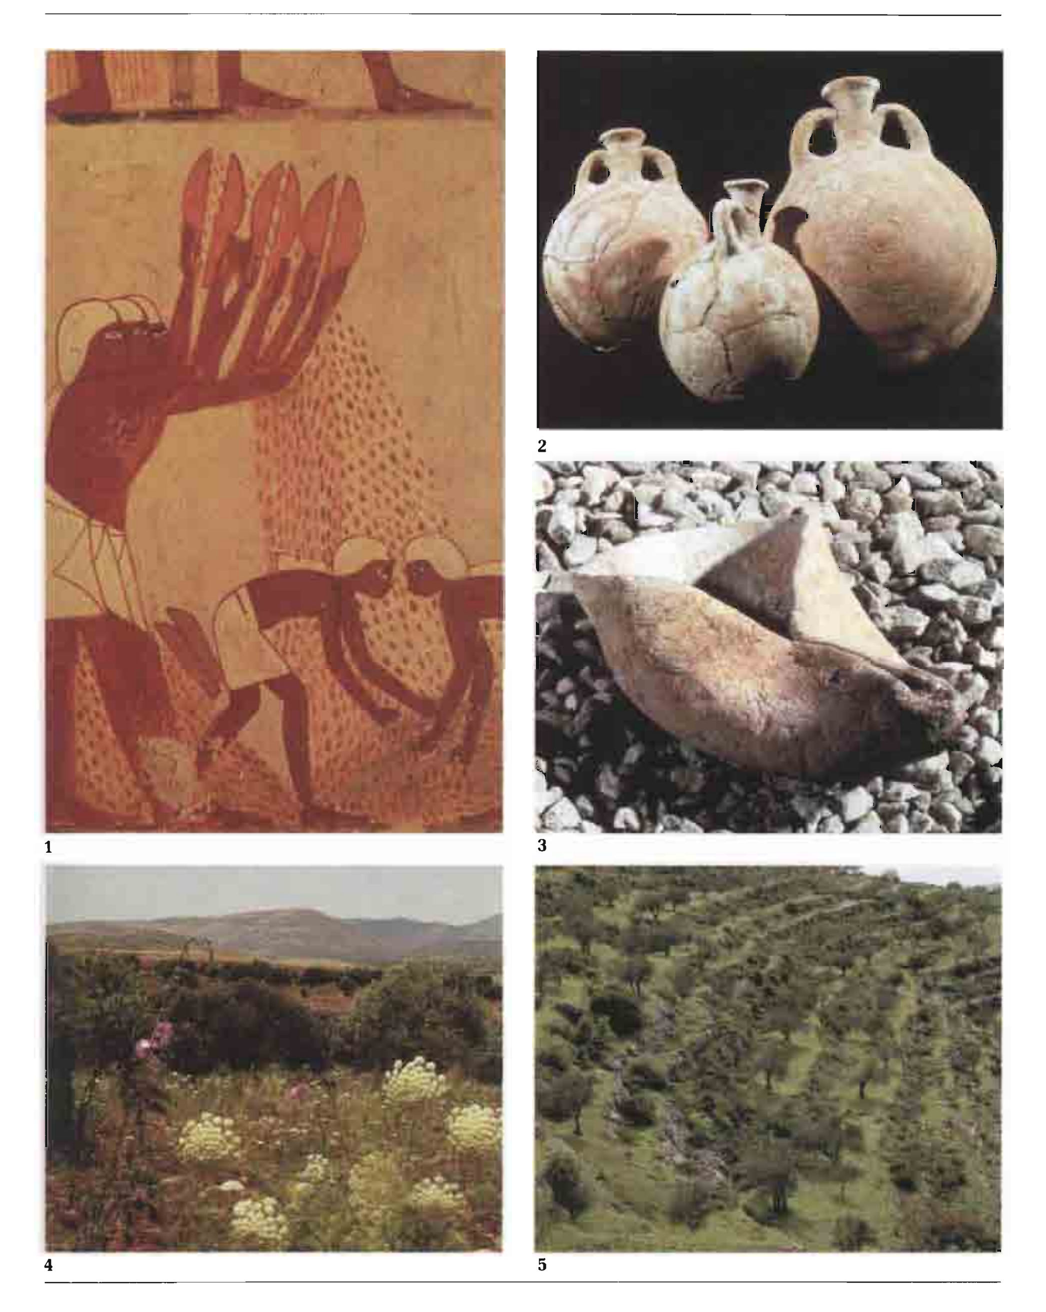
1 Painted ceramic horse from a tomb near the Philistine city of Gaza, sixth century B.C. **2** Marble sarcophagus of the Roman prefect Junius Bassus, Rome, A.D. 359. The subject matter, depicting scenes from the OT and the NT, represents a newfound freedom of expression for Christians under the emperor Constantine and the Edict of 325. **3** Sumerian bull-lyre, an ancient musical instrument found in a royal burial pit at Ur from the third millennium B.C.. This detail shows the bull's head with its original gold overlay and lapis lazuli beard and hair. **4** Head of an ancient Near Eastern man as depicted on a glazed terra-cotta tile from the Temple of Ramesses III, twelfth century B.C. **5** Statues, from left to right, of Melchizedek, Abraham holding Isaac, Moses, Samuel, and David line the jambs of the Royal Portal at Chartres Cathedral (ca. 1145–1155).

1 Carpet page with a double-armed cross and eight medallions from the *Book of Kells*, an illuminated Bible manuscript from the eighth century. **2** Initial B from the *Windmill Psalter*, thirteenth century. Within this letter is a depiction of the Tree of Jesse showing Jesse reclining in the lower loop, David crowned in the middle, and the Virgin and Child in the upper loop. Also shown are the figure of God at the very top, the creation story interwoven in the foliage, the four major and twelve minor prophets, and the symbols of the four Evangelists in the corner medallions. **3** Prism of Sennacherib. It records Sennacherib's conquest of Judah in 701 B.C. and reads in part, "[Hezekiah] I shut up like a caged bird in his royal city of Jerusalem." **4** The so-called Marzeah Tablet, showing the wedge-shaped marks of cuneiform script, in this case Ugaritic from the fourteenth century B.C.

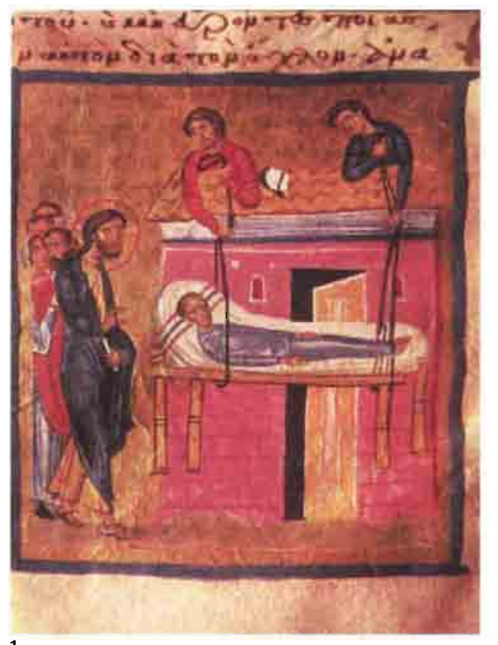
1



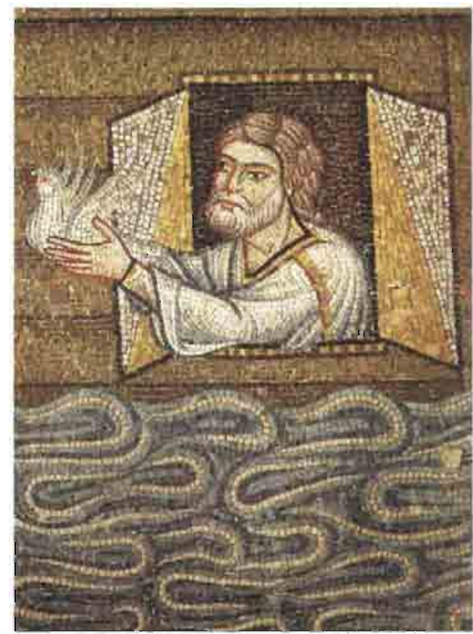
2



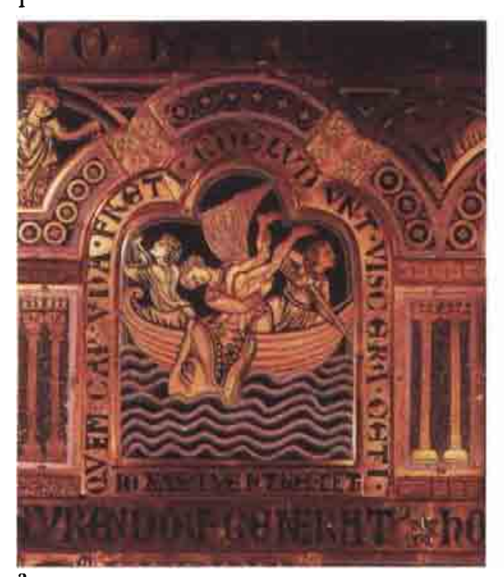
3



1 Isaiah Scroll "A," one of the Dead Sea Scrolls from the Qumran caves, open to columns 32 (right) and 33, Isa. 38:8–40:28. The Hebrew is in a Hasmonean script, ca. 100 B.C. The break in the second line of the left-hand column may have been to emphasize what follows: "A voice cries: 'In the wilderness prepare the way of the LORD, make straight in the desert a highway for our God' " (Isa. 40:3). **2** A section of the *Pesher* or commentary on the book of Habakkuk found at Qumran. It is written in Hebrew using the Jewish square script, probably of the Herodian type (50 B.C.–A.D. 40). **3** A facsimile of a page from Codex Sinaiticus, showing the opening of the Gospel According to Matthew. This parchment manuscript of the Bible, written in Greek and dating from the fourth century A.D., was found at the Monastery of St. Catherine, Sinai, in the nineteenth century.



1 Columns that lined a main street in Herod's city of Caesarea, first century B.C., lie in ruins at the edge of the Mediterranean Sea. **2** Aerial view, from 570 miles above the earth, of Israel and surrounding area shows the Dead Sea, the Sea of Galilee, mountains, deserts, and (at upper left) the Mediterranean Sea. **3** The Sea of Galilee, variously referred to in the Bible as the Sea of Tiberias, Lake of Genessaret, or the Sea of Chinnereth, is a harp-shaped freshwater lake about thirty-two miles around, located in northern Palestine. **4** The Dead Sea—also called by various names in the OT and not mentioned in the NT—is actually a lake into which the river Jordan flows. Because of its high mineral content (25 percent) the Dead Sea does not support marine life. **5** The Wilderness of Judea, west of the Dead Sea, was not traversed by major trade routes due to its inimical terrain. This is the kind of countryside envisioned by the Evangelists when they describe the temptations of Jesus (e.g., Luke 4:1–2).



1 Ancient Egyptians winnowing with wooden scoops, much as the ancient Israelites did with shallow baskets and as is still done in many places in the Near East. A mural from the Tomb of Mennah, scribe of Thutmose IV (fourteenth century B.C.). **2** Ceramic "pilgrim flasks" from the cemetery of Deir el-Ballah, thirteenth century B.C. **3** A Hellenistic terra-cotta lamp dates to the Maccabean era (167–63 B.C.). Its typical Greek form, with a long nozzle for the wick and a broad opening in the cover to receive the oil, indicates it was probably imported into ancient Israel. **4** Flowers blossoming in the countryside of Galilee along the way to Safed. **5** Terraced rows of olive trees near Antipatris along the road from Jerusalem to Caesarea. Hardy enough to grow almost anywhere, the olive tree was ubiquitous in the biblical landscape. Its fruit was eaten and the oil derived from it had many uses: in cooking, for lamps, as a medicine, for anointing, and in sacrifices.

1 Interior of Hagia Sophia in present-day Istanbul. One of the most imposing structures in the history of architecture, the building was constructed in the sixth century as a Christian church by the Byzantine emperor Justinian. With the Turkish conquest of Constantinople (the older name of the city) in 1453, Hagia Sophia became a mosque; today it is a museum. **2** Elijah. Detail of the Transfiguration mosaic pictured below. **3** Christ rises above the figures of Moses on the right, Elijah on the left, and John, Peter, and James below. Medallions surrounding the scene depict the other nine apostles and major and minor prophets of the OT. The prominence of Moses and Elijah, along with Peter, James, and John, suggests the mosaic takes its theme from Christ's transfiguration (Matt. 17:1–8). The mosaic is in the apse of the Church of St. Catherine, Sinai, also built by Justinian in the sixth century.

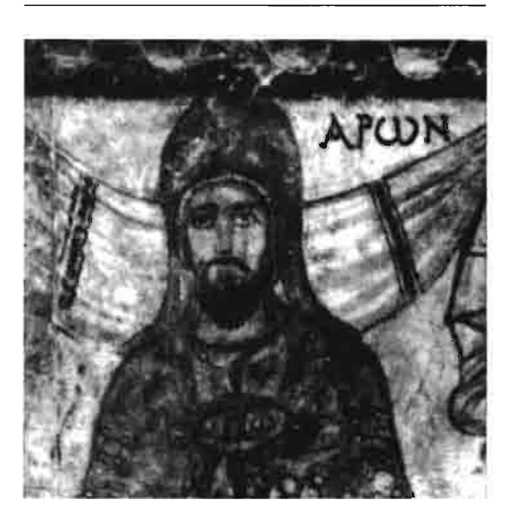
3

1 The annunciation to Mary by the angel Gabriel. The book in Mary's hand is open to the passage from Isaiah, "Behold, a young woman shall conceive and bear a son" (7:14). Detail of a painting by Masolino da Panicale ca. 1430. **2** Sarah and Abraham. Sarah's remarkable conception of a son in her old age (Gen. 17:15–19) was a continuation of God's promise to Abraham, regarded as the father of the Israelite people, that his descendants would be a blessing for the world. Detail of a Russian icon. **3** Abigail intercepts King David and persuades him not to harm her husband, Nabal, whom he has come to kill for refusing to recognize his authority (1 Sam. 25). Detail from a thirteenth-century French miniature.



A, first letter of the alphabet, commonly used to designate Codex Alexandrinus, a fifth-century A.D. parchment manuscript of the Greek Bible. Apparently written in Egypt (Alexandria?), its presentation by the Patriarch of Constantinople to King James I of England was arranged in 1624, but because of delays, it did not arrive in England until 1627, by which time James had died and been succeeded by Charles I. It was presented as part of the Royal Library to the British Museum in 1757, where it is currently on display. It consists of 773 leaves (630 OT; 143 NT), each measuring 12-5/8 by 10-3/8 inches with two columns of writing to the page; originally it may have contained 820 leaves. At the end stand the two Epistles of Clement, with some pages missing; the table of contents indicates that these were followed by the Psalms of Solomon. ***See also*** Codex; Texts, Versions, Manuscripts, Editions. B.M.M.

Aaron (air'uhn), the brother of Moses and Miriam. The name is of uncertain meaning but may be Egyptian, as are other names among the tribe of Levi, to which Aaron belonged.

In Mic. 6:4, the only reference to him in the prophets, Aaron is said to have been sent by God, together with Moses and Miriam, to lead Israel from Egypt (cf. Josh. 24:5; 1 Sam. 12:6, 8; Pss. 77:20; 105:26) and this conforms to the representation of him in the earliest Pentateuchal strata. There he appears as Moses' helper and joint leader in the events of the Exodus, and there is no evidence of his having specifically priestly functions. Rather, he is depicted as a prophet (Exod. 7:1), particularly in the sense of one who announces the divine will (Exod. 4:16; 16:9; Num. 14:26–28). He accompanied Moses and the elders of Israel on important sacrificial occasions (Exod. 18:12; 24:9–11). He and Hur held up Moses' hands during the battle with Amalek (Exod. 17:12), these two acted as judges when Moses was absent (Exod. 24:14), and, along with Moses, Aaron received the report of the spies (Num. 13:26).

All these, and other, references (e.g., Exod. 4:27–31) suggest that Aaron, together with other now rather shadowy figures, such as Miriam, Hur, and the elders, once played a distinctive, even an independent role, in the Exodus events, an observation that may be confirmed by the traditions that show Aaron in an unfavorable light because of his opposition to Moses, notably Num. 12:1–16, but also by the episode of the golden calf (Exod. 32). However, in the early Pentateuchal material he is clearly subordinated to Moses as his agent and indeed is assimilated to the greater leader. Thus a miraculous rod, which originally belonged to Moses (Exod. 4:2–5, 17), is also attributed to Aaron; with it he causes the Egyptian plagues (Exod. 7:9–12, 19; 8:5–7, 16–17). Both Aaron and Moses suffer the Israelites' hostility in the wilderness (Num. 16:1–3; 20:2), both are denied entrance to

Aaron portrayed as high priest in his robes of office on the west wall of the third-century synagogue at Dura-Europos.

Canaan for the sin of striking the rock (Num. 20:12), and both die on a mountain outside it (Deut. 32:48–52).

In the later priestly sources of the Pentateuch (Exod. 25–31; 35–40; all Leviticus; Num. 1–10; 15–19; 25–35), Aaron is given very much greater prominence. Here he appears essentially as the ancestor of the Aaronite priesthood that finally emerged at Jerusalem after the Exile: the story of the budding of Aaron's rod (Num. 17:1–11) seems designed to establish the claims of the Jerusalem clergy over rival claimants. Aaron and his sons alone are to serve as priests (Exod. 28:1), to offer sacrifices (Num. 8:1–7), and to bless the people (Num. 6:22–27). He fathers an everlasting priesthood (Exod. 40:14; Num. 25:13), and his successors in his office are given supreme authority, even over the secular leader (Num. 27:21; cf. Ecclus. 45:17). In particular, the figure of Aaron represents the high priest and the position he held as the head of the Jerusalem Temple state in postexilic times, where he took over much of the role of the former king. So Aaron was anointed (Lev. 8:12), as was the Israelite king, and the special vestments that he wore were those worn by pre-exilic monarchs (Exod. 28:1–38); such seems certainly to be the case with the breastpiece (Exod. 28:15–30) and the turban and its gold plate (Exod. 28:36–38). On him centers the particular priestly concern with atonement, for it is he, and his high-priestly successors, alone who officiate on the Day of Atonement (Lev. 16:32–34).

In later Jewish thought, the picture of Aaron is still further developed. He is the most prominent figure in the list of Israel's great men, much more even than Moses, in Ecclus. 44–49, and the high-priestly vesture is endowed with symbolic and cosmic significance (Wisd. of Sol. 18:24). ***See also*** Aaronites; Leviticus; Priests; Temple, The.

Bibliography

Cody, A. *A History of Old Testament Priesthood.* Rome: Pontifical Biblical Institute, 1969.

Noth, M. *A History of Pentateuchal Traditions.* Englewood Cliffs, NJ: Prentice-Hall, 1972. Pp. 178–182.

J.R.P.

Aaronites (air´uh-nits), a term equivalent to "sons of Aaron" (Lev. 1:7) or "house of Aaron" (Ps. 115:10), indicating the postexilic view that the whole priesthood was descended from Aaron. It was divided into twenty-four families, each serving in the Temple for a week, sixteen claiming descent from Aaron's elder son Zadok and eight from his younger son Ithamar (1 Chron. 24:1–19). Zechariah, the father of John the Baptist, was a member of such a division of priests (Luke 1:5, 8–9). ***See also*** Aaron; Priests.

Ab (ab; from Akkadian *abu*), the fifth month in the Jewish sacred calendar equivalent to the eleventh month in the Jewish civil calendar. It is usually parts of July and August. ***See also*** Time.

Abaddon (uh-bad´uhn; Heb., "destruction"). **1** In the OT, the dwelling place of the dead. It is used as a synonym for Sheol, the Hebrew term for the underworld (Job 26:6; Prov. 27:20) and is closely associated with death and the grave (Job 28:22; Ps. 88:10–12). **2** In the NT, the Hebrew name for the ruler of the Abyss, whose Greek name was Apollyon, "the Destroyer" (Rev. 9:11). ***See also*** Abyss; Eschatology; Gehenna; Sheol.

Abana (ab´un-nuh), a river in ancient Syria. When Elisha told the Syrian commander Naaman he could cure his leprosy by washing in the muddy Jordan, he angrily replied, "Are not Abana and Pharpar, the rivers of Damascus, better than all the waters of Israel?" (2 Kings 5:12). His complaint was justified, for the Abana (modern Barada, Hellenistic Chrysorrhoas) is a swift, clean, abundant stream descending from the snows of Mt. Hermon, "the peak of Amana" (Song of Sol. 4:8). It supplies the great oasis of Damascus through seven branches before finally disappearing in a desert marsh. The picturesque gorge provides the major route from Damascus westward into the Beqa'a Valley. ***See also*** Damascus; Elisha; Hermon; Naaman; Pharpar. D.B.

The Abana River. The Abana descends from Mount Hermon and in biblical times, as today, it was noted for its clear, plentiful waters.

Abarim (ab´uh-rim; Heb., "parts beyond"), a mountain (Num. 27:12; Deut. 32:49) or mountains (Num. 33:47) situated to the east of the Jordan River and in the vicinity of Mt. Nebo. Jeremiah couples it with Bashan and Lebanon as locations from which the people cry in vain to God for rescue (Jer. 22:20).

Abba (ah´buh, ab´uh), the definite form of the Aramaic word for "father" (lit. "the father"), properly translated as "my father" or "our father." Used by Jesus (and early Christians) to address God (Mark 14:36; cf. Rom. 8:15; Gal. 4:6), the word suggests familial intimacy. Many scholars find indications of such use in ancient Judaism, but others argue that it originated with Jesus. ***See also*** Father; God.

Abdiel (ab´dee-uhl; Heb., "servant of El [God]"), the father of Ahi, a clan leader of the tribe of Gad (1 Chron. 5:15).

Abdon (ab´duhn; Heb., "service, servile"?). **1** A levitical town in Asherite territory (Josh. 21:30; 1 Chron. 6:74), probably modern Khirbet 'Abdeh nineteen miles south of Tyre and about three miles east of the Mediterranean coast at Achzib. **2** One of the minor judges of Israel (Judg. 12:13–15) whose eight-year work is unknown but whose family is described as both large and rich. **3** A Benjaminite son of Shashak (1 Chron. 8:23–24). **4** The firstborn son of the Gibeonite Jeiel and his wife Maacah, and an ancestor of Saul (1 Chron. 8:30; 9:36). **5** A servant of Judah's King Josiah commanded to seek the validity of the scroll found (2 Chron. 34:20; this person is named Achbor in 2 Kings 22:12). R.S.B.

Abednego (uh-bed´ni-goh), the new name given to Azariah, one of Daniel's three companions (Dan. 1:7) who were appointed over the province of Babylon (2:40) and subsequently thrown into the fiery furnace. A lengthy prayer is ascribed to him in the Greek version of Daniel 3. *Abed-nego* in Hebrew means "servant of Nego," a pejorative variation of Nebo, a Babylonian god of wisdom. ***See also*** Azariah; Meshach; Shadrach.

Abel (ay´buhl). **1** The second son of Adam and Eve (Gen. 4:1–16). No data can be educed for an identifiable historical person, so he must be reckoned as a character in the one isolated narrative. In that narrative, Abel is the one who

offers an acceptable sacrifice to God, although we are not told why it is acceptable. He is therefore murdered by his jealous brother Cain. The name Abel in Hebrew means "breath, vapor," suggesting the fragile quality of his life. Gen. 4:1–16 has no real interest in Abel but focuses on the fate of Cain.

In the OT, it is noteworthy that Abel plays no role in Israel's faith reflections and is not again mentioned. In the NT, Abel becomes a theological reference for innocent blood (Matt. 23:35; Luke 11:51; Heb. 12:24) and an exemplar of faith (Heb. 11:4). ***See also*** Cain. W.B.

2 A location in northern Israel. Abel of Beth-maacah, also known as Abel-beth-maacah, is mentioned in 2 Sam. 20:14–15. The name "Abel" stands alone in 2 Sam. 20:18. Each of these passages associates the location with Joab's pursuit of Sheba, son of Bichri, through the territory. The location is also identified with Tell Abil el-Qamh, five miles west of Dan. Standing alone, Abel is identified possibly as 'Ain Ibl, about three miles northwest of Merom. Later it also occurs as a form of Abila, one of the cities of the Decapolis in northern Transjordan. Tel Abil is the northern of two tells on the site, some ten miles east of Gadara and just south of the Yarmuk River. R.S.B.

Abel-meholah (ay'buhl-mi-hoh'luh), a settlement in the Jordan Valley to the south or southeast of Beth-shean. Its exact location is disputed, the biblical indications being insufficiently specific or clear. The name appears as a designation of one of the boundaries of Solomon's fifth administrative district, in which Megiddo, Taanach, and Beth-shean are the chief towns (1 Kings 4:12). This reference, however, may be part of a later attempt to specify or update the precise extent of this district. Abel-meholah was one of the destinations of the Midianites fleeing from the hill of Moreh, where Gideon and his small band had routed them (Judg. 7:22). God refers to Elisha as being of the same town when he tells Elijah to go and anoint him as his successor (1 Kings 19:16). Last, Saul's daughter, Merab, was married to a man from Abel-meholah: Adriel the Meholathite (2 Sam. 21:8). It is possible, however, that more than one place is meant by these references. S.B.P.

Abel-shittim (ay'buhl-shit' im; Heb., "brook of the acacias," Num. 33:49). ***See also*** Shittim.

Abiathar (uh-bi'uh-thahr), the son of Ahimelech, who escaped the slaughter of the priests of Nob and joined David's outlaw band (1 Sam. 22:2–23), where he served as private chaplain (1 Sam. 23:6–11). He was rewarded by David for his loyalty with a monarchic appointment as chief priest (2 Sam. 20:25), but he was later banished by King Solomon to the family estate in Anathoth for his part in supporting Adonijah, Solomon's rival to the throne (1 Kings 2:26–27). The prophet Jeremiah may have been a descendent of the family of Abiathar (Jer. 1:1). He is incorrectly identified as high priest in David's time in Mark 2:26. ***See also*** Priests. M.C.

Abib (ay'bib), later called Nisan, the original Canaanite name of the first month (March/April) in the Hebrew religious calendar. It is the month during which the exodus occurred and the Passover was celebrated (Exod. 13:4; 23:15; Deut. 16:1). ***See also*** Nisan.

Abidan (uh-b*i*'duhn), a Benjaminite leader, son of Gideoni, who made offerings for the tabernacle and led his people under Moses in the wilderness (Num. 1:11; 2:22; 7:60, 65; 10:24).

Abiel (ay'bee-uhl; Heb., "El [God] is my father"). **1** A Benjaminite, the grandfather of both King Saul (1 Sam. 9:1) and Abner, the captain of Saul's army (1 Sam. 14:50–51). **2** One of David's fighting men (1 Chron. 11:32) also called Abi-albon (2 Sam. 23:31).

Abiezer (ay'b*i*-ee'zuhr; Heb., "my father is help"). **1** A son of Manasseh who received an inheritance in Canaan (Josh. 17:2) and who headed the clan of the Abiezerites to which Gideon belonged (Judg. 6:11). The name also occurs as Iezer (Num. 26:30). **2** A Benjaminite from Anathoth; one of David's fighting men who was given command of a division of twenty-four thousand men (2 Sam. 23:27; 1 Chron. 27:12). **3** A Manassite, the son of Gilead's sister (1 Chron. 7:18).

Abigail (ab'uh-gayl). **1** Wife of Nabal, a wealthy and churlish rancher in Carmel (1 Sam. 25:2–3). Nabal refused to acknowledge David's authority and as a result David determined to have Nabal killed. Abigail, a beautiful and intelligent woman, arranged a meeting with David, unbeknownst to her husband, and persuaded him not to harm Nabal. Shortly afterward, Nabal died suddenly (apparently from shock after hearing how his wife had intervened on his behalf), and David married Abigail (1 Sam. 25:39–42). She and Ahinoam, another wife of David, accompanied him when he sought refuge in the Philistine territories (1 Sam. 27:3), and the two were later captured by raiding Amalekites. David tracked down the raiders and rescued his wives (1 Sam. 30). Later, in Hebron, Abigail bore David a son named Chileab (2 Sam. 3:3; 1 Chron. 3:1 records the son's name as Daniel). **2** According to 2 Sam. 17:25 Abigail was the mother of Amasa, whom Absalom appointed commander in place of Joab (cf. also 2 Sam. 19:13), the wife of Ithra the Israelite (Jether the Ishmaelite according to 1 Chron. 2:17), the daughter of Nahash, and the sister of Joab's mother, Zeruiah. According to 1 Chron. 2:16 Abigail and Zeruiah were the daughters of Jesse and the sisters of David. A.B.

Abigail at the deathbed of Nabal; detail from a thirteenth-century French miniature.

Abihail (ab´uh-hayl), personal name of five individuals. **1** Father of Zuriel of the Merari clan (Num. 3:35). **2** Abishur's wife, mother of Ahban and Molid (1 Chron. 2:29). **3** A Gadite specified in a genealogy (1 Chron. 5:14). **4** A descendant of Jesse and the mother of Rehoboam's wife Mahalath (2 Chron. 11:18). **5** Father of Esther and uncle of Mordecai (Esther 2:15; 9:29).

Abihu (uh-b*i*´hy*oo*; Heb., "he [Yahweh] is father"), one of Aaron's priestly sons who ascended the mountain of God (Exod. 24:1, 9). He later died for offering a sacrifice incorrectly (Lev. 10:1). ***See also*** Nadab.

Abijah (uh-b*i*´juh; Heb., "Yah[weh] is my father"). **1** The son of Becher, grandson of Benjamin (1 Chron. 7:8). **2** The son of Samuel, who served as judge in Beer-sheba (1 Sam. 8:2). **3** The son of Rehoboam, king of Judah (911–908 B.C.), during whose reign the border wars between Judah and Israel continued unabated (1 Kings 15:7). Though seen as a religious miscreant by the editor of Kings, later tradition portrays Abijah as a pious king who, trusting in the Lord, successfully routed his Israelite attackers and captured Bethel, Jeshana, and Ephron (2 Chron. 13). **4** The son of Jeroboam, son of Nebat, who failed to recover from a childhood illness; his death was interpreted as a sign of divine displeasure (1 Kings 14). M.C.

Abijam (uh-b*i*´juhm). ***See*** Abijah.

Abilene (ab´uh-lee´nee), tetrarchy around Abila, some nineteen miles northwest of Damascus in the Baroda Valley. According to Luke 3:1 and an inscription at Abila, dating from the reign of Tiberius, it was governed by Lysanias at the time of Jesus' public life. In A.D. 34 it was given to Agrippa I. ***See also*** Agrippa I; Lysanias.

Abimael (ah-bim´ay-uhl; Heb., "El [God] is my father"), the son of Joktan, a descendant of Noah's son Shem (Gen. 10:28).

Abimelech (uh-bim´uh-lek; Heb., "my father is king"). **1** King of Gerar (Tell Jemmeh?, ten miles south of Gaza), before whom Abraham posed as Sarah's brother (Gen. 20; cf. Gen. 12:10–20). Elsewhere, Abimelech is "King of the Philistines," whom Isaac, living at Gerar, similarly deceives (Gen. 26). **2** The son of the judge Jerubbaal (Gideon) and a Shechemite concubine (Judg. 8:29–9:57). Abimelech accepted seventy "pieces of silver" from the Shechem temple treasury, slew seventy "brothers," and became local king for three years while commanding the Israel tribal militia. When monarchical support collapsed, Abimelech used the militia to destroy Shechem, and he died in the course of besieging Thebez. Excavations have uncovered the fortress-temple along with massive evidence of Shechem's destruction ca. 1150–1125 B.C. ***See also*** Judges, The Book of; Shechem. R.B.

Abinadab (uh-bin´uh-dab; Heb., "father of generosity"). **1** A prominent man from Kireath-jearim, who had custody of the Ark after its return from the Philistines until David moved it to Jerusalem (1 Sam. 7:1; 1 Chron. 13:7). **2** The second son of Jesse (1 Sam. 16:8; 17:13; 1 Chron. 2:13).

Abinoam (uh-bin´oh-uhm; Heb., "my father is delight"), the father of Barak, a military leader in the period of the judges (Judg. 4:6; 5:1).

Abiram (uh-b*i*´ruhm; Heb., "my father is exalted" or "the Exalted One is my father"). **1** A Reubenite who, along with his brother Dathan, a fellow Reubenite named On, and the Levite Korah, conspired with some two hundred and fifty tribal leaders to challenge the authority of Moses and the priestly leadership of Aaron. After Abiram and Dathan defied a summons from Moses, Korah led the rebels in an attempt to offer incense to God. Abiram, along with Korah and Dathan as well as their families and possessions, perished when the ground opened and swallowed them. The rest of the rebels were consumed by fire from God (Num. 16:1–40; Ps. 106:16–18). **2** The firstborn son of Hiel the Bethelite (1 Kings 16:34). His death is attributed to the operation of the curse pronounced by Joshua upon anyone who rebuilt Jericho (Josh. 6:26), although the Canaanite practice of child sacrifice

may also have been involved. ***See also*** Hiel; Korah. D.R.B.

Abishag (ab´uh-shag), a Shunamite maiden brought to minister to the dying King David (1 Kings 1:4, 15). Although David did not have sexual relations with her (v. 4), Solomon chose to view her as one of David's wives; when Adonijah requested to marry her, Solomon had him executed for treason (1 Kings 2:13–25).

Abishai (uh-b*i*´sh*i*), the son of Zeruiah, David's sister, and the brother of Joab and Asahel (1 Chron. 2:16). His reputation as a belligerent warrior and defender of David is attested by his desire to kill the sleeping Saul (1 Sam. 26:6–9) and also Shimei of Saul's house (2 Sam. 16:9–11), by his killing the Philistine giant Ishbibenob (2 Sam. 21:17), and by his leading a portion of David's army into a battle that resulted in the death of eighteen thousand Edomites in the Valley of Salt (1 Chron. 18:12). Perhaps he is best known for the story in which he avenged the death of his brother Asahel by murdering Abner in Hebron (see 2 Sam. 2:12–28; 3:26–30). ***See also*** Abner; Asahel; Joab; Zeruiah. F.R.M.

Abishua (ah-bish´*oo*-uh; Heb., "my father is deliverance" or "my father is prosperity"). **1** A Levite, the son of Phineas and descendant of Aaron; he served as a priest (1 Chron. 6:4–5, 50) and was an ancestor of Ezra (Ezra 7:5). **2** A Benjaminite, the son of Bela and descendant of Jacob (1 Chron. 8:4).

Abner (ab´nuhr), the son of Ner, grandson of Abiel, cousin of Saul, and Saul's army commander (1 Sam. 14:50–51). After the Philistine defeat of Israel at Mt. Gilboa, Abner kept the remnant of Saul's kingdom together, ostensibly in the service of Eshbaal, Saul's son (2 Sam. 2:8–9). Abner led operations against David, but eventually abandoned Saul's followers to negotiate a private compact with David for the transfer of the North to him. Nevertheless Abner was cut down by Joab, his personal rival and commander of Judah's militia; he was buried with royal honors in Hebron (2 Sam. 3:12–39). ***See also*** David; Saul. M.C.

abomination, usually something contrary to proper religion. The Hebrew term recurring in Leviticus 11 designates "unclean" creatures that are not to be eaten. Two other Hebrew terms typically refer to foreign gods, their images, or related worship practices (e.g., Deut. 27:15; 29:17, RSV: "detestable things," NIV: "detestable images"; 1 Kings 11:7; 2 Kings 23:13). They also denote improper ways of worshiping God (Deut. 12:31; 17:1) and wicked or unlawful conduct (e.g., Lev. 18:22; Deut. 22:5; Prov. 20:23). One of these terms is typically rendered in the Septuagint by a Greek word that, in the NT, means evil acts or attitudes (e.g., Luke 16:15; Rev. 21:27). ***See also*** Abomination That Makes Desolate, The. R.H.H.

abomination that makes desolate, the, an act desecrating the Jerusalem Temple. While attempting to ban Jewish religious practices, Syrian authorities under Antiochus IV erected an altar to Zeus in the Temple (ca. 167 B.C.). 1 Macc. 1:54 characterizes this as "a desolating sacrilege" (cf. 2 Macc. 6:1–5). The book of Daniel, probably written to encourage hope among Jews persecuted by these authorities for keeping the traditions, twice mentions "the abomination that makes desolate" (11:31; 12:11; cf. 9:27), probably meaning this altar to Zeus. The author of Daniel assured his contemporaries that supernatural deliverance would occur within a relatively short time (Dan. 12:7: "a time, two times, and half a time," probably meaning three and one-half years; cf. vv. 11–12) from the time the altar was erected. Later, Daniel was read as a book of prophecy, and the abomination that makes desolate was viewed as one of the final signs that must take place before the end (Matt. 24:15; Mark 13:14: "the desolating sacrilege," KJV: "abomination of desolation"; cf. also 2 Thess. 2:3–4). The emperor Caligula's plan to erect a statue of himself in the Temple (ca. A.D. 40) may have been seen by some as at least a partial fulfillment of this "prophecy," but the Gospels of Matthew and Mark, both written more than twenty years later, associate the abomination with the events to precede the expected return of Jesus as "Son of man" and evidently regard it as yet to be fulfilled (Matt. 24:15–21; Mark 13:14–19). Some may have seen its fulfillment in the destruction of the Temple by the Romans in A.D. 70. ***See also*** Abomination; Antiochus; Apocalyptic Literature; Daniel, The Book of; Eschatology; Maccabees; Parousia; Temple, The. R.H.H.

Abraham (ay´bruh-ham; Heb., "father of a multitude"), a Hebrew patriarch and an important figure in three living religions: Judaism, Christianity, and Islam. He was earlier known as Abram (Heb., "exalted father"). Perceived as the patriarch of several peoples from the regions of Palestine, he is called "the father of many nations" (Gen. 17:5) and the friend of God (2 Chron. 20:7).

The biblical account of Abraham moves from Mesopotamia to Palestine. Abraham's genealogy (Gen. 11:10–32) places him in Ur when he receives divine instructions to leave (Gen. 12:1–8). He and Sarah leave their homeland and are soon found to be in jeopardy (Gen. 12:10–13:1). That account is followed by a tale contrasting Abraham and Lot (an ethnological story, meant to demonstrate the character and origin of the Moabites and Edomites; Gen. 13:2–18). Following an enigmatic episode about an alliance of eastern kings (Gen. 14:1–24), the subsequent birth of Ishmael, Abraham's son by his wife's

Abraham and the binding of his son Isaac. This illuminated page from a fifteenth-century Armenian Gospel depicts an episode in the story of Abraham told in Genesis 22.

servant, Hagar, and a story about the origin of circumcision (Gen. 17:27), the ethnological tale that began in Gen. 13 continues (Gen. 18–19). Another story of Abraham and Sarah in jeopardy in Gerar occurs in Gen. 20:1–18, followed by an account of the birth of Isaac (Gen. 21:1–21) and the substitution of a ram for the sacrifice of Isaac (Gen. 22). The narrative of Abraham's purchase of burial property (Gen. 23:1–20) precedes an account of his death (Gen. 25:1–18).

The place of Abraham in the history of the ancient Near East is difficult to assess. By their nature, the stories are family tales with little material that would have been included in the public records. Some scholars maintain that there was a historical Abraham; others generally maintain that Abraham is an eponymous figure, a person whose name is taken for a people.

The discussion of the historical Abraham depends largely on the model of ancient life used. One model argues the discontinuity of pastoral nomadism and agrarian culture, while a second model maintains the basic continuity of the two.

Several theories argue that the social context of the Abraham material assumes a nonagrarian nomadic culture. This theory depends on the similarity of personal names mentioned in the ancient Near Eastern material, the Genesis account, and archaeological indications of less urban occupations. One suggested date for this theory is the Early Bronze Age (3000–2000 B.C.), based on a controversial reading of the Ebla material. A more popular alternative has been to date the material to the Middle Bronze Age (2000–1500 B.C.), "the patriarchal age." Based on the correspondence between the biblical names and Amorite personal names in that period, Middle Bronze Age I (2000–1900 B.C.) represents a nonurban period that would make the types of migrations recounted in the Genesis text more plausible. There are references to *khapiru* and Benjamin in the Mari texts, which also come from this period, and the customs mentioned in the Abraham story are also found in those texts. Theories supporting the coexistence of pastoral nomadism and agrarian lifestyles propose that a later date works just as well. The personal names and social customs can be found much later, hence the stories could be Late Bronze Age (1500–1200 B.C.) or Iron Age I (1200–900 B.C.). A third position argues that the nature of the stories precludes the issue of historicity. Scholars making such a proposal often date the stories to Iron I or later.

The place of Abraham in the religion of the Hebrews is easier to assess. OT scholar Albrecht Alt maintains that the growth of Hebrew religion and the relationship between Abraham and God could be construed under the general theme of the "God of the Fathers" (see Exod. 2:24; 3:6, 13, 15; 4:5; 6:3, 8; Lev. 26:42; Deut. 30:20). Abraham becomes that person who is both the advocate with God and the pioneer in faith.

Abraham in the New Testament: Abraham is understood as the patriarch of Judaism and, by extension, Christianity, which depends on the traditions of Abraham (Matt 1:1, 2, 17; 3:9; Luke 13:16; 16:24; 19:9; Acts 13:26). Abraham as patriarch becomes a symbol of compassion (Luke 16:19–31) and the one who legitimates (John 8:33–38). Abraham also functions as a vehicle of the covenant with God (Luke 1:73; Acts 7:5–6; Gal. 4:28; Mark 12:26; Acts 7:32) and one who experienced a special relationship with God (James 2:23). More than all of these, however, the NT describes Abraham as the model of faith and the pioneer of trust in God (Rom. 4:1–25; Gal. 3:1–19; Heb. 7:1–10; 6:13–14; 11:8, 11). ***See also*** Genesis; Khapiru; Mari; Patriarch. S.B.R.

Abraham's bosom, a metaphor in Jesus' parable about the rich man and Lazarus (Luke 16:19–31). To be in or at someone's bosom means to recline to the right of the host (the place of honor) at a meal (cf. John 13:23). Various ideas and images were current in Jesus' time to describe the state of the dead, especially those special to God; these included references to Abraham (cf. *1 Enoch* 22; 4 Macc. 13:17; 2 Esd. 7:36, 38, 88–99). Christians later used this metaphor as another designation for Paradise.

See also Abraham; Heaven; Hell; Immortality; Paradise; Resurrection; Sheol.

Abram (ay'bruhm). ***See*** Abraham.

Absalom (ab'suh-luhm), one of the sons of Israel's greatest king, David. Because he was handsome and ambitious, Absalom was the most conspicuous of David's sons; his mother was Maachah, princess of the neighboring vassal state of Geshur. The story of Absalom is told in 2 Sam. 13–20. When his half-brother Amnon raped his full sister Tamar and David took no action, Absalom took the law in his own hands and killed Amnon, after which he spent three years in exile in Geshur. Laborious mediation on the part of Joab brought Absalom back to the court, but David refused to see him for another two years. This filled Absalom with such anger and resentment that he harbored the idea of a coup d'état. It took him four years to prepare for an uprising that stood a good chance of success. He directed and capitalized upon the resistance felt by many people who saw the spectacular growth of David's empire, court, and administrative machinery, but who could not accept or keep up with the concomitant changes that took place in social patterns and values. In his rebellion Absalom won the support of the royal counselor Ahithophel, whose authority was above all criticism.

Absalom gave the signal for the revolt from Hebron, the selfsame town in central Judah where David himself had risen to national power. His march to Jerusalem forced David to leave the country. Ahithophel advised Absalom to pursue and isolate David forthwith, but Absalom was deceived by the flattery of Husai, who acted as a spy for David and who gave the opposite advice. Thus, David was able to escape across the Jordan and start the organization of a military comeback. A few weeks later the dramatic denouement followed in the Transjordan, not far from Mahanaim. Aided by the rough terrain, David's experienced regular army, which had remained loyal to him, defeated Absalom's militia. Though David had ordered his generals to spare the prince, Joab, who found Absalom entangled in the branches of an oak, had him slaughtered as an archrebel—a realistic military choice but one that cost him a good relationship with the mourning father. In the end, it was intemperate ambition that became fatal for Absalom and brought him down. ***See also*** David; Joab.

J.P.F.

abyss, the watery deep as contrasted with sky and earth (Ps. 77:16). It is the abode of the dead (Rom. 10:7), the place where evil spirits are confined (Luke 8:31; Rev. 9:1–11; 20:1–3), and the place from which the Antichrist will ascend (Rev. 11:7; 17:8). ***See also*** Antichrist, The; Hades; Heaven; Hell; Sheol.

acacia (uh-kay'shuh), a tree, *Acacia raddiana*, whose wood figures prominently in the Exodus narratives. Used in constructing the tabernacle and its equipment, it appears in Deut. 10:3 in the same context. Isa. 41:19 lists the tree's presence as evidence of God's act in restoring the desert. Varieties of the tree were used in tanning leather (bark), the manufacture of rope (fibers), for fodder (flowers and fruit), and, in Egypt, for medicinal salve (gum from *Acacia nilotica*).

Acacias (uh-kay'shuhs), **Valley of** (KJV, RSV: "valley of Shittim"), an unknown place mentioned in Joel 3:18. Significant in this passage is the valley being newly watered from "the house of the LORD" as part of an expected restoration by God of full natural life in Judah.

Accad (ak'ad; also found as Agade, Akkad), a city of Nimrod's kingdom in the land of Shinar (Gen. 10:10). The association with cities in Genesis 10 named Babel and Erech establishes the Mesopotamian location known from numerous extrabiblical textual, artistic, and literary sources. The precise location of the city Accad is not known, but it likely lay around modern Baghdad, Iraq, or the terrain between Baghdad and Babylon.

The language known as Akkadian was written in cuneiform script, is Semitic in character, and has been found in a large collection of economic, administrative, legal, and religious texts that give us clues to the nature and location of a third-millennium B.C. culture of rich resources and diverse strengths.

The territory known as Accad (Akkad) began at the narrowest proximity of the Tigris and Euphrates rivers, just north of the confluence of the Diyala tributary to the Tigris. It stretched south to reach ancient Babylon and Kish, a distance of some hundred miles. As with the older Sumerian culture farther south, the city-states comprising the Akkadian empire (Old Babylonia) were sustained by the agriculture and trade provided by the rivers and the flood-nourished agriculture in the plain between the rivers.

Little is known about Akkadian political life. A "Sargon's Chronicle" and a "Sargon of Agade," found on portions of tablets, tell of the expansion by Sargon, king of the city Kish, to the northwest and southeast, establishing an "empire" lasting only four generations. His sons Rimush and Manishtusu succeeded him, but his grandson Naram-sin is better known. The expansion and control of this dynasty was probably established primarily to secure supplies of metal and other goods. Ships brought traders from the Indus Valley, and overland connections were made with Iran's plateau. Booty of conquest and trade goods found include metals, timber, and precious stones. An occupation army was stationed at Susa, and construction of storage, temple, and town facilities indicate control of parts of Syria and the upper reaches

Stele of Naram-Sin, grandson of "Sargon of Agade," commemorating his victory over the Lullubians; third millennium B.C.

of the Tigris Valley. All this ranged from 2350 to 2200 B.C.

Of most interest to biblical students is a rich literary heritage from Akkadian authors. Frequently using earlier Sumerian materials, they have given us rich comparative sources. Specifically of interest for their bearing on biblical ideas are "The Creation Epic" *(Enuma Elish),* "The Epic of Gilgamesh," "Descent of Ishtar to the Nether World," numerous hymns, wisdom speculations, rituals, and law codes. These texts may be found in James B. Pritchard, ed., *Ancient Near Eastern Texts,* 3d ed. (Princeton, NJ: Princeton University Press, 1974). R.S.B.

Acco (ak´oh; also Accho, Acre), one of the great port cities of antiquity located along the eastern Mediterranean Littoral. Acco (modern Tell el-Fukhkhar) has in modern times been superseded by the important harbor city of Haifa, directly to the south. Numerous textual references and archaeological discoveries of Minoan, Mycenaean, and Egyptian imports bear witness to Acco as a flourishing commercial center with ties throughout the Mediterranean and Near East for over twenty-five hundred years (Middle Bronze Age through the Roman period; ca. 2000 B.C.–A.D. 324). Its maritime influence receded after the Arab conquest in A.D. 636 but was regained during the Crusader occupation, when the city was known as St. Jean d'Acre. Biblical references provide insights into the political and religious strife during the Hellenistic period when battles erupted between the Maccabaeans and the Greek citizens of Acco, then known as Ptolemais (1 Macc. 5:14–15, 20–23). The city was clearly very hostile to the Jews (1 Macc. 12:45, 48). On his third voyage, Paul visited this city whose inhabitants had early on converted to Christianity (Acts 21:7; there called Ptolemais). Recent findings of characteristic Philistine pottery corroborate the biblical text that cites the inability of the Israelite tribes to conquer this city or any other coastal city under the dominion of the Philistines (Judg. 1:31). S.L.R.

Aceldama (uh-kel´duh-muh). ***See*** Akeldama.

Achaia (uh-kay´yuh), the Roman province consisting of the southern half of the Greek peninsula. The name is derived from the designation for the Greeks in Hittite and Egyptian sources. In Homer the Achaeans are Achilles' men and the followers of Agamemnon. In historical times, the name referred to southeastern Thessaly and the northern coast of the Peloponnesus. In the division of provinces in 27 B.C., the Roman province of Achaia comprised the lower half of Greece. In the NT the term is connected with Paul's preaching in its capital, Corinth (Acts 18:27; 1 Cor. 16:15; 2 Cor. 1:1).

Achaicus (uh-kay´uh-kuhs), a Christian from Corinth who, with Stephanas and Fortunatus, was with Paul in Ephesus when he wrote 1 Corinthians (1 Cor. 16:17). The three apparently brought information to Paul concerning the condition of the church in Corinth and perhaps were the bearers of the letter mentioned in 1 Cor. 7:1. They may also have carried 1 Corinthians back to Corinth. ***See also*** Fortunatus; Stephanas.

Achan (ay´kan), the son of Carmi (RSV: "Achar") (1 Chron. 2:7), who stole some of the "devoted things" after the victory of Joshua over Jericho (Josh. 7). For this breach of the "ban," God punished Israel with a military setback at Ai, and Achan and his family were stoned to death. ***See also*** Ai.

Achbor (ak´bohr; Heb., "mouse"). **1** The father of the Edomite king Baal-hanan (Gen. 36:38). **2** The son of Micaiah; he was one of those sent by Josiah to inquire of Hulda the prophetess concerning the significance of the book of the law discovered in the Temple (2

Kings 22:12–14). He is possibly the same person mentioned by Jeremiah (26:22; 36:12) as the father of Elnathan, a courtier of Jehoiakim.

Achish (ay´kish), the ruler of the Philistine city of Gath from whom David sought asylum when he fled from Saul. At first David was distrustful of Achish and feigned madness to escape when he was recognized as a successful military leader (1 Sam. 21:10–15); but later Achish accepted David and his men as mercenaries and gave David the city of Ziklag in exchange for his raids on southern tribes hostile to the Philistines (1 Sam. 27:1–12). However, because of the suspicions of some of his commanders, Achish excused David from raids on Israel (1 Sam. 29:1–11). ***See also*** David; Philistines.

Achor (ay´kohr; Heb., "trouble"), **Valley of,** part of the north border of Judah (Josh. 15:7) and the location of the execution of Achan (Josh. 7:24–26) after his profiteering in a holy war. In Hos. 2:15 and Isa. 65:10 its reputation for that former "trouble" is reversed and the prophets use it as a symbol of better times to come. It is probably modern el-Buqei'ah between Jericho and the north end of the Dead Sea.

Achsah (ak´suh), the daughter of Caleb whom he gave to his kinsman Othneil as a wife for capturing the city of Kiraith-sepher (Debir; Josh. 15:16–17; Judg. 1:12–13). The dowry Caleb gave her consisted of two springs located near Hebron (Josh. 15:18–19). ***See also*** Caleb; Debir; Kiriath-sepher.

Achshaph (ak´shaf), an ancient city in northern Canaan along the border of the territory of Asher. The king of Achshaph joined the coalition led by Jabin of Hazor against the Israelites, but the city was eventually captured by Joshua (Josh. 11:1; 12:20). It is thought to be located near modern Acco, although the exact site has not been positively identified.

Achzib (ak´zib). **1** A city in northern Canaan located near the coast north of Acco. Although on the border of the territory of Asher, the Canaanites were never totally expelled from the city (Josh. 19:29; Judg. 1:31). It is tentatively identified as the present ez-Zib or Tel Akhziv. **2** A city in the lowlands of Judah, tentatively identified as Tel el-Beida, northwest of Lachish (Josh. 15:44; probably also Mic. 1:14).

acropolis (uh-krop´uh-lis; Gk., "high city"), the nucleus of many ancient cities. It was a walled stronghold built on a hill that overlooked the town on its slopes. Often the temples and shrines would be within the walls of the acropolis, as was the case with ancient Athens.

The acropolis of Athens. Surmounting the hill is the Parthenon, fifth century B.C. Paul preached to the court that met on the hill of Areopagus close by.

Acts of the Apostles, the, the fifth book in the NT. The book deals with the history of the earliest Christian church and includes a major section on the career of Paul.

Authorship and Date: There are certain apparent indications that the author of Acts was a companion of Paul who traveled with him on some occasions. These indications include the "we" sections, i.e., those places in Acts in which the author writes in the first-person plural instead of the usual third person (16:10–17; 20:5–15; 21:1–18; 27:1–28:16). The author may, in these sections, be using a travel diary that he himself wrote at an earlier time, drawing on a diary written by a companion of Paul, or using the first-person pronoun as a subtle way to add verisimilitude to the narrative by identifying himself as a participant. Scholars evaluate the "we" passages differently. Some think that the author was indeed a companion of Paul, while others are more cautious about such claims. The major point of agreement among NT scholars is that the book of Acts and the Gospel According to Luke were written by the same person, who is traditionally called Luke. Most would tend to date the two books ca. A.D. 80–85.

Contents: The book of Acts begins precisely at the point where the Gospel of Luke leaves off, with the ascension of Jesus. The author then describes the history of Christianity in general conformity with the geographical outline given in Acts 1:8. According to this verse, the Christian movement begins in Jerusalem, then

ACTS OF THE APOSTLES, THE

spreads into Judea and Samaria, and finally extends to "the end of the earth." Thus, Luke begins his narrative by describing the situation of the followers of Jesus in Jerusalem (1:4–8:3). In 8:4–12:25, the movement begins to spread into other parts of Judea and Samaria. Then, in 13:1–21:16, the author concentrates almost exclusively on Paul, whose missionary activity takes him to Asia Minor and Greece. In 21:17–22:30, Paul is back in Jerusalem, where he is arrested. He undergoes four trials there and in Caesarea (23:1–26:32). In the next section, 27:1–28:15, Paul is on his way to Rome as a prisoner, preparing to face his final trial before the Roman emperor. The voyage to Rome is described in the first person and in great detail. The final scene is set in Rome, where Paul meets with groups of Jews and, for two years, teaches about Jesus to all who come to him (28:16–31).

No description of an imperial trial of Paul is included, and various possible reasons for this omission have been cited. For example, it has been suggested that Luke intended to write a third volume but was unable to do so. Some scholars think, however, that Luke intended the arrival of Paul in Rome to signify that Jesus' commission had been fulfilled and the gospel had come to "the end of the earth" (1:8). On this assumption, a description of an imperial trial would be anticlimactic.

Major Themes: One of the notable themes in Acts is the relation of Christianity to Judaism. Luke makes it clear that the Christian movement began in Jerusalem among the Jewish followers of Jesus. After a period of amazing growth among Jews, the Christian message came to Gentiles. Peter baptized the first gentile convert, Cornelius, but it was through the efforts of Paul that large numbers of Gentiles were brought into the movement. Luke also is aware that there were some problems with the incorporation of Gentiles into the Christian movement. In his story, the conversion of Cornelius was made possible only after Peter had experienced a vision in which a voice from heaven declared all foods clean, i.e., dietary regulations that Jews had heretofore been bound to observe were abolished (10:1–11:18). Later in Acts, we read that some Jewish Christians wanted to require gentile converts to observe Torah, including the practice of circumcision. But Paul, Barnabas, Peter, and the other apostles met and agreed that only minimal requirements from Torah were to be imposed on gentile converts (15:1–29). As Luke describes the missionary activity of Paul, he stresses Paul's habit of going first to Jewish synagogues to present the Christian message. Almost invariably, Paul has little success among Jews and is forced to preach to Gentiles, who respond favorably and in large numbers (e.g., 14:1–7; 17:1–9, 10–15; 18:1–17; 19:8–20). On three occasions, Paul announces his intention not to preach to Jews any longer but rather to go only to Gentiles (13:46–47; 18:6; 28:28). In these announcements there is a parallel between the geographical structure of Acts and a fundamental theological theme: geographically, Christianity, which started in Jerusalem among Jews, moved out into the wider world among Gentiles; theologically, Christianity increasingly grew distinct from and independent of Judaism.

Pentecost: "And there appeared to them tongues as of fire, distributed and resting on each one of them" (Acts 2:3). Detail from the Pala D'Oro, a twelfth-century altar in St. Mark's Cathedral, Venice.

The book of Acts and the Gospel of Luke have recently been the subjects of a major scholarly controversy in regard to the extent and nature of anti-Jewish attitudes to be found in these texts. Some scholars, for example, maintain that Luke emphasizes the acceptance of the Christian message by Jews and the continuity between the two faiths. Others, however, call attention to the more negative aspects of Luke-Acts and conclude that these documents teach that God has rejected the Jews and replaced them by gentile Christians. No resolution of these scholarly differences is presently in sight.

Other themes that have been detected in the book of Acts include: the nonrevolutionary and nonsubversive nature of the Christian movement in relation to Roman authority and the divine impetus and legitimation of the Christian movement in the form of the Holy Spirit.

Estimates differ regarding the essential historical reliability of Acts. Most scholars agree, however, that, whatever the source materials

OUTLINE OF CONTENTS

The Acts of the Apostles

I. Prologue (1:1–3)
II. Christianity in Jerusalem (1:4–8:3)
III. Christianity in Judea and Samaria (8:4–12:25)
IV. Paul's activity in gentile lands (13:1–21:16)
V. Paul's activity in Jerusalem (21:17–22:30)
VI. Paul's trials (23:1–26:32)
VII. Paul's trip to Rome (27:1–28:15)
VIII. Paul in Rome (28:16–31)

available to the author, the narrative has been shaped in a deliberate manner to express the author's own particular concerns and purposes. The various speeches in the book (e.g., 2:14–36; 3:12–26; 7:2–53; 10:34–43; 13:16–41), at least in their present form, appear to be compositions of the author. It is generally recognized that, as a source for the career of Paul, Acts must be subordinated to the statements in Paul's own Letters. ***See also*** Holy Spirit, The; Luke; Luke, The Gospel According to; Paul; Pentecost; Theophilus; Tongues as of Fire; Tongues, Speaking with.

Adah (ay´duh; Heb., "ornament"). **1** Lamech's first wife, the mother of Jabal and Jubal (Gen. 4:19–20, 23). **2** The Hittite wife of Esau, the mother of Eliphaz (Gen. 36:2, 4; cf. 26:34).

Adaiah (uh-day´yuh; Heb., "Yah [God] has ornamented himself"). **1** The maternal grandfather of King Josiah (2 Kings 22:1). **2** A Levite in the ancestry of Asaph (1 Chron. 6:41). **3** A clan leader in the tribe of Benjamin (1 Chron. 8:21). **4** The father of the Judean military captain Maaseiah (2 Chron. 23:1). **5** A member of the family of Bani; he was condemned by Ezra for marriage to a foreign woman (Ezra 10:29). **6** Another man, likewise condemned for taking a foreign wife (Ezra 10:39). **7** A Judahite of the clan of Perez who lived in postexilic Jerusalem (Neh. 11:5). **8** A priest who lived in postexilic Jerusalem (1 Chron. 9:12), probably the same one mentioned in Nehemiah (11:12) as serving in the Temple. D.R.B.

Adam (ad´uhm). **1** A proper noun rarely appearing outside of Genesis 1–5. In Gen. 1:1–2:4a, God creates man and woman in his image, separating them from the animals, to rule the earth. In Gen. 2:4b–4:26, Yahweh forms Adam (Heb. *'adam*, "hu[man]") from the "earth" (Heb. *'adamah*), sets him over the Garden, and allows him to name the animals. Tranquility rules until Adam and Eve break Yahweh's rule, eat the forbidden fruit, and suffer expulsion from the Garden and the curse of a life of sweat, pain, and death.

According to some Jewish writings, Adam's sin disrupted the cosmos, robbed the earth of fruitfulness, made animals wild and vicious, and stripped humankind of its height, beauty, and immortality (*Jubilees,* Baruch, and 4 Ezra). Other authors, however, exalt Adam above all creatures (Ecclus. 49:16) as a wise man, "king," or "angel" (*3 Enoch* 30:11–12) who remained uncompromised even though Eve was seduced (*Vita Adae* 12–15). Philo found two Adams in Genesis 1–2: a "heavenly" Adam in God's image, who was wise, virtuous, and perfect, and an "earthly" Adam who sinned, becoming the father of all people of a lower nature.

In the NT, Luke carries Jesus' genealogy back to God through Adam (3:38), and 1 Timothy elevates Adam over Eve because of her sin (2:13–14), but most references to Adam occur in Paul's Letters. Rom. 5:12–21 contrasts the first (earthly) Adam, who was disobedient, with Christ, the last (heavenly) Adam, who was obedient, thus reversing Philo's order. Those who are in the first Adam suffer corruption; those in the last experience grace and life (see 1 Cor. 15:20–28, 45–49). Note, however, that for Paul sin was not transmitted biologically.

According to many scholars, 1 Cor. 11:2–16 deals with origins, not the subordination of woman. The hierarchy God, Christ, man (Adam), woman (Eve) treats the source (head) of each rather than the rule of one over the other; unlike 1 Timothy, this passage assumes a mutuality, though distinctiveness, between man and woman. ***See also*** Creation; Eden; Eve; Fall, The; Human Being; Paradise; Serpent; Sin; Women.

C.J.R.

2 A city mentioned in Josh. 3:16 where the waters of the Jordan were dammed, allowing the Israelites to cross. Identified as Tell ed-Damiyeh, it stood at the outflow of the biblical Jabbok River (modern Zerqa) into the Jordan River, commanding intersecting travel routes. The "Zarethan" referred to in Josh. 3:16 is identified with Tell es-Sa'idiyeh, some fourteen miles farther up the Jordan River.

adamah (ad´uh-muh), a Hebrew word that occurs 225 times in the OT and means arable, cultivable land. That meaning can be seen in the expression "man of the *adamah*" meaning "farmer" (Gen. 9:20; Zech. 13:5). *Adamah* and

its synonym *afar* ("dust, ground") are the material from which God forms the first man (Heb. *adam;* Gen. 2:7; 3:19; Ps. 90:3; Job 10:9; 34:15). In addition to this primary meaning, *adamah* can signify the inhabited world (Gen. 12:3; 28:14; Deut. 7:6; 14:2; Isa. 24:21; Amos 3:2), the land God gives to Israel in fulfillment of his oath to the patriarchs (esp. Deut. 5:6; 7:13; 11:9; 26:10, 15), from which they are exiled (2 Kings 17:23; 25:21) and to which they return (Isa. 14:1; Jer. 16:15; 23:8; Ezek. 28:25). A number of scholars have proposed that the noun *adam,* "man," does not only indicate "humankind" but, in a number of instances, is a masculine variant (or a miswriting) of the feminine form *adamah.* Among the possible texts are Gen. 16:12; Jer. 32:20; Zech. 9:1; 13:5; Job 36:28; and Prov. 30:14. ***See also*** Adam.
J.S.K.

adamant (ad'uh-muhnt), an impenetrable hard substance, at one time identified with the diamond. It is used of Judah's sinful heart (Zech. 7:12) and of Ezekiel's forehead (3:9).

Adar (ay'dahr), the twelfth month of the postexilic Jewish lunar calendar (February–March; Ezra 6:15).

adder, a poisonous snake. The KJV translates four different Hebrew words for species of serpents that cannot be precisely identified with the word "adder" (e.g., Gen. 49:17; Ps. 140:3; cf. Rom. 3:13, where the RSV has "asp"). The words cluster as parallel terms in poetry where the snakes symbolize moral venom (e.g., Ps. 58:3–5; Prov. 23:30–33).

Additions to Daniel, the. ***See*** Daniel, The Additions to.

Adiel (ay'dee-uhl; Heb., "El [God] is an ornament"). **1** A clan leader in the tribe of Simeon (1 Chron. 4:36). **2** A priest who lived in postexilic Jerusalem (1 Chron. 9:12). **3** The father of Azmaveth, overseer of the royal storehouses of King David (1 Chron. 27:25).

Adin (ay'din; Heb., meaning uncertain, possibly "luxury" or "delight"). **1** A family group ("sons of Adin") who returned with Zerubbabel from the Babylonian captivity (Ezra 2:15). **2** A second group led by Ebed who returned with Ezra (Ezra 8:6). **3** A member of the postexilic community in Judah who signed the covenant to keep the law (Neh. 10:16).

Adlai (ad'l*i*), the father of Shaphat (1 Chron. 27:29): Shaphat served David as a supervising herdsman.

Admah (ad'muh), one of the five cities of the plain in the Valley of Siddim at the southern end of the Dead Sea (Gen. 10:19; 14:2). The city was destroyed, along with Sodom, Gomorrah, and Zeboiim, while the fifth city, Zoar, was spared. Admah and Zeboiim became proverbial examples of God's wrath (Deut. 29:23; Hos. 11:8). The exact site is unknown. ***See also*** Sodom; Zoar.

Adonijah (ad'uh-n*i*'juh; Heb., "Yahweh is the Lord"). **1** The son of David and Haggith and apparent heir to the throne in Jerusalem after the death of Absalom. Though supported by the priest Abiathar and Joab the army commander (1 Kings 1–2), Adonijah's ambitions were frustrated by the secret anointing of Solomon at the spring of Gihon by the priest Zadok. Adonijah's subsequent request to marry the beautiful Abishag, David's nurse, was the occasion of his execution by Solomon. **2** Two other men in the OT (2 Chron. 17:8; Neh. 10:17).

Adonikam (ad'uh-n*i*'kuhm; Heb., "my lord has arisen"). **1** A family group ("sons of Adonikam") who returned with Zerubbabel from the Babylonian captivity (Ezra 2:13). **2** A smaller group who returned later with Ezra (Ezra 8:13).

Adoniram (ad'uh-n*i*'ruhm; Heb., "my lord is exalted"), an official in the service of King Solomon who supervised the conscripted labor force in the construction of the Temple (1 Kings 5:13–14). He is probably the same person who served a similar role later under King Rehoboam and was stoned to death by the people of the Northern Kingdom of Israel when he attempted to enforce the harsh policies of Rehoboam (1 Kings 12:18). In the Hebrew text of 1 Kings 12:18 he is called Adoram, a shortened form of Adoniram, although the Greek text (Septuagint) reads Adoniram. It is less likely that he is to be identified as the same official elsewhere called Adoram (2 Sam. 20:24). ***See also*** Adoram.
D.R.B.

Adonizedek (uh-doh'n*i*-zee'dek; Heb., meaning uncertain, either "my lord is righteous" or "my god is Zedek [a deity]"), the Amorite king of Jerusalem who, fearing the strength of the invading Israelites, organized a coalition with four other kings to attack the city of Gibeon because its inhabitants had formed an alliance with Joshua. The attack failed and he and the other kings were put to death by Joshua (Josh. 10:1–26). ***See also*** Amorites; Gibeon.

adoption, a NT term that functions in the context of specialized salvation language, usually translated "sonship." It draws meaning from the theological realities of belonging, connectedness, relationship, and inheritance established by God's promise to human beings. The frame of reference is that of the family and foundational membership; its affirmations are derived from the "sonship"

of Christ, and its scope is inclusive of both men and women. Adopted relationships among humans are found in the OT (e.g., Gen. 15:1–3; Exod. 2:10; Esther 2:7, 15; cf. also the system of levirate marriage, Deut. 25:5–10) and elsewhere in Semitic cultures, but the focal point upon which the NT builds is the declared "adoption sonship" ("election") relationship between God and Israel (e.g., Hos. 11:1; Exod. 4:22).

In the NT, Jesus himself is not adopted (see the hymnic christological formulations in Phil. 2:6–11; Col. 1:15–20; also Heb. 1:5–7; cf. also, however, Rom. 1:3–4). By virtue of the mediation of the Son (resurrected Lord) and the Spirit, people become (ingrafted) heirs in "sonship" through faith and are thus enabled to utter "Abba, Father" (Rom. 8:15; Gal. 4:6; cf. Eph. 1:5; Mark 14:36; Luke 11:2; Matt. 6:9). Other probable backgrounds for NT thought on adoption are the manumission and adoption of slaves and other Greco-Roman customs regarding property and birthright (cf. the "household tables" of Col. 3:18–4:1; Eph. 5:21–6:9; 1 Pet. 2:18–3:7; also cf. Philemon). ***See also*** Abba; Election; Family, The; Father; Salvation; Slavery; Sons of God, Children of God. J.E.A.

Adoraim (ad'uh-ray'im; Heb., meaning uncertain, possibly "two hills"), one of the fifteen cities in Judah fortified and provisioned by Rehoboam as defensive strongholds (2 Chron. 11:9). Its location has been identified as modern Dura, about six miles west of Hebron in southern Judah.

Adoram (uh-doh'ruhm; a shortened form of Adoniram, Heb., "my lord is exalted"), a name apparently identifying one administrative official who served under both David and Rehoboam, although some scholars believe that there were, in fact, two different persons bearing this name. If so, the first (Adoram, 2 Sam. 20:24) supervised conscripted labor under King David while the second served a similar role under Solomon and Rehoboam (Adoniram, 2 Kings 4:6; Adoram, Heb. text of 12:18, but Adoniram in the Greek text). However, it is possible that Adoram came into office near the end of David's reign and continued to serve in the same position through successive reigns until his untimely death at Shechem (1 Kings 12:18). ***See also*** Adoniram; Hadoram. D.R.B.

Adrammelech (uh-dram'uh-lek). **1** A deity to whom human sacrifices were offered. He was one of the gods worshiped by the Sepharvites who were resettled in Samaria by the Assyrian ruler Sargon around 720 B.C. (2 Kings 17:31). **2** One of the sons of the Assyrian ruler Sennacherib who, with the help of his brother Sharezer, assassinated his father in 681 B.C. and fled to Ararat (2 Kings 19:37; Isa. 37:38). ***See also*** Molech.

Adramyttium (ad'ruh-mit'ee-uhm), modern Edremit, a port on the northwest coast of Turkey opposite Lesbos; in Roman times, it was in the province of Asia. According to Acts 27:2–5, Paul sailed from Caesarea to Myra, en route to Rome, aboard a ship of Adramyttium.

Adria (ay'dree-uh), **Sea of,** in Acts 27:27 denotes the body of water in the central Mediterranean Sea between Crete and Sicily through which Paul's ship, en route to Rome, drifted for fourteen days before breaking up in the surf of Malta. The name derives from the town of Adria on the lower Po River and originally designated the sea between Italy and the Balkan Peninsula, the modern Adriatic. In NT times, it also designated the Ionian Gulf and the waters between the Peloponnesus and Sicily.

Adullam (uh-duhl'uhm), an ancient settlement, most likely Tell esh-Sheikh Madkur in the Judean hills ca. five miles south of Beth-shemesh. Nearby is a cave where David and his early followers camped (1 Sam. 22:1). The site was fortified by Rehoboam to strengthen Judah during the early years of the Divided Kingdom (2 Chron. 11:7). ***See also*** Divided Kingdom, Divided Monarchy.

adultery, illicit sexual relations with someone other than one's marriage partner. In the OT adultery had a precise and limited definition: sexual relations between a married (or betrothed) woman and any man other than her husband. Adultery, therefore, was committed only against a husband, never against a wife. It was considered a most grievous transgression (Exod. 20:14; Deut. 5:18; Lev. 18:20), to be punished by the death of both parties (Deut. 22:22–24). There is no actual evidence that this punishment was ever carried out, but it may have been in certain instances, and the threat of execution still existed in the first century (cf. John 7:53–8:11). The law was probably intended to ensure that any child born to the wife was really the husband's child, since it was considered crucial for the husband to have offspring, so that the family name could be perpetuated.

In the NT period, it appears that the definition of adultery was extended in its scope. For example, the teaching of Jesus was understood to mean that a husband could now be held responsible for committing adultery against his wife (Matt. 5:32; Mark 10:11; Luke 16:18). Adultery was forbidden by various NT writers (Rom. 13:9; Gal. 5:19; James 2:11).

Adultery was sometimes used as a symbol of the unfaithfulness of the people toward God (e.g., Hos. 9:1; Matt. 12:39). ***See also*** Family, The; Fornication; Harlot; Law; Marriage; Women. J.M.E.

Adummim (uh-duhm'im), a name referring both to a pass (RSV: "ascent"; Josh. 18:17) and to

an area used to distinguish the border between the tribal inheritance of Benjamin and that of Judah (Josh. 15:7). Following that border constituted the shortest way to go down from Jerusalem to Jericho, and then on to Transjordan.

adversary, in the OT, anyone (or anything) standing in the way of the completion of God's will or opposing God's people either collectively or individually (e.g., 2 Sam. 19:22; 1 Kings 5:4; 11:25; Ezra 4:1). "Adversary" is the literal meaning of the Hebrew word *satan,* and the idea eventually developed that Satan was *the* adversary (see Job 1:6–2:7). In certain NT passages, the term is also used with this connotation (e.g., 1 Pet. 5:8; cf. 1 Tim. 5:14–15). ***See also*** Devil; Satan.

Advocate. *See* Paraclete.

Aeneas (i-nee´uhs), a paralytic at Lydda, otherwise unknown, who was healed by Peter (Acts 9:33–35).

Aenon (ee´nuhn), a well-watered site, the scene of baptism by John the Baptist, in the vicinity of Salim (John 3:23). The exact location is unknown. A fourth-century reference by Eusebius situated Aenon in the Beth-shean valley, some six miles south of Beth-shean. A mosaic floor map discovered in a sixth-century church in Madeba, Jordan, represents Aenon on the eastern side of the Jordan River. Recent speculation places it near Nablus, not far from the abundant water of Wadi Far'-ah.

African Americans and the Bible

Rationale for a History of "Readings": The history of the engagement of the Bible among African Americans is dramatic and complex and has important implications for biblical interpretation. It provides the student of the Bible not only a conceptual window onto a dramatic and complex history of self-definitions and worldviews among those in the modern world who now call themselves African Americans, but also the opportunity to rethink the basic hermeneutical assumptions about biblical interpretation, especially its focus upon the ancient text and/or ancient historical situation as the starting and end point of interpretation. The critical juxtaposition of the Bible and African Americans can provoke thinking about whether the interpretive agenda can or should be focused around text as opposed to "world."

A historical approach to African Americans' readings of the Bible is important in order to gain perspective not only on the internal changes, diversity, and process of differentiation, but also on the relationship between interpretation and culture.

Visions of Freedom in Slaveholding "Christian" America: The earliest large-scale cultural encounter of African Americans with the Bible can be traced back to the late eighteenth century, as presupposed by the formation of independent visible and "invisible" congregations in the North and South and as evidenced in different cultural interpretive expressions (slave songs, poetry, sermons, journals). Finding themselves enslaved by those who seemed to find in the Bible a source of power, the Africans in the "new world" embraced the Bible for themselves as a source of psychic-spiritual emotional freedom, power, and hope, as inspiration for learning, and as a language of veiled criticism. Both the dramatic narratives of the OT, especially the Exodus story and the moral and sociopolitical excoriations of the prophets, and the display of the miraculous powers of Jesus and his ultimate vindication in the NT captured the collective popular imagination of the enslaved Africans from the beginning of their encounter with the Bible.

Thus, in the initial hearings of the stories of the Bible, African Americans essentially transformed the Bible from the book of slaveholders and of slaveholding religion into the book of the world and religion of slaves. It was thereby engaged as a window onto another world, a language world full of personalities and drama with which the slaves could identify. The hearing and reading of dramatic biblical stories about times and exploits long ago in faraway lands seemed arresting. Such engagement provided not only occasional spiritual respite from the harshness of slavery, but also a powerful rhetorical and conceptual repertoire for the rhetorics and visions of resistance as well as the positive constructions of the (African American) religious self.

Prophetic Reading of Bible and America: The Bible continued to serve multiple functions among African Americans through the end of the period of slavery, the decades of reconstruction and Jim Crowism, and into the civil rights movements of the 1950s and 1960s. From the founding of the independent churches and denominations in the late eighteenth century to the clamor against segregation in the mid-twentieth century, a great number of African Americans saw in the Bible the language and concepts of social and prophetic critique, a blueprint for racial uplift, social integration, political peace, and economic advancement. A few leaders suggested more radical Pan-Africanist views, citing biblical injunctions for black separatism, including a back-to-Africa program. Yet for the majority, the Bible was the primary blueprint for a type of integrationist social reform. The biblical principle of the universal kinship of all humanity under the sovereignty of God was embraced by the majority of African Americans as mandate for social integration and political equality and as a critique of the America that claimed to be God-fearing. NT passages illustrative of the principle (Gal. 3:26–28; Acts 2; 10:34–36) were often quoted, paraphrased, or alluded to in orations and sermons and tracts.

Yet this reading of both the Bible and American culture is "canonical": it generally respects the dominant traditional (white Protestant) parameters of principles of interpretation, as well as the range of texts considered worthy of consideration. Biblical images and teachings provided the ideological foundations for the founding of separate African American churches and other institutions. Yet these separate institutions do not represent comprehensive alternative pedagogies, philosophies, or politics. They represent a mixture of both accommodationist and integrationist interests and limited (racialist) social critique.

Radical Readings and Orientations of the Marginalized: The growth and dominance of the religion-inspired separate but accommodationist African American institutions and theologies of the nineteenth and early twentieth centuries notwithstanding, these institutions could not and did not embrace or reflect the sensibilities of every individual or community. A very different "reading" of America and of the Bible among African Americans was in evidence by the early decades of the twentieth century in major urban areas in the United States. This "reading" is critical of the dominant (white) American culture, both its "secular" and its religious aspects, including the dominant African American religious and cultural orientations.

No single group can be identified here; there are a number of groups—the Garvey Movement, Nation of Islam, Father Divine and the Peace Mission Movement, the Black Jews, Spiritual Churches, among other so-called sects and cults—that were without formal ties among themselves, yet had common sensibilities and rhythms and a shared critique of the dominant world and the African American "mainline" orientations.

The critique is registered in different ways by different groups. One of the most dramatic critiques is seen in the reading of the Bible, accepted as Holy Scripture by most whites and African Americans, through principles of interpretation not legitimized by dominant communities (e.g., in the Spiritual Churches). It is also registered through rejection of the canon respected by "mainline" communities and the embracing of "esoteric" sacred texts (e.g., by the Black Jews).

Women's Readings: The readings of women are in evidence throughout the history of African American engagement of the Bible—from Phyllis Wheatley to Maria Stewart and Jarena Lee and their countless unnamed counterparts to late twentieth-century critical "womanist" interpreters. Although women's readings of the Bible are a constitutive part of each cultural reading outlined above, to each reading women bring special nuances or intensity, especially with regard to the articulation of exclusion and suffering or its opposite, inclusion and joy.

Implications for Biblical Interpretation: Precisely because of the African beginnings and history in the United States and because of the role of the Bible in the construction of the dominant American cultural self-definition, an understanding of the history of African Americans' engagement of the Bible is most important for an understanding of American (popular and academic) biblical interpretation. It dramatically exposes biblical interpretation—popular, religious, and academic—as cultural encodings and significations, with its different cultural prejudices, dramatic silences, exaggerations, underplayings, and obfuscations.

Such a history implies the need for consideration of a change in interpretive agenda and paradigms. An altogether different hermeneutical paradigm, with ancient texts being neither the starting nor end point, but a part of a complex interfacing of the interpretation of self and culture and the interpretation of ancient texts, is suggestive and provocative. ***See also*** Bible; Biblical Criticism; Canon; Feminist Hermeneutics; Hermeneutics; Liberation Theology, Hermeneutics of.

V.L.W.

Agabus (ag´uh-buhs), a Christian prophet from Jerusalem who, in Antioch, predicted a widespread famine during the reign of the emperor Claudius (Acts 11:27–28); later, at Caesarea, he foresaw Paul's arrest in Jerusalem and subsequent imprisonment by the Gentiles (Acts 21:10–11). ***See also*** Prophet.

Agag (ay´gag), the name (or perhaps the royal title) of the king of the Amalekites whom Saul defeated but spared, contrary to divine command. After rebuking Saul bitterly, Samuel hewed Agag to pieces in Gilgal "before the Lord" (1 Sam. 15).

Agagite (ay´guh-g*it*), the ancestry of Haman and his father, Hammedatha, as identified in the book of Esther (3:1, 10; 8:3, 5; 9:24). The usual reference has been to descendants of Agag, an Amalekite king defeated by Saul (1 Sam. 15:7–9). This is consistent with the role

of Haman as "enemy of the Jews" in the stories in Esther.

agape (ah-gah´pay), the principal Greek word used for "love" in the NT. Of the three words for love in the Hellenistic world, it was the least common. The other two words were *eros,* which meant sexual love, and *philos,* which meant friendship, although their meanings could vary according to the context in which they appeared. Agape, because it was used so seldom and was so unspecific in meaning, could be used in the NT to designate the unmerited love God shows to humankind in sending his son as suffering redeemer. When used of human love, it means selfless and self-giving love. ***See also*** Love.

agate. ***See*** Chalcedony.

agora (ag´uh-ruh), the center of the lower part of a Greek town. The usual translation "marketplace" does not do justice to its function as the place where people gathered for social and political as well as commercial business. In the early phases of Greek city development, the agora was a natural open space near the main entrance to the acropolis. As the government of Greek cities changed from monarchy to democracy, the citadel, or fortified area, lost its importance as a vital nucleus of the town to the agora, which served as the place in which the citizens gathered to transact public business. A good deal of early Christian evangelizing will have taken place in the agora. Little more than a platform for the speakers was required. Athens was unusual in having a building, the Pynx, designed for large public assemblies. In later periods the theater was often used as the place for assembly (cf. Acts 19:29). P.P.

The agora at Corinth: remains of shops and the Temple of Athena.

agriculture. ***See*** Farming.

Agrippa (uh-grip´uh) **I,** Herod Agrippa I, son of Aristobulus and Bernice and grandson of Herod the Great. He was born ca. 10 B.C. and sent to Rome when he was six, shortly before the death of his grandfather, to be educated in the company of Drusus, son of the emperor Tiberius, and Claudius. Herod Agrippa (or, as he styled himself later, Julius Agrippa) became a close associate of Caius, who was to become the emperor Caligula. Grown accustomed to luxury and extravagance, Agrippa became a notorious spendthrift, constantly in debt for ever increasing amounts. At the urging of his sister Herodias, his brother-in-law Herod Antipas helped him with money and a position in Tiberias, but they soon quarreled and Agrippa found himself back in Rome, where he remained in debt and his incautious speech led to a brief imprisonment by Tiberius. When Tiberius died, only months later, and Caligula became emperor, Agrippa's fortunes suddenly improved. Caligula bestowed many honors and much wealth upon him, settling upon him, in A.D. 37, the former tetrarchies of Lysanias in Abilene and of Philip and, in 40, the territories of the exiled Herod Antipas. When Caligula was assassinated in 41, Claudius, his successor, also rewarded his old friend, giving him Judea and Samaria (his territory now comprised the kingdom formerly ruled by Herod the Great) and raising him to consular rank. From 41 to 44, Agrippa ruled Palestine with a pious, scrupulous, and apparently sincere adherence to the Jewish law that brought him the warm praise of the Pharisees. He also persecuted the early Christians and, according to Acts 12, was

A coin of Herod Agrippa I, ruler over Palestine from A.D. 41 to 44, with the ruler's image. A human image on a Jewish coin, in light of the biblical prohibition against images, is unusual (see Exod. 20:4).

responsible for the beheading of James the son of Zebedee and the imprisonment of Peter (Acts 12:1–4). Agrippa's death in A.D. 44 was sudden and unexpected; Acts and Josephus agree that it came at Caesarea and that he suffered an attack while dressed in splendid robes after having been acclaimed by the crowd (Acts 12:20–23). ***See also*** Herod. F.O.G.

Agrippa II, Herod Agrippa II or Marcus Julius Agrippa, the last of the Herodian house to hold a kingdom. When his father, Agrippa I, died suddenly in A.D. 44, Agrippa II was only seventeen and was being educated in Rome. The emperor Claudius, though well disposed toward him, did not immediately grant him the rights of succession because of his youth. By 50, however, he had been given the small territory of his deceased uncle, Herod of Chalcis, and in 53, he was permitted to exchange this for rule over the former tetrarchy of Philip and certain territories in the Lebanon. Nero added parts of Galilee and Perea to this realm, and Agrippa renamed his capital, Caesarea Philippi, Neronia in the emperor's honor. Agrippa's sister, Bernice, had been the wife of Herod of Chalcis, and she came to live with her brother after her husband's death. Their relationship became notorious as an incestuous affair, which apparently lasted throughout their lives in spite of her brief marriage to Polemon of Cilicia and her scandalous affair with Titus. The relationship between Agrippa and Bernice adds a poignant note to the account, in Acts 25:13–26:32, of Paul's appearance before them as a prisoner. Agrippa retained important rights having to do with the Temple in Jerusalem and was directly involved in its completion and the subsequent paving of the streets of Jerusalem with white marble. He attempted, insofar as possible, to support and promote Judaism. His true loyalty to Rome never wavered, however, even when put to the ultimate test provided by the Jewish revolt of A.D. 66 and its subsequent suppression by the Romans. Agrippa, after futile efforts to forestall revolt, joined the Roman side and not only regained his kingdom with Roman help but was closely associated with Titus, the conqueror of Jerusalem. Agrippa moved to Rome, and there he died after A.D. 93. ***See also*** Herod. F.O.G.

Ahab (ay'hab; Heb., "father's brother"[?]). **1** The son and successor of Omri, king of Israel (ca. 869–850 B.C.). His queen was Jezebel, daughter of Ethbaal, king of Tyre. Ahab inherited his father's military virtues and maintained a strong and stable government. He successfully defended his country against the powerful Aramean kingdom of Damascus, which he defeated in several battles. Ahab is the first king of Israel to come into conflict with Assyria. He is also the first whose name is recorded on the Assyrian monuments where we learn that he put two thousand chariots and ten thousand soldiers on the battlefield against Shalmaneser III at Qarqar in 853 B.C.

In the biblical account the point of interest lies not in the king himself, but in his four encounters with the prophets, especially Elijah. The first encounter concerns the great drought predicted by Elijah (1 Kings 17:1), which culminated in the contest between Elijah and the prophets of Baal on Mt. Carmel (1 Kings 18:17–40), at which Ahab was present. The second involved two unnamed prophets, one of whom encouraged Ahab in his resistance against Ben-hadad of Damascus (1 Kings 20:22). The third was the episode of Naboth's vineyard. After Naboth had refused Ahab's offer to buy his vineyard, Jezebel had Naboth executed so that Ahab could take possession of the coveted vineyard. When Ahab did so, he was confronted by Elijah, who threatened the total destruction of his house. As a result Ahab did penance for his part in the crime (1 Kings 21). The fourth encounter occurred during Ahab's campaign against the Arameans, a campaign that led to his death (1 Kings 22). When Ahab's court prophets predicted success, his ally Jehoshaphat of Judah asked for the word of another prophet of the Lord. The man summoned was Micaiah ben Imlah, who at first predicted success but, when pressed, uttered his fateful prediction.

The judgment of the Deuteronomic historian who gave 1 Kings its final form is extremely harsh on Ahab, primarily because he permitted Jezebel to patronize the cult of Baal. Excavations at Samaria have revealed the magnificence of his buildings (1 Kings 22:39). The dominance of Ahab over Judah is shown by his treatment of Jehoshaphat in the campaign of Ramoth-gilead (1 Kings 22:29–31). Ahab's daughter Athaliah was married to Jehoram, king of Judah, and held the throne herself for six years after Jehoram's death. **2** The son of Kolaiah, a false prophet among the Babylonian exiles. Jeremiah accused him of adultery and impiety and threatened him with death by fire at the hands of Nebuchadnezzar (Jer. 29:21–23). ***See also*** Elijah; Omri; Samaria, City of. D.L.C.

Ahasuerus (uh-has'*yoo*-air'uhs), king generally identified as Xerxes I (485–464 B.C.) and described in the book of Esther as ruling from India to Ethiopia (Esther 1:1). After banishing his queen, Vashti, he sought a replacement, selecting Esther. In the story of Esther and Mordecai, Ahasuerus appears as malleable and prone to extreme actions, first manipulated by Haman to allow the destruction of all Jews and then later by Esther and Mordecai to permit the Jews to defend themselves at the cost of many Gentile lives.

The historical Xerxes I ruled over twenty satrapies (Herodotus, Hist. III, 89), and his queen was Amestris from a noble Persian family (Hist. VII, 61).

King Ahasuerus and Queen Esther (right) as depicted in the wall paintings of the third-century A.D. synagogue at Dura-Europos.

According to Dan. 9:1, Ahasuerus was the father of Darius the Mede, and in Tobit 14:15 Ahasuerus joins Nebuchadnezzar in the destruction of Nineveh. Both notices pose severe chronological and historical problems. ***See also*** Esther; Persia; Xerxes. W.L.H.

Ahava (uh-hay´vuh), a river or canal in Babylonia (Ezra 8:15, 21, 31), location unknown, the rallying point for Ezra's journey to Jerusalem, where a preparatory fast was celebrated. Some Greek texts and 1 Esd. 8:41 call the river/canal Thera(s). In Ezra 8:15, Ahava could be a place name, perhaps a settlement, but this is less probable.

Ahaz (ay´haz; Heb., "he [Yahweh] has grasped"), son of Jotham and the father of Hezekiah. Ahaz was the eleventh king of Judah, reigning between 735 and 715 B.C. Only twenty years old at his succession, Ahaz is judged by the Hebrew historians as having committed such abominable Canaanite practices as sacrificing his son and worshiping at high places (2 Kings 16:1–4).

During the reign of Ahaz, the Assyrian Empire advanced to new heights, causing the entire region west of Mesopotamia to fight or pay tribute. Rezin, King of Syria, and Pekah, King of Israel, joined forces to stop the advance of Assyria. When Judah would not join their alliance, those two kings sought ways to replace Ahaz with a man named Tabeel, apparently an Aramean (see 2 Kings 16:5; Isa. 7:1–25). Ahaz sought to rescue himself from this threat by appealing to Assyria's King Tiglath-pileser, even giving him portions of the temple treasury. Perhaps it was this vassalage to Tiglath-pileser that led to Ahaz's replacement of the Lord's altar in the Jerusalem Temple with one modeled after an altar in Damascus (2 Kings 16:10–16). ***See also*** Hezekiah; Jotham; Pekah; Rezin; Tabeel. F.R.M.

Ahaziah (ay´huh-z*i*´uh; Heb., "Yahweh holds firm"), the name of two biblical kings. **1** The son of Ahab, king of Israel (ca. 850–849 B.C.). Ahaziah permitted his mother, Jezebel, to maintain and even strengthen the Baal cult (1 Kings 22:52–53). He apparently joined Jehoshaphat of Judah in a naval expedition which was wrecked at Ezion-geber, the port of departure (2 Chron. 20:35–37; but cf. 2 Kings 22:48–49). The country of Moab rebelled under Ahaziah (2 Kings 1:1); and apparently the Ammonites also gained their freedom at that time (2 Chron. 20:1). In his second year Ahaziah was severely injured in a fall from a window and sent for an oracle from Baalzebub, the god of Ekron. He was reproved by Elijah, who threatened him with death, which followed shortly (2 Kings 1:2–18). **2** The son of Jehoram and Athaliah, king of Judah (ca. 842 B.C.). He was allied with Jehoram of Israel in an unsuccessful campaign to recover Ramoth-gilead from Hazael of Damascus (2 Kings 8:28). When Jehoram was wounded in battle, Ahaziah visited him in Jezreel. Because of this kinship and friendship, Jehu, the king of Israel, assassinated him along with Jehoram (2 Kings 9:27–28). ***See also*** Ahab; Elijah; Ezion-geber; Jehu. D.L.C.

Ahiezer (ay´h*i*-ee´zuhr; Heb., "my brother is help"). **1** A leader of the tribe of Dan (Num. 10:25), identified as Ammishaddai's son (1:12). He camped on the north side of the site of the tribe of Dan (2:25), made offerings on the tenth day (7:66, 71), and led the rear guard (10:25), all to assist Moses. **2** In 1 Chron. 12:3, the chief of the Benjaminite ambidextrous archer/slingers who defended David while he was hiding from Saul.

Ahijah (uh-h*i*´juh; Heb., "Yah is brother"). **1** A prophet from Shiloh who tore his garment into twelve pieces in order to demonstrate visually the coming dissolution of the United Monarchy. The prophet from Shiloh also foretold Jeroboam's (ca. 924–903 B.C.) rise to power (1 Kings 11:29–31; 12:15; 2 Chron. 10:15). This same prophet later predicted the death of Jeroboam's son (1 Kings 14:2–18; 15:29). **2** The father of Baasha, who conspired against Nadab, son of Jeroboam, and reigned in his stead (1 Kings 15:27–33). **3** The son of Jerahmeel, brother of Caleb of the tribe of Judah (1 Chron. 2:25). **4** One of David's mighty men (1 Chron. 11:36). **5** A Levite, overseer of the treasures of the house of God in David's time (1 Chron. 26:20). **6** A Levite,

who with Nehemiah sealed the covenant (Neh. 10:26). S.B.R.

Ahikam (uh-hi´kuhm; Heb., "my brother has arisen"), the son of Shaphan who served as a courtier of King Josiah. He was among those who went to inquire of Hulda the prophetess concerning the significance of the book of the law found in the Temple (2 Kings 22:12–14). He later helped protect Jeremiah from King Jehoiakim (Jer. 26:24) and is often mentioned as the father of Gedaliah, the governor of Judah appointed by Nebuchadnezzar of Babylon around 587 B.C. and later assassinated (Jer. 40).

Ahilud (uh-hi´luhd), the father of two royal officials: Jehoshaphat, who served both David and Solomon as record keeper (1 Chron. 18:15; 1 Kings 4:3), and Baana, who was a district administrator charged with provisioning Solomon for one month of the year (1 Kings 4:12).

Ahimaaz (uh-him´ay-az), a name whose derivation has not been satisfactorily explained, borne by two men in the OT. **1** The father of Ahinoam, wife of Saul (1 Sam. 14:50). **2** Son of Zadok the priest, who was active during Absalom's revolt. He was loyal to David and remained in Jerusalem as a secret agent when David fled the city (2 Sam. 15:27–36; 17:15–22). He later was anxious to inform David about the suppression of the revolt, but he did not himself report that Absalom had been killed (2 Sam. 18:19–32). He may have been King Solomon's son-in-law, married to Basemath, Solomon's daughter (1 Kings 4:15), and stationed in Naphtali as the king's administrator. **3** An abbreviation, Maaz, occurs in 1 Chron. 2:27. J.G.G.

Ahiman (uh-hi´muhn). **1** An associate of Sheshai and Talmai (Num. 13:22; Josh. 15:14; Judg. 1:10). All are identified as Anakites located near Hebron, first encountered by the spies Moses sent to assess the promised land of Canaan, then driven out by Caleb (Josh. 15:14) and defeated by Judahites (Judg. 1:10). **2** One of four Levite gatekeepers of the Temple precincts after the exile in Babylon (1 Chron. 9:17).

Ahimelech (uh-him´uh-lek; Heb., "my brother [or kin] is king"). **1** The son of Ahitub and priest of Nob to whom David fled from the wrath of Saul (1 Sam. 21:1–15). Falling victim to David's story of a secret mission from King Saul, Ahimelech provided David and his men with "holy bread" (see Matt. 12:3–4). He also gave to David the sword of Goliath whom David had killed years earlier in the valley of Elah (1 Sam. 22:9–10). For so assisting David, Ahimelech and most of his family were killed by Doeg the Edomite at the command of Saul (2 Sam. 22:18–19). **2** A Hittite officer in the service of David (1 Sam. 26:6). ***See also*** Doeg; Goliath. F.R.M.

Ahinoam (uh-hin´oh-uhm; Heb., "good is my brother," or "my brother (God) is good"). **1** The daugher of Ahimaaz who became King Saul's wife (1 Sam. 14:50). She was the mother of Jonathan, Ishvi, Malchishua, Merab, and Michael (1 Sam. 14:49). **2** A native of Jezreel of south Judah, who was married to David, and who was the mother of his eldest son, Amnon (2 Sam. 3:2; 1 Chron. 3:1).

Ahio (uh-hi´oh; Heb., "his brother"). **1** One of two sons of Abinadab; he drove the cart carrying the Ark (2 Sam. 6:3; 1 Chron. 13:7) and walked before it (2 Sam. 6:4). **2** In the genealogies of Chronicles, a Benjaminite, son of Elpaal (1 Chron. 8:14). References in 8:31 and 9:37 may be to him, or to **3** A descendant of Jeiel. In addition to possible duplication of his identity in the genealogies, the name may not refer to a person in some texts.

Ahira (uh-hi´ruh), the son of Enan of the tribe of Naphtali (Num. 1:15). Ahira is mentioned four additional times in Numbers as one of Moses' assistants. He helped take the census (2:29), made offerings (7:78, 83), and formed part of the rear guard (10:27) when the tribe moved from Sinai.

Ahiram (uh-hi´ruhm). **1** Perhaps another name for Hiram, the king of Phoenicia. The capital city under Hiram was Byblos (Gebal). The excavation of his sarcophagus, dating from the eleventh century B.C., gives an example of Phoenician script that illuminates an important link in the development of the alphabet. He is not to be confused with Hiram of Tyre, who was a trading ally of Solomon. Tyre is south of Byblos. **2** One of the sons of Benjamin (Num. 26:38). ***See also*** Gebal.

Ahithophel (uh-hith´uh-fel), one of David's advisors, noted for his wisdom (2 Sam. 16:23; 1 Chron. 27:33–34). He proved disloyal to David during the revolt of Absalom (2 Sam. 15:17) and became the latter's chief counselor. When his advice was ignored he committed suicide (2 Sam. 17:23). Bathsheba, David's wife and Solomon's mother, may have been his granddaughter (2 Sam. 11:3; 23:34). His house was in Giloh, a town in Judah (2 Sam. 15:12). ***See also*** David.

Ahitub (uh-hi´tuhb). **1** Father of the priest Abimelech (1 Sam. 22:9, 11–12, 20). **2** Father of Zadok (2 Sam. 8:17; 1 Chron. 6:8, 12, 52–53; 18:16; Ezra 7:2). **3** Grandfather of Zadok (1 Chron. 9:11; Neh. 11:11). **4** Father of Ahijah, Saul's chaplain (1 Sam. 14:3, an uncertain text).

Ahohi (uh-hoh´hi), the father of Dodo and grandfather of the warrior Eleazer, who fought with David against the Philistines. He is mentioned only in 2 Sam. 23:9.

Ahohite (uh-hoh'hit), a descendant of Ahoah or possibly Ahohi. **1** Eleazer, one of David's warriors, a son of Dodo (1 Chron. 11:12). **2** Zalmon, one of David's "Thirty" (2 Sam. 23:28). **3** Ilai, a Davidic warrior (1 Chron. 11:20). **4** Dodai (possibly a variant spelling of Dodo), Eleazer's father (1 Chron. 27:4).

Ahola (uh-hoh'luh). ***See*** Oholah, Oholibah.

Aholibah (uh-hoh'li-buh). ***See*** Oholah, Oholibah.

Ai (*i*, ay'*i*), a Canaanite town near and to the east of Bethel (Gen. 12:8; 13:3), generally identified with the modern site of et-Tell. The name "Ai" itself means "ruin" in Hebrew, as does the modern Arabic name et-Tell ("heap, mound"). Et-Tell, about one and a half miles east of Bethel (modern Beitin), was excavated by Judith Marquet-Krause from 1933 to 1935 and again by Joseph A. Callaway from 1964 to 1972. Ai was an important urban center of about twenty-seven and a half acres during the Early Bronze Age from approximately 3100 to about 2400 B.C. (OT Jericho, by way of comparison, was about ten acres).

In the Early Bronze Age, Ai had a temple and a royal quarter. Its inhabitants apparently came originally from Syria and Anatolia. Egyptian influence is evident from the temple of this period and imported alabaster and stone vessels. The city had a massive stone-lined reservoir with a capacity of 480,000 gallons. The Early Bronze Age city was destroyed about 2400 B.C. and remained a ruin until about 1200 B.C.

A small unwalled village was established on about two and a half acres of the mound, dating to about 1220 B.C. The inhabitants practiced terrace farming and had sophisticated cistern systems for holding water, suggesting abundant knowledge of agricultural techniques. Their use of pillared houses also suggests a population with a history of settled existence. The village was abandoned a final time about 1050 B.C.

Joshua 8 describes the capture and destruction of Ai by the Israelites. However, at the time commonly accepted for the Israelite conquest of Canaan, about 1250 B.C., Ai was uninhabited. One explanation suggests the account in Joshua 8 is etiological (i.e., explanatory) rather than historical, ascribing a well-known ruin to the conquest by Joshua. Callaway at one time proposed instead that the Israelite capture of Ai came in the Iron Age and can be seen in the two phases of the Iron Age village. The conquest of Ai would then date to about 1125 B.C. An alternative view favored by W. F. Albright suggests that the biblical story of Joshua 8 originally referred to the capture of Bethel and was later transferred to the nearby ruins of Ai. However one interprets the archaeological and biblical data, Ai clearly poses difficulties for understanding the Joshua 8 account. ***See also*** Bethel; Conquest of Canaan. J.F.D.

Aiah (ay'yuh). **1** One of the sons of Zibeon, a Horite in Edomite territory (Gen. 36:24; 1 Chron. 1:40). **2** Father of Rizpah (2 Sam. 3:7; 21:8, 10–11), one of Saul's concubines who was later involved also with Ishbosheth and the power struggle for Saul's throne.

Aijalon (ay'juh-lon). **1** The name of a valley and an associated city mostly ascribed to the territory of Dan (Josh. 19:42). It is best remembered as the site where the sun stood still in the stories of Joshua's battles (Josh. 10:12), and where Jonathan defeated the Philistines after the battle at Michmash (1 Sam. 14:31). Part of the second administrative district under Solomon, it was later built up as a defensive center by Rehoboam. The site of the city is usually identified as Yalo at the western end of the valley, but Tell Qoqa, just southeast of Yalo, has also been suggested. **2** The Zebulunite Elon's burial site (Judg. 12:12), possibly referring to a place much farther north, near Rimmon.

Aijeleth hash-Shahar (ay'juh-leth hash-shay'hahr); Heb., part of the superscription of Psalm 22, meaning "Hind of (*or* A Hind is) the Dawn." These were perhaps the first words of a popular song whose tune accompanied this psalm.

Ajalon (aj'uh-lon). ***See*** Aijalon.

'Ajjul, Tell el- (aj'uhl, tel el), a large tell located four miles southwest of Gaza on the northern bank of the wadi Ghuzzeh. The site was densely populated ca. 2000–1500 B.C., producing a large number of inscribed seals and an impressive quantity of gold and jewelry. Perhaps the site is the Beth Eglāyim mentioned by Eusebius (*Onamasticon* 48:19). ***See also*** Tell; Wadi.

Akeldama (uh-kel'duh-muh; "Field of Blood," transliterated from Aramaic), field in Acts 1:18–19 (see Matt. 27:3–10) that Judas Iscariot is said to have purchased with the blood money he received for betraying Jesus. He died there; hence the name. ***See also*** Judas; Potter's Field.

Akhenaton (ahk'uh-nah'tuhn) or Amenophis (ah-men'oh-fis) or Amenhotep (ah-men'hoh-tep) IV, the "heretic" king of Egypt (ca. 1364–1347 B.C.) and one of the most controversial figures of antiquity. A pharaoh of the powerful eighteenth dynasty (1546–1319 B.C.), he is best known for his promotion of the exclusive cult of the sun disk, the Aten. Early in his reign he changed his name from Amenophis, honoring the god Amun of Thebes (and thereby Amun's powerful priesthood), to Akhenaton (Egyptian, "It is well with the Aten"). By the eighth year of his reign he moved the capital from Thebes to the new settlement of Akhetaten (Tell el-Amarna), a site in Middle Egypt unconnected with the cult of any other

deity. Under his predecessor Amenophis III (ca. 1402–1364) the Aten had become more prominent, but now the Aten was celebrated as the sole god, creator of all lands and peoples, mother and father of all creation. The "Great Hymn to the Aten" has some striking parallels with Psalm 104. In many reliefs the Aten is represented as a radiating sun disk, the rays terminating in hands holding out the symbol of life. To some extent Akhenaten and the royal family worshiped the Aten, and the rest of the people worshiped the royal family. His queen, Nefertiti, played an unusually prominent part in the court rituals. It is not clear whether Akhenaton or others were the prime movers behind this monotheistic reform.

Attempts were made to suppress other cults, and the king did not partake in the usual festivals in honor of other gods. In spite of the fundamental changes, Akhenaton was quite secure in his unwalled capital and Egypt remained strong at home and abroad. Egypt was intensively involved politically in Syria and Palestine. Akhenaton's successor, the young Tutankhamun, switched his allegiance to Amun and moved the capital back to Thebes. About fifty years later the attempt to eradicate the memory of Akhenaton and his Aten reform was underway. It did not succeed. ***See also*** Amarna, Tell el-; Egypt; Re. H.B.H.

Akkad (ak´ad). ***See*** Accad.

Akkub (ak´uhb). **1** A descendant of David in the postexilic period (1 Chron. 3:24). **2** One of the four gatekeepers of the Temple precincts (1 Chron. 9:17; see also Ezra 2:42; Neh. 7:45; 11:19; 12:25). **3** The head of a family of Temple servants in postexilic times (Ezra 2:45). **4** A Levite who assisted Ezra in expounding and reading the law (Neh. 8:7).

alabaster, compact, translucent gypsum often carved into vases. In the NT a globular perfume flask carved from alabaster is mentioned. Made without handles, it had a long neck that was broken to pour out the perfume (Mark 14:3; Matt. 26:7).

Alabaster vessels from Dir el-Balah. 1500–1200 B.C.

Alamoth (al´uh-moth; Heb., "young maidens"), a musical direction of unknown origin and meaning. Its derivation has led some to suggest it may mean "to be sung by young women" (Ps. 46), but its use as a direction for playing the harp (1 Chron. 15:20) implies a musical theme or rhythm. ***See also*** Psalms, The.

Alcimus (al´si-muhs), a Jew installed by the Seleucids as high priest ca. 161–159 B.C. in opposition to the Maccabees (1 Macc. 7:5–25; cf. 2 Macc. 14:3–26). He was hated for such acts as treacherously slaughtering a group of Hasideans and giving orders to destroy the inner wall of the Temple (1 Macc. 9:54–57). ***See also*** Maccabees; Seleucids, The.

Alemeth (al´uh-meth). **1** The son of Becher and grandson of Benjamin (1 Chron. 7:8; KJV: "Alameth"). **2** A descendant of Saul, whose father was Jarah (1 Chron. 9:42) or Jehoaddah (1 Chron. 8:36). **3** A city in Benjaminite territory (1 Chron. 6:60), also called Almon and identified as Khirbet 'Almit, located just northeast of Anathoth and east of Gibeon.

aleph (ah´lef), the first letter of the Hebrew alphabet, often used to designate a fourth-century A.D. parchment manuscript of the Greek Bible. The manuscript was discovered during the nineteenth century by Konstantin von Tischendorf at the Monastery of St. Catherine on Mount Sinai and hence called Codex Sinaiticus. Originally containing about 720 leaves, each measuring 15 by 13½ inches with four columns to the page, today the OT portion consists of 43 leaves at Leipzig, fragments of three leaves at Leningrad, and 199 leaves, together with the entire NT portion of 148 leaves, in the Royal Library of the British Museum in London. At the close of the NT stand *The Epistle of Barnabas* and part of *The Shepherd of Hermas*. In 1980, a dozen more leaves of the manuscript were reported found at St. Catherine's. ***See also*** Codex; Texts, Versions, Manuscripts, Editions. B.M.M.

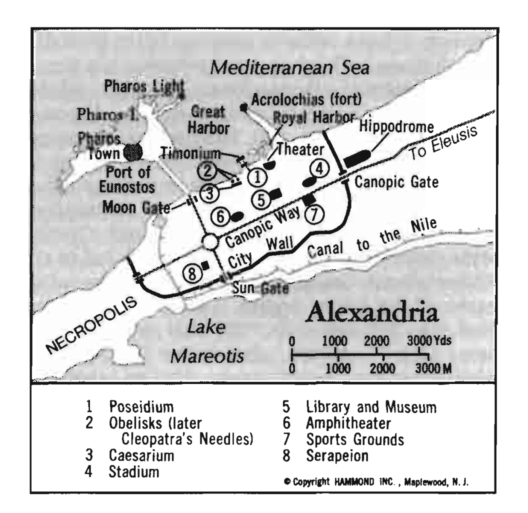
Alexander (al´ig-zan´duhr). **1** Alexander III (356–323 B.C.), known as "Alexander the Great," one of the greatest leaders of all time. He succeeded to the throne in 336 B.C. as king of Macedon and the Greek city-states conquered by his father, Philip II.

In 334 B.C. Alexander began the conquest of the Perisan Empire in the east. The first phase of his conquest occupied the period 334–330 B.C., during which time the Persian king, Darius III, was still alive and able to offer resistance to Alexander. During the first years of this cam-

Head of Alexander the Great. Alexander is pictured as a youthful Herakles with lion-skin cap on this silver tetradrachma minted after his death in the second century B.C. in Greece.

paign, Alexander marched through Anatolia, Phoenicia, Palestine, Egypt, and Mesopotamia. Though the Greek naval fleet had been disbanded in 334 B.C., Alexander was able to neutralize the Persian navy by controlling its bases. In 331 the oracle of Amun Re in Egypt proclaimed Alexander divine. At some point, Alexander may even have demanded that he be paid divine honors. In April of 331, Alexander founded the city of Alexandria on the western edge of Egypt's Nile delta. Alexander was able to obtain wealth from captured Persian capitals. He burned Persepolis in 330 and in July of that year Darius was murdered. Alexander concluded this phase of his conquest by disbanding his Greek allies.

The second phase (330–327 B.C.) involved putting down nationalist uprisings in the empire. It saw an increasing orientalization of the court and Alexander's marriage to the Bactrian princess Roxanne. During this period a number of cities called "Alexandria" were founded throughout the empire.



In 327 B.C. Alexander undertook his famous march through Afghanistan into India. His eastward progress was stopped when the troops refused to go any further. He marched down the Indus River, but plans to coordinate the army and fleet fell through when the ships were delayed by monsoons. Only twenty-five percent of the army survived the western crossing of the Gedrosian desert (southern coast of modern Iran and Pakistan). Upon his return, Alexander removed officials whose loyalty had proved questionable while he was in India.

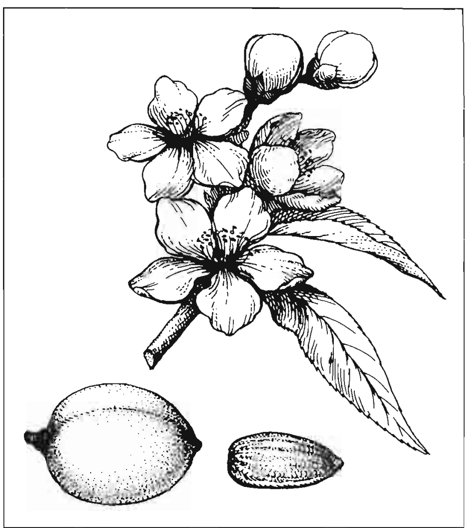
The final eighteen months brought the disbanding of Alexander's Macedonian veterans. The army and the court were increasingly staffed by Iranians. Alexander ordered the repatriation of Greek exiles in the empire. He appears to have come to insist on being paid divine honors by having those entering his presence prostrate themselves. Finally, while preparing for a campaign into Arabia, Alexander died on June 10, 323. His body was a prize at the funeral games and was won by Ptolemy I, who took it to Egypt. Though he retained the Persian administrative system of satrapies, Alexander established garrisons and Greek-style cities throughout the area, which led to an "orientalized Greek culture" among the educated of the entire region. The Hellenistic period (ca. 300 B.C.–A.D. 300) that resulted and saw Greek culture dominate the greater Mediterranean basin owes its impetus to Alexander's victories and it began with his death. The results of that dominance by Greek culture, and especially the Greek language, led to the translation of the OT in Greek (the LXX), and to the writing of the NT in that same language. Disputes over the degree to which Greek culture might be admitted into Jewish life also led to disputes between those who favored its adoption and those who opposed it altogether. **2** The son of Simon of Cyrene (Mark 15:21). **3** A member of the high-priestly family (Acts 4:6). **4** A Jew from Ephesus (Acts 19:33). **5** An apostate in 1 Tim. 1:20. ***See also*** Alexandria; Persepolis; Persia. P.P.

Alexandra (al'ig-zan'druh), the wife of the Hasmonean king Alexander Jannaeus. She ruled over the Jewish state from her husband's death in 76 B.C. until 69 B.C. The Pharisees enjoyed considerable influence during her reign, which was a peaceful time for the Macabbean kingdom. At her death, her two sons, Hyrcannus II, who had served as high priest during his mother's rule, and Aristobulus II, began a bitter struggle for the kingdom. ***See also*** Hasmoneans; Maccabees.

Alexandria (al'ig-zan'dree-uh), an Egyptian city on the Mediterranean coast near the Nile delta, founded in 332 B.C. by Alexander the Great; under Ptolemy, his successor, it became Egypt's capital. Alexandria was one of the largest cities of the Hellenistic world, a major shipping port (Acts 27:6; 28:11) famed for its 445-foot-high lighthouse, and the focal point of Hellenistic intellectual and cultural life with an unrivaled four-hundred-thousand-volume library and museum.

Alexandria's population of nearly one million included a large Jewish component, which by the first century A.D. was the largest Diaspora (i.e., Jews living outside Palestine) community in the world. Relations between groups in the city were tense, however, erupting during that period into bloody riots and pogroms and producing the first known Jewish ghetto. The violence was quelled in A.D. 41 by an edict from the Roman Emperor Claudius that directly confirmed the religious liberty of the Jews in

Alexandria and throughout the Empire and indirectly contributed to the period of relative calm that allowed the new Christian church to expand.



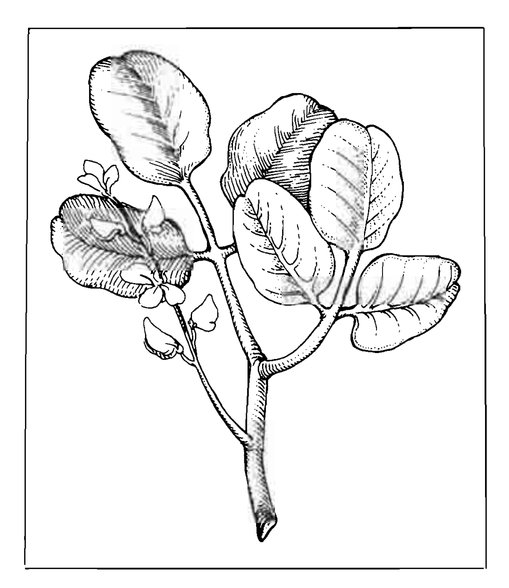
The literary flowering in Alexandria left a direct impact on the Bible. There the Greek translation of the Hebrew Bible, the Septuagint, was made; the Wisdom of Solomon, 3 and perhaps 2 and 4 Maccabees were written; and the allegorical method of interpretation was refined, a method that is found in the writings of Philo, a Jewish philosopher-theologian, the Letter to the Hebrews, *The Epistle of Barnabas,* and the later writings of church teachers like Clement of Alexandria and Origen.

Although Alexandria had Jewish inhabitants from its inception, the beginnings of Christianity there are shrouded in mystery. Apollos (Acts 18:24), a co-worker of Paul, was an Alexandrian, but he converted to Christianity only after he left that city. Legend attributes the initial Christian mission there to Mark, but the first firm evidence for Alexandrian Christianity derives from the second century A.D. The story of Christianity in Alexandria is intimately bound up with the struggle against Gnosticism, which also flourished on Egyptian soil. ***See also*** Apollos; Gnosticism; Philo; Septuagint; Wisdom of Solomon, The. J.M.B.

Alexandrinus (al'ig-zan-dri'nuhs). ***See*** A.

algum (al'guhm), a sumptuous wood imported by Solomon for the Temple (2 Chron. 2:8; 9:10–11). ***See also*** Almug.

almond (*Amagdalus communis*), a fruit tree, in Palestine growing as high as twenty-five feet. It flowers toward the end of January, the color of its blooms ranging from pink to pure white. According to Gen. 30:37 Jacob used rods of almond, poplar, and plane in his plan against Laban. In Gen. 43:11 almonds are among the choice fruits of the land. According to Num. 17:8, Aaron's rod put forth buds, blossoms, and ripe almonds, thus demonstrating he was divinely chosen. Jeremiah's vision of the rod of almond (Heb. *shaqed*) is the occasion for God to say he is watching over (Heb. *shoqed*) his word (Jer. 1:11). Koheleth uses the almond blossom to illustrate declining old age (Eccles. 12:5). In Exod. 25:33–34 and 37:19–20, the cup on each of the six branches and main stand of the candlestick (menorah; RSV: "lampstand") were shaped like almonds; the almonds and other vegetal shapes suggest an original connection with fertility rites. ***See also*** Lampstand. R.J.C.



Almond.

alms, gifts to the needy. Almsgiving is a common practice in the Bible that recognizes God's blessings and maintains proper community relations. In the OT care for the poor is recommended (Prov. 14:21, 31; Isa. 58:6–8) as just behavior, required by the tithe for the poor every three years (Deut. 14:28–29) and the leaving of fallen produce at harvest for the poor (Deut. 24:19–22). The NT also recommends the traditional Jewish practice of almsgiving (Matt. 6:1–4), calling it by a word that comes from the Greek word for "mercy." The early Christian community cared for its poor (Acts 6; 2 Cor. 8–9) and the parable of the sheep and the goats (Matt. 25:31–46) makes final judgment depend on care given to the needy. ***See also*** Love; Poor. A.J.S.

almug (al'muhg), a special kind of wood, perhaps red sandalwood (*Pterocarpus santalinus*). Almug was imported from Ophir (southwest Arabia) by Hiram of Tyre and used in the construction of Solomon's Temple and for musical instruments (1 Kings 10:11–12). The parallels in 2 Chron. 2:7 and 9:10–11 have *algum,* per-

haps by transposition of two letters. The occurrence of a similar word in Ugaritic *(almg)* suggests that the spelling in Kings is correct.

Traditional almug.

aloes (al´ohz), any plant of the genus *Aloe.* The aloes mentioned in the Bible are not the bitter, medicinal plant with which we are familiar, but a fragrant wood of either an eaglewood or sandalwood tree used as perfume. In Ps. 45:8 and Song of Sol. 4:14, it is listed along with other fragrant spices such as myrrh and cassia. Some scholars think that the aloes brought for Jesus' burial in John 19:39 do refer to the medicinal aloes, which were used by the Egyptians in embalming. However, others point out that the passage may just as easily refer to the valuable, fragrant perfume, perhaps used to soak the linen wrappings. P.P.

alpha (al´fuh), the first letter of the Greek alphabet. In Revelation, God (1:8; 21:6) and Jesus (22:13) are called "the Alpha and the Omega," meaning the first and the last (omega is the last letter in the Greek alphabet; cf. Isa. 44:6 for God as "first" and "last"). God was present at the first (Gen. 1:1–2:24; Ps. 90:2), and Jesus was also from the beginning (John 1:1–3). Both God and Jesus were expected to reign in the last days. ***See also*** Creation; Eschatology; Kingdom of God; Millennium; Omega; Parousia; Son of Man; Symbol.

alphabet. ***See*** Writing.

Alphaeus (al-fee´uhs). **1** Father of James, one of Jesus' twelve disciples who is not to be identified with James the son of Zebedee (Matt. 10:3; Mark 3:18; Luke 6:15; Acts 1:13). **2** Father of Levi (Matthew?) the tax collector (Mark 2:14; see Matt. 9:9; Luke 5:27). ***See also*** James; Levi; Matthew.

altar, the translation of a Hebrew word denoting "place of sacrifice." Because it is formed from a verbal root that means "to slaughter" or, more specifically, "to slaughter and cut up for the purpose of sacrifice," the term "altar" obviously is derived from the ancient, prebiblical practice of animal sacrifice. However, by the time of its usage in connection with biblical ritual, its early association with animal slaughter had been extended. The term altar can thus designate any surface upon which any kind of offering to the deity is placed. Altars mentioned in the Bible were used for oblations in general: for a variety of foodstuffs, including grain mixed with oil and/or salt and incense, wine, fruits, four-legged animals, birds; and for incense alone. In addition, the probability that the prebiblical sacrifices or ritual killings took place on the altar itself appears remote. While offerings of all types were deposited and burnt on the altar, the actual slaughtering of sacrificial animals took place at a specially designated spot adjacent to the altar itself.

The word for altar (*mizbayahkh*) is found approximately four hundred times in the Hebrew Bible. In addition, most English versions use "altar" to render another Hebrew term (*hahrel*), which literally means "mountain of God" and may refer to Syro-Mesopotamian altar constructions, since Ezekiel (43:15) probably uses it in reference to an altar built by King Ahaz in emulation of an altar he had seen in Damascus (2 Kings 11:10–16).

Virtually half of the OT usages appear in the Pentateuch, as might be expected, because of the concentration of priestly texts in the first section of the Hebrew Bible. Other biblical books with frequent mentions of the altar are 1 and 2 Kings, which include the description of the Solomonic Temple altar, 2 Chronicles, which has a decidedly priestly interest, and Ezekiel, a prophet whose visions are highly influenced by Temple imagery.

In the NT the word for "altar" (Gk. *thusiastērion*) is used in twenty-four places. In one instance, in reference to a pagan structure (Acts 17:23), another Greek word (*bōmos,* "high place") is translated "altar." Older English versions render a third word (*thumiatērion*) "censer" in one other place, Heb. 9:4, although the usage probably denotes the golden incense altar, as the NRSV understands it. The NT references exhibit concentrations in Matthew (seven times), with only two mentions in Luke and none in Mark or John, and in Revelation (eight times), as might be expected because of the Temple visions of that book.

The construction of sacrificial altars was not necessarily limited to the Jerusalem Temple or

Incense burners from Tel Zafit and Tel Amal and a small altar, first millennium B.C.

to any temple for that matter, at least not before the time of the centralization of the cult in Jerusalem in Josiah's time (639–609 B.C.). By their very nature, involving as they did the processing of animal carcasses and the burning of various foodstuffs, altars (except for incense altars) were open-air structures. Therefore, altars could in fact exist and function independently of temple buildings. This fact is especially apparent in the reference to altars in the patriarchal narratives of Genesis (e.g., Gen. 13:18; 33:20). However, the converse is apparently not true, and temple buildings were always accompanied by altars in their courtyards. In addition, the somewhat enigmatic shrines known as "high places" were perhaps a category of altar.

Biblical altars can be classified according to the material from which they were fabricated, namely, stone, earth, or metal. The first two kinds of material are associated with altars that could exist apart from sanctuaries. The third type of altar with respect to material (but not form) is mentioned only in connection with the central sanctuary of Israel, the tabernacle or Temple. A fourth type of altar, made of brick, is mentioned only once in the Bible, in Isa. 65:3, where a word *(lebaynah)* different from the normal Hebrew term is employed.

Stone Altars: These consisted of both natural and man-made forms. Evidently any large stone could be used in its original position and condition, as in the story of Gideon's offering of bread and meat upon a rock (Judg. 6:19–23; cf. 13:19–20). In other cases, a large stone might be moved from its existing position into a more convenient place, as for example when Saul insisted that a stone be brought to where he stood for the slaughter, presumably as an altar sacrifice, of sheep and oxen captured from the Philistines (1 Sam. 14:31–35). Simple stone altars apparently could be enhanced somewhat by the hollowing out of depressions in the rock to contain liquids. The evidence for such altars is archaeological rather than biblical, however, and the identification of large rocks with "cup holes" or shallow depressions as altars remains tentative. In addition to isolated stones, unhewn stones, as commanded in Exod. 20:25, could be formed into altars, either as irregular heaps (e.g., Gen. 31:46) or as dry-laid masonry structures. The latter seems to be the case for the carefully arranged stones of Elijah's altar on Mt. Carmel (1 Kings 18:30–35).

It is obvious that any of these stone altars could be established with relative ease, a consideration no doubt related to the fact that, until Josiah's reform, all slaughtering of animals for meat was to be considered a sacrificial act, at least according to the tradition preserved in Lev. 17:3–5 and altered by the proscriptions in Deut. 12:15–28.

Earthen Altars: These could also be erected anywhere, according to Exod. 20:24, for the sacrifice of various kinds of offerings. Simplicity and availability to all the people characterize both earth and stone altars; neither technical competence nor craft specialization was associated with the construction of these altars. Brick altars, although hardly in evidence in Palestine in contrast with Mesopotamian practice, were technically earthen structures but would have required somewhat more skill in their fabrication.

Metal Altars: Altars of metal are mentioned in the Bible only in connection with the central sanctuary of ancient Israel. Several biblical sources provide descriptive materials: the tabernacle texts of Exodus, the Solomonic Temple description in 1 Kings, Ezekiel's Temple vision, and to a lesser extent the Temple vision in the book of Revelation. These texts contain a number of discrepancies, omissions, or contradictions in their presentation of the altars, as might be expected since they deal with sanctuaries that existed over a wide period of time, from a premonarchical tent shrine through the First Temple with its subsequent alterations and perhaps even the postexilic Temple. Nonetheless, a fairly accurate understanding of the two metal altars, the golden altar of incense and the bronze altar of burnt offerings, of the main cultic center can be acquired from these sources.

The *altar of incense* was placed inside the sanctuary, directly in front of the inner sanctum and flanked, according to the Exodus texts (Exod. 30:1–10; 37:25–28; cf. 1 Kings 7:20–21, 48), by two other appurtenances, the menorah and the table of the Bread of the Presence. (The latter may functionally be an altar, but it is not technically designated as such.) It was made of wood and, like everything within the sanctuary, was covered with the precious metal gold. An

Two altars pictured *in situ* in the Holy of Holies of the Israelite temple at Arad, ninth century B.C.

upright pillar measuring 1 × 1 × 2 cubits (perhaps 18" × 18" × 36"), the incense altar featured, in addition to rings and staves for carrying, horns on its four upper corners. For this reason it has been compared to various horned incense altars recovered from Iron Age levels at such sites as Megiddo and Shechem as well as to small stone altars without horns from Arad, even though these excavated examples are notably different in size and material from the biblical incense altar. Twice daily incense was burned in the tabernacle or Temple on the golden altar. In addition, this altar played a central role in the annual purgation rites that maintained or reestablished the sanctity of the entire sacred precinct. In this capacity, it provided a connection between the holiest inner part of the Temple and the less holy external zone, the court. Situated on the central axis of the sanctuary, the golden altar united all three zones of Temple sanctity.

The *altar of burnt offering* stood in the courtyard of the tabernacle (Exod. 27:1–8; 38:1–7) and occupied a special "holy place," akin to the holiness within the sanctuary, which could be approached only by priests even though nonpriests could be present in the courtyard. The Temple description in 1 Kings omits a description of this altar, perhaps because Ahaz had moved it or because Solomon had used one made by David; but 2 Chron. 4:1 does describe a courtyard altar (20 × 20 × 20 cubits or about 30 × 30 × 30 feet), and 1 Kings 8:64 also mentions it. Thus there can be no doubt that the Jerusalem Temple featured a courtyard altar as the focus of its sacrificial cult. Although larger than the tabernacle altar, which was 5 × 5 × 3 cubits (about 7½ × 7½ × 4½ feet), it was also made, or perhaps overlaid, with bronze, like the other courtyard appurtenances. An even larger courtyard altar, in the Syrian style, was introduced by Ahaz and probably continued to be used until the Temple was destroyed. The information in Ezekiel, while not mentioning the material from which it was constructed, emphasizes the altar's great size (12 cubits high and 18 × 18 cubits at its base or about 18 feet high and about 27 × 27 feet at the base) and tiered shape and most likely reflects the altar Ahaz commissioned. Both the tabernacle courtyard altar and that of Ezekiel's vision had horns at their four upper corners, a feature that perhaps can be associated with the large horned altar made of hewn sandstone blocks discovered at Beersheba.

This classification according to material is convenient in considering the archaeological remains of ancient altars. Another helpful distinction is their location; that is, many altars are located within the context of shrines or temples. Yet many others stand independent of such structures; they were situated on hilltops, raised open-air platforms (mainly in pre-Israelite periods), and even on rooftops. Altars clearly outnumber shrines and thus represent an important and widespread part of life in biblical antiquity.

The important role of sacrificial altars in ancient Israel is clearly derived from common Near Eastern practices. However, non-Israelite sacrificial systems were rooted in the idea of providing sustenance and pleasing odors for the gods in their earthly residences. Israelite altars, while technically hearths for God's dwelling, did not preserve that concept. Rather they functioned to bring humanity close to heaven and not vice versa. The consecration of altars, that is the establishment of their holiness, was linked to a divine theophany (appearance); hence, altars were installations that enabled people to draw near to God's presence. This concept of altar holiness underlies both the sacrificial aspect and also the testimony (cf. Josh. 22:26–29) and asylum (e.g., 1 Kings 2:28; cf. Exod. 21:14) functions of biblical altars. The NT continues the OT traditions; its references to altars are mainly to the courtyard altar of the Jerusalem Temple, either in pre-exilic or postexilic (chiefly Herodian) times. In one significant development of this pattern, the Christian altar of Heb. 13:10 appears to be a metaphor for human self-offering which, like its Hebraic precursor, brings the offerant close to God. ***See also*** Bethel; Tabernacle; Temple, The; Temples; Worship.

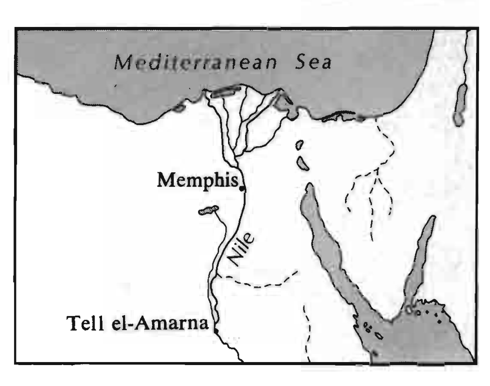
Altashheth (al-tahsh'heth; Heb., "do not destroy"), a Hebrew word found at the beginning of Psalms 57–59, 75, translated in the RSV "Do Not Destroy." It may have been a musical notation of some sort, designating a familiar tune or

rhythm pattern, although its meaning remains unknown. ***See also*** Psalms, The.

Amalekites (uh-mal'uh-kits), descendants of Amalek, who was a grandson of Esau according to the OT (Gen. 36:15–16). As a people, the Amalekites inhabited territory assigned to Israel, Judah, and the Transjordanian states. They were probably nomadic, but even if they were not, they were certainly mobile. Often they are mentioned as inhabiting the fringe of settled territory or associated with the desert regions.

The Amalekites attacked Israel on its wilderness journeys from Egypt (Exod. 17:8–16), a report that highlights an antipathy between the two peoples. Other references to them suggest that they were proficient raiders of village and agrarian communities (1 Sam. 30:1–20; Judg. 6:1–6).



As Israel solidified its territorial hold during the period of the judges and the United Monarchy (ca. 1225–926 B.C.), the Amalekite threat gradually lessened (see 2 Sam. 8:12; 1 Chron. 18:11). There are no more OT references to the Amalekites after the narratives about David except for a summary reference in 1 Chron. 4:43.

J.A.D.

Amariah (am'uh-ri'uh; Heb., "Yah [God] has spoken" or "Yah has promised"). **1** A Levite, an ancestor of Zadok and Ezra. There are two men in one genealogical list (1 Chron. 6:7, 11) bearing this name: the first is the son of Meraioth and the second the son of Azariah. However, other lists omit one of these (1 Chron. 6:52, the first; Ezra 7:3, the second). It is possible that these latter lists were abbreviated, a practice not uncommon in the Bible. It is also possible that parts of the longer list were accidently duplicated by scribes. **2** A Levite, the second son of Hebron of the clan of Kohath (1 Chron. 23:19). **3** The chief priest in Jerusalem during the reign of Jehoshaphat (2 Chron. 19:11). **4** A Levite who shared the responsibility for distributing the Levites' portion of the offerings to the levitical cities during the reign of Hezekiah (2 Chron. 31:15). **5** A Levite who returned from the Babylonian captivity with Zerubbabel (Neh. 12:2), possibly the same one who signed the covenant to keep the law (Neh. 10:3) and was condemned by Ezra for marriage to a foreign woman (Ezra 10:42), although this identification is not certain. **6** A Judahite who lived in postexilic Jerusalem (Neh. 11:4). **7** A family group in postexilic Jerusalem whose leader was Jehohanan (Neh. 12:13). **8** A son of (King?) Hezekiah in the lineage of the prophet Zephaniah (Zeph. 1:1).

D.R.B.

Amarna, Tell el- (uh-mahr'nuh, tel' el), the modern name for the ruins of ancient Akhetaten (Egyptian, "The Horizon of the Sun Disk/Aten"), briefly the capital of Egypt during the later years of Akhenaton (Amenophis IV)

and his immediate successors. Settled ca. 1356 B.C., Akhetaten is in middle Egypt, at a wide plain on the east bank of the Nile about midway between Thebes and Memphis. When Akhenaton founded the city he dedicated it to the cult of the Aten, honored as the sole god. Since the city was abandoned within fifteen to twenty years of its founding—the young Tutankhamun moved the court back to Thebes—it is a unique, one-period city. The city plan features a separate complex for the royal residence and extensive structures for the ceremonial and ritual acts of the royal family. The exaggerated, naturalistic style of the sculptures, reliefs, and paintings, together with the uniquely intimate scenes of Akhenaton, his queen, Nefertiti, and their daughters, has made Amarna art world famous. From adjacent tombs come the hymns to the sole god, the Aten (or to the Aten and the king), who is also celebrated on the city's boundary stelae. Another major discovery involved tablets in cuneiform Akkadian including both literary texts and over three hundred and fifty letters exchanged between the Egyptian court and the kings of western Asia Minor. The bulk of these letters came from kings of Syria and Palestine, including rulers of Jerusalem, Shechem, and Megiddo among other biblical cities. These texts demonstrate the international character of the age and the socially and politically disturbed situation in Palestine. Prominent in the letters are the *Khapiru,* a marginal people reminiscent of the later Hebrews. ***See also*** Akhenaton; Hebrews; Khapiru. H.B.H.

Amasa (uh-may'suh; Heb., "to support, defend, protect" [cf. Isa. 46:3]). **1** The son of Abigail, David's half-sister, and Jether (1 Chron. 2:17). He was the cousin of Joab and his successor as military commander-in-chief, despite his defection to the rebelling Absalom (2 Sam. 17:25; 19:14). During the revolt of Sheba, he failed to take prompt action and was therefore murdered by Joab (2 Sam. 20:1–13). He can probably be identified with Amasai, the leader of the thirty "mighty men" (1 Chron. 12:19). **2** The son of Haldai and a prince of Ephraim (2 Chron. 28:12) who helped the prisoners of Judah (2 Chron. 28:12–15). J.G.G.

Amasai (uh-may′si). **1** Chief of David's "Thirty," an elite force or bodyguard (1 Chron. 12:18). **2** A Levite, son of Elkanah (1 Chron. 6:25) and father of Mahoth (1 Chron. 6:35), perhaps the same person referred to in 2 Chron. 29:12. **3** A levitical priest who was a trumpeter (before the Ark) in David's time (1 Chron. 15:24).

Amaziah (am′uh-zi′uh; Heb., "Yahweh is mighty"). **1** The king of Judah ca. 800–783 B.C. Amaziah was the son of Joash; he succeeded his father as king when he was twenty-five years old (see 2 Kings 14:1–20). According to 2 Kings 14:2 he ruled twenty-nine years, but the chronological problems posed by his synchronism with Jehoash, king of Israel (2 Kings 14:17), can only be resolved by supposing that he actually reigned only ca. eighteen years, being regent for the balance. Upon ascending the throne at his father's murder, Amaziah consolidated his power by annihilating the assassins but sparing their sons. He is said to have slaughtered ten thousand Edomites in a battle in the "Valley of Salt," but that and the site of Sela (Petra?) have not been positively located. Emboldened by his success against Edom, he made overtures to his rival Jehoash, king of Israel (2 Kings 14:8–14), only to be challenged and defeated at the battle of Beth-shemesh, after which Judah was reduced to Israel's vassal state. Later a conspiracy was mounted against him, and he was pursued to Lachish, where he was murdered. **2** A Simeonite (1 Chron. 4:34). **3** A Levite of the family of Merari (1 Chron. 6:45). **4** A priest of Bethel (Amos 7:10, 12, 14). W.G.D.

amen (ah-men′, ay′men′), a Hebrew word meaning certainty, truthfulness, and faithfulness. Both the OT and NT use it as a liturgical response at the end of Psalms and doxologies in which the congregation affirms what has been prayed by saying Amen, "So be it." In the Gospels Jesus often prefaces his teachings with "Amen I say to you," a solemn affirmation which the RSV translates "Truly I say to you."

Ammiel (am′ee-uhl). **1** A Danite, son of Gemalli. He was one of the spies sent by Moses into Canaan (Num. 13:12). **2** The father of Machir, who protected Jonathan's crippled son, Mephibosheth (2 Sam. 9:4–5), and equipped David at Mahanaim (2 Sam. 17:27). **3** The father of Bathshua (variant spelling of Bathsheba; 1 Chron. 3:5). **4** The sixth son of the Korahite Temple gatekeeper Obed-edom (1 Chron. 26:5).

Ammihud (uh-mi′huhd). **1** The father of Elishama, an Ephraimite leader (Num. 1:10; 2:18; 7:48, 53; 10:22), and the great-grandfather of Joshua (1 Chron. 7:26). **2** The father of Shemuel, a Simeonite who allotted land for inheritance (Num. 34:20). **3** The father of the Naphtalite leader Pedahel, who also allotted land (Num. 34:28). **4** The father of Talmai, king of Geshur, to whom Absalom fled (2 Sam. 13:37). **5** A Judahite son of Omri and father of Uthai (1 Chron. 9:4).

Amminadab (uh-min′uh-dab; Heb., "my kinsman is noble"). **1** The father of both Elisheba, Aaron's wife (Exod. 6:23), and Nahshan, a tribal leader of Judah during the wilderness wanderings (Num. 2:3). He is named in the lineage of King David (Ruth 4:19–20) and in the ancestry of Jesus through Joseph (Luke 3:33). **2** A Levite of the clan of Kohath (1 Chron. 6:22), probably the same one who, as leader of the clan of Uzziel (Kohath's son), helped bring the Ark of the Covenant from the house of Obed-edom to Jerusalem (1 Chron. 15:10).

Ammishaddai (am-i-shad′i; Heb., "my kinsman is Shaddai [divine name translated 'Almighty']"), the father of Ahiezar, leader of the tribe of Dan during the wilderness wanderings (Num. 1:12).

Ammonites (am′uh-nits), a people who lived east of the Jordan River, in the area of the modern state of Jordan. The capital city was called Rabbah. Its ancient remains are located in the heart of modern Amman. According to Gen. 19:30–38, a son was born to Lot, Abraham's nephew, named Ben-ammi. This child is reputed to be the progenitor of the Ammonites. His half brother is Moab, the progenitor of the Moabites, who lived south of the Ammonite region. According to historical research, the rise of the kingdom of Ammon east of the Jordan River coincided with the rise of several states

Limestone statue of an Ammonite king from the ninth century B.C.

in the greater Syro-Palestinian area during the Late Bronze Age and Early Iron Age (ca. 1500–1000 B.C.). Additional peoples who emerged in that area at that time were the Moabites, the Edomites, Israel, and several Aramean states.

There are no references to the name Ammon in Late Bronze Egyptian sources such as survive for Moab, but the archaeological record is quite clear that there were permanent settlements in the region of modern Amman during that period. In recent years a long-term exploration known as the Madaba Plains Project has made considerable progress in uncovering the Ammonite culture of the Iron Age. Excavations at sites a few kilometers south of Amman (Hesban [biblical Heshbon?], Tell el Umeiri, Tell Jawa) have produced walled settlements, a distinctive pottery profile, and some inscriptional remains. Excavation continues at the large mount of ancient Rabbah, where both Late Bronze and Iron Age remains have been discovered.

Conflicts between Ammon and Israel arose early in their respective political histories. Sometime after the Israelites had entered the land of Canaan, they were defeated by a coalition of Ammonites and Philistines. Jephthah, the son of Gilead and a harlot, rallied Israel to battle against them. To ensure success, Jephthah vowed to sacrifice to God the first one to meet him if he returned home victorious. His subsequent victory was marred when his only child, a daughter, was first to greet him (Judg. 10:6–11:40). In later battles, the Ammonites were defeated by Saul at Jabesh-gilead (1 Sam. 11) and then by David at Rabbah (2 Sam. 11:14–21). Much that happened to the Ammonites after those defeats is obscure, but the defeats by Israel did not subdue them permanently. As the political fortunes of both Israel and Judah waned in the eighth and seventh centuries B.C., Ammonite culture continued to develop, a conclusion substantiated by both epigraphic and artifactual evidence.

The chief deity of Ammon was Milkom. His name is formed from the root word for "king" or "ruler" (*mlk*). According to 1 Kings 11, Solomon built a chapel for Milkom on the hill east of the Temple Mount in Jerusalem. This was likely a response to the needs of a diplomatic marriage between Solomon and an Ammonite princess.

The capital city of Ammon, Rabbah, was rebuilt and enlarged in the third century B.C. by Ptolemy Philadelphus, a descendant of one of the generals of Alexander the Great who, after his death, had divided among themselves the lands he had conquered. Ptolemy renamed the new city Philadelphia in his own honor. The eventual reappearance of the name of the Ammonites in the name of the modern Jordanian city of Amman is an indication of the long-standing association of the area with that ancient people. ***See also*** Jephthah. J.A.D.

Amnon (am´non; Heb., "faithful"). **1** The eldest son of David and Ahinoam and the half-brother of Absalom. He fell in love with his half-sister Tamar, daughter of David and Maacah and full sister of Absalom. Acting on the advice of his cousin Jonadab, he pretended to be ill, asked David for Tamar to attend him, and then raped her when they were alone. His action infuriated Absalom, who waited patiently for his revenge. After two years had passed Absalom, who had persuaded David to send his sons with him, Absalom, to the sheepshearing, arranged with his retainers for the murder of Amnon. His death at the hand of Absalom precipitated a rift between David and Absalom (2 Sam. 13). **2** A Judahite, son of Shimon (1 Chron. 4:20). ***See also*** Absalom; David; Tamar. D.R.B.

Amon (am´uhn). **1** A governor of the city of Samaria in the reign of Ahab (1 Kings 22:10, 26). **2** A king of Judah, the son of and successor to Manasseh. He was the father of Josiah. He became king at age twenty-two and ruled for two years (642–640 B.C.), when he was murdered in his palace by servants (2 Kings 21:19–26; 2 Chron. 33:21–25). The conspirators were apparently opponents of his and his father's pro-Assyrian policies. The author of Chronicles considers the guilt of Amon to have exceeded even that of his father, Manasseh.

Amorites (am´uh-r*i*ts), according to biblical tradition one of the primary peoples in the land of Canaan before the rise of Israel, the others being the Canaanites and the Hittites (see Ezek. 16:3). The term "Amorite" can refer to the basic population of the whole area (e.g., Gen. 15:16; Deut. 1:7). In particular, the Amorites are associated with Transjordan and the kingdoms of Sihon, centered at Heshbon, and Og, centered at Ashtaroth and Edrei. These "two kings of the Amorites" appear as opponents of Israel prior to the settlement of Palestine. Og, with his famous "iron bedstead," is cited as the last of the celebrated giants. From the perspective of the Israelites, the Amorites were idolators and doers of iniquity (e.g., Josh. 24:15; Judg. 6:10). Accordingly, God drove them out of the land.

The Semitic-speaking Amorites appear in cuneiform (and Egyptian) sources as an early population group, associated especially with the west (including areas connected with the patriarchs of Israel, Abraham, Isaac, and Jacob), and as politically dominant in Mesopotamia in the early second millennium B.C. There was also a territory of Amurru in western Syria. At times, such as in the two centuries prior to the Exodus (fifteenth–fourteenth centuries B.C.), there was a specific kingdom of Amurru; in earlier times the area had several kings.

The antiquity of Amorites in the land of Canaan is unclear. Linguistic evidence indicates their presence as a settled population by

ca. 1900 B.C., to judge from personal names, but that evidence is not decisive. The archaeological evidence is also unclear. The coming of the Amorites has been correlated by some scholars with the archaeological discontinuity at the end of Early Bronze Age III, ca. 2350 B.C. (and a transition to seminomadic pastoralism), or with the emergence of Middle Bronze I, ca. 2000 B.C. (and a transition to a more urbanized society). The problem is not settled. The patterns of population shift in the larger area are complex and precise correlations of literary and archaeological evidence are difficult. ***See also*** Og; Sihon.

H.B.H.

Amos (ay′muhs), **the Book of,** one of the twelve Minor Prophets (Hosea through Malachi) of the OT. Amos, the Hebrew prophet of the eighth century B.C. to whom it is attributed, was a native of Tekoa in Judah and was active in the Northern Kingdom (Israel). He identifies himself as a "herdsman and a dresser of sycamore trees" (7:14; cf. also 1:1) who was called to prophesy against Israel. On the basis of the superscription to the book (1:1), which places him in the reigns of Uzziah and Jeroboam, and historical allusions in his speeches, his work can be dated ca. 750 B.C. Thus he is the earliest of the prophets whose words have been handed down in writing.

OUTLINE OF CONTENTS

The Book of Amos

I. Superscription and motto (1:1–2)
II. Prophetic speeches (1:3–6:14)
  A. Prophecies against the nations and Israel (1:3–2:16)
  B. Prophecies of punishment (3:1–6:14)
III. Vision reports and prophecies (7:1–9:15)
  A. Three vision reports (7:1–9)
  B. Story of prophetic conflict (7:10–17)
  C. Two vision reports and prophecies of punishment (8:1–9:8b)
  D. Prophecies of salvation (9:8c–15)

The nine chapters of the book of Amos consist mainly of short prophetic speeches, most of them addressed to the people of Israel as a whole. There are, however, other genres, including vision reports; an account of the prophet's encounter with Amaziah, the priest of Bethel (7:10–17); and three brief hymnic passages (4:13; 5:8–9; 9:5–6). Following the introductory superscription and the book's motto (1:1–2), the first major section of the book is a collection of prophetic speeches (1:3–6:14). The first part of that section (1:3–2:16) is a series of very similar prophecies of punishment, first against Israel's neighbors and then against Israel itself. The remainder of that section (3:1–6:14) is a collection of various prophetic addresses, most of them prophecies of punishment against Israel for its sins. The second major section of the book (7:1–9:15) is organized around a series of five vision reports, which are filled out with other prophetic announcements. The report of Amos's encounter with Amaziah appears between the third and fourth vision reports and likely was inserted at that point by an editor of the Amos tradition.

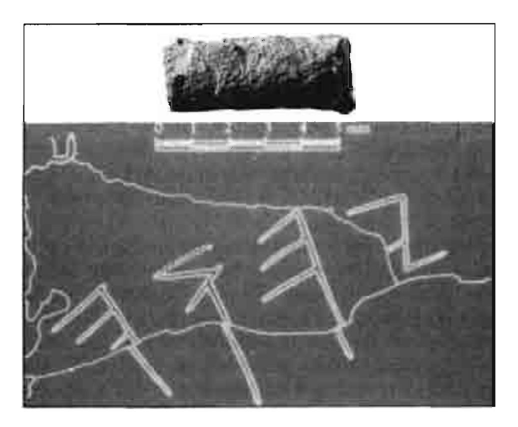
Most of the material in the book seems to stem from an authentic Amos tradition; that is, most of these words have their roots in the sayings of the eighth-century prophet, which were collected, handed down by the successors of the prophet, and eventually committed to writing. In the long process of transmission the prophetic speeches themselves, as well as their organization into the present book, would have been shaped by the bearers of the tradition. At points there is evidence of some of the stages in that transmission process. The words that originated in the Northern Kingdom would have been preserved and passed down in the Southern Kingdom (Judah). Thus, remarkably, words of judgment against Judah (2:4–5) were added to the tradition. Moreover, the concluding announcements in 9:8c–15 and the hymnic passages (4:13; 5:8–9; 9:5–6) very likely were added later, during the time of the Babylonian exile. A few other verses, such as 3:7, also are secondary.

Both the form and the style of the prophet's speeches reveal his understanding of the prophetic role and message. Although there are a few well-known lines in which Amos calls for change on the part of the addressees (5:4–7, 14–15, 21–24), virtually all of the speeches are announcements of judgment or prophecies of punishment. These are very brief addresses in which Amos speaks in the name of God to announce that Israel's God is about to intervene to punish the people, an individual, or a group for their sins. His message is a simple one: God will soon bring disaster in the form of military defeat and exile upon Israel. The sins that have led to this judgment are social injustice, such as economic and judicial oppression of the poor, and religious arrogance. There is, in fact, relatively little in the message of Amos that had not been known earlier in the religious traditions of Israel. Distinctive are his message that the end has now come, his stress on the obligations of a people elected by God (cf. 3:1–2), and his assumption that other nations have both been the objects of divine care (9:7) and are subject to punishment by the God of Israel (1:3–2:3). ***See also*** Prophet.

Bibliography

Mays, James L. *Amos.* Philadelphia: Westminster, 1969.

Stuart, Douglas. *Hosea–Jonah.* Word Biblical Commentary, vol. 31. Waco, TX: Word Books, 1987.



Wolff, Hans Walter. *Joel and Amos.* Hermeneia. Philadelphia: Fortress, 1977. G.M.T.

Amoz (ay´muhz; Heb., "he is strong"). The father of Isaiah (Isa. 1:1). The name, to be distinguished from Amos, is a shortened form of Amaziah.

Amphipolis (am-fip´uh-lis), a city situated inland above the Gulf of Strymon in northeastern Macedonia. The Strymon River, which formed a loop around part of the city, seems to have been the source of its Greek name, "double city." In the first century A.D., Amphipolis was a military post and station along the main east-west Roman road from Asia to Italy, the Egnatian Way. After leaving Philippi, Paul passed through Amphipolis on his way to Thessalonica (Acts 17:1).

Amram (am´ram). **1** The grandson of Levi, son of Kohath, father of Aaron and Moses (Exod. 6:16–20). **2** A son of Bani (Ezra 10:34).

amulet, a small object believed charged with divine potency and thus effective in warding off evil and inviting the protection of beneficial powers. Amulets were integral to belief in magic and derived their efficacy from close physical contact with a holy person or object. Frontlets and phylacteries served similar purposes (Exod. 13:9, 16; Deut. 6:8; 11:18; Matt. 23:5), as did Paul's handkerchiefs (Acts 19:12). ***See also*** Magic and Divination.

A tiny silver amulet found in Jerusalem is inscribed with ancient Hebrew characters that spell out the divine name, YHWH, and which are drawn here. Originally the amulet—3.82 inches long, unrolled—was rolled and a string was threaded through it so that a person could wear it around the neck. From the writing, it may be dated to ca. sixth century B.C.

Anah (ay´nuh). **1** One of the eight sons of Seir the Horite; he was a tribal chieftain of the Horites, ancient inhabitants of the area of Edom (Gen. 36:20; 1 Chron. 1:38). **2** A nephew of 1 above and the father-in-law of Esau (Gen. 36:2). He was known for his discovery of a hot spring in the desert (Gen. 36:24). ***See also*** Horites; Seir.

Anak (ay´nak), eponymous ancestor of a people, the Anakim (NRSV: "Anakites"), considered "giants" who lived in the environs of Hebron (Num. 13:22, 28). According to Num. 13:33 the Anakim came from the Nephilim, those of mixed human and divine character (Gen. 6:4). Josh. 15:13 and 21:11 note Arba as the father of Anak. Joshua also reports (15:14; see also Judg. 1:20) that Caleb drove out three of his descendants. Deut. 9:2 reports the Anakim being "strong and tall" and reputedly unbeatable. Egyptian texts from the nineteenth–eighteenth centuries B.C. attest to the existence of some princes of people who might be Anakim.

Anakims (an´uh-kimz), the plural the KJV uses for a pre-Israelite Canaanite tribe feared as gigantic (Num. 13:22, 28, 33; Deut. 1:28; 9:2; Josh. 11:21–22; 15:14; 21:11; Judg. 1:20). The RSV translates the word as "descendants of Anak." ***See also*** Canaan, Canaanites; Nephilim.

Anani (uh-nay´n*i*), a Davidic descendant (1 Chron. 3:24).

Ananiah (an´uh-n*i*´uh). **1** One of the rebuilders of Jerusalem's walls under Nehemiah (Neh. 3:23). **2** A postexilic Benjaminite city probably to be identified with Bethany (Neh. 11:32).

Ananias (an´uh-n*i*´uhs). **1** According to Acts 5:1–11, an early Christian in Jerusalem who, with his wife Sapphira, fell dead shortly after falsely claiming to have given the entire proceeds of the sale of their property to the community's common fund (see Acts 4:32–37). Their death was interpreted as divine judgment, and they were seen as the opposite of the model wealthy believer, Barnabas (Acts 4:36–37). **2** According to Acts 9:10–20 and 22:12–16, an early Christian in Damascus who, after a vision from God, reluctantly received Saul (Paul) after the latter's vision on the road to Damascus, laying his hands upon him and baptizing him. **3** According to the historian Josephus, the son of Nedebaeus who was Jewish high priest ca. A.D. 47–58. In Acts 22:30–23:10 and 24:1, he is the high priest at the time of Paul's trials in Jerusalem and Caesarea. A.J.M.

Anat (ah´naht), a Canaanite goddess of fertility with a thirst for violence. No proposed explanation of the name "Anat" is convincing. The Ugaritic literature gives the best evidence of her character and exploits. Place names (Anathoth, Beth-anath) and a personal name (Shamgar ben Anath) reveal that she was once worshiped in the land of Israel, while the divine name Anat-

yahu in an Aramaic papyrus from Elephantine (an island in the upper Nile) suggests the arrival of her cult among Jews of the fifth century B.C.

anathema (uh-nath'uh-muh; Gk., "something placed or set up"), a term referring both to a votive offering to God in a temple (Luke 21:5) and then most often in the NT to its opposite, something accursed. Paul's imprecation, "Let him be accursed (Gk. *anathema*) who preaches anything contrary to the gospel" (Gal. 1:9), served as a model for church councils pronouncing anathemas against heretics. ***See also*** Curse and Blessing.

Anathoth (an'uh-thoth), a levitical town in the tribal territory of Benjamin (Josh. 21:18; 1 Chron. 6:60). Located less than three miles northeast of Jerusalem along a secondary road connecting the latter with Bethel, Anathoth was the hometown of Jeremiah (Jer. 1:1; cf. 11:21–23; 29:27; 32:7–9). Two of David's warriors, Abiezer (2 Sam. 23:27; 1 Chron. 11:28; 27:12) and Jehu (1 Chron. 12:3), were also from the town; and David's high priest, Abiathar, was banished there by Solomon (1 Kings 2:26). Men of Anathoth were among those who returned from the Babylonian exile (Ezra 2:23; Neh. 7:27), at which time the town was resettled (Neh. 11:32). The town's ancient name is preserved in the modern village of Anata; the actual Iron Age ruins of the site are located ca. a half mile to the southwest, at Ras el Kharuba. ***See also*** Benjamin; Jeremiah, The Book of; Priests. D.A.D.

ancestor (Heb. *'ab,* "father"), the one from whom a person or group is descended, either literally or figuratively. The ancient Israelites felt a close sense of kinship with their ancestors and often thought of their families as including not only living kin but also earlier generations all the way back to the founders of the line. Before the rise of the monarchy (ca. 1020 B.C.), the members of Israel's various social groups expressed their unity by claiming descent from a common ancestor. These links to the ancestors were often expressed in a segmented or branched genealogy (e.g., Num. 26).

The OT also uses the term "ancestor" more generally to refer to earlier generations of Israelites (Exod. 3:15; 20:5; Num. 20:15; 1 Kings 14:15; Jer. 7:22; 16:11). Especially important were the founders of the nation: Abraham and Sarah; Isaac and Rebekah; Jacob, Leah, and Rachel. Particularly in Deuteronomy, God's faithfulness to Israel and the gift of the land were often thought to be motivated by the divine promise that had originally been made to the ancestors (Deut. 1:8; 6:10; 9:5; 29:13; 30:20; cf. Gen. 12:7; 17:1–8; 28:13–15). On the other hand, the sins of the ancestors were sometimes thought to bring God's wrath on their children (Exod. 20:5; 34:7; Num. 14:18). Israel's historians imply that the destruction of Samaria and Jerusalem was due to a history of accumulating ancestral sin that finally had to be punished (2 Kings 17:7–18; Ezek. 20). Such understandings were explicitly rejected by Jeremiah and Ezekiel, who stressed that individuals are punished for their own sin, not the sins of their ancestors (Jer. 31:29–30; Ezek. 18). ***See also*** Child, Children; Family, The; Genealogy. R.R.W.

Ancient of Days, an expression used three times (Dan. 7:9, 13, 22) to designate the divine judge in Daniel's eschatological vision of the four beasts. The expression in Aramaic literally means "advanced in days" but is not intended to suggest that God ages. Instead, it conveys the qualities of wisdom and venerability which one who is "advanced in days" would possess. A parallel expression in the Ugaritic epic of Aqhat (3.6.48) describes the chief Canaanite god, El, as "the king, father of years." ***See also*** Apocalyptic Literature; Daniel, The Book of.

Andrew (an'dr*oo*), one of the twelve apostles, identified as the brother of Simon Peter (Matt. 4:18; Mark 1:16; John 1:40) and son of Jona (Matt. 16:17) or John (John 1:42). Originally from Bethsaida (John 1:44), he was living in Capernaum at the time of his "call" (Mark 1:21, 29). According to Matthew and Mark, Andrew and Peter were fishing when called to follow Jesus. In John's account, Andrew, originally a disciple of John the Baptist, followed Jesus after hearing John say, "Behold, the Lamb of God!" Andrew then found his brother, Simon, and brought him to Jesus saying, "We have found the Messiah" (John 1:35–41). Andrew is among the first persons named in the apostolic lists (Matt. 10:2–4; Mark 3:16–19; Luke 6:14–16; Acts 1:13), perhaps an indication of his early selection to Jesus' inner circle of disciples. Elsewhere, Andrew appears only in Mark 13:3 and John 6:8–9; 12:20–22. Extracanonical traditions credit him with preaching in Scythia and suffering martyrdom (crucifixion) in Achaia. ***See also*** Apostle; Disciple; John the Baptist; Peter; Twelve, The. P.L.S.

angel (Gk. *angelos,* "messenger"), a spiritual being, subordinate to God, who serves at God's command and pleasure to deliver his messages, help his people, and punish his enemies. In the OT, angels appear in the stories of the patriarchs (e.g., Gen. 16:7–14; 19:1–22; 22:11, 15–18; 28:12; 31:11–13; 32:1–2) and elsewhere (e.g., Exod. 3:2; 23:20–23; 33:2; Judg. 13:3–5; 1 Kings 19:5–7; 2 Kings 19:35; Isa. 37:36; Pss. 34:7; 35:5–6; 91:11). There is some ambiguity, however, about what form these messengers take, exactly what type of beings they are, and just what their relation to God is, especially in the earlier materials. Since God frequently confronts humans directly in the OT texts, the appearance of angels is somewhat sporadic.

As religious thinking developed, and as God came to be understood as increasingly transcen-

dent, the perceptions about angels also began to change. Ideas developed about good and bad angels, a hierarchy of angels before God, and specific duties assigned to each angel or group of angels. Many of these ideas can be found in the apocryphal and pseudepigraphical writings (e.g., Tobit, 2 Esdras, *1 Enoch,* and *The Testaments of the Twelve Patriarchs*). By the NT period, angels were understood as suprahuman or spiritual beings who were allied with God in opposition to Satan and his "angels," the demons.

Angels had many functions. They praised God (Ps. 103:20), served as his messengers to the world (Luke 1:11–20, 26–38; 2:9–14), watched over God's people (Ps. 91:11–12), and were sometimes instruments of God's judgment (Matt. 13:49–50). ***See also*** Apocalyptic Literature; Cherub; Demon; Devil; God; Seraphim. J.M.E.

angel of the Lord (or angel of Yahweh), a figure appearing frequently in the OT (Gen. 16:7–13; 22:11; Exod. 3:2; Num. 22:22; Judg. 13:3; Zech. 1:11; 3:1, to cite only a few references) and also in the NT (Luke 2:9–15). References to this figure usually occur when something dramatic and meaningful is about to happen, generally with serious consequences, either good or ill, for God's people. The angel of the Lord seems to have been understood as distinct from other angels and, in the earlier OT literature, appears to be almost another designation for God. In most cases, however, the angel of the Lord served primarily as a messenger from God to the people to prepare the way for God's appearance and activity. In some passages, the term probably only designates "an" angel of God (e.g., 1 Kings 19:4–8). ***See also*** Angel. J.M.E.

anger. ***See*** Wrath.

animals. The OT describes vividly the animals that were known to the ancient Hebrews and thereby provides a comprehensive overview of the former animal life in Palestine. Anecdotes depict how animals ranging from the camel to the flea affected the life of the Hebrews, whether as domestic animals providing food, wool, or transport, as game animals, or preying carnivores, or as parasites or as a disease vector. Apart from this secular importance, animals figured prominently in Hebrew religious ritual as sacrifices. In addition, the Bible uses animals to illustrate certain abstract concepts; for instance, the lion symbolizes danger, the horse signifies warfare, and the ass signifies peace.

While we commonly use the word "animals" to mean all living creatures that are not plants, the OT seems to use it usually in the sense of "mammals," since "animals" are distinguished from birds, reptiles, and fish. For instance, in Gen. 1:24–25 God creates the animals on the sixth day of his work, the fishes and birds having been called into life the day before (Gen. 1:20–23).

Clean and Unclean: A distinction is sometimes made between wild and domestic animals (see Gen. 3:14), but there is a crucial separation into ritually clean (and therefore also edible) and unclean animals, as specified in Lev. 11:1–47 and Deut. 14:3–21a. Gen. 7:2–3 implies the difference in status between these two categories: Noah is ordered to take into the ark seven pairs each of the animals that are chosen for sacrifice and eating, while of all the others a single pair suffices (but see Gen. 6:19–20). Animals allowed as food in the OT are all those that both chew the cud (or ruminate) and have cloven hooves (Lev. 11:2–3; Deut. 14:6). They are enumerated in Deut. 14:4–5 and include cattle, sheep, goats, deer, gazelles, roedeer, wild goats, ibex, antelope, and mountain sheep. All these species were once extant in or around Palestine and in zoological terms are all members of the suborder Ruminantia of the order Artiodactyla. In the NT, however, such provisions for identifying "clean" and "unclean" animals were understood to have been set aside with the coming of Jesus (Mark 7:19; see also Acts 10:10–16).

Specifically mentioned as unclean in Lev. 11:4–7 are the camel, the coney ("rock badger"), the hare, and the pig ("swine"). The first three

Heron and snake: detail from a floor mosaic in the Church of the Multiplication of Loaves. Tabgah, fifth–sixth century A.D.

(as it was thought) all ruminate but do not have cloven hooves; the opposite applies to the swine. Of all aquatic and marine animals only those that have scales and fins are declared clean (Lev. 11:9–10). Unclean birds are listed in Lev. 11:13–19. Also forbidden to the Hebrews to be eaten were all flying insects (with the exception of locusts and the like; see Matt. 3:4), animals that walk on paws (i.e., carnivores), and the mole, the rat, the lizard, the gecko, the mouse, the snail, and the chameleon (Lev. 11:29–30). Not only was it forbidden to eat unclean animals, one was not supposed to even touch them (Lev. 11:8). Leviticus issues regulations about every creature or item that has

touched a dead body, for these were also considered unclean (Lev. 11:31–40). Even clean animals that died a natural death were taboo (Deut. 14:21).

In Israelite Religious Ritual: As mentioned above, animals also played a fundamental role in Israelite ritual sacrifices, and detailed instructions about the procedures to be followed and the types of animals to be offered were given (Deut. 16:1–4; 17:1; Lev. 1:1–7:38). In general it is the animals "from the herd or from the flock" that are asked for (Lev. 1:2)—cattle, goats, and sheep. To the Israelites as herdsmen whose wealth was measured in numbers of such animals, these were especially precious. All firstborn male animals were to be sacrificed (Deut. 15:19) in an annual ceremonial feast unless something was wrong with them (Deut. 15:21). However, just as the NT understood the coming of Jesus to have abolished the categories of "clean" and "unclean" animals, so the NT also viewed Christ's death on the cross as a sacrifice that brought to an end all need for further sacrifices (e.g., Heb. 7:27; 9:12; 10:10).

The equation of the OT references to animals with the animal species we recognize today has always presented a formidable problem, and as a consequence there is great variation in the different translations. For example, one term (Heb. *beth ya'anah*) is translated "ostrich," "owl," and "eagle owl" in the various versions of the Bible. There are several reasons for these difficulties. First, the Hebrews did not necessarily distinguish between similar species and sometimes they lumped two or more together under one term. One word (*nesher*), for instance, seems to identify both the eagle and the vulture. Second, the early European interpreters of the Bible had little knowledge of zoology and much less of the wildlife of Palestine. As they were not familiar with gazelles, they translated the Hebrew for gazelle (*tsebi*) as "roedeer," which was better known to Europeans. Matters were further complicated by the fact that many animal species that were common in Palestine when the Bible was written have since become extinct in that location, for instance, the lion, the ostrich, the fallow deer, the onager, and some antelope species. As a consequence, there are still several animal terms that cannot be translated with certainty. ***See also*** Birds. I.U.K.

anise. ***See*** Dill.

Anna (an'uh), a Jewish prophetess who, together with the prophet Simeon, witnessed the dedication of the infant Jesus in the Temple and spoke of him and the expected redemption of Israel (Luke 2:22–38). ***See also*** Simeon.

Annas (an'uhs) or Ananus, son of Seth, installed as high priest by Quirinius in A.D. 6, after the latter deposed Joazar. Annas held the post until A.D. 15, when he was deposed by Valerius Gratus. Annas's family was wealthy and influential, and five of his sons, as well as his son-in-law Joseph Caiaphas, attained the office of high priest. References in Luke 3:2 and Acts 4:6, where he is anachronistically called "high priest" (in the former passage a joint high-priesthood with Caiaphas is suggested), present a problem not soluble with present evidence. ***See also*** Caiaphas; Priests; Quirinius, P. Sulpicius.

annunciation (uh-nuhn'see-ay'shuhn), **the,** the announcement to Mary by the angel Gabriel that she would bear a son who would be "holy, the Son of God," found only in Luke's account of the birth of Jesus (Luke 1:26–38). In the development of the Christian calendar, this event came to have significant status, and March 25 was set aside to commemorate the annunciation. The medieval church developed the prayer "Ave Maria" partly from this Lucan passage. There have been numerous artistic depictions of the annunciation. ***See also*** Gabriel; Jesus Christ; Mary, The Virgin; Virgin Birth.

anoint, to cover the body or an object with oil or ointment. In the ancient Near East, it was a sign of luxury or festivity to anoint oneself with aromatic oils, usually after bathing. For this reason, mourners abstained from anointing (Isa. 61:3). Anointing was a means of investing someone with power, such as the anointment of King Solomon upon his ascent to the throne (1 Kings 1:39), perhaps to signify divine sanctification and approval. It could also signify the consecration of someone or something for a holy purpose. Jacob anointed a pillar at Bethel, calling the place a house of God (Gen. 28:18). Aaron was anointed for the priesthood (Exod. 29:7), and, hence, the high priest is often called the "anointed priest" (Lev. 4:3–15). In Second Temple times (ca. 538 B.C.–A.D. 70), however, the priests were no longer anointed. The tabernacle and its furnishings were likewise anointed (Exod. 40:9–15). 1 Sam. 24:6 refers to the king as "the Lord's anointed," which eventually became the Hebrew term *mashiah,* "Messiah," and Greek *christos,* "Christ," signifying the king who would rule in the end of days. Peter testifies "how God anointed Jesus of Nazareth with the Holy Spirit and with power" (Acts 10:38). ***See also*** Priests. L.H.S.

ant, a small insect. The ant appears in the OT as a homiletic model of wisdom and industry (Prov. 6:6; 30:25).

antelope, a ruminant, deerlike mammal. Antelope are mentioned in Deut. 14:5, and in Isa. 51:20 as being caught with nets. Today the only antelopes in Palestine are gazelles, but the ancient Hebrews also knew the Arabian oryx (*Oryx leucoryx*), a large white antelope with black markings

on legs and face and very long, nearly straight horns, living in the Arabian desert and Jordan.

anthropomorphism (an´thruh-puh-mor´fiz-uhm), the description of God in terms that are literally appropriate for human beings. References to God's hands or ears, or to his evening walk in a garden (Gen. 3:8), or to his being moved by passion, irritation, or regret are typical examples. Traditional religion has tended to regard most such expressions as figurative, inexact, or improper, because they provide in inadequate "human" form expressions of a divine reality that is itself far removed from these inadequacies.

Within the Bible anthropomorphic expressions appear to be more concentrated in earlier sources than in later, in the OT rather than in the NT, and in narrative or prophetic rather than in priestly or wisdom materials. When God appears to Abraham, he seems to be one of three "men" (Gen. 18–19). He speaks with people in articulate human speech. He smells sacrifice. He regrets what he has done. On the other hand, many passages emphasize the great difference between God and humans, his consistency and lack of change (1 Sam. 15:29, interestingly a passage where God has in fact just changed his mind, rejecting Saul whom he himself had chosen).

Important elements of biblical thought seek to deal with these problems. The "image of God" in humans may establish a proper relation between God and humans while avoiding the suggestion that God is a larger man. Speech through intermediaries like prophets reduces the difficulties presented by direct speech by God. In the NT the centrality of Jesus leaves the "Father" more transcendent and yet makes God "appear" in human form.

Later exegesis relates these ideas to the Greco-Roman philosophical tradition, which had also sought to reconcile anthropomorphic depictions with the universal and eternally consistent being of deity. J.B.

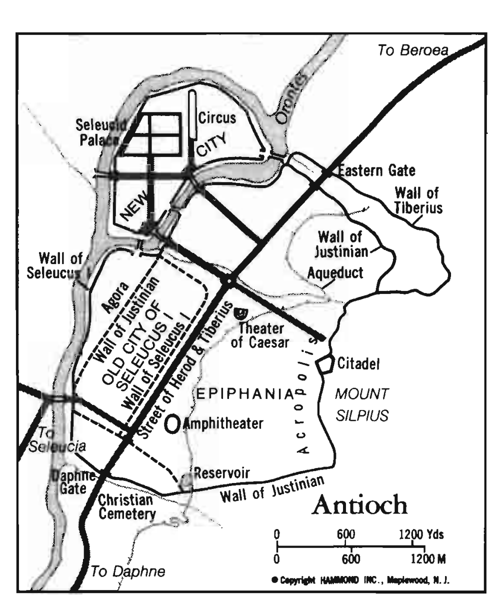
Antichrist (an´tee-kr*i*st´), **the,** the final opponent of Christ and thus of God. This designation is found only in the Letters of John. The author supposes that his audience has heard the term before (1 John 2:18), and he suggests that it now refers to individuals ("antichrists") whose religious influence is already a danger to the church (1 John 2:18–29; 4:1–6; 2 John 1:7–11). It is unclear whether such leaders, whose errors are both Christological and moral, are to be identified with Gnostics or with some other group.

Earlier, Jewish thinkers, amidst persecution by the Greeks (second century B.C.), believed that the blasphemous "little horn" (Antiochus IV) would be vanquished by the sudden rule of "the saints of the Most High" (Dan. 7). Soon thereafter it was believed that a coming Messiah would terminate persecution, whether it was inflicted by Greece or Rome. The hostile empire was often given the name Belial/Beliar (Heb., "worthless one").

Early Christianity continued the practice of depicting the enemy as an individual or beast who would be defeated at the Messiah's (Christ's) return. The enemy is variously referred to as "the lawless one" (2 Thess. 2:8), Belial (2 Cor. 6:15), and Gog and Magog (Rev. 20:8). A final attack upon the church is sometimes identified with the reappearance of the emperor Nero.

This may be the background for the expected "antichrist," which the author of 1 John redefines in religious terms. The church has continued to use this designation for its enemies in every age, both within and outside of its membership. ***See also*** Apocalyptic Literature; Belial; John, The Letters of; Man of Lawlessness. L.R.B.

Anti-Lebanon (an´tee-leb´uh-nuhn), the name sometimes given to the range of mountains running north-south and located east of the Litani Valley in Lebanon, between that valley and the eastern desert. It is parallel to (hence "anti-") the Lebanon range standing west of the valley, between the valley and the Mediterranean Sea. The height of the Anti-Lebanon range is anchored on the south by Mount Hermon (elevation 9,332 feet above sea level) and drops as the ridge runs northward. Its crevices hold snow well into May on northward slopes.



Antioch (an´tee-ok) (Syrian), a city (modern Antakya in Turkey) founded by Seleucus Nicator in 300 B.C. and conquered by Rome in 64 B.C. Located on the Orontes River in the northwestern corner of the Roman province of Syria, it was the province's capital, the third largest city of the empire, a center of Greek culture, and a commercial hub. Jews inhabited Antioch from its foundation and enjoyed the right to observe their own customs. The various synagogues of the city sent representatives to a council of elders presided over by a "ruler." Large numbers of Antiochene Gentiles were attracted to Jewish worship. Nicolaus of Antioch, one of the seven Hellenist leaders in Jerusalem (Acts 6:5), was among those Gentiles who became Jewish proselytes. The first Jewish war (A.D. 66–73) occasioned anti-Jewish riots in Antioch, but on the whole Judaism enjoyed a peaceful life at Antioch and thus provided early Christians a stable matrix. Public order, a prosperous urban culture, a Judaism used to contacts with Gentiles, an intellectual and religious milieu open to many currents, interest in mystery cults, fine roads and lines of communication—all these factors favored Antioch as an energetic center for Christian missionary outreach.

Christianity at Antioch: Christianity was brought to Antioch ca. A.D. 40 by Hellenists who fled from Jerusalem after the martyrdom of Stephen (Acts 11:19–20). Thus began the first Christian generation at Antioch (A.D. 40–70). At

Antioch Hellenists from Cyprus and Cyrene made the momentous decision to begin, as a matter of policy, to convert Gentiles without circumcision. This striking difference from Jewish proselytism set these believers apart, and so it was at Antioch that they received a new name, "Christians" (Acts 11:26). The Jerusalem church sought to control this new development by sending Barnabas, a fellow Cypriote, to guide the Antiochene community. To aid him in teaching this "large company" of believers, Barnabas brought Saul (Paul) from Tarsus to Antioch, where "for a whole year they met with the church" (Acts 11:22–26). Along with Symeon Niger, Lucius of Cyrene, and Manaen (a childhood companion of Herod Antipas), they formed a leadership group of "prophets and teachers" (Acts 13:1). This group sent Barnabas and Saul on their first missionary journey (Acts 13:2–14:28).

Around A.D. 49, objections to Antioch's circumcision-free mission were raised by some Jerusalemite Christians. Paul, Barnabas, and Titus went to Jerusalem for a meeting with Peter, James, John, and other leaders. This "Council of Jerusalem" decided that Gentiles did not have to be circumcised (Acts 15:1–19; Gal. 2:1–10). Some time after this meeting, Peter visited Antioch. At first he practiced table fellowship with Gentile Christians, but then withdrew under pressure from members of the James party, recently arrived from Jerusalem. Paul, fearing that Gentile converts would think that circumcision was necessary to be fully Christian, publicly rebuked Peter for hypocrisy (Gal. 2:11–21). Since Paul soon left Antioch without Barnabas (who sided with Peter), and since Paul never mentions Antioch again in his letters, returning there only briefly, it may be that Paul lost the argument. Luke smooths over this painful incident by omitting all reference to Paul's clash with Peter. He assigns Paul's break with Barnabas to a squabble over Barnabas's cousin, John Mark (Acts 15:36–40). After Paul's departure, the tension within the Antiochene church may have been relieved by the compromise enshrined in the "Apostolic Letter" of Acts 15:23–29. The circumcision-free mission was confirmed, but the Gentiles had to observe certain "kosher laws" mentioned in Leviticus 17–18, laws considered incumbent on Gentiles living in the Holy Land. Such observance would make possible common life with Jewish Christians. Amid the tensions between the Hellenist left and the Jamesian right, Peter probably represented a centrist position around which various groups could rally; but the James party had the upper hand.

Second Christian Generation at Antioch: There is practically no source of information for the second Christian generation at Antioch (A.D. 70–100), with the possible exception of Matthew's Gospel. If, as many think, Matthew does come from Antioch, we may gather that the Antiochene church continued to feel strains between the Jamesian right and the Hellenist left. However, the Jewish war, the martyrdom of James, the destruction of Jerusalem, and the eventual break with the local synagogue(s) had weakened the conservative Jewish element in the Antiochene church. Meanwhile, the success of the Gentile mission both pointed the way to the church's future and created new problems for the Christian reformation of pagans. It was Matthew's task to reinterpret and synthesize the competing traditions at Antioch to provide a smooth transition from a Jewish past to a Gentile future. Matthew's Gospel takes the form of a "foundation story," to give a pastoral answer to the crisis of identity the Antiochene church faced in the second generation as it strove to define itself over against both Judaism and paganism. Jewish roots, fulfillment of prophecy, and large blocks of Jewish moral teaching serve to anchor an increasingly Gentile church in the sacred past. But the norm of morality, the center of faith, is now Jesus Christ, who validates a universal, circumcision-free mission at the end of the Gospel (Matt. 28:16–20). This balancing act allows Matthew to preserve both "new and old" (Matt. 13:52). Hence he extols Peter, Antioch's centrist figure, as the "chief rabbi" of the church (Matt. 16:18–19). Yet, while admitting the need for Christian leaders, Matthew is wary of the trappings of power and titles (Matt. 23:1–12).

Plan of ancient Antioch that highlights the city in the early Christian period.

Third Christian Generation at Antioch: In the third Christian generation (after A.D. 100), the new pressures of imperial persecution and gnosticising tendencies overrode Matthew's dislike of titles. The need for clearer church structures to defend church discipline and teaching called

forth the triple hierarchy of one bishop, a council of elders, and deacons. The first testimony we have of this development is from Ignatius of Antioch (d. ca. A.D. 117). Ignatius inherited Antioch's problem of opposing tendencies in the form of a weak Judaizing movement on the right and a more dangerous Docetism on the left. Like Matthew, Ignatius sought unity through balance. He synthesized strains of Matthean, Pauline, and Johannine traditions to strengthen the emerging "catholic church"—a phrase first used by Ignatius. Matthew's Gospel and the triple hierarchy were Antioch's twin gifts to this catholic church. ***See also*** Barnabas; James; Matthew, The Gospel According to; Paul; Peter.

Antioch of Pisidia (an´tee-ok, pi-sid´ee-uh), a city located in the east-central region of Asia Minor (modern Turkey), on the banks of the Anthius River. Founded prior to 280 B.C., it was strongly fortified by the Greeks and later by the Romans. Declared a free city by the Romans in 189 B.C., and named a Roman colony by Augustus prior to 6 B.C., it served as the center of civil and military administration in the southern portion of the roman province of Galatia. A thoroughly hellenized, Greek-speaking city, it was visited by Paul and Barnabas during the first of their missionary journeys recorded in Acts (13:14). Although granted a favorable reception initially by the Jews to whom they preached, they were later forced out of the synagogue and turned their preaching to receptive Gentiles. Agitation aimed at stirring up leading figures in the city against the two missionaries succeeded in forcing them to leave the city. The city finds no further mention in the NT.

Antiochus (an-tī´uh-kuhs), a name borne by thirteen kings or pretenders of the Seleucid dynasty (Hellenistic inheritors of Syria, southern Asia Minor, and other portions of the empire of Alexander the Great). The land of Israel fell under Seleucid rule in 198 B.C., when Antiochus III (the Great) defeated the Ptolemies of Egypt. Antiochus IV (Epiphanes) ruled from 175 until 164 B.C. (see 1 Macc. 1:10). The Maccabean revolt was the response of pious and nationalistic Jews to Antiochus Epiphanes' efforts to hellenize them and to suppress Judaism. ***See also*** Alexander; Maccabees; Ptolemy; Seleucids, The.

Antipas (an´tee-puhs). **1** See Antipater. **2** Herod Antipas, tetrarch of Galilee and Perea (4

View of Antipatris; OT Aphek during the time of the Philistines, rebuilt by Herod the Great in 9 B.C.

B.C.–A.D. 39) after the death of his father, Herod the Great. ***See also*** Herod. **3** Christian martyr from Pergamum (Rev. 2:13).

Antipater (an-tip´uh-tuhr), also known as Antipas, an Idumean with strong connections to Rome who, as procurator of Judea (55–43 B.C.), governed most of Palestine; father of Phasaelus and Herod the Great. ***See also*** Herod; Idumaea; Phasaelus.

Antipatris (an-tip´uh-tris), a town on the coastal plain along the principal international highway of Palestine, the Via Maris, guarding the pass between the mountains to the east and the Yarkon River to the west. The site has been identified with OT Aphek (Josh. 12:18; 1 Sam 4:1; 29:1), where the Philistines were encamped when they captured the Ark of the Covenant, and with Pegae (Gk., "springs") of the Hellenistic period. The town was rebuilt by Herod in 9 B.C. midway between his new capital, Caesarea, and the old Jewish capital, Jerusalem, and named after Herod's father, Antipater. Here Paul stayed overnight during his trip from Jerusalem to Caesarea to stand trial before Felix (Acts 23:31). M.K.M.

Antonia (an'toh´nee-uh), **Tower of,** a Hasmonean fortress (known as Baris) on the rocky scarp at the northwest end of the Temple in Jerusalem, luxuriously rebuilt in the late first century B.C. by Herod the Great and named for his friend Mark Antony. In it were kept the high priest's vestments between festivals, under the seal of Herod and later of the Roman procurators. It was taken and destroyed by Titus in the revolt of the Jews against Rome in A.D. 70. Once thought to be the site of Jesus' trial (John 19:13), a pavement below the present-day convent of Notre Dame de Sion has now been shown to date from Hadrian's Aelia Capitolina (the name he gave to Jersualem when he rebuilt it) of the second century A.D. The Antonia is, however, referred to in Acts 21:34–37; 22:24; and 23:10, 16, 32 (RSV: "barracks") as the scene of Paul's arrest and consequent imprisonment after a riot provoked by Asian Jews who accused him of bring-

ing a Gentile into the Temple (Acts 21:27–36). ***See also*** Baris; Herod; Temple, The. C.H.M.

Antonius Felix. ***See*** Felix, Antonius.

ape, a semierect primate resembling a monkey. The apes mentioned in 1 Kings 10:22 and 2 Chron. 9:21 are probably monkeys, possibly *Papio hamadryas,* a baboon once common in Egypt and Somalia.

Apharsachites (uh-fahr′suh-kits), a word used by the KJV to translate a Persian loan word (a word from one language taken into another) found in the Aramaic text of Ezra (5:6; 6:6) that denotes some type of official. These officials are among those who complain to Darius about the Jews who rebuilt the Temple in Jerusalem. The RSV and NIV translate the word as "governor," indicating uncertainty about the precise meaning of the Persian *frasaka,* although the meaning "investigator" has been proposed.

Aphek (ay′fek; Heb., "fortress"?; also Aphik, Judg. 1:31). **1** A city-state on the coastal plain captured by Joshua (Josh. 12:18). Its strategic value was used by the Philistines against hill-based Israelites both at Ebenezer (1 Sam. 4:1) and at Jezreel (1 Sam. 29:1). It is modern Ras el'Ain some ten miles east of the Mediterranean coast and west and slightly north of Shiloh. The Herodian-Roman city Antipatris was built there as well. **2** A border town with the Amorites (Josh. 13:4), probably modern Afqa about fifteen miles east of ancient Byblos in Lebanon. **3** A town of the tribe of Asher (Josh. 19:30), possibly modern Tell Kerdanah three miles from Haifa and about six miles southeast of Acco. **4** A site some three miles from the eastern shore of the Sea of Galilee in the Transjordan, modern Fiq. It marked the location of Ahab's victories against Syria's Ben-hadad (1 Kings 20:26–30) and Joash's defeat of Syria under Elisha's instruction (2 Kings 13:14–25). ***See also*** Antipatris.
R.S.B.

Apocalypse (uh-poc′uh-lips). ***See*** Revelation to John, The.

apocalyptic literature, literature taking its name from the Revelation (Gk. *apokalypsis*) to John in the NT. The genre is represented in the Hebrew Bible by the book of Daniel, but the main corpus lies outside the Bible in such books as *1* and *2 Enoch, 4 Ezra, 2* and *3 Baruch, Jubilees,* and the *Apocalypse of Abraham.* These writings have been preserved in various translations—Ethiopic, Latin, Syriac, Greek, Slavonic. Fragments of *1 Enoch* have been discovered in Aramaic among the Dead Sea Scrolls and are the oldest extant apocalyptic literature (third century B.C.). The genre generally declined in Judaism after the first century A.D. but flourished in Christianity down to the Middle Ages.

The apocalyptic books report mysterious revelations that are mediated by angels and disclose a supernatural world. They are characterized by a focus on eschatology (last times), which often entails cosmic transformation and always involves the judgment of the dead. The apocalypses are usually pseudonymous—the revelations are attributed to ancient heroes such as Enoch or Abraham, not to the real authors. A few early Christian apocalypses, notably the book of Revelation and *The Shepherd of Hermas,* are exceptions to this rule.

In general, apocalypses are of two types. The more familiar "historical" apocalypses, exemplified by Daniel and Revelation, are concerned with great historical crises. History is often divided into a set number of periods, and the course of history is "prophesied" from the time of the supposed author down to the actual time of composition. The period before the end is marked by catastrophic upheavals. Salvation may include the restoration of the land of Israel, but the emphasis is on a transition to a radically different world order. In the second type of apocalypse, exemplified in the *Enoch* books and the *Apocalypse of Abraham,* the visionary ascends through the heavens. Seven is the classical number of heavens but three and five are also attested. These journeys, guided by an angel, usually include a vision of the abodes of the dead.

Many themes of the "historical" apocalypses are anticipated in the Prophets, notably in Isaiah 24–27. The genre is attested independently in Persian sources, but the date of the Persian material is notoriously uncertain. The Jewish apocalypses were a new development drawing on various sources—the Hebrew scriptures, ancient myths, Persian and Hellenistic materials.

Some apocalypses were written in times of distress: Daniel in the persecution of 168 B.C., *4 Ezra* and *2 Baruch* in the aftermath of the destruction of Jerusalem. Others responded to less specific problems, but all reflect some kind of dissatisfaction with the present world and seek salvation either in a new world to come or in another world beyond. Apocalyptic ideas played a crucial role in the formation of early Christian beliefs in the resurrection and Second Coming of Christ.

Closely related material can be found in the Dead Sea Scrolls, *The Sibylline Oracles,* and *The Testaments of the Twelve Patriarchs.* The genre was also adapted by the Gnostics, who tended, however, to place greater stress on salvation in the present. ***See also*** Daniel; Enoch; Eschatology; Revelation to John, The; Scrolls, The Dead Sea. J.J.C.

Apocrypha (uh-pok′ruh-fuh), **Old Testament,** a group of books or parts of books not part of the Jewish canon of the Hebrew Scriptures

but found in early Christian versions of the OT. "Apocrypha" is from the Greek for "concealed" or "hidden" (cf. 2 Esd. 12:37–38; 14:45–46), although in current Christian usage it has the sense of "set aside" or "withdrawn" from full canonical status as Scripture. The Christian scholar Jerome (d. A.D. 420) labeled most of these books as apocryphal and did not include them in his translation of the Bible, the Vulgate (Vg.). During the Reformation, Protestants gathered the books of that kind then current in Western Bibles into a separate section following the OT under the title "Apocrypha." Works so treated usually include:

1 Esdras
2 Esdras
Tobit
Judith
The Rest of the Book of Esther
The Wisdom of Solomon
Ecclesiasticus (Sirach)
Baruch
The Letter of Jeremiah
The Additions to the Book of Daniel:
- *The Song of the Three Children (with the Prayer of Azariah)*
- *Susanna*
- *Bel and the Dragon*

The Prayer of Manasseh
1 Maccabees
2 Maccabees

This list of fifteen titles (counting the Additions to the Book of Daniel as three separate items) has previously been standard in Protestant editions of the Apocrypha, based on the history of the canon in Western Christianity. One recent edition of the Bible, however, has included the following items among the Apocrypha because of their presence in Greek Orthodox Bibles:

3 Maccabees
4 Maccabees
Psalm 151

The books included in the Apocrypha sometimes go by various titles. Occasionally the Rest of the Book of Esther is identified as Additions to the Book of Esther; Bel and the Dragon, Susanna, and the Song of the Three Children (with or without the Prayer of Azariah) will be printed together as the Additions to (or Rest of) the Book of Daniel; and Ecclesiasticus, because it was written by Jesus ben Sirach, is often called the Wisdom of Sirach, or even the Wisdom of Jesus the Son of Sirach. For the most part, the titles of the OT apocryphal books will be referred to in this Dictionary as they are given in the list above, but occasionally another form of their name may be used.

In English-speaking countries, Protestant practice has been to omit the Apocrypha from editions of the Bible. Catholics consider most of these books authoritative and use the term "deuterocanonical," meaning books recognized as canonical at a later date, to distinguish them from the "protocanonical" books found in the Jewish canon of Scripture. In Catholic usage, the term "Apocrypha" is applied to the Pseudepigrapha, a group of Jewish writings other than those included in the OT Apocrypha that have been preserved and used by various groups of Christians but, with some exceptions (in Ethiopia, for example), not included in the Bible.

The Jewish Background of the Apocrypha: The books of the Apocrypha are largely of Jewish origin, produced for the most part during the period preceding the destruction of the Temple by the Romans in A.D. 70. With the exception of 2 Esdras, they are interspersed among the other books of the OT in early Christian copies of the Septuagint (LXX), the Greek version of the Hebrew Scriptures derived from Alexandrian Judaism and adopted by early Christians as their first Bible. However, while these books have their *source* in Hellenistic Judaism, their *status* as Scripture among Jews in Alexandria or elsewhere is not so certain.

In Palestine, the rabbis after A.D. 70 recognized a Palestinian canon of twenty-four books (according to their system of enumeration) divided into Law (Torah), Prophets, and Writings and reflecting the principle that revelation begins with Moses and ends with Ezra. The books of the Apocrypha originated some time after Ezra—some of them having been composed in Greek—and thus did not have a claim to be included in this definition of Scripture. Rabbinic debate after A.D. 70 is over Ezekiel, Proverbs, the Song of Solomon, and Ecclesiastes, which are retained in the Palestinian canon, rather than over the inclusion or rejection of books later found among the Apocrypha. The rabbis claim that the person who brings together more than twenty-four books creates confusion (*Midr. Qoh.* 12:12) and that one who reads in the outside books will have no place in the world to come (*b. Sanh.* 100b). Ecclesiasticus was read and quoted by the rabbis for several centuries and then was dropped from use; however, whether they meant to include books of the Apocrypha other than Ecclesiasticus among the "outside books" is not certain.

Scholars have traditionally assumed that the Writings were a fluid collection prior to A.D. 70, that the Alexandrian Jewish community had an expanded version of this collection that included the books of the Apocrypha, and that this expanded collection of the Writings is the reason for the greater extent of the Christian LXX as compared to the Jewish Palestinian canon. The Alexandrian Jewish community, however, appears to have accepted only the Torah (in Christian terms, the Pentateuch—Gen. through Deut.) as Scripture. Philo of Alexandria, a Jewish commentator (late first century B.C. to early first century A.D.), quotes almost exclusively from the Torah when citing Scripture, while the translation of that section in the LXX is done

APOCRYPHA, OLD TESTAMENT

with far greater care and attention to the literal text. There is thus little evidence for the existence of an expanded Alexandrian canon that would explain the extent of the LXX in Christian circles. (The Additions to Daniel, the Rest of Esther, and Psalm 151 require separate treatment. Instead of the problem of the editing of collections of books into canonical Scripture, we encounter here the internal expansion of a book through the accretion of stories, legends, psalms, and appropriate prayers and letters—a process that must have taken place within Judaism.)

The Apocrypha in Early Christianity: It would appear more likely that the extent of the Christian LXX was determined by Christians themselves. This determination could have been haphazard, as the result of the combination of a larger selection of Jewish literature in Greek, which presumably would have been preserved as individual books in scroll form, into the codex, or "book" form (although it seems to be only in the fourth century that codices large enough to hold the whole OT were produced). The codex was pioneered by Christians because it permitted the inclusion of a number of books in one more easily managed volume. This process of editing could have taken place with minimal regard to what books were originally considered Scripture in the Hellenistic synagogue. The extent of the LXX could also be the result of the conscious selection by the early church during its first four centuries of a distinctively Christian canon of Scripture. In either case, Christians came to include in the OT a wider selection of books than was considered authoritative in Judaism and to arrange them more along the lines of chronology and genre (type of literature) than according to the tripartite division into Law, Prophets, and Writings.

Even so, copies of the LXX do not suggest a rigidly fixed Christian canon, since some manuscripts omit the Prayer of Manasseh and others include Psalm 151 and 3 and 4 Maccabees. 2 Esdras, a Jewish apocalyptic writing stemming from the end of the first century A.D. and no longer extant in Greek, appears in some manuscripts of the Old Latin (OL) version, the initial Bible of Western Christianity translated from the LXX, and thus has also come to be included among the Apocrypha.

Jerome and the Vulgate: Early Christians tended to cite from the whole of the LXX, although, as time passed, scholars and theologians in the East became aware of the extent of the Jewish canon, and some began to limit their use of the OT to the books preserved by the Jews. In Western Christianity, the books of the Apocrypha retained their status. As the result of dissatisfaction with the OL version of the Bible, however, Jerome began a new translation (fourth century A.D.). His initial intention was to translate the LXX anew, but studies of the text of that version convinced him that, in order to establish a secure text, he would need to return to the Hebrew original. Journeying to Bethlehem, he studied Hebrew with a Jewish teacher and produced a new Latin version of the OT, the Vg., based on the Hebrew text and essentially limited to the extent of the Jewish canon. He treated the apocryphal works as edifying but not to be used for the purpose of establishing doctrine. His Vg. does include the additions to Esther and Daniel, clearly marked to indicate their absence from the Hebrew text, and, as the result of a request from two friends among the Western bishops, he hastily produced versions of Judith and Tobit.

The Vg. became the standard Bible of the Western church, and the writings that Jerome set aside as apocryphal were added to its text from the OL version. Right up to the Reformation, however, an awareness of Jerome's position persisted in the West.

The Reformation and the Apocrypha: In the Protestant Reformation, the question of the canonical status of the Apocrypha became involved in disputes over doctrine. 2 Macc. 12:43–45 was used to support the idea of purgatory and masses for the dead, while Tob. 12:9; Eccl. 3:30; and 2 Esd. 8:33 claim that good deeds bring merit, counter to Martin Luther's emphasis upon grace. Under the influence of Jerome, and perhaps also of Renaissance scholarship (which preferred texts in the original languages), Luther gathered the apocryphal books into one section at the end of the OT in his 1534 edition of the whole Bible and gave this section the title "Apocrypha." He indicated that these books were not of the status of Holy Scripture but could be read profitably.

The Reformed tradition came to accord an even lower status to the Apocrypha, particularly in England, where editions of the Geneva Bible began in 1599 to omit it and the Westminster Confession of Faith (1646–48) equated it with secular literature (one writer of the time described it as "Unholsome henbane between two fragrant roses"). The Church of England, on the other hand, resisted this tendency and included readings from the Apocrypha in its lectionary. In 1827, after a decade of particularly acrimonious debate, the British and Foreign Bible Society refused to support continental societies that circulated Bibles containing the Apocrypha.

As in Christian use of the codex in an earlier age, the technology and economics of publishing may have had an impact upon the Apocrypha. English-language editors have sought to fill a demand for lighter and perhaps more economical Bibles by omitting it from their editions. Such a measure, however, is only possible as a result of its devaluation in status.

Catholic response to the Protestant treatment of the Apocrypha was to reaffirm the canonical status of most of its books. On April 8, 1546, the

Council of Trent declared anathema anyone who did not accept the whole of the Vg. as canonical. The edition of the Vg. intended includes all of the disputed works in use in the West with the exception of 1 and 2 Esdras and the Prayer of Manasseh. In later Catholic editions of the Bible, these three books are sometimes printed in an appendix.

Orthodox Christianity shows a greater latitude in its treatment of the canon of the OT. Bibles approved by the Holy Synod of the Greek Orthodox Church currently include what Catholics term the deuterocanonical books plus 1 Esdras, the Prayer of Manasseh, 3 and 4 Maccabees, and Psalm 151. In 1977, with the Orthodox Bible in mind, the Revised Standard Version Bible committee expanded its translation of the Apocrypha to include the last three books in an effort to produce an ecumenical Bible. More recently, this committee has published the NRSV in a Catholic edition, with all of the deuterocanonical books arranged in the order in which they appear in the Vg.

The Importance of the Apocrypha: Along with the Pseudepigrapha, the Dead Sea Scrolls, and the writings of Josephus and Philo, the Apocrypha are of immense importance for historical research into Judaism during the period of the Second Temple (515 B.C.–A.D. 70). Their content reflects the struggle of the Jewish people to maintain faith as they encounter religious, political, and military oppression under foreign rule in Palestine and attempt to preserve their way of life in the face of the power of Hellenistic culture both at home and in the Diaspora (i.e., those lands other than Palestine where Jews lived). Strikingly absent from this body of literature is the prophetic voice, which is now associated with the previous age. The books, on the other hand, give abundant evidence of the continued importance of narrative in Jewish culture. They also reflect the further development of the wisdom tradition and augment somewhat the roles of women in Scripture, portraying them as the righteous vindicated in the cases of Susanna and Sarah (in Tobit), as the courageous mother and martyr of 4 Maccabees, as Wisdom personified as a woman in Ecclesiasticus 24 and the Wisdom of Solomon 6–12, or as God's agent of liberation for the Jewish people in Judith.

The Apocrypha exist as a group, however, primarily because of their role in Christian discussions of the extent of the canon of the OT. The presence of these books in the initial Christian Bible may reflect concerns with persecution, the relation of religious faith and culture, wisdom, and the role of women, as well as an interest in filling the gap between Ezra and the origins of Christianity. As a result of their place in the Christian OT, the Apocrypha have a potential role in the ecumenical movement as groups of Christians seek for the means of communication with one another. In including 3 and 4 Maccabees and Psalm 151 among the Apocrypha, the Revised Standard Version Bible committee seemed to be reaching for an inclusive rather than an exclusive understanding of the canon of the OT, in which the extent of Scripture is defined as broadly as possible to permit the interests of as many groups as possible to intersect in one body of Scripture. This principle has been absent from discussions of the canon of the OT but was of importance in the final determination of the extent of the NT. ***See also*** Canon; Pseudepigrapha; Septuagint; Vulgate; listings under the individual titles of the Apocrypha.

Apocryphal New Testament, a vast body of early extracanonical Christian writings that, generally speaking, claim to preserve memories of Jesus and the apostles and that frequently imitate the major genres (literary types) of NT literature: Gospels, Acts, epistles (letters), and apocalypses. Most of this literature was written from the second to the ninth centuries A.D. The recent discovery at Nag Hammadi, Egypt, of many previously unknown apocryphal documents has revitalized interest in this area, but many of the NT Apocrypha still require the most basic scholarly attention, such as critical editions and translations. New editions and translations continue to appear and substantially enrich our appreciation of these texts.

Even though this literature in general relates little that is historically reliable about Christian origins, it is indispensable for understanding the piety of Christians in late antiquity. Here we find their liturgies, prayers, legends, theologies, and expressions of their attitudes toward the most fundamental issues of their lives: politics, martyrdom, money, sex, and family. Analysis of this literature also reveals much concerning the canonizing of the NT and the theological diversity of the early church. Although often maligned and dismissed as heretical, the apocryphal NT is a valuable witness to ancient Christianity and the vitality of its literary production.

Gospels: Apocryphal Gospels reshaped the memory of Jesus to meet contemporary needs and satisfied pious imaginations by supplying information about the life of Jesus not found in the NT—most notably, details of his birth, youth,

and postresurrection revelations. Unlike the canonical Gospels, few of these contain stories of Jesus' death.

Apocryphal Gospels have generated much scholarly attention, largely because of the possibility of finding in them dominical *agrapha*, or authentic sayings of Jesus, not found in the Bible. Study of *The Gospel of Thomas* has proven particularly helpful for understanding the oral transmission and literary collection of Jesus' teachings. Some of the more important representatives of the genre are:

The Protoevangelium of James
The Infancy Gospel of Thomas
The Gospel of Peter
The Gospel of Nicodemus
The Gospel of the Nazoreans
The Gospel of the Ebionites
The Gospel of the Hebrews
The Gospel of the Egyptians
The Gospel of Thomas
The Gospel of Philip
The Gospel of Mary

In addition to these documents, one might mention the hypothetical source believed by most scholars to have been used by Matthew and Luke, which scholars refer to as "Q." Q would have consisted primarily of sayings of Jesus, making it similar in genre to *The Gospel of Thomas* and other apocryphal Gospels.

Acts: Scholars customarily divide the apocryphal Acts into two groups: those in antiquity sometimes attributed to Leucius Charinus, a collection of five books used in certain heretical circles, and those outside this group. Of the two, the first group has attracted the most attention, in part because of their probable earlier dating, and in part because they stimulated considerable opposition from ecclesiastical authors. These five Acts, though interrelated, seem to have come from different locations and theological circles, some of which were Gnostic. They share a preference for sexual asceticism, a fascination with fantastic tales (e.g., those about obedient bedbugs, talking colts, and a baptized lion), and a curiosity concerning the apostles' deaths. More than any other genre of early Christian writings, the Acts, including the Acts in the NT, feature women prominently, sometimes in roles otherwise restricted to men. Scholars have assessed these portrayals of women as witnesses to an ancient "feminist" movement or as male attempts to maintain control over women.

Some of the apocryphal Acts display knowledge of the canonical Acts, but they seldom seem interested in coordinating their information with the latter. In addition to the canonical Acts, these authors were influenced by the Gospels, Greek novels, and, in the case of *The Acts of Andrew*, Homeric epic and Platonic dialogues. The "Leucian Acts" are:

The Acts of Paul
The Acts of Peter
The Acts of John
The Acts of Andrew
The Acts of Thomas

Other Acts include:

The Acts of Andrew and Matthias (originally part of *The Acts of Andrew*?)
The Acts of Philip
The Acts of Thaddaeus
The Acts of Peter and Paul
The Acts of Peter and Andrew
The Slavonic Acts of Peter
The Acts of Peter and the Twelve Apostles

Epistles: Of the four apocryphal genres here discussed, the pseudonymous epistle, or letter, apparently was the least popular, even though several such epistles appear already in the NT (e.g., the pastoral and the Petrine Epistles). The apocryphal epistles include:

Third Corinthians
The Epistle to the Laodiceans
The Letters of Paul and Seneca
The Letters of Jesus and Abgar
The Letters of Lentulus
The Epistle of Titus

Apocalypses: Apart from the canonical book of Revelation, all of the Christian representatives of this genre are pseudonymous; that is, all of them claim to be divine revelations to a biblical hero. The favorite themes in Catholic apocalypses include eschatological events, ethics, and graphic descriptions of heaven and hell. Gnostic apocalypses favor moral instruction and polemics. Apocryphal apocalypses include:

The Apocalypse of Peter
The Coptic Apocalypse of Peter
The Apocalypse of Paul
The First Apocalypse of James
The Second Apocalypse of James
The Apocryphon of John
The Sophia of Jesus Christ
The Letter of Peter to Philip
The Apocalypse of Mary

Apollonia (ap'uh-loh'nee-uh) of Macedonia, one among many Greek cities named for the Greek god Apollo. It was a station on the main east-west Roman road from Asia to Italy, the Egnatian Way, and was visited by Paul en route from Philippi to Thessalonica (Acts 17:1).

Apollos (uh-pol'uhs), a Jewish Christian from Alexandria who appears in the narrative of Acts

(18:24–19:1) and in 1 Corinthians. According to Acts, he possessed great skills in Greek rhetoric and had already learned much about Jesus when he arrived in Ephesus and began speaking in the synagogue. His abilities soon brought him to the attention of the Christians Priscilla (Prisca) and Aquila, who gave him further instruction in the Christian faith ("he knew only the baptism of John"; Acts 18:25). Apollos then left Ephesus to go to Corinth. According to one ancient text (Codex Bezae), he was received with enthusiasm in Corinth (Acts 18:27). While in Corinth, he became acquainted with Paul. When divisions arose in the church at Corinth, Apollos was admired by some Christians as a greater authority than Paul, perhaps because of his reputation as an orator (1 Cor. 1:11–4:6). Apollos apparently did not encourage this sentiment: after going back to Ephesus, he resisted Paul's invitation to pay another visit to Corinth (1 Cor. 16:12). Brief mention of Apollos is made in Titus 3:13. ***See also*** Aquila; Corinthians, The First Letter of Paul to the; John the Baptist; Paul; Prisca, Priscilla.

A.J.M.

Apollyon (uh-pol´yuhn; Gk., "the Destroyer"), a possible allusion to the Greek god Apollo or to the angel of death (Rev. 9:11).

apostasy (uh-pos´tuh-see), rebellion or abandonment of faith. It refers in the OT to Israel's unfaithfulness to God (Jer. 2:19; 5:6; cf. Josh. 22:22; 2 Chron. 33:19) and in the NT to the abandonment of Christian faith (Heb. 6:6). In Acts 21:21, the Greek root of the word "apostasy" is used for Paul's alleged rejection of Moses and, in 2 Thess. 2:3, for an expected rebellion before the end.

apostle, the English transliteration of a Greek word meaning "one who is sent out." An apostle is a personal messenger or envoy, commissioned to transmit the message or otherwise carry out the instructions of the commissioning agent.

In the NT Gospels, the term is commonly associated with the special inner circle of Jesus' disciples, chosen and commissioned by him to accompany him during his ministry, to receive his teachings and observe his actions, and to follow his instructions. Thus, they are uniquely qualified both to authenticate his message and to carry on his work through the ministry of the church.

Apostolic lists appear in Matt. 10:2–4; Mark 3:16–19; Luke 6:13–16; and Acts 1:13. Each of the lists contains twelve names, but not always the same twelve. The number twelve probably refers to God's elect, the twelve tribes of Israel, who settled Canaan after the Exodus. If so, then twelve is a symbolic number, signifying God's saving activity in Jesus and his followers.

The exact nature of "apostleship" in the early church is obscure. In Acts 1:21–26, the qualification for Matthias, chosen an apostle after Judas's death, is that of being an eyewitness: he was present with Jesus from the time of John the Baptist through the death and resurrection of Jesus. "Peter and the apostles," centered in Jerusalem, are the recognized leaders and guiding force of the development of the church according to the early chapters of Acts. Paul the apostle is also an eyewitness (1 Cor. 9:1), but probably only of the risen, not the earthly, Jesus (see 1 Cor. 15:8). Further proof of his apostleship was derived from the nature and role he occupied in the mission and expansion of the church among the Gentiles (Acts 9:15–16; 15:1–35; Gal. 2:1–10). Although Acts is hesitant to refer to Paul as an apostle (but see 14:14), he himself, in his Letters, insists on the title (esp. Gal. 1:1; cf. vv. 11–12). The designation of Barnabas (Acts 14:14) and Andronicus and Junias (Rom. 16:7) as apostles is more difficult to explain except in more general etymological terms. By the second century, the term no longer identifies an office of the church.

In Heb. 3:1, Jesus is the "apostle," the one sent by God. ***See also*** Barnabas; Church; Disciple; John the Baptist; Judas; Junias; Matthias; Paul; Peter; Twelve, The.

P.L.S.

apothecaries. ***See*** Perfumers.

apparel. ***See*** Dress.

Jesus at the head of a procession of the twelve apostles as depicted in a tenth-century Byzantine illuminated manuscript.

Apphia (af´ee-uh), a Christian woman addressed by Paul in Philemon (Philem. 2), possibly Philemon's wife. ***See also*** Archippus; Philemon.

Appian (ap´ee-uhn) **Way,** one of the main roads out of ancient Rome. One branch, the Via Domitiana, led through Cumae to Puteoli, which lay just west of modern Naples. Puteoli was the great port for trade with the east during the first century. The Egyptian grain fleet put in there. It declined after the emperor Trajan built a new harbor for sea-going vessels off the mouth of the Tiber (Ostia). The Forum of Appius mentioned in Acts 28:15 was a market town on the Appian Way south of Rome.

Appius (ap´ee-uhs), **Forum of** (KJV: "Market of Appius"), a town about forty miles south of Rome on the Appian Way where Paul was met by Christians from Rome as he was being led prisoner from the port of Puteoli (Acts 28:15). ***See also*** Taverns, The Three.

apple, a tree-grown fruit with wide geographic distribution. Although traditionally considered the fruit from the tree of knowledge in the Garden of Eden, the apple is never mentioned by name (Gen. 2:9, 17; Gen. 3:6). The fruit of Eden is referred to in Hebrew as *tappuaḥ*. The apple *(Pyrus malus)* may not have been originally native to the Levant although it grows commonly there now. Consequently, many specialists agree that the "apples of gold" in Prov. 25:11 were apricots *(Prunus armeniaca),* trees that provide both abundant shade and golden fruit, sweet and refreshing to the taste (Song of Sol. 2:3, 5). Also considered as the "apple" of the Scriptures are the citron, orange, and quince. ***See also*** Mandrake; Vine of Sodom. P.L.C.

apron, a minimal item of clothing, perhaps an undergarment, probably formed originally by wrapping material around the lower trunk. In the Eden story, the primeval couple fashions such garments as the first human apparel (Gen. 3:7). Elsewhere the term, sometimes rendered "girdle," denotes a sash wrapped over the tunic or outer garment and sometimes serving a decorative as well as a functional purpose.

Aqabah (ah´kuh-bah), **Gulf of,** a northern arm of the Red Sea, east of the Sinai Peninsula. At its head were located Ezion-geber (1 Kings 9:26) and Elath (Deut. 2:8). Trade from the south came through the Gulf and continued north via the King's Highway. As political fortunes shifted, so did control of the Gulf (2 Kings 14:22, 16:6).

Aquila (ak´wi-luh), according to Acts 18:2–3, a Jewish Christian from Pontus in Asia Minor who, like Paul, was a tentmaker (or leatherworker) by trade. Along with his wife Prisca (in Paul's Letters) or Priscilla (in Acts), he was expelled from Rome by the edict of the emperor Claudius, probably in A.D. 49/50. Being of the same faith and occupation, Paul lodged with Aquila and Priscilla during his stay in Corinth, and they became among the most trusted of his co-workers. As owners of property and giving evidence of an ability to travel widely, Aquila and Priscilla apparently had considerable financial means. For the writer of Acts, they are models of the ideal Christian: friendly, hospitable, and generous with their wealth. According to Acts (18:18–19), Aquila and Priscilla left Corinth with Paul, accompanied him to Ephesus, apparently established a house-church there (see 1 Cor. 16:19), and later instructed Apollos when he came to Ephesus (Acts 18:24–26). If Romans 16 is an integral part of Paul's Roman Letter (which is doubted by some), they apparently returned to Rome after the revocation of Claudius's edict in A.D. 54; otherwise, they likely remained in Ephesus (Rom. 16:3–5a). ***See also*** Apollos; Claudius; Paul; Prisca, Priscilla; Romans, The Letter of Paul to the. A.J.M.

Ar (ahr), a city or a region or both. The main references are found in Num. 21:15, 28, both of which relate it to Moabite border territory, and Deut. 2:9 (given to Lot's descendants), 2:18 (marking the Moabite boundary), and 2:29 (settled by Moabites). In Isa. 15:1 its parallel citation with Kir as a main Moabite city suggests city rather than regional identity. No certain site identification for the city has appeared to date.

Arab (air´uhb). **1** A town of Judah (Josh. 15:52) near Hebron, most often identified as Khirbet er-Rabiyeh, southwest of Hebron. **2** Term presumably meaning an inhabitant of Arabia applied to Geshem, who opposed rebuilding Jerusalem, in Neh. 2:19; 6:1. Isa. 13:20 uses the absence of Arab nomadic campsites as a symbol of desolation. Jeremiah refers to a nomad (Heb. *'arab*) waiting for lovers in the wilderness as a pejorative description of Judah's infidelity to God and to its covenant obligations (3:2).

Arabah (air´uh-buh; Heb., "desert plain or steppe"), a term variously translated as "plain," "desert," or "wilderness" (Job 24:5; Ps. 68:7; Isa. 33:9). "The Arabah" means the Palestinian rift valley south of the Lake of Galilee, with three divisions: the Jordan valley north of the Dead Sea; the area of the Dead Sea, the "Sea of the Arabah" (2 Kings 14:25); and the area from the Dead Sea to the Red Sea, about one hundred miles (160 km.) in length. This last area is "the Arabah" in modern terminology. This third region has an average annual rainfall of only 2 inches (50 mm.) and rises gradually from 1,298 feet (366 m.) below sea level to 655 feet (200 m.) above sea level in the center before descending gradually to the Gulf of Aqabah. Underground

water from the highlands on both sides makes possible a fair amount of desert scrub, though it has been shockingly overgrazed in modern times. A very important north-south route in biblical times, the Arabah contained valuable copper mines at Feinan (biblical Punon), probably the place where Moses raised the bronze serpent (Num. 21:4–10; 33:42–43), modern Khirbet an-Nahas, Khirbet al-Maqteh on the east, and to the southwest Mikhrot Timna. This last location, once called "Solomon's mines," was worked by the Egyptians and Kenites but abandoned before Solomon's time. ***See also*** Dead Sea; Jordan; Red Sea. D.B.

The Arabah in modern terminology is the name given to the desert region of the Palestinian rift valley that extends from the Dead Sea to the Red Sea. It has an average annual rainfall of only two inches.

Arabia (uh-ray´bee-uh), a vast, largely desert peninsula between Iraq and the Persian Gulf on the east, the Indian Ocean on the south, and the Red Sea on the west. The peninsula is sixteen hundred miles (2,600 km.) long by nearly fourteen hundred miles (2,300 km.) wide. The mountainous western escarpment along the Red Sea reaches a height of 12,336 feet (3,760 m.) in the southeast in Yemen, where the general altitude exceeds 9,840 feet (3,000 m.). From the great western wall the plateau slopes gently northeast toward the Persian Gulf, although in Oman, the southeastern corner, a spur of the Iranian mountain chain attains a height of 9,774 feet (2,979 m.). The main areas of true sand desert are the vast Ruba' el-Khali (Arabic, "the Empty Quarter") in the southern part of the peninsula and the smaller Nefud in the northwest. Elsewhere it is largely stony desert, although a great semicircle of sand dunes curving around eastward joins the Nefud to the Ruba' el-Khali.

The climate is severe. Winters can be bitterly cold on the plateau, frost being common everywhere except in the low-lying coastal areas. Summers are blindingly hot and, near the coast, extremely humid. Except for rare storms, rain is confined to the mountains, occurring in winter in Oman and northwest of Mecca and in summer on the high ranges of Asir and Yemen southeast of Mecca. This alternation of winter and summer rain on the Red Sea mountains made possible the trading caravans between north and south, for in the south the wells were full in summer and autumn, and in the north during winter and spring.

As early as 6000 B.C., and perhaps even before, products seem to have been exchanged along this route by means of donkey transport, and after the taming of the camel about 1500 B.C. (or possibly as early as 2000) this trade vastly increased. The visit of the Queen of Sheba (Saba in the Yemen) was almost certainly concerned with it (1 Kings 10:1–10). The gifts of the three Wise Men (Matt. 2:1–12) must surely have come along this road: frankincense and myrrh from Yemen and the Hadhramaut in the south (Heb. *Hazarmaweth*, Gen. 10:26) and gold probably from Mahad adh-Dhahab, southeast of Medina. The gold the ships of Hiram brought to King Solomon (1 Kings 10:11) may have come from the same source via the port of Jiddah, or perhaps from East Africa, whence came certainly the more exotic "ivory, apes and peacocks" (1 Kings 10:22). This trade became of enormous importance with the development of the vast empires of the Persians, Alexander and his successors, and the Romans and Parthians; it even included commodities from India and China.

Biblical mention of Arabia is rare and often vague, and for the biblical writers in Jerusalem the name seems to have connoted all the general desert area to the east, including Sinai. Thus, Paul's sojourn in Arabia (Gal. 1:17) was probably in some small settlement east of Damascus, and the Arabians who were present at Pentecost (Acts 2:11) may have come from no further than eastern Transjordan, although perhaps from a Jewish oasis community such as the one at Medina. "Geshem the Arab" (Neh. 2:19; 4–7; 6:1) is of uncertain provenance. Some identify him with the ruler of Kedar mentioned in a fifth-century B.C. Egyptian inscription and also an Arabian inscription at Dedan (Arabic, *el-Ula*), but others believe he was the governor of Edom under the Persians.

Refugees from Assyrian invasions in the eighth century B.C. and Babylonian in the sixth century fled to northwestern Arabia (Isa. 21:13–15, where "thickets" [Heb. *ya'ar*] may perhaps refer to oasis vegetation). Close to the end of the Babylonian Empire northwest Arabia achieved unusual importance for about ten years when Nabonidus, the last Babylonian ruler, captured Tema (modern Teima) on the Medina-Damascus route, about two hundred and fifty miles (400 km.) southeast of Aqabah, and made it his capital. ***See also*** Alexander; Damascus; Dedan; Geshem; Hiram; Kedar; Paul; Pentecost; Sheba. D.B.

Arad (air´ad), a twenty-five-acre site (Tel 'Arad) located about eighteen miles east-northeast of Beer-sheba, in the eastern Negev. Its forty-meter-high mound dominates the surrounding plain. The lower city flourished in the Early Bronze I–II periods (ca. 3100–2650 B.C.); the citadel was an important Israelite fortress from the tenth to the seventh centuries B.C.

Eighteen seasons of excavation in the lower city have revealed a broad exposure of one of the first cities in the land. A fortification 2.4 meters thick with semicircular towers encompassed the city. Urban planning is shown by a network of streets radiating from a central depression, which served as a natural reservoir for rainwater.

Clusters of bench-lined broadroom houses—entered by three descending steps—and courtyards with silos characterize the residential area. Near the reservoir was the elite section, i.e., the palace and sacred precinct. The latter has greatly enhanced our knowledge of the Canaanite cult at this early period. The precinct comprised twin temples, a stone altar (*bamah*), a reservoir (*favissa*), a laver, a stone stele (*masseba*), and other buildings. The palace was a complex of courtyards and interconnected rooms, the central core of which was distinguished by large stone tables, an exedra, a laver, as well as a cult stele with incised stick figures possibly representing the myth of the god Tammuz.

Third-millennium B.C. Arad appears to have flourished in this peripheral, semiarid region as a result of its commercial relations with Egypt and the Sinai copper mining sites. In the Iron Age, Arad again dominated the area, as demonstrated by a series of six consecutive Israelite citadels on the upper mound (Strata XI–VI). About the previous settlement (Stratum XII), the Bible says that the Canaanite king of Arad "fought against Israel, and took some of them captive" (Num. 21:1; 33:40). Arad is in the list of conquered Canaanite cities (Josh. 12:14). Excavators have correlated the destruction of the earliest Israelite citadel (Stratum XI) with the campaign of Pharaoh Shishak in 925 B.C.

The Israelite fortresses included storerooms, dwellings, industrial installations, and a sanctuary. The Arad sanctuary is extremely important, for it existed at the time the Temple stood in Jerusalem. Its tenth-century (Stratum X) plan is particularly informative for its tripartite form: a courtyard with sacrificial altar *bamah*, a sanctuary, and a holy of holies that included stelae (*masseboth*) and incense altars. Of special import are the "Arad Letters," epigraphic materials including lists of merchandise and historically important correspondence written in ink on ostraca (broken pieces of pottery). Smaller forts from the Persian, Hellenistic, and Roman periods (ca. 538 B.C.–A.D. 324) were also discovered. S.L.R.

Arah (air´uh). **1** An Asherite, son of Ulla, who appears in a list of heads of houses, warriors, and chief princes (1 Chron. 7:39). **2** An ancestor of 775 returnees from Babylonian exile (Ezra 2:5). Some of his descendants were loyal to Tobiah (Neh. 6:18), and Neh. 7:10 cites a census of his descendants as 652.

Aram (air´uhm). **1** The son of Shem and grandson of Noah (Gen. 10:22–23; 1 Chron. 1:17). **2** The grandson of Nahor, Abraham's brother (Gen. 22:21). **3** A descendant of Asher (1 Chron. 7:34). In Matt. 1:3, 4, and Luke 3:33 (KJV), "Aram" represents the OT name "Ram." **4** A powerful state (or confederation of states) that rose to ascendancy during the early first millennium B.C. and vied with Israel for control over their region of the Levant. Saul was Israel's first king to clash with the Arameans (1 Sam. 14:47). David defeated Hadadezer, king of Zobah (the Aramean state whose center was north of Damascus), and gained control of the Aramean lands from Damascus to Hammath (2 Sam. 8:5–12). Solomon apparently had to crush a revolt in "Hamath-zobah" early in his reign (2 Chron. 8:3–4); but in the latter part of Solomon's reign Rezon gained control of Damascus and established an Aramean kingdom that was hostile to Solomon (1 Kings 11:23–25). At Rezon's death Hezion seized the throne of Aram and established a dynasty that lasted a century. Members of this dynasty, especially Ben-hadad I and Ben-hadad II, frequently led Aram against the northern kingdom of Israel (1 Kings 15:18; 1 Kings 20; etc.). In ca. 843 B.C. Hazael usurped the Aramean throne and continued the opposition against Israel (2 Kings 8:28–29; 9:15; 10:32–33; 13:22). Jeroboam II of Israel finally overpowered Aram, and the latter declined in importance thereafter, with one short-lived rally during the reign of Ahaz, king of Israel. The kingdom was brought to an end in 732 B.C. by Tiglath-pileser III of Assyria. ***See also*** Isaiah, The Book of. D.A.D.

Aramaic (air´uh-may´ik), a Semitic language closely related to Hebrew. It has been spoken in the Levant from the ninth century B.C. until the present in a variety of dialects. It originated among the Arameans of northern Syria, said to be among the ancestors of Abraham (Gen. 28:2–5; Deut. 26:5). When the Assyrians conquered the Arameans, Aramean scribes within the bureaucracy of the empire made Aramaic into a universal language of the Near East, which endured from the eighth to fourth centuries B.C. Aramaic then continued in widespread use in a number of dialects through the NT period until the Arab conquest (seventh century A.D.). Several passages in the OT are written in Official Aramaic (Ezra 4:8–6:18; 7:12–26; Dan. 2:4–7:28; Jer. 10:10–11; Gen. 31:47). Jesus probably spoke a dialect of Western Aramaic and some words in the NT come from Aramaic, e.g., "Talitha Cumi,"

"Maranatha," and "Golgotha." The Dead Sea Scrolls, inscriptions, and many documents show that Aramaic was in common use during the first century A.D. In succeeding centuries Aramaic split into several dialects. Syriac, a form of Aramaic, was used by the Christians in Syria; Jewish Palestinian Aramaic was used in the composition of the Palestinian Talmud and Babylonian Aramaic in the Babylonian Talmud. Targums are Jewish translations of the OT into Aramaic for the common people in the synagogue. ***See also*** Calvary; Maranatha; Talitha Cumi; Talmud; Targums.

A.J.S.

Aramean (air´uh-mee´uhn). **1** Designation of a people occupying most of Syria in the second millennium B.C., although biblical references come from passages edited at a later time. Subsequent centuries found Israel at war with the Arameans in the times of the Israelite and Judean monarchies. **2** In Genesis, the people from whom Bethuel and Laban came. Bethuel was the father of Isaac's wife, Rebekah. Laban was her brother (Gen. 25:20), who was later outwitted by Jacob (Gen. 31:20) when Jacob sought a wife from Laban's people (Gen. 28:5). Laban was subsequently cautioned by God in a dream (Gen. 31:24). **3** The Israelite ancestral root in the first line of the confession of faith cited in Deut. 26:5 for the ritual celebration of the first fruits of a year's harvest: "A wandering Aramean was my ancestor." **4** The ancestry of the concubine of Manasseh, who bore Asriel and Machir, the father of Gilead (1 Chron. 7:14).

Ararat (air´uh-rat), the biblical name (Assyrian *Urartu*) for the region around Lake Van (southeast Turkey, extending into northwest Iran) and the people and state established there from the ninth through the early sixth centuries B.C. Best known from Assyrian records, Urartu constantly hindered Assyria's advances northward. The assassins of Sennacherib fled there from Nineveh (2 Kings 19:37; Isa. 37:38). Later, after the collapse of Assyria, Ararat and other northern nations are summoned in Jer. 51:27–28 to attack Babylon. In Gen. 8:4 the ark settles on the mountains of Ararat, here evidently conceived as the highest part of the world. The modern "Mt. Ararat" is a later appellation. S.B.P.

Aratus (air´uh-tuhs), a Stoic poet of the mid-third century B.C. whose work *Phainomena* is quoted in Paul's Areopagus speech (Acts 17:28: "for we are indeed his offspring"). ***See also*** Areopagus; Stoics.

Araunah (uh-raw´nuh), a Jebusite, also named Ornan (1 Chron. 21). God's plague against the Israelites during David's reign ceased at Araunah's granary (2 Sam. 24). David purchased this granary, and according to 1 Chron. 22:1 and 2 Chron. 3:1 it was the site of the Temple in Jerusalem. Araunah may be a Hurrian title "noble" rather than a personal name.

Archaeology, History, and the Bible

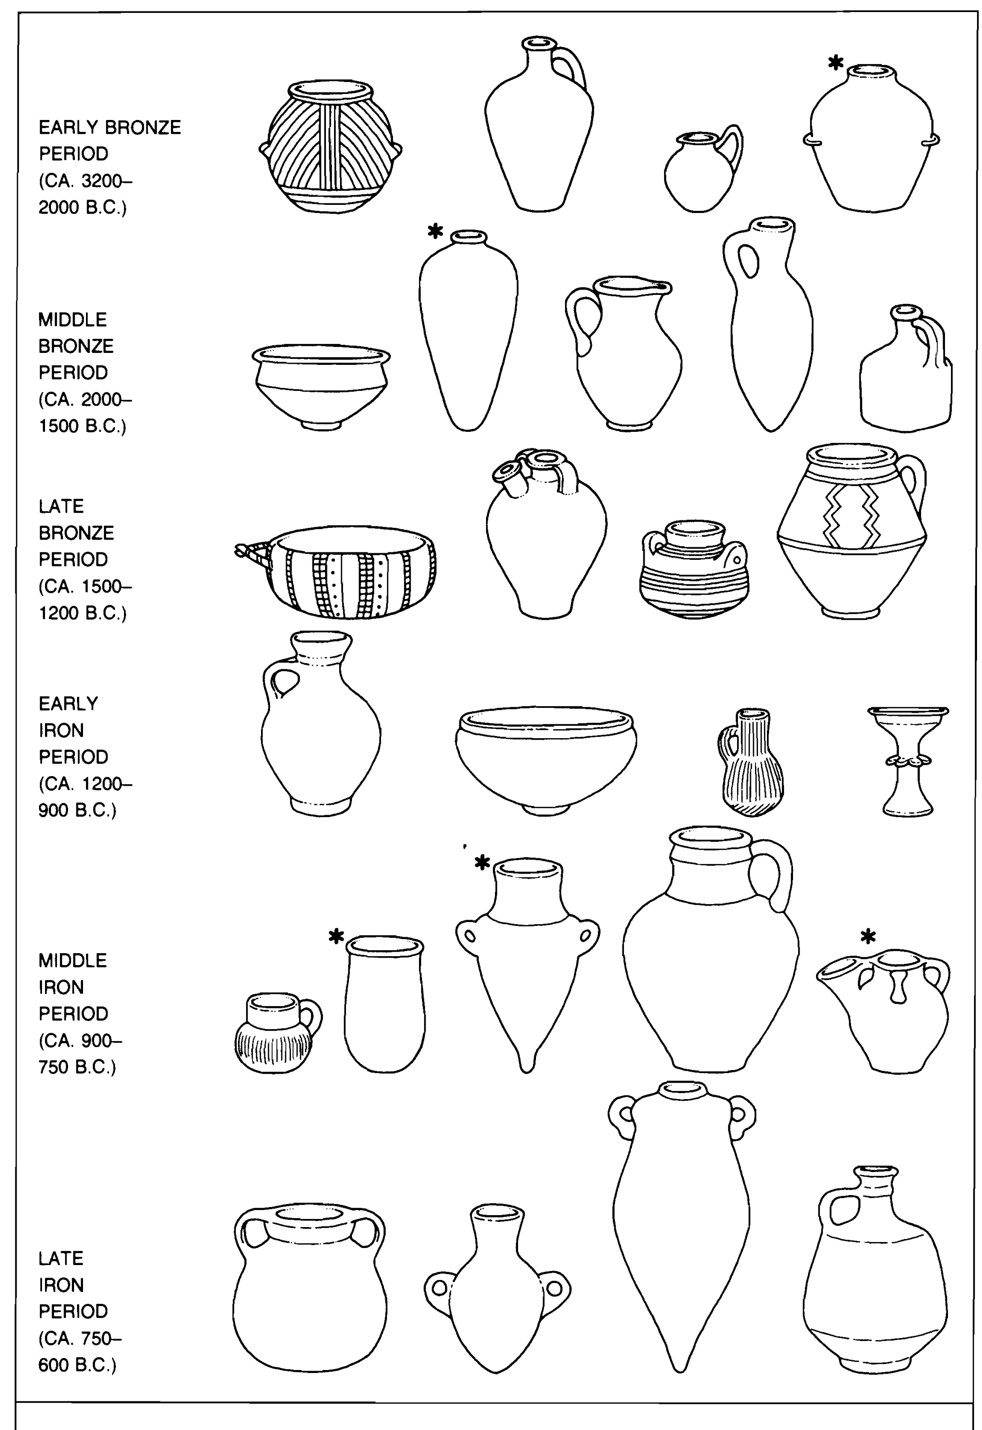
ARCHAEOLOGY, in the general sense, is the study of ancient cultures; technically, it is the scientific study of the material remains of past human life and activities. As in many other disciplines, the passage of time and the explosion of knowledge have made archaeology quite complex; consequently, no one definition is adequate. Until recently Near Eastern archaeology had been principally inductive, emphasizing description; now it is more deductive, stressing explanation. The interaction of induction and deduction is the ideal.

Because archaeology touches upon the natural and social sciences as well as the humanities, it is not easy to categorize. The nature of archaeology and its relationship to other disciplines are still matters of discussion. Is archaeology an autonomous discipline or is it a subdiscipline of either history or anthropology? Some say archaeology is a social scientific discipline; others maintain it is anthropology. Some see archaeology as a tool of history; others claim it is a discipline in its own right. Biblical archaeology, which is the principal interest of this article, has been traditionally historical. Meaningful archaeology must relate to history and is especially useful in reconstructing cultural history.

Archaeology and biblical studies are closely related and inform each other. The process of correlating archaeological evidence and the biblical record is traditionally called biblical archaeology, an academic discipline dating from the nineteenth century with Christian (Protestant) beginnings. From the perspective of the biblical scholar, this process is a biblical discipline because it is applied for the benefit of biblical studies. Near Eastern archaeologists whose discoveries also impinge upon the Bible prefer a geographical or regional designation such as Syro-Palestinian archaeology or the archaeology of the Fertile Crescent as more accurate and comprehensive descriptions of their

Some of the more than seventeen thousand cuneiform tablets as they were discovered in the archive room of the royal palace at Elba, dating from ca. 2500 B.C.

discipline. Such characterizations may help to broaden the horizons of biblical archaeology, which, in the minds of some, had been too parochial in the past. William G. Dever, who has written extensively on the subject of biblical archaeology, is uncomfortable with the term "biblical archaeology," fearing it could be mistaken for a fundamentalist attempt to prove the Bible true through archaeology. Whatever the nomenclature, archaeological research and biblical studies are best understood as independent but interrelated disciplines.



Archaeology is comprehensive, embracing both the prehistorical and historical periods; at the same time it encompasses both written (epigraphical) and artifactual or unwritten (nonepigraphical) discoveries. Although literary remains in the form of texts, inscriptions, ostraca, and seals are the subject of epigraphy and paleography, archaeological investigation is most often responsible for their initial discovery. Without archaeology much written evidence would remain buried forever in the ground. Ancient Near Eastern texts recovered at sites such as Mari, Ugarit, and Ebla in Syria, although only indirectly related to the Bible, can shed valuable light on the biblical record and on the history and religion of ancient Palestine. Unwritten materials include everything made by human hands, including fortifications, pottery, tools, jewelry, and weapons.

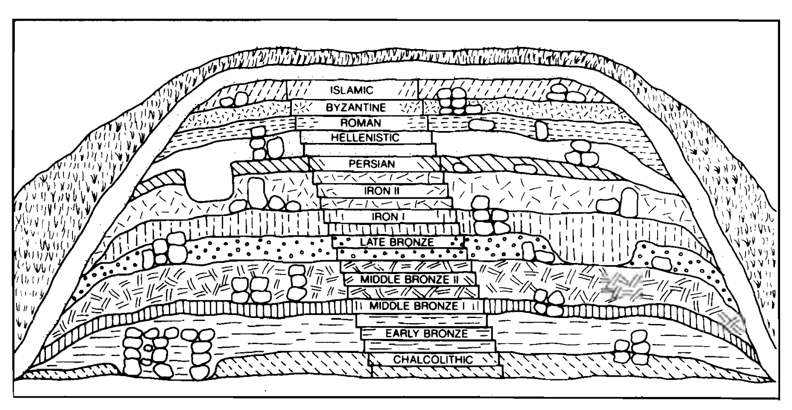
Syro-Palestinian Archaeology, Beginnings to World War II: Archaeology knows no geographical limitations; archaeologists work everywhere. The archaeology of the Bible is concerned principally with the region of ancient Syro-Palestine, including modern Syria, Lebanon, Jordan, Palestinian homelands, and Israel. As a discipline, Syro-Palestinian archaeology has a short history, dating only from the nineteenth century. In the rediscovery of the Holy Land during the past century, few scholars contributed as much as the American Edward Robinson. A distinguished geographer and explorer, he was also a leading biblical scholar. In 1838 Robinson, accompanied by the Arabist Eli Smith, undertook a historic trip to the Holy Land. Although unable to date the ruins, they succeeded in identifying over a hundred biblical sites and thus laid the foundations for biblical archaeology and geography. Robinson is rightly called the first scientific explorer of Palestine.

A direct result of Robinson's topographical investigations was the establishment of the British Palestine Exploration Fund (PEF) in 1865

Tell Dotha, viewed from the west, illustrates the truncated conical shape of the tells. Identified as the biblical town of Dothan, excavations there reveal continuous occupation from 3200 to 700 B.C.

Profiles of characteristic pottery types from the principal archaeological periods in Palestine. Such a chart is an outgrowth of the pioneering work of Petrie and Albright on ceramic typology. (Pots marked with an asterisk are drawn to half-scale relative to the other pots.)

for the purpose of exploring Palestine systematically and scientifically. The PEF of London sponsored several of the great geographical surveys of western Palestine and Transjordan, as well as major excavations of biblical sites.



Beginnings of Systematic Excavations. The first quasi-systematic excavation in Palestine took place in 1890 when the British Egyptologist W. M. Flinders Petrie came from Egypt to Tell el-Hesi in the northern Negev. In excavating Tell el-Hesi (identification still uncertain) Petrie laid the foundations of modern archaeology by his application of stratigraphy and ceramic typology, the twin principles of field archaeology. Stratigraphy is an interpretative principle based on the study of occupational soil layers forming an ancient settlement (tell). Typology is the study and classification of artifacts on the basis of external characteristics, such as shape, ware, and decoration. The application of stratigraphy and typology to a site helps archaeologists to make tentative correlations with events described in ancient records such as the Bible.

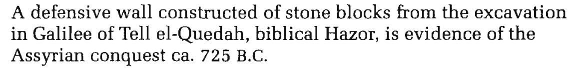
Before World War I most archaeological projects in Palestine resembled treasure hunts. A notable exception was the first American excavation in Palestine; it took place between 1908 and 1910 at Sebastiyeh (biblical Samaria) under George A. Reisner and architect Clarence S. Fisher. Marking the beginning of systematic digging and recording in Palestine, this project revolutionized Palestinian archaeology.

The period after World War I marked a notable advance in field techniques as well as greater accuracy in dating sites. William F. Albright, the distinguished American orientalist and biblical archaeologist, played a prominent role in the postwar era. Building on Petrie's pioneer achievements, Albright refined the pottery chronology of Palestine. Without question Albright established biblical archaeology as a discipline in its own right. In Albright's estimation biblical archaeology is a much wider term than Palestinian archaeology inasmuch as it covers all the lands mentioned in the Bible.

An explorer of Palestine in the tradition of Edward Robinson, the American Nelson Glueck undertook extensive topographical surveys in Transjordan and the Negev. Not only was he able to identify a large number of biblical sites, but with his knowledge of pottery chronology he could determine their periods of occupation. Although recent sur-

A schematic drawing of a typical tell shows the various levels of occupation.

veys have revised some of Glueck's conclusions, they also support many of them.



After World War II: In this period the archaeology of Palestine advanced rapidly, with significant improvements in the techniques of digging and recording as well as in the interpretation of remains. Three archaeologists contributed in a major way to this development: Kathleen M. Kenyon (England), Yigael Yadin (Israel), and G. Ernest Wright (United States).

Kenyon's dig at Tell es-Sultan, identified with OT Jericho, was the most important excavation of this period. No one has had a greater influence on archaeological method than Kenyon; excavators continue to employ the stratigraphical method of Kenyon, with adaptations to suit their own sites. To clarify the stratigraphy of Tell es-Sultan she ran a deep trench down the tell, paying close attention to stratigraphy and recording. Digging in the 1960s at the City of David (Jerusalem), Kenyon excavated in a long, narrow trench from the crest of the hill to the Gihon spring. While her techniques were meticulous, the resultant exposure of the site was too limited.

The first large-scale dig in modern Israel took place at Tell el-Qedah, site of biblical Hazor in upper Galilee. Yadin directed this well-organized project, which functioned by teamwork. Many members of Yadin's team at Hazor became leading Israeli archaeologists.

G. Ernest Wright, distinguished student of Albright, conducted a major excavation at Tell Balatah, site of biblical Shechem in central Palestine. Shechem was the training ground for American archaeologists; at Shechem Wright created a new school of field archaeology. Several of Wright's staff went on to direct their own archaeological projects.

The Tel Gezer dig in Israel was an important offshoot of Shechem. After launching the Gezer project in 1964, Wright relinquished its

A defensive wall constructed of stone blocks from the excavation in Galilee of Tell el-Quedah, biblical Hazor, is evidence of the Assyrian conquest ca. 725 B.C.

direction to Dever and H. Darrell Lance, who developed it into a long-term excavation. In turn, Gezer became the training ground for hundreds of American volunteers. In exchange for academic credits these students not only moved dirt but also learned the art of digging and recording. Their in-service training was supplemented by lectures and seminars at the Gezer field school. Today, many digs operate field schools that confer academic credit on student volunteers.

The pace of archaeological activity since the Arab-Israeli war of 1967 accelerated so rapidly on both sides of the Jordan River that it would be difficult even to name all the field projects conducted in Israel and Jordan, as well as in neighboring countries like Syria, Iraq, Turkey, Egypt, and Saudi Arabia. While American, European, and other foreign archaeologists continue to excavate in the Near East, well-trained local archaeologists are doing much of the digging in their own countries.

The most important excavations in Israel since the Six-Day War focused on Jerusalem. Although Jerusalem is perhaps the most excavated city in the world, the recent digs in the Old City have revolutionized the traditional understanding of Jerusalem's history. The three major projects there were Benjamin Mazar's at the Temple Mount, Nahman Avigad's in the Jewish Quarter, and Yigal Shiloh's in the City of David.

Syro-Palestinian Archaeology Today: Instead of listing the excavations and surveys since 1967 (in 1993 alone over a hundred archaeological projects took place in Israel), describing the state of the art will be more informative. Almost every aspect of Near Eastern archaeology has changed since 1970. The methodology of digging and recording is no longer a major issue; every excavation follows basically the same method, with modifications to suit the site and the objectives of the project. To recover more data archaeologists prefer greater horizontal exposure instead of the deep, narrow trenches of earlier times. Stratigraphical sequences in those trenches helped to establish the chronology of the site, which sheds light on political history of Bible times, but failed to provide the data that elucidate the social and cultural backgrounds of ordinary people (see below).

The temporal and geographical horizons of Near Eastern archaeology have broadened appreciably. Now chronological studies begin as early as the Paleolithic period (ca. 100,000 B.C.) and extend to the Ottoman era (A.D. 1918). Since about 1967 biblical archaeology has been paying more attention to the periods of early Judaism and Christianity. By means of excavations of synagogues and regional surveys, American archaeologists Eric M. and Carol L. Meyers and James F. Strange, as well as Israeli archaeologists, have reconstructed life in upper Galilee through the Talmudic period (A.D. 200–500). Discoveries extending from the Judean desert in the south to the Golan in the north have revealed new understanding about synagogue architecture.

At the same time excavations at Pella in Jordan and Caesarea Maritima in Israel are illuminating early Christianity. NT archaeology has not advanced nearly so rapidly as the archaeology of the OT. Helmut Koester and his team are remedying this deficiency by surveying and photographing sites. By studying the remains of the Hellenistic, Imperial Roman, and Byzantine periods in countries surrounding the

Aegean Sea, archaeologists and historians are shedding additional light on early Christianity.

Excavations and surveys are also being carried out in Carthage and Cyprus to the west of Palestine and in the Arabian peninsula and the Gulf states to the southeast. Yemen's archaeology is also coming of age. As the center of two successive and famous civilizations, the Sabean and the Himyarite, Yemen was known for its frankincense trade.

Multidisciplinary Nature of Research: The composition of the dig staff is perhaps the most striking development in field archaeology; all staffs are multidisciplinary. The field archaeologists are supported by specialists from the natural and social sciences, including among others geologists, physical and cultural anthropologists, paleoethnobotanists, and zoologists. Stratigraphy and typology continue to be the backbone of field archaeology, but many other processes are being carried out in the effort to understand the total environment of a past society and the human impact upon it. The comprehensive Madaba Plains Project (under the direction of Lawrence T. Geraty) in Jordan is a model of multidisciplinary research. The current excavation at Tell el-'Umeiri is the successor to the Tell Hesban dig. The inclusive environmental studies at Hesban and 'Umeiri included study of climate, geology, soil, hydrology, phytogeography, and zoogeography. An environmental survey and ethnoarchaeological research are also part of the Madaba Plains Project. Also, Tell Jalul is being excavated in order to understand the sociohistorical development of central Jordan. This ecological orientation is typical of many Near Eastern digs. In paleoenvironmental studies organic materials such as seeds, pollen, and animal bones illuminate the ancient environment and the human response to it. Also, organic evidence helps to define the economic base of a settlement.

Until recently Near Eastern archaeology focused almost exclusively on the reconstruction of political history composed of public events. The new emphasis is on cultural history. By concentrating on domestic areas of an ancient site, in contrast to areas with monumental architecture, scholars can learn much about the socioeconomic aspects of the daily life of ordinary people, as well as their social organizations. New World archaeology with its emphasis on the social sciences is exerting an important influence on both Near Eastern archaeology and biblical studies. An awareness of social change, ancient economies, trade patterns, and population shifts affords valuable insight into life in the biblical world.

Consonant with those new perspectives from modern sociology and anthropology, archaeological reconnaissance in the Near East has become more interested in whole regions than in single tells. Instead of concentrating on isolated mounds, archaeologists are combining the excavation of the tell with a study of its surroundings. Regional study is invaluable in understanding the economic and demographic relationships of an urban center with the territory under its control. Regionalism sheds light on such vital issues as the relationship among settlements, town planning, economic development, industrial growth, and population expansion.

Israeli archaeologist Yohanan Aharoni's regional surveys in upper Galilee and the Negev earned him the title of founder of systematic

Aerial view of Tel Halif (biblical Rimmon?). It shows the tell itself, with its grids of excavation areas and the major digging areas: the north slope, the Persian area, and the field behind the firebreak at the far right. In the foreground is the field camp—the tent kitchen and camp headquarters housed in trucks and buses.

surveys in Israel. Also, the surveys of Moshe Kochavi, Israel Finkelstein, Adam Zertal, and others in Judea, Samaria, and the Golan have added new light to the complex question of Israelite origins in Canaan.

A dialogue between archaeology and biblical studies may help in understanding the process of Israelite emergence in the central hill country of Canaan. The biblical record presents ambiguous, if not contradictory, accounts of the settlement in Canaan. The literary narrative of Joshua (chaps. 1–11) describes the Israelite settlement as a blitzkrieg, whereas Judges portrays it as a gradual infiltration. By correlating the biblical and archaeological evidence, scholars have proposed three basic models to solve the problem: conquest, peaceful infiltration into the unoccupied hill country, and internal social revolution. Although questions remain, archaeologists are able to verify the factual data surrounding the settlement and to describe traits of the inhabitants, including the nature of villages, settlement distribution, social structure, material culture, and architecture. The multidisciplinary approach has made available archaeological data that are bound to be helpful in reconstructing early Israelite origins.

Archaeology, History, and the Bible: Biblical archaeology has much more to contribute to biblical studies than simply providing illustrations for producing an "illuminated manuscript," to use Lawrence E. Stager's phrase. Archaeology supplies the material evidence needed to elucidate the biblical text. Archaeology makes it possible to place the Bible in its original setting by providing a physical context in time and place. Archaeology casts light on the social, religious, and economic setting in which political events took place. Archaeology, by furnishing the cultural context of the Bible, liberates modern students from the constrictions of their own thought patterns and traditional categories of analysis, allowing them to grasp the biblical mentality better. Archaeology is especially useful in topography and geography, helping to establish the location of ancient biblical sites, as Robinson and

Smith demonstrated in the last century, and Glueck and others in this century.

Of course, archaeology has its innate limitations, since artifacts are often "mute" (uninscribed), and material evidence is sometimes equivocal. Consequently, archaeologists may be tempted to impose unwarranted interpretations on the data.

The Bible creates special problems for interpreters because it is a composite corpus of literature. It is not a primary historical source; in fact, some of its historical sources are quite late. The biblical text is sometimes poorly preserved, ambiguous, or tendentious. The Philistines are a classic example of biased reporting. The biblical writers fail to acknowledge the Philistine contribution to Canaanite technology, art, and architecture.

As a book of faith, the Bible is not always free of prejudice, presenting, as it does, historical events from a theological point of view. The Bible's chief interest in relating an event is not "what happened" but "what it meant." On the other hand, without the Bible the Israelites would be as little known as the Philistines, Moabites, and Edomites. It is imperative that biblical texts be interpreted by literary-critical analysis, including form, tradition, textual, historical, and redaction criticism.

Biblical scholars and archaeologists must exercise caution when dealing with the data of each other's disciplines. With respect to textual and archaeological sources, the terms of one discipline are not to dictate the terms of the other. A biblical text must never be interpreted in the light of a single excavated site. Likewise, excavators must not allow themselves to be influenced unduly by a seemingly relevant biblical text.

Few scholars have written more on the relationship between archaeology and the Bible than Dever. While aware of the inherent limitations of the two disciplines, he is a strong advocate of an "informed dialogue between artifacts and texts." In reconstructing biblical history, a dialogue between ancient Near Eastern texts, principally the Bible, and archaeological data has much to offer. This is especially true today when both biblical and archaeological studies are evolving so rapidly. The social sciences, with perspectives from modern sociology and anthropology, are having a significant impact on both archaeology and biblical studies.

How does one reconstruct the history of ancient Israel? It must be said that the question of modern historiography is extremely complex. In the past, two contrasting approaches were used: one, associated with Albright and Wright, depended heavily upon the archaeological evidence; the other, associated with Albrecht Alt and Martin Noth, espoused a tradition-history approach. More recently, a sociological approach associated with Norman Gottwald endeavors to understand early Israelite life in socioeconomic categories. Stager's creative article on the "archaeology of the family" in early Israel takes into account these three approaches. A model of discourse between archaeology and biblical history, this article utilizes archaeological, textual, and ethnographic data.

James A. Sauer has written perceptively on the use of archaeological material in the interpretation of texts. Historical interpretations,

he warns, are not to be made on the results of limited excavation. Geographical, stratigraphical, and chronological evidence must be well established. The archaeological data must be controlled and unambiguous. The correlation of archaeological evidence and written sources must be based on many sites, never on a single site. Such correlation must be founded on multiple cultural traits, such as pottery, art, and architecture, never on a single cultural trait. Archaeology, Sauer concludes, may be said to support a position only when sufficient distinctive archaeological evidence is available for making a judgment.

Conclusion: Despite the limitations inherent in archaeology, history, and biblical studies by reason of ambiguity or tendentiousness, these three disciplines together can furnish valuable insights into the life, culture, and religion of ancient Israel. Archaeology, history, and the Bible are all vibrant academic studies today. Archaeology is generating so much new material that it is impossible for any one scholar to encompass it. This material in turn is challenging biblical scholars and historians to digest and integrate it in a way that will bring new insights into the life and times of the Bible.

archaeology, methods of, the procedure by which ancient artifacts are recovered, identified, and interpreted. There is no single "proper" approach to archaeological method, any more than there can be an all-embracing theoretical definition. Archaeology is what the majority of competent archaeologists do. However, since what one learns in archaeological research is the direct result of what one is trying to find out and how one goes about it, theory is not only important, but theory and method are inextricably entwined.

This article traces theory and method in biblical and Syro-Palestinian archaeology from the classic period of its early development in the 1920s until the present.

Between the Two World Wars, 1920–1940: Although modern archaeology in Palestine began late in the nineteenth century with Sir William M. F. Petrie at Tell el-Hesi (1890), it was not until after World War I that large-scale work, particularly American, got underway.

The 1920s and 1930s constituted a "golden age," with numerous well-financed and competently staffed field excavations—many of them at biblical sites such as Ai, Bethel, Beth-shan, Beth-shemesh, Beth-zur, Debir, Gerasa, Gibeah, Jericho, Mizpah, Samaria, Shechem, and others. The British Mandate Department of Antiquities promulgated new antiquities laws in 1919, and the various foreign schools flourished in the following period. Particularly prominent was the role of the American School of Oriental Research in Jerusalem, directed first by the prominent orientalist W. F. Albright, and later by the rabbi and biblical scholar-explorer Nelson Glueck.

"Biblical Archaeology": It was in this period that the movement popularly known as "biblical archaeology" came to full flower. Interest in the Bible had, of course, motivated much of Western participation in exploration and discovery in the Holy Land from the early nineteenth century. But among European archaeologists, especially the British, there also developed a parallel "secular" tradition (see below). Among Americans working in Palestine, this secular approach was also seen in the University of Chicago's excavations at Megiddo (1925–1939), as well as in the work of the University of Pennsylvania at Beth-shan (1921–1933) and of Yale University at Gerasa (1928–1934).

It was Albright and the American school in Jerusalem who dominated the scene in the formative phase in the 1920s and 1930s. Grouped around them were a number of consortia of church schools and seminaries, with staff and financial support drawn from religious circles, digging at biblical sites. Albright, a formidable scholar of extraordinary breadth in the whole of ancient Near Eastern studies, was the mentor of this group. In his view, archaeology was a promising new tool of biblical studies. It alone could produce *external* evidence to illuminate the biblical text—often dramatically—thereby

A reconstructed pottery serving bowl found at Tel Halif (biblical Rimmon?) is important because its form, design, and method of construction allowed the archaeologists who found it to date it and other structures in the area to 750–700 B.C.

cutting through what he regarded as the sterile debates of textual and literary criticism, especially of the skeptical variety then in vogue in both European and American liberalism. It was Albright who coined the phrase "the archaeological revolution." By that he meant the opening up of the lands, peoples, and lost sites of the ancient Near East, so that the Bible no longer stood merely as a lone monument from the past without a cultural and historical context. The Bible now had a historicity, and thus a new "credibility."

Albright was reacting in part to the temper of his times. This was "conservatism" in the best sense, but Albright the scholar was certainly no "fundamentalist." Yet, the *popular* notion of archaeology that grew out of this approach—and continues to prevail among much of the American public—was that archaelogy's primary function is to "prove the Bible true."

Methods of "Biblical Archaeology": In order to perfect this new tool one obviously had to be able to correlate the material remains of the past, brought to light now by archaeology, with the biblical texts one sought to clarify. Two basic methods were pioneered by the first generation of the school of "biblical archaeology." Both were highly technical and had little to do with theology, but they were necessary to the task at hand.

Stratigraphy. The first method was stratigraphy. A typical Middle Eastern *tell* (or artificial mound) is the result of an extraordinarily complex series of man-made and natural deposits, often laid down in a continuous sequence stretching over thousands of years. Occupational activities, repeated disturbances, constant rebuilding, and frequent destructions have churned up the debris from as many as thirty strata, or successive cities, superimposed one on another. The first challenge of modern archaeology was therefore simply to learn how to dig stratigraphically—that is, to untangle these layers precisely in the reverse order of their deposition, and thus to reconstruct the history of a site, period by period. This was to

ARCHAEOLOGY, METHODS OF

prove very difficult, and indeed its accomplishment was not to be fully achieved until the next period.

The developing techniques of stratigraphy, however, were particularly crucial for "biblical archaeologists," who were fundamentally historians and whose primary aim was to reconstruct the broad course of what we may call "political history" in the biblical period. It was thought that this history of great events—the formation and collapse of states, the conflict of political ideologies and institutions, the activities of prominent kings and public figures—was what the Bible dealt with primarily, and what archaeology could uniquely confirm. For these early "biblical archaeologists" the focus was on such great historical epochs as the patriarchal period (ca. 2000–1700 B.C.) and the Israelite exodus and conquest (ca. 1300–1200 B.C.).

Ceramic Typology. A second challenge, however, grew inevitably out of stratigraphy, which could at best provide only a relative sequence of events, and that was the problem of absolute chronology (i.e., dating events). Here it was pottery that could provide the clue, as Petrie had long ago said. If the characteristic pottery from each layer could be separated precisely, and if that pottery could then be placed along a "time line" of developments in form and decoration, one could provide fixed dates for each stratum and its contents. In practice this meant developing ceramic typology, the art of charting changes

Gridding the field. Archaeologists at Tel Halif pound in stakes and stretch string, dividing the area to be excavated into squares. They then study the "balks" of undisturbed debris between the squares as excavation proceeds downwards.

in local pottery styles and then correlating these through comparative studies with similar styles in neighboring areas such as Egypt and Mesopotamia, which unlike Palestine in the early periods possessed both written records and an astronomically fixed chronology.

Albright himself was in the vanguard of the development of both these methods, especially in his excavations from 1926 to 1932 at Tell Beit Mirsim (biblical Debir?). The publication of the results of his work at this site provided the framework for the history, terminology, and chronology of ancient Palestine that is still used today. In particular, Albright's mastery of the common pottery of Palestine, handed on to his second and third generations of students, determined the course of archaeological research almost until the present time. This was one of the greatest achievements of "biblical archaeology."

The Postwar Period, 1950–1970: After the Second World War, when fieldwork resumed in the Middle East, especially in Israel and Jordan, stratigraphic methods came to the fore again. Despite the attempts of the earlier generation, it became obvious that much of the material previously unearthed was so poorly excavated that it could not be adequately dated, much less interpreted. It was therefore largely useless for historical reconstruction. Thus problems high on the agenda of "biblical archaeology," such as the historicity of the patriarchs or the Israelite conquest of Palestine, had not been resolved, despite the accumulation of much new data.

The "Balk-Debris Layer" Method. The impetus for improved field methods came, however, from secular quarters, especially in the work of the eminent British archaeologist Dame Kathleen M. Kenyon at Jericho in 1952–1958. Kenyon had learned more sophisticated and precise stratigraphic techniques on Romano-British sites under the tutelage of Sir Mortimer Wheeler (thus the popular designation of her method as "Wheeler-Kenyon"). At Jericho she adapted the basic principles of this method to the peculiar problems of a Middle Eastern mound. The essence of the system was the gridding of each field into squares (usually 5 by 5 m.), then leaving standing "balks" of undisturbed debris (1 m. wide) between the squares as excavation proceeded downward. Careful, smaller probe trenches guided the digging level by level. The focus of attention was not architecture per se, but the debris layers that made up most of the contents of a mound. The assumption was that the debris, if meticulously separated and analyzed, would reveal the story of successive human activity, including the smaller inner changes in the architecture, often previously overlooked. Further, the analysis and drawing of the sections visible in the balks would aid in interpreting and presenting the evidence in "three dimensions," so necessary in complex Palestinian sites.

The Kenyon system (nowadays more commonly termed the "balk-debris layer" method) was difficult, expensive, and confined to small areas. But it produced obviously superior results in digging, analyzing, and presenting the data, particularly in re-excavating old and badly dug sites, where meticulous examination of the scant material left was essential. Thus it was soon adopted and coupled with Albrightian ceramic analysis by most Americans working in Jordan,

ARCHAEOLOGY, METHODS OF

including G. E. Wright at Shechem (1956–1969), P. W. Lapp at Ta'anach (1963–1968) and elsewhere, J. A. Callaway at 'Ai (1964–1969), and others. Current excavations in Jordan, foreign as well as local, follow this system.

Archaeological "Field Schools." The system was also introduced in Israel by Wright, followed by his students W. G. Dever, H. D. Lance, and J. D. Seger, in the well-known Gezer project (1964–1973), the largest and longest-running American excavation of this period in Israel. Here the combined British-American approach was supplemented by a "field school" that trained hundreds of student volunteers and others in field methods, as well as pioneering in the "new archaeology" (see below). By the 1970s, all American excavations in Israel were organized along similar lines, such as those at Tell el-Ḥesi, Shema-meiron, Caesarea, Tel Anafa, Tell Jemmeh, and many others. The Israeli archaeologists, while still preferring larger exposures at virgin sites and a more architectural orientation, have gradually adopted most aspects of the new stratigraphic methods, despite the controversy that continued throughout the 1970s (particularly over the use of sections and section-drawing).

The "New Archaeology," 1970–: It is now commonly recognized that just as earlier "revolutions" in the archaeological method can be distinguished, so a new and potentially revolutionary phase can be said to have begun about 1970, called the advent of the "new archaeology." It may be helpful to sketch briefly the reasons for this shift in theory and method.

Before listing various factors in the current revolution, we must acknowledge that all the newer thinking grew out of frustration that old questions had not been answered satisfactorily, as well as from the desire to raise what were regarded as new and more exciting, more relevant questions. Now archaeologists could date pottery and architecture fairly accurately and could compare Palestine with neighboring cultures. But what did the data mean? Archaeologists could describe the dry dust and bones of the past, but could they explain how people really lived and thought? What could archaeology tell us that the biblical and other texts could not? Was ancient Israel unique, and if so how? What relevance did archaeology as a developing science actually have for biblical studies?

An arch with keystone from what was probably the stable of a house at Ai. From the eighth century B.C., it is one of the earliest such structures found in Israel.

One of the dissatisfactions that precipitated change was a certain decline of interest in the older-style "biblical archaeology" due to pessimism about its prospects. Even a cursory survey of recent literature by archaeologists and biblical historians will demonstrate that after nearly a hundred years of active research on early Israelite origins we are further than ever from a consensus of scholarly opinion. We cannot yet explain, at least in human and historical terms, the ultimate sources of the Yahwistic movement that appeared so dramatically in ancient Canaan with such devastating effects. The same is true for the patriarchs of Genesis—the "fathers" of the faith of later Israel—who remain figures as shadowy as ever. If the "biblical archaeology" movement had as its aim a convincing reconstruction of an actual historical setting for these formative events, then it must be confessed that it failed. Perhaps the failure was the result of unrealistic expectations. Archaeology can answer such questions as "what," "who," "when," and "how"—but not "why."

Multi-Disciplinary Archaeology: The first real signs of change, however, came in the multidisciplinary approach. Earlier archaeologists, especially of the "biblical archaeology" school, had concentrated on stratigraphy, pottery chronology, and major architecture such as temples, palaces, and defense works. These categories of evidence were subjected to minute examination because they were pertinent to the basic orientation of that generation toward what we have termed above "political history." But what about social and even individual history?

In the late 1960s archaeologists began to realize that in their rather parochial approach much data of potential significance had been overlooked, and in many cases vital evidence had even been discarded. Individual sites had been excavated with no consideration of environmental factors. But why were those sites located there in the first place? How had defensible position, water supply, rainfall, climate, and the availability of arable land and raw materials shaped the culture that developed in a particular time and place? And what could bones, seeds, and other organic remains tell us of economic strategies, social differentiation, diet, disease, longevity, and the like? Archaeologists began to see that if total retrieval of the material remains were possible, and if they were studied in both natural and cultural context, they could begin to discern social, economic, ethnic, and perhaps even religious groupings. Moreover, they might then get at what they had really

sought all along (now defined as the true objective of archaeology): an understanding of the phenomenon of cultural process and change.

Prompted by these broader theoretical interests and research objectives, both biblical and Syro-Palestinian archaeologists began about 1970 to employ larger, multi-disciplinary excavation staffs. The trend began at Gezer, which was experimenting self-consciously in methodology, as early as 1966; but within a few years most digs in Israel and Jordan exhibited the "new look." Now, alongside the traditional biblical scholars, historians, stratigraphers, and ceramic experts, one increasingly found on staff such specialists as geologists, geomorphologists, climatologists, paleo-ethnobotanists and zoologists, physical and cultural anthropologists, ethnographers, historians of technology, and, more recently, statisticians and computer programmers. Data of every sort now had to be retrieved: living-surface deposits were sifted and put through froth-flotation machines for seeds; all bone fragments were saved; soil and pollen samples were taken; extensive regional and environmental surveys were carried out; material culture samples and artifacts were submitted for laboratory analysis.

It was obviously expensive and laborious to coordinate the fieldwork and research of so many specialists. And, since this approach was so novel, few final results are yet available in a published form that would seem to realize the full potential of the newer approach. Finally, some discounted the "revolution" as nothing more than a passing fad. It could be argued that no far-reaching philosophical or disciplinary changes were in evidence, only a pragmatic borrowing from the natural sciences. Yet other scientific techniques had long been accepted in archaeology, such as radiocarbon dating, neutron activation analysis to "fingerprint" clays and pinpoint the source of pottery, electrical resistivity surveying to plot underground structures, and many other techniques whose value was obvious. Modern technology had already made its contribution in the form of aerial and satellite photography, laser-beam transits for rapid and accurate mapping, ground-penetrating radar, satellite-based geographical information systems imagery (GIS)—and especially in the computer, potentially the most powerful new tool in archaeology. It may safely be said that no single innovation has done as much to transform this branch of archaeology as the new alignment with the natural sciences and the multi-disciplinary orientation, that is clearly here to stay.

The "Secularization" of "Biblical Archaeology": *Another factor influencing archaeology,* beginning in the late 1960s, was changing sources of support, both personal and financial, which led to the secularization of "biblical archaeology." This had two aspects, the first of which was the advent of digs done exclusively with student volunteers in the wake of rising costs and the shortage of labor in the Middle East.

This approach was pioneered at Gezer, beginning in 1964, with the first dig structured entirely around a "field school" offering practical experience and academic credit. At first this was also a strategy born of necessity, but before long archaeologists everywhere in Israel were responding to the exhilaration of teaching while doing fieldwork. What archaeologists did not anticipate was that students' persistent and often impertinent questions (always "why?") would force them to rethink their own motivations and presuppositions, sometimes painfully. These students—some Christians, many Jewish, mostly secularists, all adventurers of one sort or another—completely transformed life on a typical dig with a staff of former "biblical archaeologists" in transition.

The second aspect of secularization brought even more profound and long-lasting changes. As the costs of doing fieldwork rapidly outstripped the resources of private and church-related sources, it became necessary to turn to federal and public sources of support. A typical six-week season with a diversified staff and workforce of a hundred now cost $100,000 or more. Beginning in 1966, Gezer was supported almost wholly by U.S. government funds channeled through the Smithsonian Institution, with some help from the Ford and Rockefeller foundations.

The newly found sources of support were timely and salutary. But they forced "biblical archaeologists" to distance themselves somewhat from theological and religious studies, to develop credentials as professional (rather than amateur or part-time) archaeologists, and to broaden their research designs into the kind of proposals that could withstand the peer review process common in American anthropology and archaeology. That trend was intensified as the National Endowment for the Humanities became the major source of funds by the mid-1970s, and as the American Schools of Oriental

Oven and stone for food preparation excavated at Gezer, from the late second millennium B.C.

ARCHAEOLOGY, METHODS OF

Research (historically the sponsoring agency of many American excavations in the Middle East) adopted its standards by the end of the decade.

One response to financial pressure and the need to produce more deliberate research designs to justify public funding was a shift away from the large, expensive tell-site excavation, with its more generalized objectives. Newer projects now tended toward "problem-solving" archaeology designed to focus specifically on a neglected area, site, or topic, as well as the excavation of one-period sites and regional surveys to study settlement patterns from surface remains. This was attractive both because these projects appeared to produce more results for the investment, and also because the complex newer methods appeared to be more manageable for projects on this scale. In Israel, new excavations of the 1970s included an investigation of upper Galilean synagogue sites (Eric Meyers et al., 1971–1979) and a study of late third-millennium arid lands settlement sites in the Negev (W. G. Dever and Rudolph Cohen, 1978–1980). Projects of the 1980s included, however, large continuing American excavations at Tell Miqne (biblical Ekron; S. Gitin and T. Dothan) and Ashkelon (L. E. Stager). In many areas of Jordan previously almost completely unworked by archaeologists survey work became very popular. American surveys concentrated especially on the Kerak plateau (M. Miller, 1978–1982); and the Wadi el-Ḥesā (B. MacDonald, 1979–1983). A large-scale field project, the Madeba Plains Project, embodied in particular the multi-disciplinary approach (L. T. Geraty, L. G. Herr, O. S. LaBianca, and others, 1970–).

Another factor strengthening the growth of secularism was the ascendency of the various "national schools" in the Middle East. The colonial powers had long dominated archaeology, but by 1970 the initiative in Israel had long since passed to the state-supported and well-staffed Israeli school with all its natural advantages, and this was rapidly becoming the case in Jordan and Syria as well. Each of these schools had its own independent rationale, agenda, and objectives, all of which differed considerably from those of the foreign schools, especially those of the former "biblical archaeologists." Even in Israel, where archaeology still remains somewhat "bibliocentric," the Bible is used not so much as theological or confessional literature, but rather as a document of national history. In any case, Israeli archaeology is strongly secular, never having been clerically dominated as in America. This had always been true of several of the European schools, especially the British, where from Petrie to the present one could scarcely have found a "biblical archaeologist."

It must be stressed that all agreed that it was not a question of *whether* to use the Bible, but *how*. What was the proper relationship of archaeology and history, as the "new archaeology"

Three cisterns in the courtyard of a typical house excavated at Ai, seventh century B.C.

began to move away from the traditional alignment solely with biblical history? Could archaeology any longer be simply the "handmaiden" of history, as it was so often described? Recently W. G. Dever has argued that "biblical archaeology" of the classic style of the 1920s–1960s was uniquely American, largely an aspect of biblical studies and the theological climate of that period rather than a part of the mainstream development of archaeology. The continued flourishing of the secular schools in other countries showed unmistakably that there were other valid approaches to the archaeology of this region of the Middle East. Indeed, beginning about 1970 there was a rather strong reaction against the term and even the concept of "biblical archaeology," in preference for Albright's old alternate term (which had remained in use nearly everywhere else), the "archaeology of Syria-Palestine." In this view Syro-Palestinian archaeology was a professional and academic discipline *independent* of biblical studies, with its own appropriate aims and methods, a branch of Near Eastern archaeology far broader in scope than the biblical periods and peoples. The term "biblical archaeology" would thus be retained for the dialogue between some aspects of this discipline and biblical studies, for example, between Iron Age specialists and OT scholars. Ironically, the new "secular archaeology," while demanding autonomy, promised to contribute even more to biblical studies as it grew in sophistication, precision, and confidence.

The Impact of New World Archaeology: Finally, somewhat belatedly, Syro-Palestinian, as well as biblical, archaeology was affected by New World archaeology, where the more scientific and anthropological thrust of the "new ar-

ARCHAEOLOGY, METHODS OF

chaeology" had been strongly felt already during the early 1960s. Among the concepts younger archaeologists in this field borrowed (sometimes rather naïvely) were: first, the "holistic" view of culture as consisting of a number of interacting, adaptive economic and social subsystems, most of which leave traces that must be sought in the archaeological record; second, the notion that archaeology must not only describe artifacts but must explain the human behavior they express, and that the goal of this enterprise is to discern universal "laws" of the cultural process; and third, the insistence that material culture remains must be not only well excavated but must be quantified and statistically manipulated (usually with computers) so as to analyze a number of independent variables that may help to account for culture difference and culture change.

Obviously this more anthropological approach was a long way from the older historical archaeology, especially that devoted exclusively to concerns of biblical history. Many questioned whether in this the new archaeology is not too specialized, too radical a departure from the venerable traditions of humanistic archaeology. But graduate programs in North American universities (Toronto, Harvard, Chicago, Arizona) have rapidly taken up the new archaeology. The current projects of the American Schools of Oriental Research, its publications, and its program at the annual meetings all reveal its strong hold. The younger generation is firmly committed to it, partly because it seems more intellectually challenging, more in the mainstream of archaeology today, and partly because on the academic scene this is where the action is perceived in terms of financial support, professional development, and career opportunities. As had long been observed, American archaeology is anthropology or it is nothing.

Again, the newer approach, despite controversy, is here to stay. This does not obviate the need for the Syro-Palestinian archaeologist to be fully competent at the same time in biblical languages, literature, and history, as well as in the traditional skills of stratigraphy and ceramic typology. Yet because it becomes increasingly difficult for one individual to master all that is required, we will likely see some division of labor. Alongside the new "secular archaeology" one may safely predict that there will be a revival of a new and more sophisticated style of "biblical archaeology," for as the pace of discovery quickens, popular interest in archaeology and the Bible has reached an all-time high. There is room for both Syro-Palestinian and biblical archaeology, as long as archaeology remains an honest inquiry, marked by scholarship rather than by sensationalism.

By the middle 1980s archaeology had retreated from some of the more extreme tenets of the "new archaeology," such as Hempelian

Canaanite altar at Megiddo from the Early Bronze III period.

positivist philosophies of science, the search for "universal laws" of cultural change, and the contempt for *Kulturgeschichte* (German, "history of culture") and historical explanations. The reactionary movement, often termed "post-processual archaeology," began in England with the works of Ian Hodder of Cambridge, who called his own model "contextual archaeology." By the early 1990s, the influence of the newer approach was widespread. It embodied the best of the now passé "new archaeology," such as the concern with research design, interdisciplinary collaboration, ecology, and long-term settlement history (Braudel's *la longue durée*). It focused once again on ideology as a factor in cultural change (*l'histoire de mentalités*), on the importance of symbolic systems, and on the historical context in which change takes place. This movement should prove especially congenial to all Near Eastern archaeologists, and to biblical scholars as well.

To sum up this review of recent developments of method, archaeology in the Middle East today is still related to biblical studies, but it is also related increasingly to the social and natural sciences, especially anthropology. Its future in America may lie as much in the university and in the public forum as in the seminary. To use a figure of speech, the archaeology of the Holy Land has come out of the cloister, into the academy and the marketplace.

Prospects for the Future: It remains only to suggest some examples that may illustrate how the methods of the "new archaeology" may enable it to do what the old could not.

The first example is the *patriarchal period.* Earlier "biblical archaeologists" like Albright and Glueck had confidently connected the narratives of Genesis concerning the patriarchal migrations directly to the Middle Bronze I (MB I) period in Palestine, ca. 2200–2000 B.C., and related them further to "Amorite" movements from upper Syria. That was possible because MB I is an archaeological phase when nomadism temporarily eclipsed town life, and some elements in the material culture appear to

ARCHAEOLOGY, METHODS OF

be derived from Syria. But today no scholar supports that correlation, largely because we now know that pastoral nomads constituted one aspect of the society and economy in every period in ancient Palestine. In addition, further study of the Akkadian texts demonstrates that the Amorites mentioned there were not an ethnic but a socioeconomic group, only some of whom were pastoral nomads. The "Amorite"–MB I–patriarchal equation was intriguing, but too simplistic. As a result, biblical historians like T. L. Thompson, J. Van Seters, and others, reacting against Albright's overevaluation of archaeological evidence, dismiss the patriarchs as entirely fictitious.

A more fruitful approach would be to continue to apply the newer archaeological methods so as to reconstruct the entire social history of the Levant in the second millennium B.C. with greater precision and confidence. The study of pastoral nomadism—in the Mari and other texts, in the archaeological record, and in modern ethnographic parallels—has been particularly rewarding. Current research thus indicates that while the stories in Genesis cannot be fixed in any one particular archaeological phase, they do generally reflect economic and social conditions in Syro-Palestine in the second millennium B.C. and may therefore rest on a genuine historical memory. In this sense, archaeology may yet provide a convincing background against which to view the biblical narratives—in itself a worthy and challenging, if modest, goal.

Another example is the *Israelite settlement in Canaan*. Again, earlier archaeologists tended to jump directly from the pages of Joshua into the archaeological trenches, where destruction levels seemed to confirm and date a rapid Israelite military conquest of greater Canaan around 1200 B.C. Today, however, with the accumulation of much new and varied data, that view is also regarded as too simplistic. Some of the destructions prove to be only localized disturbances; others are due to the "Sea Peoples" or Philistines; and many sites show no destruction at all (including those such as Jericho, 'Ai, Gibeon, and others that the Israelites claimed to have destroyed). Again, some biblical scholars reacted quite negatively, claiming that there was no statistically significant appearance of a new people known as the Israelites at the beginning of the Iron Age and that what occurred was simply a "peasant's revolt" against the late Bronze Age Canaanite city-states.

A better starting point than Joshua may be the book of Judges, which freely acknowledges that the settlement was a long and at first only sporadically successful struggle against the Canaanite city-states. It is the more realistic account, and certainly the more amenable to investigation and confirmation using the newer techniques, especially survey and settlement archaeology. Indeed, recent survey work in the Negev, the central hills, and upper Galilee has brought to light dozens of small unfortified villages founded on virgin soil. These new settlements, mostly one-period sites, exhibit a new style of courtyard house suitable for peasant agriculture and an egalitarian social structure, while the pottery and other aspects of the material culture are still in the Late Bronze tradition. These new villages are established in marginal areas, rather than on the ruins of Canaanite sites, but they are not entirely culturally isolated. Those excavated so far ('Ai, Radannah, Giloh, Izbet Ṣarṭeh, and Tel Masos) are the first truly "Israelite" villages archaeologists have been able to recognize, and they reflect almost exactly the conditions portrayed in the book of Judges. A study by L. E. Stager on early highland villages of Israel seeks to demonstrate how the new, multi-disciplinary archaeology illuminates the actual process of Israelite settlement, using textual studies, settlement history, archaeology, ecology, sociology, and ethnoarchaeology.

A final example is the *ancient cult and religion*. Earlier "biblical archaeologists" thought that almost everything otherwise inexplicable was "cultic," i.e., had some religious significance. Further and more sophisticated research has demolished most of these cultic explanations on the one hand, while on the other hand it has brought to light a number of genuinely cultic installations and artifacts. Among these are early Israelite shrines at Dan, Megiddo, Ta'anach, Tell el-Farah (Tirzah), Lachish, Beersheba, and Arad. The most spectacular is the eighth-century B.C. sanctuary at Kuntillet 'Ajrûd in the eastern Sinai, where a plastered shrine yielded many votive offerings and Hebrew dedicatory and blessing formulae. One fascinating inscription on a storejar reads, in part, "Yahweh of Samaria and his Asherah," and above it is painted an enthroned, half-nude female—possibly Asherah, the mother goddess of Canaan. Perhaps in overreaction against the excesses of earlier archaeologists' interpretation, biblical scholars have paid scant attention to these recent discoveries, but they are uniquely capable of complementing the biblical texts, which are often elitist and thus portray the normative religion of temple, priests, and king. Archaeology today, however, is capable of documenting "folk religion," or actual religious practice, and setting it in the larger context of social behavior.

The above examples are all preliminary, drawn as they are from the current horizon of archaeological research which is still experimental. But they do illustrate the exciting prospects of the newer archaeology, which is only beginning to realize its full potential. It is sometimes supposed that the "archaeological revolution" is over. In reality, it has scarcely begun.

Archelaus (ahr′kuh-lay′uhs), Herod Archelaus, son of Herod the Great who became ethnarch of Judea, Samaria, and Idumea when his father died in 4 B.C. (see Matt. 2:22). His rule was relatively short and disastrous. Both Jews and Samaritans petitioned Rome for his removal because of his brutal and insensitive rule. Augustus banished him to Gaul in A.D. 6, and his territory became a Roman province under the prefect Coponius. ***See also*** Ethnarch; Herod.

archers, warriors armed with bows and arrows. Archers played an important role in ancient Near Eastern warfare since they could strike accurately from a distance while being protected by a full-length shield. Their importance was so significant that in the Bible a bow may metonymically represent general military strength (Hos. 1:5). Although individual archers and even target practice are mentioned in the Bible (e.g., 1 Sam. 20:35–36), no organized Israelite archery corps is ever described. Perhaps Israel lacked the materials needed to produce composite bows and therefore never established a large archery corps. Alternately, the Bible may never have mentioned an Israelite archery corps, even though it existed. Small groups of Israelite archers are portrayed in the Assyrian reliefs of the siege of Lachish, where several Israelite archers try unsuccessfully to stave off the Assyrian army, which incorporated a large organized corps of archers. Archippus (ahr-kip′uhs), perhaps a member of Philemon's household, greeted by Paul in Philemon 2 (cf. Col. 4:17). ***See also*** Apphia; Philemon; Philemon, The Letter of Paul to.

Archite (ahr′kit). **1** Identification given to Hushai, adviser to David (2 Sam. 15:32; 16:16; 17:5, 14; 1 Chron. 27:33). Hushai spied on Absalom and the priests Zadok and Abiathar. **2** A territory associated with Ataroth, a boundary location between Benjamin and Ephraim (Josh. 16:2), possibly identical with Ataroth-addar (Josh. 16:5).

architecture, the art of designing and building structures for various human activities. This article discusses major features of architectural remains as they relate to biblical texts and highlights the archaeological and artistic record of Syro-Palestine and the cultures with which it had historical contact.

The Bible does not use the term "architecture." It speaks rather of specific constructions, sometimes giving remarkable details, but always incidental in narratives composed for other purposes. Furthermore, the archaeological evidence for architecture seldom survives in more than the form of building foundations. Efforts at rebuilding, the redesign of city layouts, damage due to earthquakes or military destruction, or quarrying for reusable stone, and the vagaries of time and weather have all diminished the evidence drastically. Artistic representations such as the four-column facade of the Roman temple on the Esbus coin found in its proper Roman context at Hesban or the stairway up the mountainside toward Tell er-Ras on a coin found at Shechem are frequently helpful, but usually they are of so small a scale as to give only hints of the architecture represented. There is the further problem, shared with all artistic representations, of uncertainty about the accuracy of the artist, whether for reasons of propaganda or artistic license.

With these acknowledged limits one must claim at the outset that the architectural achievements in Syro-Palestine were at their best relatively minor compared to the massive gates, palaces, ziggurats, and gardens of Mesopotamian centers such as Ur, Babylon, Asshur, and Nineveh. Similarly, examination shows very minor achievement in tombs, temples, canals, and palaces compared to those of Old, Middle, and New Kingdom Egypt as even a quick glance at the design of the pyramids of Giza, the temples of Luxor and Karnak, and palaces such as Tell el-Amarna will show. It is an elementary but true observation that biblical period architecture reflects in part the geophysical and geopolitical place of the biblical peoples: they inhabited a narrow corridor on which larger societies played out their histories, often leaving little or no room for truly indigenous development, and frequently stifling emerging native life before it had much chance to flower. One result of this feature is a largely eclectic and reflective architecture in many periods. Clear Egyptian influence on temple design and furnishing at Byblos on the Lebanese coast in pre-Phoenician life is paralleled by obvious Canaanite patterns of city defenses, temples, and palaces and later Hellenistic and Roman motifs in everything from city plans (Jerash) to city features (theaters, aqueducts, hippodromes, living quarters, tomb design, temple construction and layout) on both sides of the Jordan Valley.

Canaanite Architecture: The architecture of Middle and Late Bronze Age Palestine (2000–1500 B.C.) was predominantly Canaanite. Although Palestine in that period was nominally under Egyptian control, the Amarna letters from Canaanite city-state monarchs to headquarters in Egypt show that local autonomy was extensive. The main features architecturally were defense walls comprising substantial stone and rubble-filled ramparts, sometimes with an external *glacis* to increase defensive efficiency. Examples are evident at Hazor and Dan as well as Shechem and Megiddo. Gateways were the most vulnerable point in such constructions and so were reinforced with towers or elaborate entrance routes, putting assaulting forces at an additional disadvantage. All of this was successor to some of the massive mudbrick defense walls and gates of the Early Bronze Age (3000–2000 B.C.), such as at Tirzah, though use of stone for major defense construction had been known in the country since Neolithic times in Jericho (ca. 8000 B.C.).

Within the defense perimeter, dominant public buildings tended to be the royal residence and a temple for the local Baal. As with the defenses themselves, construction was usually of large uncut stone, yielding the term "Cyclopean" from the assumption that only a giant like the mythical Cyclops could have maneuvered such rock into place. Palaces tended to be multiroomed with storage and servants' quarters attached. Compared to a structure like the palace at Mari, palaces in the Holy Land were very modest in size and complexity. Debate over the nature of a structure such as the open-court temple (really a palace?) excavated at Shechem indicates a large degree of diagnostic uncertainty as to function for some of these public buildings.

Temples were similarly elementary and seem to be modeled on north Syria designs. The extensive uncut stone altar of Level XIX at Megiddo was rigged with stairs on the east, presumably to allow priestly access for rites, possibly of sacrifice. The unmortared but carefully built stone walls of the Early Bronze Age temple at Ai (et Tell), its plastered interior wall faces, and the saw-cut pillar bases down the center of the nave for roof support all indicate that construction and decorative technique, while elaborate for Palestine, were yet far removed from the upper reaches of the skills of neighboring lands. The Late Bronze Age temple at Shechem, with its fragment of a sacred pillar and mount, and its use of walls the stone foundations of which were 17 feet thick, attests the utilitarian mind that in later biblical tradition attributed the local use of the building to that of treasury as well as shrine (Judg. 9:4), and possibly even of haven (Judg. 9:46).

Fragment of a sacred pillar from the temple at Shechem. Late Bronze Age (1500-1200 B.C.).

Housing for ordinary folk was modest in most periods. One or two courses of stone used as foundations for single or two-storied mudbrick structures may have been one-room units or two- to four-room units incorporating an open or partly roofed courtyard in which the cooking hearth, storage vessels for water, and sometimes other goods were placed. Decoration of such dwellings was modest or nonexistent. Roofs were flat layered earth or crude plaster supported by a framework of timbers sometimes with vertical posts of stone or wood for excessively long spans. The walls may have been faced with mud plaster which, as the roofs, needed annual refacing due to weathering and other wear and tear.

Israelite Achievements: The rise of the Israelites to dominance in the early Iron Age reflects their adoption of Canaanite architecture in reuse of defenses and extremely modest indigenous construction. With the rise of a United Monarchy (tenth century B.C.) and its brief divided survival prior to invasion by Assyria in the eighth century, the flower of Israelite architectural achievement was reached. Credit for this in the biblical record is given to Solomon. His touted achievements include the construction of store-cities (1 Kings 9:19), rebuilt cities (1 Kings 9:17), chariot cities (1 Kings 9:19), special palaces for his wives (1 Kings 9:24) and for himself (1 Kings 7:1), special units like the House of the Forest of Lebanon (1 Kings 7:2–5), the Hall of Pillars (1 Kings 7:6), and the Hall of the Throne (1 Kings 7:7), fortifications for cities (1 Kings 9:15), and most famously the Temple of Yahweh in Jerusalem (1 Kings 6:1–38), reportedly a seven-year project in the construction phase. Of this vast enterprise, nothing has survived archaeologically of the Temple or palace materials, but evidences of the fortifications of cities, both those mentioned (Megiddo, Hazor, and Gezer) and others (like Shechem) have been abundant and are impressive.

Solomonic gateways were constructed of cut stone, usually paved, and rigged with interior step barriers allowing the packing of defenders at each of as many as four internal partitions to

West guardroom of the gate fortification at Gezer, dating from the time of Solomon.

keep people from reaching the interior access gate. The gates were flanked with towers allowing three-way crossfire against intruders. The width of the gate was sufficient only to allow one chariot, or in peacetime one cart, abreast. The skilled stonecutting evident in some of these structures suggests that the lessons learned from the Phoenician craftsmen brought in to build the Temple were applied well and broadly throughout the construction program.

The best example of an Israelite temple is that excavated at Arad. Threefold separation of internal space, an altar of uncut stone and earth, bases of sacred pillars, and two incense altars match numerous biblical descriptions for such design and furnishing.

The palace tradition survived in the facilities built by northern monarchs Omri (885–873 B.C.) and Ahab (873–851 B.C.) at Samaria. Because it was the earliest architecture on the summit and has been overlaid by extensive later construction of Hellenistic and Herodian buildings, little of the palace walls survived. Eloquent testimony to the affluence of the court is given by extensive inlaid ivory decorations, over five hundred fragments of which were recovered. Header-stretcher masonry typical of the Solomonic period was still used extensively, and casemate defense wall foundations illustrate that such a design (found also as widely spread as from Hazor to Tell Beit Mirsim) had been found helpful. It proved insufficient, however, against Assyria's forces at Samaria as well as Hazor and elsewhere.

While the land suffered the ravages of Assyria and then of the Neo-Babylonians under Nebuchadnezzar in the eighth and seventh centuries B.C., architecture declined. The destruction of Jerusalem in 587 B.C. was matched by destructions elsewhere in the land (such as depicted on Assyrian reliefs concerning Lachish). Even under Persia's permissive attitudes toward local societies, in the light of which the Jewish return from Exile and the efforts to reconstitute both state and national shrines took place (late sixth–early fifth centuries B.C.), Israel's struggle was simply to survive.

Herod's Construction: With the Hellenistic influences brought in first by Alexander's conquests, then by the successive domination of the Ptolemies, the Seleucids, and the briefly independent Maccabees, new styles became apparent, made most firmly felt by Roman implementation and those who followed such ideological footprints as Herod the Great (40–4 B.C.). Herodian construction was thoroughly Hellenistic, vividly apparent not only in the surviving foundations of the rebuilt Jerusalem Temple compound, but in port cities like Caesarea and Herod's numerous hideaways, notably at Masada. The painted plaster interior walls, fake fluted column faces (plaster laid over stone plinth cores), extensive water cisterns, and other storage buildings serving his three-level, north-point accommodations at Masada bespoke his love of Roman adaptations of Hellenistic motifs, whether in column capitals or decorative affluence.

Following the defeat of the Jews by Rome in the revolts of A.D. 60–66 and 132–135, Rome's dominance of architectural development both inside and outside Judean territory is obvious. Decapolis cities like Gadara (Umm Qeis in northern Jordan), with a magnificent basalt amphitheater largely intact, and Philadelphia (Amman in central Jordan), with its temple to Jupiter (partly restored) and amphitheater (downtown), match Jerash, with its theaters, colonnaded street, temples, and Hadrian's triple arch, and Baalbek (eastern Lebanon), with its massive pillars of the temple to Jupiter and its better preserved temple to "Bacchus," and show Rome's determination to mark the world with its distinctive architectural visions.

Painted plaster wall and imitation fluted columns in Herod's northern palace at Masada.

The same grandeur is visible in the cities of Asia Minor that figure in Paul's travels. Ephesus (Acts 18:19, 21) was marked by a magnificent library, stadium (even the toilets had marble seats and were constantly flushed with running water in the drain below), public square, and shrine to Artemis. Pergamum (Rev. 1:11; 2:12) enjoyed one of the most powerful temples to Athena and had on its western slope a magnificently acoustic open amphitheater cut into the rock of the mountain. Rome enhanced the city by building a major shrine to Asclepius. These stand as eloquent marks of Rome's adaptations of Greek models, transcended only by some of the monuments in Rome itself. Poignant reminder of the unsuccessful Jewish revolt (A.D. 60–66) was Rome's Arch of Titus, depicting captured booty from the Jerusalem Temple. Tombs of the Roman period are lavishly decorated, with construction in Palestine proper, both east and west of the Jordan, showing family-tomb types with entrances covered by a swinging or rolling stone.

A final word pertains to the distinctive architecture of the Nabateans, found not only at their major headquarters of Petra, with the elaborate cave facades, amphitheater, and the distinctive Robinson High Place shrine, but also at other sites. Their mastery of cantilevered roof and stair construction is most evident at modern Umm al-Jimal in the Transjordan desert, giving vivid proof of a unique interior genius. ***See also*** House; Temple, The; Temples.

R.S.B.

Arcturus (ahrk-toor´uhs), the third brightest star of the Northern Hemisphere (magnitude 0.2). In place of Arcturus (LXX, KJV), RSV translates "Bear" (Job 9:9; 38:32). It is part of constellation Boötes and is in line with the tail of Ursa Major (Great Bear), whence the associated name. Orange colored, it is about forty light-years from the sun.

Ard (ahrd). **1** One of the sons of Benjamin (Gen. 46:21). **2** The son of Bela and grandson of Benjamin (Num. 26:40), called (erroneously?) Adar in 1 Chron. 8:3.

Areopagus (air´ee-op´uh-guhs; Gk., "hill of Ares"), a low hill in Athens northwest of the acropolis. The hill had stone seats for the council that met there, the origins of which went back to the advisory council of Athenian kings. Though the council's political power had declined by the fifth century B.C., it retained jurisdiction over cases of homicide. Paul is said to have spoken on the Areopagus (Acts 17:19, 22) and converted a member of the council, Dionysius (Acts 17:34).

Aretas (air´uh-tuhs) **IV,** Nabatean king who greatly expanded his kingdom (9 B.C.–A.D. 40). His governor attempted to seize Paul in Damascus (2 Cor. 11:32). ***See also*** Nabatea, Nabateans.

Argob (ahr´gob; Heb., "a mound [clod] of earth" or possibly "an area of hills"). **1** A specified region east of the Jordan, either an area within Bashan or simply another name for it. Its precise location is not known. It was identified as the kingdom of Og containing sixty cities and captured by the Israelites before crossing the Jordan (Deut. 3:4). The territory was given to the half-tribe of Manasseh whose leader, Jair, renamed it Havvoth-Jair ("the cities of Jair"; Heb., Deut. 3:13–14). **2** In the Masoretic Text of 2 Kings 15:25, Argob and Arieh are given as co-conspirators with Pekah in the assassination of King Pekahiah of Samaria. But since these are both place names, they are probably misplaced from the listing of territories captured by Tiglath-pileser in the following verses (2 Kings 15:29). ***See also*** Bashan D.R.B.

Ariel (air´ee-uhl). **1** One of the leading men summoned by Ezra (Ezra 8:16). **2** In 2 Sam. 23:20 (1 Chron. 11:22), either a personal name or a common name meaning "heroes" or "altar hearths." **3** A word correctly translated "altar hearth" in the unambiguous context of Ezek. 43:15–16; it probably has the same meaning in the Moabite inscription of king Mesha. **4** A poetic designation for Jerusalem, apparently derived from the presence of Yahweh's main altar there (Isa. 29:1–2). The plural, translated "valiant ones" in the RSV (Isa. 33:7), probably means "inhabitants of Ariel." J.J.M.R.

Arimathea (air´uh-muh-thee´uh), a hellenized form of the Hebrew *Ramathaim, Ramoth, Ramah;* home of Joseph who buried Jesus in his own tomb (Matt. 27:57–60; Mark 15:42–46; Luke 23:50–53; John 19:38–42). Arimathea is variously identified with modern Rentis (fifteen miles east of Jaffa), er-Ram (five miles north of Jerusalem), or el-Birah-Ramallah (eight miles north of Jerusalem). ***See also*** Joseph.

Arioch (air´ee-ok). **1** The king of Ellasar who, in alliance with the kings of Shinar, Elam, and Goiim, raided the area around the Dead Sea, including Sodom and the Cities of the Plain, and took Lot prisoner. He and the other kings were defeated by Abram and his allies (Gen. 14:1–16). **2** The captain of King Nebuchadnezzar's guard who was instructed to kill all the wise men of Babylon because they could not

interpret the king's dream. He later brought Daniel before the king (Dan. 2:14–15; 24–25).

Aristarchus (air´is-tahr´kuhs), according to Acts a native of Thessalonica and a companion of Paul in Ephesus, on the final trip to Jerusalem, and on the voyage to Rome (Acts 19:29; 20:4–5; 27:2). It was very probably the same Aristarchus who was Paul's fellow prisoner, perhaps in Ephesus (Philem. 24; cf. Col. 4:10).

ark, a container of indeterminate size. In the OT, "ark" translates two Hebrew words, *tebah* and *aron,* both of which mean "box" or "chest." The former is used only for Noah's ark (Gen. 6–9) and for the ark of bulrushes in which Moses was placed (Exod. 2:3, 5). The latter designates a coffin (Gen. 50:26) and a chest (2 Kings 12:9), but it is usually employed for a religious object, called the Ark of Yahweh or the Ark of God in early sources, the Ark of the covenant in typically Deuteronomic language (Deut. 10:8), and the Ark of the testimony in priestly material (Num. 4:5).

Originally, the characteristic feature of the Ark was that it could be carried about. Portable shrines are known from Egypt and Mesopotamia and also from Canaan, where examples have been found decorated with cherubim, like those that eventually sheltered the Israelite Ark (1 Kings 8:6–7). The pre-Islamic Arabs had a portable tent-shrine, the *qubba,* which contained two sacred stones, was in the charge of a religious officiant, was used for divination, and was taken into battle. The Israelite Ark led the people in the desert (Num. 10:33), was carried round the walls of Jericho (Josh. 6), and was brought into the camp during military operations (1 Sam. 4:2–4). It was kept in a tent (2 Sam. 6:17) with an attendant (1 Sam. 7:1) and used for oracular inquiries (1 Sam. 14:18). According to biblical tradition, the Ark contained the two tablets of the law (Deut. 10:2, 5), but the wording of 1 Kings 8:9 suggests that it may once have held something else, perhaps the two stones that formed the sacred lots, Urim and Thummim.

The most striking fact about the Ark at an early period was that it was a direct manifestation of God's presence and was virtually identified with him. Moses addressed the Ark as God (Num. 10:35–36), the Philistines equated the Ark with a god (1 Sam. 4:6–8), and those who desecrated the Ark were struck down by its divine power (1 Sam. 6:19; 2 Sam. 6:6–7). When we find the expression "before God" in a sanctuary context, this often seems to refer to the Ark.

It is possible that at one time various sanctuaries each had their own Arks, but the one that becomes central in the OT is that of the Shiloh temple, where it had probably already become a national symbol of the tribal confederacy. From the so-called history of the Ark (1 Sam. 4:1–7:2), we learn of its capture by the Philistines, its devastating power in their territory, its triumphant return to Israel, and its concealment at Kiriath-jearim for some twenty years of Philistine occupation. After defeating the Philistines, David brought it from there and installed it in his new capital, Jerusalem, as part of his policy of uniting the tribes under his rule (2 Sam. 6). This event was probably reenacted annually, with Psalm 132 as the liturgy of the festival.

A decisive step in the story of the Ark came when it was transferred into the Holy of Holies of Solomon's new Temple (1 Kings 8:4–7). From this time onward, it remains stationary and is viewed as a throne, on which God sits as an invisible deity above the two guardian cherubim (2 Kings 19:15). The belief that God resided permanently in the darkness of the Holy of Holies (1 Kings 8:12–13) led to the doctrine of the inviolability of the Temple and Jerusalem.

The Ark was destroyed or captured in the Babylonian sack of Jerusalem in 586 B.C. Whether there was one in the second Temple is uncertain. In Jer. 3:15, which may well be postexilic and is the only reference to the Ark in all the prophetic literature, Jerusalem replaces the Ark as God's throne. There is no mention of the Ark in the detailed vision of the new temple in Ezekiel 40–48, and a later Jewish legend tells of its being hidden until a remote future at the time of the Exile (2 Macc. 2:4–8). On the other hand, there is an Ark in the Priestly account of the tabernacle, which is in many respects an image of the Second Temple; in any case, the Ark holds an important place in Priestly theology. By now it has become an elaborate, gold-plated object (Exod. 25:10–15). But it is only a container for the "testimony," the tablets of the law (Exod. 25:16), and interest is focused on the gold "mercy seat" or cover on top of it. This is now God's throne, where he appears in a cloud (Lev. 16:2) to communicate his will (Exod. 25:17–22). As the Hebrew term *kapporeth* suggests, this

Wagon, which may be a depiction of the Holy Ark, carved in a lintel at the second–early third century synagogue at Capernaum.

was also the place where atonement was made, supremely by the sprinkling of blood on the Day of Atonement (Lev. 16:14–16). It is this representation of the Ark that is found in Heb. 9:3–5 (cf. Rom. 3:25), which also reflects later Jewish tradition that, as well as the tablets of the law, it contained the manna (Exod. 16:33–34) and Aaron's miraculous rod (Num. 17:10). ***See also*** Cherub; Tabernacle; Urim and Thummim.

Armageddon (ahr′muh-ged′uhn; Heb., "Mount Megiddo"). The word occurs only in Rev. 16:16 as a Greek transliteration of the term claimed to be Hebrew. It represents the location of the final cosmic battle of the forces of good and of evil, according to the apocalyptic view of the writer. However, no such term appears elsewhere in Hebrew, and there is no mountain known to ancient or modern geographers by that name. The spelling of the term differs in various manuscripts (Harmagedon, Armagedon, Maged[d]on). Translations suggested therefore have included "city of Megiddo," "land of Megiddo," "mount of assembly," "city of desire," and "his fruitful mountain."

Megiddo, situated at the north end of the major pass through the Mount Carmel range where the coastal road moved up from the south into the Plain of Esdraelon, was the site of many well-known ancient battles (Deborah and Barak versus the Canaanite king Sisera, Judg. 5:19; Jehu versus Ahaziah, 2 Kings 9:27; Josiah versus Neco, 2 Kings 23:29). The archaeological data reinforce the literary portrait in showing frequent extremely heavy defense facilities at the site. It may have appeared, therefore, an excellent symbol to the apocalyptic writer for the ultimate conflict he saw as the culmination of history. R.S.B.

armory, a weapons storage facility, real or metaphoric. 2 Kings 20:13 (see also Isa. 39:02) describes King Hezekiah's showing his armory in Jerusalem to the Babylonian emissaries as part of his psychological warfare. Neh. 3:19 makes incidental reference to a similar, if not the same, facility. Jer. 50:25 metaphorically refers to the Lord's opening his armory in the conflict against Babylon.

arms, armor, implements for war. The vocabulary for arms in the Bible is used in contexts ranging from literal description to metaphor. Already in Gen. 14:13–16 there is an account of Abraham's retainers, or trained men, whose success in battle presupposes their efficient use of arms. In tribal societies like that of early Israel arms consisted of spears, swords, sling stones, and bows and arrows. Armor is known from Egyptian reliefs from the mid-second millennium B.C., but it is first referred to in Israel when Saul offered David his armor to use in the upcoming combat with Goliath. The Philistine's own armor was considerable: a bronze helmet, a bronze coat of mail, and bronze leglets or greaves. In addition, he carried a sword and a spear and was accompanied by a shield bearer (1 Sam. 17:5–7).

All of Goliath's armor except the greaves was paralleled among Israelite forces. Ahab had a coat of scales (mail) according to 1 Kings 22:34, and apparently construction workers rebuilding Jerusalem during Nehemiah's governorship wore protective armor (Neh. 4:16). To protect themselves these workers also had spears, shields, and bows. Bronze armor was used for royalty, but leather for shields and perhaps body armor was more common for foot soldiers.

Armor is mentioned often in contexts other than war or narrative description. It can be the subject of a proverbial saying (1 Kings 20:11), the object of God's power (Ps. 46:9), and arms transformed can be the basis for a new social order (Isa. 2:1–4; Mic. 4:1–5). Thus NT writers had some precedent for such metaphorical language as the "full armor of God," which includes such things as the "breastplate of righteousness" and the "helmet of salvation" (Eph. 6:13–17), and the word of God being "sharper than any two-edged sword" (Heb. 4:12).

Jesus' references to arms are few but not without surprises, as evidenced by his somber proverb concerning those who wield swords (Matt. 26:52), the nature of his mission (Matt. 10:34), or his sarcasm over the sword's effectiveness (Luke 22:38). In Rev. 1:16 the risen Christ is described as one from whose mouth extends a sword, a metaphor for his role in carrying out divine vengeance and judgment. J.A.D.

army, an organized fighting force. Although there was no standing army in ancient Israel until the monarchy, Abraham rallied 318 followers to rescue his relatives who had been captured by a coalition of kings (Gen. 14). Loosely bonded clans also cooperated against a common foe (Exod. 17:8–13). In the tribal federation a people's militia served the Lord of Hosts (Heb. "Yahweh Sabaoth") on call by a leader, judge, or field commander. The local muster unit (as few as six men) was, in Hebrew, the *'aleph* (easily confused with the word for "thousand," which has the same spelling). God was commander-in-chief of the army; his divine will was ascertained by oracles.

Saul added a bodyguard of "three thousand" (three exceptionally large units?) responsible to himself and Jonathan, and later to Abner, as commander (1 Sam. 13:2; 17:55). Abner's counterpart under the reign of David was Joab. Mer-

cenaries in David's bodyguard (2 Sam. 8:18; 15:19–22) supported the southern throne, in contrast with a tumultuous dynastic sequence in the north. Solomon introduced chariotry. Under the monarchy the army became highly organized, and warfare was greatly routinized.

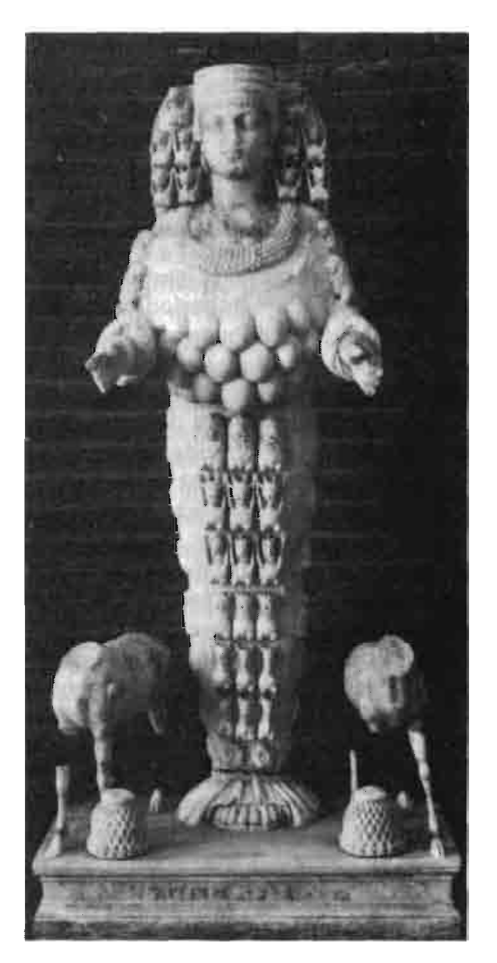
After the fall of the two kingdoms (Israel in 721 B.C., Judah in 587 B.C.), only foreign armies appear in the OT, until guerrilla warfare (Maccabees) achieved national independence ca. 165 B.C. The new standing army included Jewish and non-Jewish soldiers. Herod the Great patterned his organization on Roman models, with mercenaries from as far away as Germany and Gaul. Roman features are also evident in the description of the army found in an apocalyptic text from the Dead Sea sectarians, the so-called *Scroll of the War of the Sons of Light against the Sons of Darkness.* Although the NT recalls OT feats of arms (Heb. 11:34), the armies mentioned are either Roman (Luke 21:20; see Acts 23:27) or supernatural (Rev. 9:16; 19:14, 19). R.B.

Arnon (ahr´nuhn), **the River** (modern name Wadi el-Mojib), a river whose water flows from the east into the Dead Sea at about the midpoint of its eastern shore. As a deep gorge, it made north-south travel difficult in Transjordan. The river has a substantial northern tributary that flows southwesterly and feeds into the main artery of the river just before the main channel empties into the Dead Sea. Dibon, the Moabite capital under Mesha, is located north of the main branch but south of the northern tributary. On several occasions the Arnon is mentioned as a boundary (Num. 21:24; Judg. 11:18; Deut. 3:8, 16; Josh. 13:16). It is also mentioned in line 26 of the Mesha Inscription. ***See also*** Moabite Stone, The. J.A.D.

Aroer (uh-roh´uhr). **1** A fortress on the Arnon River's northern rim, the southern limit of Amorite (Deut. 2:36), Reubenite-Gadite (Deut. 3:12), Davidic (2 Sam. 24:5), and Syrian (2 Kings 10:33) activities in Transjordan. Excavations at modern Khirbet Ara'ir have uncovered fortifications from Mesha's day (mid-ninth century B.C.; cf. Moabite Stone). The last reference to Aroer identifies it as Moabite (Jer. 48:19–20). **2** A town in southern Judah (1 Sam. 30:28), modern Khirbet Ar'areh. **3** An Ammonite settlement near Rabbah (Josh. 13:25). ***See also*** Arnon, The River; Gad; Mesha; Moab; Moabite Stone, The; Reuben.

Arpachshad (ahr-pak´shad), the name of the son of Shem born after the Flood and grandfather of Eber, in the line of Abraham (Gen. 11:10). The term is probably geographic in origin. Context suggests it was in Mesopotamia, and later tradition locates it near Babylon; however, the exact reference is not known.

Arpad (ahr´pad), a city and small state in northern Syria; the site may be Tell Rifaat, or Tell Erfad, twenty-five miles north of Aleppo. It is linked with Hamath in the question, "Where are the gods of Hamath and Arpad?" (2 Kings 18:34; Isa. 36:19). Similarly, Hamath and Arpad are paired with other cities in a question of the power of their kings (2 Kings 19:13; Isa. 37:13). Their destruction is noted in Isa. 10:9, and in Jer. 49:23 they figure in an oracle concerning the impending destruction of Damascus. Destruction of Arpad's independence came with its fall to Assyria in 740 B.C., after which it never regained power.



Arphaxad (ahr-fak´sad). ***See*** Arpachshad.

Artaxerxes (ahr´tuh-zuhrk´seez; Heb. *Ar-takhshast*), the name of four known Achaemenid (Persian) kings: Artaxerxes I (Longimanus), 465–424 B.C.; Artaxerxes II (Arsakes), 405/4–359/58; Artaxerxes III (Ochos), 359/58–338/37; Artaxerxes IV (Arses), 338/37–36. Identifications of these kings in the OT text depend on historical probability. The name appears in Ezra 4:7, 8, 11, and 23, in a composite passage that is out of chronological context (4:6–23); 4:8–23 refers to appeals to Artaxerxes against Jewish activity in Jerusalem. The usual assumption is that all these refer to Artaxerxes I. Ezra 6:14 adds Artaxerxes after Cyrus and Darius in a list of Persian rulers. Ezra 7:1–8:1 has several references, all to the period of Ezra's activity. Scholarly opinion is divided between Artaxerxes I and II. Neh. 2:1; 5:14; and 13:6, connected with Nehemiah's two periods as governor, are most often held to refer to Artaxerxes I, though Artaxerxes II cannot be ruled out. Persian desire to control Egypt may have provided the political context for the appointment of both Ezra and Nehemiah regardless of which Persian ruler was responsible. ***See also*** Ezra; Nehemiah, The Book of. P.R.A.

Artemas (ahr´tuh-muhs), a companion of Paul mentioned only in Titus 3:12. ***See also*** Tychicus.

Artemis (ahr´tuh-mis) **of the Ephesians** (KJV: "Diana"), a goddess widely worshiped in antiquity throughout the Hellenistic and Roman world. Although identified with the Greek Artemis (and the Roman Diana), the sister of Apollo, the Ephesian Artemis had little in common with those deities of classical mythology. Rather, she was more the ancient Anatolian and Asian mother goddess known also as Cybele, Atargatis, and Ashtoreth—a patroness of nature and fertility.

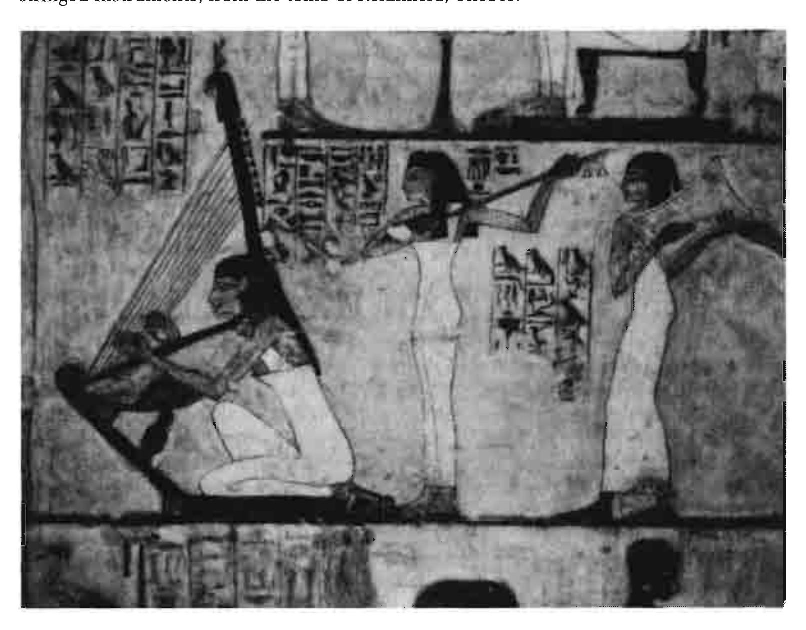
The cult of the mother goddess in a primitive shrine near the mouth of the Cayster River at the northern foot of Mt. Pion in western Asia Minor long antedated the settlement of the first Greeks in the area ca. 1000 B.C. Acts 19:35 refers to a "sacred stone that fell from the sky," possibly a meteorite, but the image of the goddess known in NT times appears to date only from the fourth century B.C.

Ancient cultic statue of Artemis of the Ephesians.

The goddess is portrayed with numerous breasts (eggs?) as symbols of fertility, a turret crown, and a long skirt with bands of animals and birds in relief. She is often accompanied by dogs or stags on either side, probably due to the syncretism with the original Greek Artemis.

The earliest Greek shrine, consisting of two platforms, was eclipsed ca. 600 B.C. with the construction of the Archaic Artemision, or Temple of Artemis, over the site. The Cretan architect Chersiphron constructed a massive temple (375 × 180 feet) with 60-foot marble columns, the work being completed ca. 500 B.C. This temple burned on the night of Alexander the Great's birth in 356 B.C., but a new Artemision was soon begun by the architect Dinocrates and completed ca. 250 B.C., one of the Seven Wonders of the World. It was destroyed by the Goths in A.D. 263 and practically nothing of it remains today.

Opinion varies concerning the miniature shrines that provided the livelihood of Demetrius and his fellow silversmiths (see Acts 19:23–41), as to whether they represented the original primitive shrine or the Hellenistic Artemision. The struggle between the followers of Christ and of Artemis continued even after the destruction of the Artemision, according to a fifth-century inscription mentioning the replacement of a statue of the goddess by a cross. ***See also*** Asherah; Demetrius; Ephesus; Paul; Shrine; Smith; Syncretism. M.K.M.



artificer. ***See*** Craftsman.

Art in the Biblical Period

WHILE THE BIBLICAL PERIOD properly extends from at least the Middle Bronze Age (2000–1500 B.C.) to the Greco-Roman period of the first century A.D., the artistic influence that affected Palestine was fundamentally Eastern, not Western. Therefore, the focus of this article is primarily on art in the ancient Near East, especially in Egypt and Assyria-Babylonia. Just as these major civilizations dominated the economics and politics of Syro-Palestine, they provide the backdrop against which Israel's art and that of its neighbors must be seen.

Egyptian Art: Egyptian theology determined the style and content, as well as setting, for Egyptian art. From the beginning, Egyptian art is characterized by a conceptual rather than a visual approach. The pharaoh, who was both god and man, was always depicted as larger than any other figure. His shoulders were always seen from the front, because artists had to show the fullness—the completeness—of the pharaoh. Egyptian artists were capable of the necessary technique of foreshortening and could have shown the pharaoh from a side view, but that would not have fulfilled the requirement of indicating the conceptual reality of the god-king. The slate "Palette of King Namur" (ca. 3100 B.C., now in Cairo) shows the pharaoh more than twice the size of his servants and soldiers. This work of art also gives us the

Ancient Egyptian banquet scene. Female musicians with harp and stringed instruments, from the tomb of Rekhmera, Thebes.

key to the visual analysis of Egyptian art: it is always linear and formal, even when illustrating everyday scenes. Because of this approach, the linear and the conceptual, the Egyptian artists did not need to concern themselves with three-dimensional space. Seen in this way, Egyptian art illustrates and explains the continuity of Egyptian civilization.

The major repositories of art from the Old Kingdom (ca. 2700 B.C.) to the eve of the Hellenistic period (ca. 350 B.C.) are tombs and temples. Art and architecture served the needs of the afterlife, primarily for the pharaoh, the divine king, and his family, but also for nobles and ordinary citizens. The earliest tombs, from which the later step pyramids probably developed, were low, squat mastabas, rectangular brick structures comprised of many internal compartments built over the actual subterranean burial chamber. Since these tombs were also temples, the structure provided for a chapel and niche for a statue of the deceased and offering tables upon which gifts for the spirit of the deceased could be placed. The walls of the tomb-temple were covered with bas-reliefs and paintings depicting scenes from the life of the deceased. By the New Kingdom (1550–1100 B.C.) rock-cut chambers had been adopted as burial places for kings and commoners, and the kings were buried, for security reasons, at some distance from their mortuary buildings, which were now magnificent temples dedicated to the memory of the divine king and the supreme god, Amon.

Like the buildings, the bas-reliefs and paintings that adorn the New Kingdom tombs had developed from the rather austere scenes of the Old Kingdom, in which the deceased was depicted receiving offerings from the devout who paraded before him on horizontal registers in rather lifeless, frozen form. The New Kingdom scenes depict luxurious living; the offering scene has become a banquet. By contrast with themes painted elsewhere in the ancient Near East, Egyptian artists rendered events from the private and family life of the deceased, including fishing or hunting trips, dances, and games. Boldly the artists projected these scenes of enjoyment and pleasure, drawn from this life, into the next life, so that past and future were fully merged on the tomb walls.

Bust of monumental statue of the ancient Egyptian pharaoh Akhenaton, from Karnak, fourteenth century B.C.

Statuary, like painting, also served the cause of the next life. In the Old Kingdom, the statues were designed to represent the deceased, providing a perpetual image with which the spirit of the deceased could be identified. This task gave the statuary its distinctive character: it had to offer an ideal representation, since the pharaoh was also a god, and yet the image had to be personal, identifiable with the dead king whose memory it preserved. Egyptian artists succeeded to a remarkable degree in this effort to create individuality and personality within rather rigid formal constraints. By the New Kingdom, statuary had become merely monumental, official memorials to the deceased. Style was basically continuous with the Old Kingdom until the reign of Akhenaton (1369–1353 B.C.), whose radical concern for realism broke the tension with the ideal form, resulting in a kind of caricature that went beyond the limits of "realism," exemplified in some thirty statues of this apostate pharaoh found at Karnak. Akhenaton's successors returned to the classical style, yet the effect of the brief revolu-

tion in style was not altogether lost. The return to the classical style, however, was more characteristically marked by a penchant for elegance, often devoid of inspiration.

Minor arts from Egypt, of which we have some fine examples, include wood furniture from as early as the Old Kingdom, glassware from the Middle Kingdom onward, and well-modeled bronzes, and fine jewelry.

Bronze head of a king, possibly Sargon of Akkad, from Nineveh, third millennium B.C.

Assyrian and Babylonian Art: Assyrian art is the heir of Sumerian invention from the third millennium B.C. The sense of struggle against a hostile environment, fraught with threats both natural and supernatural, from which protection must be sought by placating the gods and fielding an army dominates artistic style and content. The confident celebration of life so prominent in Egyptian art is absent from that of Mesopotamia. Here one senses the significant distance between the gods and humankind. The king is not divine but can only hope for the favor of the gods, before whom he, as all others, must bow.

Ziggurats or "temple towers" continued in the Assyrian period to exemplify the distance between earth and heaven. They were attached to a number of temples, though not all, and graphically represented the mountain home of the Assyrian storm god. The Assyrian architecture seems to have modified the earlier forms by removing the open, external stairways to the top in favor of a less obvious means of approach, in some cases directly from a neighboring temple roof.

At the center of Assyrian cities, however, stood the royal palace. Again developing a Sumerian model, the palaces of the great kings multiplied the courtyards and adjoining buildings enclosed within the complex. The palace at Mari, for example, dated to the beginning of the second millennium B.C., included more than two hundred and sixty rooms and courtyards spread over some 6 acres.

The palace provided the setting for the type of art most characteristic of Assyria: the low relief. Beginning in the ninth century B.C., when Ashurnasirpal II moved the capital from Assur to Nimrud, Assyrian artists began to fill the walls of the palace rooms with reliefs. Authorities generally regard this innovation as the greatest and most original achievement of Assyrian art. The subject of these carved friezes was the king and his exploits, particularly his victories over ever rebelling vassals. The power of the king was conveyed by the sheer overpowering experience of being completely surrounded by reliefs depicting the

Ashurbanipal hunting lions from his chariot: bas-reliefs at Nineveh.

unending accomplishments of the monarch. In the beginning, these friezes were usually about 7 feet high, sometimes the whole surface being covered in a single design. More often, however, the wall was divided into two registers, separated by a band of cuneiform inscriptions. In later buildings, for example, Sargon's palace at Khorsabad (late eighth century B.C.), individual sculptured figures even reach a height of 9 feet. These huge figures are more representational than narrative, as they march in awesome procession—the king and his courtiers—defying any challenge to authority and disparaging any doubt about the stability of the throne. For the most part, however, the wall reliefs were intended to function as narrative art, depicting in stone what the annals attested in writing. The work was highly detailed and skillfully planned, marked by stylistic vitality, especially in the depiction of animals where musculature and a sense of motion were well developed.

Winged sphinx. Carved ivory and gold from Nimrud, eighth–seventh century B.C.

During the reign of Shalmaneser III (858–24 B.C.) this new relief style was applied to metal work. The huge doors of a palace near Nimrud were covered with horizontal bands of bronze, each 11 inches in height and 8 feet in length. The subjects of these reliefs, like their stone counterparts, were historical; processional scenes were particularly well suited to the narrow registers.

Not all the themes of the Assyrian mural reliefs were military. From the time of Assurbanipal (668–627 B.C.) we have magnificent hunting scenes, vividly portraying dramatic action, with full, sensitive expression of the suffering and death of the victims as well as the power and prowess of the hunter. A comparison of the "Lion Hunt" scenes of Ashurbanipal at the end of the Assyrian period with a similar portrayal of Ashurnasirpal II at the beginning of the period reveals just how well developed and mature the art of relief sculpture had become over two centuries of refinement.

Statuary in Assyria was relatively insignificant, continuing the cylindrical style and impersonal features of Sumerian sculpture. The exception is a kind of statuary that is neither relief nor "in the round." Stone slabs, called "orthostats," were set in the entryway to Sargon's palace and the citadel at Khorsabad and carved into winged, human-headed bulls. Those at the citadel were 13 feet high and 14 feet long, and they stared menacingly at all who approached the precincts. They were protective guardians, like their much earlier Hittite predecessors, the lion orthostats at Boghazköy.

Ishtar Gate, two mythical creatures. Enameled tile and ceramic brick reconstruction of the processional entrance to Babylon during the time of Nebuchadnezzar, sixth century B.C.

The Dying Lioness, bas-relief at Nineveh, seventh century B.C.

Lion orthostat from the temple at Hazor, probably Late Bronze Age (1500–1200 B.C.).

Among the minor arts represented in Assyria, most notable are cylinder seals, which show the same care for detail and preference for animals and landscape as the reliefs. In the late period, stamps were also molded, but their designs offer nothing new. Cylinder seals remained dominant, providing rich opportunity for personal design and expression. Finally, there are ivories, sculptured and engraved, reflecting exquisite skill and precision. The Nimrud ivories are perhaps the best-known examples. Their style and content, however, raise a difficult question concerning whether they really represent Assyrian art or, as appears more likely, the distribution throughout the empire of Phoenician ivory.

Babylonian art from the sixth century B.C. did not continue the Assyrian style. Instead, it appears to return to the style of pre-Assyrian days, reviving the southern Mesopotamian traditions. Buildings were mud-brick, ornamented with glazed bricks upon which huge bulls and dragons were depicted in bright colors. These beasts, however, by contrast with the gate-guardians of the Assyrians, were purely decorative, as their profile images attest, for example, on the Ishtar Gate. Notably, too, Babylonians provide us with an example of figures in true profile, as seen on the boundary stone of Marduk-apalaiddina (714 B.C.). Finally, we have cylinder seals and a number of rather artless terracottas from the period of Nebuchadnezzar.

Syrian and Palestinian Art: The style and content we met in Egypt or Mesopotamia occur again in Syria and Palestine. Since the area provided the corridor for trade and warfare between East and West, it should come as no surprise to find that the art of the region betrays the influence of the dominant cultures. To be sure, artistic efforts did not merely ape their sources. For example, figurines are more narrow-shouldered than their Egyptian counterparts and generally less sub-

Judean royal stamp-seal impression with symbol of a solar disk with wings, seventh century B.C. At top are the letters *lmlk* and below, the place name *zp*, "Ziph."

stantial. A stele portraying the weather god found at Ras-Shamra (Ugarit) shows the figure with raised arm in a gesture depicting victory, typical of Egyptian reliefs, yet the god wears typical Syrian garb, including a horned cap symbolic of his divinity.

Large statuary of human figures is rare, but statuettes depicting fertility figures are numerous. These are typically nude female figures with exaggerated breasts and, often, hands raised toward the breasts. The orthostat animal sculptures of the Hittites have already been mentioned. Stone carving of excellent quality has also been found in the Late Bronze Age temple at Hazor. Relief carving is also plentiful, and especially noteworthy is a finely worked golden dish from Ras-Shamra bearing a hammered design of a hunter riding his chariot in pursuit of wild bulls and gazelles.

Golden dish from Ras-Shamra, detail of a hunter in his chariot pursuing a wild bull, fourteenth century B.C.

Finally we may speak briefly of Israelite art. Like the rest of Syro-Palestine, Israel drew her artistic efforts from Egyptian and Mesopotamian models. As elsewhere in the ancient Near East, religious conviction determined the character and extent of Israelite artistic enterprise. Since the Torah expressly forbade the shaping of images and idols, the subjects that dominated sculpture and painting among its neighbors were not available to Israel. All that remains that may be described as Israelite, in fact, are minor arts, namely, ivories and stamp seals. Seals were particularly numerous and clearly show Egyptian influence in subject matter, being decorated with griffons, sphinxes, scarabs, and solar disks with wings. These seals were purely decorative, as the frequent inclusion of the owner's name indicates. They were mostly scarab in shape, in imitation of the Egyptian beetle, and made of semiprecious stones. Name seals, without any pictorial representation, have been found almost exclusively in Judah.

Two winged genii with Horus in the center on a lotus. Ivory plaque from Arslan Tash, northern Syria, eighth century B.C.

Ivories have been found at Megiddo, Samaria, and Hazor. The dominant influence on these pieces, too, was Egyptian, as the examples from Samaria showing a cherub astride a plant and the child-god Horus crouching upon a lotus indicate. The style of these ivories is Phoenician, and we may be sure that they have come to Israel through that well-attested channel of trade and technical expertise (see 1 Kings 5–10).

The discovery of Astarte figurines in sites as separated as Megiddo and Hebron confirms the prophets' protest against the popularity of the "Queen of Heaven" as a fertility figure in Israel (Jer. 7:18; 44:17–19, 25). Some statuettes show influence from Egypt, with Astarte holding lotus flowers; others reflect a Babylonian style represented by the inclusion of a tiara.

Though nothing remains of Solomon's Temple, a detailed description of its floor-plan and furniture is provided by biblical tradition. Moreover, the tradition makes no claims to originality in this architectural effort; Solomon relied on Phoenician expertise. The resulting rectangular, tripartite plan was already well known in Egypt.

Arumah (uh-*roo*ˊmah), the town where Abimelech, temporary king of Shechem, resided (Judg. 9:31, 41). It was probably modern Khirbet el-Ormeh, about five miles south and slightly east of Shechem and about seven miles north and slightly east of Shiloh.

Arvad (ahrˊvad), a north Phoenician island city located two miles from shore about 125 miles north of Tyre, known today as Ruad. Its inhabitants are listed among the pre-Israelite descendants of Canaan (Gen. 10:18) and are mentioned in Ezek. 27:8, 11 as having served under Tyre. The city is also known to have existed in Hasmonean times (1 Macc. 15:23).

Asa (ayˊsuh), the fifth king of the Davidic dynasty. Asa ruled Judah for a comparatively long period, ca. 913–873 B.C. In the beginning, his grandmother Maacha (a daughter of Absalom) probably acted as regent. The continual border conflicts between the Northern Kingdom, Israel, and Judah in the region of the tribe Benjamin, which are clear evidence of the extent to which the disruption of Judah and Israel after Solomon constituted a national trauma, did not come to an end. Asa's main opponent was Baasha, who ruled in Tirzah ca. 909–886. When this king of Israel fortified the strategically situated Ramah (only five miles north of Jerusalem) and thus tried to impose a blockade on the Judean capital, Asa decided to have recourse to the treasury and to call upon the help of Ben-hadad I, the king of Damascus. The plan succeeded, for Ben-hadad's army played havoc in Galilee and Baasha was forced to retreat. In his turn, Asa enlarged the villages of Gebah and Mizpah (a few miles east and north of Ramah, respectively) and rebuilt them as fortifications. The editor of the book of Kings appreciated Asa as a strict worshiper of Yahweh who forbade the fertility cults of Asherah and Baal (see 1 Kings 15:9–24). ***See also*** Baasha; Ramah.

J.P.F.

Asahel (asˊuh-hel). **1** David's nephew (1 Chron. 1:13–16), killed by Abner (2 Sam. 2:18–23), buried in Bethlehem (2:32). He served in David's royal bodyguard (23:24). **2** Judean Levite under Jehoshaphat (2 Chron. 17:8). **3** Temple overseer under Hezekiah (2 Chron. 31:13). **4** Jonathan's father during Ezra's administration (Ezra 10:15).

Asaiah (uh-zayˊyuh). **1** Servant of Josiah, commissioned, with others, to inquire of the Lord concerning the book of the law that had been found (2 Kings 22:12, 14; 2 Chron. 34:20), probably an early version of Deuteronomy. **2** A family leader in the time of King Hezekiah in Judah (1 Chron. 4:36). **3** A Levite and Merari clan member, son of Haggiah (1 Chron. 6:30; 15:6, 11). **4** A Shilonite (Shelonite?) descendant of a returnee from Babylon (1 Chron. 9:5).

Asaph (ayˊsaf; Heb., "collector"). **1** The father of the Joah who was recorder in the court of King Hezekiah of Judah (727–698 B.C.; 2 Kings 18:18). **2** A musician who was among those whom David appointed to oversee music in worship (1 Chron. 6:39), and who sang at the dedication of Solomon's Temple (2 Chron. 5:12). A number of psalms were also attributed to him (Pss. 50, 73–83). **3** A Levite whose descendants lived in Judah after the Exile (1 Chron. 9:15). **4** A Levite whose descendants served as gatekeepers in the Temple (1 Chron. 26:1). **5** The keeper of the forests of King Artaxerxes of Persia, who was commanded by royal letter to furnish timber for Nehemiah's restoration of the Temple (mid- to late sixth century B.C.; Neh. 2:8).

ascension of Christ, the, the risen Jesus' departure into heaven after his final appearance to his disciples. It is described only in Acts 1:2–11, although there may be a different and shorter version in Luke 24:50–51 and allusions to it elsewhere in the NT (e.g., John 6:62; 20:17; Eph. 4:8–10). In the setting of Acts, the ascension is preparatory to the sending of the Spirit at Pentecost (2:1–4). The forty-day interval (1:3) is probably symbolic, as this number is frequently used to denote indefinite periods of time. The setting for the ascension has traditionally been regarded as the Mount of Olives. For possible OT precedents, note the "translation" of Enoch (Gen. 5:24) and the "assumption" of Elijah (2 Kings 2:1–14); in the intertestamental period, similar stories appeared regarding other ancient figures. ***See also*** Elijah; Enoch; Holy Spirit, The; Olives, Mount of; Pentecost; Resurrection. J.M.E.

Asenath (asˊuh-nath), the daughter of Potipherah, priest of On (Heliopolis) in Egypt. Pharaoh gave her in marriage to Joseph (Gen. 41:45). Their two sons were Manasseh and Ephraim (Gen. 41:50–52; 46:20).

Ashan (ayˊshuhn), a city in the southern lowlands of Judah, first given to the tribe of Judah (Josh. 15:42) and later reassigned to the tribe of Simeon because they were unable to conquer the territory originally given to them (Josh. 19:7). It is possibly the same city listed as a city of refuge and given to the Levites (1 Chron. 6:59), although it is elsewhere called Ain (Josh. 21:16). The site is not known.

Ashbel (ashˊbel), the (second?) son of Benjamin (Gen. 46:21; 1 Chron. 8:1).

Ashdod (ashˊdod), a town in northern Judah two and a half miles inland from the Mediter-

ranean coast. We know from the Ugaritic material that Ashdod, Accho, and Ashkelon dealt with Ugarit (Ras-Shamra) and hence existed as a city as early as the fourteenth century B.C. The city is supposed to have been allotted to Judah (Josh. 15:47); however, it was also one of the cities in the Philistine Pentapolis (Josh. 11:22; 13:3) and hence may never have come under Judah's control. The Ark of the Covenant was brought to the temple of Dagon in Ashdod when it was taken by the Philistines. The Ark was later sent away (1 Sam. 5:1–8; 6:17).

The city was broken down by King Uzziah (ca. 783–742 B.C.) of Judah (2 Chron. 26:6). Ashdod later fell to Sargon, king of Assyria (Isa. 20:1). Subsequently Azuri, the reigning king of Ashdod, was dethroned and replaced by his brother in 712 B.C. due to the revolt of Ashdod against the Assyrian domination. Nevertheless, a year later Iammi and Sargon had to suppress another Ashdod rebellion. This time the town was annexed to the Assyrian Empire. According to the Greek historian Herodotus (2.157) the Egyptian pharaoh Psamtik attacked the city after the demise of the Assyrian Empire in the west. Ashdod worked to keep Jerusalem a weak power in the Persian period (ca. 538–333 B.C.; Neh. 13:23–24). During the Hellenistic period (333–63 B.C.) the name was changed to Azotus. Jonathan the Hasmonean destroyed the temple of Dagon (1 Macc. 10:84). Azotus subsequently came under the control of John Hyrcanus still later and it was held by Alexander Jannaeus (Josephus *Antiquities* 13.395). Pompey and Galbinius partitioned it from Judea (Josephus *Wars* 1.156, 165–66).

Augustus gave the city to Herod, who in turn gave it to his sister Salome (ca. A.D. 38). Vespasian marched on the city in the first Jewish revolt (A.D. 66–70). The evangelist Philip is reported to have passed through the city on his missionary travels (Acts 8:40). S.B.R.

Asher (ash´uhr; Heb., "happy"). **1** Son of Jacob and Zilpah (Gen. 30:12–13) and the eponymous ancestor of the tribe Asher. The name may derive from that of a god, the male counterpart of Asherah or a variant of Ashar, a divine name element in Old Akkadian and Amorite names. **2** The western highlands of Galilee, which constituted the ninth Solomonic district (1 Kings 4:16). The Blessings of Jacob (Gen. 49:20) and of Moses (Deut. 33:24–25) allude to the fertility of Asher's land. Asher failed to participate in the battle against Sisera (Judg. 5:17), but responded to Gideon's calls to expel the Midianites (Judg. 6:35; 7:23).

Asherah (uh-shihr´uh), a Canaanite goddess, the wife of El according to Ugaritic tradition, but the consort of Baal in Palestine. In the Ugaritic literature she is called "Lady Asherah of the Sea," a title that may signify "she who treads on the sea." Apart from her name, she has other connections with the sea. Her servant is called "fisherman of Lady Asherah of the Sea." A drinking cup from Ras-Shamra seems to portray her underwater.

The cult of Asherah was ancient. Tyre seems to have been a major center for her veneration. Her cult was widely diffused, but combinations with the figures Anat and Astarte and other factors have made its identification problematic. She was called, in addition to Asherah, Elat ("Goddess") and Qudshu ("Holy"). Asherah probably stands behind the Punic goddess Tanit ("She of the Serpent"?).

Asherah plays an important role in the mythological texts from Ras-Shamra in modern northern Syria. The gods are regarded as the children of Asherah and El. As the wife of El, Asherah is called on to intercede with her husband on behalf of the project of building a palace for Baal. Her relationship with Baal is perplexing. Baal's assault on the offspring of Asherah is once narrated, yet Asherah advocates for Baal the role of king and judge among the gods. A Canaanite myth that survives only in a Hittite version ("El, Ashertu, and the Storm God") reveals that Asherah once sought the storm god (Baal) as a lover, a quest achieved with El's approval but to the eventual humiliation of Asherah. In the Ugaritic legend of Kirta (Keret), Asherah receives a vow from Kirta, but when he fails to fulfill his vow, she brings sickness upon him. Asherah is a mother figure,

A life-size statue of the Canaanite goddess Asherah, from the ninth century B.C. The OT prophets denounced the cult of Asherah, blaming its following in Israel on the influence of Jezebel.

and it is announced that the offspring of Kirta will take nourishment at her breasts.

In the Bible, the noun "Asherah" is used with more than one meaning. Asherah remains a Canaanite goddess whose veneration in Israel is blamed on Jezebel (see 1 Kings 18:19). Jezebel's Asherah had four hundred prophets. Asherah was also worshiped in the south, and the Deuteronomistic historian praises Asa for destroying a detestable image made for Asherah (1 Kings 15:13). Manasseh, by contrast, is blamed for erecting a statue of Asherah (2 Kings 21:7). Vessels sacred to Asherah were also deposited in the Jerusalem Temple (2 Kings 23:4).

The name of Asherah is associated with that of Baal, and these were evidently a divine couple; but Baal is also linked to Astarte. Hebrew jar inscriptions from Kuntillet 'Ajrud raise the problem of Yahweh's relationship with Asherah. These inscriptions permit a reading that associates Yahweh of Samaria with his Asherah. If correct, these readings would demonstrate that in popular religion Yahweh was associated with a consort, Asherah, an eventuality that can cause no surprise in light of all we know about other religions of this period and area. But the noun "Asherah" may also signify "sanctuary" or refer to a cult object, and so the interpretation of the Kuntillet 'Ajrud inscriptions can be disputed.

Asherah can also refer to a cult object or objects. A high place might have an asherah (1 Kings 14:23; 2 Kings 18:4), but an asherah could equally be found outside a high place. The Baal temple at Samaria had an asherah (1 Kings 16:33), and they were, in general, common in places of worship in ancient Israel. The asherah is thought to have represented the goddess; it may have been carved from wood (Judg. 6:25) or it may have been a living tree planted to serve as an asherah (Deut. 16:21). Deuteronomy commands the destruction of the asherah by burning (Deut. 12:3). It can be guessed that an asherah was formed as a pole, but descriptions of the object are wanting.

The cult of the goddess Asherah and the use of the cultic object called asherah are persistently opposed in Israel's literature (Mic. 5:12–13; Deut. 16:21). Israel's faith did not admit the worship of gods other than Yahweh. However, since the worship of Yahweh owed much to the cults of El and Baal, the danger constantly existed that the exaltation of a divine couple modeled on the association of El and Asherah or Baal and Asherah would take root in Israel. The Canaanite divine couples lived with a sexual endowment. The Yahweh of the Bible, however, was not to be thought of as a sexual being. ***See also*** Anat; Baal; El; High Place; Ras-Shamrah. R.M.G.

ashes, what is left after a fire, similar in appearance to dust, with which they are often mentioned. Ashes signify destruction (Ezek. 28:18; Mal. 4:3; Heb. 3:21; 2 Pet. 2:6) and are contrasted with glory (Isa. 61:3). Sitting on them or putting them on one's head were rituals of mourning and repentance (2 Sam. 13:19; Isa. 58:5; Jer. 6:26). Ashes are also mentioned as symbolic of insignificance (Gen. 18:27).

Ashkelon (ash'kuh-lon; variously spelled Askalon, Askelon, Eshkalon, Ascalon), a city located about twelve miles north of Gaza. It was loyal to Egypt (Tell el-Amarna texts, ca. 1400–1360 B.C.) and was identified as one of the Philistine Pentapolis cities (Josh. 13:3; 1 Sam. 6:4, 17; Judg. 14:19). The Merneptah stele (ca. 1230 B.C.) indicates that Ashkelon, Gezer, and Yanoam were conquered by Pharaoh Merneptah. Ramesses II reconquered Ashkelon in ca. 1280 B.C. In ca. 734 B.C. Tiglath-pileser III took Ashkelon for Assyria. Hezekiah of Judah and Sidqa of Ashkelon revolted against Assyria, but Sennacherib (701 B.C.) reconquered it. Psammetichus I (664–609 B.C.) of Egypt took Ashkelon before Nebuchadnezzar of Babylonia destroyed it (609 B.C.; Jer. 47:5–7; Zeph. 2:4–7). A Tyrian possession during the Persian period (539–333 B.C.), it was a Ptolemaic possession during the Hellenistic period (301–198 B.C.). Excavations in 1985–1986 uncovered domestic material from the Late Bronze–Iron I period through the Iron Age I–II. S.B.R.

Ashkenaz (ash'kuh-naz). **1** Noah's great-grandson (Gen. 10:3). **2** A nation near Armenia (Jer. 51:27), generally identified with the Ashkuza, an Indo-European people mentioned in seventh-century Assyrian inscriptions, and the Scythians mentioned by Herodotus.

Ashtaroth (ash'tuh-roth), the capital city of Og, king of Bashan, whom the Israelites under Moses defeated in battle (Deut. 1:4; cf. Josh. 9:10; 12:4). It is later mentioned as a city of refuge given to the Gershomites, a levitical group, from the territory of the half-tribe of Manasseh (1 Chron. 6:71). It was located to the east of the Sea of Galilee. Because the name is the plural form in Hebrew of Ashtoreth, the Canaanite goddess of fertility, it is probable that the city was once a special place of her worship. ***See also*** Asherah; Og.

Ashtoreth (ash'tuh-reth), the female consort of the Caananite deity El. ***See also*** Asherah.

Ashurbanipal (ash'uhr-ban'uh-pahl). ***See*** Assyria, Empire of.

Ashurnasirpal (ash'uhr-nas'uhr-puhl) **II,** the king of Assyria from 883 to 859 B.C., who by means of regular military campaigns to the four quarters of the Near East forged a new Assyrian empire. In the West, he reached as far as Beth-eden (Amos 1:5) and Carchemish (Isa. 10:9). The royal inscriptions depict him as a valiant warrior, mercilessly punishing all resisters. Calah (modern Nimrud), completely rebuilt and re-

populated with captives, served as his main administrative center. ***See also*** Assyria, Empire of.
M.C.

Ash Wednesday, the first day of Lent and the seventh Wednesday before Easter. It derives its name from the early ecclesiastical custom of putting ashes on the heads of believers on that day, as a sign of penitence.

Asia (ay´zhuh), a term occasionally referring to the old Persian Empire, but generally the Seleucid kingdoms, whose rulers were called "the kings of Asia" (1 Macc. 8:6). When Attalus III died (133 B.C.), he willed his kingdom to Rome, who called the new province "Asia" from the ruler's title. Asia was evangelized quickly by Christian missionaries (Acts 13–16). Paul sent his Letter to the Galatians to the many churches in that region of Asia. The Revelation to John was addressed to "the seven churches of Asia," the coastal cities of Ephesus, Smyrna, Pergamum, Thyatira, Sardis, Philadelphia, and Laodicea (1:4, 11), and some of those to whom 1 Peter was addressed also lived in Asia (1:1). From Asia Pliny wrote to Rome about persecuting the Christian churches. J.H.N.

Asiarchs (ay´zhee-ahrks), Roman administrative officials selected by a league of cities in the province of Asia. Their duties included overseeing local patriotic cultic activities on behalf of Rome and the emperor. Acts 19:31 represents some of them in Ephesus as friendly toward Paul.

Asnapper (as-nap´uhr), the name in KJV for Osnappar. ***See also*** Esarhaddon; Osnappar.

asp, a poisonous snake *(Naja haja),* depicted in bronze at Gezer; it is employed by several biblical poets as a metaphor to convey deadly anger or poison (e.g., Deut. 32:33; Rom. 3:13).

Asriel (as´ree-uhl), a son of Manasseh by his Aramean concubine (1 Chron. 7:14), probably the same person (erroneously?) identified elsewhere as his great-grandson (Num. 26:31), although there is uncertainty over which genealogy is correct. It is possible these are different persons.

ass, a four-footed mammal related to the horse, common both in the wild and domesticated state in biblical times. The wild ass is portrayed most vividly in Job 39:5–8: it enjoys the freedom of the desert and finds its own pasture, scornful of the bustle of the city and heedless of the animal driver. It represents the presence of the desert where once there were bustling cities (Isa. 32:14). Ishmael is characterized as a wild ass (Gen. 16:12). The domesticated ass was very common in Israel. It appears as a basic item of a person's property (e.g., Exod. 22:8, 9; 23:4, 5; Job 24:3; Luke 13:15), and the number of asses was

Wild asses being hunted. On the upper register, two men hold a captured wild ass with ropes. On the bottom, two of the animals flee. Bas-reliefs from Ashurbanipal's palace at Nineveh, seventh century B.C.

one of the measures of a patriarch's wealth or an army's booty. The domestic ass is most frequently referred to as a means of transport for goods or people (e.g., 2 Sam. 16:1–2), but occasionally it appears as a draft animal (e.g., Isa. 30:24). Issachar is called an ass because his life is hard labor (Gen. 49:14; cf. Ecclus. 33:24). Though they usually knew where they were kept (Isa. 1:3), asses would not infrequently wander off and get lost (Exod. 23:4; Deut. 22:1–3; 1 Sam. 9–10). Under siege conditions starvation might lead people to pay eighty shekels of silver for an ass's head, according to 2 Kings 6:25. Normally a dead ass was simply dragged outside the city and thrown away (Jer. 22:19). Samson used an ass's jawbone, which he found lying on the ground, to slay a thousand Philistines. Balaam's ass, which shows greater insight and loyalty than her master (Num. 22:21–35), is probably the most famous ass in the Bible (cf. 2 Pet. 2:16). In the ancient Near East gods and kings rode on asses. So in the prophecy of Zech. 9:9 the new king of Jerusalem comes to the city riding on an ass—as then does Jesus (Matt. 21:1–11; Mark 11:1–11; Luke 19:28–38; John 12:12–19). S.B.P.

Assassins (uh-sas´uhnz; KJV: "murderers"; Gk. *sikarioi;* Lat. *sicarii,* from *sica,* "dagger"), according to Josephus a Jewish revolutionary group operating against the Romans and their collaborators prior to the revolt of A.D. 66. In Acts 21:38, Paul is mistakenly thought to be one of their leaders. ***See also*** Zealot.

Assir (as´uhr; Heb., "bondman" or "captive"), the name of three Levites. **1** The son of Korah and great-grandson of Uzziel (Exod. 6:24). **2** The son of Ebiasaph and great-grandson of 1 above (1 Chron. 6:23). **3** The son of a second Ebiasaph

and the great-grandson of Izhar the brother of Uzziel (1 Chron. 6:37). Because of the repetition of names some scholars think scribal errors have confused the proper order of these lists; it is therefore possible that these are all the same person. Some versions also understand Jeconiah to have had a son named Assir (1 Chron. 3:17), but the RSV properly translates "Jeconiah the captive." ***See also*** Ebiasaph; Korah. D.R.B.

Assos (as´os), seaport on the northwest coast of Asia Minor, visited by Paul (Acts 20:13–14).

Assur (as´uhr), ancient Assyria. In Mesopotamia, Assur designates the nation and land of Assyria, its oldest capital city, and its god. Originally, the name was associated with just the city and god; its national significance was added in Middle Assyrian times (1500–900 B.C.), when the city expanded into a state.

The city itself, modern Qala'at Sharqat (in Iraq) lies on a promontory overlooking the Tigris River. Its history, as revealed especially in the German excavations of 1903–14, stretches from ca. 3000 to 614 B.C., during which it developed from a satellite of southern Mesopotamia (3000–2000), through an independent city-state (2000–1500), to the capital of the territorial state and empire of Middle Assyria (1500–900), finally to one of several centers of the enlarged Neo-Assyrian Empire (900–614). There was, in addition, a revival in the Parthian period, ca. 100 B.C.–A.D. 250.

Paralleling this history was that of Assur the god, who is first attested as the patron of the city ca. 2000 B.C. and thereafter grew into the principal deity of the Assyrian state and empire, taking on characteristics of many other gods, particularly the Babylonian gods Enlil and Marduk.

In the OT, Assur refers only to the nation or land (e.g., Isa. 10:5) or, by extension, to its eponymous ancestor (Gen. 10:22; 1 Chron. 1:17). There is no mention of the city (Gen. 10:11 and Ezek. 27:23 likely indicate the land) nor of the god (except obliquely, as an element in the royal name Esarhaddon: 2 Kings 19:37; Isa. 37:38; Ezra 4:2). ***See also*** Assyria, Empire of.

assurance, the theological concept of certainty and persuasion communicated in the gospel to the eyes of faith about God and God's utter trustworthiness as the faithful Promiser. Implying neither personal tranquility nor robust confidence, neither blanket security nor rosy optimism, this assurance is created by God's self-witness and is sustained by the experience of the repeated righteous fidelity of God (Rom. 5–7; 2 Cor. 1:3–11; 1 Thess. 1; 2:13–16; 2 Tim. 1:12; Heb. 11:1–2; cf. Isa. 32:17). Assurance takes shape in the form of a conscience bound to God (Rom. 2:15; 12:2; 13:5; 1 Cor. 8:10; 2 Cor. 4:2; 5:11; 1 Pet. 2:19), of an awareness in the arena of doubting and decision making, of conduct and behavior (Heb. 10:19–24; 1 John 3:11–24). It motivates, activates, and enables discernment both reactively *and* proactively in matters of responsible living. It is closely connected to the work of the Spirit (John 14:16, 26; 15:26; 16:7) and represents finally the verification that God's new creation in the resurrection of Jesus is the ultimate reality upon which one stakes one's life (Acts 17:31; 1 Cor. 15). ***See also*** Conscience; Faith; Holy Spirit, The; Promise. J.E.A.

Assyria (uh-sihr´ee-uh), **Empire of,** one of the major empires in the ancient Near East. The heartland and original core of Assyria lay in what is now northern Iraq around the upper Tigris River. Its initial development as a territorial state and empire came in the second millennium B.C., in the Old and Middle Assyrian periods. But its greatest period—and the only one involving direct contact with Israel—was its last: the Neo-Assyrian period of the first millennium B.C. (934–609). The triumphant achievement of Neo-Assyria was the creation of an empire that went far beyond earlier forms to become the largest political configuration the Near East had yet seen. Four phases marked the course of this achievement.

In the first phase (934–824 B.C.), Ashur-dan II, Adad-nirari II, Tukulti-ninurta II, Ashurnasirpal II, and Shalmaneser III halted the Aramean attacks that had plagued Assyria for the preceding three centuries and counterattacked to the west through Syria, the best known of their battles occurring at Qarqar in 853 between Shalmaneser and a Syro-Palestinian coalition that included Ahab of Israel. In these, as in other campaigns to the north, east, and Babylonian south, the Assyrians wanted not so much permanent conquest—although they achieved some of that in territories immediately to their west—as the neutralization of external threats and the acquisition of booty and prisoners. The latter were then put to use, for example, in building projects like Ashurnasirpal's grandiose reconstruction of the city of Calah.

The death of Shalmaneser III (824) initiated the second phase, which continued until 744 B.C. Its first decades saw more military activity against the Arameans, of which one beneficiary was Israel (2 Kings 13:5). But in the main this was a time of Assyrian retreat, brought on by the growing power of its northern neighbor, Urartu, and by the growing challenge to and occasionally revolt against royal authority by various members of the royal family and other royal officials. With Assyria and the Arameans thus weak, it is no surprise that in the latter years (770–744 B.C.) of this phase Israel and Judah were able to expand their territories signifi-

Ashurbanipal, king of Assyria, carrying a basket for the rebuilding of the temple of Esagila in Babylon, seventh century B.C.

cantly, under their kings Jeroboam II (2 Kings 14:23–29) and Uzziah (2 Chron. 26).

Assyria's troubles were reversed in the third and climactic phase of the Neo-Assyrian period, the century (744–627) of Tiglath-pileser III, Shalmaneser V, Sargon II, Sennacherib, Esarhaddon, and Ashurbanipal. Under the standard set by Tiglath-pileser, they restored royal power, centralizing it more than before, and established a standing army, whose constant campaigning and improved skill and equipment eventually brought under Assyrian sway almost all of the Near East. The aim now was not only spoil, but permanent and organized conquest: an empire of provinces and vassal states backed by an increased use of population resettlement to control the conquered. To administer this, the bureaucracy became more complex and more dependent on non-Assyrian deportees, especially Arameans, whose language and culture gradually pervaded the whole. In turn, to display the newfound power, the heartland capitals of Assur, Calah, and Nineveh were made larger and more splendid, and a new, though short-lived, capital was added, Dur-Sharrukin. Nineveh, moreover, became under Ashurbanipal the repository of the largest collection of Mesopotamian literature assembled hitherto.

This empire had serious flaws, however, largely deriving from overexpansion. Thus, its heartland grew increasingly dependent on tribute and deportees from the conquered areas, who, being increasingly burdened, revolted whenever they could. Israel, for example, joined revolts against Tiglath-pileser, Shalmaneser, and Sargon and paid for its "disobedience" by dismemberment into provinces and deportation (732–720 B.C.; 2 Kings 17, 18:1–12). Judah, fearing the consequences, remained a loyal vassal through these revolts. Eventually, however, it too yielded, joining the outbreak against Sennacherib, who responded harshly but allowed Judah to resume its vassal status (704–701 B.C.; 2 Kings 18:13–20:21).

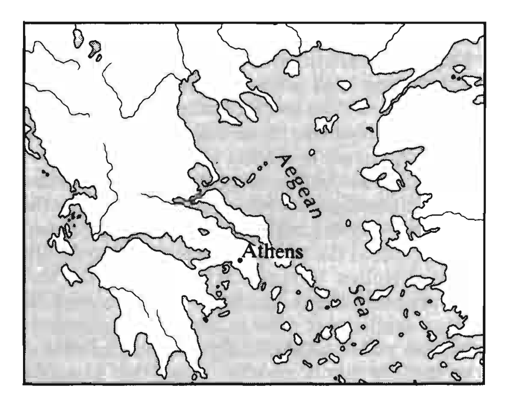
These recurring revolts, encouraged by peripheral states like Egypt, strained Assyrian resources and organization. They also exacerbated the never absent tensions within the Assyrian ruling elite, which resurfaced especially in the assassination of Sennacherib (681 B.C.) and in the civil war between Ashurbanipal and his brother, Shamash-shuma-ukin, who was regent of Babylonia, the most troublesome and complicated of Assyria's vassal states (652–648 B.C.). Ashurbanipal won this war, but the ensuing military and political exhaustion began a loosening of imperial authority.

The process accelerated after Ashurbanipal's death (627 B.C.), in the fourth and final phase of Neo-Assyrian history. Now many subjects openly asserted their independence—for example, Judah under King Josiah; Babylonia under its new Neo-Babylonian/Chaldean dynasty; the Medes—and conflict broke out again among the Assyrian elite for what power remained. Exploiting this conflict, the Medes and Chaldeans began attacking the Assyrian heartland, and between 614 and 612 B.C. the capital cities fell into their hands. The Assyrian army, always a kind of state within the state, held out a little while longer in Harran to the west, apparently with Egyptian support. But in 610–609 B.C., a Chaldean army dislodged it, helped by Josiah of Judah, who at the cost of his life delayed the arrival of Egyptian forces (2 Kings 23:29–30). With that, the Assyrian state disappeared, and the bulk of its territories were taken by the Chaldeans. ***See also*** Aram; Babylon; Chaldea; Esarhaddon; Nineveh; Sargon II; Sennacherib; Shalmaneser; Tiglath-pileser III; Uzziah. P.B.M.

Astarte (as-tahr´tee). ***See*** Asherah.

astrologer, a person who reads the influence of the stars on human and terrestrial affairs, supposedly foretelling events by the positions of the planets and stars. Clay tablets show that astrology flourished among the ancient Assyrians and Babylonians (ca. 1000–500 B.C.). Belief that the stars influence human affairs appears occasionally in the OT (Judg. 5:20; Job 38:33). It is generally associated with apostasy (Isa. 47:13–14) or with the gentile nations (Dan. 1:20; 2:2, 10). Combined with Greek mathematics, astrology came into the Greco-Roman world during the Hellenistic period (325–63 B.C.). Fragments of what appears to be a horoscope of the messiah were found among the Dead Sea Scrolls. The Magi (Matt. 2:1–12) were led to Jesus by obser-

vation of an unusual astronomical phenomenon at the time of his birth. P.P.



Atad (ay'tad; from Akkadian *etidu*), translated "thorns" (Ps. 58:9) and "bramble" (Judg. 9:14–15) and transliterated (Gen. 50:10, 11). In Genesis it refers to a threshing floor east of the Jordan where Jacob's family mourned his death, causing a renaming of the place.

Ataroth (at'uh-roth'). **1** Khirbet Attarus, eight miles northwest of Dibon (Num. 32:3, 34) associated with the tribe of Gad. **2** Tell el-Mazar, an east border town of Ephraim (Josh. 16:7). **3** KJV for RSV Atroth-beth-joab (1 Chron. 2:54). **4** It appears as part of the compound name Ataroth-addar (Josh. 16:5; 18:13), a border town between Ephraim and Benjamin, modern day Kefer 'Aqab.

Ater (ay'tuhr). **1** A family group ("sons of Ater") who returned with Zerubbabel from the Babylonian captivity (Ezra 2:16). **2** A family group of gatekeepers who also returned (Ezra 2:42). **3** A member of the postexilic community who signed the covenant to keep the law (Neh. 10:17); he could be associated with either of the families identified above.

Athaliah (ath'uh-l*i*'uh; Heb., "Jah is strong"), the only ruling queen of Judah. She was the daughter of Jezebel and Ahab of Israel, and the wife of Jehoram, king of Judah (ca. 849–843 B.C.). She ruled (ca. 843–837 B.C.) upon the death of Ahaziah at the hands of Jehu (2 Kings 9:29). She instigated a purge of the male heirs. After six years, Jehoida, one of the priests, mounted a successful coup by producing Joash, a male who escaped the purge, and Athaliah was murdered (2 Kings 11:1–20).

Athens (ath'inz), the capital of the ancient Greek province of Attica (2 Macc. 9:15; Acts 17:15–18; 18:1; 1 Thess. 3:1). The name "Athens" antedates the arrival of the Indo-European peoples in Greece (ca. 2000 B.C.). The city stands on a site that has been continuously inhabited since the fourth millennium B.C. In

Mycenaean times (ca. 1300–1225 B.C.) it was a fortified citadel with a palace and cult sanctuary to Eros Aphrodite. What would later become the agora was at that time a burial site.

The Classical Period: The glory of classical Athens belongs to the fifth century B.C. Tribute money from the vast Athenian empire and its commerce paid for the beautiful buildings erected on the acropolis (454–414 B.C.). The Parthenon, whose marble friezes are now displayed in the British Museum, was built in honor of the goddess Athena. Its architects had mastered the details of perspective and curvature so that they could make its rows of columns appear straight even when viewed along the building's longitudinal axis. The figures sculpted for the processional frieze are completely finished on all sides as though they were to have been viewed straight on and not from 39 feet below. Some four hundred people and two hundred animals are shown participating in the Panathenaic procession, which brought the goddess a new sacred robe every fourth year. The great statue of Athena is known to us from copies. Clothed in a gold robe, the goddess had ivory limbs and an ivory face. She wore gold earrings, necklace, and bracelet, and a military helmet with the sphinx and winged Pegasoi. One hand held a spear. Her shield portrayed the gods and giants. The sacred snake, Erichthonius, was entwined around her left leg while her right hand held an image of a winged victory.

The Hephaisteion temple overlooking the agora is the most perfectly preserved temple of the era. The Erechtheum, built on the site of the Mycenaean palace, was begun in 421 B.C. but interrupted by the Peloponnesian War in 415 B.C. and not resumed until 409 B.C. It was thought to stand on a holy spot where Poseidon had stuck his trident in the ground and Athena had caused the sacred olive tree to spring up. Its innovative caryatid porch had the six maidens, all different, supporting the roof. Hadrian had a complete copy made for his villa at Tivoli.

This period also saw considerable building in the agora, including a prison, a council house, a building for semipublic meetings, and several colonnaded porches *(stoa),* the Painted Stoa, the Stoa of Zeus, and the long double-aisled stoa to the south. The theater of Dionysus was built on the south slope of the acropolis during the fourth century B.C. The theater as seen today comes from the last part of that century. It seated between fourteen and seventeen thousand. The scene building may have had a temporary stage. The permanent stage was added during the Hellenistic period. The Romans added a marble barrier around the orchestra to protect spectators at beast fights and gladiator shows. In the second century B.C. the Stoa of Attalos, which has been reconstructed to house the agora museum, was built.

The Augustan Age and After: The Augustan age (31 B.C.–A.D. 14) saw a flurry of Roman building. Julius Caesar had planned a Roman forum for Athens. A small round temple to Rome and the emperor Augustus modeled after the Vesta in Rome was built on the acropolis east of the Parthenon. In the center of the old orchestra in the Greek agora Agrippa built an auditorium for about one thousand persons. The Romans also dismantled and brought to the agora a temple to Ares, which was built in fifth-century B.C. style.

There is little evidence of any building in the agora during the first century A.D. By the second century, Athens was a university town. The inscription from an early second-century A.D. library reads, "No books circulate. Open 6 A.M. to noon." The middle of the second century saw a new building spree under the emperor Hadrian (A.D. 117–138) including a huge temple to Olympian Zeus, a gymnasium, and a library north of the Roman agora. Agrippa's Odeon, used as a lecture hall, was remodeled in A.D. 150 to hold 500 persons and was decorated with pairs of statues representing the various philosophical schools in the city. ***See also*** Acropolis; Agora; Areopagus; Stoa; Theater.

Athlit (athˈlit), an impressive site on the Mediterranean shore ca. twelve and a half miles south of Haifa. It appears to have been occupied from the Late Bronze period (1500–1200 B.C.) until the Hellenistic period (333–63 B.C.). It is situated on the main travel thoroughfare of antiquity in western Palestine, the *Via Maris* (Lat., "the way of the sea"). Its most impressive feature is a Crusader castle *(Castellum Peregrinorum).* The city has been identified with Kartah of Zebulun (Josh. 21:34).

atonement, the means by which the guilt-punishment chain produced by violation of God's will is broken, as well as the resulting state of reconciliation ("at-onement") with God. For most ancients, violation of the world order led to punishment by divine powers; only atonement could prevent or end such punishment. The character of atonement varied greatly, however, depending on concepts of the deity, human existence, and the order of violation.

The English word "atonement" does not occur in the RSV (cf. Rom. 5:11: "atonement" in the KJV, "reconciliation" in the RSV). The Hebrew word with which the concept of atonement is associated in the OT can be translated variously as "purge," "cleanse," "expiate," "purify," "wipe on or off," "cover," etc. The Septuagint (LXX) Greek equivalent was of influence for the language and thought of the NT.

The OT viewed a number of offerings and sacrifices as atoning. The best known were the elaborate sacrificial/priestly rites of atonement developed mainly in the postexilic period. Basic to their development was the OT view of God: God was the faithful, holy covenant partner to his people; he provided the means of atonement when the sanctuary or the land became defiled, or when the people were unfaithful. God did not need appeasement; rather, atonement removed the sinful barrier to the covenantal relationship. The rites of atonement were carried out by the high priest through prescribed sacrifices in the Temple. Covenant renewal and restoration were connected to the Day of Atonement (Lev. 16). Atonement was anything but routine and automatic (Pss. 40; 51:15–17). For early Judaism, the atonement base was broadened to include the sacrifice of martyrs whose achievements were calculated and deemed meritorious for others (e.g., 4 Macc. 6:28–29; 17:20–24).

In the NT, atonement is linked conclusively to the ministry, death, and resurrection of Jesus. According to early traditions in the first three ("synoptic") gospels, Jesus may have understood his destiny in atoning terms (Mark 10:45b; 14:24; cf. Isa. 53; Exod. 32:30–32). Early Christian thought developed this and other OT backgrounds. For Paul, for example, the location and source of God's mercy, namely Jesus Christ, was central (KJV: "mercy seat," RSV: "expiation"; Rom. 3:25). For Hebrews, the central image was that of the high priest (Heb. 2:17; 4:14–5:10; 10:19–21; cf. Lev. 16; Ps. 110:1–4). Early appropriation of an intercessory "on-our-behalf" traditional formula enhanced this development of seeing in Jesus the locus of atonement (1 Cor. 15:3). Atonement as "redemption" (1 Cor. 6:20; 7:23; Gal. 3:13; 4:5) may have other backgrounds beside those of the OT (Exod. 4:22–23; 21:30; 30:16; Num. 35:31–33). Unlike other NT writings, Luke-Acts makes little use of atonement concepts. ***See also*** Atonement, Day of; Blood; Covenant; Expiation; Pardon; Priests; Reconciliation; Redemption; Salvation; Sin; Worship.

J.E.A.

Atonement, Day of (Heb. *Yom Kippur*), a festival observed in Israel ten days after the fall new year (Lev. 16:29; 23:27) to purify the sanctuary and altar and atone for the sins and impurities of the high priest and Israel for the past year (Lev. 16:1–34; 23:26–32; Num. 29:7–11). The high priest sacrificed a bull for himself and a goat for Israel and used the blood to remove the impurities of the sanctuary, Holy of Holies, and altar caused by ritual and moral sins. On this day, only the high priest entered the innermost room of the tent and later the Temple, the Holy of Holies, to sprinkle blood from the bull and goat on the top and front of the "cover" (or mercy seat) and to offer incense. In a related ritual, the priest symbolically placed the sins of the people upon another goat (the so-called scapegoat) that was then driven into the wilder-

ness, taking the sins and impurities away. Israel observed this festival as a day of fast on which no work was done. Hebrews 8–9 draws heavily on the ritual and symbolism of the Day of Atonement to explain Christ's sacrifice. ***See also*** Azazel; Tabernacle; Temple, The. A.J.S.

Attai (at´ī). **1** The son of Sheshan's daughter and his Egyptian slave, Jarha (1 Chron. 2:35, 36). **2** The sixth Gadite warrior to go over to David at Ziklag, representing northern allegiance (1 Chron. 12:11). **3** The second son of King Rehoboam, thus a grandson of Solomon (2 Chron. 11:20).

Attalia (at´uh-lī´uh), a seaport on the southern coast of Asia Minor. From here, Paul and Barnabas sailed to Antioch at the end of their first journey (Acts 14:25).

Augustus (aw-guhs´tuhs; Lat., "august, revered"), a title granted to Octavian (63 B.C.–A.D. 14), the grand-nephew and adopted heir of Julius Caesar, by the Roman senate in 27 B.C., when it confirmed his powers to rule (Lat. *imperium*). He was the Roman ruler when Jesus was born in a province of the empire (Luke 2:1). Though Augustus was in fact the sole ruler of the empire, he ostensibly contented himself with only the necessary powers of rule, the supreme command of most of the army (*imperium proconsulare*) and the consular powers over the city of Rome (*imperium consulare*). When Augustus ceased to stand for annual election to the consulate he was granted new tribunician powers. These included powers he already possessed such as personal immunity from prosecution and appellate jurisdiction and added powers to convene the senate and popular assembly and to submit measures to either at any time. He could also veto any item of public business or the action of any other magistrate.

Administration of provinces requiring military presence was entrusted to legates who were personal emissaries of the emperor. Augustus created the foundations of Roman imperial power. As the title *augustus*, which was derived from a word associated with sanctuaries, suggests, he initiated the process by which the emperor and his family were identified with the majesty of the Roman state and in later times were deified. ***See also*** Roman Empire; Rome. P.P.

Authorized Version (AV), an early seventeenth-century translation of the Bible into English, more commonly known as the King James Version (KJV). ***See also*** English Bible, The.

AV. ***See*** Authorized Version; English Bible, The.

Avaris (uh-vahr´is), the capital of the Asiatic Hyksos in the eastern Nile delta. It was overrun by Egyptian forces in the resurgence beginning the New Kingdom (ca. 1530 B.C.). Avaris may be modern Tell el-Dab'a or possibly San el-Hagar, ancient Tanis, both of which have impressive remains. ***See also*** Hyksos; Zoan.

Aven (ay´ven; Heb., "evil power"). **1** Term used to describe Bethel (Hos. 10:9) in Hosea's indictment. **2** KJV for RSV "On," Egyptian city of Heliopolis (Ezek. 30:17). **3** A frequent element in compound names; it is used for Canaanite [hence evil] deities (Josh. 7:2; 18:12; 1 Sam. 13:5; 14:23).

avenger, one who extracts satisfaction from or punishes a wrongdoer, usually the next of kin of the wronged person. In the ancient Near East, this method of seeking justice was used whenever strong governmental authority was lacking. Blood vengeance, the execution of a murderer by the avenger, was recognized by the Hebrew people as a custom sanctioned by God (Gen. 9:5–6; Num. 35:16–21), although this custom was limited by a sense of compassion and mercy (Gen. 4:10–16; Num. 35:9–15, 22–28). Unlimited vengeance is presented as part of the lawlessness that led to the Flood (Gen. 4:23–24).

The Hebrews thought of God as the avenger on the wicked and on their enemies (Ps. 94), and thought God exercised his vengeance through their activities (Judg. 12:3–6; 2 Kings 9:7; Jos. 10:13). They were forbidden to take vengeance upon one another (Lev. 19:18).

Believers in Jesus as the Christ are taught not to execute vengeance themselves (Matt. 5:38–42; Rom. 12:17–19). God will punish the evildoer (1 Thess. 4:6; Rom. 12:19). The state executes vengeance on God's behalf (Rom. 13:4). God is portrayed as one who avenges the suffering of the faithful (Rev. 6:10; 19:2). ***See also*** Blood; Justice; Mercy; Vengeance. A.Y.C.

ax, battle-ax. ***See*** Weapons.

ayin (ī´yin; Heb., "eye," "spring"), the sixteenth letter of the Hebrew alphabet. It may have originated from the pictogram outline of the human eye. It has the numerical value of seventy.

Ayin. **1** A village near Riblah on the northern boundary of Palestine (Num. 34:11). **2** A town near Rimmon (Josh. 15:32; 1 Chron. 4:32).

Azarael (az´uh-ray´uhl), spelling of Azarel found in the KJV (Neh. 12:36), though usually Azareel. ***See also*** Azarel.

Azarel (az´uh-rel; Heb., "God has helped"). **1** A Korahite, one of David's warriors (1 Chron. 12:6, Hebrew v. 7). **2** The son of Jeroham, a Danite leader in the time of David (1 Chron. 27:22). **3** A levitical musician in the time of David (1 Chron. 25:18; often identified with Uzziel in v. 4). **4** A postexilic Israelite who divorced his foreign wife in response to Ezra's proclamation (Ezra 10:41). **5** A postexilic priest living in

Jerusalem (Neh. 11:13). **6** A postexilic priest who participated in the dedication of the wall at the time of Nehemiah (Neh. 12:36, possibly the same as 5).

Azariah (az′uh-r*i*′uh; Heb., "Yah[weh] has helped"), a name appearing in the OT as Azaryah and Azaryahu. This is the name of a number of men, primarily Judeans, from the time of Solomon through the return from Babylonian exile. **1** The king of Judah (2 Kings 14:21; 15:1, 7, 17, 23, 27; 1 Chron. 3:12), otherwise named Uzziah. **2** The two sons of the Judean king Jehoshaphat (2 Chron. 21:2). **3** The royal governor and army officer (1 Kings 4:5; 2 Chron. 23:1). **4** A prophet (2 Chron. 15:1). **5** Several priests (1 Kings 4:2; 1 Chron. 6:9, 10 [the second, Ezra 7:3], 13–14 [Ezra 7:1]; 9:11; 2 Chron. 6:36 [Uzziah in 1 Chron. 6:24]; 2 Chron. 29:12; Neh. 8:7 [1 Esd. 9:48]). **6** Various tribal or other leaders (Jer. 42:1 [with Septuagint]; 43:1; 1 Chron. 2:8, 38–39; 2 Chron. 28:12; Neh. 3:23–24; 7:17; 12:33). **7** The original name (Azzariah) of Abednego (Dan. 1:6–7, 11, 19; 2:17; 1 Macc. 2:59; Song of Three Children 1:65). ***See also*** Uzziah. P.B.M.

Azazel (uh-zay′zuhl), a demonic figure to whom the sin-laden scapegoat was sent on the Day of Atonement (Lev. 16:8, 10, 26). The Hebrew word has been traditionally understood as a phrase meaning "the goat that escapes," giving us the word "scapegoat." But in light of modern research, both this interpretation and those that understand it as a place name are incorrect. The word is a proper name and means something like "angry god." Yet, though Azazel is a demon, he does not play an active role in the rite as corresponding figures do in similar rituals of the ancient Near East. ***See also*** Atonement, Day of.
D.P.W.

Azaziah (az′uh-z*i*′uh; Heb., "Yah [God] is mighty"). **1** A Levite musician during the reign of King David (1 Chron. 15:21). **2** The father of Hoshea, the military commander of the tribe of Benjamin (1 Chron. 27:20). **3** A Levite Temple official during the reign of King Hezekiah who helped collect the tithes (2 Chron. 31:13).

Azekah (uh-zee′kuh), a city (modern Tell ez-Zahariyeh) in Judah occupied prior to Israel's entering Canaan (Josh. 10:10–11; 15:35). It lies a short distance northeast of Lachish. The Philistines and Goliath camped between Succoth and Azekah (1 Sam. 17:1). Rehoboam fortified this city (2 Chron. 11:9). Only Azekah and Lachish were left in the Judean countryside (Jer. 34:7) when Nebuchadnezzar attacked Jerusalem and the fortified cities of Judah. Not only is Azekah tied to Lachish in the biblical text, but they are corresponding towns in the Lachish letters. After the Exile Azekah existed between Eleutheropolis (Heb. Beth Govrin) and Jerusalem. This may be Khirbet al-'Almi east of Tell ez-Zahariyeh, according to Eusebius (early fourth century A.D.). However, the mound Tell ez-Zahariyeh shows occupation from pre-Israelite through the Byzantine periods.
S.B.R.

Azel (ay′zuhl), a Benjaminite, a descendant of Saul's son Jonathan (1 Chron. 8:37).

Azgad (az′gad; Heb., "Gad is mighty"). **1** A family group ("sons of Azgad") who returned with Zerubbabel from the Babylonian captivity (Ezra 2:12). **2** Another group who returned with Ezra (Ezra 8:12). **3** A member of the postexilic community in Judah who signed the covenant to keep the law (Neh. 10:15) and could be associated with either of the families named above.

Azmaveth (az′muh-veth; Heb., "death is strong"). **1** One of David's fighting men (2 Sam. 23:31). **2** A Benjaminite, descendant of Saul's son Jonathan (1 Chron. 8:36). **3** The father of Jaziel and Pelet, two of Saul's kinsmen from Benjamin who joined David at Ziklag (1 Chron. 12:3). **4** The son of Adiel; overseer of the royal storehouses under King David (1 Chron. 27:25). **5** A small family group ("sons of Azmaveth") who returned with Zerubbabel from the Babylonian captivity (Ezra 2:24). Some scholars see the variant Beth-azmaveth in a parallel list (Neh. 7:28) as indicating a town where the returning exiles settled rather than a family group (see 6 below), the result of a confusion of a place name with a family. But since Beth-azmaveth means "the house of Azmaveth," it could as easily refer to the family group. **6** A village of the postexilic community; identified with the modern Ras-Dhukeir or El-Hizma, about five miles northeast of Jerusalem (Neh. 12:29). D.R.B.

Azmon (az′mon), a settlement along the southernmost border of the Canaanite land claimed by Israel (Num. 34:4–5) and part of the southern boundary of Judah (Josh. 15:4); it is possibly identical with Ezem (Josh. 15:29). The site is unknown, although thought to lie slightly northwest of Kadesh-barnea.

Azotus (uh-zoh′tuhs). ***See*** Ashdod.

Azriel (az′ree-uhl; Heb., "El [God] is my help"). **1** The head of a family in the tribe of Manasseh (1 Chron. 5:24). **2** The father of Jeremoth, a military commander of the tribe of Naphtali (1 Chron. 27:19). **3** The father of Seraiah, a courtier of King Jehoiakim (Jer. 36:26).

Azrikam (az′ri-kuhm; Heb., "my help arises"). **1** A descendant of Zerubbabel and in the lineage of the kings of Judah through David (1 Chron. 3:23). **2** The son of Azel and descendant

of Saul's son Jonathan (1 Chron. 8:38). **3** A Levite, the grandfather of Shemaiah, a resident of postexilic Jerusalem (1 Chron. 9:14). **4** The overseer of the royal household of King Ahaz of Judah; he was assassinated along with the king's son and his chief of state by Zichri in conjunction with a coordinated attack against Judah by King Pekah of the Northern Kingdom of Israel and Rezin, king of Syria (2 Chron. 28:7). ***See also*** Pekah. D.R.B.

Azubah (uh-zoo´buh; Heb., "forsaken"). **1** The daughter of Shilhi; she was a wife of King Asa of Judah and mother of Jehoshaphat (1 Kings 22:42). **2** One of the wives of Caleb, son of Hezron (1 Chron. 2:18).

Azzur (az´uhr; Heb., "helped"). **1** One of those who signed the postexilic covenant to keep the law (Neh. 10:17). **2** The father of Hananiah, the false prophet who challenged Jeremiah (Jer. 28:1). **3** The father of Jaazariah, a corrupt leader seen by Ezekiel in a vision (Ezek. 11:1).

Opposite: The weather god Baal holding a lance in his left hand with branches that may represent lightning; from a fourteenth-century B.C. stele from the Temple of Baal at Ras-Shamra. Opposition to the worship of Baal is a persistent theme in the OT.

B

B, the second letter of the alphabet, commonly used to designate Codex Vaticanus, a fourth-century A.D. parchment manuscript of the Greek Bible, now in the Vatican Library. It consists of 759 leaves (out of an original total of about 820), each measuring 10–5/8 by 10–5/8 inches with three columns to the page. The OT is complete, but all of the NT after Heb. 9:14 is lost (including the Pastoral Epistles and Revelation). Vaticanus is the leading representative of the type of text that scholars identify as Alexandrian. ***See also*** Codex; Texts, Versions, Manuscripts, Editions.

Baal (bay'uhl, bah-ahl'), a Canaanite god. The Semitic word "baal" means "owner," "husband," "lord." It can be used as a common noun or as a proper noun. In the latter case it refers to the god Baal. In the Bible it is not always clear which use is intended. There is an additional complication in using "Baal" as a proper noun. Baal is, in one sense, a specific deity with characteristic attributes and functions. But gods other than this specific Baal may be called Baal. The Carthaginian god Baal Hamon seems to manifest the character of El. In the Bible, El of the Covenant (Judg. 9:46) and Baal of the Covenant (Judg. 8:33) denote the same deity.

Canaanite Background: These problems notwithstanding, the identity of Baal is clear. Baal is a weather god associated with thunderstorms. He is best known from the literature of Ras-Shamra (fifteenth century B.C.); Philo of Byblos, a Greek historian (ca. A.D. 63–141), collected additional valuable information about Baal, whom Philo called Zeus. At Ras-Shamra, Baal was called the son of Dagan, a fact not easily harmonized with the more general notion that El was sire of the pantheon. Also known as Hadd (Hadad), Baal was called "the Prince," "the Powerful," "Rider of the Clouds" (an epithet once predicated of Yahweh in the Bible, Ps. 68:4). At Ras-Shamra, Baal's consort, evidently also his sister, was Anat.

The phenomena associated with thunderstorms were closely linked to Baal. Baal was said to appoint the season of rains. Clouds were thought to be part of his entourage. Lightning was his weapon, and it may have been his invention. The windows of Baal's palace were thought to correspond to openings in the clouds through which rain flowed. Rain was important to Canaanite agriculture, and Baal was consequently a god of fertility—a prodigious lover as well as the giver of abundance.

The Ugaritic literature preserves a cycle of myths in which Baal is the protagonist. They link Baal to Mount Zaphon. They tell of his battle against Lotan (Leviathan) and of his struggles against other adversaries called Yamm (Sea) and Mot (Death). The struggle between Baal and Yamm has left its mark on Israelite literature in the form of stories about and allusions to Yahweh's encounters with watery enemies (e.g., Isa. 51:9b–10; Ps. 74:13). Through his struggles, Baal achieves the first rank among the gods. Along the way Baal perishes and revives, providing the Ugaritic literature with stirring themes and dramatic moments.

The relationship between El and Baal in Canaanite mythology has been a matter of dispute. There is some indirect evidence of antagonism between these important gods, inasmuch as they were competitors for the highest position in the pantheon. Yet there is also evidence of concord between them. Philo of Byblos reported an accommodation whereby Baal ruled on earth with the permission of El; many have seen in this arrangement the pattern of relations between the two most important gods of the Canaanites.

Baal and Ancient Israel: The cult of Baal was widespread in the Syro-Palestinian world and became the focus of Israelite religious animosity. Baal's consort in Palestine was not Anat, but Asherah (Judg. 3:7) or Astarte (Judg. 2:13; 10:6). Syncretism had blurred distinctions between Asherah, Astarte, and Anat, while for Israelite writers such distinctions were not of interest. We hear of the cult of Baal in a number of local manifestations: Baal of the Covenant at Shechem (Judg. 9:4); Baal of Peor at Shittim (Num. 25:3); Baal "Zebub" ("of the flies"; but should Zebul, "Prince," be read?) of Philistia (2 Kings 1:2–3); and perhaps Baal of Hamon (Song of Sol. 8:11). Jezebel introduced to Samaria the worship of Tyre's god Baal (1 Kings 18:19). It is not altogether clear whether these local baals were taken to manifest the single great god Baal or whether they were imagined as discrete deities.

Opposition to the worship of Baal is a persistent theme of the Israelite literature. The Deuteronomic corpus repeatedly condemns the veneration of Baal, speaking sometimes of "the Baals." The Deuteronomistic historian applauds the destruction of the Baal temple at Jerusalem in the revolution against Athaliah (2 Kings 11:18) and transmits old stories of conflict between the worshipers of Yahweh and the followers of Baal (Judg. 6:25–32; 1 Kings 18:16–40). The struggle against Baal worship was carried on forcefully by Israel's prophets, especially in the ninth century B.C. and later. There was much at stake. The worship of Baal was popular. Many Israelite names were composed with the element "Baal" (e.g., Beeliada). Although the word "Baal" in such names may refer to Yahweh as "lord," on the whole such names can be taken as evidence of the erosion of strict devotion to Yahweh. Some Israelite writers changed the name Baal in personal names to the word *bosheth* ("shame"), as in the name Ishbosheth. Since Yahweh could be called "lord," baal, the danger existed that Israel's God would take on the characteristics of the Canaanite weather god. In part this could occur without compromise to the character of Yahweh. The majesty of a thunderstorm and the gift of fertility in nature could be construed as

the evidence of Yahweh's work. But Baal was a god of sexual congress whose cult sported erotic acts that offended Israelite sensitivities, and the full identification of Yahweh and Baal was not a possibility. Israel's prophets fought to preserve a vision of transcendent Yahweh over against the Canaanite concept of Baal the nature god. ***See also*** Anat; Asherah; Ras-Shamra.
R.M.G.

Baalah (bah´uh-luh), a feminine form of the word *baal* (Heb., "master"), the name of the Semitic fertility god; it is used to mean "the place of Baal." **1** Another name for Kiriath-jearim, a city on the northern border of Judah (Josh. 15:9–10) where David kept the Ark of the Covenant before moving it to Jerusalem (1 Chron. 13:6).The site is identified as modern Deir el-Azar or Tel Qiryat Yearim, about eight miles west and slightly north of Jerusalem. Baalah is also called Kiriath-baal (Heb., "the city of Baal," Josh. 15:60) and Baale-Judah (2 Sam. 6:2). **2** A city on the southern border of Judah, possibly the same one elsewhere called Balah (Josh. 19:3) and Bilhah (1 Chron. 4:29) and given to the tribe of Simeon. The site is not known. **3** A mountain on the northern border of Judah near Ekron (Josh. 15:11). ***See also*** Kiriath-jearim.
D.R.B.

Baalath (bah´uh-lath), a place name that is a feminine form of the word *baal* (Heb., "master"), the name of a Semitic deity. It is the name of a city in northern Canaan assigned to the tribe of Dan (Josh. 19:44), whose site is unknown. It is also given as one of the cities later rebuilt by Solomon (1 Kings 9:18), but it is not certain that it is the same city. The city rebuilt by Solomon may have been further south in Judah, perhaps identified with Bealoth (Josh. 15:24) or Baalath-beer (Josh. 19:8), although these identifications are also questionable.

Baalbek (bay´uhl-bek), a city located in the Beqaa Valley of Lebanon. It is the site of Roman Heliopolis and the ruins of temples for the triad of Jupiter, Mercury, and Venus (this is not the Heliopolis of Jer. 43:13, which was the Egyptian city of On). The Heliopolitan cult of Jupiter, Venus, and Mercury at Baalbek, which was an adaptation of one of the older Semitic gods Hadad, Atargatis, and Baal, became widespread throughout the Roman Empire.

The Temple of Bacchus at Baalbek, a city in the Beqaa Valley of Lebanon and site of the Roman city of Heliopolis. The architecture is of typical second-century A.D. Roman design.

Baal-gad (bay´uhl-gad´, bah´uhl-gad´), probably modern Hasbaiya in Lebanon's Beqaa Valley (Josh. 11:17; 12:7; 13:5).

Baal-hamon (bay´uhl-hay´muhn, bah´uhl-hay´muhn; Heb., "Lord of abundance, wealth"), a town, location unknown (Song of Sol. 8:11).

Baalhanan (bay´uhl-hay´nuhn, bah´uhl-hay´nuhn; Heb., "Baal [deity] is gracious"). **1** The son of Achbor, and a pre-Israelite king of Edom (Gen. 36:38–39). **2** A regional overseer of olive and sycamore trees during the reign of King David (1 Chron. 27:28).

Baal-hazor (bay´uhl-hay´zor, bah´uhl-hay´zor; Heb., "Baal of Hazor"), Absalom's location for shearing sheep (2 Sam. 13:23). It is not to be confused with the city of Hazor. It was probably modern Tell Azur, some six miles northeast of Bethel and about five miles south and slightly west of Shiloh.

Baal-hermon (bay´uhl-huhr´muhn, bah´uhl-huhr´muhn; Heb., "Baal of Hermon"), a Hivite town (Judg. 3:3) on the north border of Manasseh's tribal land (1 Chron. 5:23). Some scholars consider it identical to Baal-gad (Josh. 11:17; 12:7; 13:5). If so, it was situated somewhere on the western side of Mount Hermon about equidistant from Tyre and Sidon on the Mediterranean coast. The precise location is unknown.

Baal-meon (bay´uhl-mee´on, bah´uhl-mee´on; Heb., "lord of habitation"), an area assigned to the tribe of Reuben (Num. 32:3, 38; Josh. 13:17; 1 Chron. 5:8). It was Moabite in the ninth century B.C. when the Moabite king Mesha built a reservoir there. It may have been in Israelite hands again in the eighth century, but it reverted to Moabite control later (Jer. 48:23; Ezek. 25:9). It was probably at modern Ma'in about four miles southwest of Medeba and nine miles southwest of Hesban in central Transjordan.

Baal-peor (bay´uhl-pee´or, bah´uhl-pee´or; Heb., "Baal of Peor"), the scene of an Israelite idolatrous episode with the god "Baal of Peor" (Num. 25:3–5) which was long remembered (Hos. 9:10; Deut. 4:3; Ps. 106:28). The site was probably modern Khirbet esh-Sheikh Jayil some eight miles west of Hesban in the Transjordan hills leading down to the Jordan Valley.

Baal-perazim (bay´uhl-pi-ray´zim, bah´uhl-pi-ray´zim), modern Sheikh Bedr northwest of

Jerusalem. David defeated Philistines there (2 Sam. 5:20; 1 Chron. 14:11).

Baal-shalisha (bay´uhl-shal´uh-shuh, bah´uhl-shal´uh´shuh), modern Kefr Thilth southwest of Shechem, from which a man came bringing bread to Elijah (2 Kings 4:42–44).

Baal-tamar (bay´uhl-tay´muhr, bah´uhl-tay´muhr; Heb., "lord of the palm"), the staging area for the successful Israelite assault on Gibeah (Judg. 20:33–48). Its location must have been near Gibeah, but it is yet uncertain. One possibility is modern Ras et-Tawil just north of Jerusalem.

Baal-zebub (bay´uhl-zee´buhb, bah´uhl-zee´buhb; also Beelzebub [bee-el´zi-buhb]), a god worshiped by the Philistines at Ekron (2 Kings 1:2–16). The original form and meaning of the term are unclear. Originally, it may have meant "lord of the lofty abode"; then, because this god was considered by the Hebrews to be an unworthy rival to Yahweh, it may have been revised to "lord of flies" (Baal-zebub). Later, it was altered even further to Beel-zebul, meaning "lord of dung." In the intertestamental period, when numerous names were used to designate the leader of the forces of evil, one of the names selected was Baal-zebub (or the alternative form Beel-zebul). In the Gospels, Jesus denies that he casts out demons by Beel-zebul, "the prince of demons" (Matt. 12:24–27; Mark 3:22–26; Luke 11:15–19; cf. Matt. 10:25). ***See also*** Baal; Devil; Satan. J.M.E.

Baal-zephon (bay´uhl-zee´fon, bah´uhl-zee´fon), possibly Tell Defenneh (Egyptian Tahpanhes) in the eastern Nile delta; a point on the Exodus route (Exod. 14:2; Num. 33:7).

Baana (bay´uh-nuh). **1** The son of Ahilud and a district administrator under King Solomon. He was responsible for provisioning the king for one month of the year from the district around Megiddo and in the Jezreel Valley in north-central Israel (1 Kings 4:12). **2** The son of Hushai and another official with similar duties in Asher, the coastal area of far northern Israel (1 Kings 4:16). **3** The father of Zadok, one who helped repair the Fish Gate in Jerusalem under Nehemiah (Neh. 3:4); he is possibly the same person called Baanah listed as one of those who returned from Babylon with Zerubbabel (Ezra 2:2; Neh. 10:27). ***See also*** Baanah. D.R.B.

Baanah (bay´uh-nuh). **1** A Benjaminite commander of a group of soldiers under Ishbosheth, Saul's son. He and his brother Rechab killed Ishbosheth and took his head to David, thinking David would be pleased at the removal of this threat to his newly established rule. Instead, David was angry at their treachery and ordered them both killed, mutilated, and publicly displayed (2 Sam. 4). **2** The father of Heleb (Heled), one of David's fighting men (2 Sam. 23:29). **3** One who returned with Zerubbabel from the Babylonian captivity (Neh. 7:7), probably the same one who signed the covenant to keep the law (Neh. 10:27); he is possibly the same person elsewhere called Baana whose son helped rebuild the Fish Gate in Jerusalem (Neh. 3:4). ***See also*** Baana; Ishbosheth. D.R.B.

Baasha (bay´uh-shuh), the third king of Israel who gained the throne by murdering his predecessor Nadab (1 Kings 15:27–28). He later exterminated the house of Jeroboam (1 Kings 15:29). His long rule (twenty-four years) was labeled wicked and rebellious (1 Kings 15:34) and his own house was brought to a violent end when Zimri, an Israelite military commander, murdered Baasha's son Elah, in accordance with the prophecy of Jehu (1 Kings 16:1–4). Baasha's contemporary in Judah was Asa, with whom he battled throughout his reign. The main recorded incident was Baasha's attempt to fortify Ramah, resulting in Syrian intervention by Ben-hadad the Syrian king at the request and bribe of Asa (1 Kings 15:16–20). D.L.C.

Babel (bay´buhl), the Hebrew name for Babylon. It was the site of the episode in Gen. 11:1–9, which recounts the origin of separate languages. Once humankind spoke one language, but when people settled in Shinar (understood by most modern scholars as Sumer), they purposed to make bricks and building materials and build a city and tower "with its top in the heavens, and . . . make a name for [themselves], lest [they] be scattered abroad upon the face of the whole earth" (Gen. 11:4). God, beholding this, concluded that with a single common language humankind could do anything it wished, so he confounded human speech, creating linguistic havoc and scattering the people over the earth. The story is thus perhaps a variant on the spread of nations recounted in Genesis 10.

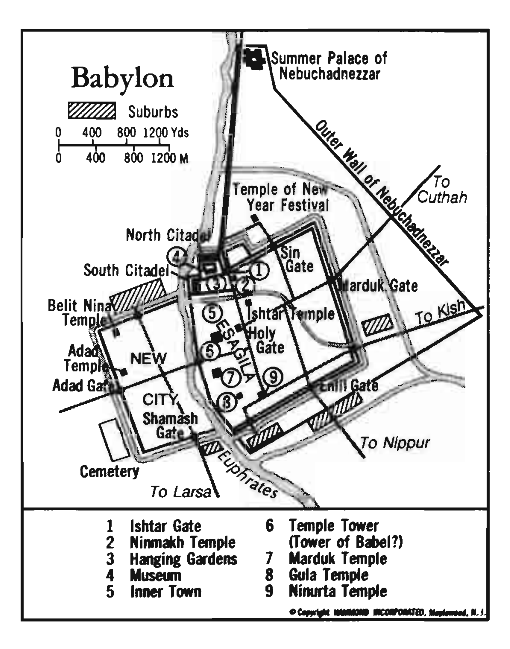
The story neatly divides into two parts: vv. 1–4 recount the proposals of the builders, 5–9 the counter-purposes of the deity. Throughout, plays on the letters "b" and "l" occur: "let us make bricks" (Heb. *nilbenah*), "for stone" (Heb. *le'eben*), and "let us . . . confuse" (Heb. *nabelah*). The place is called "Babel" because "there the Lord confused [Heb. *balal*] the language of all the earth."

The unfinished tower may have been of the common spiral or terraced type known in the Akkadian language as a *ziggurat*. Babylon's own ziggurat, the Marduk temple known as Entemenanki, was not built until the seventh/sixth centuries B.C. The biblical episode has been compared to the building of Esagila in the Babylonian creation epic *Enuma elish* 6.60–62. But whereas the Babylonian tradition reflects deep pride in the building of cities, as an art of civilization, the bib-

lical author characteristically expresses a more negative view. ***See also*** Babylon; Mesopotamia; Sumer; Ziggurat. J.W.R.

Babylon (bab'uh-luhn; from Akkadian *bāb īli,* "the gate of the god"), the Akkadian name of a Mesopotamian city. In the Hebrew Bible, Babylon (Heb. *bavel*) refers both to Babylonia and Babylon, the region and its capital. Babylon covered over two thousand acres, making it one of the largest ancient Mesopotamian sites. It is located along the Euphrates River in the area where it most closely approaches the Tigris River, in what is now Iraq. Its location at the northern end of the Euphrates flood plain gave Babylon potential control of major trade routes.

The German archaeologist Robert Koldewey conducted excavations at Babylon between 1899 and 1917. The Iraq Directorate General of Antiquities began further excavation and restoration in 1958.



Babylonia has supported settled life from as early as the sixth millennium B.C. Babylon is first mentioned in a date formula of the Sargonic king Shar-kali-sharri (2217–2193 B.C.). By this time, there were already two temples on the site.

Under Hammurabi: The city achieved little notoriety, however, until the nineteenth century B.C., when the Amorites, under Sumu-abum, founded their dynasty at Babylon. The previously weak political position of Babylon strengthened during the reign of that city's and dynasty's most famous king, Hammurabi (1792–1750 B.C.). The influence of Babylon spread to the Palestine region; Hammurabi had ambassadors residing at Hazor. Hammurabi's political acumen and charismatic personality enabled him to unify Babylonia, which had heretofore been dotted with independent petty states. Several generations later, in 1595 B.C., his successors lost the city when the Hittites, under Murshili I, sacked Babylon.

The social and cultural climate in Babylon at the time of the Amorite dynasty laid the foundation for spectacular cultural developments. The Law Code of Hammurabi, formulated in conditional clauses, contributed the principle of *lex talionis,* the law of exact retributions. This is expressed in the biblical legal material (Exod. 21:23–25), although its force is qualified by the subsequent formulations that call for the liberation of a slave to compensate for the loss of an eye or tooth (Exod. 21:26–27).

Another legal development in Babylonia at this time was the oral promulgation of acts of justice (Akkadian *mesharum*), which were designed to alleviate short-term social and economic ills. In the Bible this institution is preserved (Heb. *mesharim*) in Pss. 9:9; 58:2; 75:3; 96:10; 98:9; and 99:4.

The scribal school flourished during this Old Babylonian period and gave rise to Babylon's claim to being a literary and scholarly

Plan of the ancient city of Babylon as envisioned by a modern mapmaker, highlighting the city of the sixth century B.C.

center. Its voluminous output was no less important than the longevity of the school. The latest known cuneiform text, dated to A.D. 79, is from Babylon. Scribes in this city, along with those in Uruk, employed the cumbersome cuneiform writing system long after alphabetic scripts had taken hold throughout the Near East. At the end of the first millennium B.C., the scribal school at Babylon produced almost exclusively astronomical and astrological reports. The biblical tradition was aware of this and Isaiah (47:13) reported on astrological readings there.

Succeeding Dynasties and Kings: During the still poorly understood Kassite dynasty (ca. 1570–1150 B.C.), Babylon conducted extensive trade with Egypt during Egypt's Amarna Age. Documents treating the relations between these two regions have been recovered at either end of the Fertile Crescent. Dynastic marriages, such as those between Solomon and Egyptian princesses (1 Kings 9:16), occurred between ruling houses of Egypt and Babylonia.

Babylon did not experience another golden age until the reign of Nabonassar (747–734 B.C.). This period was so significant that the Babylonian Chronicle (a contemporary historical record) began its account with it and later Ptolemaic records assign an exact date and time to its beginning. It is a period marked by a curious blend of cultural achievement and political unrest, a time in which the fortunes of the Israelite nation are intertwined with those of Mesopotamia.

BABYLON

Tiglath-pileser III reigned as king of Assyria from 744–727 B.C. and simultaneously as regent of Babylonia from 728–727 B.C. Known in the Hebrew Bible as Pul, he collected tribute from Menahem of Israel (2 Kings 15:19) and carried off captives from the tribes of Reuben, Gad, and the half-tribe of Manasseh (1 Chron. 5:26). Isaiah (66:19) includes Pul among the rulers to whom God will send a sign of his glory.

During the less glorious reign of his successor, Shalmaneser V (726–722 B.C.), events with great ramifications for the biblical world occurred. Shalmaneser V besieged King Hoshea in Samaria after the Israelite king engaged in intrigue with Egypt against the Babylonian king (2 Kings 18:9–10). Shalmaneser died before the siege of Samaria was completed; credit for this task is claimed by his successor, Sargon II (722–705 B.C.). 2 Kings 18:10–11 records the completion of this siege, although it does not mention Sargon. The author's understanding of the fine points of the chronology seems to have been confused.

Sennacherib, who reigned as king of Assyria (704–681 B.C.) and of Babylon (704–703 B.C.), attempted to take Jerusalem from Hezekiah but failed. He received Temple treasures as tribute but was forced to retreat to Nineveh.

Merodach-Baladan II (721–710 and 703 B.C.) sent envoys to Jerusalem, after which the prophet Isaiah warned that all that was in Hezekiah's house would be carried to Babylon (2 Kings 20:12). In 2 Kings 20:12 this Babylonian king is rightly called Merodach-Baladan; but in Isa. 39:1, he is called Berodach-Baladan.

The next major contact between Babylon and the biblical kings came during the reign of the Babylonian Nebuchadrezzar II (605–562 B.C.). He carried King Jehoiachin of Judah and his family into exile. Records from the palace in Babylon list the rations the Israelite monarch and his family received. Nebuchadrezzar installed Jehoiachin's uncle, Zedekiah, as governor of Jerusalem. When Zedekiah rebelled, Nebuchadrezzar laid siege to the city, destroyed the Temple and carried the remnant of the population off to exile in Babylonia (2 Kings 24:10–25:21).

In the Mesopotamian record, Nebuchadrezzar is remembered for his expansion and restoration of Babylon. Three palaces date to this time period. The Southern Palace, Nebuchadrezzar's principal palace, may have been the site of Belshazzar's feast (Daniel 5). The inner city was divided by a magnificent processional way. At one end stood the Ishtar Gate, decorated wth glazed bricks. The hanging gardens of Babylon were also the creation of Nebuchadrezzar. After these, the most famous architectural remain in Babylon was the ziggurat to Marduk who was there called Entemenanki, Akkadian "the lord of the foundation of heaven and earth." Such a stepped tower may have been the prototype for the Tower of Babel (Gen. 11:9). In Genesis the city's name is said to derive from the Hebrew verb *balal,* "to confuse," thus connecting the city of Babylon with the story of the confusion of tongues. There is only one additional reference to Babylon in the Pentateuch: in Gen. 10:10, it is included among the cities in the kingdom of Nimrod.

The Chronicle of the Babylonian king Nebuchadnezzar II (605–562 B.C.; his name is alternately spelled Nebuchadrezzar) mentions the removal of Jehoiachin of Judah as king of Israel and the appointment of his uncle, Zedekiah, in his place. It also records the siege and destruction of Jerusalem when Zedekiah rebelled in 586.

Political intrigue and domestic unrest plagued Babylonia again. The final Babylonian king, Nabonidus (555–539), exhibited personality flaws severe enough to receive mention in Daniel 4, although there they are ascribed to Nebuchadrezzar. Nabonidus absented himself from Babylon at the time of the New Year's Feast, making its observance impossible, and sequestered himself for ten years in the Arabian caravan city of Teima. A Qumran fragment speaks of this incident.

The weakening of Babylonia left the door open for rule by a new, non-Mesopotamian dynasty. The Persian or Achaemenid dynasty, of which Cyrus (538–530 B.C.) was the first important ruler, restored not only the fortunes of Babylon, but of the cities and regions Babylon had conquered. In 538, Cyrus granted permission for the Jews exiled in Babylonia to return to Jerusalem. Among the Jewish community Cyrus enjoyed a good reputation. Isaiah called him God's anointed (45:1). Restoration of the Temple

was interrupted and not resumed until the reign of the Achaemenid king Darius I (522–486 B.C.).

The Jewish Community in Babylon: In Babylonia, the exilic and postexilic Jewish community developed its own character and left a legacy still felt today. It is clear that the community felt the burden of its position (Ps. 137), but they had the resources to overcome this hardship. Jeremiah strongly encouraged the participation of the Jewish population in the commercial, agricultural, and cultural life of Babylonia. He depicts the well-being of the community (Jer. 29:7).

The prophetic writings in the Bible, heavily concerned with the exilic experience, naturally present several viewpoints about Babylon. In oracles against Babylon, the city is seen as the instrument of divine judgment against Judah. Babylon itself is brought for judgment in Jer. 51:59–64. The mixed feelings toward Babylon and the Exile are seen in the fact that the writings of Ezekiel contain no anti-Babylon strands.

Babylon continued to figure prominently in world and Jewish history. Alexander the Great died there in 323 B.C.

The increasingly powerful and independent Jewish community of Babylonia separated itself from events in Palestine. Following the Roman destruction of the Second Temple (A.D. 70), Babylonian financial support of the Palestinian community stopped. Babylonia's Jews supported neither the war against Rome (A.D. 66–70), nor the Bar-Kochba revolt of A.D. 132–135. It was in Babylon during the subsequent centuries that many of the legal and religious institutions of Judaism developed. The massive Babylonian Talmud is witness and monument to the legal and biblical issues discussed in the academies, to the theological concerns and formulations of the rabbis, and to the folkways and beliefs of the common people. This major Jewish center thrived for centuries, only to be eclipsed with the fall of the Bagdad Caliphate in the eleventh century.

In addition to references to historical Babylon in the NT (Matt. 1:12, 17; Acts 7:43), the name of the ancient city is used there to depict Rome in its hostility to the Christian movement, since Christian authors found Rome's attitude toward and actions against Christian communities comparable to Babylon's treatment of Israel (1 Pet. 5:13; Rev. 14:8; 16:19; 17:5; 18:2, 10, 21).

Parts of the city of Babylon itself lay in ruins sometime in the late first and early second centuries A.D. according to the reports of Strabo, Cassius Dio, and Lucian of Samosata. ***See also*** Babel; Mesopotamia. L.E.P.

Baca (bayʹkuh), unidentified valley associated with weeping or balsam (Ps. 84:6). The term is derived from the verb "to drip," hence its association with weeping.

badger, a medium-sized burrowing mammal. The Hebrew word (*shaphan*) translated "badger" in Ps. 104:18 and Prov. 30:26 and "rock badger" in Lev. 11:5 and Deut. 14:7 more likely refers to the coney or hyrax (*Procavia capensis*), a hare-sized, rock-dwelling ungulate. The true badger (*Meles meles*) also lives in Palestine but is rarely to be seen.

bag (KJV: "scrip"), a knapsacklike bag, usually of leather, for carrying goods and provisions (Jth. 10:5; 13:10, 15). It is distinguished from a purse (Luke 10:4; 22:35–36) and belt for carrying money (Matt. 10:9–10; Mark 6:8). It was not a beggar's bag. The disciples during Jesus' ministry were not to carry such a bag of provisions on their mission but to trust in God's provision.

Bahurim (buh-hairʹuhm), modern Ras et-Tmin east of Mount Scopus by Jersalem. It is mentioned most frequently in the David stories (2 Sam. 3:16; 16:5; 17:18; 19:16; 23:31; 1 Kings 2:8).

baker, one engaged in the process of baking. While baking (Heb. *'aphah*) was a normal daily activity of women engaged in the preparation of meals, the specialized profession of baker (*'opheh*) developed in urban centers. Jer. 37:21 speaks of a "street of the bakers," where those engaged in this trade must have had their shops. Baked products included bread (*lekhem,* Lev. 26:26; Isa. 44:15, 19), leavened and unleavened (*matsah*), for ordinary meals (Gen. 19:3; 1 Sam. 28:24) and ritual purposes (Exod. 12:8; Lev. 6:10; 24:5). Several passages wherein bakers appear are worthy of note. In Genesis 40, the chief baker and cupbearer of Pharaoh, important functionaries at court, are imprisoned with Joseph, who interprets the dreams that preview their fate. Another important text is 1 Sam. 8:13, which is part of the famous passage in which Samuel details the abuses of royal power that will obtain in monarchical Israel. One of these abuses is the corvée, or the impressing of

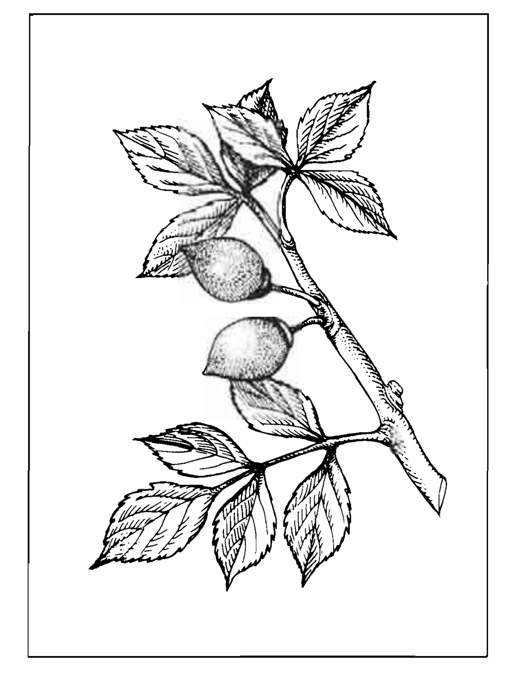
Woman kneading dough; pottery figurine from a Phoenician cemetery at Achziv, eighth–sixth century B.C.

Israelite men and women into royal service: "He [the king] will take your daughters to be perfumers and cooks and bakers." In the futility curse of Lev. 26:26, the scarcity of food is underlined by the statement that ten women will need only one oven for baking bread. A baker appears in Hos. 7:4, 6, but the text and the role of the baker in it are both obscure. J.S.K.

Balaam (bayˈluhm), a non-Israelite prophet known from both biblical and extrabiblical sources as a person from the region of Transjordan skilled not only in divination but also in performative acts. His fame in the culture of the ancient world places him alongside Noah, Daniel, and Job as a folk hero in the repertoire of the storyteller.

Balaam appears commonly in the OT and regularly in the NT as an example of an evil artist, a prophet who would sell his skill for the proper price without reference to the Word of God supposedly represented by his words (Deut. 23:4, 5; Josh. 13:22; 24:9, 10; Neh. 13:2; Mic. 6:5; 2 Pet. 2:15; Jude 11; Rev. 2:14). The fable in Num. 22:21–35 constitutes a narrative from this facet of the tradition. In the fable, Balaam, known to tradition as a *seer of the gods* cannot see as well as his ass. Moreover, Balaam carries the responsibility for causing Israel to sin at Baal-peor (Num. 31:8, 16).

In contrast, the legend in Num. 22–24 holds Balaam in a favorable light. When the antagonist, Balak, hires Balaam to curse the armies of Israel so that his defense against the Israelite threat would be manageable, Balaam responds with an appeal to his prophetic virtue. He can offer Balak only the word given him by God for the occasion. Balaam finishes the scene with an affirmation of his prophetic virtue: "Did I not tell your messengers whom you sent to me, 'If Balak should give me his house full of silver and gold, I would not be able to go beyond the word of the Lord, to do either good or bad of my own will; what the Lord speaks, that will I speak'?" (Num. 24:12–13). ***See also*** Prophet.
G.W.C.



Balak (bayˈlak), the king of Moab and principal antagonist in the Balaam story (Num. 22–24). His pathetic plea for a curse against Israel casts him as a tragic figure, yet places him in comic contrast to the prophet who blesses Israel. ***See also*** Balaam.

balances, instruments devised for weighing. They consisted of a central support and crossbeam from which two equally weighted pans were suspended by cords. From earliest times balances, probably at first hand held, must have been in use for the purpose of commercial transactions. Indeed the balance is a symbol known from the earliest writing and from many illustrations. The weight of an object was determined by its relationship to an accepted standard, at first grain, then stones of various shapes and sizes. Biblical references to balances are numerous, both to false or deceitful scales (Prov. 11:1; 20:23; Hos. 12:7; Amos 8:5) and to just balances (Lev. 19:36; Job 31:6; Prov. 16:11; Ezek. 45:10). Metaphorically the balance was used to judge a person's righteousness (Dan. 5:27; cf. Rev. 6:5), a parallel to the Egyptian religious belief of balancing before the gods the deceased's heart against the *ma'at,* or emblem of truth and justice. S.L.R.

baldness. 1 Hairless forehead (Lev. 14:31; Deut. 14:1). **2** Hairless head condition signifying deprivation (Isa. 3:24), defeat (Isa. 15:2), a sign of repentance (Isa. 22:12), or existence under the threat of destruction (Jer. 47:5; Ezek. 7:18; Amos 8:10).

balm, the resin or gum of the balsam tree (*Commiphora gileadensis*) which was used as a scent for oils and perfumes as well as a medicine to heal wounds (Jer. 8:22). The resin is collected naturally or by incision, and it hardens into small nodules. Often referred to as a "spice," it was traded throughout the Near East (Ezek. 27:17) and was believed to have been planted originally by King Solomon, who received the trees as gifts from the Queen of Sheba (1 Kings 10:10). The balm from Gilead referred to in Gen. 37:25 is probably not from the same plant but was gathered instead from the mastic tree (*Pistachia lentiscus*). ***See also*** Spices. P.L.C.

Balsam, the source of balm.

balsam tree (KJV: "mulberry"), a tree of uncertain species, though a cedarlike conifer appears likely. In David's fight with the Philistines at Rephaim, a grove of balsam trees is given both literal and figurative value. David is instructed to mount an attack on Philistine positions from the rear "opposite the balsam trees" (2 Sam. 5:23). He is then to time his attack "when you hear the sound of marching in the tops of the balsam trees" (5:24) as a sign that the Lord had preceded him into battle (see also 1 Chron. 14:14, 15).

ban (Heb. *ḥerem*),dedication of persons or materials to God. References to the total destruction of towns or persons and their possessions, generally by fire, in consequence of such a dedication are concentrated in the "conquest" era. The ban is connected (though not synonymous) with the taking of booty after battle and warriors' compensation. Items collected under the ban are reserved for the priestly cadre (Lev. 27:21–22; Num. 18:14; Ezek. 44:29), although it is uncertain that the goods "donated" to the Lord in these texts were necessarily obtained in battle. Of cities taken in conquest, Jericho alone is placed off limits for Israelite occupation (Josh. 6). Also under the ban were Ai (Josh. 8), Makkedah, Lachish, Eglon, Hebron, Debir (Josh. 10), and Hazor (Josh. 11). Early practice was regulated, presumably by oracle (Num. 21:1–3; cf. contradictory claims within Josh. 11:12–13).

It may be speculated that the ban originated in order to control pestilential disease, especially bubonic plague, in the wake of warfare. Because Achan had taken as booty items that were under the ban (contaminated), he and all who might be infected by contact were burned with the goods (Josh. 7; cf. Lev. 27:28). Alternatively, the ban may have had its origins in the religious sphere, as part of votary offerings to the Lord of battles—possibly in connection with vows (Num. 21:1–3)—and was later extended in scope.

In the book of Judges the ban is mentioned only in the editorial frame rather than in the older traditions (Judg. 1:17; 21:11). The story of Gideon's ephod seems to caricature the misuse of booty (Judg. 8:22–28).

Under the Israelite monarchy, distribution of booty became the king's prerogative (1 Sam. 30:23–25), and the ban was presented as a comprehensive commandment from antiquity, applicable to all cities within the "promised" land that refused the invaders' offer of peace (Deut. 20:10–18). The most extreme claim, "the whole land . . . all that breathed" (Josh. 10:40), is presumably editorial rather than historical.

Some scholars have compared the *ḥerem* to the *asakkum,* known from cuneiform texts from the city of Mari (eighteenth century B.C.). In these documents, the phrase "to eat the *asakkum*" of god or king refers to a violation of a decree regarding spoils of war. Contemporary with Israelite monarchy, Mesha, king of Moab (ninth century B.C.), boasts of imposing the *ḥerem* on captured Israelites.

In prophetic texts, the ban remained the prerogative of God alone, whether for weal (Zech. 14:11; Isa. 34:5) or for woe (Isa. 43:28; Mal. 3:24). In the postexilic period, a shift seems to have occurred, for the ban mentioned in Ezra 10:8 seems to refer to the confiscation of property due to noncompliance with an administrative decree. R.B.

Bani (bay'nī). **1** One of David's "mighty men," i.e., warriors (2 Sam. 23:36). **2** The head of a family of returned exiles (Ezra 2:10; 10:29; Neh. 10:14). **3** The founder of a family (Ezra 10:38). **4** A descendant of Judah (1 Chron. 9:4). **5** The name of four Levites (1 Chron. 6:46; Neh. 3:17; 9:4; 11:22).

bank, a repository for funds. Temple treasuries served such a purpose. Requirements of trade led to money changing and moneylending. Though the Torah forbade loaning money at interest to a fellow Israelite (Exod. 22:25; Lev. 25:37), such activity was common (Luke 19:11–27; Josephus *Antiquities* 18.157). It constituted a burden for those who fell behind in payments of rent or taxes or needed seed to plant a crop (Luke 16:1–8a). Debtors were punished by imprisonment (Matt. 18:25–34). Josephus reports that at the start of the Jewish revolt in A.D. 66 the records of the moneylenders were destroyed so that debts could not be collected (*War* 2.247). P.P.

banner, a cloth ensign used for identification of a group. The Hebrew term, sometimes translated "ensign," can indicate a cloth object (Isa. 33:23; Ezek. 27:7) used as a rallying point (Isa. 5:26; 11:10; 13:2, hence its use for tribal standards in Num. 2:2), apparently because it could be easily seen. Another term sometimes translated "banner" is formed from a root that means "see." Most often used by an army (see Song of Sol. 6:4, 10), banners are sometimes mentioned symbolically (Exod. 17:15; Song of Sol. 2:4).

banquet, an elaborate meal, often called a feast. People in the Bible use food and drink both as nourishment and as ways of saying something to each other. A meal to which others are invited is a form of communication, with important social messages being exchanged between the host and those invited, those who should or might have been invited but were not, and those who declined the invitation (cf. Matt. 22:1–10). Just as the material used for communication in speech is language, so the material used for communication in a festive meal is food and drink and their setting. Thus the type of food and drink chosen, their mode of preparation, method of

A royal banquet at which the king (probably Ashurbanipal) and queen are served in a garden by attendants with fans; from the reliefs at Nineveh, seventh century B.C.

service, and seating or reclining arrangements all say something about the inviter's assessment of those invited (cf. Luke 14:7–11). A banquet differs from simply sharing a meal with other persons much like a formal speech differs from casual conversation. A banquet is formal communication, usually with messages of great importance (cf. John 13:2–30).

There are two general types of banquets: ceremonial and ritual. A ceremonial banquet is a festive meal at which the inviter and the invited celebrate their mutual solidarity, their belonging to each other, their oneness. The festive meals of Israel's appointed feasts (see Lev. 23:2–44), much like the national and personal celebrations in the story of Esther (banquet for Persian elites, nonelites, and women, Esther 1:3–9; in honor of Esther, Esther 2:18; and of the king and, by ruse, of Mordecai, Esther 5:1–7:10) were such ceremonial banquets. The same is true of the gathering of Christians described by Paul in 1 Cor. 11:17–33.

A ritual banquet is one that marks some personal or interpersonal transition or transformation, held to give honor to those undergoing the important social change. As a ritual feature of hospitality, banquets indicate the transformation of a stranger into a guest (Gen. 19:3–14; Luke 5:29) or of an enemy into a covenant partner (Gen. 26:26–31; 2 Sam. 3:20). Banquets mark important transitional points in a person's life, e.g., Isaac's weaning day (Gen. 21:8); the weddings of Jacob (Gen. 29:22), Samson (Judg. 14:10), the Lamb (Rev. 19:9), and in the parable of Matt. 22:2–10; the birthdays of Pharaoh (Gen. 40:20), of Herod (Mark 6:21); or the victory banquet hosted by God in Rev. 19:17. At the Last Supper Jesus changes the ceremonial banquet of the Jewish Passover into a ritual banquet effectively symbolizing the meaning of his impending death (Mark 14:12–25 and parallels). B.J.M.

baptism, rite involving water. The term is derived from a Greek word meaning "to immerse in or wash with water" (Mark 7:4). Washing rites characterize priestly preparation for offering sacrifice in the OT (Exod. 40:12–15). On the Day of Atonement, the high priest bathes both before and after his offering (Lev. 16:4, 24). Visitors to the Temple should not enter the inner courts without washing hands and feet (*t. Kelim* I.6). Water washings are linked not only with religious purity but also with concern for sinfulness and moral purity (see Isa. 1:16–17; Jer. 4:14; Ezek. 36:25). More domestic versions of these concerns are found in Jewish ablutions in Jesus' time. John 2:6 speaks of large stone jars that hold water "for purification" (see Mark 7:2–4). John's baptism and the ablutions of the Qumran covenanters belong to this tradition of cultic and moral ablutions. Jews also apparently performed baptisms of proselytes as part of the purification of new covenant members (*m. Pesahim* VIII.7; *Eduyyot* V.2).

Baptism in the NT begins with John's baptism, which was a prophetic call to repentance and forgiveness of sins (Mark 1:4). When Jesus is baptised, however, it is understood quite differently: it is *not* for sin (Matt. 3:13–15); rather it is a theophany (i.e. a self-revealing of God) in which Jesus is identified as "Beloved Son" and commissioned as the herald of God's kingdom (Mark 1:10–11; see Isa. 42:1–9). Christian baptism of converts retained the sense of rites of purification (1 Peter 3:21) as well as adoption as God's children. Paul speaks of God pouring his Holy Spirit into converts' hearts, enabling them to say "Abba, Father" (Gal. 4:6; Rom. 8:15–17). This baptism was in some sense to Christianity what circumcision was to Judaism. John 3:3–5, in fact, makes baptism—not circumcision—the formal entrance rite into the covenant community (see Col. 2:11–12).

The interpretation of Christian baptism was fluid in the first century. At Corinth it was compared to Israel's exodus through the sea and its eating of the manna in the desert (1 Cor. 10:1–4). In other places it was compared with Noah's escape from God's wrath on sinners (1 Pet. 3:21). It was also compared with Jesus'

death and resurrection; Christians symbolically die to their sins and former lives, a death they share with Christ, and are buried with him; as they rise from baptism in purity, they share the new life brought by Jesus' resurrection (Rom. 6:1–4). Hence baptism may be compared to a new birth (John 3:4–5).

Although adults were generally baptized, there is a suggestion in Mark 10:13–16 that infants were also baptized. The argument rests on the term "hinder" (Gk. *kōlyō*), which may have been part of the technical terminology of baptism: Jesus tells his disciples not to *"hinder"* the children from coming to him; compare the language of the eunuch in Acts 8:36 who asks, "what is to prevent (Gk. *kōlyō*) my being baptized?" ***See also*** John the Baptist; Proselyte; Purity; Sacraments. J.H.N.

bar (bahr), the Aramaic word for "son," equivalent to the Hebrew *ben,* occurring in phrases such as *bar enash* ("human being"; lit., "son of man," Dan. 7:13) and *bar elahin* ("divine being"; lit., "son of [the] god[s]," Dan. 3:25). It occurs also in personal names, generally as part of a patronymic, such as Barabbas, Bar Jesus, Simon (Peter) Bar-Jona, Barnabas, Bartholomew, Barqos, Barsabbas, and Bartimaeus; in the epithet of the leader of the Second Jewish Revolt Bar Kochba; and in the Jewish ritual Bar Mitzvah (lit., "son of the commandment").

Barabbas (buh-rab´uhs; Heb., "son of Abba"), a person imprisoned for being a bandit or, perhaps, for stirring up rebellion against Roman rule, who tradition holds was released from jail at the time Jesus was crucified (Matt. 27:16; Mark 15:11; Luke 23:18; John 18:40). Roman law treated rebellious subjects as bandits and crucified them at the site of their crimes or near a busy highway as a warning to others. Mark and Matthew report that Pilate had a custom of releasing a prisoner at Passover. John reports that Pilate calls it a Jewish custom when he releases Barabbas. Lack of any evidence for the custom from other sources makes it impossible to evaluate the Gospel tradition. ***See also*** Cross; Trial of Jesus, The. P.P.

Barak (bair´ak; Heb., "lightning"), the son of Abinoam. Commander of Israelite militia and subordinate to Deborah in Ephraim in Judges 4 (prose) and 5 (victory song), Barak was among the deliverers of Israel (1 Sam. 12:11 LXX; cf. Heb. 11:32).

The opposition ("kings of Canaan," Judg. 5:19), headed by Jabin "king of Canaan at Hazor" (4:2, 23) and led by the nine hundred chariots of Sisera (a non-Semitic name) from Harosheth "of the nations," represents domination by other newcomers (Sea Peoples).

When the people sought Deborah's "judgment," she recalled Barak from Kedesh (in Naphtali) and outlined her strategy, after which she returned to Kedesh with Barak (Judg. 4:4–9). Barak mustered ten units (not ten thousand!) from Zebulun and Naphtali. Other tribes also responded, according to Judg. 5. At the waters of Megiddo, Barak routed and destroyed the opposition. Sisera fled far north and was slain by another woman, Jael (Judg. 4:17–22).

This account shows how new Israelite settlements throughout the hill country (late twelfth century) had so disrupted commerce that Israel could challenge, with help of a cloudburst, sophisticated armaments of the plains (i.e., chariots). ***See also*** Army; Judges, The Book of; Sisera. R.B.

barbarian, a term originally referring to one who spoke a foreign language. Herodotus, the Greek historian who lived in the fifth century B.C., called Egyptians "barbarians," i.e., alien speakers. 1 Cor. 14:11 and Ps. 113:1 in the Septuagint (LXX; 114:1 in Hebrew) carry the same nuance. From "alien tongue," barbarian came to mean "alien race, region, or people," i.e., non-Greeks (see, e.g., Acts 28:2, 4).

Used pejoratively, "barbarian" demeaned those lacking Hellenistic culture as crude, coarse, boorish, savage, or bestial (see, e.g., Ezek. 21:36 in the LXX [21:31 in Hebrew]; 2 Macc. 4:25; 15:2). Somewhat milder is Paul's reference to "barbarians" as "backward" or "ignorant" (Rom. 1:14).

Paul and Philo combine "Greek and barbarian" to mean the entire world (excluding Jews). Whereas Philo believed that Judaism united all peoples through Law, Paul foresaw a union forged by Christ (Rom. 1:5, 14). A late Paulinist summarized this view nicely in Col. 3:11. ***See also*** Gentile; Greeks; Nations. C.J.R.

barefoot, unshod, not wearing shoes or sandals. In the OT, it is a sign of reverence in obedience to the divine command, as in the theophanies to Moses (Exod. 3:5) and Joshua (Josh. 5:15). David's going barefoot is probably part of a ritual of penitence (2 Sam. 15:30). In a prophetic symbolic action, Isaiah goes about naked and barefoot for three years as a sign to Judah of the coming defeat by Assyria of Egypt and Ethiopia, Judah's allies, who will be led away naked and barefoot as prisoners of war and exiles (Isa. 20:2–4).

Baris (bair´is; from Heb. *birah*), name given by Flavius Josephus for the Temple fortress of Jerusalem built by Nehemiah (Neh. 2:8; 7:2), later renovated by the Hasmoneans. According to 2 Macc. 4:12, Jason founded a gymnasium "under the citadel." Sostratus was captain of the citadel (4:28), and Menelaus took refuge there during Jason's siege of Jerusalem (5:5). ***See also*** Antonia, Tower of.

Bar-Jesus (bahr-jee´zuhs). ***See*** Elymas.

Bar-Jona (bahr-joh´nuh), an Aramaic surname of Simon Peter meaning "Son of Jona" or "Son of John" (Matt. 16:17; cf. John 1:42; 21:15).

barley, one of the two staple grain crops in the biblical period (wheat was the other). Bread made of barley was the food of lower-income people (Ezek. 4:12; John 6:9). Seven weeks elapsed from the beginning of the barley harvest in late April until the completion of the wheat harvest at the beginning of June (Deut. 16:9–12; Ruth 2:23). The harvest culminated at the feast of Pentecost. Since barley was the staple of the lower classes, failure of the barley harvest or absurdly high prices for barley served as a judgment oracle against the nation (Job 31:40; Rev. 6:6). Real devastation is indicated in Ezek. 4:9 when the prophet is instructed to eat bread composed of all kinds of grains, since there is not enough of any one kind to make a loaf. Ezek. 13:19 may refer to use of barley in connection with divination. Num. 5:15 mandates a barley offering as part of the "test" by which a jealous husband determines the fidelity of his wife. P.P.

Barnabas (bahr´nuh-buhs), according to Acts 4:36–37 a Levite from Cyprus whose cognomen was Joseph and who became a member of the early Christian community in Jerusalem and was surnamed "Barnabas" (Heb., "Son of encouragement") by the apostles. A Diaspora Jew (i.e., one born in a country outside Palestine) who may have come to Jerusalem because of his priestly connections, Barnabas was a cousin of John Mark (Col. 4:10) and soon became a leader in the church. According to Acts, he introduced Saul (Paul), a fellow Greek-speaking Jewish believer in Jesus, to the apostles in Jerusalem (Acts 9:27); this suggests that Acts knew Barnabas to be well versed in the activities of the Christian movement in Syria, where Saul had become a Christian.

After the persecution of the Hellenists (Jewish Christians whose native language was Greek) in Jerusalem, Barnabas appeared in Antioch-on-the-Orontes as a representative of the Jerusalem church (Acts 11:19–26). There, he affirmed the mission to the Gentiles and worked with Saul as senior partner or supervisor of a Christian mission in Syria-Cilicia. Acts reports that he and Saul took the famine offering from Antioch to Jerusalem (Acts 11:27–30; 12:25). If the reports in Acts are accurate, Barnabas must have had a formative role in the development of Saul's theological outlook (but see Gal. 1:13–17). Paul does imply that Barnabas was a fellow apostle (1 Cor. 9:3–6; cf. Acts 14:4, 14). Acts also records that both Paul and Barnabas chose to work with their hands as tradesmen, even though their families had financial means (cf. Acts 4:36; 23:16).

According to Acts, Paul and Barnabas worked together on a mission tour to Cyprus and the Iconium region of Asia Minor (Acts 13:1–14:28), appeared together at the Jerusalem conference (Acts 15:1–35), but then disagreed and separated over the question of allowing John Mark to accompany them on a second tour (Acts 15:36–41) after he had cut short his participation in an earlier tour (13:13). Barnabas's role in the dispute in Antioch over whether circumcised and uncircumcised believers should eat together is obscure (Gal. 2:11–14). According to Acts 15:1–35, Barnabas was a strong defender of not binding circumcision on Gentile converts. Yet he apparently had great respect for Peter and sided with him (and Mark) in the dispute with Paul.

Acts speaks of Barnabas as "a good man, full of the Holy Spirit and of faith" (11:24). Some traditions beyond the canonical writings regard him as the author of the Letter to the Hebrews. Likewise, *The Epistle of Barnabas* is attributed to him, although it actually comes from the second century. ***See also*** Antioch; Apostle; Circumcision; Cyprus; Gentile; Hellenists; Levites; Mark; Paul; Peter; Syria. A.J.M.

barracks. ***See*** Antonia, Tower of.

Barsabbas (bahr-sab´uhs; KJV: "Barsabas," bahr´suh-buhs). **1** According to Acts 1:23–26, "Joseph called Barsabbas, who was surnamed Justus," along with Matthias, was put forward as a candidate to replace Judas Iscariot among the twelve apostles after the latter's death; Matthias was chosen. **2** According to Acts 15:22–34, "Judas called Barsabbas," a prophet and a leader in the Jerusalem church, was given the task, along with Silas, of announcing the decision of the Jerusalem conference to the churches in Antioch, Syria, and Cilicia. They accompanied Paul and Barnabas to Antioch, later returning to Jerusalem. ***See also*** Apostle; Judas; Matthias; Paul; Silas, Silvanus. A.J.M.

Bartholomew (bahr-thol´uh-myoo), one of the twelve apostles about whom little is known. His name appears in all of the NT apostolic lists (Matt. 10:2–4; Mark 3:16–19; Luke 6:14–16; Acts 1:13) but nowhere else in the NT. Because "Bartholomew" follows "Philip" in three of the lists (Matthew, Mark, and Luke), some scholars have identified him with the "Nathanael" whom Philip brought to Jesus (John 1:45–51; Bartholomew is never mentioned in John, nor is Nathanael in Matthew, Mark, or Luke). This identification lacks conclusive evidence, however, and reflects harmonizing tendencies. Later Christian traditions identify Bartholomew as a missionary in India (Eusebius) and author of an apocryphal gospel (Jerome). ***See also*** Apostle; Disciple; Nathanael; Philip; Twelve, The. P.L.S.

Bartimaeus (bahr´tuh-mee´uhs; translated in Mark 10:46 as "son of Timaeus"), a blind beggar

healed by Jesus on leaving Jericho (Mark 10:46–52). The other accounts report Jesus healed two (unnamed) blind men on leaving Jericho (Matt. 20:29–34) or one (unnamed) blind man on entering Jericho (Luke 18:35–43). ***See also*** Blindness; Disease and Healing; Miracles.

Baruch (bair´uhk), Jeremiah's friend and secretary. Baruch, son of Neriah, son of Mahseiah, belonged to a respected Jerusalemite family and his brother, Seraiah, was minister to King Zedekiah (Jer. 51:59). Bullae (seals) of the two brothers, Baruch and Seraiah, have been recently found and published. The bulla of Baruch reads "to/from Baruch // son of Neriah // the scribe" (Heb. *lbrkyhw // bn nryhw // hspr;* plausibly then the biblical name is a hypocoristicon from which the divine name has been removed). The title *hspr,* present also in Jer. 36:32, indicates Baruch's position as a royal clerk, like other people called "scribe" (Heb. *sopher*) in records of his age (e.g., Jer. 36:10, 20).

Baruch's supposed employment may explain his rather sporadic association with Jeremiah—three times only. In the years 605–604 B.C. Jeremiah dictated his prophecies to Baruch, who bravely read the scroll to the people in the Temple and again to the ministers of Jehoiakim (608–598 B.C.). The scroll was then read to the king, who burned it, ordering the seizure of Jeremiah and Baruch. Both went into hiding and rewrote their scroll (Jer. 36). Jeremiah's high opinion of his secretary at that time is illustrated by his dedicating to Baruch a special prophecy that attests (Jer. 45) to the latter's ambitions either in his professional field or as the prophet's disciple who may have been enticed by the hope of attaining prophetic inspiration.

Baruch is mentioned a second time when Jeremiah redeems Hanamel's field in Anathoth (Jer. 32:12–16). The deeds, however, were written by Jeremiah himself, the role of Baruch being limited to their proper preservation. It appears that Jeremiah, detained alone in prison, took advantage of a visit of Baruch in order to entrust him with the legal deeds.

Baruch is mentioned a third and last time (43:3) when "the captains of the forces" inquired of the Lord by Jeremiah in Geruth Chimham (cf. 41:17). However, they refused to follow his advice, charging that Baruch had incited the prophet against them. This confirms Baruch's origins from an influential family known for its pro-Babylonian orientation (51:59). For this reason, the captains, having participated in Zedekiah's revolt and not yet having officially submitted to the Chaldeans, were afraid of the acrimony of the sons of Neriah. In spite of Jeremiah's warnings, the captains opted for fleeing to Egypt and took along both Jeremiah and Baruch. Nothing more is said about the latter, but the records left from this late "Egyptian" period (43:8–13; 44;

An Egyptian scribe, from the fifth dynasty, ca. 2400 B.C. Baruch's profession was similar; he was a royal clerk, or "scribe."

46:13–26) prove that the two friends did not perish violently.

The story in Jeremiah 36 attributes to Baruch the first lasting record of Jeremiah's words (vv. 27–32). Probably a good deal of the extant original words of Jeremiah were contained in that scroll. Yet, internal analysis of the collections of prophecies (chaps. 1–24; 30–31; 33; 46–51) proves that they underwent various transformations before reaching their present form: they were first expanded and reworked by Deuteronomistic and later writers; then they were partly reorganized in collections organized by content. It is therefore no longer possible to reconstruct the scroll of Baruch from the received book of Jeremiah.

According to some modern scholars, the authorship of the biographical chapters in Jeremiah is to be attributed to Baruch. This material consists of two distinct parts: a series of nine independent speeches and episodes (25–29; 32; 34–36), and a continuous story of Jeremiah from the siege of Jerusalem to his captivity in Egypt (37–44). Both portions underwent Deuteronomistic reworking and expansion, but a certain contribution of Baruch is possible for the independent episodes, because these do not start with the beginning of the prophet's career in 627 B.C., but rather "in the beginning of the reign of Jehoiakim" (26:1), nearly when Baruch first appeared at Jeremiah's side.

On the other hand, one cannot credit Baruch with the composition of the continuous story

in 37–44, for the following reasons: first, 37:12–21 and 38:1–13 are two versions of one episode, where Jeremiah is thrown into a pit and taken thence to the court of the Guard. This joining of doublets presumes a long period of oral traditions, and Baruch, a contemporary, did not need to depend on such traditions. Second, the liberation of Jeremiah after the fall of Jerusalem is also told in two versions (39:3, 14 and 39:11–12 + 40:1–6), the second of them being a legendary recasting that makes the archenemy Nebuzaradan confess before Jeremiah the supremacy of the Lord. This tendency reveals the story's affinity with the late Daniel legends (chaps. 2–4; 6). Third, in 40:7–41:18 the author incorporated a source, a chronicle that described the rise and fall of Gedaliah. If Baruch were its author, he would not have passed over in silence his own and his master's fate in that eventful period. That chronicle, then, originated in the court circles and was reused in later times by the compiler of Jeremiah's biography. Fourth, chaps. 42 and 44 have been transmitted, not merely reedited, by a Deuteronomistic writer.

In conclusion, one cannot credit Baruch with the present composition of Jeremiah's words and deeds, but only with the beginning of their recording—a role that well befits this gallant and ambitious but also brave and faithful friend of the prophet. Postexilic Judaism elaborated on his character, attributing to him the composition of one apocryphal book and two apocalypses. ***See also*** Jeremiah, The Book of.

A.R.

Baruch, the Book of, a short collection of prayers and poems from diverse sources, attributed to Baruch, Jeremiah's scribe (Jer. 36:4), and found in the Septuagint (LXX). It is sometimes termed 1 Baruch to distinguish it from two pseudepigraphical writings, *The Syriac Apocalypse of Baruch* (*2 Baruch*), and *The Greek Apocalypse of Baruch* (*3 Baruch*). While difficult to date, Baruch seems to have been composed in Hebrew, possibly early in the second century B.C. The occasional affinities to the language of Jeremiah and Deuteronomy are more likely an indication that the authors have steeped themselves in Scripture than evidence for composition by the historical Baruch. The book has not survived in Hebrew and seems to have been largely ignored by early Christians. The Latin Vulgate and some manuscripts of the LXX include with it the Letter of Jeremiah, although elsewhere the latter appears as a separate work. Protestants treat Baruch as part of the Apocrypha, while Catholics classify it as deuterocanonical. It is composed of four distinct parts.

The narrative introduction (1:1–14) sets the writing in Babylonia during the Exile. Baruch returns the Temple vessels to Jehoiakim, the high priest in Jerusalem, along with funds for burnt and sin offerings and a request that the accompanying prayer of confession be read in the Temple on feast days. The introduction also reflects an attitude of accommodation to gentile authorities in that it requests prayers on behalf of Nebuchadnezzar and Belshazzar, his son. Baruch agrees with *2 Baruch* 6 in associating Jeremiah's scribe with traditions concerning the preservation of the Temple vessels (contrast Ezra 1:7–11).

A prayer of confession (1:15–3:8) is the second part of Baruch. It is a penitential prose prayer on behalf of the inhabitants of Judah as well as the exiles. It addresses God as "Lord" (probably Heb. *Yahweh*) and reflects the point of view of Deuteronomy 28–32 as well as the phraseology of the prayer in Dan. 9:4–19.

A hymn to Wisdom personified (3:9–4:4) is a poem echoing both Job 28, in speaking of a search for Wisdom, and Ecclesiasticus 24, in identifying her as the Torah, the law of God. The personification of Wisdom and the identification with the Torah point to a period late in the development of the wisdom tradition when concern had shifted from practical instruction to revelation as the primary mode of knowledge. This section and the next use the generic term "God" (probably Heb. *Elohim*) rather than "Lord."

A psalm of comfort (4:5–5:9) is the concluding section of Baruch. It is composed primarily of the lament of Zion over her lost children (cf. Lamentations). The tone is one of comfort and hope for the return of the exiles, and in achieving it the psalm frequently echoes Isaiah 40–66.

Since the precise date of Baruch is unknown, it is not clear why its writers, who lived long after the sixth century B.C., chose to appropriate the memory of the Exile. Either the book is intended to express a hope for the end of the Diaspora, or it is related in some way to the desecration of the Temple by the Syrian king Antiochus IV Epiphanes. While it is not highly regarded as Scripture, it provides a valuable look into the development of Jewish traditions during what is essentially a dark age. ***See also*** Apocrypha, Old Testament; Exile; Jeremiah, The Book of; Letter of Jeremiah, The.

D.W.S.

Barzillai (bahr-zil'*i*), one of three wealthy individuals from the region of Gilead who sent food and other supplies to David and his followers when they were at Mahanaim during the rebellion of David's son Absalom (2 Sam. 17:27–29). Invited to become a part of David's court at Jerusalem, Barzillai refused the honor because of his advanced age (eighty years; 2 Sam. 19:31–40).

Basemath (bas´uh-math). **1** A wife of Esau (Gen. 26:34; 36:2–17). **2** Wife of Ahimaaz (1 Kings 4:15—here identified as one of Solomon's daughters).

Bashan (bay´shuhn; Heb., "smooth, soft earth"), the fairly level, very fertile, grain-producing plateau of south Syria extending across the Yarmuq to the foothills of Gilead. The name also included the Jebel Druze, the "many-peaked mountain of Bashan" (Ps. 68:15) as far as Salecah (Heb. *Salkeh;* Deut. 3:10; Josh. 12:5; 13:11; 1 Chron. 5:11). In pre-Israelite days (prior to ca. 1250 B.C.) as the territory of King Og (Num. 21:33; 32:33; Deut. 1:4; 3:4; Josh. 9:10; Neh. 9:22), Bashan included the indeterminate region of Argob (1 Kings 4:13), apparently in the southeast. The fat bulls and cows of Bashan were proverbial (Ps. 22:12; Amos 4:1), as were rams, lambs, and goats, "all of them fatlings of Bashan" (Ezek. 39:18). The great trees of Bashan (Isa. 2:13; Ezek. 27:6) may have come from the mountain. ***See also*** Gilead; Og; Salecah. D.R.B.

basin, a shallow receptacle for liquids. In the OT there are several Hebrew words that mean "basin," "bowl," "laver," or the like. One such word (*mizrak*) describes a utensil used in both cultic (Exod. 27:2; Num. 7) and noncultic settings (Amos 6:6; Zech. 9:15). Another common word (*kiyyor*) also identifies a vessel used in both cultic (Exod. 30:18) and secular settings (Zech. 12:6). Other kinds of basins or bowls were used to catch the blood of sacrificial victims (Exod. 12:22; 24:6), or were temple vessels made of gold (1 Chron. 28:17; Ezra 1:10; 8:27).

bath, a liquid measure, approximately 22 liters, equal to the ephah of dry measure (Ezek. 45:11, 14).

bathing, the immersion of the body, in part or whole, for hygienic, cultic, or recreational purposes. As a normal human activity, bathing includes such instances as Pharaoh's daughter bathing (Exod. 2:5), David washing after mourning the death of Bathsheba's child (2 Sam. 12:20), or the washing of an infant after birth (Ezek. 16:4). A common gesture of hospitality is providing guests with water to wash their feet (Gen. 18:4; 19:2; Judg. 19:21; John 13:4–17; 1 Tim. 5:10). As a ritual act, bathing to remove ritual pollution is part of the priestly consecration ceremony for Aaron and his sons (Exod. 29:4; 30:17–21; 40:30–32; Lev. 8:6; 16:4, 24). Nonpriestly ritual bathings include purification from leprosy (Lev. 14:8–9) and other kinds of personal uncleanness or pollution (Lev. 15, Num. 19), washings that perhaps serve hygienic as well as ritual purposes. Similarly, bathing and the cleanliness of the camp mandated for holy war (Deut. 23:9–14) may be hygienic as well as cultic. The washing of the hands is part

Pharaoh's daughter retrieving the infant Moses from his basket (cf. Exod. 2:5); a panel from the third-century A.D. synagogue at Dura-Europos.

of the ritual of absolution from the bloodshed of an unsolved murder (Deut. 21:6–9).

Figuratively, washing or bathing is a universal symbol of moral cleanness, for instance the cleansing of the hands (Pss. 26:6; 73:13; Isa. 1:15–18) or the heart (Ps. 51:17; Jer. 4:14). Also to be classed as figurative are the washings associated with healing miracles, such as the curing of Naaman's leprosy (2 Kings 5:10–14) or the restoration of sight to the man born blind (John 9:7). A gruesome example of such figurative usage is the picture in Ps. 58:10 of the victor bathing his feet in the blood of his enemies (a description parallel to the picture of the goddess Anat in Canaanite literature wading through the blood of those she has slaughtered). Finally, it has been suggested that the Flood in Genesis 6–8 is to be understood not simply as punishment for sin, but as a means of cleansing the earth of pollution. In the NT, many of these figurative uses are taken up into the symbolism of baptism. J.S.K.

Bathsheba (bath-shee´buh), daughter of Eliam, the son of Ahitophel, one of David's advisors (2 Sam. 11:3; 23:34). The wife of Uriah the Hittite, she was coveted, seduced, and impregnated by David while her husband was with Joab, fighting against the Ammonites at Rabbath, east of the Jordan (2 Sam. 11:1–4). After David had ordered Uriah sent into the forefront of the battle where he was killed, he married Bathsheba. The Bathsheba adultery was rebuked by Nathan the prophet. Bathsheba became the mother of Solomon (2 Sam. 12:24) and begged the elderly David for Solomon's succession to the throne (1 Kings 1:15–17). In another instance, she interceded for Adonijah, Solomon's half-brother, who had requested to be given Abishag the Shunammite (1 Kings

2:13, 22). The name "Sheba" ("Shua" in 1 Chron. 3:5) probably refers to a foreign god, which may indicate the family of Bathsheba was of non-Israelite origin. ***See also*** David.

Y.G.

battering ram, a war engine that usually consisted of a heavy wooden ramrod, probably metal-tipped, suspended within a wooden tower in a fashion that allowed it to be worked back and forth. The tower was wheeled so as to move the ram up an earthen ramp and position it at the base of the walls of a city under siege, and it was also armored to afford protection to those within it who were manning the ram.

The earliest examples of battering rams attested in the ancient Near East are those mentioned in the eighteenth-century B.C. letters of Išme-Dagan and Shamši-Adad of Mari, on the Upper Euphrates, and in seventeenth- and sixteenth-century B.C. documents from Boghazkoy, the Hittite capital. The modern Israeli scholar and statesman Yigael Yadin has argued persuasively that the massive earthen embankments and plastered slopes (*terre pisé* and *glacis*) that first appeared in the Middle Bronze IIB–C period and surrounded nearly all of the city-states of Palestine in the eighteenth to sixteenth centuries B.C. were developed precisely as a defense against these new machines of war.

In the Iron Age (1200 B.C. on) the Assyrians used these formidable weapons against the cities of Israel and Judah. A relief of Tiglath-pileser III (ca. 745–728 B.C.) depicts a battering ram working against a tower of the city wall at Gezer, where archaeological evidence shows a destruction ca. 734 B.C. In 1977–1983, excavations by D. Ussishkin at Lachish uncovered part of the Assyrian siege ramp at the southwest of the mound, vividly corroborating the famous reliefs from the palace of Sennacherib that show, among other details of the battle of 701 B.C., typical Assyrian ramps and battering rams (see 2 Kings 18:13–14).

Biblical references to battering rams include possibly 2 Sam. 20:15, which speaks of Joab "battering" the walls of Abel of Beth-maacah. The prophesies of Ezek. 4:2; 21:22; and 26:9 depict the siege of Jerusalem and Tyre with a surrounding ramp topped with battering rams (see Isa. 22:5). ***See also*** Assyria, Empire of; Gezer; Lachish; Walls; War.

W.G.D.

battle, a military engagement between individuals or armies. War is an almost universal experience and it was certainly not missing in the Palestine of biblical times. According to the book of Genesis human beings have struggled violently among themselves from the very beginning (cf. Gen. 4:23–24) and the Revelation to John depicts this struggle as continuing until the creation of a new heaven and a new earth (cf. Rev. 19:11).

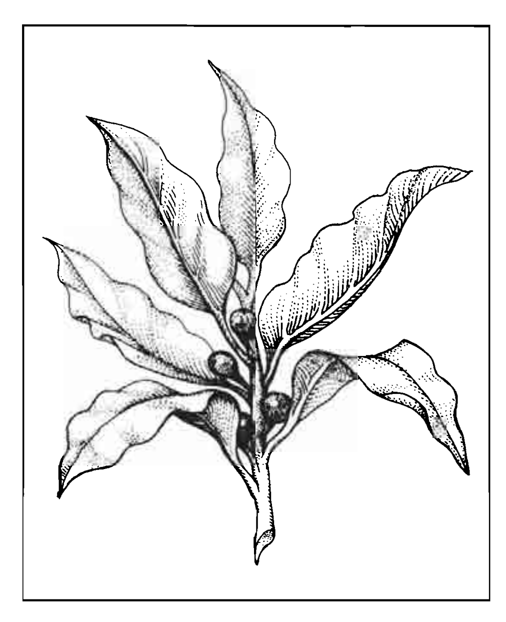
In the Bible there are many references to battles both on a large scale where national armies struggle and in individual combat where each combatant represents his comrades (1 Sam. 17:8–10). In the description of some battles may come hints of strategy (Josh. 8:1–25) or the claim that divine activity is more important than the strength of the soldiers (Exod. 15:1–18).

Israel's own testimony is that its land was gained and subsequently maintained through armed struggle. Battles are recorded with various Canaanite cities and with neighboring countries. From a purely political viewpoint some of these battles were offensive (cf. Josh. 1–12) and some were defensive (Judg. 6:1–8:21).

The "Smiting of Dabigu," a city in northern Syria. The top row shows the town under attack by archers with a sapper and scaler on the right. The bottom row shows the impaled bodies of six vanquished inhabitants; ornamental gates to a palace of Shalmaneser III (858–824 B.C.).

Nations such as Israel or Judah were often forced into battle by complex forces outside their control. One reason for this was geography: the Israelite tribal inheritance lay between the two great civilization centers of Egypt and Mesopotamia. Political tensions between the two civilizations almost always involved Israel as well. Furthermore, two main traveling routes passed through the area, a north-south route along the Mediterranean coast known as the Way of the Sea (Lat. *Via Maris*) and another north-south route in Transjordan known as the King's Highway. These two routes were linked by a road through the Jezreel Valley in northern Israel. The imposing site of Megiddo guarded the western end of the valley and was itself the site of several battles. In fact, the last battle of human history is symbolically depicted as taking place at Armageddon (Rev. 16:16), a name that is a Greek version of the Hebrew phrase "Mountain of Megiddo."

In addition to the many battles mentioned in the Bible, archaeological research has produced evidence of yet more battles involving Israel. The Moabite Stone narrates various struggles between the Omride dynasty in Israel and Moab (ninth century B.C.), and both the annals and palace reliefs of the Assyrian king Sennacherib (ca. 705–681 B.C.) depict battles between the Assyrian forces and Judah under Hezekiah's leadership (727–698 B.C.).



In the NT, Paul uses battle as a metaphor for the Christian life (cf. 1 Cor. 14:8), and the conflict between God and evil is also depicted in the Revelation to John as a battle (Rev. 9:7, 9; 16:14; 20:8). J.A.D.

battle-ax. *See* Weapons.

battlement, often called "parapet," probably a guard rail on a roof. According to Deut. 22:8 persons who owned a house without a guard rail were criminally negligent if someone fell from their roof. An ornate example of a porch railing was found in the excavations at Ramat Rahel, probably the Beth-hacherem of the OT. The railing was made from limestone. Fortified areas, including towers, on the walls of cities were also called battlements, and they were depicted in some of the artwork from the ancient Near East.

bay tree (KJV, Ps. 37:35; RSV: "cedar of Lebanon"), the laurel (*Lauris nobilis*), whose fragrant evergreen leaves are symbols of prosperity and distinction.

beam, a shaped piece of wood whose length far exceeds its girth. In the Bible, beam refers to part of a loom and to timbers for construction, the latter used in both buildings and gates. The "weaver's beam" was the large bar on which the warp cords were wound. It served as the model for a huge spear handle in biblical tradition (1 Sam. 17:7; 2 Sam. 21:19; 1 Chron. 11:23; 20:5). Any wood could be used, but the best was cedar (1 Kings 6:36; Song of Sol. 1:17). Construction beams were used to support walls and ceilings

Green bay (*Lauris nobilis*).

(1 Kings 6:6, 9) and could level stone courses (1 Kings 6:36). They could also be used in gates (Neh. 2:8; 3:3, 6) either as swing pivots or bars for locking against intrusion. Symbolic beams of God's chambers are mentioned in Ps. 104:3. On Persian authority, a beam from a seditious man's house could be used to impale him (Ezra 6:11) and the beams of his house would cry out against an evildoer (Hab. 2:11). The KJV uses the word "beam" (RSV: "log") in Jesus' saying about tending other peoples' minor faults while ignoring the major weakness in oneself (Matt. 7:3–5; Luke 6:41–42). R.S.B.

beards, hair left growing on the lower male face. Beards were worn in a wide variety of styles among ancient Near Eastern peoples. Judging from ancient reliefs, Egyptians were generally clean shaven, Syrians were bearded, while in Mesopotamia the fashion changed several times. The Israelites depicted in the Black Obelisk of Shalmaneser III (mid-ninth century B.C.) and the Israelite delegation standing before Sennacherib in the Lachish reliefs (late eighth century B.C.) are bearded. This fits what we know from the Bible, which prohibits a specific type of beard trim (Lev. 19:27) and where men like David and Ezra are depicted as bearded (1 Sam. 21:13; Ezra 9:3). The lack of a full beard was cause for embarrassment (2 Sam. 10:4–5; cf. Isa. 7:20; Jer 48:37), though occasionally beard-

lessness was a sign of mourning (Jer. 41:5)
M.Z.B.

beasts, large, often dangerous animals. In the Bible the word has several uses. **1** As a general term for animals (Gen. 1:24). **2** As a term for wild, dangerous animals (Rev. 6:8). **3** As a pejorative term for human beings (Titus 1:12). **4** As a term for mythical beings or allegorical symbols. In Daniel 7 four different beasts symbolize four kingdoms. In Revelation a beast from the sea symbolizes the Roman Empire (13:1), a beast from the earth represents the leaders of the province of Asia (13:11), and a beast from the abyss portrays the Antichrist (11:7; 17:8). ***See also*** Abyss; Antichrist, The; Behemoth; Dragon; Leviathan; Rahab; Serpent.

Beatitudes (bee-at′uh-ty*oo*dz; Lat., "blesseds"), declarations typically associated with the Sermon on the Mount in Matthew (5:3–12) and the Sermon on the Plain in Luke (6:20–23). They are pronouncements that confer an end-time blessing upon persons who are characterized by what they are (e.g., the poor) or do (e.g., the peacemakers). The blessing assures the addressees of the vindication and reward that attend the salvation of God's end-time Rule and thus provides encouragement in time of difficulty. Luke has four Beatitudes balanced by four woes (6:20–26), and all take the form of direct address in the second person plural ("Blessed are you . . . "). Matthew has nine Beatitudes and no woes (5:3–12), and all but the last are in the third person plural ("Blessed are the . . ." or "Blessed are those who . . . "). Beatitudes of both types are found in Hebrew and Greek literature.

Many scholars believe that Luke's Beatitudes, with their more direct reference to socioeconomic circumstances (e.g., "Blessed are you poor"), are more nearly original than are Matthew's, which appear to represent a later, "spiritualizing" tendency on the part of the church (e.g., "Blessed are the poor in spirit"); others, however, disagree. Since the four Beatitudes of Luke reappear, with some modification, in Matthew, this interpretation concentrates on the latter. "The poor (in spirit)" are those who are not only economically deprived but who also stand before God with no illusions of self-righteousness or self-sufficiency. "Those who mourn" are those who grieve over sin and evil in the world. "The meek" are those who are lowly and powerless, whose only hope is God. "Those who hunger and thirst for righteousness" are those who yearn for the final salvation that only God can effect. "The merciful" are those who eschew judgment and forgive. "The pure in heart" are those who are undivided in their allegiance to God. "The peacemakers" are those who work for the wholeness and well-being that God wills for a broken world. "Those who are persecuted for righteousness' sake" are those who incur tribulation because, as disciples of Jesus, they serve God. What is promised these various persons is essentially the same benefit, the end-time salvation that attends God's kingly Rule (Matt. 5:3, 10). ***See also*** Kingdom of God; Mercy; Peace; Persecution; Poor; Purity; Righteousness; Sermon on the Mount, The.

Beautiful Gate. ***See*** Nicanor.

Bebai (bee′b*i*), a personal name appearing six times in biblical texts, all in Ezra and Nehemiah. The first identifies a family of 623 returnees from Babylonian captivity (Ezra 2:11). Two references in Ezra 8:11 pertain to Bebai's son, Zechariah. Ezra 10:28 specifies four additional descendants (Jehohanan, Hananiah, Zabbai and Athlai). Neh. 7:16 credits 628 returnees to the family, and Neh. 10:14 lists Bebai as a name on the sealed document of covenant renewal, possibly entered by one of the descendants. If the last reference is independent, two persons are thus named.

Becher (bee′kuhr). **1** A son of Benjamin (Gen. 46:21; 1 Chron. 7:6, 8). **2** An Ephraimite clan (Num. 26:35).

bed (couch), a place to recline. A variety of terms are used with little distinction in meaning. A wooden bed frame (ninth century B.C.) still showing signs of stringing has been found in a tomb in Jericho and is perhaps the type of bed mentioned in 2 Kings 4:10 and 2 Chron. 16:14. Most people slept on the floor or a mud-brick bench (1 Sam. 28:23; Mark 4:21) using garments for mattress and blankets (Exod. 22:27).

The well-to-do often had a separate bed-chamber (2 Sam. 4:7; 2 Kings 11:2) with elaborate furnishings (Esther 1:6). Excavations at the palace of Ahab (871–852 B.C.) revealed large numbers of small ivory pieces which were probably inlaid in furniture (1 Kings 22:39; Amos 6:4). Decorated with colored insets of glass, paste, or gold leaf, the ivories reflect Egyptian influence and show motifs of sphinxes and the child Horus sitting on a lotus plant. These indicate the foreign influence and great wealth that Amos vehemently condemns (Amos 3:15; 6:1–4). The Greco-Roman period saw the addition of banqueting couches in many homes of the wealthy (John 13:23).

The bed functions in a number of ways in the Bible: it is a place to sleep or relax (Ps. 132:3; Luke 17:34); a sign of wealth (Song of Sol. 3:7–10); the location of dreams and visions (Job 7:13; Dan. 2:28); good or evil meditation (Ps. 63:6; Mic. 2:1); a pallet for the sick or disabled (2 Sam. 3:31; Matt. 9:2); the deathbed for the aged (Gen. 49:33) or one who has been murdered (2 Sam. 4:11); a metaphor for death (Job 17:13; Isa. 57:2), life (Exod. 21:18), apostasy (Ezek. 23:17), and marital fidelity (Heb. 13:4); the site of love-

making (Song of Sol. 5:13), adultery (Gen. 49:4), and sexual participation in a foreign cult (Isa. 57:7–9); and an area that can receive or transmit contamination (Lev. 15:4, 5, 21–26). D.R.E.

Beelzebub (bee-el´zi-buhb). ***See*** Baal-zebub.

Beelzebul (bee-el´zi-buhl; Heb., "Baal Prince"). ***See*** Baal-zebub.

Beer (bee´uhr; Heb., "well"). **1** A location where the Israelites dug a well in the Transjordan (Num. 21:16–18). Its exact location is unknown. **2** The place to which Jotham fled for refuge after implicitly attacking the kingship of Abimelech (Judg. 9:21). This was probably modern el-Bireh north of the Plain of Esdraelon and about ten miles south of the southern tip of the Sea of Galilee.

Beeri (bee´uhr-*i*). **1** The Hittite father of Esau's wife Judith (Gen. 26:34), possibly a Canaanite. **2** The name of the father of the Israelite prophet Hosea (Hos. 1:1).

Beeroth (bee´uh-roth; Heb., "wells"; cf. Beirut), a Gibeonite city in Benjamin (Josh. 9:17; 18:25). It was the home of the murderers of Ishbosheth (2 Sam. 4:2–3), and of Naharai, Joab's armor-bearer and one of David's mighty men (2 Sam. 23:37; 1 Chron. 11:39). Seven hundred and forty-three exiles from Beeroth are included in the census of the first return (Ezra 2:25; see also Neh. 7:29; 1 Esd. 5:19). The site has not been conclusively identified, but the most likely location is modern Khirbet el-Burj; note the nearby site Khirbet el-Biyar, which was occupied only in later periods but which may preserve the name of Beeroth. Other suggestions for its location include Nebi Samwil and el-Bireh (east of Ramallah; this may be Berea or Bereth, 1 Macc. 9:4). M.D.C.

Beer-sheba (bee´uhr-shee´buh), the major city in the northern Negev desert, in the territory of the tribe of Simeon (Josh. 19:2). The Beer-sheba plain with its ample winter pasturage is well suited for seminomadic living; thus it served as the principal homestead of Israel's patriarchs.

A double tradition explains the derivation of the name Beer-sheba; both stories concern the question of water rights. Abraham and Abimelech, king of Gerar, settled their dispute over a well (Heb. *beer*) by concluding a treaty "sworn" (Heb. *nishbe'u*) ceremoniously with an offering of "seven" (Heb. *sheba'*) ewes; the site was thereafter named Beer-sheba, i.e., "the well of swearing seven" (Gen. 21:22–32). A generation later, renewed contention between the shepherds of Isaac and Abimelech was resolved by another oath at Beer-sheba (Gen. 26:26–33).

An early tradition records that Samuel's two sons were judges at Beer-sheba (1 Sam. 8:2) and

Reconstructed altar made of hewn stones (cf. Josh. 8:31) found at Beer-sheba, from the eighth century B.C.

it is likely that the city served as a regional administrative center during the monarchy (ca. 1004–586 B.C.). David's realm stretched "from Dan to Beer-sheba"; this geographical description became the standard term of the limits of Israelite settlement in the Promised Land (2 Sam. 17:11; 24:2; 1 Kings 5:5).

The prophet Amos makes critical reference to the sanctity of this southern city (Amos 5:5; 8:14), which could claim Abraham as the founder of its local religious site. The patriarch had planted a tamarisk and "invoked the name of the Lord, God of the Universe" in Beer-sheba (Gen. 21:33).

The Negev was lost to the Edomites in the late seventh century B.C.; Beer-sheba and its environs were temporarily regained during the governorship of Nehemiah (sixth century B.C.; Neh. 11:26).

Archaeological excavations at the mound of Tell es-Saba', three miles east of the modern city, have uncovered five occupation levels in a walled fortress that date to the Israelite period. A large ashlar stone altar, disassembled and reused in secondary construction, was recovered at the site. The altar's profanation may be evidence for the cultic reform undertaken by King Josiah, who centralized worship in Jerusalem (2 Kings 23:8). M.C.

beggar, one who is poor and needy, who begs for food or asks for alms. Frequently the beggar was lame (Acts 3:10), blind (Mark 10:46–52; John 9), or afflicted with sores (Luke 16:19–20). The most famous beggar of the Bible is Lazarus, who, upon death, was received into the bosom of Abraham in contrast to the rich man who went to the torments of Hades (Luke 16:19–30). In Mark (10:46–52) the blind beggar whose sight is restored by Jesus outside Jericho is identified as Bartimaeus, son of Timaeus. In the parallel accounts he is left unnamed (Matt. 20:29–34; Luke 18:35–43). J.G.G.

Behemoth (bi-hee'muhth), a mighty, mortal beast (Job 40:15) valued by God and celebrated for reproductive organs (v. 16). Behemoth served as an object lesson for Job (vv. 19–24). It was probably originally the hippopotamus, but intertestamental authors and later rabbis understood it to be of mythic significance. ***See also*** Leviathan.

beka(h) (bee'kuh), a unit of weight averaging 6.2 grams in the inscribed specimens of balance weights recovered to date. Exod. 38:26 identifies it as half a shekel "by the shekel of the sanctuary" (RSV). See also Gen. 24:22 and Exod. 30:13, 15 for its use as gift and offering. Matt. 17:24 indicates the unit was used as the amount for the Temple tax. ***See also*** Weights and Measures.

Bel (bel), one of the names of Marduk, the leading god of Babylon (Isa. 46:1; Jer. 50:2). In the apocryphal book Bel and the Dragon, Bel is the name of the idol.

Bel and the Dragon, one of the Additions to Daniel found at the end of that book in both the Septuagint and Theodotion, Greek translations of the Hebrew OT. It was probably composed in Hebrew and added to some manuscripts of the Hebrew-Aramaic version of Daniel during the course of the second century B.C.

The narrative is a mixture of folklore and Jewish satire directed against idolatry. It centers around the act of eating, becoming more fantastic and humorous as it goes along. The food offered to the "dead" god, Bel, is eaten by his living priests, who are put to death by the king, Cyrus, for their deception after Daniel exposes them as frauds. The dragon, a living "god," eats Daniel's concoction and dies. Angered, the Babylonians force the king to cast Daniel into the lions' den. The lions' daily ration of two human bodies and two sheep is suspended, but they do not eat Daniel. In the meantime, God transports the prophet Habakkuk from Judea—suspended by his hair—with boiled pottage and bread to feed Daniel while in the lions' den. After a week, Daniel is discovered alive by the king, who comes to mourn him. He orders Daniel's enemies cast into the den, where they are immediately eaten. All of this is designed to prove that only God is God, a theme explored in a more serious vein by the stories in Daniel 1–6.

Protestants include Bel and the Dragon among the Apocrypha, while Catholics print it with the

D.W.S.

Belial (bee'lee-uhl; Heb., "wickedness," "worthlessness"), a popular name for Satan in the Qumran literature. A variant form of the name, Beliar, appears frequently in the Jewish intertestamental literature (*Jubilees, Sibylline Oracles, Testaments of the Twelve Patriarchs*) as well as in the NT (2 Cor. 6:15) and in the rabbinic literature. Following scholarly consensus on the root meaning of the word, the RSV often translates as "worthless fellows" what the KJV more literally renders as "sons of Belial" (see 1 Sam. 10:27).

bells (Heb. *pa'amon,* "striker"), ringing objects, made of gold attached to Aaron's vestments (Exod. 28:33–34; 39:25, 26) as part of a complex of six ritual acts, embracing all human senses, performed inside the tabernacle. Another Hebrew word (*metzilot,* "that which tinkles") refers to bells used in equine trappings (Zech. 14:20). ***See also*** Aaron; Tabernacle.

Beloved Disciple, the, a disciple mentioned only in the Gospel of John and never identified by name. Appearing first at the Last Supper, reclining at Jesus' bosom, at Peter's bidding he asks the identity of Jesus' betrayer (13:23–25). At the crucifixion, standing beneath the cross with Jesus' mother, he is entrusted with her care (19:25–27). On Easter morning, he outruns Peter to Jesus' tomb and finds it empty (20:2–10). Later, in Galilee, he identifies for Peter a figure standing on the shore as the risen Jesus (21:7). Finally, Jesus parries Peter's question about whether the Beloved Disciple will live until Jesus' return (21:20–23), after which—at the end of the narrative—he is identified as the witness behind, and apparently the author of, the Gospel of John (21:24). References to this disciple have also been seen in the "other disciple" who gains for Peter admittance to the courtyard of the high priest (18:15–16) and the trusted witness of 19:35 (cf. 21:24), although in these instances the person is not named. In every case except 19:25–27, 35, the Beloved Disciple appears alongside Peter.

The assumption that the Beloved Disciple must have been one of the Twelve led to the traditional view that he was John the son of Zebedee. Yet that identification is never made in the Gospel. The sons of Zebedee are mentioned only once (21:2) and John never by name. Moreover, the Gospel of John contains none of the episodes in which the sons of Zebedee figure according to the accounts of Mark and the other synoptic Gospels (cf. Mark 1:19–20; 1:29; 3:17; 5:37; 9:2; 10:35–45; 13:3; 14:33). ***See also*** John the Apostle; John, The Gospel According to; John, The Letters of.

D.M.S.

Belshazzar (bel-shaz´uhr; neo-Babylonian *Bel-shar-utzur,* "bel protect the king"), in Dan. 5:2 the son of Nebuchadnezzar and the last king of Babylon (vv. 30–31). He gives a feast that is interrupted by the mysterious appearance of fingers writing on the wall. Daniel interprets the writing and denounces Belshazzar, who is slain that very night.

The historical Belshazzar was the son not of Nebuchadnezzar but of Nabonidus, the last king (556–539 B.C.) of Babylon. Nabonidus was at odds with the Babylonian clergy and withdrew to Teima in the Arabian desert for a period of ten years. In his absence Belshazzar was regent in Babylon, but he did not have the authority to take the king's place in the New Year Festival, so the ceremonies were omitted. Nabonidus had returned to Babylon but fled before its capture by the Persians in 539 B.C. He was later captured but his life was spared. Xenophon, the ancient Greek historian, claims (*Cyropaedia* 7.5) that the Babylonian king was killed when the city fell. This has sometimes been taken as support for Daniel's statement that Belshazzar was killed, but Xenophon's reliability is very doubtful. ***See also*** Daniel, The Book of; Nabonidus; Nebuchadnezzar. J.J.C.

Belteshazzar (bel´ti-shaz´uhr), the Babylonian name given to Daniel at the royal court (Dan. 1:7). The underlying form was probably neo-Babylonian *balatshu-utzur,* "protect his life," which in turn was probably abbreviated from *Bel-* (or *Marduk-*) *balatshu-utzur*—an invocation of a Babylonian god for protection. ***See also*** Daniel, The Book of.

Benaiah (bi-nay´yuh; Heb., "Yahweh has built"). **1** The son of Jehoiada, a priest (1 Chron. 27:5) from Kabzeel (2 Sam. 23:20) and one of David's mighty men (1 Chron. 27:6) who supervised the Cherethites and Pelethites (2 Sam. 8:18) and was renowned for his heroic exploits (2 Sam. 23:20–23). With Zadok and Nathan, he supported Solomon, whose opponents he executed at Solomon's instruction, after which he was appointed chief of the army (1 Kings 1). **2** An Ephraimite commander in David's army (1 Chron. 27:14). **3** A priest who participated in the celebration of the Ark's arrival in Jerusalem during the reign of David (1 Chron. 15:24; 16:6). **4** A levitical musician appointed by David (1 Chron. 15:20; 16:5). **5** The grandfather of Jahaziel, an Asaphite from the time of King Jehoshaphat (2 Chron. 20:14, perhaps to be identified with one of the preceding). **6** A Simeonite leader who settled in rich pastureland near Gedor in the time of Hezekiah (1 Chron. 4:36). **7** A levitical Temple official in the time of Hezekiah (2 Chron. 31:13). **8** The father of Pelatiah, a Jerusalemite leader who died after Ezekiel's condemnation (Ezek. 11:1, 13). **9** The name of several postexilic Israelites who divorced their foreign wives in response to Ezra's proclamation (Ezra 10:25, 30, 35, 43; 1 Esd. 9 gives different names). F.E.G.

Ben-ammi (ben-am´*i*; Heb., "son of my kin"), the name given by Lot's daughter to the offspring of her incestuous union with her father; the ancestor of the Ammonites (Gen. 19:38).

benediction, a prayer for God's blessing on someone or a prayer recognizing that blessing has been given. The great priestly blessing (Num. 6:24–26), the beatitudes (Matt. 5:2–12) and the ending of some letters (e.g., Rom. 15:13; 2 Cor. 13:14; Heb. 13:20–21) are prominent examples.

Benedictus (ben´uh-dik´toos; Lat., "blessed"), **the** the poetic oracle attributed to Zechariah the father of John the Baptist in Luke 1:68–79, named for the first word in the Latin translation. According to the account, Zechariah was struck dumb when he disbelieved the angelic promise of John's birth (Luke 1:5–25); then, when John was born and Zechariah indicated that his name should be "John," his tongue was loosed and he delivered the oracle (vv. 57–67). His psalm praises God for the mighty act of salvation about to be accomplished and emphasizes that John will be the forerunner for *the one* who is to be the instrument of this salvation. As the "Benedictus," Zechariah's psalm entered the liturgy of the church. ***See also*** Elizabeth; Hymn; John the Baptist; Music; Oracle; Zechariah. J.M.E.

Ben-hadad (ben-hay´dad; Heb., "son of Hadad"), the name of several kings of Damascus. Scholars disagree as to whether biblical references to a king of Damascus by this name refer to two or three separate individuals. In addition, Assyrian texts mention Adad-idri (Hadadezer) and Mari (an Aramaic title meaning "my lord"), which may be alternate names for some of the same rulers. The available information indicates the following: **1** The son of Tabrimmon, who was bribed by Judah's King Asa (early ninth century B.C.) to break his alliance with Israel, after which he conquered several cities and the territory of Naphtali (1 Kings 15:18–21). **2** In the ninth century, a king who erected a stele near Aleppo in honor of the Tyrian god Melqart. **3** The king who attacked Israel several times during the reign of Ahab (mid-ninth century B.C.), who was able to defeat him. Although Ben-hadad fled, he was forced to restore cities he had taken from Ahab's father, Omri, and grant Ahab commercial privileges in Damascus (1 Kings 20). **4** Hazadezer, who participated with Ahab in a coalition of Syrian kings who resisted the army of the Assyrian emperor Shalmaneser III at Qarqar in 853. **5** One who besieged Samaria during the time of Elisha (mid-ninth century B.C.) (2 Kings 6:24). This Ben-hadad was murdered by Hazael, one of his officers (2 Kings 8:7–15), after re-

ceiving a prophecy from Elisha. **6** A king who led an unsuccessful coalition of several north Syrian kings against King Zakir of Hamath early in the eighth century B.C. **7** The son of Hazael, who took several cities from Jehoahaz, king of Israel, and whose son Jehoash recaptured them (2 Kings 13:24–25). **8** Mari, who paid tribute to the Assyrian king Adad-nirari III after being besieged in Damascus. It is from such data that one must reconstruct careers and names of the Syrian kings. F.E.G.

Benjamin (ben´juh-muhn; Heb., "son of the right hand," hence "southern"; similar to the name of a nomadic group mentioned in eighteenth-century B.C. documents from the upper Euphrates kingdom of Mari), Jacob's last son, born after his return from Mesopotamia. Benjamin was named *Ben-oni* (Heb., "son of my suffering") by his mother, Rachel, who died in childbirth, although Jacob preferred "Benjamin" (Gen. 35:18). He is mentioned often in association with Joseph, his only full brother. These facts imply that the tribe of Benjamin, which occupied the central ridge between Jerusalem and Bethel (Josh. 18:11–20) and traced its ancestry back to Benjamin, was originally associated with the northern tribes and may have formed as a separate entity relatively late, after arriving in Canaan. An atrocity in Benjaminite territory created friction with other Israelite tribes (Judges 19–21). The judge Ehud came from the tribe of Benjamin as did Saul, Israel's first king. The tribe also recognized Saul's son Eshbaal (Ishbosheth) rather than David until Abner insisted otherwise (2 Sam. 2:8–9; 3:17–21). The tribe, which constituted one of Solomon's administrative districts (1 Kings 4:18), produced two opponents to the Davidic dynasty, Shimei and Sheba (2 Sam 16:5; 19:16; 20:1), but was incorporated into the Southern Kingdom by Solomon's successor, presumably to provide a buffer for Jerusalem. ***See also*** David; Joseph; Rachel; Tribes, The. F.E.G.

Beracah (bair´uh-kuh; Heb., "blessing" or "praise"). **1** A kinsman of Saul from the tribe of Benjamin who joined David's fighting men at Ziklag (1 Chron. 12:3). **2** A valley in central Judah near Tekoa. During the reign of Jehoshaphat an alliance was formed by Edom, Ammon, and Moab and they invaded Judah. But, as promised by the prophet Jahaziel, the army was destroyed when they began fighting among themselves; the people "blessed" God for the victory, because of the spoils taken and the peace that would follow, and named the site accordingly (2 Chron. 20:26). The location has not been identified. ***See also*** Jahaziel. D.R.B.

Berea (bi-ree´uh). ***See*** Beroea.

Berechiah (bair´uh-ki´uh; Heb., "Yah[weh] has blessed"). **1** A son of Zerubbabel (1 Chron. 3:20). **2** The father of Asaph and son of Shimea; a Levite (1 Chron. 6:39; 15:17). **3** A son of Asa; a Levite and a gatekeeper for the Ark (1 Chron. 9:16; 15:23). **4** A son of Meshillemoth; an Ephraimite chief (2 Chron. 28:12). **5** The father of Meshullam (Neh. 3:4, 30; 6:18). **6** The father of the prophet Zechariah, a son of Iddo (Zech. 1:1, 7). **7** The full name of Jeremiah's scribe Baruch, occurring on a late seventh-century B.C. seal impression from Judah that reads "Belonging to Berechiah son of Neriah the scribe." **8** Beracah, a Benjaminite follower of David (1 Chron. 12:3), whose name is often emended to Berechiah (cf. LXX). ***See also*** Baruch. M.D.C.

Beriah (bi-ri´uh; Heb., "in misery" or "in misfortune"; see 1 Chron. 7:23). **1** A son of Asher; he was among those who went with Jacob to Egypt at Joseph's invitation (Gen. 46:17). He became the head of a family group (Beriites) who later left Egypt in the Exodus with Moses (Num. 26:44). **2** A son of Ephraim, born after two other sons, Ezer and Elead, were killed by the Philistines in a livestock raid against Gath; his name reflects the mourning for those killed (1 Chron. 7:23). **3** A Benjaminite clan leader who lived at Aijalon and was successful in fighting the Philistines at Gath (1 Chron. 8:13, 16). Some scholars think he may be the same as 2, reflecting a family group of mixed Ephraimite and Benjaminite origins. **4** A Levite, the son of Shimei of the Gershonite clan (1 Chron. 23:10–11). D.R.B.

Bernice (buhr-nees´), daughter of Herod Agrippa I and sister of Herod Agrippa II. She was married to Herod of Chalcis, her father's brother. After his death, in A.D. 48, she apparently carried on an incestuous relationship with her brother, with whom she listened to Paul while he was a prisoner in Caesarea (Acts 25:13–26:32). In A.D. 64, she married Polomon of Cilicia but then abandoned him to continue her incestuous affair. When Titus Flavius Vespasianus came to Palestine, she became his mistress and later followed him to Rome, causing a scandal. ***See also*** Agrippa I; Agrippa II; Herod.

Berodach-baladan (buh-roh´dak-bal´uh-duhn), KJV spelling at 2 Kings 20:12 for Merodach-baladan. ***See*** Merodach-baladan.

Beroea (bi-ree´uh; KJV: "Berea"), a Macedonian city located twenty-four miles inland from the Aegean Sea in the plain below Mt. Bermion. Springs in the area gave the city its name, "place of many waters." After leaving Thessalonica during the second journey, Paul and Silas probably traveled the main east-west Roman road, the Egnatian Way, to Beroea, where the people were receptive to Paul's message and escorted him safely to Athens (Acts 17:10–15). El-Bireh in Palestine is sometimes referred to as Berea (1 Macc. 9:4).

beryl, a precious stone of a sea-green color. Emerald and aquamarine are two types of beryl. It was one of the twelve stones on the high priest's breastplate (Exod. 28:20), one of the jewels worn by the king of Tyre (Ezek. 28:13), and the eighth foundation of the wall of the heavenly Jerusalem (Rev. 21:20).

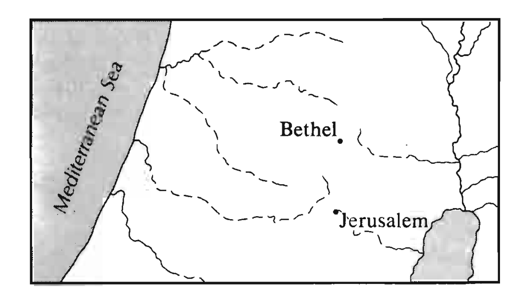
beth (beth), the second letter of the Hebrew alphabet. It has a numeric value of two. It has been proposed that the letter was originally a crude pictogram of a house. The use of this term as "house" or "dwelling" resulted in its use as a portion of compound place names such as Bethlehem, Bethel, Bethphage, Bethsaida, and the like. The term can also be used to indicate a dynasty such as the "house of David," a reference to the heirs of the Davidic line.

Bethabara (beth-ab´uh-ruh; Heb., "house of the ford"), where John was baptizing (John 1:28 KJV, favored by Origen; the best manuscripts, however, and now the RSV read "Bethany"). John 1:28 describes the place of baptizing as "beyond the Jordan," but a sixth-century mosaic floor map discovered in Madeba, Jordan, shows Bethabara on the west side of the river, near the present traditional site of Jesus' baptism. ***See also*** Bethany.

Beth-anath (beth-ay´nath; Heb., "temple of Anat [a deity]"), a walled Canaanite city in the territory of Naphtali in upper Galilee (Josh. 19:38) whose inhabitants the Israelites could not expel but subjugated as servants (Judg. 1:33). Its location is not certain, although it is sometimes identified with modern Safed el-Battikh, about fifteen miles east and slightly south of Tyre.

Bethany (beth´uh-nee). **1** A village on the lower eastern slope of the Mount of Olives (Mark 11:1; Luke 19:29), about fifteen stadia (approximately two miles) east of Jerusalem (John 11:18), where Jesus visited his friends, Mary, Martha, and Lazarus (Luke 10:38–42; John 12:1–8; cf. Matt. 21:17; Mark 11:11), raised Lazarus from the dead (John 11:1–44), and was anointed in the home of Simon the Leper (Matt. 26:6–13; Mark 14:3–9; cf. Luke 7:36–50). Jesus' triumphal entry into Jerusalem began here (Mark 11:1–11; Luke 19:28–38). The name of the present-day village, El-Azarieh, is the Arabic form of Lazarion, the fourth-century name of the village and the church that was built over the traditional site of Lazarus' tomb. Excavations revealed that the first church, probably destroyed by an earthquake, was replaced by a fifth-century structure which underwent modifications through the centuries. In the 1950s, a new church was built on the foundations of earlier ones. Within the church's precincts are numerous rock-cut tombs. One particularly impressive tomb, below the adjacent mosque, with a vestibule and vaulted inner chamber, is the traditional tomb of Lazarus. **2** Bethany beyond the Jordan, where John the Baptist baptized (John 1:28); it is Bethabara in some manuscripts. Its location is unknown. ***See also*** Bethabara; Lazarus; Martha; Mary. M.K.M.

Beth-arabah (beth-air´uh-buh), a town on the northern border of Judah (Josh. 15:6, 61) and the southern border of Benjamin (Josh. 18:18, 22), possibly modern 'Ain el-Gharbah southeast of Jericho.



Beth-aven (beth-ay´vuhn). **1** A location near Ai (Josh. 7:2). **2** A regional designation for the northwest corner of land allotted to Benjamin (Josh. 18:12). 1 Sam. 13:5 places it west of Michmash and 14:23 states that Saul's conflict with the Philistines moved "beyond" into Ephraimite territory. The prophet Hosea warns against visiting there as a possible idolatrous act (4:15), considers it a site for issuing public warnings (5:8), and associates an idolatrous calf (calves) with it (10:5), the latter a possible designation of Bethel and its shrine.

Discussion of the site identification continues, but recent survey data support the site Tell Maryam, just west of Michmash, as likely.

Beth-eglaim (beth-eg´lay-im), a place not mentioned in the Bible but included in the *Onomasticon* of Eusebius, bishop of Caesarea, in the early fourth century A.D. It was formerly identified with Tell el-'Ajjul, located about four miles southwest of modern Gaza, but this *tell* is now thought to be the site of ancient Sharuhen. The location of Beth-eglaim thus remains unknown. ***See also*** Sharuhen.

Bethel (beth´uhl), an important biblical city (modern Beitin) on the north-south mountain road north of Jerusalem. Bethel had few natural defenses, but it did have plentiful water from nearby springs. It also stood at the intersection of the north-south road that passed through the central hill country and the main east-west road that led from Jericho to the Mediterranean Sea.

W. F. Albright made a trial excavation at Bethel in 1927. Albright then mounted a full excavation in 1934. His assistant that year, J. L. Kelso, continued the excavation in 1954, 1957, and 1960.

Their excavations revealed a thriving town of the Middle Bronze Age (2000–1500 B.C.), the period of the biblical patriarchs. Remains included a stone sanctuary with many cultic objects.

Bethel, formerly named Luz (Gen. 28:19), was conquered by the Joseph tribes (late thirteenth century B.C.; Judg. 1:22–25) and became a part of the tribe of Ephraim. The religious heritage of Bethel for the Hebrews went back to Jacob (eighteenth century B.C.). When Jacob was going to Aram, he spent the night at Bethel and had a dream. As a result he built a shrine there and named the place Bethel (Heb., "house of God"; Gen. 28:19; 35:1–7).

Surprisingly, the conquest of Bethel is not mentioned in the book of Joshua. However, the men of Bethel are said to have aided the men of Ai against the Hebrews (Josh. 8:17). This makes the omission of the conquest of Bethel even more striking. The site of Beitin does show a massive destruction by fire at the end of the Late Bronze Age, the time usually ascribed to the conquest (late thirteenth century B.C.). W. F. Albright has suggested that the biblical account of the fall of Ai was transferred from the capture and destruction of Bethel. It should be noted that Ai (modern et-Tell, southeast of Bethel) was not inhabited at the time of the conquest; it was only an impressive ruin.

In addition to the discoveries dating from the Middle Bronze Age, several fine houses were excavated dating to the Late Bronze Age (1500–1200 B.C.). Also belonging to this period were flagstone pavements and a drainage system.

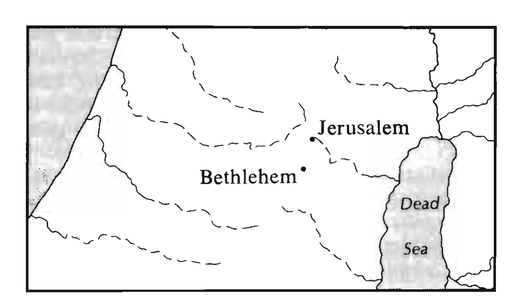
In the period of the judges (1200–1000 B.C.), Bethel was an important town. The Ark of the Covenant was located there for a time (Judg. 20:18–28), and it was a center of the tribal confederacy. Samuel made regular visits to Bethel on his annual circuit while he was a judge. But the town was not mentioned during the reigns of David and Solomon, its role as a sanctuary apparently being usurped by Jerusalem, the capital city. With the division of the kingdoms during the reign of Rehoboam, Bethel again rose to prominence (late tenth century B.C.). Jeroboam I made it a chief sanctuary and set up a golden calf there (1 Kings 12:26–33). Bethel was a royal sanctuary at the time of Amos (Amos 7:12–13). From the evidence of excavation, Bethel was apparently destroyed by the Assyrians (722–721 B.C.). During the resurgence of Judah's power at the time of Josiah (ca. 639–609 B.C.), Bethel's sanctuary was destroyed and its priests killed (2 Kings 23:15–20), but the city was spared. Bethel was not destroyed by the Babylonians under Nebuchadrezzar but was destroyed either by the Babylonian ruler Nabonidus or the Persians.

The town was soon rebuilt and showed continued growth through the Hellenistic and Roman periods (333 B.C.–A.D. 324). The Roman town shows the first use of cisterns, suggesting an increased population or water use beyond the capacity of the springs. The city reached its greatest extent during the Byzantine period (early Middle Ages). A reservoir just below the mound supplemented the water supply for this age. A main street of the Byzantine city is still in use. The ancient city was abandoned about the time of the Arab conquest. ***See also*** Ai; Luz.

J.F.D.

Bethesda (buh-thez´duh), a name found in later NT manuscripts for the original Bethzatha in John 5:2. It is the Hebrew name of the pool near the "sheep gate" in Jerusalem. ***See also*** Bethzatha.

Beth-hoglah (beth-hog´luh; Heb., meaning uncertain, possibly "the place of the partridge"), a city on the border of Judah and Benjamin but assigned to the tribe of Benjamin (Josh. 15:6; 18:21). It is tentatively identified with modern Ein Hajlah, about six miles northwest of the mouth of the Jordan River.



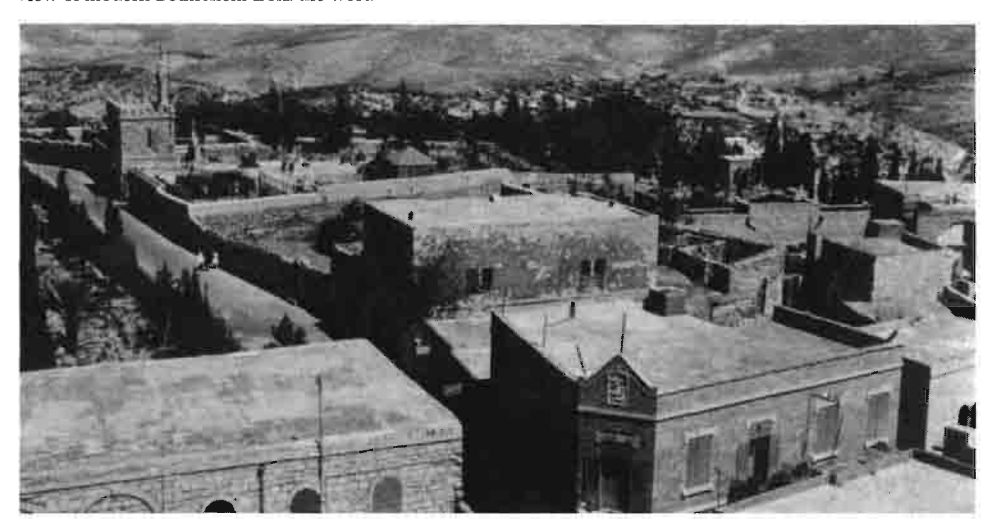
Beth-horon (beth-hor´uhn; Heb., "house of [the god] Horon"), a city of refuge assigned to the levitical family of Kohath (Josh. 21:22; 1 Chron. 6:68), one of twin cities in Ephraim (Josh. 16:3, 5; 1 Chron. 7:24) near the border of Benjamin (Josh. 18:13, 14). "Upper" and "Lower" Beth-horon are frequently distinguished; these designations survive in the modern Arabic names Beit Ur el-Foqa and Beit Ur el-Tachta. They guarded a major pass on the road from the coast by way of the Valley of Aijalon to the hill country and Jerusalem (see 2 Sam. 13:34, Septuagint); because of this strategic location, Beth-horon was the site of frequent military activity. Joshua chased the Amorite kings from Gibeon "by way of the ascent of Beth-horon" (Josh. 10:10–11; cf. *Jubilees* 34:4); it was attacked by Philistine raiders (1 Sam. 13:18) and Amaziah's northern mercenaries (2 Chron. 25:13); Solomon fortified it (1 Kings 9:17; 2 Chron. 8:5), but the pharaoh Shishak captured it in ca. 925 B.C. Judas Maccabeus defeated Seron there (1 Macc. 3:16, 24); Nicanor's army camped there (1 Macc. 7:39); later Bacchides refortified it (1 Macc. 9:50; see also Jth. 4:4). ***See also*** Shishak.

M.D.C.

Beth-jeshimoth (beth-jes´uh-moth), a settlement east of the Jordan in the plains of Moab opposite Jericho, the area of one of the encampments of the Israelites (Num. 33:49). It was captured by Joshua and assigned to the tribe of Reuben (Josh. 12:3; 13:20), although by the time of the Exile it was again under Moabite control (Ezek. 25:9). The site is usually identified as modern Tell el 'Azeima, about two and a half miles northeast of the north end of the Dead Sea. ***See also*** Jeshimon.

Bethlehem (beth'li-hem; Heb. *beth lehem,* "house of bread"; Arabic *beit lahm,* "house of meat"). **1** A small town of approximately fifteen thousand inhabitants, about five miles south of Jerusalem, but now forming part of the modern Jerusalem-Bethlehem conurbation. Perched 2,460 feet (750 m.) above sea level on the north-south ridge road along the central highlands, it looks westward to the fertile cultivated slopes around Beit Jala and eastward to the desolate wilderness of Judah, in which is the ancient monastery of Mar Saba in the Wadi en-Nar. Close outside to the north is the traditional site of the tomb of Rachel (Gen. 35:19; 48:7), profoundly sacred to the Jewish people, although it is possible that the true site is north of Jerusalem near Ramah (1 Sam. 10:2).

Bethlehem was first mentioned in one of the Amarna letters (letters written to Egyptian pharaohs by local kings of Palestine and Syria prior to ca. 1250 B.C.) in the fourteenth century B.C., in which the Jerusalem ruler complained that *Bit-Lahmi* had deserted to the side of the *Apiru* people (perhaps "Hebrew" people). Prior to the period of the Israelite monarchy, Bethlehem was the home of the Levite who went to act as priest for a man named Micah in Ephraim (Judg. 17:7–13) and of the unfortunate concubine, whose murder caused the tragic massacre of the people of Gibeah (Judg. 19–20). Bethlehem figures prominently also in the story of Ruth, the great-grandmother of David (Ruth 1; 2:4; 4:11). Its greatest importance in the OT, however, is its relation to King David. It was his family home (1 Sam. 16:1; 17:12) and the place of his anointment as king (1 Sam. 16:4–13). At one time under Philistine control (2 Sam. 23:13–17) Bethlehem was also the home of Elhanan, one of the thirty mighty men who



formed David's bodyguard. It was the home also of Asahel, another of the thirty (2 Sam. 23:24), who was later buried there (2 Sam. 2:32).

After the division of the Hebrew kingdom into Israel (north) and Judah (south) following Solomon's death, Bethlehem was one of the fifteen cities in Benjamin and Judah fortified by Rehoboam (2 Chron. 11:5–12). Following the murder of Gedaliah the governor of Judah under the Babylonians in 582 B.C. some of the Judean refugees stayed near Bethlehem on their way to Egypt. Subsequently, over a hundred Bethlehemites were among those who returned from Babylon (Ezra 2:21; Neh. 7:26).

The great importance of Bethlehem for Christians throughout the centuries is that the Gospels record the birth of Jesus as having taken place there, in fulfillment of a prophecy of Micah (Mic. 5:2; Matt. 2; Luke 2; John 7:42). The traditional site of the manger in which the infant Jesus was laid (Luke 2:7) is a cave under the great Church of the Nativity, the place of the manger being marked by a star with the Latin inscription *Hic De Virgine Maria Jesus Christus Natus Est,* "Here Jesus Christ Was Born of the Virgin Mary." A bitter dispute between the

View of modern Bethlehem from the west.

Orthodox and Roman Catholics about this star (1847–53) was one of the causes of the Crimean War (1853–56). The tombs of Jerome (d. 420) and his friends Paula (d. 404) and Eusebius of Cremona (d. ca. 423) are in neighboring grottoes.

Bethlehem was destroyed by the emperor Hadrian in the second century A.D., but in about 325, after the empire had become Christian, Queen Helena, the mother of Constantine, promoted the building of the great church. Badly damaged during the Samaritan revolt of 521–528, the church was rebuilt in the sixth century in very much its present form by the emperor Justinian. It was spared during the savage Persian invasion of 614 because the soldiers saw the mosaic portrayal of the three Magi in Persian costume.

2 A small town in the hill country of Zebulun (Josh. 19:15) about seven miles northwest of Nazareth, probably (though this is not certain) the home and burial place of Ibzan, one of the minor judges (Judg. 12:8–10).

3 In 1 Chronicles a personal name, once of a descendant of Caleb (2:51, 54), and once of the son of Ephrathah, a descendant of Hur (4:4). Since Ephrath is identified with the Bethlehem in Judah (Gen. 35:19; Ruth 4:11; Mic. 5:2), the names here are probably tribal rather than personal. ***See also*** Benjamin; Gibeah; Judah; Rachel; Ramah; Rehoboam. D.B.

Bethlehem, Star of. ***See*** Stars, Star of Bethlehem.

Beth-pelet (beth-pee´lit; Heb., "house of refuge"; KJV: "Beth-palet"), a town of the tribe of Judah at the southern extremity of its territory (Josh. 15:27). Also settled in postexilic times (Neh. 11:26), its location is still in dispute.

Beth-peor (beth-pee´or; Heb., "temple of Peor"), a settlement on the western edge of the Moabite plateau, part of the territory assigned to the tribe of Reuben (Josh. 13:20). The site is undoubtedly near Mount Nebo, but its exact location remains unknown. Its name probably indicates that Beth-peor was a religious center of the god Baal-peor.

Just before their invasion of Canaan, the Israelites camped "in the valley opposite Beth-peor," where Moses recounted their long journey and repeated Israel's covenant obligations (Deut. 3:29; 4:46). Shortly thereafter, Moses viewed the promised land from Mount Pisgah, died, and was buried in the vicinity of Beth-peor (Deut. 34:1–6). ***See also*** Baal-peor; Peor. G.L.M.

Bethphage (beth´fuh-jee; Heb., "house of unripe figs"), a village apparently on the Mount of Olives, near Bethany, where Jesus sent his disciples to procure an ass for his triumphal entry into Jerusalem (Matt. 21:1; Mark 11:1; Luke 19:29). Its exact location has never been determined.

Bethsaida (beth-say´uh-duh; Heb., "house of the fisherman"), a town situated probably at the northeast corner of the Sea of Galilee near where the Jordan River flows into it. The exact site, however, is uncertain. Apparently a small fishing village, it was raised to the dignity of a "city" by the tetrarch Philip and renamed "Bethsaida-Julias" in honor of the daughter of Caesar Augustus sometime before 2 B.C. The tetrarch died here in A.D. 34. The apostles Peter, Andrew, and Philip were born here (John 1:44; 12:21). Jesus fed the five thousand in the area (Mark 6:45; Luke 9:10–17), healed a blind man (Mark 8:22–26), but cursed the town for not accepting him (Matt. 11:21–22; Luke 10:13–14). ***See also*** Andrew; Peter; Philip. C.H.M.

Beth-shan (beth-shan´; also spelled Beth-shean), an important biblical city located between the Jezreel and Jordan valleys. The site consists of Tell el-Husn, the early-period site, and an expanse at the foot of the tell that covered over three hundred acres primarily from the Roman and Byzantine periods. The mound was excavated in the 1920s and 1930s by a team from the University of Pennsylvania, and again since 1989 by Hebrew University. The remains at the foot of the tell have been excavated since the 1960s by Hebrew University.

Beth-shan protected the ancient primary highway, a branch of the Via Maris, which passed near the tell. The site of Tell el-Husn was occupied almost continuously from the Chal-

Two scenes of a dog and lion in combat, from the Amarna period (fourteenth century B.C.) at Beth-shan.

colithic period, about 3500 B.C., to the time of the Crusaders.

Some Neolithic pottery similar to that found at Jericho has been excavated at Beth-shan. The first permanent structures belong to the Chalcolithic period. A few houses and copper tools belonging to this era have been recovered.

The first real town at Beth-shan belongs to the Early Bronze Age (3000–2400 B.C.). In addition to private houses, public buildings and intersecting streets of this period have been found. Limited remains also indicate that Beth-shan was inhabited during the Middle Bronze Age (2000–1550 B.C.), the period of the biblical patriarchs.

In historical texts, Beth-shan is first mentioned in the list of cities conquered by Pharaoh Thutmose III (1468 B.C.). Belonging to this Late Bronze Age city (1550–1200 B.C.) is a temple complex close to the city gate. The temple and the city of this time show much Egyptian influence. Among the finds in this level is a cartouche containing the name of Thutmose III. From the Amarna Age at Beth-shan have been found a temple, a granary, and an inner fortress (Heb. *migdāl*) that served as the final defense for the city. Also belonging to this period is a stele dedicated to Ashtoreth, a Canaanite goddess.

At the time of the Israelite conquest (1250–1200 B.C.), Beth-shan was listed among the cities of Manasseh. However, the Israelites were unable to conquer the city because of the strength of the Canaanites living in it (Josh. 17:11–12; Judg. 1:27).

Apparently Beth-shan was taken by the Philistines at the beginning of the Iron Age. The plan of the upper city changed completely at this time. Two temples of the Iron Age have been found. Both of these temples have a basilica shape, with two rows of columns along the length of the temple and a holy of holies of the broad-room type. The two temples are connected by a complex of anterooms and storerooms. The smaller of the two temples is dedicated to the goddess Anat. 1 Sam. 31:12 relates that the bodies of Saul and his sons were exposed on the walls of Beth-shan by the Philistines. By implication, Beth-shan was conquered by David, because it appears in a list of towns in the fifth administrative district of Solomon. After this reference, Beth-shan is not mentioned again in the OT.

In the Hellenistic (333–63 B.C.), Roman (63 B.C.–A.D. 324), and Byzantine (A.D. 324–632) periods, the town was known as Scythopolis. It was frequently mentioned in the literature of the period. Scythopolis was for a time the chief city of the Decapolis, and the only city of the Decapolis west of the Jordan River. In this later period, the main portion of the city moved off the mound down into the valley at the foot and, at its greatest extent, covered over three hundred acres. The Roman-Byzantine city had typical Roman features such as colonnaded streets with roofed sidewalks, a theater, an amphitheater, temples, and baths. The city was described as a city of many churches and monasteries in the Byzantine era. On the mound, remains of a Roman temple and a Byzantine church have been excavated. Also two synagogues of the fifth and sixth centuries A.D. have been found. Following the Arab conquest, the name reverted to the original name, Beth-shan, or Beisan in Arabic. Most of the site was destroyed by a massive earthquake in A.D. 749. J.F.D.

Beth-shean (beth-shee´uhn). *See* Beth-shan.

Beth-shemesh (beth-sheh´mish; Heb., "house of sun"), a name borne by four cities that appear to have been centers for a sun cult. **1** A city in the Valley of Sorek, sixteen miles southwest of Jerusalem, modern Tell er-Rumeileh (Ain Shems), on the highway to Ashdod and the Mediterranean. The city was established in the late Bronze Age (ca. 1500–1200 B.C.) and had continuous occupation through the Byzantine period. It is not mentioned in nonbiblical sources. The town was part of the allotment for the tribe of Dan (Josh. 19:41).

Its location, name, and history would indicate that Beth-shemesh was a transitional community that was related to the Philistines (Philistine pottery has been found there) as well as the Hebrews. When the Ark of the Covenant was taken by the Philistines, it was finally returned to the people of Beth-shemesh (1 Sam. 6:1–16). The city was destroyed violently, a destruction that may be connected to the raid of Pharaoh Shishak I (940–919 B.C.) of Egypt (1 Kings 14:25–28). Joash, king of Israel (800–785 B.C.) captured Amaziah, king of Judah, at Beth-shemesh (2 Kings 14:11–14; 2 Chron. 25:21). During the war between Syria and Ephraim, the Philistines were able to get control once again of Beth-shemesh (2 Chron. 28:18). The kings of Israel and Damascus (Syria) put pressure on Ahaz, king of Judah, to join a coalition with them against the Assyrians. While Ahaz decided instead to become a willing vassal of the Assyrians, however, this moment of instability was all that the Philistines needed to make substantial advances into the holdings of Judah, including Beth-shemesh. The city was destroyed in the sixth century B.C., probably by Nebuchadnezzar. Occupation of the area continued but it never regained status as a city.

2 A city mentioned in Josh. 19:22, possibly modern Khirbet Shemsin or el-ʻAbeidiyeh, south of the Sea of Galilee along the Jordan.

3 A town in the allotment of Naphtali (Josh. 19:38).

4 A center for the sun cult in Egypt, possibly the Egyptian city On (Heliopolis; Jer. 43:13). S.B.R.

Bethuel (bi-thy*oo*ʹuhl; Heb., "house of God"). **1** The son of Nahor, nephew of Abraham, father of Laban and Rebekah (Gen. 22:22, 23; 24:15, 24, 47, 50). In Gen. 25:20 he is identified as an Aramean of Paddan-aram. **2** In 1 Chron. 4:30, a town in Simeonite territory west of the Dead Sea (Bethel in Josh. 19:4).

Bethzatha (beth-zayʹthuh; Heb., "house of olives"), a name appearing only in John 5:2 (RSV; some manuscripts read Bethesda, "house of mercy," as in the KJV, while others have Bethsaida, "house of the fisherman"). A similar name, Beth Eshdatayin, "house of poured-out waters," appears in the Copper Scroll from Qumran. All seem to refer to a pool (or twin pools) just north of the Temple in Jerusalem, near the district of Bezetha. The pools, rediscovered in 1871, had five porticoes, one on each side and one between them (John 5:2). It was here, according to John 5:2–9, that Jesus healed the man who had been sick for thirty-eight years. ***See also*** Bethesda.
C.H.M.

Excavations at the Bethzatha pool (John 5:2) in Jerusalem.

Beth-zur (beth-zuhrʹ; Heb., "house of the [divine] Rock"), a town (modern Khirbet et-Tubeiqah) on the Jerusalem road four miles north of Hebron. A Judean town (Josh. 15:58) of Calebite descent (1 Chron. 2:45), it was fortified by Rehoboam as one of fifteen outposts south and west of Jerusalem (2 Chron. 11:5–10). Neh. 3:16 suggests it was a district center in the fifth century. It changed hands often in the Maccabean struggles (1 Macc. 4–11).

Archaeology attests a fortified settlement ca. 1700–1500 B.C. abandoned until reoccupied in the eleventh century B.C. There is, however, no town or fortification for Rehoboam's time (tenth century). A succession of citadels and settlements illustrate the strategic importance during the Maccabean clashes. ***See also*** Maccabees; Rehoboam.
E.F.C.

Beulah (by*oo*ʹluh; Heb., "married"; see Gen. 20:3; Deut. 22:22), according to Isa. 62:4 (cf. 54:1), one of the new names to be given to Jerusalem after the Exile, when it will be "remarried" to God.

Bezai (beeʹz*i*). **1** A family group ("sons of Bezai") who returned with Zerubbabel from the Babylonian captivity (Ezra 2:17). **2** A leader of the postexilic community in Judah who signed the covenant to keep the law (Neh. 10:18); he was probably the leader of the family group.

Bezaleel (bi-zalʹee-uhl). ***See*** Bezalel.

Bezalel (bezʹuh-lel; Heb., "in the shadow [i.e., under the protection] of God"). **1** A Judahite, son of Uri and a grandson of Ephrath (1 Chron. 2:20), who was reported to excel in crafts, with divinely given "ability, intelligence, and knowledge in every kind of craft" (Exod. 31:2–3), to work on "the tent of meeting, and the ark of the covenant, and the mercy seat that is on it, and all the furnishings of the tent" (Exod. 31:7; ***See also*** Exod. 35:30–33; 36:1–2). He constructed the Ark (Exod. 37:1) and was remembered for other achievements as well (Exod. 38:22), including the construction of the bronze altar (2 Chron. 1:5). **2** A descendant of Pahath-moab, who was involved in Ezra's order that returnees divorce non-Israelite wives (Ezra 10:30).

Bezek (beeʹzik). **1** A Canaanite city also occupied by the Perizzites, ruled by Adoni-bezek and defeated by the tribes of Judah and Simeon shortly after Joshua's death (Judg. 1:1–7). There is debate over its exact location. It is most often located in north-central Canaan (see 2 below), but that site is in the territory of Manasseh. Since the tribes of Judah and Simeon were allied to take possession of their own lands in the far southern part of Canaan (Judg. 1:3) and the next battles recorded are in the south (Jerusalem, Hebron; Judg. 1:8–10), it is more probable that Bezek lay between Shechem and Jerusalem, probably nearer Jerusalem (Judg. 1:7). **2** A city in north-central Canaan used by Saul as the assembly point for his rally of men to rescue the besieged city of Jabesh-gilead from the Ammonites (1 Sam. 11:8). It is identified as modern Khirbet Ibziq, about twelve miles northeast of Shechem (Nablus) and some sixteen miles west of Jabesh-gilead. ***See also*** Perizzites.
D.R.B.

Bezer (beeʹzuhr; Heb., "gold ore,"? "fortress"?). **1** A descendant of Asher (1 Chron. 7:37). **2** A city of refuge in Reuben, assigned to the levitical family of Merari (Deut. 4:43; Josh. 20:8; 21:36; 1 Chron. 6:63); it is probably the same as Bozrah in Moab (Jer. 48:24). According to the Mesha Stele, it was restored by Mesha, the king of Moab. It was probably located on the site of modern Umm el-Amad, ca. eight miles northeast of Madaba. ***See also*** Bozrah; Mesha.

Bezetha (beeʹzuh-thuh, KJV for Beth-zaith; Heb., "house of the olive"), modern Beit Zeita, located about three miles north of Beth-zur. 1

Macc. 7:19 records that the Syrian general Bacchides camped there after his violence in Jerusalem.

Bible, the, a term referring to the Scriptures of the Christian church, but also denoting the canon of Jewish Scriptures. The English word "Bible" is derived from the Old French *bible,* which in turn is based on the Latin *biblia* and Greek *biblia* ("books"), plural of *biblion,* diminutive from *biblos.*

The Bible has been handed down to us in more than one form. The authoritative text in the Jewish community is the *Hebrew Bible,* often called the Masoretic Text (MT). It is a collection of twenty-four books written in Hebrew (with a few passages in Aramaic as well). Its form is as follows:

The Law (Heb. *torah*): Genesis, Exodus, Leviticus, Numbers, Deuteronomy (the Pentateuch);

The Prophets (Heb. *nebi'im*): Former Prophets: Joshua, Judges, Samuel, Kings; Latter Prophets: Isaiah, Jeremiah, Ezekiel; the twelve Minor Prophets: Hosea, Joel, Amos, Obadiah, Jonah, Micah, Nahum, Habakkuk, Zephaniah, Haggai, Zechariah, Malachi.

The Writings (Heb. *ketubim*): Psalms, Job, Proverbs, Ruth, Song of Solomon, Ecclesiastes, Lamentations, Esther, Daniel, Ezra-Nehemiah, Chronicles.

The Christian Bible consists of the Old Testament (OT) and the New Testament (NT). Protestant churches generally accept only the books of the Hebrew Bible as their OT canon. Roman Catholics embrace not only the books of the Jewish canon but also a number of other "apocryphal" Jewish books written in Greek: Tobit, Judith, the Wisdom of Solomon, the Wisdom of Jesus the Son of Sirach (Ecclesiasticus), Baruch, the Letter of Jeremiah, certain additions to the book of Daniel (Susanna, Bel and the Dragon, the Prayer of Azariah, and the Song of the Three Children), additions to the book of Esther, and 1 and 2 Maccabees (as decreed by the Council of Trent in 1546). Eastern Orthodox churches recognize still other books as authoritative: 1 Esdras, Psalm 151, the Prayer of Manasseh, and 3 Maccabees (with 4 Maccabees in an appendix). The Russian Orthodox Church adds 2 Esdras.

The NT canon consists of twenty-seven books: the four Gospels (Matthew, Mark, Luke, and John), Acts of the Apostles, Romans, 1 and 2 Corinthians, Galatians, Ephesians, Philippians, Colossians, 1 and 2 Thessalonians, 1 and 2 Timothy, Titus, Philemon, Hebrews, James, 1 and 2 Peter, 1, 2, and 3 John, Jude, and Revelation.

Detail of page from the Pentateuch of a Hebrew Bible (MT), 1310. The left-hand column is a commentary on the text.

Development of the Biblical Canons: The development of the various biblical canons appears to have been a long and complex process. The Jewish community, probably by the end of the first century A.D., had adopted the twenty-four-book *Hebrew Bible* as its canon. In Alexandria, the Torah (and possibly other books as well) were translated from Hebrew into Greek in a work commonly called the "Septuagint" (LXX).

We are unable to reconstruct with confidence precisely which books were considered authoritative by Jesus and his earliest followers, but it is probable that they were written in Hebrew. Paul and the Hellenistic church, however, used Jewish Scriptures written in Greek. Much of the Hellenistic church's OT scriptures were Greek translations of books from the *Hebrew Bible*, but by the second century, it was common to find church fathers using also some of the "apocryphal" books mentioned above. It seems likely that these books were considered by many to be as authoritative as the books originally written in Hebrew. Yet a few writers (e.g., Origen, Jerome) distinguished between the books of the *Hebrew Bible* and the remainder written in Greek; indeed, the latter books they called "Apocrypha" ("hidden," or "outside," books), a group they considered edifying but whose authoritative status was open to question. On the whole, however, Eastern and Roman Catholic tradition generally considered the OT "apocryphal" books to be canonical. It was in Protestant circles that canonical status was generally denied to these books.

The NT canon also has an uneven and complex history. No canonical lists appear before the middle of the second century, when the heretic Marcion proclaimed a canon consisting of his version of Luke and ten letters of Paul. Others, such as Irenaeus and Tertullian, embraced a larger number of books. Yet there was a considerable degree of diversity as to which books were included or not included. The inclusion of Revelation was a matter of considerable disagreement. 2 and 3 John, 2 Peter, and Jude were often not included, and Hebrews was sometimes omitted. At the same time, writings not found presently in our canon of twenty-seven were sometimes cited. The twenty-seven-book Latin Vulgate of Jerome (late fourth century) exerted considerable influence upon what books were generally recognized; moreover, provincial church councils held at Hippo (A.D. 393) and Carthage (A.D. 397) recognized a twenty-seven-book canon. Unanimity in the Western church was not fully achieved, but the twenty-seven-book canon was predominant. In the East, the Syrian church achieved a twenty-two-book canon by the fifth century, although later Christological controversies created division, resulting in some erosion of the fifth-century consensus.

Formation of the Hebrew Scriptures: The question of which books were to be considered canonical represents only the later stages of the formation of the canonical collections. According to the best estimates of biblical research, the oral and literary process by means of which the biblical literature was formed took well over a thousand years. Scholars have argued that the Pentateuch is the final product of the interweaving of several literary sources, called J, E, D, and P. The Yahwist source (J) is generally considered to be the earliest, dating from the period of the early monarchy (ca. 1000 B.C.). It is a narrative source that contains tales of the patriarchs, the Exodus, Sinai, and wilderness wanderings. One of its most distinctive characteristics is its use of the divine name Yahweh (or Jahweh), from which comes the designation J or Yahwist. The Elohist source (E), which is characterized by its use of Elohim for the divine name prior to the theophany at the burning bush (Exod. 3), is a narrative strand in many respects quite similar to J. Its portrayal of God is less anthropomorphic than that of J, however, and it betrays special theological concerns, such as an interest in prophecy and a belief that the name Yahweh was first known when revealed to Moses at the burning bush. Scholars generally date E about a century later than J. The Deuteronomic source (D), dating from the period of the late monarchy (ca. seventh century B.C.), is confined largely to the book of Deuteronomy. Its concern lies chiefly in its radical opposition to the worship of Baal; indeed, its program of restricting sacrifice to the Jerusalem Temple was developed for the purpose of stamping out Baal worship by outlawing sacrifice anywhere but Jerusalem. The Priestly source (P), dating from the period of the Babylonian exile (late sixth to early fourth centuries B.C.) emphasizes the cultic institutions of Israel: the Sabbath, circumcision, the role of Aaron (and, by implication, his priestly line), and the detailed legislation about cultic matters reportedly received at Sinai.

Attached to Deuteronomy was a Deuteronomistic edition of Joshua, Judges, Samuel, and Kings. This narrative of Israelite experience from the conquest of the land to the Babylonian exile reflects the Baal polemic and the program of centralization of sacrifice characteristic of Deuteronomistic theologians.

By the early postexilic period (late sixth to early fourth centuries B.C.), the first two parts of the Hebrew Bible, the Torah and the Prophets, were almost complete. The section of the canon called the Writings was probably not finally completed until the second century B.C. The books of the Apocrypha (so-called) were written during the first two centuries B.C. and the first century A.D.

Formation of the Christian New Testament: The NT also underwent a complex history of development. Scholars generally agree that much of the material in the synoptic Gospels (Matthew, Mark, and Luke) originated in oral traditions,

only later finding its way into written form. Most scholars believe that Mark was the first of the Gospels to be written. According to the prevailing view, the compilers of Matthew and Luke used both Mark and what may have been a source of Jesus' teachings labeled Q. A minority of scholars, however, doubt the priority of Mark and the existence of Q. It is widely accepted that John is the latest of the four Gospels, though early traditions may be contained within it. The synoptic Gospels were probably written between A.D. 70 and 100, with John coming in the late first or early second century.

The Letters of Paul were probably written in the 50s and 60s. Many scholars doubt that Paul wrote Ephesians (some doubt Colossians and 2 Thessalonians also), and there is widespread belief that the Pastoral Letters (1 and 2 Timothy, Titus) were written perhaps after the turn of the second century by someone speaking in the name of the revered apostle Paul. The "catholic (or general) epistles" (James, 1 and 2 Peter, Jude, 1, 2, and 3 John) probably emerged in the late first and early second centuries. It is likely that Hebrews and Revelation stem from the late first century. ***See also*** Apocrypha, Old Testament; Apocryphal New Testament; Aramaic; Biblical Criticism; Canon; English Bible, The; Greek, New Testament; Hebrew; Hermeneutics; New Testament; Old Testament; Oral Materials, Sources, and Traditions; Pentateuch; Septuagint; Sources of the Pentateuch; Synoptic Problem, The; Texts, Versions, Manuscripts, Editions.

The Bible and Western Art

THE INHERENT NEED in human nature to express itself in visual images is the essential reason art and religion have been inseparable since earliest times. From the great cave paintings of the prehistoric age to the Parthenon of Athena (432 B.C.), Western civilization has stated its religious tenets through the creative talents of artists. The early Christians began to illustrate their beliefs in the same manner as their contemporaries. The rapid spread of Christianity was based on the appeal of its message of salvation and the efficient communication system of the Roman Empire. From the outset, Christians made no political attempt to separate themselves from Rome. Rather, they accepted their world and were quick to adopt and adapt Roman practices into the Christian life. Art in the Roman Empire was a major means of communication, and Imperial architecture and sculpture expressed the religion, power, and stability of Rome. The early Christians assumed this creative mode of expression and communication.

The baptism of Jesus. In John 1:32 the dove of the Holy Spirit descends upon Jesus as he is baptized by John the Baptist. Detail from the Florence Baptistery doors by Andrea Pisano, ca. 1336.

Iconography: Christian iconography, or the system of using signs and symbols, began and developed quickly in the first three centuries, when the cross and the fish were the most popular representations of Christ. Problems of subject and suitability of images arose but were resolved in favor of the need to relate episodes from both the OT and the NT as a means of teaching history and doctrine. Artists used signs and symbols not only to enhance their compositions but as allusions to deeper meanings. Over the centuries, fruit, animals, vegetation, colors, and objects have become part of the vocabulary of both the artists and the viewers. The apple (Lat. *malum*) of the tree of knowledge (Gen. 3:3) signifies the evil (*malum*) of temptation when in the hands of Eve, but in pictures of Mary it is a symbol of salvation. The palm leaf of Roman victory was adopted as the symbol of the martyr's victorious death. The lily, symbolizing purity, is found in paintings of the Virgin, and the iris was used by fifteenth-century Flemish artists as a reference to her sorrows. The gourd represents the pilgrim's flask, and the holly with its thorns is symbolic of the Passion of Christ. The snuffed-out candle in the annunciation panel of the *Mérode Altarpiece* (ca. 1434) by Robert Campin is indicative of the end of the OT, and the dove of the Holy Spirit is the beginning of the NT (John 1:32).

The four Evangelists—Matthew, Mark, Luke, and John—are represented, respectively, by the angel, lion, ox, and eagle from Ezek. 1:5 and Rev. 4:7. These creatures are depicted with wings symbolic of their divine mission. Medieval manuscripts often used the symbol instead of the name to signify the author of the Gospel. The eagle on lecterns supporting the sacred books refers to the flight of prayer to God. The lamb is the symbol of Christ: "Behold, the Lamb of God" (John 1:29). In medieval times, the pelican was recognized as a symbol of Christ because, according to legend, it held open its breast to feed its

young with its own blood. The book held by Christ in most Byzantine mosaics, with the alpha and the omega, represents him as "the Word." As Pantocrater (universal ruler), Christ the Redeemer holds his right hand with the first two fingers extended to symbolize his two natures, divine and human. The goldfinch, which eats thorns and thistles, is symbolic of the Passion of Christ. The *Madonna of the Goldfinch* by Raphael (1483–1520) represents the incarnation and the Passion. The tree is symbolic of life and is seen as such in the iconography of many religions. Water is also symbolic of life. The baptismal font and the fountains express both spiritual and physical life.

Geometric figures such as the circle (symbolic of eternity and God, with no beginning and no end), the triangle (the Trinity), the pentagon (the five wounds of Christ), and the square (the four elements earth, fire, air, and water) are all used as individual objects and as the basis of compositional development in works of art. Each of the numbers from one to ten has one or more biblical references, such as the nine choirs of angels and the seven times Jacob bowed in submission. Thirteen refers to faithlessness and betrayal. Colors too have symbolic meaning. The white of the Virgin's veil is innocence and purity. Green is the sign of hope, and blue means heaven and truth. Purple signifies royalty or sorrow, and in paintings of the Passion, Christ wears a red robe indicating his sacrifice. Yellow is either the sun and divinity or jealousy and treason. Judas usually wears a dirty yellow cloak. Black represents death and hopelessness. Most of the symbols—numbers, colors, animals, and objects—have more than one biblical reference.

Early Christian and Byzantine Art: During the first three centuries of Christianity, the struggle for freedom of worship gave no opportunity for monumental or permanent artistic expression. The catacombs, underground cemeteries, were decorated with signs and symbols of varying artistic quality. On the ceiling of a cubicula, a small chapel or gallery, in the Catacomb of Sts. Peter and Marcellino in Rome of the fourth century is a late fresco work of the story of Jonah. Through visual images, Christianity expressed its self-evaluation as the fulfillment of the OT law. Jonah as the prefiguration of Christ is one example of an OT figure used by the artists from early Christian times through to the Renaissance (Michelangelo [1475–1564] painted his powerful figure of Jonah on the Sistine Chapel ceiling [1508–1512]).

Adam and Eve, from the fourth-century sarcophagus of Junius Bassus.

Following the edict of 325 in which Constantine gave freedom to the Christians to practice their religion openly, the public artistic expression of the new religion developed in a manner that was essentially Roman in style and Christian in concept. The Roman tradition of burial in sarcophagi was continued, and in such works as the marble sarcophagus of the Roman prefect Junius Bassus (359) scenes from the OT and the NT are intermingled, with Adam and Eve, Daniel in the lions' den, Christ's entry into Jerusalem, and Christ among the doctors. The ornate style and deep carvings are essentially fourth-century Imperial. The Roman determination to announce itself to the world was expressed in clear monumental forms. This style was found to be exactly suited to the message of Christianity. By the end of the fourth century, Christianity was established, and prayerful praise of God and eloquent explanation of the divine love through artistic expression were not only accepted but required.

Immediately after the edict of 325, Christians considered sites for the construction of places of worship. The early builders were faced with a formidable task that involved technical as well as philosophical changes from the kinds of buildings that went before. The Greco-Roman rectangular temple form was not suitable to Christianity. Essentially, this traditional temple was designed to be appreciated from the exterior, and rites and rituals were conducted for the public on outside altars. Christianity demanded the inclusion of the faithful in the house of God. The solution came early in 333 with the construction of Old St. Peter's Basilica (destroyed in the fifteenth century), supposedly on the site of the burial place of St. Peter in Rome. The Christian architects redesigned the Roman basilica, which was a rectangular structure of a nave and side aisles with an apse, or a large niche, at either end. They replaced the apse on the west end with the atrium or colonnaded forecourt of the Roman house and established the basic form of Christian ecclesiastical architecture. Over the centuries, the plan evolved into the Latin cross plan, with the focal point at the main altar within the apse at the east end of the nave. Christian churches were oriented on an east-west axis with the main entrance at the west, from which the sound of the trumpets of judgment and salvation would come. The interior altar was at the east end so the faithful could face the heavenly city of Jerusalem. The Roman temple tradition of brick construction with marble facing was altered to suit the spiritual and economic needs of the Christian community. The comparatively plain brickwork was retained on the outside, and attention was directed to the interior, which was meant to be the house of God. Artists were to decorate this heavenly space in keeping with the atmosphere created by the divine presence. The walls of the nave above the columns and the Christian adoption of the triumphal arch at the crossing of the bema (an early form of the transept) and nave provided ample space and opportunity for the development of art programs in mosaic and fresco.

Artist's reconstruction of Old St. Peter's.

The walls of Jericho fall. Mosaic scene from Santa Maria Maggiore in Rome, early fifth century.

Mosaic programs were the most expensive but the longest lasting. Those of Santa Maria Maggiore in Rome (early fifth century) are an example of the union of technique, medium, and subject, where the light of the clerestory windows illuminates the brilliant glass mosaics and creates an atmosphere of spiritual splendor and heavenly protection. Programs of OT and NT subjects, but principally of the life of the Virgin and Christ, became the accepted and standard mode of church decoration. The mosaics of Santa Maria Maggiore in Rome are considered to be among the most beautiful stylistically and the most complete programmatically.

The Roman mosaic tradition was adapted not only for decoration but also for theological and didactic purposes. As the Christian church developed and eventually equaled or replaced civil influence on and control of everyday life, the styles of art and the media of mosaic or fresco reflected the social, political, and religious philosophy of the Roman-Christian world. The political life of imperial Rome and the division of the empire in 395 led to new interpretations of the role of the emperor and concomitantly of that of Christ.

The Greco-Roman interpretation of Christ as Apollo in the classical style of sculpture gave way to the influence of the Eastern empire with

the emphasis on Christ as Pantocrator (Lord over all reality)—abstract, conceptual, formal, and regal. Sixth-century mosaic programs in Ravenna, Justinian's capital of the Eastern empire in Italy, show Christ in royal purple, seated on a Byzantine throne and holding the scepter as a symbol of his authority. These mosaic programs in structures such as the Mausoleum of Galla Placidia, the Arian Baptistry, and the Church of San Vitale (ca. 547) combine OT and NT stories in the Imperial style. The gold background signifying the paradise of the future accentuates the formal patterns of rich color and dazzling light. Visually, the authority and power of the reign of Christ are both temporal and eternal.

The sixth-century building and decoration programs of the emperor Justinian and his empress, Theodora, led to the construction in Constantinople of one of the largest and most imperial structures in the history of architecture, the Basilica of Hagia Sophia, the Church of Holy Wisdom (532–537). Two geometricians, Anthemius of Tralles and Isidorus of Miletus, designed the dome on pendentives (curving triangular segments of vaulting) formed at the intersections of the arches at the tops of the four vaults. They changed the square of earth into the circle of eternity and equated spiritual and imperial space. The Christian believer was overcome by the power and majesty of Christ and his representative, Justinian. Shimmering gold mosaics of the four archangels on the pendentives held the dome of heaven above the imperial throne and the faithful. This interpretation of Christ in majesty with the Virgin enthroned as Queen of Heaven and Earth became basic to the faithful and to the artistic expression of the theology of the Western church through to the Renaissance. In the East, this style developed into the rich tradition of the icon as seen in Andrei Rublev's *Old Testament Trinity* (ca. 1410–1420).

The Virgin enthroned as Queen of Heaven and Earth. Beside her, emperors Justinian (left) and Constantine offer her the Hagia Sophia church that each built during his reign; tenth century.

Medieval Art: Neither the church hierarchy nor the artists overlooked any opportunity to express the teachings of Christ, often pairing them with OT themes. One of the most obvious places for the depiction of the OT and NT was the door to the church. Bronze doors with their double leaves provided the most immediate format for typological or symbolic programs. The great bronze doors at St. Michael's in Hildesheim, Germany (ca. 1015), have scenes such as the "Expulsion of Adam and Eve" of the OT matched with the "Annunciation" of the NT. The scenes on these doors are typical of the medieval expression of faith. They are graphically direct: God points to Adam, who points to Eve, who points to the serpent; each one blames the other. The clarity of the design tells the story and its meaning to those who cannot read.

Other doors such as the south door of the Baptistery in Florence (1330–1336) by Andrea Pisano (ca. 1290–1348) tell the stories in the life of John the Baptist in clear logical sequence. The lower eight panels are personifications of the cardinal and theological virtues. Each scene is framed by a quatrefoil, an ornamental frame of four lobes symbolic of the four Evangelists. The north doors are the work of Lorenzo Ghiberti (ca. 1378–1455) and other Florentine sculptors, including Donatello (ca. 1386–1466). These doors match the south doors of twenty-eight panels with scenes from the NT. Included are the Evangelists with their symbols. But the style of Pisano and the young Ghiberti appears old-fashioned when compared with that of the east doors of 1425–1453, familiarly known by Michelangelo's appellation as the

"Gates of Paradise." Ghiberti's mature program was totally modern in its concept and execution. No longer did both leaves match OT to NT; the ten panels were all OT episodes. The quatrefoils were discarded and in their place Ghiberti presented the new style of perspective space and logical placement of figures within the picture frame. The clarity of the composition illustrated the OT stories and proclaimed the advent of the Renaissance.

The marble pulpit in the Pisa Baptistery, executed by Nicola Pisano in 1260 prior to his Siena pulpit.

Before printing, the arts of painting, sculpture, and architecture and the preaching of the Word were the means by which the church taught the stories of the Bible and the lessons people were to learn that would lead them to salvation. Oratory and the reading of the sacred Scripture demanded a visible separate platform from which the Word could be explained. The pulpit, or ambo, was the stage from which preachers promulgated the teachings of Christ. As its role was of major importance, it received special attention both in placement and in execution. It was positioned in the nave near the crossing of the transept in full view of the congregation. Usually octagonal in shape, symbolic of the resurrection of Christ eight days after his entry into Jerusalem, pulpits became both architectural and sculptural expressions of faith. In the Siena pulpit (1265–1268), Nicola Pisano (ca. 1220–1284) combined the architectural elements with an iconographic program that included a central column supporting the superstructure with the personification of music and the seven liberal arts on the base. Plastic (modeled) forms were crowded together in seven panels of the visitation, the birth of Christ, and the last judgment. Nicola united Roman classical forms in surface compositions that denied real (earthly) space in favor of the abstract Gothic expression of heavenly space.

Cover of the *Imperial Book of Gospels* from the Palace School at Aachen; gilded silver, eighth century.

Manuscript illumination is perhaps the best example of art directly connected with the publication of the Bible. The papyrus scrolls of ancient biblical texts were copied onto vellum or parchment sheets and bound, and the Roman tradition was adapted to illustrations of OT and NT stories in these reproductions. The *Vienna Genesis* of the early sixth century gives an example of the continuous pictorial narration of an OT subject in a style of the Hellenistic tradition. Text and illustrations are unified in a single composition on purple vellum. The *Utrecht Psalter* (ca. 820–832) from Reims combines pen illustrations and text in a fully developed program presenting David and his songs. The *Book of Kells*, considered by some to be among the greatest works of art, is the compilation of the four Gospels. The exquisite colors and detailed designs, the influence of the Viking abstract animal forms, and the obvious delight and tender loving care in execution of this manuscript make it the outstanding work of the eighth century. The development of the palace schools of manuscript painting under the aegis of Charlemagne (742–814) was one of the unique expressions of the marriage of Christian and barbaric thoughts and techniques. In the *Coronation Gospels* (790–800), made of vellum soaked in purple dye, the Gospel According to John uses the Imperial Roman style of ages past in an inventive design and golden letters. Medieval manuscripts became progressively more elaborate in decoration, script, and cover. These portable works of art were—especially in the less stable Western world—a major artistic expression. Separate books of the Bible and other writings were copied in monasteries and by individuals and

groups, and it took three to four years to complete one manuscript. Books were expensive, treasured gifts, and the medieval manuscript is one of the great glories of the art of the Christian world.

"The Bible in Stone" is an often quoted phrase describing Romanesque and Gothic cathedrals and churches. The sculptural programs express both the religious and the secular life of the period. Often, over the portals or on capitals of columns, we find signs of the zodiac, some of which have biblical references, scenes of the life of the Virgin, the last judgment, the Passion, and lives of the saints freestanding or in relief. The jamb statues on the west façade of Chartres are traditionally accepted as the portraits of the kings and queens of Judah, while on the north portal is St. Theodore, a knight in armor prepared to defend the faith. On the tympanum (space beneath an arch, usually over a doorway) and capitals of Autun Cathedral (1130–1135), the sculptor Giselbertus mixed OT and NT themes. Noah's ark still balances precariously on top of the mountain while the animals march in. The splendor and light of the stained glass of the medieval cathedral, even today, translates the historical events of the Bible into spiritual illumination.

Renaissance and Baroque Art: Christian doctrine became the stabilizing force of Western civilization through to the Enlightenment of the eighteenth century and the industrial revolution of the nineteenth century. Art was always used wherever and whenever possible for the glorification of God and the instruction and edification of the faithful. The church assumed the role of patron of the arts, and church officials considered this to be part of their religious duties. Bishops had resident artists in their household, and talented craftspeople such as goldsmiths and weavers were rarely without work. The furnishings for the altar, the vestments, chalices, candlesticks, reliquaries, and choir stalls demanded the inventiveness of the artists. Civil leaders, kings, lords, and ladies also took upon themselves the financial and intellectual support of the arts and religion. Biblical, including apocryphal, topics were the major subjects of these arts and crafts until the late fifteenth century.

Jesus hands the keys to the Kingdom of Heaven to St. Peter (cf. Matt. 16:19) in this fifteenth-century fresco by Perugino in the Sistine Chapel.

Claus Sluter (1340/50–1406), court sculptor for Philip the Bold, Duke of Burgundy, was the master of the program at the Carthusian monastery in Dijon, which included the *Well of Moses.* The prophets Daniel, Zechariah, Jeremiah, David, and Isaiah join Moses at the base of a structure of angels supporting the now destroyed crucifixion scene. Each of the sculptures is a magnificent expression of Sluter's innovative style of a new realism. The figures are separate individuals not only in dress but also in physique, stance, age, and facial expression. Each figure is worthy of study, and yet the entire composition is named for Moses—not because of Moses' historical position, but because Sluter carved an image of Moses that is more complete, more sensitive, and more powerful than any of the others. The figures all stand above the well, the symbol of the life-giving waters. They all stand together, providing the OT base for the crucifixion. The Burgundian court was well known for its secular and religious splendor.

Pope Julius II's patronage of Michelangelo, Raphael, and Bramante (1444–1514) exemplifies the role of the patron and the church in using the talents of the artists to illustrate and defend the teachings of Christ. In the Sistine Chapel, Michelangelo in 1508–1512 painted the ceiling program of the genealogy and prefiguration of Christ in the OT. The harmony and clarity of Renaissance composition were expressed by Pietro Vannucci (called Perugino, ca. 1445–1523) in his *Delivery of the Keys* in 1482. This fresco is an example of the use of negative space as the positive element in expressing the significance of Christ's statement, "I will give you the keys of the kingdom of heaven" (Matt. 16:19). Fifteenth-century humanism and Neo-Platonism were reconciled in Perugino's classically balanced composition of geometric perspective, mathematical proportions, sculptural forms, and rational spirituality. In 1541, on the altar wall, Michelangelo completed *The Last Judgment.* It is an extraordinary statement of contemporary thought in terms of biblical subjects. The diverse fresco styles, stories, and interpretations in the Sistine Chapel achieve unity through their subject matter, which is drawn from the Bible.

The Renaissance was characterized by the study of classical ideas and their reconciliation with the theology of Christianity. This study centered on the understanding of the ancient philosophers' comprehension of the universe as mathematical harmony. The textual sources for this intellectual, aesthetic, and spiritual harmony were the writings of the ancient philosophers, the church fathers, and the Bible. This perception of perfect harmony—that is, God—was stated visually and materially not only in painting and sculpture but, most importantly, in architecture, in a centrally planned church. In this plan, the longitudinal axis starts at the main entrance and is of equal length to the transverse axis. They bisect each other at their centers and express the position of God as the center and the circumference of the universe. From the centrally planned church, architects developed either a Greek cross plan such as Bramante's first plan for the new St. Peter's in Rome (1506) or a circular plan such as the one for S. Eligio degli Orefici (1511–1512) by Raphael, also in Rome.

During the early Renaissance in the fifteenth century, religious art began to lose its primary role as secular art began to occupy the artists' and patrons' time as well. Sometimes the two realms clashed. The great

religious reformers Savanarola, Martin Luther, John Calvin, Charles Borromeo, and Ignatius of Loyola all, directly or indirectly, influenced the artistic and religious expression of their ages. Savanarola, a Franciscan monk of the late fifteenth century, demanded that art works on nonreligious subjects be burned. Followers of Luther destroyed works in churches as "idolatrous," and Calvinists tended to eschew all expressions of religious art. The Council of Trent of 1563 declared that no nude figures might appear in churches. Therefore, fig leaves were added to paintings and sculptures of Adam and Eve, and even Michelangelo's *Last Judgment* did not escape the decision. Artists were to be historically correct in their paintings, and famous patrons such as the Medici in their own magnificent brocades could no longer be included in them as, for example, the Magi. The Spanish painter Francisco de Zurbarán (1598–1664) got around the problem of painting his self-portrait in his *Crucifixion* by using his face as the model for St. Luke, the patron of artists.

The preaching of reformers such as Ignatius led the Catholic church into an age of spiritual renewal and fervor that required new patronage of the arts. The Baroque age, the seventeenth century, was one of the greatest splendor, religious and secular. Elements of the OT and NT were restated in works such as Bernini's (1598–1680) *David* (1625) and Rubens's (1577–1640) triptych *Descent from the Cross* (ca. 1614). Patronage of the arts remained part of the church's role until the nineteenth century. Art requires inspiration, creativity, time, and money. Twentieth-century methods of mass production and the general lack of critical ecclesiastical patronage have forced the artists to rely on themselves to communicate the aesthetic and spiritual interpretations of the Bible in modern styles.

David, by the sculptor Bernini, 1625.

The artist, never a clearly definable character in any circumstance, is sometimes ignored or misunderstood by the general public. Stories of Michelangelo's arguments with Pope Julius II have led some to believe that artists often played only a craftsperson's role, i.e., they did what they were told. A careful study of art, however, reveals that the artists as people of their times also believed in the stories and doctrines they were illustrating. The quality of the artists' spiritual life is sometimes, but not always, reflected in their work, such as Fra Angelico's (ca. 1400–1455) tender love of the Virgin. Michelangelo Caravaggio (1573–1610) was an example of an artist whose spiritual life seems at odds with the quality and intensity of religious understanding found in his work. (In the twentieth century, the French artist Georges Rouault [1871–1958] said, "All my work is a prayer for those who know how to look at it." Henri Matisse [1869–1954] said that to him paradise was a place where he could paint frescoes.) The creative force or genius is never completely understood by either the artist or the public. The gift of aesthetic expression has regularly been used by artists to make the Bible visible and inspirational.

For example, in the Arena Chapel of Padua (1305–1306), a small structure of barrel vaulting, Giotto di Bondone (ca. 1266–1337) enlarged theologically and spatially his interpretation of the personal and human qualities of the biblical subjects. His technical use of color and light made visible the psychological and spiritual responses of the characters. The three registers of scenes from the life of the Virgin, the

public life of Christ, and his Passion are united by the *Annunciation* on the triumphal arch before the sanctuary and the *Last Judgment* over the wall of the entrance. Within the biblical tradition, Giotto maintained the narrative with succeeding scenes and stylistic unity. Prophets with their scrolls frame the individual scenes. The blue in the barrel vaulting and in the background of the separate scenes relates paradise to earth. Space is rationally defined by balanced groupings of figures in landscapes and architectural settings. Giotto's consistent use of narration, iconography, and composition within separate but related scenes expresses the human psychological and spiritual depth of the scene.

In the *Kiss of Judas,* Giotto filled the background with the confusion of the soldiers and their lances. In the foreground to the left, Peter is seen cutting off the ear of the servant of the high priest. Christ and Judas occupy the center foreground plane, and even though Judas's dirty yellow cloak covers most of Christ, the lines of the garment lead directly to the Savior's face. Here, in profile, Christ gazes directly into Judas's eyes with quiet understanding, acceptance, and compassion. Giotto's humanistic interpretation was made possible by his exploration into the technical aspects of fresco painting. For the artist, the development of new techniques is necessary for the full expression of

Descent from the Cross. Rubens, ca. 1614.

the subject. Space, color, light, modeling, organization of masses, and iconography are used in simple, straightforward designs leading the family to contemplation and prayer. In the *Last Judgment*, below the cross and the resurrected dead, is the patron, Enrico Scrovegni, presenting to angels a model of the Arena Chapel, one of the supreme achievements in Christian and Western art and one of the most complete programs of biblical exposition.

In the same biblical tradition is the Brancacci Chapel in Florence, where Masaccio (1401–1428?) painted the fresco *The Expulsion of Adam and Eve from Paradise* (1424–1428). Masaccio accomplished one of the most significant breakthroughs in the history of art. Through his observation of the world about him, he realized that light is the vehicle by which forms are perceived. The technical and philosophical achievement of the use of light enabled him to realize the forms of the human beings and their psychological and spiritual understanding of the loss of their relationship with God. The anguish on Eve's face and the humiliation of Adam, expressed through the modeling of the figures by light, is not only a major step in the technical world of art but a visual statement of the result of the sin of disobedience. Masaccio's aesthetic and scientific experiment opened the way for the Renaissance study of the human response to the spiritual life.

Such biblical topics as *The Feast of Herod* (ca. 1425) and the *Mary Magdalen* (ca. 1453) were sculpted by Donatello in his search for an understanding of the classical heritage and its reconciliation with that of Christianity. In *The Feast of Herod*, a bronze panel on the font in the Baptistery of Siena, Donatello used the new science of linear perspective to plan his three-dimensional relief composition on a two-dimensional surface and expressed rationally and realistically the moment when Herod realized the horror of his actions. Visually, *The Feast of Herod* was transformed into a contemporary experience for all who saw it. Donatello's *Mary Magdalen* is carved in wood. Her scraggly unkempt hair, emaciated sagging skin, deep-set hollow eyes, and skeletal frailty are the visual evidence of the reality of sin and atonement, for which Mary Magdalen is a biblical example.

Perhaps the most famous of religious and biblical paintings is *The Last Supper* (ca. 1495–1498) by Leonardo da Vinci (1452–1519) on the refectory wall of Santa Maria delle Grazie in Milan. This traditional subject and its artistic problems had plagued artists since the beginning of Christianity: how does one place on a two-dimensional surface a composition of thirteen three-dimensional people and at the same time express the psychological and spiritual intensity of the specific moment when Christ says, "One of you will betray me"? Leonardo, because he had pursued Renaissance studies of mathematics and painting, solved the problem. His logical organization of the apostles in two groups of three on each side of Christ in the center, his use of individual gestures and glances leading the viewers' eyes toward Christ, and his understanding of geometric and atmospheric perspective make the event appear alive, real, and immediately comprehensible. Leonardo's *Last Supper* is popular precisely because it seems real. Renaissance concepts of logic and harmony in the spiritual and temporal worlds are visually realized in this NT event.

With the invention of movable-type printing in 1455 by Johannes Gutenberg, the Bible began to become accessible to all classes. Woodcuts and etchings were popular techniques of illustration for the new and less expensive editions of the Bible. In 1509, Albrecht Dürer (1471–1528) published the *Small Woodcut Passion*, a pocket-sized book with thirty-seven plates measuring about five by three inches. Dürer's Germanic expressionism interpreted in black and white an intense personal and spiritual understanding of the Passion. Continuity of story and individuality of episodes were treated with consistent technical skill and creative awareness.

Christ at Emmaus (cf. Luke 24:13–31). Rembrandt, 1629.

The Rembrandt edition of the Bible, first published in 1959, is an example of the artistic productivity of a man who over a long career (1606–1669) never traveled more than a hundred miles in any direction. Rembrandt painted portraits, landscapes, and mythological stories, but it was his love and study of biblical themes, people, and events that led him to his profound psychological and spiritual masterpieces. Rembrandt explored his subjects technically, historically, and emotionally. His *Christ at Emmaus* (1629) is both a homage to Leonardo and a reenactment of an event that appears in the Gospel According to Luke (24:13–31).

Caravaggio's *Deposition* (1602), one of the great treasures of the Vatican collection and a masterpiece of realism and intense spirituality, presents Christ as the cornerstone of salvation. The religious fervor of the late sixteenth and early seventeenth centuries was expressed in numerous canvasses by this man, notorious in Rome for his scandalous public life. Caravaggio's dramatic light, his solid plastic forms, his detailed realism, and his placement of his figures in the foreground plane give his works the power to attract their viewers and draw them into mystical contemplation of the event.

Religious Art in the Twentieth Century: Modern artists are less restrained than their predecessors in expressing personal insights and interpretations of biblical themes. One may consider as an example the German artist Emile Nolde (1867–1956), who returned to the Bible as a source of inspiration. His use of raw color as an emotional force makes him one of the most romantic and mystical artists of the twentieth century. His *Pentecost* (1909), *Doubting Thomas* (1912), and *Holy Night* (1912) are modern expressions of traditional biblical and German subjects. Color provided for Nolde a vocabulary of ideas and interpretations with which to contemplate the mystical experience. His uncompromising and expressive use of color makes his work stark and compelling. Another example is Salvador Dalí (1904–1989), who used in his paintings such biblical events as the Last Supper and the crucifixion to express the conflict between reality and the subconscious. His surrealistic device of dissolving images into unmeasurable space takes the viewer from the historical, factual world into the spiritual and contemplative realm of the soul. Barnett Newman (1905–1971) in 1966 did a series called *Stations of the Cross* in a style called abstract expressionism. This nonrepresentational style demands that the viewers explore their own spiritual depth and the mystical reality of the Passion. Henri Matisse's Chapel of the Rosary at Vence, France (1947), is an expression of the spiritual life in a complete exposition of architecture, painting, sculpture, furniture, and vestments. The light of the

stained-glass *Tree of Life* is a modern statement of the medieval tradition of light as spiritual illumination.

In 1955, Le Corbusier, one of the greatest architects of the twentieth century, completed a pilgrimage chapel, Notre-Dame-du-Haut, in Ronchamps, a village in Burgundy. Commissioned to commemorate the sacrificial deaths of resistance fighters, this structure of rubble and concrete walls is simultaneously modern in its abstract, flowing forms and space and traditionally medieval in the design of the complex of towers and outdoor altar and pulpit. The spaces, indoor and outdoor, are spiritual in their relation to each other and to the pilgrim. The stained-glass windows are a geometric abstract pattern cut into chamfered (beveled) openings. The composition of the organic and geometric shapes and spaces expresses the union of imagination and spirituality. Even though the commission did not specify, nor did Le Corbusier profess, any relation to a specific religion, the underlying, basic theme is the Christian theology and spirituality of the NT as the fulfillment of the OT.

Head of Christ by Georges Rouault, who said, "All my work is a prayer for those who know how to look at it"; detail from *Ecce Dolor*, 1936.

Architecturally, the Holocaust of World War II continues to haunt and inspire us in a modern museum at the Smithsonian, dedicated not only to a social but also to a spiritual response to modern events with biblical sources.

In all of the arts, there is a renaissance of awareness of the Bible as a source of artistic inspiration. New churches and synagogues are being constructed all over the world. Sculptors are giving us such works as *The Thorns* by Robert Adam of England, where the abstract composition of sharpened wire in cruciform is at the same time a cross, a crucifix, and the nails and thorns. Francis Bacon's *Man of Sorrow* (ca. 1945) is a colorful two-dimensional representation of the same theme of excruciating horror and suffering that is equal in its intensity to that of Matthias Grünewald's (1470–1528) unrelenting realism in the *Isenheim Altarpiece* (ca. 1515). Our modern artists are proving themselves to be the equals of their predecessors in giving us contemporary visual inspiration from the Bible.

A concordance of all biblical themes, events, characters, objects, animals, flora, fauna, and all their visual interpretations in painting, sculpture, architecture, and the minor arts is an impossibility. The subjects of the Bible have been and continue to be interpreted in the styles and techniques of their artists' times and localities. Artistic expression is limited only by the creative talents of the artists, who are free to explore any subject and any medium in any style that will communicate the understanding of reality they share with their contemporaries. As art and religion are inseparable, it should not be surprising that the Bible and art are united in the expression of spiritual reality, both human and divine.

BIBLE AND WESTERN LITERATURE

Bible and Western literature, the. The Bible has permeated the literature of the Western world to a degree that cannot easily be measured. More than any other single body of writing, ancient or modern, it has provided writers from the Middle Ages on with a store of symbols, ideas, and ways of perceiving reality. This influence can be traced not only in texts that deal directly with biblical characters or topics, but also in a vast number of poems, plays, and other writings that are not overtly biblical in theme but that testify to a biblical view of humankind and the world. Moreover, the Bible has had a profound effect in shaping the very language writers use. This is especially true of the English language which, as Tyndale and later Addison perceived, was particularly adaptable to the pattern and idiom of Hebrew speech. The cadences and phraseology of the English Bible, especially as found in the King James Version (1611), have entered the English language to become, according to the historian J. R. Green, "the standard of our language." Martin Luther's German translation (1522) had a similarly formative influence on German literature and language. The presence of the Bible is indeed so pervasive in all periods of Western literature that it will only be possible here to indicate some of the more striking examples of its presence.

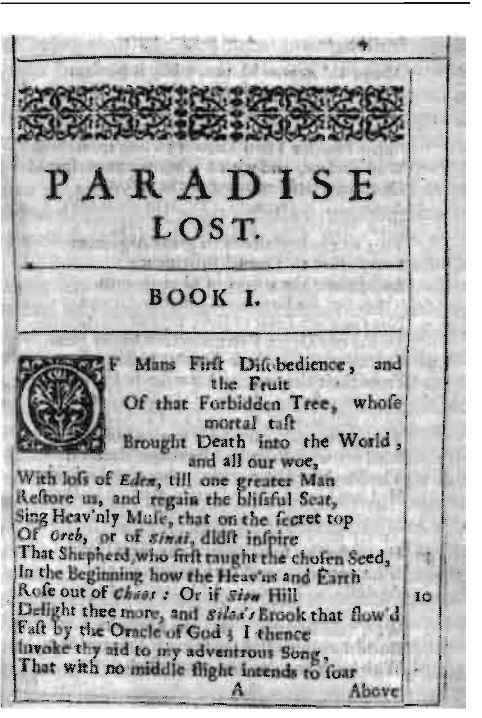
The Medieval Period: The *Divine Comedy* (begun about 1300) by Dante (1265–1321) represents a unique synthesis: it follows classical models to a great extent (the Roman poet Vergil accompanies Dante on his imaginary voyage through Hell and Purgatory), but in its overarching vision of salvation it is thoroughly biblical. Characters from the Bible mingle with figures from Greek and Roman antiquity and with characters living and dead from Dante's native Florence.

The most characteristic influence of the Bible in this period, however, is not in "high" literature as represented by Dante's great poem, but in homelier, more everyday forms of writing. Earlier, in the fourth century, Augustine had viewed the Bible as a model of the "humble style" (Lat. *sermo humilis*), especially noticeable in the Psalms, the OT narratives, and the Gospels. The Bible's style came as a counterweight to the more rhetorical verse and prose inherited from Greek and Roman antiquity. A simplified form of discourse is thus found not only in sermons and moral discourses written during the time but even in the tales of Giovanni Boccaccio (1313–75) and Geoffrey Chaucer (ca. 1340–1400). This simplified discourse goes hand in hand with a more democratic view of what constitutes the material of literature. While ancient epic and drama were generally about kings and noblemen, writers of the Christian Middle Ages discovered significance in the lives of ordinary people.

The effect of the "humble style" is best shown in the religious drama of the period. The anonymous miracle or mystery plays, found in France, Germany, Spain, and elsewhere, but reaching their fullest development in England in the fifteenth and sixteenth centuries, were a popular dramatization of the biblical record. They were arranged in cycles of several episodes culminating in the Passion and acted by artisans belonging to the different guilds on the principal days of the Christian year, especially Easter, Whitsun, and Corpus Christi Day. The Wakefield Cycle (ca. 1450) is particularly notable; in the Noah episode we witness a bout of fisticuffs between Noah and his wife; in the *Second Shepherds' Play* (*Secunda Pastorum*), the Wakefield dramatist does not hesitate to set the scene of the nativity in the perspective of a comic (indeed, farcical) story of sheep-stealing in a rustic English community.

The Renaissance: The flowering of secular learning and the new humanist emphasis led to a noticeable shift in the sixteenth and seventeenth centuries from concern with Gospel stories (which dominated the medieval miracle plays) to concern with the OT. The human aspects of the stories are emphasized, in line with what J. C. Powys perceives as "the human wisdom, the human sensuality, . . . the human magnanimity, the human triumph" of the OT (*The Enjoyment of Literature,* 1938). These human aspects are to the fore in George Peele's romantic drama *The Love of King David and Fair Bethsabe* (1599). In Holland a little later, Joost van den Vondel wrote a number of plays on topics such as Adam in exile, Joseph and his brothers, and Jeptha and King Solomon. In Italy, the great actor Giambattista Andreini wrote and produced an Adam play (1613).

William Shakespeare (1564–1616) wrote no play directly on a biblical theme, but his writing everywhere bears witness to his preoccupation with the Bible, its images, and language. *Measure for Measure* (1604) has been correctly interpreted as a gloss on Matt. 7:1. Behind *King Lear* (1605) are intimations of the crucifixion and it has also been termed a "pantomime version of Job" (Jan Kott, *Shakespeare Our Contemporary,* 1967). *The Tempest* (1611) frequently seems to echo the stories of Genesis, e.g., Prospero appears to act the part of Joseph who, by means of various deceptions and trials, teaches his brothers the error of their ways. Macbeth's imagination (*Macbeth,* 1605) is saturated with biblical imagery. The famous lines from his final soliloquy,



> And all our yesterdays have lighted fools
> The way to dusty death. Out, out, brief candle!
> Life's but a walking shadow . . .

echo two passages from Job (KJV). "For we are but of yesterday, and know nothing, because our days upon earth are but a shadow" (8:9) and "The light shall be dark in his tabernacle, and his candle shall be put out with him" (18:6). *Hamlet* (1602) is perhaps the best

Opening page of Milton's biblical epic poem, *Paradise Lost,* 1667.

example of all. Hamlet, like Moses, is summoned to receive a "commandment," which he then inscribes on "tables" (Act 1, scene 5); in this he functions in a kind of covenant drama. Like many OT characters, he is elected to a moral task: that of cleansing the realm of evil.

A little later in the same century, the Italian tragedian Frederico della Valle dramatized the stories of Esther (1628) and Judith (1628), inspiring many imitators to follow his example. Before the seventeenth century was over, the greatest of French tragedians, Jean Racine (1639–99), produced his two plays on OT subjects, *Esther* (1689) and *Athalie* (1691). The latter, based on 2 Kings 11, is probably the finest example of the adaptation of biblical materials to the forms of classical tragedy. In England, *Samson Agonistes* (1671) by John Milton (1608–74) was a less successful attempt to apply the canons of classical tragedy to a biblical story.

Biblical Epic Poems: Epic poems on biblical subjects became popular in the sixteenth century. There are many biblical reminiscences in Torquato Tasso's *Jerusalem Delivered* (1575) on the subject of the Crusaders' conquest of the Holy City. In France, Guillaume du Bartas, a Huguenot, devoted his gifts to an epic poem on Judith (1574) and later (in 1578) produced his more famous *La Semaine,* translated into English by J. Sylvester as *Divine Weeks and Works.* This latter poem is based on the biblical account of the creation and the subsequent history of humanity. John Milton may have had this work in mind when he came to write his two great epics, *Paradise Lost* (1667) and *Paradise Regained* (1671). Like du Bartas and his own English predecessor Edmund Spenser, Milton refers to the muse who inspires him in the composition of his biblical poems under the name of Urania, whom he links with the figure of Wisdom in Prov. 8:30.

> Wisdom thy Sister, and with her didst play
> In presence of th' Almighty Father, pleas'd
> With thy Celestial Song.
> (*Paradise Lost,* 7.10–12)

Milton brought to bear on his biblical epics the whole weight of his vast classical and patristic learning. Indeed, the baroque richness and epic superstructure of the first six books of *Paradise Lost* make it difficult for readers to recognize the simple outlines of the Genesis story of Adam and Eve in the Garden. But with the seventh book, Milton leaves aside the grand synods in Heaven and Hell and the battles between the good and bad angels and concentrates on the drama of the human pair,

BIBLE AND WESTERN LITERATURE

their frailties and strengths. In doing so, he comes much closer to the language and story line of Genesis. Though a Calvinist by upbringing, Milton, in humanist fashion, sees Adam as free and morally responsible, his sin not predestined. He was "sufficient to have stood, though free to fall" (3.99). When he eats the forbidden fruit, he does it out of love for Eve and with full knowledge of the consequences.

In *Paradise Regained,* the "mortal sin original" will be made good by Christ, not as in the normative Christian tradition through his death on the cross, but rather through his successful resistance to Satan in the temptation in the wilderness (Luke 4). This makes him into a neat counterpart to the important figure of Adam. We know from Milton's posthumous theological work *De Doctrina Christiana* that he questioned the divinity of Christ and leaned toward the Arian heresy, which understood Christ to be more human than divine. John Dryden's *Absalom and Achitophel* (1681) and Abraham Cowley's *Davideis* (1668) veered away from the epic prayer toward something less elevated. In these works the heroic stories of the Bible are applied wittily to political and social issues of the time.

The Biblical Strain in Romantic Poetry: Christopher Smart's *Song to David* (1763) in praise of David's psalms is a work of lyrical intensity that broke with the more restrained neoclassical tradition of its time. In Germany, Friedrich Klopstock's *Messias* (*The Messiah,* 1751–6), a poem of nearly twenty thousand lines on the theme of the redemption offered by Christ, was inspired by both Milton and the Bible. At about the same time the Swiss writer Salomon Gessner wrote an epic prose poem, *Der Tod Abels* (*The Death of Abel,* 1758) on the Garden of Eden and the Fall. In it he romanticized the figure of Cain. Later Romantic poets likewise tended to identify themselves with Cain as a wanderer and an outcast. Samuel Taylor Coleridge's fragmentary prose poem "The Wanderings of Cain" is an example of this. Lord Byron (1788–1824) in his verse play *Cain* (1821) gives us a bold and defiant hero who refuses to bow down to divine tyranny. His Cain embodies something of the author's own rebellion against tradition, as well as his own sense of himself as a guilt-laden figure. Abel, a Christ figure who forgives his murderer, attracts less of the audience's sympathy. This inverted use of the Bible becomes more frequent from the Romantic period (which in England began at the end of the eighteenth century) onward. Byron's "Hebrew Melodies" (1815), a group of a dozen or so short lyrics, have a nonecclesiastical immediateness. They express a direct personal sympathy for Saul and Jepthah's daughter as well as for the exiled Jews of modern times.

The forms of poetry in the Hebrew Bible were being seriously explored at this time. In 1753 Bishop Robert Lowth published his *Lectures on the Sacred Poetry of the Hebrews,* defining the parallelistic structure of Hebrew verse. Poetry based on this principle was, he said, elegant and symmetrical but also vehement and impetuous. In Germany, Johann Gottfried von Herder (1744–1803) in *The Spirit of Hebrew Poetry* (1783) followed Lowth in urging that Hebrew forms and subject matter be used as models by modern poets. He also put his ideas into practice and disseminated them by translating specimens of Hebrew poetry into unrhymed German verse himself.

The work of William Blake (1757–1827) in England represents the culmination of this trend both in theory and practice. Blake held that "the Sublime of the Bible" was the true standard of poetry and was far preferable to "the Stolen and Perverted Writings of Homer and Ovid, of Plato and Cicero" (*Preface to Milton,* 1803). He adopted in his own longer compositions a loose, flowing kind of rhapsodic verse expressive of what he felt to be the prophetic strain of Hebrew poetry. The imagery of the Song of Solomon is an especially powerful influence in his writings; Beulah (from Isa. 62:4) becomes the state of fulfilled desire in his system of symbolism; the ultimate spiritual state, that of the enlightened Imagination, is identified with Eden; and the final redemption of the world and of history will be achieved with the union of Albion (the Divine Humanity) with his "Emanation," Jerusalem, representing biblical liberty and inspiration. He believed (*The Marriage of Heaven and Hell,* ca. 1790) that Isaiah and Ezekiel dined with him. Nevertheless, in the spirit of the French writer Voltaire, he violently rejected the OT code: in "The Everlasting Gospel" (1818), Jesus, who stands for pride and free love, tears aside and overthrows the evil laws of Moses. Blake's use of the Bible is thus highly revisionary.

Among the greater poets of this period, special significance attaches to the writings of the German Johann Wolfgang von Goethe (1749–1832). His youthful projects included a prose epic poem on Joseph and his brothers as well as dramas about Jezebel and Belshazzar. The "Prologue in Heaven," with which his great dramatic poem *Faust* (1770–1832) begins, is fashioned on the first chapters of Job, where God is persuaded by Satan to put his favorite to the test. The example of Job also seems to have provided Goethe with the notion of salvation for his hero. Instead of the devils dragging Faust to Hell as in the established form of the legend, he is saved and rewarded, like Job, at the end of the play. C. Friedrich Hebbel, a later Romantic dramatist, offered the German public two biblical dramas of violence and passion, *Judith* (1840) and *Herodes and Mariamne* (1850).

Among the French Romantic poets, Alfred de Vigny wrote something like one-fifth of his poems on biblical themes. "Moise" (in *Poems,*

BIBLE AND WESTERN LITERATURE

1826) projects his own sensual and spiritual longings onto the figure of Moses, while "La Fille de Jephté" ("Jepthah's Daughter") also expresses his own doubts about and complaints against divine providence. The subjectivity of the Romantic poets in their use of the Bible reaches a climax in the French writer Victor Hugo (1802–85) on many biblical themes.

The Genre of the Novel: The novel, which came into prominence with the rise of the Protestant middle classes, was always particularly hospitable to biblical themes and patterns. John Bunyan's *The Pilgrim's Progress* (1678), sometimes regarded as the first English novel, is a religious allegory, the key to which is provided by the biblical proof-texts to which readers are directed. A biblical seriousness enters into Daniel Defoe's *Robinson Crusoe* (1719), whose trials by sea and desert recall those of Jonah the prophet and whose sins against his father explicitly recall the parable of the prodigal son. Henry Fielding's *Joseph Andrews* (1742) humorously tells of the resistance of a latter-day Joseph to the seductions of his mistress. But the effect of the biblical patterning is not entirely parodic; we are supposed to see Joseph and his mentor, Abraham Adams (likewise modeled on the example of the biblical Abraham), as the heroes of a moral fable. Fielding shows us how the Bible's influence can work in the new, secular setting. The standard of behavior it comes to support is goodness of heart and charity rather than holiness. In the nineteenth century an example such as George Eliot's *Silas Marner* (1861) stands out. This is a moral, pastoral novel in which the child heroine's decision to abandon her natural family and stay with her foster father strongly echoes the story of Ruth.

In America, Herman Melville (1819–91) gives us in *Moby Dick* (1851) a symbolic novel of epic scope in which the story of Jonah and the great fish provides a controlling metaphor: the ending of the novel with the survival of the mariner-narrator Ishmael explicitly echoes Job. Remarkably, all the main characters have biblical names. In Melville's shorter work *Billy Budd* (posthumous, 1924), he combines the motifs of the Fall and the crucifixion. Billy, the hero who is put to death at the behest of a "Father," Captain Vere, functions both as a Christ figure and as Adam betrayed by the serpent (the wicked Claggart). In general, the strong compulsion of biblical ideas and motifs is very evident among American writers—perhaps the effect of their Puritan past. William Faulkner combines a realistic perception of the life of a decaying society in the South with a biblically conditioned view of the relations between his characters. *Light in August* (1932) is clearly based on the NT; its hero, Joe Christmas, is a killer but also a savior. And, like Christ, he dies at the age of thirty-three. *Absalom, Absalom* (1936) is, as the title implies, related to an OT vision of sin and retribution; the familial pattern in the book recalls that of David and his children. His favorite Bible story was the binding of Isaac. Faulkner's English contemporary, D. H. Lawrence, shows an equally strong biblical tendency. *The Rainbow* (1915) evokes the imagery of Genesis 9. In *The Man Who Died* (1931) the story of the resurrection is given a sexual interpretation.

Other biblical archetypes have stimulated the imagination of writers of modern fiction. The story of the Tower of Babel lurks behind William Golding's powerful novel *The Spire* (1964). In Franz Kafka's "The Great Wall of China" (1919), the hubris of humankind's most grandiose achievements is matched by their absurdity and incompleteness. Kafka has also shown an intense preoccupation with the book of Job, which seems to provide a key to his major fictions. But if, as many have maintained, *The Trial* (1914) is an interpretation of that biblical book, it is also a debate with it. Like Job, Joseph K. is the victim of a metaphysical "trial," the terms of which are never revealed to him, but Job is finally granted an interview with his judge and is vindicated. In Kafka's fable, reflecting as it does the crisis of modern secularity, there will be no such saving word. "Where was the judge whom he had never seen? Where was the high court, to which he had never penetrated? He raised his hands and spread out all his fingers." These final questions of Joseph K., ending with a gesture of despair, indicate the absence of an assured metaphysical order, but they witness also to an unremitting and agonized search for such an order. Job is an equally compulsive presence for John Roth, a younger, central European contemporary of Kafka. His memorable work of fiction *Job: The Story of a Simple Man* (1930) remarkably prefigures Jewish historical experience in the mid-century. It portrays suffering up to and beyond the limits of human endurance, but it balances this with a fine biblical sense of rebirth and miracle. Bernard Malamud's *The Fixer* (1966) makes a more contrived use of the Joban model to tell the story of the victim of a blood-libel in the latter days of the czarist regime. The account of Yakov Bok's sufferings gains authenticity through the explicit analogy with the Nazi Holocaust. By contrast, Muriel Spark's novel *The Only Problem* (1984), while seriously engaged with the Job paradigm, fails to evoke commensurable images of suffering and tragedy amid the trivial discontents and complexities marking the lives of an English "smart set" in the eighties.

Though it may be assumed that the vernacular text of the Bible was less widely diffused in Russian society than in the Protestant countries of the West, the Russian novelists Leo Tolstoy (1828–1910) and Fyodor Dostoyevsky (1821–81) show themselves remarkably sensitive to biblical sources and images. Dostoyevsky's hero in

BIBLE AND WESTERN LITERATURE

Crime and Punishment (1886), Raskolnikoff, is patterned on a Christian view of sin and redemption; Alyosha in *The Brothers Karamazov* (1880) is likewise something of a Christ figure. Tolstoy in his later writings accepted the Sermon on the Mount as the fundamental law of life (for example, in *Life,* 1888). In his highly unconventional treatise *What Is Art?* (1898) he even tried to apply a Christian standard, based on a biblical spareness and simplicity, to the writing of novels. The moral tales of his last period (including the novel *Resurrection,* 1899) are an attempt to apply these principles in the actual work of composition. *The Master and Margarita* (posthumous, 1967) by a more recent Russian writer, Mikhail Bulgakov, is a marvelously complex and fantastic tissue of mythological motifs; it has as one of its central threads a rereading of the story of Pontius Pilate and his part in the trial and execution of Jesus.

The Bible in the Modern Theater: While there has been no great flowering of biblical drama in the modern period, modern dramatists have shown a strong interest in certain biblical themes. Abraham's sacrifice of Isaac, which seems to have haunted the Norwegian dramatist Henrik Ibsen (see *Brand,* 1866), reappears as a central motif in Arthur Miller's *All My Sons* (1947), where the binding of Isaac seems to combine with the story of the crucifixion. Joe Keller sacrifices his son Larry; the other son, Chris, as his name implies, has the role of savior.

In the twentieth century Job has been a compelling presence in the theater as well as in the novel. Archibald MacLeish's *J.B.* (1956) spoke powerfully to a generation that had survived the horrors of World War II. In that play the biblical story of Job becomes an image for human endurance in the face of radical suffering and loss. But MacLeish, a modern secular poet, had difficulty in reaffirming the category of dialogue with God. Deviating from his biblical model, he discovered a salvation for his hero in the restoration of human love, that between Job and his wife. The Dutch writer H. de Bruin likewise published a dramatic adaptation of Job after World War II. The Catalan poet Salvador Espriu has shown a fine sensitivity to biblical themes. His dramatic work *First History of Esther* (1948) finds a parallel between the exiled Jews of Shushan threatened with destruction and his own fellow Catalonians in the aftermath of the Spanish Civil War.

Modern dramatists have shown themselves adept in discovering the humorous possibilities of the biblical narratives. G. B. Shaw's *Back to Methuselah* (1921), while it undoubtedly provided a vehicle for a serious discussion of creation and evolution, did so primarily through comedy. André Obey, the French dramatist, in his Noah play (1929), likewise set out to debunk or demythologize; the Bible story loses its gravity as God becomes a venerable, if somewhat irritable, gentleman. In a series of plays on biblical subjects (*Jonah and the Whale,* 1932; *Tobias and the Angel,* 1931; *Susannah and the Elders,* 1937) the British dramatist James Bridie likewise offered a light-hearted and occasionally fantastic treatment of the Bible stories, especially the stories of miracles. But a moral message often comes through just the same. More gravity was achieved by Christopher Fry's *The Firstborn* (1956), on the subject of Moses and the Exodus, and *A Sleep of Prisoners* (1951), which explores a number of biblical episodes through the medium of a dream.

The Jewish Contribution: Not surprisingly, Jewish writers have shown themselves particularly responsive to biblical motifs and images, though their work only entered the mainstream of Western literature in relatively recent times. Heinrich Heine (1797–1856) often compares himself to various figures from the Bible, including (rather wryly) Nebuchadnezzar, but his way of handling these topics is often irreverent. There is a feeling that God himself belongs to his own Jewish world and can hence be treated with "a degree of ironic familiarity" (S. S. Prawer, *Heine's Jewish Comedy,* 1983). In his "Hebrew Melodies" (1851)—the title was taken from Byron—he features several biblical characters, including Moses, Job, and Jeremiah. In later years, during his long, fatal illness, he was to find a special meaning in the sufferings of Job.

In the nineteenth century Jews also developed a secular literature in the Jewish languages, Yiddish and Hebrew, as part of the so-called *Haskalah* ("Enlightenment"). From the beginning of that movement, the exploration of the literary possibilities of the Bible was a major preoccupation. An early example from Germany is Naftali Hirz Wessely's *Shirei Tiferet* ("Songs of Glory," posthumous, 1829), a long epic poem in Hebrew on the life of Moses. In Lithuania, the Hebrew poet "Mikhal" (Micah Joseph Lebensohn) later on published (1851) a group of remarkable lyrics including "Jael and Sisera," "Samson's Revenge," and "Moses on Mount Abarim." Abraham Mapu, the first modern Hebrew novelist, wrote *Ahavat Zion* (1853; trans. A. M. Schapiro as "In the Days of Isaiah"), based on the stories of the kings of Judah. Later on we note a series of biblical novels by the Yiddish writer Sholem Asch, including his NT trilogy (*The Nazarene, The Apostle,* and *Mary;* 1939–49) and *The Prophet* (1955), which concerns the author of the second part of Isaiah.

Yet the great flowering of Jewish writing on biblical themes has taken place in Israel and a full account of it would be virtually a history of modern Hebrew literature. Particular mention should be made of the novelist S. Y. Agnon, whose writings, often set in the background of the Jewish townships of Eastern Europe, invariably have a biblical resonance. *A Simple Tale* (1935), a novel of love and separation, shows how the story of the lover and the Shulamite of the Song of Solomon continues to create mean-

ing for the modern writer. Leah Goldberg in her poem "Love of Samson" (1968) enters sympathetically into the passional life of Samson; the honey he finds in the carcass of the lion becomes the symbol for the tragic passion of love between Samson and Delilah. Many of the new poets did not so much summon up images of episodes from the past as achieve a new contemporary awareness of the meaning of the biblical source. In Amir Gilboa's poems on such figures as Isaac, Moses, Saul, and Rahab, the Bible figures are newly interiorized to express the anxieties and traumas of present-day humanity. Often the Bible serves to express national as well as private dilemmas. An example is Abba Kovner's *A Canopy in the Desert* (1970), a long poem of twelve "Gates" that brings to life the notion of a marriage between God and Israel originally contracted in the desert (see Jer. 2:2; Song of Sol. 8:5). The theme gains agonizing actuality in the light of modern Jewish history spanning the Nazi holocaust and the rise of the state of Israel down to the return to the desert of Sinai in the Six-Day War of 1967—a history of tragedy and triumph that only biblical metaphors seem capable of adequately rendering.

Modern Criticism and the Bible: Modern literary criticism has shown itself increasingly aware of the importance of the biblical dimension in texts of all kinds. Studies of Milton, Blake, Shakespeare, and many others have stressed this. The novels of the nineteenth-century French writer Emile Zola have revealed a mythological patterning drawn from Genesis. Yet the Bible has been seen as a source of more than particular motifs—it has been seen as the embodiment of a "definitive myth, a single archetypal structure extending from creation to apocalypse," which is everywhere present as a shaping influence in Western literature (Northrop Frye, *Anatomy of Criticism,* 1957). As such, its images will shape literary symbolism even when not overtly acknowledged. Special attention has also been paid to the way in which novels are structured. The biblical mode of apocalypse seems to shape the genre as a whole by creating in readers the sense of a desired historical consummation, something quite fundamental to the dynamics of the novel (Frank Kermode, *The Sense of an Ending,* 1967). The tension of history, especially the history of salvation, is very much the theme of the Bible. From the Bible, this awareness has deeply penetrated modern literature from Shakespeare to the present day (Tom F. Driver, *The Sense of History in Greek and Shakespearian Drama,* 1960).

Bible lands, the territories that provided a geographic setting for the narratives of the Bible. They include the modern state of Israel (with the West Bank and Gaza), Jordan, Lebanon, Syria, Iraq, Turkey, Egypt, Ethiopia, Greece, Cyprus, and the Aegean islands.

biblical criticism, the study and investigation of biblical writings that seeks to make discerning and discriminating judgments about these writings. The term "criticism" is derived from the Greek word *krinō,* which means "to judge," "to discern," or to be discriminating in making an evaluation or forming a judgment. It has come to refer to a form of inquiry whose purpose is to make discriminating judgments about literary and artistic productions. Thus, we speak of literary criticism, art criticism, music criticism, or film criticism as disciplines or fields of inquiry whose purpose is to review productions in their respective areas in order to discuss and appraise their significant features and judge their lasting worth.

Generally speaking, the questions asked in biblical criticism have to do with the preservation and transmission of the biblical text, including in what manuscripts the text has been preserved, their date, setting, and relationship to each other, and what the most reliable form of the text is; the origin and composition of the text, including when and where it originated, how, why, by whom, for whom, and in what circumstances it was produced, what influences were at work in its production, and what sources were used in its composition; and the message of the text as expressed in its language, including the meaning of the words as well as the way in which they are arranged in meaningful forms of expression.

Textual Criticism: The aim of this field of biblical criticism is to establish the original wording or form of the biblical text insofar as this is possible. Even with modern printing technology, what an author sends to the printer and what is actually printed may differ. When we recognize a typographical error on a printed page, or note an obvious omission or transposition of a word or phrase, realize that this could not have been the author's intention, and mentally correct the text, we are engaging in textual criticism.

In dealing with ancient texts, it is more difficult to determine what an author actually wrote for several reasons. First, ancient texts were written and copied by hand, and this increased the likelihood that changes in the text could occur. As ancient scribes copied these manuscripts, either by transcribing a written text or by copying a text as it was read aloud by a reader, they sometimes copied the same word

or phrase twice, omitted words or phrases, misspelled words, heard one thing and wrote another, heard incorrectly what was read, or made changes they thought would improve the text in some way. As a result, the various copies of surviving texts differ in their actual wording.

Second, whereas with modern texts it is usually possible to check the printed copy against the author's manuscript, this is not possible with ancient biblical texts. In no case has the author's original text, the autograph copy, been preserved. What have survived are copies of the original (or, more accurately, copies of copies), translations of the original into other languages, and quotations of the original by later authors. Quite often, these were written many years, even centuries, later. During this intervening period, numerous changes occurred, not only in the wording but also in the form of the text. In some cases, entire sections of the original have been lost, and thus what remains is incomplete. Or, in other cases, perhaps only portions of the original text have been preserved, often because only certain passages have been quoted by other authors.

It is the task of textual criticism to collect and study these various writings in which a text has been preserved, determine the changes that have occurred in the wording and arrangement of the text, assess the significance of such changes, and restore, if possible, the original wording or form of the text. If this is not possible, one must decide on the best or most reliable wording and try to account for the historical process through which the text has been changed. In every case, textual criticism seeks to establish a reliable text that can serve as the basis for serious study and reflection.

Sometimes textual criticism is referred to as "lower criticism," as opposed to other fields of inquiry concerning the text that are called "higher criticism." It is "lower" not because it is less important but because it is foundational to other forms of inquiry.

Historical Criticism: Every biblical writing arose in a particular historical setting or perhaps even developed over time in one or more historical settings. Consequently, a biblical writing may be said to have a history of its own, which includes its time and place of composition, the circumstances in which it was produced or written, its author or authors (whether an actual author, editor, or group of editors), how it came to be written, and the audience(s) to which it was addressed. The process through which one attempts to reconstruct the historical situation out of which a writing arose and how it came to be written is one of the main tasks of historical criticism.

A crucial part of determining the history of a text is to establish its date of composition. Sometimes, this is possible because of explicit references in the text itself (e.g., Isa. 1:1; 6:1; Jer. 1:1–3). More often, the text contains no clear indication of its date and this must be determined indirectly, usually through the use of external sources, such as archaeological evidence or nonbiblical writings from the same period that provide reliable evidence for dating persons or events mentioned in the text. For example, the discovery of an inscription that mentions Gallio, the proconsul of Achaia (Acts 18:12–17), has made it possible to date Paul's first visit to Corinth in A.D. 51–52 (Acts 18:1–18; 1 Cor. 2:1–5). This has provided valuable evidence not only for dating 1 and 2 Corinthians, but also for establishing NT chronology as a whole.

Historical criticism has also made it possible to see that some biblical writings were written much later than the time of the events depicted in the work. The book of Daniel describes events in Israel's history that occurred as early as the sixth century B.C., but the book was actually composed much later, during the Hellenistic period (mid-second century B.C.). Through historical critical analysis, the book of Isaiah is now seen to reflect at least two historical periods, the first part (chaps. 1–39) stemming from an eighth-century pre-exilic situation, the second part (chaps. 40–66) a sixth-century exilic or even postexilic situation.

The place of composition, or provenance of the writing, also figures prominently in historical criticism. The general provenance of all the biblical writings is the Mediterranean basin, especially the eastern part, including Egypt, Palestine, Babylon, Syria, and Asia Minor. In some cases, it may even be possible to locate a writing in a given region or city (e.g., Ezek. 1:1–3; Rev. 1:9–11). Knowing the geographical region in which a writing arose may help in understanding the political and social situation better and thereby serve to clarify certain features of the text.

Another major concern of historical criticism is authorship, including both the identity of the author and the author's method of composition. A writing may be anonymous (e.g., Genesis, the Gospels, Hebrews), but quite often within the text itself the writing is attributed to a named person (e.g., Deut. 1:1–3; Isa. 1:1; Jer. 1:1; Ezek. 1:3; Hos. 1:1; Joel 1:1; Amos 1:1; the Pauline Letters [e.g., Rom. 1:1]; James 1:1; 1 Pet. 1:1; 2 Pet. 1:1; Rev. 1:1, 4, 9). Some biblical writings are pseudonymous, that is, they were written in one period but attributed to an illustrious figure of an earlier period (e.g., Ecclestiastes, Song of Solomon, Isa. 40–66; the Pastoral Letters).

Many biblical writings are composite works, either because various sayings or writings of a single author have been collected and edited into a single work (e.g., most of the shorter prophetic books perhaps; John, Romans, 2 Corinthians, Philippians) or because the works of several authors or editors have been edited together into a single work (e.g., the Pentateuch, Isaiah). To be sure, some writings were written by a single author in one particular time and place (e.g., Philemon).

BIBLICAL CRITICISM

Closely related to authorship is the question of the sources that have been employed in the composition of a biblical work. So important has this stage of investigation been that it has emerged as a subdiscipline of historical criticism in its own right and is referred to as source criticism.

Biblical source criticism was first systematically employed in the eighteenth century, when it was discovered that the Pentateuch was based on at least two separate documentary sources (J and E), distinguishable by their consistent use of separate divine names, *Yahweh* (*Jahveh* in German) and *Elohim.* Further investigation eventually led to the detection of two additional sources, one reflecting a priestly outlook (P), the other a Deuteronomic outlook (D). From this emerged the consensus view that the Pentateuch, rather than being of Mosaic authorship or even the work of a single individual, such as Joshua, was actually a composite work based on at least four separate literary sources.

Once it was established that biblical writings had their own history of composition, source criticism was extended to other books. One of the clearest instances of this is the way in which the Chronicler, the editor of 1 and 2 Chronicles, utilized the earlier biblical writings of 1 and 2 Samuel and 1 and 2 Kings as sources for his work.

Similar methods of historical analysis came to be applied to the NT writings as well, especially the Gospels. In the nineteenth century, the Gospel of Mark came to be generally regarded as the earliest written Gospel and was seen as a literary source upon which the Gospels of Matthew and Luke were based. This led to the proposal that Matthew and Luke had used a second source, designated as Q (German *Quelle,* "source"), which contained material common to them but absent in Mark. This became known as the Two-Source Hypothesis and is still widely used to explain the interrelationship of the synoptic Gospels. Source analysis was also extended to other parts of the NT, most notably John and Acts, but with less assured results.

Also closely related to authorship is audience: to whom was the work addressed? This may be clearly stated (e.g., Deut. 1:1; Luke 1:1–4; Acts 1:1; the Pauline Letters; Rev. 1:4, 11) or remain unstated (e.g., Genesis, the other Gospels, Hebrews). It is not simply a matter of identifying the addressees but trying to determine the circumstances that existed between them and the author that prompted the writing.

Literary Criticism: If historical criticism is concerned with the historical circumstances in which a text was written, literary criticism is concerned with the text as a finished piece of writing. The questions here are not so much how the text came to be written or what we can know from outside the text to account for what is in it, but what we can learn from what is said in the text itself. In this sense, the text constitutes a "world" in its own right and as such serves as an object of investigation in all its aspects.

The study of the language of a text includes looking at the words of the text and their various meanings or shades of meaning. Various disciplines of learning, such as philology and lexicography, provide essential tools for such analysis. Individual words, however, are not the sole vehicles through which meaning is expressed. Words are arranged in larger units or patterns of meaning ranging from phrases to sentences, paragraphs, chapters, and sections. To analyze these, it is often necessary to examine the grammar of a language, which includes the arrangement of words (syntax) and how their forms are changed (inflection or accidence). At this level of investigation, literary criticism is helpful in noting various patterns of sentence structure, such as parallelism (a b a′ b′) or chiasm (a b b′ a′).

Closely related to the use of language is the literary style reflected in the text. Quite obviously, the vocabulary used in the text reflects this, whether the words are simple, well-known words or whether they are more complex, less familiar words. Not only the choice of words but how they are arranged and the effect they achieve contributes to literary style. In judging a text, one might ask whether the style is sophisticated or ordinary, calm or excited, narrative or argumentative.

Literary criticism also recognizes the existence of a variety of literary forms or genres in which a biblical text may be written. In some instances, entire books belong to a single genre, such as historical narrative (1 Samuel), poetry (Psalms), wisdom (Job), prophetic oracle (Amos), Gospel (Matthew), letter (Romans), or apocalypse (Revelation). Yet within these larger works are found smaller literary forms: creation myths; genealogies; narratives relating the stories of individual figures, such as Abraham or Joseph; legal codes; testaments; psalms; proverbs; prophetic oracles; miracle stories; parables; prayers; hymns; exhortations; and warnings. This list is not comprehensive, but it does suggest that the Bible, rather than being a single literary genre, contains many genres and subgenres.

Why is it important to classify biblical texts according to their literary form? First, the literary form of a text is often a clue to its meaning. For example, how we interpret Genesis 1–3 depends on whether it is read as a creation myth, allegory, or scientific history. The meaning we see in a text often derives from our prior judgment about its literary form. Second, the literary form is often a clue to its life setting. If we recognize that a text is in the form of a hymn, this allows us to relate it to the liturgical setting out of which it arose. Third, properly recognizing a literary form enables us to compare the text with similar literary forms in both biblical and nonbiblical writings. Such comparison

often enables us to see things in a text we would otherwise miss.

Another area of study is the unity and integrity of a text. As noted earlier, historical criticism often investigates this question, but it is also an important concern of literary criticism. In looking at a finished piece of writing, the literary critic must often judge whether it is a unified whole or a composite work, whether certain portions (interpolations) were added earlier or later, and whether they all stem from the original author.

Literary criticism also asks questions that would be appropriate to interpreting any literary work, especially narrative. These would include questions about character, such as how characters are portrayed in the text, how they interact with each other, how they develop through the narrative. One may also analyze the plot, asking how the plot or story line is developed, how tension is introduced into the narrative, and how it is resolved, if at all. Another concern is the literary mood of the text, and one might ask what emotions the text is intended to elicit from readers. Literary critics have also analyzed biblical texts in terms of the literary perspective of the writing: whether the writing, especially narrative, is written by a participant in the story or by an outside observer; or whether the author is sympathetic, unsympathetic, or neutral with respect to the story that is told.

Form Criticism: This is a hybrid of historical and literary criticism. It begins with the recognition that a particular biblical text, or a portion of that text, may have a history of its own, independent of the larger work in which it is located. This "prehistory" may include both oral and written stages. The text may have originally circulated in oral form and may have gone through several stages of oral development. Then it may have been written down and possibly have gone through several written versions before it finally appeared in the biblical text.

Reconstructing this process of development is known as tradition history. This is possible because in some instances the same biblical text occurs in different parts of the Bible in different forms (e.g., the Decalogue in Exod. 20:1–17; Deut. 5:6–21; cf. Exod. 34:17–26). We may surmise that these different forms reflect different stages of use and development within the communities in which they were used.

Form criticism also employs literary criticism as well. Combined with this recognition of the prehistory of a text is literary analysis, which classifies various parts of the biblical writings into literary forms, or literary genres. Usually, the focus here is on smaller literary units within a larger writing rather than on the entire book itself. This type of literary analysis was first systematically applied to the Psalms, which were classified according to distinct literary forms, such as enthronement psalms (e.g., Pss. 2, 110) or individual laments (e.g., Pss. 22, 130). But along with this literary classification (what is the literary form of the text?) went historical analysis (in what life setting did the Psalm originate?). This close connection between the form of the text and its life setting led to a completely new way of interpreting the Psalms as well as understanding the worship of Israel.

Similar methods of analysis were later applied to the Gospels, beginning in the early part of the twentieth century. Here, too, literary and historical analysis were combined in examining the smaller literary units of the Gospels. Systematic efforts were made to classify the Gospels into literary forms. Basically, two types of material were detected: narrative material and sayings material. Narrative material includes those passages that relate stories about Jesus, including the entire Passion narrative, but also individual stories in which he performs a miracle (miracle stories), makes a pronouncement (pronouncement stories), or in which he is the center of a divine action (legends). The sayings material includes all the words and sayings attributed to Jesus, such as one-line pronouncements, parables, prayers, sermons, proverbs, and wisdom sayings.

Closely related to this literary classification of the Gospel materials was historical analysis. As was the case in the form-critical analysis of the Psalms, here too it was recognized that any particular saying or story might have had its own prehistory in which it originated and circulated in oral form and was transmitted through several oral and written stages until it reached its final written form in the Gospel text. As with the Psalms, a central concern is to determine the particular circumstances in which the story or saying originated, whether its "life setting" had to do with preaching, worship, teaching, or polemical argument.

Here again, we see the close correlation between historical and literary analysis. In form criticism, one determines the literary form of the text, tries to reconstruct the historical process or stages of development through which it passed before it reached its final literary form, and in doing so attempts to correlate it with a particular life setting. As this is done, our understanding of the text increases and various aspects of its meaning become clearer.

Eventually, form-critical analysis was also applied to other parts of the NT, most notably the Letters. Here too, smaller units were analyzed with a view to reconstructing their prehistory, but because it is not so easy to establish a clear chronological sequence for tracing stages of development, as is the case with the synoptic Gospels, the results have been less successful.

The overall effect of form criticism was to focus on the smaller units of the biblical writings. Less attention was given to individual authors or editors who compiled the final literary edition, and more emphasis was placed on the

BIBLICAL CRITICISM

community as a formative influence in shaping and preserving the material. For the Gospels, this meant that they were seen as collections of smaller units, and the authors came to be regarded as editors who collected the materials together into a rather loose narrative framework.

Redaction Criticism: This was a direct outgrowth of form criticism and provided an important corrective. As a further refinement of form criticism, it too combines both literary and historical criticism and proceeds on many of the same assumptions. The crucial word here is "redaction," which applies to the way in which a text or tradition has been redacted or edited. To engage in redaction criticism, one must be able to separate at least two stages of development in the use of a text. This is clearly the case in 1 and 2 Chronicles, where materials from 1 and 2 Samuel and 1 and 2 Kings have been appropriated and re-edited by the Chronicler. The redaction critic's task is to analyze the individual instances where the editor has redacted an earlier text or tradition, assess the overall significance of such changes, and interpret these in the light of the editor's literary and theological purpose.

Redaction criticism has also been fruitfully applied to the Gospels, because of the possibility of arranging them in chronological order and positing stages of development. With Mark serving as the earliest Gospel and as the source upon which Matthew and Luke draw, the redaction critic can analyze the points at which Matthew and Luke have redacted Mark. The particular emphasis of the redaction critic is to isolate the precise points at which the tradition or text has undergone changes at the hands of an editor, or redactor, and from these to try to determine the theological motivations for the changes.

If such analysis is carried out for a Gospel as a whole, it is possible to establish theological tendencies that occur repeatedly enough to be seen as major themes or preoccupations of the author. For this reason, redaction criticism is less concerned with the smaller literary units and the role of the community in shaping these units, but more concerned with the total effect achieved through the cumulative redaction of the materials at the Evangelist's disposal. Accordingly, redaction criticism has resulted in a renewed appreciation of the individual authors as theologians in their own right rather than as simply scissors-and-paste editors who loosely stitched together individual literary units into a narrative framework.

Canonical Criticism: This more recent type of biblical criticism builds on the results of earlier methods. Unlike them, however, it places greater emphasis on the final form of the canonical text. It is less interested in the stages of development that led up to the writing of the text or even the various literary aspects of a writing. It seeks to take more seriously the fact that the Bible is a collection of canonical writings regarded as sacred and normative in two communities of faith, Israel and the church.

This emphasis on the canonical form of the bibical text implies several things. First, the biblical writings possess another dimension, one that may not have been there when the text was originally composed but one it has acquired nevertheless. Even if a writing was composed without the initial intention or expectation that it would eventually become normative for Israel or the church, the fact that it acquired this status means that it must be read from this added perspective. In interpreting the text, readers must not only ask historical and literary questions about the text, but also how and why the text has addressed communities of faith. Their canonical status means that the texts have acquired a universal audience—communities of faith in every age and place who read them not simply to ask what their original authors intended but what they are saying to the living community of faith in the present.

Second, as part of a collection of biblical writings, a book acquires a canonical context. It is no longer read in isolation but along with the other biblical witnesses in all their variety. As such, it is no longer a single voice to be heard alone but stands as part of a chorus of voices to be heard along with the rest. Interpreters can no longer inquire solely into the message of a single text but must investigate this message as part of the entire canonical message, the sum total of all the canonical witnesses heard together.

"The New Literary Criticism": The older forms of literary-historical criticism tended to focus attention on the history of the text and its meaning within its own historical context. Under the influence of recent theories of literary criticism, however, and sometimes in conscious protest against the older criticism, a number of scholars have begun to insist that the Bible texts, like all other literary texts, are to be viewed as autonomous, independent from their own histories including the intentions of their authors, and to be understood solely in terms of their own "worlds" or assumed perceptions of reality. Often loosely termed "the new literary criticism," this general movement includes such diverse approaches as rhetorical criticism, narrative criticism, and reader-response criticism, each of which is traced in greater detail in a separate article in this volume.

"Liberationist" Criticism: Like "the new literary criticism," various types of "liberationist" interpretation of the Bible tend to reject or at least play down the "historicism" of the older approaches in favor of a way of interpretation that views the biblical texts in terms of their contemporary relevance for, and usefulness in, the human struggle for peace and justice. Included here are the various forms of liberation theology and feminist hermeneutics, both of

which are treated in greater detail in separate articles in this volume. ***See also*** Bible; Canon; Feminist Hermeneutics; Hermeneutics; Hexateuch; Liberation Theology, Hermeneutic of; Narrative Criticism; New Testament; Old Testament; Oral Materials, Sources, and Traditions; Pentateuch; Reader-Response Criticism; Rhetorical Criticism; Sources of the Pentateuch; Synoptic Problem, The; Texts, Versions, Manuscripts, Editions.

Bichri (bik´r*i*; Heb., meaning uncertain, either "youthful" or "of [the clan of] Becher"; see Gen. 46:21), a Benjaminite, the father of Sheba and the leader of an unsuccessful northern rebellion against the kingship of David (2 Sam. 20:1–22). ***See also*** Sheba.

Bigvai (big´v*i*). **1** A large family group ("sons of Bigvai") who returned with Zerubbabel from the Babylonian captivity (Ezra 2:14). **2** A smaller family group led by Uthai and Zabbud who returned later with Ezra (Ezra 8:14). **3** A leader of the postexilic community who returned from the Exile with Zerubbabel (Ezra 2:2); he is possibly the same person who later signed the covenant to keep the law (Neh. 10:16). He could be the head of the family groups above or simply a member of the group.

Bildad (bil´dad), a Shuhite, one of Job's three friends (Job 2:11). In the cycle of speeches he is the second speaker with three separate discourses (chaps. 8, 18, 25). The meaning of the name is obscure, but may be related to the Edomite king Bedad (Gen. 36:36). The name is compounded with the theophoric element *dad* (after the Edomite god of that name).

Bilhah (bil´huh). **1** The servant of Laban's daughter Rachel and mother of Dan and Naphtali (Gen. 29:29; 30:4–7). Rachel's childlessness led her to give Bilhah as concubine to Jacob; in an adoption ritual (Gen. 30:4), Bilhah's children would legally be Rachel's. **2** In 1 Chron. 4:29, a location in Simeonite territory (Balah, Josh. 19:4).

Bilhan (bil´han). **1** The son of Ezer and grandson of Seir the Horite (Gen. 36:27). **2** The son of Jediael and grandson of Benjamin (1 Chron. 7:10).

Binnui (bin´y*oo-i*; Heb., "built" or "building"). **1** A family group ("sons of Binnui") who returned with Zerubbabel from the Babylonian captivity (Neh. 7:15), also called the "sons of Bani" (Ezra 2:10). Since the name Bani and Binnui are elsewhere associated (Ezra 10:38; see 2 below), it is possible that the clans were closely related or were the same family. **2** A member of the clan of Bani who was condemned by Ezra for taking a foreign wife (Ezra 10:38). **3** A member of the clan of Pahath-moab who was likewise condemned (Ezra 10:30). **4** A Levite of the clan of Henadad who helped repair the walls of Jerusalem and signed the covenant to keep the law (Neh. 3:24; 10:9); he is possibly the same Levite who returned from the Exile with Zerubbabel (Neh. 12:8). Perhaps he is also the father of Noradiah, an assistant in the inventory of valuables brought by Ezra from Babylon (Ezra 8:33). The identity of these latter two is not clear. ***See also*** Bani. D.R.B.

birds, feathered, winged vertebrates. Palestine is blessed with an extremely rich bird life and, due to its geographical location, it witnesses twice yearly the great bird migrations between Africa and Europe. Unfortunately, due to ruthless hunting, the numbers have been greatly declining in the last few years.

Of the three collective terms for birds used in the Bible, one is translated as "flier" (Heb. *'oph*), another means literally "owner of a wing" (Heb. *ba'al kanap*), and a third means "winged" or "flying" (Gk. *peteinon*). Furthermore, birds in the OT were classified either as "screamers" (Heb. *'ayit*) or as "twitterers" (Heb. *tsippor*). To the former belonged most of the raptorial birds, such as birds of prey and owllike birds, and to the latter the passerine (sparrowlike) birds.

Important for Jewish ritual in the OT is the distinction between clean and unclean birds, although such distinctions no longer held for the NT. There are twenty unclean "birds" listed in Lev. 11:13–19 and in Deut. 14:11–20. These are: the eagle, metire ("vulture"), osprey, falcon, kite, raven, ostrich, nighthawk, seagull, hawk, owl, cormorant, ibis, marsh hen ("water hen"), pelican, vulture, stork, heron, hoopoe, and bat. Most of these are raptors. The bat of course is not a bird, but a mammal. Some have speculated that the reason behind the taboo on all these is that they are considered carnivorous or at least partly so, and therefore might have had contact with a corpse or with blood. The inclusion of the strictly vegetarian hoopoe, however, calls such speculation into question.

The clean birds, which are not specifically listed but are mentioned throughout the OT, are, for instance, the pigeon, the partridge, the quail, and the passerines, which are all vegetarians. All of them feature as important sources of food in different circumstances (cf. Matt. 10:29; Luke 12:6). Concerning birds as sacri-

Mosaic floor depicting various birds. Below the two peacocks are, from left to right, a crane, a pheasant, and a goose, and below them, a partridge, a bird of prey, and a quail; sixth century A.D., excavated at Beth-govrin.

fices, Lev. 1:14 specifies that turtledoves or young pigeons should be chosen for burnt offerings (see Luke 2:24).

In the Gospels, birds are used by Jesus as illustrations of God's providence (Matt. 6:26) or as examples of items of very little value (Luke 12:6–7, 24). Yet even they have a security denied the Son of man (Matt. 8:20). I.U.K.

birth, new. ***See*** Conversion; Regeneration.

birthright (Heb. *bekorah*) or primogeniture, the practice whereby the eldest son receives a larger (double) share of the inheritance than do his younger brothers. This preferential treatment of the eldest son is known throughout the ancient Near East (Mari, Nuzi, Alalakh, Ugarit, Assyria), although the law codes of Lipit-Ishtar (twentieth century B.C.) and Hammurabi (eighteenth century B.C.) both legislate an equal sharing of the inheritance by all the male heirs. In the OT, the law of Deut. 21:15–17 protects the birthright of the eldest son, although the sale of the birthright to a younger son is known from Nuzi as well as from the OT (Gen. 25:27–34). The disregarding of primogeniture by the choice of a younger rather than the eldest son is witnessed both in the OT (Gen. 48:12–20; cf. Rom. 9:12) and in texts from Nuzi, Alalakh, and Ugarit. J.S.K.

bishop (Gk. *episcopos,* "overseer," "guardian"), early Christian office mentioned first in Phil. 1:1, qualifications for which are stated in 1 Tim. 3:1–7; Titus 1:5–9 (cf. 1 Tim. 5:17–22). Titus equates bishop and elder (Gk. *presbyteros;* cf. Acts 20:17, 28). It is possible that in the older church referred to in 1 Timothy (Ephesus) bishops evolved from a larger group of elders, gaining pre-eminence as apt teachers (1 Tim. 3:1; 5:17), while in the younger churches mentioned in Titus (Crete) insufficient time had elapsed for such functional distinctions to appear. ***See also*** Presbyter, Presbytery.

Bithynia (bi-thin'ee-uh), a Roman province in northwest Asia Minor containing Christian communities by the time 1 Peter was written. The NT records no mission there. According to Acts 16:7, Paul and his companions "attempted to go into Bithynia, but the Spirit of Jesus did not allow them." Early legends attribute the evangelism of the province to Peter or Andrew. In any case, by A.D. 110 the Christian movement had permeated both city and countryside, causing neglect of pagan temples and social unrest.

bitter herbs (Heb. *maror*), vegetables with characteristically bitter taste. Exod. 12:8 states, "They shall eat the flesh [of the paschal lamb] that night, roasted; with unleavened bread and bitter herbs they shall eat it." The herbs have been variously identified as certain types of lettuce, endive, and chervil. From tannaitic times (first century A.D.), these herbs have been eaten at the Passover seder to represent the bitterness of the lives of the Israelites under Egyptian slavery.

bittern. ***See*** Hedgehog.

bitumen, a type of asphalt or mineral pitch, either occurring naturally or found as a by-product of burning coal or wood. The KJV translates it as "slime." Throughout antiquity this black sticky substance was used as an adhesive or a caulk. For example, flint knife blades were set into a sickle haft filled with bitumen as a mortar; likewise bitumen held in place inlays of shell and stone. It could also be used for waterproofing, as in the construction of Noah's ark (Gen. 6:14) and the bulrush basket of Moses (Exod. 2:3). References are made to pitch oozing from the earth (Gen. 14:10) near the Dead Sea, where it occurs naturally. Metaphorically, Isaiah uses the image of these slime pits to evoke the Day of the Lord when the land and streams shall be turned into burning pitch (Isa. 34:9). S.L.R.

blasphemy, a term derived from a Greek word meaning to injure the reputation of another. In the Bible it means showing contempt or a lack of reverence for God (Lev. 24:16; Mark 2:7) or something sacred (Matt. 26:65), including claiming for oneself divine attributes by word or deed (Mark 14:64; John 10:33).

blessing. *See* Curse and Blessing.

blindness, sightlessness. It is God who has the power to make people blind (Exod. 4:11) as well as to restore them to sight (Ps. 146:8). In Gen. 19:11 the angels of God who visited Lot struck the evil men of Sodom with blindness. Through Elisha's prayer God struck the Syrian army with blindness (2 Kings 6:18). In Isa. 42:7 God commissions his servant "to open the eyes that are blind."

Blindness was one of the blemishes disqualifying descendants of Aaron from performing sacrifice to God (Lev. 21:16–24). Likewise, it was forbidden to offer blind animals in sacrifice (Lev. 22:22; Deut. 15:21; Mal. 1:8). The blind were to be protected in accord with God's covenantal instructions: no stumbling block was to be placed in their way (Lev. 19:14); and anyone who misled a blind person was cursed (Deut. 21:18). Isaac (Gen. 27:1), Eli (1 Sam. 3:2), and Ahijah (1 Kings 14:4) suffered the blindness of old age. One of the expectations of the eschatological age was the opening of the eyes of the blind by God (Isa. 29:18; 35:5; LXX 61:1).

In the NT Jesus' healing of blindness was one of the "deeds of the Christ" illustrating and bringing about the Kingdom of God (Matt. 11:2–6; 15:29–31; Luke 4:16–19; 7:18–23). There are several examples in which the blind had their sight restored by Jesus: the faith of two blind men enabled them to be healed by Jesus (Matt. 9:27–31); he healed a blind and dumb demoniac (Matt. 12:22); by healing the blind in the Temple Jesus restored them to the worshiping community (Matt. 21:10–17).

Some of Jesus' healings of the blind may function as symbolic characterizations of the revelation and recognition of Jesus' profound identity. That may be the case in the healing of the blind man at Bethsaida in Mark 8:22–26. The painstaking, step-by-step manner in which Jesus performs this healing characterizes the way he is trying to bring his disciples to understand and "see" his profound identity. This healing serves as a symbolic anticipation and transition to the confession of Jesus as "the Christ" in Mark 8:29. Similarly, Bartimaeus, healed of his blindness, represents the insightful disciple who follows Jesus to Jerusalem, the place of his suffering and death (Mark 10:46–52). The healing of the man born blind in John 9 characterizes the spiritual "blindness" of the Jews and indicates how Jesus is the "light of the world."

The concept of blindness was particularly appropriate for metaphorical use; it often characterized spiritual "blindness" or lack of insight into the revelation of God (Isa. 6:9–10; 42:16–19; 59:10; Matt. 15:14; Acts 28:26–27; Rom. 2:19; 11:8–10). J.P.H.

blood, a term understood in biblical writings not only as that which is essential to life but also as the seat of life's power. Though sometimes used simply to designate mortal life (usually in conjunction with flesh), it was often connected with God, the life-giver. Injunctions existed against consuming blood (Gen. 9:4; Lev. 17:10–16; Deut.12:15–18; 1 Sam. 14:32–35; Acts 15:23–29); spilling it was forbidden under penalty of death (Gen. 9:4–7; Exod. 20:13; 21:23–24; Lev. 24:20–21; Deut. 19:21; cf. Matt. 5:21–26, 38–42).

Blood plays an important role in the theology of the OT, the institution of sacrificial atonement, and the work of the priests. Applied to the altar, blood becomes a powerful expiatory agent as sin offering, especially on the annual Day of Atonement (Lev. 16). The priest, who is himself set apart by blood consecration (Exod. 29:19–21), alone is qualified to apply the blood (Lev. 1–7). The Passover celebration remembers the blood on the doorposts of Hebrew houses in Egypt (Exod. 12:7) and the deliverance accomplished by the God of the Covenant (see blood of the Covenant in Exod. 24:6–8; Ps. 50:5; Zech. 9:11). Blood can also symbolize woes and terrors (e.g., 1 Chron. 22:8; 28:3; Exod. 7:14–24; Joel 2:30–31).

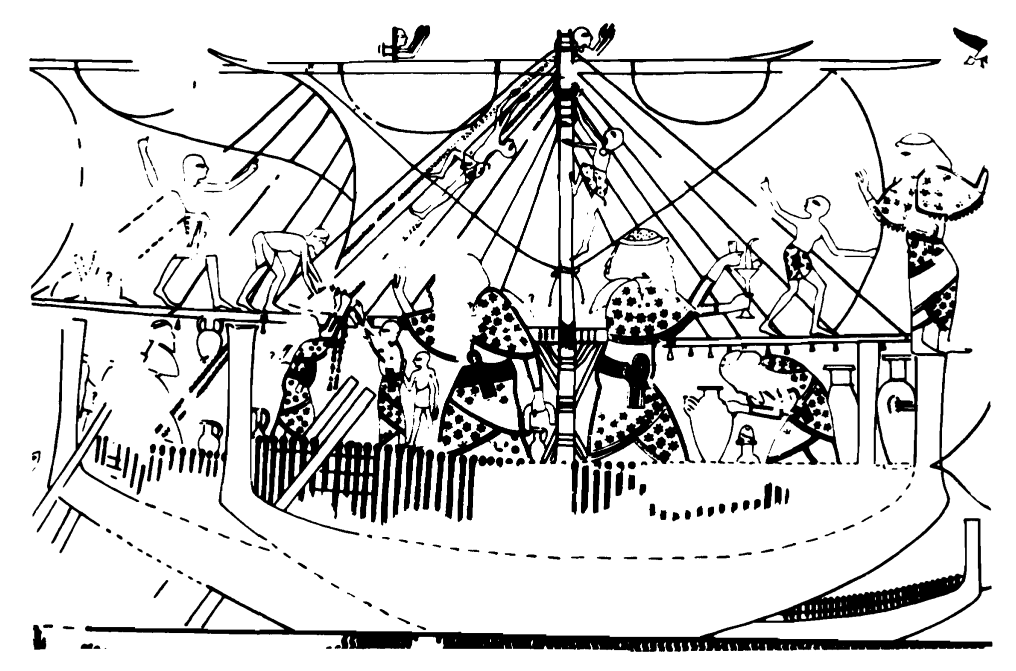
The NT writings vary in the degree of development of the image of blood, but where the image appears it focuses on the shed blood of Jesus and its atoning character. Interpreted in terms of his obedient surrender of his life to God, it becomes the foundation for God's new covenant of grace. The people of faith celebrate this grace at the Lord's Supper; the cup of blessing is the new covenant in Christ's blood (Mark 14:24; 1 Cor. 11:23–29). The most extensive de-

velopment of the image is found in Hebrews 9–10 (see also John 6:53–56; 19:34–37; 1 John 5:6–8; Rom. 3:24–25; 1 Cor. 5:6–8; 1 Pet. 1:18–19; Rev. 5:6–14; 7:14). ***See also*** Atonement; Atonement, Day of; Expiation; Flesh; Life; Lord's Supper, The; Passover, The; Worship. J.E.A.

bloodguilt, "guilt of unrighteous bloodshed," an English term first introduced in 1880, probably from Coverdale's use of "bloodguiltiness" in 1535 in Ps. 50[51]:14, currently translated "bloodshed." The NRSV uses the term in three passages. In Exod. 22:2–3, bloodguilt is not to be incurred by someone killing a thief in the act of breaking in unless it occurs after sunrise. Lev. 17:4 assigns bloodguilt to one who fails to bring a slaughtered animal to the tabernacle as an offering. 1 Sam. 25:26, 33 describes David's avoiding bloodguilt for an act of vengeance regarding Abigail's husband.

Boanerges (boh´uh-nuhr´jeez), the name given by Jesus to James and John, sons of Zebedee (Mark 3:17). The derivation and meaning are uncertain though perhaps the word comes from a Hebrew phrase meaning "sons of rage" or "sons of thunder." Mark's definition, "sons of thunder," could refer to tempestuous dispositions or to manner of speech, but most likely to the former. ***See also*** James; John.

boats, watertight vessels for traveling on water. **In the Bible:** Noah's ark (Gen. 6:14–16) aside, the inland origin of the ancient Hebrews is apparent in the infrequent OT references to boats and sailing. Certainly they knew of traders and seafaring (e.g., 2 Chron. 8:17–18; 9:21; Pss. 104:26; 107:23–30; Prov. 31:14; Ezek. 27; 1 Macc. 8:23, 26, 28) and were acquainted with travel by ship for peaceful purposes (the Egyptian ambassadors, Isa. 18:2; the Chaldeans rejoicing in their ships, Isa. 43:14 [Hebrew text unclear]; Jonah fleeing God's will, Jon. 1) or for making war (the Sea Peoples, Num. 24:24; a galley that cannot attack a town, Isa. 33:21, 23a; Roman warcraft to destroy Antiochus IV Epiphanes, Dan. 11:30; the Egyptian army supported by ships, 1 Macc. 11:1; the Seleucid army landed at Tripoli, 2 Macc. 14:1).



Solomon relied on the expertise of the sailors employed in the commercial fleet of Hiram of Tyre for transporting the materials for the Temple (1 Kings 5:9; 2 Chron. 2:16) and on Hiram's sailors for navigating the fleet supplied by him at Ezion-geber near Elath on the Red Sea (1 Kings 9:26–28; 2 Chron. 8:17; 9:21). These seagoing ships traded at faraway Tarshish and Ophir for large amounts of gold for Solomon's treasury. Jehoshaphat's attempt to emulate Solomon's achievement ended disastrously (1 Kings 22:47–49; 2 Chron. 20:35–37). Inland waters were the home of craft like the ferryboat that carried King David, newly crowned, across the river Jordan at Gilgal (2 Sam. 19:18).

In NT times, fishing and travel across Lake Tiberias (the Sea of Galilee) are commonly reported (Matt. 8:23, 9:1; Mark 4:36, 38; Luke 8:22–23; John 6:16, 22, 23; 21:4–14). On one occasion, Jesus used a fishing boat as pulpit (Luke 5:1–11). The Mediterranean travels of Paul were beset by shipwrecks and becalmed seas (2 Cor. 11:25), especially his final voyage to Rome (Acts 27). His trips were made on trading vessels such as the grain boat running between Alexandria, Egypt, and Peutoli, Italy (Acts 28:13).

Evidence from the Ancient World: Artifacts recovered by archaeologists in the area occupied by the ancient Hebrews, and the history of water transport in the ancient Near East, corroborate this picture of the Hebrews as land lovers. Other peoples, however, plied rivers and seas in boats from earliest times. The oldest known model boat, from as early as 5000 B.C., was found broken and left on a floor below a series of seventeen temples at Eridu in southern Mesopotamia. By about 4000 B.C. there is evidence from southern Iraq and southwest Iran for cargo-carrying boats, small boats for local passenger traffic with little freight, and an intermediate type that could carry both passengers and some freight; the sail was probably in use and trade by sea was under way. The earliest certain representation of a sail comes from Egypt and belongs to the end of the pre-Dynastic period, ca. 3200 B.C. No doubt the Egyptians did invent their sail quite early, because a boat carried downstream on the Nile could always take advantage of the prevailing wind from the north to sail back upstream.

Whether the Egyptians built the sea-going "Byblos ships" mentioned in their inscriptions is still debated; the phrase could mean that the ships were made in Byblos or that their route was between Egypt and Byblos. Egypt lacked wood suitable for building ships, but wood was plentiful near Byblos. Whether the Egyptians themselves sailed these boats is another question: a sailor in a tomb painting from about 2000 B.C. wears a distinctly foreign coiffure. Neither question can be answered definitely on evidence available now.

Inhabitants of the coastal cities like Byblos and Ugarit were the chief traders in the eastern Mediterranean after 2000 B.C.; eventually the size of the navy of Ugarit far surpassed that of the Greeks at Troy. One Ugaritic boat used for carrying grain had a capacity estimated at four hundred and fifty metric tons, roughly twice the size of the flagship in which Columbus discovered the New World. Two models recovered from Byblos may depict these ships, as may a Syrian merchant ship in an Egyptian tomb painting. Similar to the models from Byblos is the Egyptian hieroglyph for boat found in inscriptions at Abydos (thirteenth century B.C.). The models and the hieroglyph are contemporary with a Syrian boat found off the coast of Turkey. These boats are the direct for-

A boat carrying Syrians approaching an Egyptian port. Two Syrians stand in the middle, one giving orders and the other making an offering. Sketch of an ancient Egyptian tomb painting, Thebes.

mal ancestors of the merchant ships seen in Assyrian reliefs of the late eighth and early seventh centuries B.C., especially those showing the escape of Luli of Tyre from Assyrian troops. The remainder of the ancient history of boats in the eastern Mediterranean is fully documented in Greek and Roman sources. ***See also*** Egypt; Ezion-geber; Hiram; Jonah, The Book of; Jordan River, The; Mesopotamia; Noah; Ophir; Ras-Shamra; Red Sea; Solomon; Tyre.

Boaz (boh´az). **1** A land owner in Bethlehem in Judah who lived "when the judges ruled" (twelfth century B.C.) Israel and whose story is told in the book named after his wife, Ruth. He was kind to Ruth, a Moabite widow of his kinsman Mahlon, whose mother, Naomi, was the sole survivor of an Ephrathite family. Boaz extended protection to Ruth, a foreigner, allowing her privileges normally extended only to female clan members. When Boaz celebrated the conclusion of the harvest by consuming a nightly meal on the threshing floor, Ruth asked him to accept her into his immediate family and to redeem Naomi's land. Boaz, however, agreed to take her as his primary wife. After a brilliant legal maneuver at the city gate, Boaz also succeeded in obtaining the right to redeem Naomi's land. Boaz's first son by Ruth, Obed, was pledged as Mahlon's, thus perpetuating the memory of the deceased upon his estate. Obed was also deemed Boaz's first son and thus served to link Boaz's ancestry in the tribe of Judah to Obed's grandson, David the king. The book of Ruth took pains to give Boaz favorite status by placing his name in the seventh slot of David's genealogy (4:18–20; 1 Chron. 2:9–15; cf. Matt. 1:3–6; Luke 3:31–33). **2** One of two bronze pillars placed at the entrance to Solomon's Temple. ***See also*** Jachin and Boaz; Mahlon; Ruth.

J.M.S.

body, the physical side of human beings and animals. Slaves are "bodies" when considered good only for physical labor (Rev. 18:13, "slaves" in the RSV). The term occurs almost exclusively as a translation in the NT for the Greek *sōma.* It can refer to a dead body, i.e., a corpse or carcass (Mark 15:43; Luke 17:37; 24:3, 23; Acts 9:40; Heb. 13:11; Jude 9), but usually refers to a living body. Because God created the human body (Gen. 2:7), the Bible portrays it favorably as integral to human being, a means of concrete activity in the world (1 Cor. 6:20; 2 Cor. 5:10), rather than unfavorably as a drag on the soul

(but cf. Wisd. of Sol. 9:15). Yet the Bible does not glorify the body as an artistic ideal of human strength and beauty.

The body may stand for the whole human being. For some interpreters, this usage approaches the meaning "person" (see the alternation of "bodies" and "selves" in Rom. 6:12–13). Others see this usage as a simple figure of speech (synecdoche), where the context makes a physical emphasis appropriate (see the emphasis on the "members" of the body as the apparently physical "instruments" of human activity in Rom. 6:12–13). The body contrasts with the soul (Matt. 10:28), spirit (1 Cor. 5:3), and mind (Rom. 7:23–24). Paul speaks of the possibility that he was outside his body in a visionary state (2 Cor. 12:2–3). To be dead is to be away from the body (2 Cor. 5:6–10; Phil. 1:20–24). The physical meaning of body makes it stand for solid reality in contrast with unsubstantial shadow (Col. 2:17, "substance" in the RSV).

The body is composed of materials and parts, by which the OT normally refers to it, most often by the material term "flesh." The NT term "members" refers to limbs and organs and stresses the body as the instrument of human activity (Rom. 6:12–13). Sin, one's own or that of others, has brought suffering, persecution, and death of the body (Rom. 5:12–6:23; 2 Cor. 4:7–12; Heb. 13:3). But God has created the body as integral to human being, and this, joined with his purpose to save human beings, spells the resurrection of the body. In the NT, Christ's bodily death and resurrection make possible the bodily resurrection of human beings (Rom. 6:5; 1 Cor. 15:3–26; 1 Pet. 2:24; cf. 3:18–22). Therefore, also, "the body of Christ" comes to mean the church, its limbs and organs made up of individual believers united in Christ and functioning for mutual benefit (1 Cor. 12:12–31). ***See also*** Flesh; Flesh and Spirit; Human Being; Mind; Resurrection; Soul. R.H.G.

bodyguard, a specially chosen personal protector, or troop of such protectors, usually an elite corps of a king's military forces. Achish, the Philistine king, made David his bodyguard for life (1 Sam. 28:2). David appointed Benaiah to be in charge of his bodyguard (2 Sam. 23:23; see also 1 Chron. 11:25). Nebuzaradan was captain of the bodyguard of the Babylonian king Nebuchadnezzar, who destroyed Jerusalem (2 Kings 25:8; see also Jer. 52:12).

book, a term applied in the Bible to a wide range of writings but generally to a written document in which events, poems, or prophecies are recorded or in which persons or objects are enumerated. Various materials were used for early records, such as the clay hexagonal prism on which was inscribed the "Annals of Sennacherib" (probably clay tablets are referred to in Jer. 32:10–14), the stone tablets of the Ten Commandments (Exod. 24:12), the metal plaques or scrolls of the Qumran community, and the wax tablets discovered in the Roman city of Pompeii (cf. Luke 1:63).

This octagonal prism, used for keeping historical records, is from the reign of the Assyrian king Esarhaddon (680–669 B.C.).

The earliest form of books was the scroll made either of papyrus or animal skins (later vellum or parchment was used). The scroll was made by joining sheets of papyrus or leather together into a continuous strip which was then rolled. The average size of the scroll was about 10–12 inches high and 20–30 feet long. Although much longer scrolls exist, they were awkward to use and individual passages were difficult to find. Scholars have suggested that some of the divisions of the Bible, such as the division of the Torah (Gen.–Deut.) into five books, were dictated by the length of scroll that could be handled easily. Beginning about the second century A.D. the bulky scrolls were replaced by the codex, composed of single or folded sheets of writing stacked and sewn together in the manner of the modern book. However, the use of handwritten scrolls in the Jewish synagogue has continued to the present.

There were many other books in the historical and religious literature of the Israelites and the early Christian community than the sixty-six books preserved in the modern Bible. Many

of these exist today, but there are also books mentioned in the Bible that are otherwise unknown and lost. The majority of these were official court records of the Israelite kings, such as the "Book of the Acts of Solomon" (1 Kings 11:41), the "Chronicles of King David" (1 Chron. 27:24), and other court records of the Divided Kingdom (1 Kings 14:19; 1 Chron. 9:1; 2 Chron. 16:11; 24:27; Neh. 12:23) as well as of Persia (Esther 2:23; 6:1; 10:2). Historical accounts by the prophets Shemaiah and Iddo are also mentioned (2 Chron. 12:15). Quotations from two books of poetry also occur: David's elegy for Saul and Jonathan (2 Sam. 1:17–27) and the song of Joshua (Josh. 10:12–13) are taken from the "Book of Jashar," and fragments of the victory song (Num. 21:14–15; possibly also vv. 17–18, 27–30) are taken from the "Book of the Wars of the Lord." Luke (1:1) possibly alludes to now lost narratives of the life of Jesus.

It is likely that portions of other books were incorporated into the present biblical books, such as the account of the defeat of the Amalekites (Exod. 17:14), the record of the cities surveyed in Canaan (Josh. 18:9) and various genealogical records (Neh. 7:5). Similarly, the "Book of the Covenant" (Exod. 24:7) is thought by scholars to refer to the laws attributed to Moses and preserved in Exodus (specifically 20:22–23:33), and various references to the "Book of the Law" or the "Book of Moses" (Josh. 1:8; 8:34; 2 Chron. 17:9) allude to the law codes contained in the Pentateuch, especially as summarized in Deuteronomy (2 Chron. 25:4; cf. Deut. 28:61). The law book found in the Temple by the high priest Hilkiah in the time of Josiah (ca. 622 B.C.; 2 Kings 22:8–23:25) was probably a portion of Deuteronomy, while the "Book of the Law of Moses" read by Ezra after the return from Exile was probably much of the present Pentateuch. An account of the writing of a book of prophecy is recorded in Jeremiah (36:1–32; cf. 25:13; 30:2); there are other references to prophetic books (2 Chron. 12:15; Nah. 1:1; Luke 4:17–20).

The concept of a record book kept by God appears in several places in the OT. In it are recorded God's plans (Ps. 139:16) and the record of the sufferings of his people (Ps. 56:8; cf. Job 19:23). There also developed the idea of the "Book of Life," God's register of righteous persons from which the wicked would be erased, an action that meant death (Exod. 32:32–33; Ps. 69:28). Malachi begins to fuse the two concepts of a record of deeds and a list of names by connecting God's "Book of Remembrance" with a future vindication of the righteous (Mal. 3:16–18). Daniel understands God's book to contain the names of the inhabitants of the coming messianic kingdom, but he also portrays God as Judge (Dan. 7:10;12:1). The NT writers combine the concepts and understand the "Book of Life" to be both a record of deeds that required judgment (Rev. 20:12–14) and a register of the citizenship of the heavenly kingdom (v. 15; cf. Luke 10:20; Phil. 4:3; Rev. 21:27).

Several examples of ancient Egyptian "books" survive, including the "Book of the Dead" and the "Pyramid Texts" dealing with the afterlife and the "Instruction of Amen-em-ope," a collection of proverbial sayings some scholars believe to be the model for parts of Proverbs (esp. 22:17–23:22). "Books" discovered in the ruins of Nineveh include the *Enuma elish,* a mythical creation epic in which the god Marduk subdues the dragon of chaos, and the "Gilgamish Epic," which tells of a legendary king's quest for immortality and includes an account of a flood sent by the gods to destroy humanity. ***See also*** Clay; Codex; Papyrus; Scroll; Scrolls, The Dead Sea; Writing. Booths, Feast of. ***See*** Tabernacles, Festival of.

bottles, containers for liquids, usually made of goatskin, clay, or glass. Dried skins of goats in particular made quite functional vessels, once sewed up with the hair on the outside (Gen. 21:14–19). In antiquity, as is still done in the Near East today, animal skins filled with milk were hung from trees, then shaken until the contents thickened to the consistency of butter. A related process turned fermented milk into yoghurt (Heb. *leban*) (Judg. 4:19). Similar skins were also used to carry water (Josh. 9:4, 13; Judg. 4:19; 1 Sam. 16:20).

The same word seems to refer to a skin container used to hold wine. The parable concerning new wine in old skins (Matt. 9:17; Mark 2:22; Luke 5:37) reflects the condition that arises when skins become old and dried out: they cannot be used to hold new wine, which produces gas as it ferments, because they will burst (Job 32:19). Terra-cotta bottles are well known from every period, and although what their contents were is not always certain, it is clear that tiny vessels were used as unguentaria and perfume containers. Their fragility is used as a figure of speech by Jeremiah to depict the destruction of Jerusalem (19:1–11). Yet another type of bottle is referred to in Psalm 56:8: "put thou my tears in thy bottle." Such small "tear vases," either of terra-cotta, faience, or highly decorated glass, are known especially from Egyptian tombs. S.L.R.

boundary stones, stones erected to delineate boundaries between nations or between private individuals, the latter type frequently also registering special tax exemptions. The many royal stelae found throughout the ancient Near East also served as indications of national bound-

Boundary inscription from Gezer, first century B.C.–first century A.D. It reads, "The boundary of Gezer" on top with the name of the owner of the area, "Alkios," below.

aries. Although written testimony amply attests to the existence of markings for private property, examples beginning from the Late Bronze Age (1500–1200 B.C.) have been excavated almost exclusively in Mesopotamia. In Israel where theoretically all property was deemed inalienable, because God-given, boundary stones were set "by the ancestors" (Deut. 19:14) to guarantee the demarcation of private fields (cf. also Prov. 22:28). Allusions to implicit abuse of such rights are found, however (cf. Deut. 27:17; Hos. 5:10; Prov. 23:10; Job 24:2). J.M.S.

bow. ***See*** Archers; Weapons.

bowl, an open vessel that is wider than it is deep. Biblical references to bowls are numerous and, on the basis of vocabulary and context, indicate a wide variety of types. There were large bowls that served as banquet dishes for wine (Amos 6:6) and craters out of which the food of the main meal was apparently lifted by hand (Prov. 19:24; Matt. 26:23). Temple equipment included a wide range of bowls, often of precious metal, for usage in sacrifices and offerings (Exod. 25:29; Num. 7:79; Zech. 14:20). The bowl was an important element of the menorah, or seven-branched lampstand (Zech. 4:2), as well as part of the capitals of the Temple pillars (1 Kings 7:41).

Archaeological excavation has shown the bowl to be ubiquitous in antiquity, ranging widely in size and in material. Leather, basketry, wood, stone, ceramic, glass, and metal were all used; ceramic was the most common and metal and alabaster were the most precious. Except for obvious cases, e.g., cooking pots, lamps, incense or other cultic equipment, attempts to correlate specific excavated vessel types with terms and usages in the biblical text remain highly speculative. S.L.R.

bowstring, the lanyard spanning the two ends of a bow (KJV: "withe"). Delilah used a bowstring to bind Samson, but he broke it easily (Judg. 16:7, 9). The exact composition of that bowstring is not clear from the text.

Bozrah (boz´ruh; Heb., "fortress, enclosure"). **1** The chief city of northern Edom, 3,608 ft. (1,100 m.) above sea level, overlooking the Wadi el-Hamayida, eight miles (13 km.) south of modern Tafileh and five miles (8 km.) northwest of the highest point on the plateau. Excavations by Crystal-M. Bennett reveal that it flourished in the seventh and sixth centuries B.C. and probably continued into the fourth. As is the case with other Edomite sites, it does not appear to have existed before the eighth century B.C., which raises serious questions about the historical accuracy of the Edomite king lists in which it is mentioned (Gen. 36:33; 1 Chron. 1:44). Evidently famous for its strong fortifications, Bozrah symbolizes in the prophetic oracles the whole of Edom (Isa. 34:6; Jer. 49:13, 22; Amos 1:12). The suggestion by some scholars, on the basis of Isa. 63:1–3, that it was celebrated for dyeing seems highly speculative. **2** A town in Moab (Jer. 48:24), perhaps the same as modern Bezer. **3** A city close to the southern frontier of Syria, known today as Busra eski-Sham. Captured by Judas Maccabeus (165–160 B.C.), it became a century later the northernmost stronghold of the Nabatean Empire and continued to be a vital caravan center through the Umayyad period (A.D. 661–750). It contains today impressive Roman and Byzantine ruins. ***See also*** Bezer; Edom; Moab; Nabatea, Nabateans. D.B.

bracelets, a common form of personal adornment in the biblical world. Found with some frequency in archaeological excavations, they were usually made of bronze or precious metals, although iron examples are known and glass bracelets abound in the Roman period. Both males and females wore bracelets, which were placed at or near the wrist, in contrast to armlets which adorned the upper arm. In addition to being decorative items, bracelets could serve, as did jewelry in general, as a repository of wealth. The story of Rebekah (Gen. 24:22, 30, 47) demonstrates their use as items of monetary value, as does the fact that bracelets were among the valuables donated to the tent of meeting (Num. 31:50). C.L.M.

brambles, various spiny bushes often forming impenetrable thickets (Judg. 14–15; Song of Sol. 2:2). The bramble of Luke 6:44 is probably a fruit-bearing bush such as the blackberry (*Rubus sanguineus*). ***See also*** Thorns.

branch, a growth from the main stem or root of a plant. Various Hebrew words are translated as branch or shoot. The most common one (*tsemahkh*) can be defined as any sprout of vegetation (Gen. 19:25; Ezek. 16:7; Ps. 85:11). "Branch" or "shoot" is used metaphorically in

prophecies of redemption to refer to the future glory of the Israelites (Isa. 60:21) and, more commonly, to the divinely appointed ruler. In Isa. 11:1–5, the future son of David will be imbued with the divine spirit of wisdom, power, and God's will in order to judge humankind in righteousness. God will establish a "righteous branch" of David whose way will be just (in contradistinction to that of Jeremiah's contemporary, Zedekiah; Jer. 23:5; 33:15; cf. Ps. 132:17). His days will be characterized by security (Jer. 23:6; 33:16), and the Israelites shall always be ruled by descendants of David (Jer. 33:17–26). In Zech. 3:8 and 6:12 (cf. Hag. 2:21–23) Zechariah points to two messianic figures, Joshua, the high priest, and Zerubbabel, governor of Judah and the descendant of David. In their time, the people shall dwell securely (Zech. 3:6–10) and the Temple will be rebuilt (Zech. 4:5–14; 6:9–15). ***See also*** Eschatology.

J.U.

brass, an alloy of copper and zinc that is malleable and durable. The KJV translates the Hebrew word *neḥoshet* (meaning "copper" or "bronze") as "brass." Except for several metaphorical references (Lev. 26:19; Deut. 28:23; Isa. 48:4), the RSV uses the term "bronze." Other modern translations tend to omit the word "brass" altogether, since brass was unknown in biblical times.

bray. **1** A term used in the KJV where the RSV has "crush," as is done in a mortar and pestle (Prov. 27:22). **2** The sound made by the wild ass (Job 6:5) or by worthless men (Job 30:7).

brazier, a container for fire used for warming a living area. Jehoiakim sat before a fire burning in a brazier (Heb. *'aḥ*) and threw in pieces of Jeremiah's scroll of prophecy as it was read to him (Jer. 36:22, 23). It was probably made of clay, although in the palace of a king it could possibly be of metal. ***See also*** Oven.

bread, the staff of life (Lev. 26:26; Ezek. 5:16; 14:13); bread and water make up life's two basic staples (Num. 21:5; Isa. 3:1). It is frequently used as a metaphor for food in general (Judg. 13:16; Luke 15:17).

Bread was made primarily from wheat or barley (2 Kings 4:42; John 6:9, 13), the latter being eaten primarily by the poor. At times any mixture of grains, such as beans, lentils, millet, etc., might be ground up and made into bread (Ezek. 4:9). Grain was usually ground and used in coarse form (Lev. 2:14, 16), but at times it was ground more finely (Gen. 18:6; Lev. 2:2; 6:15). The best bread was made from wheat in which only the grain, not the bran, was ground (Deut. 32:14; 2 Kings 7:1). Upon being ground, grain was mixed with water, salt, and old dough. The mixture was then kneaded in a bowl (Exod. 8:3; 12:34), allowed to rise, and baked. Bread was baked either by setting it on hot stones and covering with hot ashes (1 Kings 19:6; Isa. 44:19), by cooking on an iron griddle (Lev. 2:5; 6:21; 7:9), or by baking in an oven (Lev. 2:4; 7:9; 26:26) that was heated by stubble (Mal. 4:1), grass (Matt. 6:30), or twigs (1 Kings 17:12).

The term "bread" is used metaphorically in various ways to refer to earning a living (2 Thess. 3:12); sharing in the future kingdom (Luke 14:15); the word of God (Isa. 55:2); an enemy about to be consumed (Num. 14:9); and Christ as the true food from heaven (John 6:31–51).

Bread is also associated with various religious rites: the Passover and Feast of Unleavened Bread (Exod. 12:8, 14–20; 13:3–10); the bread of the Presence (Exod. 25:23–30; 40:22–23; Lev. 24:5–9; Heb. 9:2); various cereal offerings (Exod. 29:2, 23–25; Lev. 2:4–16; 7:9; 1 Sam. 10:3–8); the manna in the wilderness (Exod. 16:14–30); and the Lord's Supper (Matt. 26:26–29; Mark 14:22–25; Luke 22:14–23; 1 Cor. 11:23–26). The latter was also called the "breaking of bread" (Acts 2:42, 46; 20:7, 11). ***See also*** Lord's Supper, The; Manna; Passover, The.

R.H.S.

breastpiece (KJV: "breastplate"), an item of Aaron's ceremonial garb (Exod. 28:15, 22–30; 39:8–21; Lev. 8:8). A kind of pouch, it was a square (about 9 × 9 inches) made by folding in half a rectangular piece of material. Attached to the ephod by two chains, two frames, and three pairs of rings, all of gold, the breastpiece was like the Aaronide ephod in being a mixed fabric of linen and wool woven with gold, in using the same brilliant colors (purple, blue, and scarlet), and in exhibiting a special kind of workmanship (Heb. *khoshev,* "figured weaving"). These features, like the details of Aaron's robe and diadem, link the breastpiece to the materials and workmanship of the vessels and curtains inside the tabernacle, thereby giving concrete expression to the unique role of Aaron, to the exclusion of other cultic personnel, within the sanctuary.

The symbolic nature of the breastpiece emerges further from the assemblage of precious stones attached to it in four rows of three each. Twelve different gemstones, set in gold filigree, were used, each one inscribed like a signet with the name of an Israelite tribe. While only Aaron ministered inside the tabernacle before the Holy of Holies, he symbolically and regularly brought all Israel in with him, in the form of the tribal names that served as "a reminder before the Lord." In addition, the Urim and Thummim, by means of which Aaron exercised his divinatory function of bearing "the judgment of the people of Israel on his heart" (Exod. 28:30), were attached to the breastpiece.

"Breastpiece" is also used to translate a term that refers to a military garment, a cuirass or plate of metal or mail worn on the chest (1 Kings 22:34; cf. KJV: "habergeon"). The

metaphoric use of breastpiece in Isa. 59:17 and in the NT (Eph. 6:14; 1 Thess. 5:8; Rev. 9:9, 17) probably stems from the military, protective sense rather than from the ritual-priestly usage. ***See also*** Aaron; Ephod; Tabernacle; Urim and Thummim. C.L.M.

breastplate. ***See*** Breastpiece.

brick, a square or oblong block made of mud or clay used principally for construction of buildings and walls. Mudbrick construction is well known from ancient times in spite of the fact that stones were plentiful in Palestine and well used in building projects. Bricks were normally made of a mixture of clay and water, and sometimes straw was included to prevent cracking. Bricks could be sun-dried or fired in a kiln, though the former practice was habitual in Palestine.

Mudbrick could be used for either walls or buildings. Good examples of mudbrick architecture have come from such diverse sites as Jericho, Gezer, and Ezion-geber. After the conclusion of excavations at modern Tel Sheva, the probable site of biblical Beer-sheba, the Israeli government partially reconstructed some houses and walls using modern mudbrick made locally and sun-dried.

Brickmakers at work; a wooden model from an ancient Egyptian tomb. The Israelites in Egypt were brickmakers (Exod. 5:6–9).

The governing authorities of other nations in antiquity who made bricks sometimes had them stamped with royal seals. The best-known example of a royal building project using bricks is that of the pharaoh who oppressed the Israelites in Egypt by forcing them to make the bricks (Exod. 1:13–14; 5:6–9).

Apparently sacred altars could be constructed of bricks, although their use in such activity was not in accord with Hebrew law. A postexilic prophet protested against such activity in Isa. 65:3. Bricks are not mentioned in the NT. J.A.D.

bride, bridegroom. ***See*** Marriage; Wedding.

bridge, a device providing access between two points. The term is not used in the Bible, but archaeological remains and literary texts show use of such devices in the biblical period both in and out of Palestine. Technically it is a construction to provide a level path for foot or vehicle traffic over deep cuts in the earth, frequently riverbeds. Bridges were superior to fords or ferries in eliminating the water hazard. The best surviving examples of bridges are those built by Greek or Roman engineers, many in the time prior to the NT period. They helped make passable the Roman roads used by Paul and other early Christian missionaries who carried their message around the Mediterranean world. R.S.B.

brigandine. ***See*** Coat of Mail.

brimstone, sulphur, a greenish-yellow nonmetallic substance that is highly flammable. It is used in the modern manufacturing of matches and gunpowder. Sulphur is associated in popular belief with divine punishment by fire (Gen. 19:24; Rev. 14:10). ***See also*** Fire; Hell; Sodom.

broad place, a large and level area, usually with a connotation of goodness. Figuratively, it describes the place to which one is brought by God's deliverance from straits of various kinds (Job 36:16; 2 Sam. 22:20=Ps. 18:19; Ps. 31:8), perhaps in reference to the open spaces in cities used for assemblies, with a connotation of restoration to community.

bronze, an alloy of copper and tin. The Middle Bronze Age (2000–1500 B.C.) saw the replacement of copper by bronze in the production of metal weapons, tools, jewelry, and vessels, since bronze was harder than the copper that had been used earlier. Because of its qualities, bronze was used not only for weapons of war but also for decorations, since it could be burnished to a bright, smooth surface. Both qualities, hardness and brightness, are reflected in the many biblical references to bronze, both literal (e.g., Job 20:24; Exod. 25–38; 1 Kings 7) and figurative (e.g., Job 40:18; Rev. 1:15). S.L.R.

Bronze Age, the era spanning roughly the third and second millennia (ca. 3200–1200 B.C.) in the biblical lands of Palestine and Transjordan. There are three major subdivisions: the Early Bronze Age (EB; 3200–2000), the Middle Bronze Age (MB; 2000–1500), and the Late Bronze Age (LB; 1500–1200). These are roughly coterminous with the Old, Middle, and New

Kingdoms in Egypt and the Sumerian, Old Babylonian, and Middle Babylonian periods in Mesopotamia.

Bronze Age civilization is a witness to the beginnings of urbanization, the consolidation of urban centers into powerful city-states, and their eventual decline. Around 1200 B.C., the arrival of new peoples in Palestine, among them Israelites and Philistines, and the consequent break in the archaeological record mark the inception of a new era, the Iron Age. The history of the Bronze Age, however, is essentially the history of the biblical people known as Canaanites. Although this ethnic designation does not appear in the literary record until the second millennium, Canaanite culture, as we know it from both textual and archaeological remains, has its antecedents in the Early Bronze Age.

With few exceptions, attempts to correlate early pre-Israelite biblical traditions with Bronze Age civilization have not elicited a consensus of scholarly opinion. Exemplifying this state of affairs are the attempts by scholars to situate the patriarchal narratives in their proper historical and cultural milieu. Suggested contexts range from the end of the Early Bronze Age through successive periods up to and including the early Iron Age. This divergence of scholarly opinion reflects the virtual nonexistence of firm historical data in the biblical text prior to the period of the Israelite Monarchy (ca. 1025–587 B.C.).

Early Bronze Age: The Early Bronze Age represents the first period of urbanization in the area, as attested at sites such as Arad, Megiddo, Lachish, Jericho, Hesi, Ai, and Bâb edh-Dhra. Except for writing, which is found in neighboring countries, the elements of a nucleated urban culture are present: substantial cities surrounded by fortifications, town planning, distinct domestic quarters, monumental public buildings (e.g., palaces and temples), sophisticated water retrieval and storage facilities, an established cult, and an economy based on agriculture, animal husbandry, and trade. Still shrouded in mystery are the reasons for the abrupt cessation of urban life about 2400 at the end of the EB III period. In the EB IV (2400–2000) period, we find a society of virtual pastoral nomads in western Palestine. In Transjordan current excavations at Bâb edh-Dhra and Khirbet Iskander suggest a less drastic cultural break at 2400; indeed sedentary life continues, although on a reduced scale.

Middle Bronze Age: The Middle Bronze Age marks a return to urban life in Palestine and Transjordan. Following upon the "Dark Age" of the EB IV period, related peoples from Syria, carrying with them the traditions of a highly sophisticated culture, spurred the area into what is generally considered the zenith of Canaanite civilization. Vast city-states arose that were characterized by massive fortifications that included a glacis, a huge earthen rampart, thought to serve as a defense against the battering ram. Cities such as Dan, Hazor, Shechem, Gezer, and Megiddo reflected this new prosperity and wealth in their material culture; excavations have revealed beautiful wheel-made pottery, bronze weapons and tools, and numerous imports from the eastern Mediterranean Littoral. It is this period that is most often cited as the milieu for the patriarchs, based on comparisons of customs and traditions as known from texts of Syro-Mesopotamia. The American archaeologist G. Ernest Wright has connected the open-air shrine at Shechem with biblical traditions (Gen. 33:18–20).

Late Bronze Age: The Late Bronze Age was ushered in by a series of campaigns by eighteenth-dynasty pharaohs who overthrew their Hyksos overlords and made Syro-Palestine part of the Egyptian Empire. As the cities were rebuilt, a high level of prosperity returned. Indeed the period is rightly termed the "age of internationalism," for imports from Mycenaea, Cyprus, Syria, and Egypt are found at almost every site. A large body of cultic artifacts, temples, and texts (from Ugarit) found in this period provides a basis for comparative studies between Canaanite religion and later Israelite traditions. It is generally agreed that the events of the Egyptian bondage, Exodus, and early Israelite conquest traditions are probably to be situated in this period. The break-up of empires throughout the Mediterranean area before 1200 is the context in which the Israelites made their first historical appearance in "the promised land." S.L.R.

brook (Heb. *nahal*), the bed of a stream or river (Arabic, *wadi*) generally dry or nearly dry during the summer months but sporadically or continuously filled with water from the rains during the winter. The land of Canaan had numerous such watercourses (Deut. 8:7; 10:7; cf. Lev. 11:9–10). They are mentioned over a hundred and twenty times in the OT. Well-known brooks of the Bible include: the Zered (Num. 21:12), the Arnon (Deut. 2:24), the Jabbok (Deut. 2:37), the Kanah (Josh. 17:9), the Kishon (Judg. 4:7), the Sorek (Judg. 16:4), the Besor (1 Sam. 30:9), the Kidron (1 Kings 2:37; cf. John 18:1), the Cherith (1 Kings 17:3), and the Brook of Egypt, Canaan's southern boundary (Num. 34:5). D.A.D.

broom tree (KJV: "juniper"), a species of plant generally agreed to be *Retama raetam*, a shrub-like growth usually 4 to 12 feet high, with deep roots suitable for the desert terrain it occupies. It flowers in the spring with small white blooms on twigs with small leaves. A broom tree provided Elijah shade (1 Kings 19:4–5); its roots gave warmth for Job's "friends" (Job 30:4). Its power to burn when fired to coals is cited, perhaps figuratively, in Ps. 120:4.

brothers, blood relatives, especially one's siblings; can also be used of one's close male associates. Cain and Abel are blood brothers (Gen. 4:9), as are Jacob and Esau (Gen. 25:26) and Simon and Andrew (Mark 1:16). Much is made of the pattern of the younger brother superseding the elder; Abel is preferred over Cain, Jacob over Esau, David over Jesse's sons. Gentile election is seen as part of this pattern in Rom. 9:10–13. "Brother" also embraces clans, compatriots, and allies. David calls Jonathan his "brother" (2 Sam. 1:26). Allied kings (Solomon and Hiram of Tyre) are "brothers" (1 Kings 9:13); Amos 1:9 laments the breaking of this "covenant of brotherhood." Israelite priests constitute a brotherhood (2 Chron. 29:34); they must marry within the brotherhood, thus cementing the bonds. Finally we find "brother" used to express the spiritual relationship of coreligionists. Essenes act as "brothers" (Josephus, *Bella Judaica* II.122). Jesus calls brothers those "who hear the word of God and do it" (Luke 8:20). Paul regularly speaks of his coreligionists as "brothers" (1 Cor. 1:10) and as "beloved brothers" (1 Thess. 1:4). ***See also*** Sister. J.H.N.

buckler, a small circular shield worn on the forearm. It is usually made of a leather-covered frame (wicker, wood, or metal) and provides more mobile protection than the full body shield with which it is always associated. Its main function was to deflect projectiles or blows in hand-to-hand combat. Preparation of buckler and shield was preliminary to advance for battle (Jer. 46:3) and they were part of an enemy's armor that was burned subsequent to defeat in battle (Ezek. 39:9; see also 23:24; 38:4). Metaphorically, buckler refers to divine armor defending one in jeopardy (Ps. 35:1) and symbolizes God's faithfulness (Ps. 91:4). Space to hang a thousand bucklers is also used as a symbol of impressive strength and beauty (Song of Sol. 4:4).

Bukki (buhk'i). **1** A leader of the tribe of Dan who was in charge of apportioning the land within the tribe (Num. 34:22). **2** A Levite, a descendant of Aaron and ancestor of Ezra (1 Chron. 6:5; Ezra 7:4).

Bul (bool; Heb., "produce"?), a term designating the old Canaanite name for the eighth month of the year (1 Kings 6:38, approximately October–November). After the Exile, this month was called *Markheshvan* by the Hebrews.

bull, an animal important in ancient Near Eastern religions, including the religion found in the Bible. In Egypt, Apis the bull was thought to impart fertility; in one ritual a bull was driven over fields to increase their yield. Apis also came to be the herald of the national god Ptah and occasionally his earthly manifestation, an instance of the Egyptian tendency to ascribe sacral significance to animals. In Mesopotamia, the bull of heaven was given by Anu to Inanna to execute wrath against Gilgamesh and the land of Uruk. "Bull of heaven," "bull," and "great bull" are also designations of the storm god Ishkur/Adad as god of fertility. Among the Canaanites, Israel's immediate neighbors, El, the president of the divine assembly, was called Bull for his strength and procreative power. To praise gods and heroes one often gave them the names of animals whose virtues they were thought to display: bull, cow, boar, gazelle, ram. A designation for Israel's God in Genesis, commonly translated "Mighty One of Jacob," was originally in Hebrew "Bull of Jacob" (Gen. 49:24).

Statue of the Apis bull representing the Egyptian god Ptah.

Israel was forbidden to make any image through which its God might present himself to the worshiper (Exod. 20:4–5; Deut. 4:15–19); hence images of animals could not be the means of divine-human encounter. An animal could however be the throne of the Lord, like the cherubim (composite winged animals) of the Jerusalem Temple (cf. 1 Kings 6:23–28); God was "enthroned upon the cherubim." Israel's neighbors also knew of the animal as the throne of the deity. Statues of bulls have been found, some of which have a god astride the back; those without the god presumably were seen as animal thrones for the invisible deity. There was always the danger that the animal throne of the Lord would itself become the object of worship. This danger was actually realized, according to the biblical writer, in the two

young bulls that Jeroboam I set up in Bethel and Dan in the tenth century B.C. He called to the people, "Behold your gods, O Israel, who brought you up out of the land of Egypt" (1 Kings 12:28, cf. Exod. 32:4). Bulls were too much a part of the iconography of the East not to play a part in the Temple; the most famous example was the molten sea, a huge bowl supported by twelve oxen, three facing in each direction. Bulls, like other animals of dignity and value, were often sacrificed in the Temple. ***See also*** Cults; Jeroboam I R.J.C.

bulrush. ***See*** Rush.

Bunni (buhn'ī). **1** A Levite, an ancestor of some postexilic inhabitants of Jerusalem (Neh. 11:15). **2** A leader of the postexilic community who signed the covenant to keep the law (Neh. 10:15). **3** A Levite who participated in the dedication ceremony of the returning exiles (Neh. 9:4); perhaps he is the same person as 2, although here the word may not be a name at all since there is some textual evidence to read both Bani and Bunni in this verse (Neh. 9:4) as Heb. *bene,* "sons of." ***See also*** Bani.

burden, a heavy load, but also psychological and spiritual anxiety (Deut. 1:12; Gal. 6:2, 5). Certain superscriptions in prophetic books use a term meaning "that which is lifted up" as a technical designation for a weighty proclamation of judgment (Nah. 1:1; Hab. 1:1; Mal. 1:1; Zech. 9:1; cf. Isa. 13:1; Ezek. 12:10). A conscious reflection on this term occurs in Jer. 23:33–40, where Jeremiah accuses opposition prophets of becoming a burden to the deity, although they claimed to possess the burden of the Lord. Since God alone could break the yoke of oppression (Isa. 9:4; 10:27; 14:25), hope arose that the burden would eventually diminish. Jesus thus described his burden as light (Matt. 11:30). J.L.C.

burial, the disposition of a human corpse to prevent its desecration. The Hebrew word (*qeburah*) and the Greek word (*entaphiazō*) meaning "burial" describe either the act of burying (Eccles. 6:3; Isa. 14:20; Jer. 22:19; Matt. 26:12) or the burial place (Gen. 47:30; Deut. 34:6; 2 Kings 9:28; 21:26: 23:30).

Burial customs among the Hebrews consisted of two important elements: the mortuary ritual, which accompanied the burial, and the physical preparation of the body and its final resting place.

Because of the warm climate of Palestine and the popular belief that a dead body was ritually impure, burial usually took place as soon after death as possible (Deut. 21:23), usually within twenty-four hours (Acts 5:5–6, 10). Among the Jews interment or burial of the body was the common practice, and to allow the body to decay above ground or be subject to destruction by vultures or dogs was the greatest of dishonors (1 Kings 14:10–14; 2 Kings 9:34–37). Anyone who discovered a corpse by the roadside was required to bury it (2 Sam. 21:10–14).

Preparation for Burial: While the complete mortuary rituals among the Hebrews are not described in the Bible, most elements are represented in a variety of passages. As soon as the individual expired, the eldest son or nearest relative present would close the eyes of the deceased (Gen. 46:4), which is simply explained by the resemblance of death to sleep. The mouth was bound shut (John 11:44), the body washed (Acts 9:37) and then anointed with aromatic ointments (John 12:7; 19:39; Mark 16:1; Luke 24:1). The body was then wrapped in cloth (usually linen, Matt. 27:59; John 11:44), although individuals of high rank would frequently be clothed in fine garments.

Cover of a pottery sarcophagus from Beth-shan, twelfth–tenth century B.C.

Both archaeological and biblical data indicate that individuals of wealth or political rank enjoyed burials with elaborate funerary assemblages that included robes, jewelry, furniture, weapons, and pottery (1 Sam. 28:14; Isa. 14:11; Ezek. 32:27).

While cremation was widely practiced among the later Greeks and Romans along with the Canaanites, it was the Hebrew custom to inter the body. The only exceptions to this practice occurred when the bodies were in an advanced state of decay after mutilation (1 Sam. 31:12) or there was the threat of a plague (Amos 6:10).

Embalming was not a part of Hebrew burial practice, but because Jacob and Joseph died in Egypt, they were mummified after the local custom by physicians (Gen. 50:2–3, 26). A cof-

fin (Heb. *'ārôn*, "portable box" or "chest") was used for the burial of Joseph (Gen. 50:26), but this was not generally the case among the Hebrews. In NT times bones were often collected and placed in small boxes called ossuaries.

After preparations of the body were complete, the procession to the grave or tomb began with the corpse being carried on a wooden bier, usually by friends, servants, or relatives (2 Sam. 3:31). The procession was led by professional mourners, followed by family members who filled the air with cries of sadness and agony (2 Sam. 3:31; 2 Sam. 3:32; Job 21:33; Eccles. 12:5; Jer. 9:17; Amos 5:16; Matt. 9:23). Among the Canaanites the mourning ritual included cutting or mutilating one's flesh, but this was expressly forbidden by Jewish law (Lev. 19:27–28; 21:5; Deut. 14:1).

The period of mourning varied among the ancient Hebrews. Mourning for Jacob lasted for seventy days (but this also included the embalming period, Gen. 50:3) while Aaron (Num. 20:29) and Moses (Deut. 34:5–8) were mourned for a period of thirty days after burial.

Burial Sites: A variety of burial sites were utilized by the ancient Hebrews depending on the occasion of death, the time allotted for burial, and the geological characteristics of the area. The most common type of burial arrangement was the simple shaft or trench grave, which was often lined with mats, wood, or stone slabs. These simple graves were sometimes marked by a tree (Gen. 35:8), although in the case of infamous individuals, the burial plot was identified by a pile of stones placed over it (Josh. 7:26; 2 Sam. 18:17).

The Bible does not mention the use of pits for burials, but some have been discovered at various sites in Palestine. Some were designed for a single contracted burial while others were large enough to accommodate several cinerary urns (for ashes) or storage jars.

Caves were frequently utilized for burials either for their convenience or because time or money did not permit the cutting of a tomb from rock. Sarah (Gen. 23:19) and other members of Abraham's family (Gen. 25:9; 49:31; 50:13) were buried in the cave of Machpelah at Hebron.

Rock-cut tombs are the best documented burial sites known today and they display a wide variety of forms. Some were designed for a single interment, but most were designed for multiple burials, usually by one family (Isa. 22:16). The tombs of the wealthy were frequently located in gardens (2 Kings 21:18, 26; Matt. 27:57; John 19:41–42). Some tombs were marked by monuments or pillars (2 Kings 23:17) or whitewashed on the outside (Matt. 23:27) to prevent Jews from accidently touching them and being rendered ceremonially defiled.

Rock-cut tombs were sealed with square slabs of stone or, as was common in the Roman period, with rolling stones (Matt. 27:60). Excavations have revealed sixty such tombs west of the Jordan River while two have been discovered at Tell Hesban, east of the Jordan. J.J.D.

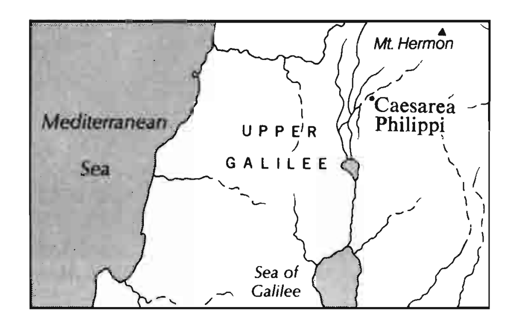
Caesar, Gaius Julius (see´zuhr, gay´uhs *joo*´lee-uhs; 100–44 B.C.), Roman general and author. He conquered Gaul (58–51 B.C.) and then in the civil wars of 49–45 B.C. he dispersed the supporters of his rival Pompey and the Roman senate and emerged as a virtual dictator. He was assassinated March 15, 44 B.C. After more civil wars, his grand-nephew and adopted heir, Octavian (Augustus), who had taken the name "Caesar," emerged as sole ruler of Rome. "Caesar" then came to be used as a title for the emperor (e.g., Matt. 22:21; Mark 12:14; Luke 20:22). ***See also*** Augustus.

Caesarea (ses´uh-ree´uh), a seaport on the eastern coast of the Mediterranean between the ancient cities of Dor and Jaffa, originally a small fortified Phoenician anchorage named Strabo's Tower. In the year 63 B.C., Pompey added the area, together with other towns on the seashore, to the Roman province of Syria. Mark Antony gave it to Cleopatra VII, but when

Based on available evidence, this plan of Caesarea highlights the city of Herod the Great and also includes buildings of other periods.

Octavian (Augustus) won the battle of Actium, he gave the small town to Herod the Great (30 B.C.). Herod built a magnificent new city and port on the site and named it Caesarea Maritima in honor of Octavian, now Caesar Augustus. The harbor complex was given the name Limen Sebastos by Herod (Sebastos being the Greek form of Augustus).



Caesarea was the capital of Roman government in Palestine for over six hundred years, serving as the seat of the Roman governors of the province of Judea and headquarters for the Roman legions stationed in the province. The great Jewish war against Rome began here with an uprising by the Jews in A.D. 66, and "Judaea Capta" coins were minted here to commemorate their defeat. Vespasian (A.D. 69–79), proclaimed emperor by his legions while at Caesarea, raised the city to the rank of a Roman colony.

According to Acts, Christianity was preached in Caesarea by Philip (8:40) and Peter (10:1–11:18; cf. 15:7–9), the latter being responsible for the conversion of the Roman centurion Cornelius. Limen Sebastos was the port of arrival and departure for several of Paul's journeys according to Acts (Acts 9:30; 18:22; 21:8; 27:1–2). Paul was brought to Caesarea in custody from Jerusalem (Acts 23:23–35) to stand trial before Felix, Festus, and Agrippa II (Acts 24–26).

Excavations at Caesarea Maritima have revealed streets, palaces, public buildings, a temple, a hippodrome, a theater, and a spacious sewer system from the Roman and Byzantine periods. Marine archaeologists exploring the port have discovered the immense size of the harbor and some of the Roman mole forming the ancient breakwater.

Following the Islamic invasion of the seventh century, Caesarea declined rapidly, but Louis IX of France built a short-lived Crusader fortress at the site of the ancient harbor. ***See also*** Cornelius; Herod; Paul; Peter; Philip. M.K.M.

Caesarea Philippi (ses´uh-ree´uh-fil-ip´*i*, ses´uh-ree´uh-fil´i-p*i*), a Gentile frontier town located on the southern slope of Mt. Hermon at one of the sources of the Jordan River. The site

was known in antiquity as a shrine of the Greek and Roman nature god, Pan. According to the Jewish historian Josephus, Caesar Augustus gave the city, under the name of Panion, to Herod the Great. When Herod's son Philip became tetrarch of the region, he rebuilt the city and renamed it after the emperor and himself. In or near the city of Caesarea Philippi was the scene of Peter's great confession (Matt. 16:13–19; Mark 8:27–29). M.K.M.

Caesar's household, a collective designation for the thousands of slaves and freedmen of the ruling Roman emperor who typically performed various lower-level governmental functions. Because even the freedmen retained fixed obligations of service, these individuals formed a stable corps of civil administrators and workers, and they labored in every part of the Empire. If certain freedmen attained to exceptional power (Pallas [brother of Felix, Acts 23–24] and Narcissus under Claudius, Nymphidius under Nero), most kept their same tasks throughout their lives. Phil. 4:22 refers to members of Caesar's household found either at Rome or, more probably, at Ephesus. Since such people were debarred from military service, Phil. 1:13 very likely refers to a different group of people. ***See also*** Felix, Antonius; Philippians, The Letter of Paul to the. R.A.W.

Caiaphas (kay´uh-fuhs), Joseph, son-in-law and eventual successor of Annas as high priest, attaining the position in A.D. 18 under the Roman governor Valerius Gratus and holding it until he was deposed by Vitellius, Pontius Pilate's successor, in the year 36–37. He was, therefore, high priest at the time of the trial of Jesus (Matt. 26:3, 57; John 18:13, 24). On the other hand, Luke 3:2 and Acts 4:6 raise a difficult problem regarding his relation to Annas in the priesthood. John 11:49–52 and 18:14 ascribe to him the judgment that it was "expedient . . . that one man should die for the people" with reference to Jesus.

The fortuitous discovery of a first-century family tomb in the Peace Forest outside Jerusalem in 1990 yielded a dozen stone ossuaries containing the remains of sixty-three separate individuals. The most elaborately decorated of the ossuaries is inscribed twice with the name "Yehoseph bar Qayapha (Qapha)" and contained the bones of four children, an adult woman, and a man of about sixty. Some scholars believe that the last is the high priest Caiaphas. ***See also*** Annas; Ossuaries; Pilate, Pontius; Priests; Trial of Jesus, The. F.O.G.

Cain (kayn; Heb., "metalworker," although Gen. 4:1 connects it with a verb meaning "to acquire" or "create"). **1** Adam and Eve's first son, a farmer whose offering God rejected in favor of the firstlings brought by his brother Abel. Angered, Cain killed Abel and subsequently denied knowledge of his whereabouts. As a punishment, God withheld the ground's fertility from Cain, who was condemned to a life of wandering. God placed a mark on Cain to warn would-be attackers that he remained under God's protection (Gen. 4). Cain later built the first city. He was the father of Enoch and ancestor of Tubal-cain, the first metalworker. Cain is regarded as the eponymous ancestor of the Kenites, who are often considered to have originated as a tribe of wandering metalworkers. **2** A city in Judah (Josh. 15:57). ***See also*** Abel; Smith. F.E.G.

Calah (kay´luh; Akkadian *Kalkhu;* Arabic *Birs Nimrud*), a city on the eastern bank of the Tigris River, about twenty miles south of modern Mosul and ancient Nineveh in northern Iraq. Since the first excavations in 1849 by A. H. Layard, further excavations, including those directed by M. E. L. Mallowan, have been carried out intermittently until 1974. Layard wrongly identified the site as Nineveh, perhaps due to the biblical attribution of the building of Nineveh to the hunter Nimrod as well as Calah (Gen. 10:11–12). Nimrod is listed as a descendant of Cush (Gen. 10:8; 1 Chron. 1:10). In Mic. 5:5, the geographic term "Nimrod" appears in parallelism with Assyria. The city was founded in the thirteenth century B.C. by Shalmaneser I (1274–1245 B.C.) during a period of extensive building and expansion in Assyria.

At the beginning of his reign, Ashurnasirpal II (883–859 B.C.) moved his capital to Calah from Nineveh. His rebuilding program included a partially subterranean canal, a city wall, a palace of brick faced with stone, and elaborate low-reliefs depicting religious ceremonies and battle and hunting scenes. At this time, the palace covered about 6 acres. From the northwest section of the palace were found numerous fragments of ivory furniture inlay and decorative plaques carved in the Phoenician style.

The Black Obelisk of Shalmaneser III (858–824 B.C.), which depicts Jehu, son of Omri, submitting to the Assyrian king, was found at Calah. Other important records include the governor's archives, dealing with provincial administration during the reign of Tiglath-pileser III (747–727 B.C.) and the southeastern area, called Fort Shalmaneser, from which were also recovered many ivory fragments. L.E.P.

Caleb (kay´luhb), the founding father of the Calebites, a distinct group of people in Judah, perhaps extra-Israelite in origin. As a representative of Judah, Caleb functions in the spy tradition (Num. 14) as the person who, along with Joshua, brought a positive report to the Israelites about the land available for conquest. In contrast to the other spies whose reports were negative, Caleb won the right to enter God's land and to inherit space in the vicinity of Hebron in the south. The tradition about

Caleb reflects the special interests of Judah, the southern tribe. In contrast to Caleb's reward, the representatives of the northern tribes were denied entry into the land. The construction of this tradition doubtless mirrors the political struggles between the north and the south after the conquest. ***See also*** Hebron; Joshua; Judah. G.W.C.

calendar. *See* Time.

calf, a young offspring of a cow. The calf can be used in the Bible as a general symbol for heathen idol worship, as in the story of the Golden Calf in Exodus 32. While Moses received the Ten Commandments on Mount Sinai, the Israelites asked Aaron to provide them with a god to lead them. He collected their gold and shaped it into the form of a calf, which, mounted on an altar, induced them to a wild orgy. Moses, on his return, melted the calf down, ground it to powder, and scattered it on water he then forced the idolatrous Israelites to drink. In addition, God punished the Israelites with a plague.

A long tradition of a cattle cult exists in the Near East, dating back to Neolithic times (8000–4500 B.C.). Best known is the sixth millennium B.C. cattle shrine at Catal Huyük in Anatolia. There is also evidence for cattle worship from early Crete. A large number of bovine clay figurines found at the seventh-millennium village of Ain Ghazal in Jordan may reflect a similar tradition.

In Israel the calf was an appropriate sacrifice (Lev. 9:2, 8) as a sin offering. It served as food for special occasions as well (see Luke 15:22–24). I.U.K.

call, a common word acquiring theological significance when God or Christ is the one who calls, implying divine election or commission. Sometimes individuals are called to special vocations in God's plan of salvation: God called Moses (Exod. 3:4), the judges (Judg. 3:9), the prophets (Jer. 1:5), and Jesus (Matt. 2:15), and Jesus called the apostles (Matt. 4:21; Rom. 1:1). When the call is a general summons to repentance and salvation, every Israelite or Christian is viewed as its recipient and hence Israel and the church are collectively designated God's "called" or "elect" (Isa. 41:9; Heb. 3:1). Frequently individuals call on God for succor (Pss. 99:6; 116:1). ***See also*** Apostle; Election; Moses; Prophet. J.M.B.

Calneh (kal´neh). **1** A north Syrian city referred to by Amos (Amos 6:2) and Isaiah (Isa. 10:9, Calno) as an example and warning: Israel's fate would be like that of Calneh; despite power and self-confidence, it would not be able to withstand the onslaught of the Assyrian armies. Located in the plain of Antioch, Calneh was capital of the Neo-Hittite state of Unqi. It was tributary to Assyria in the ninth century B.C., and it was conquered and annexed to Assyria by Tiglath-pileser III in 738 B.C. **2** A city in southern Babylonia founded by Nimrod (Gen. 10:10, KJV) that has not been identified. M.C.

Calvary (kal´vuh-ree), the site of Jesus' crucifixion. Three Gospels record both the Semitic name of this site, "Golgotha," and a translation, "Place of the Skull" (Matt. 27:33; Mark 15:22; John 19:17). Luke 23:33 records only a shorter and more accurate translation, "Skull." The name "Calvary" derives from the Vulgate's Latin translation of this word (*calvaria*). It is likely that the site was so named because of its habitual use for executions. Less likely is an explanation rooted in the physical appearance of the place.

Apart from the name very little is confidently known about Calvary. John 19:20 and Jewish and Roman execution customs indicate that it was located outside Jerusalem's city walls. Roman crucifixion customs and the reference to passers-by (Matt. 27:39) also suggest it was near a thoroughfare, while the fact that the cross was visible from afar (Matt. 27:55) could indicate an elevated location. Nevertheless its precise location remains in dispute.

Since the fourth century the site now marked by the Church of the Holy Sepulchre has been revered as the location of Calvary. Objections that this church is *inside* the presumed location of the ancient city walls, and thus incompatible with the Gospel account, have been challenged by recent archaeological excavations defining more clearly the location of the walls. A rival hypothesis locating Calvary on a vaguely skull-shaped rise northeast of the Damascus Gate ("Gordon's Calvary," named after the main proponent of this location), advanced since the nineteenth century, has somewhat fewer advocates. ***See also*** Cross; Jerusalem; Vulgate. J.M.B.

camel, a large, humped ruminant. The camel (Heb. *gamal*) is frequently described in the Bible as a beast of burden and as a riding animal, often in association with nomadic tribes. There are two types of domesticated camels: the one-humped dromedary (*Camelus dromedarius*) and the two-humped Bactrian camel (*Camelus bactrianus*). The dromedary as a proverbial desert animal is distributed throughout Arabia, northern Africa, the Near East, Pakistan, and India, whereas the longer-haired and heavier-built Bactrian camel is better adapted to a colder climate and is at home in central Asia, Afghanistan, and Iran. Usually it is the dromedary that is alluded to in the Bible, but the Bactrian camel may be referred to in Tob. 9:2.

The time and locale of the earliest camel domestication have long been an enigma, but recent finds from Shahr-i Sokhta in Iran and several sites in Turkmenistan suggest that the Bactrian

Camel carrying desert raiders in battle against Ashurbanipal's forces, as depicted in the Nineveh reliefs, seventh century B.C.

camel came under human control here during the third millennium B.C. Archaeological evidence, consisting of camel bones and reference to a camel on a stele, also indicate that the dromedary was domesticated in Oman and eastern Arabia at about the same time.

There is however no archaeological corroboration for the camel being known in Palestine or Egypt at the beginning of the second millennium B.C., as the seventeen references to the camel in Genesis might suggest, and those references are therefore considered anachronisms. Abraham, for example, is said to have been given camels by Pharaoh (Gen. 12:16) and to have supplied his servant with ten camels to search for Rebekah in Mesopotamia (Gen. 24:10). Again, Jacob is supposed to have ridden a camel to Canaan (Gen. 31:17) and to have presented Esau with camels (Gen. 32:15). Genesis 24 also furnishes information on the care of camels, including watering them (24:14, 19–20), feeding them (24:25, 32), and making them kneel (24:11).

Only at the end of the second millennium B.C. did the Israelites make the acquaintance of the camel, when they were invaded in the twelfth or eleventh century B.C. by nomadic Arab tribes ("Midianites") riding on camels (Judg. 6:5). But the Israelites soon started keeping camels themselves and used them (1 Chron. 12:40) to take gifts to King David, who himself employed an Ishmaelite to take care of his camels (1 Chron. 27:30).

Camels were also instrumental for the establishment of long-distance trade; they carried spices and incense all the way from southern Arabia to the Mediterranean and goods from Palestine to Egypt (Gen. 37:25). When the queen of Sheba visited King Solomon, her luggage was transported by camels (1 Kings 10:2).

But camels were not only used as beasts of burden; they were also raised as livestock. The nomadic Arabs kept camels on a large scale; the Hagarites are reported to have owned fifty thousand camels (1 Chron. 5:21), and Job (Job 1:3; 42:12) first had three thousand camels and later six thousand. Camels were also raised for their milk, which may be alluded to in Gen. 32:15. Although camels chew the cud, they do not have cloven hooves, so their meat was forbidden to the Israelites to eat (Lev. 11:4; Deut. 14:7).

In NT times the camel continued to be used as a beast of burden. Jesus noted that "it is easier for a camel to go through the eye of a needle than for a rich man to enter the kingdom of God" (Matt. 19:24; Luke 18:25). Jesus condemned and belittled the Pharisees for striving to strain out a gnat yet being willing to swallow a camel (Matt. 23:24). I.U.K.

camel's hair, type of material for clothing mentioned only in Matt. 3:4 and Mark 1:6. John the Baptist wore clothing made of camel's hair, a common form of dress in the Middle East even today. Because these passages refer to John's austere lifestyle, scholars have debated whether the apparel was the more expensive woven cloak, a less expensive girdle or loincloth, or a garment of dressed camel skin; probably, it was the last (cf. Matt. 11:8; Luke 7:25). Some scholars link Elijah's "garment of haircloth" (2 Kings 1:8), a sign of his prophetic office (Zech. 13:4), with John's camel's-hair garment, thereby identifying Elijah as John's prototype. ***See also*** Elijah; John the Baptist. P.L.S.

Cana (kay´nuh), a village of Galilee, mentioned only in the Gospel of John as the site of Jesus' wedding feast miracle (2:1–11), of the long-distance healing of the Capernaum official's son (4:46–54), and as the home of Nathanael (21:2). Latin and Orthodox churches at Kefr Kenna, about four miles northeast of Nazareth, claim to mark the spot of the wedding, but most scholars agree that the much more likely site of the ancient village is the unexcavated Khirbet Qana on a hill about nine miles north-by-northwest of Nazareth. ***See also*** Galilee; Nathanael.

Canaan, Canaanites (kay´nuhn, kay´nuh-n*i*ts), the ancient name of a territory and its inhabi-

tants that included parts of what is now Israel (with occupied territories) and Lebanon. The origin and etymology of the name "Canaan" remain obscure. It is presumably a Semitic term, but the effort to link Canaan with the Akkadian word *kinahhu,* referring to the redness of a wool dye, is problematic. The word "Canaanite" occurs already in third millennium B.C. texts from Ebla.

Sphere of Influence: In proper usage, the term "Canaan" seems to have referred to a discrete region whose precise boundaries cannot at present be determined. At Ugarit on the Syrian coast of the Mediterranean Sea, Canaan was regarded as a region lying to the south. Late Bronze Age letters from the Amarna archives often refer to Canaan and sometimes give the impression of a discriminating use of the term. Rib-Addi, a king of Byblos, situated Byblos in Canaan. The affairs of Sidon and Hazor were reckoned Canaanite matters. At other times, however, Amarna letters use the word "Canaan" broadly, and so a letter from Tyre implies that Ugarit was a Canaanite city, contradicting the native view at Ugarit itself. Uses of the word "Canaan" in the Bible reflect both the precision and the looseness of the term. The Genesis "Table of Nations" sets the boundaries of Canaan as follows: from Sidon to Gerar near Gaza, and eastward as far as Sodom, Gomorrah, Admah, and Zeboiim to Lasha (Gen. 10:19). The Bible elsewhere speaks of Canaan with a less precise referent in view.

The distinctiveness of the term "Canaan" has been blurred in modern writings. "Canaanite" now serves as an adjective for any aspect of the pre-Israelite, Semitic culture of the Holy Land. Thus the Canaanite languages include not only the dialects of Canaan proper, but by extension all members of a family of languages closely related to Phoenician and Hebrew, a family that is sometimes said to include Ugaritic. Since Canaanite culture blended with the culture of surrounding regions, Canaanite civilization is studied not only from the records and evidence of Canaan proper, but also from the (more abundant) evidence of the larger Syro-Palestinian world.

Society and Religion: Before the emergence of Israel (late thirteenth century B.C.), Canaan was organized politically into small principalities centered around the major towns of Palestine. The Amarna correspondence between Egyptian pharaohs and the kings of Canaanite states gives a vivid picture of petty strife and political intrigue in the land. Concerted action of Canaan's rulers was rare, leaving the countryside vulnerable to Philistine invasion and permitting in the end the development of the ancient state of Israel. There are stories in the Bible about Canaanite alliances against Israel (Josh. 9:1–2; 10:1–5), but such incidents must have been exceptional. The extent of the problem of Canaanite fragmentation is suggested by the list of kings and kingdoms that fell to Joshua (Josh. 12:7–24): thirty-one rulers and principalities are accounted for in this small region.

Canaan's major towns were located for the most part in agricultural regions, especially on the fertile plains of the countryside. The Canaanites enjoyed a reputation as traders and the Phoenicians and other coastal inhabitants as seafarers. The word "Canaanite" itself came to mean "merchant" (Zech. 14:21). Nevertheless, agriculture was a vital preoccupation of Canaan.

The religious festivals of Canaan were, insofar as they are known or inferred, devoted to the concerns of the farmer and the vintner. Israel probably inherited its cycle of harvest festivals from the Canaanite population of Palestine (Exod. 23:14–17). Canaanite religion seems to have placed emphasis on fertility in the natural world. Sexuality in the cult, a feature of Canaanite religion despised by Israel, may have been linked to the task of maintaining plant and animal fecundity. The gods of the Canaanites were in various ways involved in the life cycles of nature. The powerful storm god Baal was a giver of rain. His adversary, Mot, was a god of death and sterility. The ability of gods and goddesses to mate and their whereabouts in the cosmos were tied directly to the fate of human beings and their crops and animals. Palestinian agriculture relied on rain, and so the quality of autumn and winter rains was a central religious concern of the Canaanites.

Canaanite society was stratified. We are left with the impression of a small advantaged class surrounded by a larger population subjected to various controls and under the burden of a variety of taxes and other impositions. Samuel's description of the ways of a king (1 Sam. 8:11–18) is generally taken as a good account of the pattern of Canaanite kingship, even though its inspiration was kingship in Israel.

Canaan and the Biblical Israelites: In the Bible, Canaan is the son of Ham and the grandson of Noah. He is first encountered in the story of Noah's drunkenness (Gen. 9:18–27). Here Canaan's father, Ham, incites the anger of Noah by "looking on the nakedness" of inebriate Noah, and in retribution for this impropriety, Noah curses Ham's son Canaan. Canaan is to be a slave, a curse that may reflect the fate of some elements of the Canaanite population in Israel (Judg. 1:28). Since "to look on the nakedness" of someone suggests a sexual offense, the story may express Israel's disdain for the sexual morality of the Canaanite world.

Canaan next appears in the "Table of Nations" (Gen. 10:6; 15–20) as brother of Put (Libya), Cush (Ethiopia), and Egypt. He is reckoned the father of Sidon, Heth, the Jebusites and a host of other peoples living in the land of Israel. This expresses in the form of genealogy the human geography of early Israel: the Canaanites were the recent inhabitants of

Canaanite dignitary with arm raised in salute; bronze plaque from Hazor, fifteenth century B.C.

much of the land that became Israel. This fact is expressed in more than one fashion in the OT. Canaan's name together with the names of certain of his "sons" can be combined in what has been called the "Deuteronomistic name formula" (Deut. 7:1) to denote the native population of the land. The Yahwist calls the native inhabitants of the land simply the "Canaanites" (Gen. 12:6), while the Elohist prefers the term "Amorites" (Num. 21:13).

Israel was hostile to Canaan. It loathed much that was associated with Canaanite religion and regarded Canaanite life ways as abominable. Israel's literature urges the eradication of Canaanite religion together with the Canaanite people (Deut. 20:16–18). Nevertheless, one can recognize that Israel owed much to the legacy of Canaan. Canaanite enclaves were incorporated into the population of Israel. Canaanite religious language and thought influenced the religion of Israel. These positive sides of the relationship between Israel and Canaan need to be appreciated alongside recognition of the clash between Canaanite and Israelite cultures. ***See also*** Amarna, Tell el-; Baal; Gebal; Hazor; Sidon; Sources of the Pentateuch; Tyre.

canon, English term derived from a Greek word meaning "rule" or "standard." Among the meanings it acquired early in Christian history was "list of religious writings deemed authoritative." When such lists first originated, they had the function of helping believers distinguish among the great variety of religious writings available and identify those titles approved within their own religious community for such purposes as reading at services of worship, exposition, or establishing moral or doctrinal norms. Only in about the fourth century A.D. were efforts made to assemble all "canonical" texts into a single volume or uniform format that one might call a "Bible."

The Hebrew Canon: Among Jews, the oldest canon appears to have been the one defining the Torah (the first five books of modern Bibles), which was not only the central document of Jewish faith but also the fundamental law of the Jewish nation. These five books reached final form and were set apart not earlier than the mid-sixth and not later than the fourth century B.C. It is the one canon upon which all Jewish groups, and also Samaritans and Christians, have usually agreed.

Alongside the Torah, most Jews of the first century A.D. appear also to have accepted a second canon of somewhat less authority, called the "Prophets." This included historical books (Joshua through 2 Kings, but not Ruth), as well as the more strictly prophetic books of Isaiah, Jeremiah, Ezekiel, and the Twelve Prophets (Hosea through Malachi in the Protestant

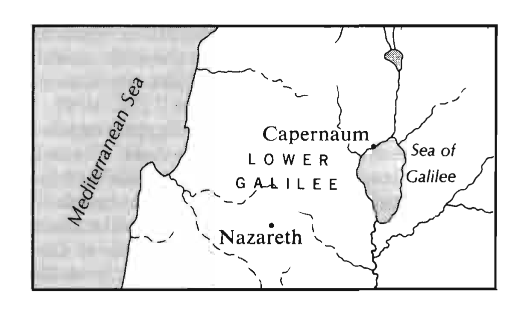
order). The remaining titles of the Hebrew Bible—the total list corresponding to the canon of the Protestant OT—are known as the "Writings" (Ruth, Esther through Song of Solomon). The canon of Prophets may be almost as old as that of Torah, but neither it nor the Writings was accepted by Samaritans or, perhaps, by Sadducees. The canon of Writings probably reached final form only after the first Jewish war against Rome (A.D. 66–70), under the leadership of the rabbinic courts at Jabneh (Jamnia). In the Dead Sea Scrolls, which were hidden away during that war, a wide variety of writings are found, with no obvious canonical distinctions among them.

The Hebrew canon was developed among Jews who spoke Hebrew or Aramaic. Many Jews of late antiquity, however, spoke only Greek. As early as the third century B.C., Greek versions of the Hebrew books were being made for their use. Some of these Greek books have rather different forms from those they took in the Hebrew canon (e.g., Jeremiah and Daniel); others were ultimately excluded from the Hebrew canon (e.g., Ecclesiasticus). There were also original works written in Greek, such as the Wisdom of Solomon, which came to be canonical only in the Greek language realm. The result was a larger, but somewhat ill-defined, canon of writings revered among Greek-speaking Jews.

The early Christian church achieved its greatest successes in the Greek-speaking world and inherited these Greek-language scriptures (often called, collectively, the Septuagint). Christians never fully agreed, however, on the exact boundaries of the canon. Eastern and Western churches used somewhat different lists. St. Jerome (d. A.D. 420) attempted to introduce the Hebrew canon into the West through his Latin translation, the Vulgate, but failed to win assent. The Ethiopian Church continued to revere books such as *1 Enoch* that disappeared elsewhere. During the Reformation, Protestants on the European continent used the Hebrew canon to define their OT, while Anglicans granted a "deutero" or secondary canonical status to books not found in the Hebrew canon but long accepted among Western Christians (the so-called OT Apocrypha).

The Christian Canon: While the church of the first century A.D. accepted the existing Jewish scriptures in varying forms, it had, at first, no distinctively Christian canon. In the second century, however, it began to set apart specifically Christian writings and treat them as equal to the older scriptures (for example, by reading from them in worship). The process of making a NT canon (and thus of identifying the Jewish scriptures as an "Old" Testament) was not clearly defined in advance, and the results were consolidated only gradually.

In the early second century, the "heretic" Marcion created a canon consisting solely of edited versions of Luke and of some of Paul's Letters; he rejected the OT entirely. The first such canons or collections among the "orthodox" were probably those of the four Gospels and ten Letters of Paul (not including 1 and 2 Timothy and Titus). They date from about the time of Marcion, and scholars debate whether the "orthodox" NT canon was more a reaction to Marcion or an independent development. Not until A.D. 367 does one encounter a canon identical to the modern one (in a "Festal Letter" of Bishop Athanasius), and even thereafter the status of several books (e.g., Hebrews, Revelation, and 1 Clement) continued uncertain for some time. To the present day, there is no universal agreement on the boundary of the Christian canon of Scripture; the Apocrypha which Roman Catholics include is excluded by Protestants from their canon. ***See also*** Apocrypha, Old Testament; Bible; Hagiographa; Pentateuch; Sadducees; Septuagint; Texts, Versions, Manuscripts, Editions; Torah; Vulgate. L.W.C.



canonical criticism. ***See*** Biblical Criticism; Canon.

canopy, an open-sided cover giving overhead protection from sun or rain. A canopy stood before the porch pillars in Solomon's Hall of Pillars (1 Kings 7:6), a canopy of wood will stand in front of the envisioned temple vestibule (Ezek. 42:10), and a canopy will shield the throne of Nebuchadrezzar when he occupies Egypt (Jer. 43:10). Metaphorically, darkness serves as the Lord's canopy (1 Sam. 22:12), or thick clouds dark with water (Ps. 18:11), and a canopy over all the Lord's glory will provide shelter (Isa. 4:5).

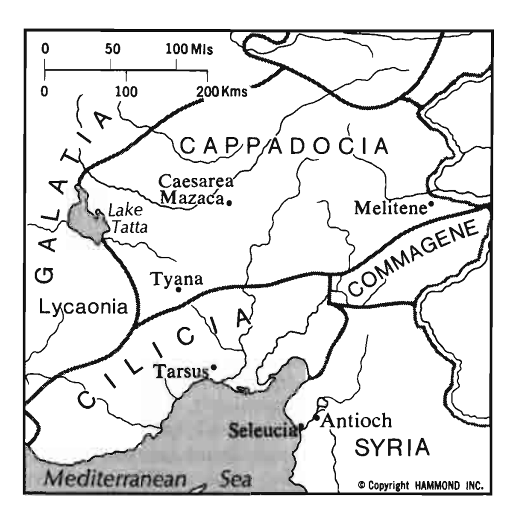
Canticles (kan´ti-kuhlz). ***See*** Song of Solomon, The.

Capernaum (kuh-puhr´nay-uhm; from the Heb. for "village of Nahum"), a town on the northwest shore of the Sea of Galilee, about two and one-half miles from the mouth of the Jordan River. Capernaum was the center of Jesus' Galilean ministry (Matt. 4:13). Here he healed the centurion's son (Matt. 8:5–13; Luke 7:1–10; cf. John 4:46–54) and engaged in other healing, teaching, and exorcising (Matt. 17:24; Mark 2:1; Luke 4:23, 31; John 2:12; 6:17, 24). In particular, Jesus was active in the synagogue (Mark 1:21; John 6:59) and in "the house" (Peter's?; Matt. 8:14–17; Mark 1:29–34; 9:33). In spite of all his work there, however, Jesus apparently felt rejected by the people of Capernaum and cursed the town (Matt.11:23–24; Luke 10:15). Outside the Gospels, Capernaum is mentioned by the historian Josephus and by Talmudic sources, as well as in pilgrim accounts from the Byzantine period.

Identified since 1856 with Tell Hum, Capernaum has been sporadically excavated for the

past 130 years. In 1894, the Franciscans purchased the site that included the ruins of a white limestone building already identified in 1838 as a synagogue. First excavated by a German team in 1905, the synagogue continued to be the object of work by the Franciscans into the 1920s and again in the 1950s, 1960s, and 1980s. Opinion concerning the dating of this synagogue varies from the late second century to the fifth century A.D., but the 1981 excavations have confirmed the ruins of a basalt first-century synagogue, probably the very synagogue in which Jesus preached, immediately beneath the limestone one.

A few yards to the south are the remains of a triple octagonal fifth-century church, constructed over a fourth-century "house-church," itself incorporating and preserving the remains of a first-century home similar to the many surrounding houses of the same period. The Franciscans identify this structure as "Peter's House" on the basis of inscriptions and of early pilgrim accounts.



Other recent excavations to the east of the Franciscan site have uncovered late Byzantine and early Arab dwellings of the seventh and eighth centuries. This was apparently a time of prosperity for Capernaum, as witnessed by a hoard of 282 gold Umayyad dinars (about $250,000) found under a courtyard pavement in 1982. ***See also*** Peter; Synagogue. C.H.M.

Caph (kahf) or kaph, the eleventh letter in the Hebrew alphabet. ***See also*** Writing.

Caphtor (kaf'tor), a place referred to by Amos (9:7) as the home of the Philistines who are called the "remnant of the coastland of Caphtor" (Jer. 47:4) and "the Caphtorim" (Deut. 2:23). Scholars have offered various suggestions for its location. The most widely accepted is the Aegean island of Crete; some Philistine names suggest an origin in the Aegean basin. Other scholars see a connection between Caphtor and Kafto, an Egyptian designation for the southern coast of Asia Minor, and propose Cilicia on the southeast coast as the location. The Septuagint translates Caphtor as Cappadocia, a region in Asia Minor, although this probably is not correct. ***See also*** Caphtorim; Philistines. D.R.B.

Caphtorim (kaf'tuh-rim), the designation of a group of people described in the Table of Nations (Gen. 10:14; 1 Chron. 1:12) as the "sons of Mizraim [Egypt]" and connected with the descendants of Ham, although this list is more a record of political and historical relationships than a genealogical list. They are elsewhere identified with the Philistines who inhabited the southern coastland of Canaan north of Egypt (Deut. 3:23; Amos 9:7). ***See also*** Caphtor; Philistines.

Cappadocia (kap'uh-doh'shee-uh), an isolated interior region of eastern Asia Minor lying north of the Taurus Mountains, east of Lake Tatta, south of Pontus, and west of the Euphrates River. Although possessing some urban centers—Mazaca/Caesarea and Tyana were the most important—much of Cappadocia remained rural and was divided as early as Hittite times into immense royal and temple estates. After 585

B.C. Cappadocia came under Persian rule, then passed to Seleucid control, and then after ca. 255 B.C. was ruled by its own kings. Roman influence in Cappadocian affairs became strong during the late second and first centuries B.C., and Tiberius finally made Cappadocia a Roman province in A.D. 17. A Jewish community may have existed in Cappadocia as early as the second century B.C. (see 1 Macc. 15:22; Acts 2:9 offers somewhat later evidence). Among those who received 1 Peter were Christians in Cappadocia (1 Pet. 1:1). References in the LXX to Cappadocia represent a mistranslation of the name "Caphtor" (Deut. 2:23; Amos 9:7). ***See also*** Asia; Peter, The First Letter of; Persia; Pontus; Seleucids, The; Tiberius. R.A.W.

captain, a leader, usually of a military detachment. Several different Hebrew and Greek words can be translated as "captain," "officer,"

"ruler," or "leader." Such persons could be in charge of specified groups ranging from tens to thousands (Exod. 18:21) and their duties included military authority, civil administration, and judicial responsibilities. The NT contains several references to such officers (Mark 6:21; Luke 22:4; Acts 4:1; 5:26; 27:11), some of whom may have had military or police duties and some of whom may have been Levites. Jesus is termed in early preaching a "leader" (Gk. *archēgon*) unto salvation (Acts 3:15, RSV: "author"; 5:31; Heb. 2:10; 12:2, RSV: "pioneer").

Captivity. ***See*** Exile.

caravan, a mixed company of travelers, usually fairly large for the purpose of safety, that included merchants and their pack animals who regularly traversed the trade routes to oversee the transport of their goods. The pack animals were usually the ass and, less commonly, the camel, after the latter was domesticated ca. 1100 B.C. Accordingly, before the camel came into common use the range and movement of caravans was limited. The earliest biblical reference to domesticated camels, which were probably used in caravan trade in the Transjordan, is to the camels of the Midianites in Judg. 6:5. Camels are also mentioned in connection with the spice and incense caravan traffic with Arabia (1 Kings 10:2; Isa. 60:6). Other biblical references to caravans include a caravan of Ishmaelites in Gen. 37:25 (KJV: "company"); the endangered caravan traffic due to the unstable political conditions in the period of the judges in Judg. 5:6a (KJV: "highways"); the caravan trade in Edom in Job 6:18 (KJV: "paths"; 6:19, KJV: "troops"); and the caravans of Dedanites in Arabia in Isa. 21:13 (KJV: "traveling companies"). As these references suggest, there was both internal caravan trade and the more significant caravan activity with the Transjordan and Arabia. Caravan cities, including caravansaries, developed along the principal routes to provide support for the caravan trade. ***See also*** Ass; Camel; Trade and Transportation. F.S.F.

carbuncle, a decorative stone, possibly red, green, or blue, used in liturgical items (RSV) and translated in the NRSV as "jewels" or other specific stones.

Carchemish (kahr'kuh-mish), a city on the Euphrates River in northern Syria, about sixty miles northeast of Aleppo. It appears in the Akkadian sources of the eighteenth century B.C. as an ally of Shamshi-adad I against Yahdunlim of Mari. Carchemish also participated in the struggle against the Hittite king Hattushili I.

Carchemish allied itself with the Hittites in the battle against Egypt at Kadesh, 1286 B.C. Although reduced in size and power by the Sea Peoples at the end of the thirteenth century B.C., Carchemish reemerged in the first millennium B.C. as a center of Neo-Hittite culture. Mesopotamian interest in Carchemish culminated in the transformation of the city into an Assyrian province under Sargon II (Isa. 10:9).

In the sixteenth century B.C., Egypt extended its influence into southwestern Asia. Pharaoh Ahmosis (ca. 1565) claimed to have reached the city of Carchemish, and Pharaoh Thutmose III to have conquered it. In the first millennium B.C., Pharaoh Neco encountered Josiah at Carchemish before the two engaged in battle on the plain of Megiddo (2 Chron. 35:20, 22). Carchemish figured in the struggle between Egypt and Babylonia for hegemony over Syria. In 605 B.C., Nebuchadnezzar defeated Egypt there and Babylonia assumed control of the region (Jer. 46:2). This event was a turning point in the prophecies of Jeremiah (see Jer. 25:1–13a). L.E.P.

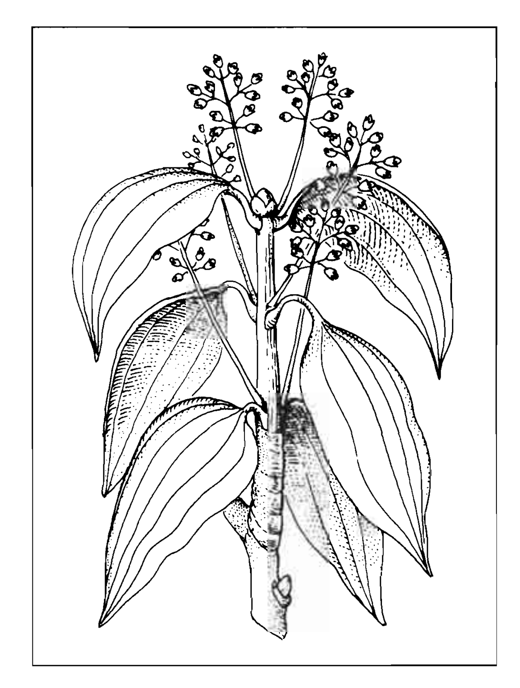
Carmel (kahr'muhl; Heb., "garden," "orchard"). **1** A range of fertile, forested hills (Amos 1:2; Isa. 33:9; Nah. 1:4) about fifteen miles long on the west border of the land allotted to the tribe of Asher (Josh. 19:26). It extends from the Samaritan hill country west to the Mediterranean and south to the Mount Carmel headland. Mount Carmel, which is the entrance of the Jezreel Valley (Esdraelon), commands an excellent view of the shoreline and rises 556 feet above the harbor of modern Haifa. Because of its height it provided an important strategic position for the control of the fertile valley land. Mt. Carmel was the scene of the contest between Elijah and the four hundred and fifty prophets of Baal and the four hundred prophets of Asherah (1 Kings 18:19). However, the most important archaeological find in the area is prehistoric. The famous Carmel caves are from this region, along modern Wadi el-Mugharah overlooking the Plain of Sharon.

2 An ancient city identified as modern Khirbet el-Kirmel (or Kermel) eight miles southeast of Hebron. The city was allotted to the tribe of Judah (Josh. 15:55). It was here that Saul commemorated his victory over the Amalekites by erecting a monument (1 Sam. 15:12). Also, near Carmel the events told in the story of Abigail, David, and Nabal took place. In this story the prosperous but ill-mannered Nabal insulted David, and David's wrath was averted only by the intercession of Abigail on Nabal's behalf. However, God struck Nabal down and Abigail was then free to marry David who acquired by that marriage Nabal's wealth, power and prestige (1 Sam. 25). ***See also*** Mughara, Wadi el-. S.B.R.

Carmi (kahr'mi). **1** Son of Reuben (Gen. 46:9; Exod. 6:14; 1 Chron. 5:3) who migrated to Egypt with his brothers and was subsequently considered head of the clan of Carmites (Num. 26:6). **2** Father of the Achan (Josh. 7:1, 18) or Achar (1 Chron. 2:7) known for his theft of illicit booty, who was listed as a son of Judah (1 Chron. 4:1).

Carmites (kahr´mīts). The clan of Reubenites descended from Carmi, Reuben's fourth listed son (Num. 26:6). ***See also*** Carmi, 1.

carpenter, an artisan skilled in working with wood. The Israelites were apparently lacking great skills in this area in the time of David and Solomon (ca. 1050–975 B.C.), since carpenters had to be imported from Tyre to aid the construction of David's palace (2 Sam. 5:11) and Solomon's Temple (1 Kings 5:6). Among the returnees from the Exile in the sixth century B.C., however, there were native craftsmen able to aid in the restoration of Jerusalem and the Temple (Jer. 24:1; 29:2). A description of a carpenter's tools and procedures is given in Isaiah's account of the manufacture of an idol (Isa. 44:13–17): a "line" for measuring, a pencil for marking, planes for shaping, and a compass for designing. The carpenter there described also plants, tends, and cuts down the trees with which he works.



In the Gospels, Jesus is reported to be a carpenter (Mark 6:3) or the son of one (Matt. 13:55), indicating his common birth, since learned men did not pursue that profession. A tradition from the mid-second century A.D. says Jesus made yokes and ploughs, and some legendary stories of the young Jesus picture him helping his father build a house and fashion a bed, but they are of doubtful historical value. While the Greek word usually rendered "carpenter" can also mean "craftsman" or "builder," there is no clue in the Gospels as to how the term is to be understood other than as one who worked with wood for a living. R.S.B.

Carpus (kahr´puhs), person in Troas with whom Paul left his cloak and other items. Timothy is asked to fetch them in 2 Tim. 4:13.

carriage, a term that in the KJV translates several terms that refer to baggage or burdens, not to a vehicle of transport (Judg. 18:21, RSV: "goods"; 1 Sam. 17:22, RSV: "things" and "baggage"; Isa. 10:28, RSV: "baggage"; Isa. 46:1, RSV: "things you carry"; Acts 21:5, RSV: "made ready," where the reference is to preparing the necessary baggage for a journey).

cart, or wagon, a term denoting either a two- or four-wheeled vehicle drawn by oxen or other animals (rarely horses). It was used for transporting people and things. The particular meaning of "cart" is derived from the biblical context. The function of a cart was different from that of the chariot, however. In Gen. 45:19, 21, 27; 46:5; Num. 7:3–8 (RSV: "wagon"); and Jth. 15:11 no special function is indicated. In 1 Sam. 6:7–14; 2 Sam. 6:3; and 1 Chron. 13:7 a cart that had not been used for "secular" purposes and cows that had never been under a yoke are used to transport the Ark of the Covenant into Jerusalem. Several passages (Isa. 28:27, 28; Amos 2:13) refer to the cart in its agricultural uses. ***See also*** Carriage; Chariots. F.S.F.

cassia (kash´uh; *Cinnamomum cassia*), a tree native to India and the Far East, whose bark is easily peeled into long hollow rolls. The bark, buds, leaves, and twigs of the cassia tree, having a cinnamon smell, were imported for use in making spices, perfumes, and oils (Ezek. 27:19; Exod. 30:24; Ps. 45:8). The leaves and pods also have medicinal properties. ***See also*** Spices.

Cassia.

castle. ***See*** Architecture.

Castor (kas´tuhr) **and Pollux** (pol´uhks). ***See*** Twin Brothers, The.

caterpillar (KJV; RSV: "destroying locust" [Joel 1:4] and "destroyer" [Joel 2:25]), the worm-shaped larva of a moth, butterfly, or other insect, considered destructive because of its voracious appetite for growing plants. It is viewed as one of the forms of punishment or judgment God uses (1 Kings 8:37; 2 Chron. 6:28; Ps. 78:46; Isa. 33:4).

catholic Epistles. ***See*** General Letters.

cattle, a generic term for ruminant animals. There is a generic term for domesticated cattle in the OT (Heb. *baqar*), but a variety of terms are used in the Bible to describe the different types of cattle. Domesticated cattle were used

by the Hebrews in many ways: as a food source (in 1 Kings 4:23 Solomon's daily household ration included thirty cattle and oxen), as sacrificial offerings (Solomon offered twenty-two thousand oxen in 1 Kings 8:63), to pull carts (Num. 7:3), as pack animals (1 Chron. 12:40), for threshing (Deut. 25:4) and, together with sheep and goats, for milk products and dung. The wild ancestor of domesticated cattle, the aurochs (Heb. *re'em*), was extant in Palestine until the Bronze Age (2000–1500 B.C.). I.U.K.

Cauda (kaw´duh; KJV: "Clauda"), a small island (modern Gavdos) southwest of Crete, by which Paul sailed toward Malta, en route to Rome (Acts 27:16).

caulkers (KJV: "calkers"), men from Byblos (Gebal, Ezek. 27:9) or Tyre (Ezek. 27:27) whose work was making ships watertight. Materials used may have been bitumen and some fiber binder to plug seams between planks.

cave, a natural opening in a hillside. There are two Hebrew terms designating a cave (*meā'rāh* and *ḥôr*); the latter term literally means "hole" but is also translated "cavern."

Natural caves are abundant in Syro-Palestine due to the presence of chalk, limestone, and sandstone formations in the hills and mountains. Because of the soft qualities of these materials, man-made tombs and caves are also abundant.

Not only are the caves in this region abundant, but they are frequently massive in size. One cave complex near Damascus in modern Syria was capable of holding four thousand men, according to Strabo, a Greek geographer who wrote in the late first century B.C. That complex of caves is still visible today. Palestine also had large caves as indicated by the fact that David could conceal four hundred men in the cave of Adullam (1 Sam. 22:1–2).

A number of caves are mentioned in Scripture and some are given specific names, further attesting to their importance. The first cave mentioned is the one to which Lot and his daughters fled after the destruction of Sodom and Gomorrah (Gen. 19:30). Abraham purchased the cave of Machpelah from the Hittites who were living in the region of Hebron (Gen. 23:1–20). Another cave mentioned by name is the cave at Makkedah to which the defeated kings of the Amorites fled after the battle of Beth-horon (Josh. 10:16–27).

The cave of Adullam, located in the region of Bethlehem, enabled David and his men to escape from King Saul (1 Sam. 22:1–2). En-gedi was the place to which David fled with his men from Saul and they were able to utilize there a large cave for protection (1 Sam. 23:29; 24:3). It was there that David also cut off part of Saul's garment (1 Sam. 24:4).

Caves were utilized in a variety of ways by the inhabitants of Syro-Palestine. Archaeological discoveries indicate that one of the earliest and most common uses was as a domestic dwelling. Lot and his daughters utilized a cave for that purpose (Gen. 19:30; see also Num. 24:21; Song of Sol. 2:14; Jer. 49:16; Obad. 3). During times of political unrest or warfare, caves were frequently sought out as a place of refuge (Judg. 6:2; 1 Sam. 13:6; 22:1). The tradition that Jesus was born in a cave is of post-NT origin.

Caves located in the area of Tel Halif (biblical Rimmon?) were probably created in the third millennium B.C.

Archaeological and biblical data also point to the widespread use of caves as tombs. Abraham bought a cave for that purpose (Gen. 23:17–18; 49:29) and Lazarus was buried in a cave (John 11:38).

Numerous caves were employed for the purpose of worship. During the Roman persecution of Christians in the first century A.D. and following, many utilized the protection of the cave to worship their God.

Excavations in the caves at Wadi en-Natuf (northwest of Jerusalem), Mugharet ez-Zuttiyeh (northwest of the Sea of Galilee), Wadi Khareitun (east of Bethlehem) and Wadi el-Mugharah (in the Carmel mountain range) have provided important information on the prehistoric cultures of Palestine.

During the second Jewish revolt under Bar-Kokhba, hundreds fled to the caves west of the Dead Sea and their remains have been discovered by explorations in Wadi Muraba'at. The approach of the Roman army in the first century A.D. caused the Essenes at Qumran to hide their valuable manuscripts in caves, and since 1947 these have been coming to light through excavation and trade. J.J.D.

cedar (*Cedrus libani*; Heb. *'ereṣ*), a tree mentioned frequently in the Bible. It is a magnificent deep-rooted coniferous tree of the Holy Land, especially Lebanon, where its distinctive pyramidal image adorns the modern flag of that country. The cedar lives to a great age, as many as two thousand years, therefore attaining great heights and diameters. Consequently, it is often referred to as a symbol of strength and power (Ezek. 31; Ps. 92:12). Its fragrant, gum-exuding wood is red in color and is especially durable and resistant to insects and decay. These properties made it a popular choice for the construction of items such as musical instruments, chests, and various household furnishings. Cedar was also preferred for the construction of buildings, as attested by the numerous references in the book of Kings (1 Kings 6, 7). Its superlative qualities made it an important trade item in antiquity. Solomon's Temple and palace in Jerusalem had timbers and panels of cedar sent by the king of Tyre (1 Kings 5:6–10; 9:11; 2 Chron. 2:3). The Egyptians are said to have imported the cedars of Lebanon for the tall straight masts of their ships and for the durable coffins of their dead. The great demand for and the subsequent overuse of cedar in both ancient and recent times has severely depleted this important resource. Consequently, programs for replanting are currently underway in suitable areas of the Levant. ***See also*** Forest; Woods. P.L.C.

Cenchreae (sen'kruh-ee), a harbor seven miles east of Corinth on the Saronic Gulf, used for trade with Asia. Here, prior to sailing to Ephesus during his second journey, Paul shaved his head (Acts 18:18–20). Cenchreae was the home of Phoebe (Rom. 16:1). ***See also*** Phoebe.

censer, a small hand-sized vessel containing hot coals on which incense was sprinkled. Brass censers (RSV: "firepans") were used in the tabernacle (Exod. 27:3) and in the First Temple (1 Kings 7:50), while gold censers were among the Temple vessels carried off to Babylon when Nebuchadnezzar overthrew Israel, burned the Temple, and carried the people into exile in Babylon (2 Kings 25:15). Several censers have been excavated, suggesting that incense offerings played an important role in popular religion (cf. Ezek. 8:11).

census. ***See*** Enrollment.

centurion (sen-tyoor'ee-uhn), the commander of a hundred men in a Roman legion. The centurion held a position similar to that of a company commander. There were grades among the sixty centurions serving in a legion, with the highest ranking centurion achieving a position similar to that of a "knight" (Lat. *equites*) among the Roman nobility. Such men were prestigious members of a relatively small class governing the military. They received substantial pensions upon retirement and would easily count among the local notables of a town (cf. Luke 7:2; Acts 10:1). A centurion supervised the soldiers who crucified Jesus (Mark 15:19).

Cephas (see'fuhs; from Aramaic *kay fah,* "rock" or "crag"), a surname equivalent to the Greek name "Peter" (John 1:42; cf. Matt. 16:17–18). ***See also*** Peter.

chaff, the covering of the grain removed during the process of winnowing. Nearly all references in the Hebrew Bible are to chaff blown in the wind (Job 13:25; 21:18; Pss. 1:4; 35:5; 83:13; Isa. 17:13; 29:5; 33:11; 41:15; Jer. 13:24; Dan. 2:35; Hos. 13:3; Zeph. 2:2). In the NT it is what is burned as worthless "with unquenchable fire" after the one who baptizes with the Holy Spirit has gathered the wheat into the granary (Matt. 3:12; Luke 3:17).

chains, metal rings connected in series. Made of various metals both base and precious, they were used in ancient Israel for decorative purposes, as jewelry (e.g. Ezek. 16:11), for architectural ornamentation (1 Kings 7:17), and in assembling the priestly vestments (e.g., Exod. 28:14). Chains were not used to bind prisoners, though they were occasionally used as leashes, as depicted in the Black Obelisk of Shalmaneser III. Later, chains were used to bind people (cf. Mark 5:3–4; Acts 12:6–7), replacing the fetters and ropes typically used earlier.

chalcedony (kal-sed'uh-nee; KJV; RSV: "agate"), third of the precious stones in Rev. 21:19. Pliny

(*Natural History* 37, 7, 92ff) designates a kind of jasper and a kind of emerald "Chalcedonian." Which gem Revelation refers to is uncertain.

Chalcolithic (kal'koh-lith'ik) **Age.** *See* Copper.

Chaldea (kal-dee'uh), a region at the head of the Persian Gulf, home to a loose confederation of Semitic- (possibly Aramaic-) speaking peoples, organized along tribal lines. It includes the birthplace and ancestral home of Abraham (Gen. 11:28, 31; 15:7). The Aramaic sections of the book of Daniel (2:5, 10; 4:4; 5:7, 11) include Chaldeans among the learned magicians and conjurers. Detailed astronomical cuneiform records provide information valuable for reconstructing historical events and confirm the Chaldeans' reputation as astrologers and astronomers. Merodach-baladan and Nebuchadnezzar, prominent Chaldean kings, figure in biblical accounts (especially in 2 Kings and Jer.) which reflect the political prowess of this last native Mesopotamian dynasty, which ruled during the time known as the Neo-Babylonian period. Chaldea joined with Median forces to conquer Assur in 614 B.C. Heavy political unrest characterized the internal affairs of this dynasty. L.E.P.

chapman (KJV; RSV: "traders" [2 Chron. 9:14]), an archaic term for merchant.

charge. *See* Superscription.

charger, term used in the KJV for a shallow platter (RSV: "plate," "platter," or "basin"). It is not a common domestic utensil, but rather a vessel used in cultic rituals (Num. 7:13–85; Ezra 1:9; Exod. 25:29). The head of John the Baptist was carried on such a vessel (Matt. 14:8, 11).

chariots, vehicles of various types with two wheels (commonly of four, six, or eight spokes) normally drawn by two horses. Horse-drawn chariots were introduced into Canaan by the Hyksos (ca. 1800–1600 B.C.), who were major innovators in the development of instruments of warfare. Chariots in Egypt and early Assyria were characteristically manned by two men, a driver (1 Kings 22:34; 2 Chron. 18:33; Jer. 51:21), who did not carry a weapon, and an archer. The Hittites, and later the Assyrians and Syrians, introduced a third man, a shield bearer, into the chariot. The three-man chariot seems to have been used by the Hebrews since the military specialist (RSV: "officer"; Heb. *shalish,* "third man") was probably the third man in the chariot (Exod. 14:7; 15:4; 1 Kings 9:22; 2 Kings 9:21–25).

The principal use of the chariot was a military one, especially for rapid flanking movements in open country. As military equipment the chariot was used by the Canaanites against the Israelites (Josh. 17:16; Judg. 1:19, where "chariots of iron" probably refers to metal [bronze?] plates that were used to reinforce the wood chariot bodies; Judg. 4:3, 13; Josh. 11:4–9). Similarly, the Philistines employed chariots against the Israelites in the time of Samuel and Saul (1 Sam. 13:5). Since chariots were of limited use in the central highlands, the principal area of early Israelite settlement, they were not used by the Israelites until the time of David (eleventh century B.C.) in his successful campaigns against the Philistines (2 Sam. 8:4; 1 Chron. 18:4). The chariot became a highly developed regular part of the military equipment of the state under Solomon (1 Kings 10:26), under whom there was considerable building activity and trade in connection with horses and chariots (1 Kings 4:26; 9:19; 10:29).

In addition to their use in warfare, chariots were a symbol of power as the vehicle of kings and their court (Gen. 41:43; 2 Sam. 15:1; 1 Kings 1:5). The chariot of the Ethiopian whom Philip addressed (Acts 8:26–38) was a sign of his rank as Queen's minister. ***See also*** Horse; War. F.S.F.

charismatic. *See* Spiritual Gifts.

charity, the term used in the KJV to translate one of the NT words for "love" (Gk. *agape*) in 26 of its 116 occurrences. Charity (from Lat. *caritas,* "costliness, esteem, affection") has acquired connotations that make it unsuitable for

Assyrian war chariot with armed charioteers; detail from the bas-reliefs at the palace of Ashurbanipal at Nineveh, seventh century B.C.

modern readers as the bearer of the biblical writers' meaning. Nevertheless, modern connotations of the word do coincide with the biblical ideal of caring for the neediest members of the covenant community of Israel (Deut. 15:7–9; 24:19–22; Job 31:16–23; Ps. 82:2–4; Prov. 14:21, 31; Isa. 1:16–17) and the Christian church (Matt. 25:31–46; James 1:27). ***See also*** Love.

Chebar (kee'bahr), a water course in Babylonia. The Chebar canal was the scene of Ezekiel's vision and of a Jewish settlement in sixth century B.C. Babylonia (Ezek. 1:13; 3:15, 23; 10:15, 20, 22; 43:3). The Jewish settlement of Tel Aviv (Akkadian *til abubi*) was located on this canal (Ezek. 3:15), an important irrigation channel near the city of Nippur. ***See also*** Ezekiel, The Book of.

Chedorlaomer (ked'uhr-lay-oh'muhr), "king of Elam" and one of four kings from the East who joined forces to attack five kings in the Dead Sea Valley, according to Genesis 14. The five kings were conquered and remained subject to Chedorlaomer for twelve years. In the thirteenth they rebelled. In the fourteenth Chedorlaomer and his allies marched against them, conquering widely in Canaan, and finally routing the rebels. He plundered Sodom and Gomorrah and took Lot captive. Abraham gave chase, attacked, and retrieved all the booty and captives. The name "Chedorlaomer" reflects authentic elements of Elamite personal names—*kuter* or *kutir*, as in the royal names Kutir/Kuternakkhunte, and *Lagamar*, the name of a deity—but neither the specific name nor the general events are attested or alluded to elsewhere. S.B.P.

Chemosh (kee'mosh), the national god of Moab. Although he was worshiped at Ugarit and perhaps also at Ebla, little is known about this god before the first millennium B.C. Biblical evidence is scanty: the Moabites were "the people of Chemosh" (Num. 21:29; Jer. 48:46; cf. also Jer. 48:7), and Solomon built a high place for Chemosh "the abomination of Moab" (1 Kings 11:7; cf. 11:33), which Josiah destroyed (2 Kings 23:13). In Judg. 11:24 he seems to have been the chief Ammonite deity, although this may be an error. More information is found in the victory stele of Mesha, the king of Moab (ca. 840 B.C.). Its language indicates that the Moabite theology of Chemosh was close to that of Yahweh in Israel. ***See also*** Mesha; Moab. M.D.C.

Chenaanah (ki-nay'uh-nuh), a son of the Benjaminite Bilhan (1 Chron. 7:10), and the father of the prophet Zedekiah (1 Kings 22:11; 2 Chron. 18:10). Zedekiah is noted for making iron horns and advising Judah's King Jehoshaphat to attack ("gore") the Arameans at Ramoth-gilead in cooperation with the king of Israel. Later Zedekiah is reported to have slapped the sole opposing prophet, Micaiah, son of Imlah (1 Kings 22:24; 2 Chron. 19:23).

Chenoboskion (ken'aw-bos'kee-uhn). ***See*** Nag Hammadi.

Chephirah (ki-*fi*'ruh), one of four cities not attacked by the Israelites under Joshua due to a prior treaty arrangement (Josh. 9:17). It was also one of fourteen towns occupied by Benjaminites (Josh. 18:26), and received a portion of 743 resettling Judeans in the postexilic recovery (Ezra 2:25; Neh. 7:29). The site has been identified as Khirbet el-Kefireh, five miles southwest of Gibeon.

Cherethites (kair'uh-th*i*ts), a people, probably Cretans, who lived in the area to the southeast of Philistia ("the Negeb of the Cherethites," 1 Sam. 30:14). As mercenaries, they constituted a section of David's personal army under the leadership of Benaiah, son of Jehoiada (2 Sam. 8:18; 20:23).

Cherith (kair'ith), a brook or *wadi* (i.e., river bed with water only in the rainy season) east of the Jordan, near Jericho. It could be a wadi that empties into the Jabesh River. On the basis of the exploration of Transjordan, the archaeologist Nelson Glueck argued that present day Wadi Qelt (which runs down to Jericho) appears to be the best candidate. However, no firm designation can as yet be made. We are told that Elijah sought refuge there (1 Kings 17:3, 5) from Ahab and Jezebel. On the basis of that story some have identified Cherith as Yabis, which empties into the Jordan approximately five miles south of Pella. S.B.R.

cherub (chair'uhb; pl. cherubim [chair'*yoo*-bim]), a Hebrew term denoting an unnatural, composite being associated with sacral contexts in the Bible. Although cherubim are mentioned 92 times (91 in the OT, and in Heb. 9:5), no single type of creature is referred to in all cases. Rather the term represents a variety of fanciful beings. The only feature found in many of the biblical usages (particularly in connection with the Arks of the tabernacle and of the Solomonic Temple and also with the visions of Ezekiel 1 and 10) and not contradicted by other usages is that the cherubim were winged. Otherwise, specific details are either absent or contradictory. For example, the Ark cherubim apparently have a single face, whereas the Ezekiel Temple cherubim have two faces and the Ezekiel vision cherubim have four. The character of the faces ranges from human through bovine, leonine, and aquiline; and the body is sometimes biped and in other instances quadruped. Such variations confirm the underlying principle that the cherub was a hybrid, and hence unnatural, creature.

As unnatural beings, cherubim are always connected with the deity. They appear in direct association with a mobile God, as his steed (e.g., 2 Sam. 22:1; Ps. 18:11) or parts of his chariot, or as components of his throne (the Ark passages). They are indirectly associated with God when they are guardian figures (as in Gen. 3:24; Ezek. 28:14, 16) amidst sacred vegetation. As both actual beasts and plastic representations of such beasts, the biblical cherubim share in the contemporary iconographic repertoire of composite beasts well known from ancient Near Eastern art. The biblical cherub is thus totally different from the chubby children often depicted in religious art in the West. ***See also*** Ark; Tabernacle; Temple, The. C.L.M.

chest. **1** A large container, usually square with a hinged lid. King Jehoash (Joash; 837–800 B.C.) circumvented prior priestly laggardliness in repairing the Temple by commanding the priest Jehoida to build a chest into which worshipers would directly deposit religious donations and from which professional craftsmen would be paid (2 Kings 12:10–11; 2 Chron. 24:8–11). **2** The KJV translation of a rare word that RSV renders as "carpets" (Ezek. 27:24), contextually, a precious commodity brought to Tyre by traders.

cheth (keth), the eighth letter in the Hebrew alphabet. The letter is placed by the KJV as a heading to the eighth section of the acrostic Psalm 119, vv. 57–64. Each of those verses begins with this consonant.

child, children, offspring, which were highly valued by Israelites as gracious gifts of God (Pss. 113:9; 127:3; 128:5–6). Having large numbers of children was considered a divine blessing (Gen. 24:60; Ruth 4:11–12), and the multiplication of descendants was part of God's promise to Israel's ancestors (Gen. 12:2; 15:5; 16:10; 17:2; 22:17; 26:4). Barrenness was considered at best a vexation (Gen. 16:2; 30:2; 1 Sam. 1:3–8) and at worst a divine punishment (Gen. 20:18). Children often received symbolic names (Gen. 4:1; 25:25–26; 29:32, 35; 30:6, 8, 11, 13, 18, 24; 41:51–52; Isa. 8:3; Hos. 1:2–9) and were educated by their parents, particularly in Israel's faith (Prov. 1:8; 6:20; Exod. 12:26–27; Deut. 4:9; 6:7, 20–25; 32:46). Children received an inheritance from their parents, with the eldest son receiving a double portion (Num. 36; Deut. 21:15–17). Firstborn sons were thought to belong to God but were to be redeemed (Exod. 13:11–15; 22:29; 34:20; Num. 18:15). However, the privileges of firstborn children did not extend into the religious sphere, and the OT contains many stories of God's blessing going to a younger child (Gen. 28:13–14; cf. Gen. 27:1–40; 47:8–20; 49:1–27).

Because Israel organized its society on the model of a family, members of the covenant community sometimes described themselves as children of their ancestor Jacob/Israel (Isa. 17:3, 9; 29:22–23; Ezek. 37:16). From their ancestor the children inherited both the blessings and obligations of the covenant.

This practice is also found in the NT, where church members are seen as children of the same mother or father (2 John 1, 4, 13). Christians were sometimes addressed as children by church authorities, a practice the church traced to Jesus (Gal. 4:19; 2 Tim. 1:2; Philem. 10; 1 John 2:1, 12, 18, 28; Matt. 9:2; Mark 2:5; 10:24; John 13:33). ***See also*** Ancestor; Family, The. R.R.W.

children of God, a term used by early Christians to mark their special relationship as "adopted" heirs of the promises made by God to Israel (Rom. 8:16–17, 21; Phil. 2:15; John 1:12; and ironically in John 11:52). It may have been the common designation for Christians in the Johannine community (1 John 3:1, 2, 10; 5:2).

Chileab (kil´ee-ab), the second son of David, born in Hebron to Abigail, former wife of Nabal of Carmel (2 Sam. 3:3). In 1 Chron. 3:1, however, Daniel is given as the name of David's second son.

Chilion (kil´ee-uhn), the second son born to Elimelech and Naomi, an Ephrathite couple who emigrated to Moab when famine struck the region of Bethlehem (Ruth 1:2; 4:9). As told in the book of Ruth, Chilion married a Moabite woman, Orpah. Upon his death, his widow returned to her own people, unlike his brother's widow, Ruth. The name "Chilion" may mean "weakness" in Hebrew.

Chimham (kim´ham), a man taken to Jerusalem, apparently as a royal pensioner, at the insistence of Barzillai, a Gileadite who had assisted David during Absalom's revolt, and who was presumably Chimham's father (2 Sam. 19:31–40: see 1 Kings 2:7; Jer. 41:17).

Chinnereth (kin´uh-reth; Heb., "harp"), a fortified city on the northwest side of the Sea of Galilee in the territory of Naphtali (Josh. 19:35) which overlooks a fertile valley and the Via Maris. Now known as Khirbet el-Oreime, the city's name was applied to the region as well as to the adjacent lake.

Chios (ki´os), a large mountainous island of volcanic origin in the Aegean Sea five miles west of Asia Minor, claimed to have been the home of Homer. Paul and his companions passed Chios on the final voyage to Jerusalem (Acts 20:15).

Chislev (kiz´lev), the postexilic Hebrew name for the ninth month of the year (Zech. 7:1, approximately November-December). The name

was borrowed from the Akkadian month-name *Kisliwu* (or *Kislimu*).

Chittim (kit´im). ***See*** Kittim.

Chloe (kloh´ee), a woman from Corinth or Ephesus whose slaves, employees, or household members told Paul, in Ephesus, about problems in the Corinthian church (1 Cor. 1:11). ***See also*** Corinthians, First Letter of Paul to the; Corinthians, Second Letter of Paul to the.

Chorazin (koh-ray´zin), a first-century A.D. Jewish town in upper Galilee two miles north of Capernaum. Along with Bethsaida and Capernaum, Chorazin was reproached by Jesus (Matt. 11:20–24; Luke 10:13–15). Excavations of the now deserted town indicate that it once covered an area of twelve acres and was built on a series of terraces with the basalt stone local to this

Ruins of a post-NT synagogue at Chorazin, third–sixth centuries A.D.

mountainous region. The synagogue was one of the earliest in the area.

Christ (krist; Gk. *Christos,* "anointed one"). ***See*** Jesus Christ; Messiah.

Christian (kris´chuhn), a term that, although eventually the accepted name for the followers of Jesus the Christ, occurs only three times in the NT (Acts 11:26; 26:28; 1 Pet. 4:16). According to Acts 11:26, it was in Antioch of Syria that the term was first used, but it appears that the Greek word was derived from a Latin original. Some have argued that the designation was at first a term of derision; others, that it simply denoted a group loyal to "Christ" (*Christos* in Greek). Although certainty is not possible, the term was likely coined by non-Christians. Whatever the origin, "Christian" is the term that was increasingly applied to Jesus' followers in the late first and early second centuries.
J.M.E.

Christmas, the annual festival commemorating the birth of Jesus, celebrated on December 25 in all churches except the Church of Armenia, for which it is January 6. The term appears as early as A.D. 1123 in Old English as "Cristes maesse" (and variations) and "Christmas" by 1568, meaning Mass of Christ. The actual date of Jesus' birth is unknown. There is no evidence of celebrating the nativity before the third century. January 6 became widely observed in the third century to commemorate the "manifestation" ("epiphany") of Christ on earth, including his birth, baptism, and the visit of the Magi, with varying local emphases. The celebration of the nativity is attested in Rome in A.D. 336 (where Epiphany, January 6, commemorated the visit of the Magi), and this became widespread in the fifth and sixth centuries. Although there are various theories on the selection of December 25, the most widely accepted is that this date had already been a major pagan festival, that of *Sol Invictus,* the "birth" of the "Unconquerable Sun," marking the winter solstice (the sun's triumph over darkness). With the triumph of Christianity, Christmas replaced the pagan festival, Christians having applied "Sun of Righteousness" (Mal. 4:2) to Christ. ***See also*** Epiphany; Jesus Christ; Sun; Wise Men. A.J.H.

Christology, the study of the titles, concepts, and conceptual patterns by which the NT church expressed its faith in Jesus as the Christ and of the extent to which such concepts and titles may be traced to Jesus' own self-understanding. ***See also*** Jesus Christ; Messiah; Son of God; Son of Man.

Chronicler (kron´i-kluhr), the collective name given to the authors or editors of an important part of the later OT material. The extent of their activity is disputed. Traditionally, critical scholars have regarded 1 and 2 Chronicles, Ezra, and Nehemiah as one historical work; the fact that the end of 2 Chronicles is identical with the beginning of Ezra has been seen as an indication that the books are intended to be read as a continuous whole. It has been argued that the theological stance and literary characteristics of the separate books also support common authorship.

Recently, however, this established view has been challenged. There are significant differences in vocabulary between Chronicles and Ezra-Nehemiah, and the supposed similarities of religious outlook are counterbalanced by some important differences. Chronicles is much more open to the survivors of the Northern

CHRONICLES 1 AND 2

Kingdom and toward intermarriage than are Ezra and Nehemiah. The Davidic line, so prominent in Chronicles, plays no part in Ezra-Nehemiah. It may also be significant that Ezra-Nehemiah regularly precedes Chronicles in the manuscript tradition of the Hebrew Bible. This topic continues to be debated, some scholars maintaining that one "school" could be expected to produce such differences of emphasis, others holding that the differences are greater than that would imply. The matter is complicated still further by the claim that Haggai and Zechariah 1–8 reached their present form through editorship in a loosely defined "Chronistic milieu." Greater certainty is not achievable; one can only say that "the Chronicler" certainly means the author(s) of the books of Chronicles and may also imply those responsible for Ezra-Nehemiah. The background was the Jerusalem Temple; the authors, at least of 1 and 2 Chronicles, quite possibly Levites; and the date perhaps around 400 B.C., though there are few grounds for confident dating. ***See also*** Chronicles, The First and Second Books of the; Ezra; Nehemiah, The Book of.

Chronicles (kron′i-kuhlz), **the First and Second Books of the,** the thirteenth and fourteenth books in the OT containing the compilation of data on Israel's history made by the "Chronicler."

Title: The Hebrew (as one book) is entitled "acts of the days," meaning "annals," while the Greek (as two books) is called "the things left out." This latter represents a serious misunderstanding of the work, namely, that it is no more than a supplement to the books of Samuel and Kings. Rather, it must be understood as an alternative presentation of the story of Israel from creation to the end of the monarchy.

Unloading timber from a ship. Solomon imported timber from Lebanon for the building of the Temple (cf. 2 Chron. 2:16). Relief from the palace of Sargon II at Khorsabad, eighth century B.C.

Content: The books may be divided into four sections: 1 Chronicles 1–9, the story from Adam to the period of restoration after the Exile told by means of genealogies and lists; 1 Chronicles 10–29, the reign of David, prefaced by a presentation of Saul's failure and culminating in Solomon's commission to build the Temple; 2 Chronicles 1–9, the reign of Solomon centered on the building of the Temple; and 2 Chronicles 10–36, the monarchy of the Davidic line to its downfall in the exilic period.

The Relation of 1 and 2 Chronicles to Other OT Writings: 1 and 2 Chronicles most closely parallel Samuel and Kings, and there are numerous points where the texts are virtually identical. This has often been taken to imply direct dependence on those books, but there are enough significant differences for one recent study to argue that the relation between Samuel-Kings and Chronicles is not one of direct dependence but rather of independent use of the same basic text. This may be consistent with the textual evidence from Qumran. It may also explain why large sections of Samuel-Kings do not appear in Chronicles—for example, almost the whole of the David narratives in 2 Samuel 9–20—and the Northern Kingdom is virtually ignored. Elsewhere, by contrast, it seems to be assumed that readers are familiar with material not included; this seems to underlie the Hezekiah narratives of 2 Chronicles 32. Also, there is much material in Chronicles also not found in Samuel and Kings, for example, the accounts of David's preparation for the building of the Temple and information about his organization of Temple worship. Numerous narratives concerning the kings of Judah contain substantial unparalleled materials, often of a homiletic nature. Some of the differences in detail between the two texts (1–2 Chron. and 1 Sam.–2 Kings) may reflect changes made in the interests of the particular interpretation and the logical viewpoint of Chronicles. Some modifications may result from changes in the language by the time Chronicles was composed. Use is made in 1 Chronicles 1–9 of genealogies and lists found in Genesis and elsewhere. Small narrative fragments appear within the lists. Various theories of additions to earlier forms of the text have been proposed.

Position in the Canon: In the Greek, and hence in the Latin and English, Chronicles appears with Ezra and Nehemiah among the narrative books—after Kings and before Esther. This is understandable, since these books are clearly designed to tell the story of Israel: all the narrative books offer interpretations of that story or parts of it. In the Hebrew, Chronicles normally stands at the end of the third part of the canon,

CHRONICLES 1 AND 2

the Writings, but some manuscripts place it first in this part of the canon, before Psalms, associating Chronicles' presentation of David as establisher of worship with the psalms as Davidic. Much of the third part of the Hebrew canon is associated with worship, and hence with David and Solomon as the royal founders of worship and the Temple.

The present division between Chronicles and Ezra-Nehemiah shows an overlap; 2 Chron. 36:22–23 is repeated in Ezra 1:1–3a. These verses could have been added to Chronicles to give a hopeful ending to the book (and indeed to the canon) or could point toward the sequel in Ezra-Nehemiah. This raises the question of the relation of those books to Chronicles.

The Relation Between Chronicles and Ezra-Nehemiah: The textual traditions all separate these works, but they have often been regarded as coming from the same author. In the light of recent studies showing differences in theological outlook and in literary usage, it may be more appropriate to regard them as coming from a common school. There is value in treating Chronicles-Ezra-Nehemiah as a single work, even if it lacks complete consistency of language or outlook. Arguments for separation based on linguistic use are not conclusive, partly because of the use of source material in all parts of the work. Arguments based on content and outlook are more significant. The stress on the Davidic monarchy in Chronicles contrasts with the relative absence of Davidic allusion in Ezra-Nehemiah, but the underlying concern of both is with the Temple, its foundation, and its rebuilding. The Davidic dynasty in Chronicles is of interest virtually only in relation to the Temple activity. Ezra-Nehemiah offers an interpretation of the authenticity of the rebuilt Temple as continuing the original one when Davidic rule has gone forever. The conciliatory attitude toward the North, traceable in some passages (e.g., 2 Chron. 28; 31), contrasts with the exclusivism expressed in Ezra and Nehemiah. But the true Israel in both Chronicles and Ezra-Nehemiah is limited to the areas of Judah and Benjamin (cf. Ezra 4:1), to which any loyal believer must adhere; the North is outside that orbit. The final decision concerning the relationship is one of balance: whether the points of difference weigh too heavily against unity or against the concept of a school in which both works belong, or whether, considering the diversity that appears in many biblical writings, the differences here are no greater than in other instances. The earliest form of the text known to us invites us to read them together; and one Greek form (1 Esdras in the Apocrypha) reads the narrative through from 2 Chronicles 35 to Nehemiah 8 without a break, leaving out the main part of the clearly distinguishable Nehemiah material.

The Viewpoint of Chronicles: The central interest lies in the place of David as founder of the

OUTLINE OF CONTENTS

The First and Second Books of the Chronicles

I. Genealogies from Adam to Saul (1 Chron. 1:1–9:44)
  A. Adam to the sons of Israel (Jacob; 1 Chron. 1:1–2:2)
  B. Genealogies of the twelve tribes (1 Chron. 2:3–8:40)
  C. List of returned exiles dwelling in Jerusalem (1 Chron. 9:1–34)
  D. Repetition of Saul's genealogy (1 Chron. 9:35–44)

II. The reign of David (1 Chron. 10:1–29:30)
  A. Saul's demise and David's accession (1 Chron. 10:1–11:3)
  B. Military events and religious concerns characterizing David's reign (1 Chron. 11:4–20:8)
  C. David's preparations for building the Temple (1 Chron. 21:1–28:21)
  D. Solomon's accession and David's death (1 Chron. 29:1–30)

III. The reign of Solomon (2 Chron. 1:1–9:31)
  A. Solomon's endowment with wisdom (2 Chron. 1:1–17)
  B. Building and dedication of the Temple (2 Chron. 2:1–7:22)
  C. Other activities of Solomon; his death (2 Chron. 8:1–9:31)

IV. The Davidic monarchy to the Exile (2 Chron. 10:1–36:23)
  A. Division of the kingdom and reign of Rehoboam (2 Chron. 10:1–12:16)
  B. Abijah, Asa, Jehoshaphat, and Jehoram (2 Chron. 13:1–21:20)
  C. Ahaziah, Athaliah, and Joash (2 Chron. 22:1–24:27)
  D. Amaziah, Uzziah, Jotham, and Ahaz (2 Chron. 25:2–28:27)
  E. Hezekiah: reform and Assyrian invasion (2 Chron. 29:1–32:33)
  F. Manasseh and Amon (2 Chron. 33:1–25)
  G. Josiah: reform and discovery of the lawbook (2 Chron. 34:1–35:27)
  H. The last kings of Judah: Jehoahaz, Jehoiakim, Jehoiachin, and Zedekiah (2 Chron. 36:1–21)

worship at the Jerusalem Temple and in Solomon as the builder of that Temple. Interest in the later kings concentrates largely on their loyalty to the Temple, approves their reforms (especially those of Hezekiah, Manasseh [!—contrast 2 Kings], and Josiah) and condemns their failures (especially Ahaz). The people involved in this are the true Israel, consisting of Judah and Benjamin, which remained loyal to the Davidic house. An appeal is made to the apostate North to rejoin the true Israel, but the response is meager, and association with the apostates is condemned (e.g., Jehoshaphat). The successes and failures of the true Israel are measured in terms of obedience and loyalty. Wars lost are judgments on disloyalty, whereas victories are won by faith. It is God himself who is the true agent of victory, responding to the appeals of his faithful and giving them success. The ultimate verdict of disloyalty and disregard of prophetic warning brings the disaster of the conquest by Babylon and an exile that leaves the land totally empty. But the prospect of restoration is present not only in the final two verses (2 Chron. 36:22–23, possibly a later addition), but also in the lists of returned exiles in 1 Chronicles 9. The theology may be seen as representing a continuation and refinement of Deuteronomic thought, combined with a concern for holiness and purity that resembles the thought of the Priestly writers and Ezekiel. Yet Chronicles offers its own particular variants on these and other theological viewpoints. The date of the work is uncertain; if it is thought to have close links with Ezra-Nehemiah, the fourth century B.C. is most likely. The authorship is unknown but a Jerusalem Temple group, perhaps of Levites, seems probable. ***See also*** Chronicler; Ezra; Nehemiah, The Book of.

P.R.A./R.C.

chronology, New Testament, the dating of the books and of certain events of the NT. Several kinds of evidence are used to determine the chronology of NT writings. References in the Pauline Letters concerning travel plans and historical events and persons make them the most reliably datable of the writings. A few references to datable historical events and persons provide a framework for the chronology of the Gospels, but estimates in this area remain tentative. Efforts to reconstruct the historical setting of other writings are highly subjective and produce only probable ranges of dates. Recent scholarship indicates decreasing certainty and agreement in such reconstructions. Thus, Revelation and 1 Peter are dated A.D. 64–95; James and Hebrews, 55–95; and Luke-Acts, 64–90. Disagreements regarding authenticity produce dates for the pastoral Letters in the early 60s or the 90s, Ephesians and Colossians in 55–60 or 80–90, and 2 Peter and Jude in the 60s or 100–135. Those accepting the hypothesis of a "Q" source for the synoptic Gospels date it ca. 50–60, while scholars accepting the priority of Mark debate whether to place it just before or just after the fall of Jerusalem in A.D. 70. Matthew is dated ca. 85 by most scholars, though some still argue for the mid–60s. There is more agreement in placing John's Gospel ca. 90–100 and the Johannine Epistles around 100, but the arguments are not conclusive. Only the Pauline Letters can be dated with a high measure of certainty, with 1 Thessalonians (and 2 Thessalonians if authentic) around 49–50, Galatians in 53–54, 1 and 2 Corinthians and Philemon in 55–56, and Romans in 56–57. If Philippians was written from an Ephesian imprisonment, as is most probable, it can be placed in 54–55; otherwise, a few years later.

The principal events of NT history provide some uncertainties difficult to resolve, with Jesus' birth placed between 12 B.C. and A.D. 4, the opening of his ministry between A.D. 15 and 32, the length of his ministry between one and three years, and the date of the crucifixion as early as 21 but more probably sometime in April 33. Astronomical calculations make April 3, 33, increasingly likely. There is greater agreement in setting Paul's conversion between 30 and 35, but dates for the Jerusalem conference (Acts 15; Gal. 2:1–10) range from 46 to 52 and of Paul's execution in Rome from 60 to 67, with 51 more likely for the former and 62 for the latter. The historical details on which such events rest are more reliably determined in the case of Paul's Letters than in that of the Gospels, although contradictions between Acts and the Pauline Letters in the number of Jerusalem journeys remain problematic for chronologies that do not admit the priority of primary evidence in the Pauline Letters over secondary evidence in Acts. Disagreements still remain in assessing the chronological implications of Paul's escape from Aretas (A.D. 37–40; 2 Cor. 11:32–33; cf. Acts 9:23–25), his encounter with Gallio in Corinth (A.D. 50–51; Acts 18:12–17), and the edict of the Roman emperor Claudius that banned Prisca (Priscilla) and Aquila from Rome, people whom Paul met in Corinth (A.D. 41 or 49, the latter more likely; Acts 18:1–3). ***See also*** Aquila; Aretas IV; Claudius; Gallio; Jesus Christ; Paul; Prisca, Priscilla; Q; Synoptic Problem, The.

chronology, Old Testament, the historical dating of persons and events in the OT. The biblical books Genesis through 2 Kings, our primary source of information for the history of ancient Israel and Judah, provide a continuous chronology of generations, key persons, and events from creation to the Babylonian exile (see Gen. 5; 11:10–26; 21:5; 25:7, 26; 35:28; 47:9, 28; Exod. 12:40; 1 Kings 6:1; 11:42; 14:21; and so on). Further chronological information may be derived from other biblical books, such as 1 and 2 Chronicles, and occasionally from ancient nonbiblical documents. The Assyrian and Babylonian records are especially useful in this regard, since they provide absolute dates that can be calculated in terms of present-day calendars. It can be established from the Babylonian records, for example, that Jerusalem fell to the Babylonians on March 16, 597 B.C. Theoretically one might begin with this latter "benchmark" date and, utilizing the chronological information provided in Genesis through 2 Kings, figure backward to creation.

Unfortunately, the situation is not that simple. First, the chronological data provided in Genesis for the beginnings of the universe and human civilization (a seven-day creation, people who lived over nine hundred years) do not square with the perspectives of modern science. Second, many of the numbers recorded throughout Genesis through 2 Kings appear to be symbolic or schematic. Note the constant recurrence of twenty, forty, and multiples of forty. Third, different manuscripts and versions of the biblical books often provide differing readings, especially where numbers are involved. Finally, there is no way to verify the biblical chronology, or even to verify the historicity of the early biblical characters and events. Abraham, Isaac, Jacob, Joseph, Moses, Joshua, the Israelite sojourn in Egypt, the Israelite conquest of Canaan, Saul, David, Solomon—none of these are mentioned in any of the ancient nonbiblical documents recovered thus far.

Indeed, with one exception, nothing has turned up in either nonbiblical documents or ancient city ruins that points to a specifically Israelite presence before the ninth century B.C. This exception is an Egyptian inscription from the reign of Merneptah that seems to refer to a group known as "Israel" on the scene in Palestine during the late thirteenth century B.C.

While the problematic nature of the evidence warns against assigning specific dates to any of the individual characters in the book of Judges, a case can be made for associating the "period of the judges" in general with the opening centuries of the Iron Age, that is, from roughly 1200 to 1000 B.C. The stories about the judges presuppose village life in the central Palestinian hill country, for example, a phenomenon characteristic of the Iron Age rather than of the preceding Bronze Age. Beginning with chronological information available for later kings (see below) and figuring backward, one arrives at 925 B.C. as an approximate date for Solomon's death. Both David and Solomon are credited with forty-year reigns, a number probably not to be taken literally. 1 Sam. 13:1, on the other hand, which reports the length of Saul's reign, is obscure. Thus the most we can say with any degree of certainty is that Saul, David, and Solomon lived sometime around 1000 B.C.

The books of 1 and 2 Kings provide for each of the kings of Israel and Judah (the two kingdoms of the Divided Monarchy) a "synchronism," the year of the king's accession to the throne dated in terms of the regnal year of his contemporary on the throne of the other kingdom, and a "regnal period," the length of the king's own reign (e.g., 1 Kings 15:1–2, 9–10, 25, 33). Further chronological notations are provided for some kings (e.g., 1 Kings 14:25; 16:23–24; 2 Kings 18:13). While it cannot be proven, scholars generally believe that these data were derived originally from official records. Occasionally the Chronicler adds similar notations not found in 1 and 2 Kings, material probably less authentic. Finally, beginning with Omri and Ahab, there are occasional references to Israelite and Judean kings in the royal inscriptions of Moab, Assyria, and Babylon.

This abundance of chronological information renders it possible to calculate dates more closely for the period of the separate kingdoms (ca. 925–597 B.C.) than for the earlier periods. Nevertheless, problems still preclude exact dates before the fall of Jerusalem in 597 B.C. For example, variant readings for the synchronisms and regnal periods in different manuscripts and versions of 1 and 2 Kings warn against overconfident use of this information. And there are internal discrepancies in all of the manuscripts. In none of them, for example, do the regnal periods square completely with the synchronisms. Also, the biblical figures require more time than certain "benchmark" dates derived from Assyrian records allow. Finally, there are several crucial unknowns. Did both Israel and Judah use the same calendar—that is, did they both begin the new year at the same time? What methods were used for reckoning the length of each king's reign? When a king died in mid-year, for example, was the incomplete year ascribed to his reign, to his successor's reign, or to both? Were there co-regencies other than the one recorded for Uzziah (Azariah) and Jotham in 2 Kings 15:5? If so, how are they calculated in the biblical figures?

The chronology provided here is based primarily on the regnal periods recorded in the

CHRONOLOGY, OLD TESTAMENT

Hebrew (Masoretic) version of 1 and 2 Kings and calculated in accordance with an "antedating" reckoning system; that is, the length of reign recorded for each king is presumed to include the year in which he ascended the throne and, in some cases where the figures seem to require it, the year in which his successor ascended the throne as well. In a few places, where the biblical figures interpreted in the above fashion still do not "add up" or where the Mesopotamian records seem to require it, more extensive "adjustments" have been made. Thus all of the dates for the period prior to the Babylonian conquest of Jerusalem in 597 B.C. are to be regarded as approximate. 2 Kings and Jeremiah date certain events associated with the final fall of Jerusalem in terms of the regnal years of both Zedekiah and the contemporary Babylonian rulers (Nebuchadnezzar and Amel-marduk [Evil-merodach]; see 2 Kings 25:8, 27; Jer. 52:12, 31–34). Although there are some minor difficulties in the interpretation of even these passages, it seems clear that Jerusalem fell the second time in 586 B.C.

Biblical books pertaining to the postexilic period, when Persia dominated the Middle East, often date events in terms of the regnal years of the Persian rulers. Thus the decree that allowed the exiles to return to Judah is recorded in Ezra 1:1 as occurring in Cyrus's first regnal year (538 B.C.). Several dates are provided in connection with the beginning of construction of the Temple, all between Darius's second year and his sixth year (520–515 B.C.; see Ezra 4:24; 6:15, 19; Hag. 1:1, 15; 2:1, 10; Zech. 1:1, 7; 7:1). Unfortunately, it is not entirely clear how these dates relate to each other.

Perhaps the most tantalizing chronological problem in biblical history has to do with the dating of Ezra and Nehemiah. We are told precisely that Ezra returned from exile in the fifth month of the seventh year of Artaxerxes (Ezra 7:1–10) and that Nehemiah returned soon after the month of Nisan in the twentieth year of Artaxerxes (Neh. 1:1). Unfortunately we are not

chrysolite (kris´oh-lit), a magnesium iron silicate usually colored olive green, but it may also be yellow, as in Rev. 21:20. A gemstone decorating the envisioned chariot wheels, it is translated in the NRSV as "beryl" (Ezek. 1:16; 10:9) and as "chrysolite" (Ezek. 28:11) in a list of precious stones covering the lamented king of Tyre, a list that includes beryl as a separate item. It is the seventh gemstone adorning the wall of the new Jerusalem (Rev. 21:20).

church, the English translation of a Greek word (*ekklēsia*) meaning "assembly" or "gathering." The word does not normally appear in English translations of the OT. In the Greek translation of the OT (the Septuagint), two main words are used for the People of God: assembly (*ekklēsia*) and synagogue (*synagogē*). Since Jews in the first century used the latter term, the first Greek-speaking Christians selected the former in order to show that their roots lay in the OT and that they continued the OT People of God. They affirmed the same by applying other terms from the OT to themselves: 1 Pet. 2:9 uses Exod. 19:5–6; in Gal. 3:29 Christians are called Abraham's offspring; in Rom. 11:17–24 the Gentiles are grafted into Israel, the true olive tree. In the NT, "church" always denotes a group of people, either all the Christians in a city (Acts 14:23; 1 Cor. 1:2; 2 Cor. 1:1) or those gathered for worship in a particular house (Rom. 16:5; 1 Cor. 16:19) or all Christians in all the churches, the whole church (Matt. 16:18; Eph. 1:22). It never signifies a building or a "denomination."

Its Identity: If there was continuity between the NT church and the OT People of God, there was also discontinuity brought about by the Christian belief that Jesus was the expected Jewish Messiah. Thus, a new set of terms to describe the church appeared, terms involving Christ. This was natural, for the first Christians had all been his personal followers. He had gathered a group of disciples (Matt. 10:1–4;

The baptism of a child depicted on a Roman sarcophagus (cf. Mark 10:13–16).

Mark 3:13–19; Luke 6:13–16) who went about with him and whom he sent to preach and heal as he himself did (Matt. 10:1; 5:15; Mark 6:7–13; Luke 9:1–6). The People of God is thus explicitly related to Christ. It is his body, he is its head (1 Cor. 12:12, 27; Rom. 12:4–5; Eph. 1:22–23; 4:15–16; Col. 1:18; 2:19). Believers are members of that body with particular functions within it (1 Cor. 12:12–31; Rom. 12:4–8). They became part of it at baptism, being baptized into Christ (Rom. 6:3–4; Gal. 3:27), and are consequently "in Christ" (Phil. 1:1; Rom. 8:1).They are a building of which Christ is the cornerstone (Eph. 2:20). The church is the bride of Christ (Eph. 5:22–33), taking up another OT image in which Israel is the wife or bride of God (Hos. 1–3; Ezek. 16, 23). Christ is the vine; they are the branches (John 15:1–11). All of these phrases draw Christians closely together and closely to Christ, giving them a deep sense of identity with him and with other Christians.

Ministry: From the beginning, there was some kind of ministry in the church. Two disciples of Jesus, Peter and John, and his brother James occupied leading positions and exercised responsibility (Acts 3:1; 15:6–22; Gal. 2:9). Paul, who had no connection with the historical Jesus, was eventually regarded as their equal. Ministry is described both in quite general terms (1 Thess. 5:12; Heb. 13:7) and with a variety of more specific titles (e.g., deacon, 1 Tim. 3:8–13; bishop, 1 Tim. 3:1–7; elder, 1 Tim. 4:17–20; pastor, Eph. 4:11; teacher, 1 Cor. 12:28; evangelist, Eph. 4:11; and prophet, 1

Cor. 12:28). Ministers exercising the same function may have been given different titles in various areas of the church. It is not clear what function each title included. The functions of prophets and teachers are, of course, indicated by the titles. Baptism was administered, the Eucharist celebrated, and sermons preached, but the NT writings do not state which "officials" presided in these activities. Those who held office were believed to be endowed by the Spirit (1 Cor. 12:4–11). Their ministry was a gift from God (Rom. 12:4–8; Eph. 4:7–11). Such gifts and endowments of the Spirit were not confined to "officials," however, and were many in type, including healing, speaking in tongues, and administration; all Christians were expected to be endowed with them and to use them to benefit the whole church.

Not only did specified individuals exercise a ministry within the church, but the church as a whole had a ministry. The church is the light of the world, the salt of the earth, and the leaven that leavens the whole lump (Matt. 5:13–16; 13:33). The members are a royal priesthood, set to declare to the world the wonderful deeds of God (1 Pet. 2:9). Since the NT covers a period of rapid development, more formal structures appear in some of the later writings (1 and 2 Timothy and Titus), and instructions are given on continuing the ministry (e.g., 1 Tim. 3:1–13), so that the church may be preserved from error (2 Tim. 1:13–14).

Problems Within and Without: The NT church was not a perfect body. In 1 Corinthians, Paul rebukes a man who has committed incest (5:1), believers take one another to court (6:1–11), some members think it a matter of indifference if they sleep with prostitutes (6:12–20), and some are drunk during the Eucharist (11:21). Early on, one serious problem threatened to split the church: the terms on which Gentiles could become Christians. Did they need to keep the OT Law in whole or in part (Acts 10:1–11:18; 15:1–35; Gal. 2:1–10)? In the end, they were accepted without condition because both Jew and Gentile had been reconciled to one another through the death of Christ (Eph. 2:13–18). To assist their growing together, the mainly Gentile churches established by Paul sent a collection of money to the poor "saints" (the normal word for "Christian" in Paul's letters) in Jerusalem (Gal. 2:10; 1 Cor. 16:1–4; 2 Cor. 8–9; Rom. 15:25–27). Further divisions appeared later in the church, mainly over "false teaching" and behavior (1 John 4:1–6; 2 John 9–11; 1 Tim. 4:1–5; 2 Tim. 3:1–9).

In the NT period, the church was always a small body in the midst of what it regarded as a largely hostile world. While there was no systematic state persecution, hatred was shown to the Christians in an isolated and sporadic fashion (1 Thess. 2:14–16; 1 Pet. 1:6; 3:17; 4:13–14; Heb. 10:32–34; Rev. 2:10; Acts 17:5–9). Their faith forced them to withdraw from many accepted everyday practices connected with the worship of other deities. They became a closely knit group separated from others. At the beginning, they shared their possessions (Acts 2:44–45; 4:32–5:11), but this practice soon disappeared. Although Jesus had taught his followers to love all people (Luke 10:25–37), there were times when more emphasis was laid on loving other Christians (Rom. 12:10; 1 Thess. 4:9; 1 John 3:23; Heb. 13:1; 1 Pet. 1:22; 2:17; 4:8) than those outside the church. The Christians exhibited many of the qualities of a "sect." They attempted to preserve the purity of church life and disciplined those whom they thought transgressed too far in behavior or rejected orthodox views (1 Cor. 5:3–5; 2 Cor. 13:2; Acts 5:1–11; 20:29–31; 1 Tim. 1:20; 4:7; 2 Tim. 2:16–17; 3:5; 2 John 10; Rev. 2:14–15).

At the same time, Christians were active in preaching Christ to others and sought to draw into their fellowship those outside it. The actual procedures of evangelism are not clear apart from the great missionary work of Paul, who went to the main centers of population in the northern Mediterranean area. Strong churches are also found in the early second century in Egypt, Babylonia, and North Africa, however. Other missionaries must have evangelized these areas in the first century. Much evangelism must also have been carried out quietly in the home or at work (1 Pet. 3:1–2).

Worship: Within the church, the social and other distinctions of the ancient world were abolished at worship (Gal. 3:28; 1 Cor. 11:5; Philem. 16), although there was apparently no advocacy of the liberation of slaves, and women were given a position below men in at least some of the churches (1 Cor. 14:34; 1 Tim. 2:11–12). There were no special church buildings, worship taking place in private homes (see 1 Cor. 16:19). Admission to the church was by baptism. The Eucharist distinguished Christian worship from that of the Jews and of other religions. A number of people, including women (1 Cor. 11:5), might participate in a service (1 Cor. 14:26–33). As well as readings from the OT, which was their only Scripture, letters from leaders like Paul would be read (1 Thess. 5:27; Col. 4:16). There would be singing (Col. 3:16; Phil. 2:6–11 was probably originally a hymn) and teaching or preaching (1 Tim. 4:11–16). Worship took place on the first day of the week (1 Cor. 16:2), if not also on other days.

The members of the church were drawn from all levels of society. Some were wealthy enough to own slaves (Philem. 15–16), to have positions of importance in the secular community (Acts 13:12; 17:12, 34; Rom. 16:23), and to have houses large enough for meetings to be held in them (Acts 18:7; Rom. 16:5; 1 Cor. 16:19; Col. 4:15). These were a minority, however (1 Cor. 1:26). Many Christians were slaves (1 Cor. 7:20–24;

Col. 3:22–25; Eph. 6:5–9; 1 Pet. 2:18–25), but it would be wrong to assume the majority were. The first churches were all in cities; it was some time before Christianity spread into rural areas. Although Jesus' disciples had all been Jews, by the end of the first century the vast majority in the churches were Gentiles.

It is important to keep in mind that the development of the church proceeded differently in different places and that the NT writings provide a highly selective and incomplete picture of this development. ***See also*** Apostle; Bishop; Elders; Evangelist; Gentile; Holy Spirit, The; Lord's Supper, The; Minister; Paul; Persecution; Peter; Prophet; Sociology of the New Testament; Spiritual Gifts; Teaching; Worship. E.B.

Chuza (ky*oo*'zuh), a steward (property manager?) of Herod Antipas and the husband of Joanna, one of several women who followed and ministered to Jesus (Luke 8:3). ***See also*** Antipas; Joanna.

Cilicia (suh-lish'ee-uh), a Roman province along the southeastern coast of Asia Minor, divided into two sections: the mountainous western section ("Rugged Cilicia"), into which Cyprus was politically incorporated in 58 B.C., and the fertile, well-watered eastern plain ("Level Cilicia"). The province was bounded by the Taurus Mountains on the north. The pass through these mountains to Cappadocia was known as the Cilician Gates. On the east, the Amanus Mountains separated Cilicia from Syria; the ancient pass through these mountains was known as the Syrian Gates. Tarsus, the hometown of Paul (Acts 21:39; 22:3), was located on the eastern plain. Acts records that Paul passed through the area during his second journey (Acts 15:40–41) and also later when he departed from Antioch for Galatia and Phrygia (Acts 18:23). ***See also*** Tarsus. M.K.M.

circumcision, the removal of the foreskin (prepuce) of the male penis. In the ancient Near East, the practice varied. Some societies, including the Hebrews, completely amputated the prepuce, while other cultures (e.g., the Egyptians) made dorsal incisions upon the foreskin. In ancient Israel and in Judaism, circumcision was routinely performed upon infants of eight days (Gen. 17:12; Lev. 12:3; Luke 1:59; 2:21; Phil. 3:5), though circumstances might permit or require performance upon adolescents (cf. Gen. 17:25) or even upon grooms (cf. Gen. 34:14–24). Having lost all memory of the origins of the rite, the Hebrews attributed different aspects of the practice to divine injunction to Abraham (Gen. 17:9–27), to Joshua (Josh. 5:2–7), and to Israel (Lev. 12:1–5; cf. Exod. 12:44, 48). In one obscure passage (Exod. 4:24–26) reflecting an ancient stratum of tradition, Zipporah, Moses' wife, is credited with saving her husband's life by circumcising her son. Apparently the ancient ritual had an apotropaic dimension: it served to ward off evil. Against that background, the significant theological reinterpretation of the rite in Gen. 17:11, where circumcision serves as a "sign" of God's covenant with Israel, may be appreciated. This theological revaluation has remained a basic explanation of the symbolism of the rite.

According to Jeremiah (9:25–26), many of Israel's neighbors practiced circumcision, notably the Egyptians, Edomites, Ammonites, Moabites, and Arabs. The Philistines, who probably came from Aegean stock, never practiced circumcision and for this earned Israel's contempt (cf. Judg. 14:3; 15:18; 1 Sam. 14:6; 17:26). Ezekiel (32:21–30) also placed many nations among the uncircumcised.

During the Hellenistic period, circumcision became a central issue between assimilationists or pro-Greek factions and nationalists or neo-orthodox groups. To avoid scorn (cf. Horace *Satires* I.v.95; ix.70; Martial *Epigrams* vii, lxxii, 5, 6, etc.), Hellenized Jews underwent painful surgery to restore the foreskin (1 Macc. 1:15; 1 Cor. 7:18; Josephus *Antiquities* XII.v.1). Probably reflecting this situation, *Jubilees* (15:6) regards circumcision as necessary to distinguish the children of the covenant from those of destruction. Antiochus Epiphanes played into the hands of the pro-Hellenic Jews when he forbade circumcision on pain of death (1 Macc. 1:48, 60). During the Hasmonean period (second to mid-first centuries B.C.), circumcision was forced upon the Edomites and the Ituraeans (Josephus *Wars* XIII.ix.1; xi.3). In the Roman period (63 B.C. on), the emperor Hadrian also forbade circumcision, and this helped trigger the Bar-Kochba revolt (132–35 A.D.).

Among Jews of the ancient rabbinic period (late first century B.C.–first century A.D.), circumcision was a joyous occasion, celebrated

with blessing and a festive meal. The importance of this occasion, when the male child entered the "covenant of Abraham," is further indicated by the fact that the ceremony could occur even on the Sabbath. In Jewish tradition, the symbolism of Elijah and the messianic advent play a particularly strong role. In early Christianity, the merits of continuing the ritual of circumcision were debated. Spiritual circumcision was eventually deemed sufficient (cf. Acts 15 and Rom. 2:29; Col. 2:11; 1 Cor. 7:19; Gal. 6:15). Among the Copts (Christians of Egypt), the practice of circumcision continued. A "spiritual" interpretation can already be found in Hebrew Scriptures. Thus persons who are deemed "uncircumcised of ear" (Jer. 6:10) are considered to be unreceptive, haughty, and proud, while those who have an "uncircumcised heart" (Lev. 26:41; cf. Ezek. 44:7, 9) are considered to be stubborn. Conversely, when the verb "to circumcise" has "heart" as its direct object (cf. Deut. 10:16; 30:6; Jer. 4:4; Rom. 2:28–29), the sense of spiritual dedication is indicated.

cisterns, underground chambers for storing water. In the dry climate of the Near East they were used to catch natural rain runoff during rainy seasons and retain it through the months of dry weather to allow people and animals to survive. As such they were precious and considered inviolable.

Biblical references to cisterns include declaration of their ritual purity (Lev. 11:36) and mention of normal private use (2 Kings 18:31; Prov. 5:15; Isa. 36:16) and of special construction to allow a city to survive a siege (Jer. 41:9). They were a form of prison (Jer. 38:7), an intended instrument of death (Jer. 38:6–9) from which rescue was sometimes possible (Jer. 38:10–13); a burial site (Jer. 41:9); a symbol of unearned grace (Deut. 6:11); hiding places (1 Sam. 13:6); a symbol of wealth (2 Chron. 26:10) or rich booty (Neh. 9:25); and a symbol of unfaithfulness leading to futility (Jer. 2:13) and destruction (Jer. 14:3).

Archaeological discovery of cisterns is frequent and varied in the Near East. In Palestine most cisterns are cut into rock or adapted from natural cave formations in the rock. The porous nature of the native limestone and chert made a form of waterproofing essential to avoid tragedy (see Jer. 2:13). Use of such waterproofing in the form of a limestone plaster became widespread at the end of the Late Bronze Age (thirteenth century B.C.), and the number of cisterns increased substantially thereafter.

Most cisterns were protected from unwanted rubbish by being cut in a bottle shape or having a rim that narrowed the mouth, frequently blocked with a cover stone. Water would thus be drawn by lowering a vessel through the mouth by rope, filling it, and raising it for transfer to a carrying vessel or an animal trough. Some cisterns were open by design, and some were even stepped to allow access to water at low levels, as at Qumran. Mud in the bottom (Jer. 38:6) and degeneration of the plaster required periodic cleaning and repair.

citadel. *See* Architecture.

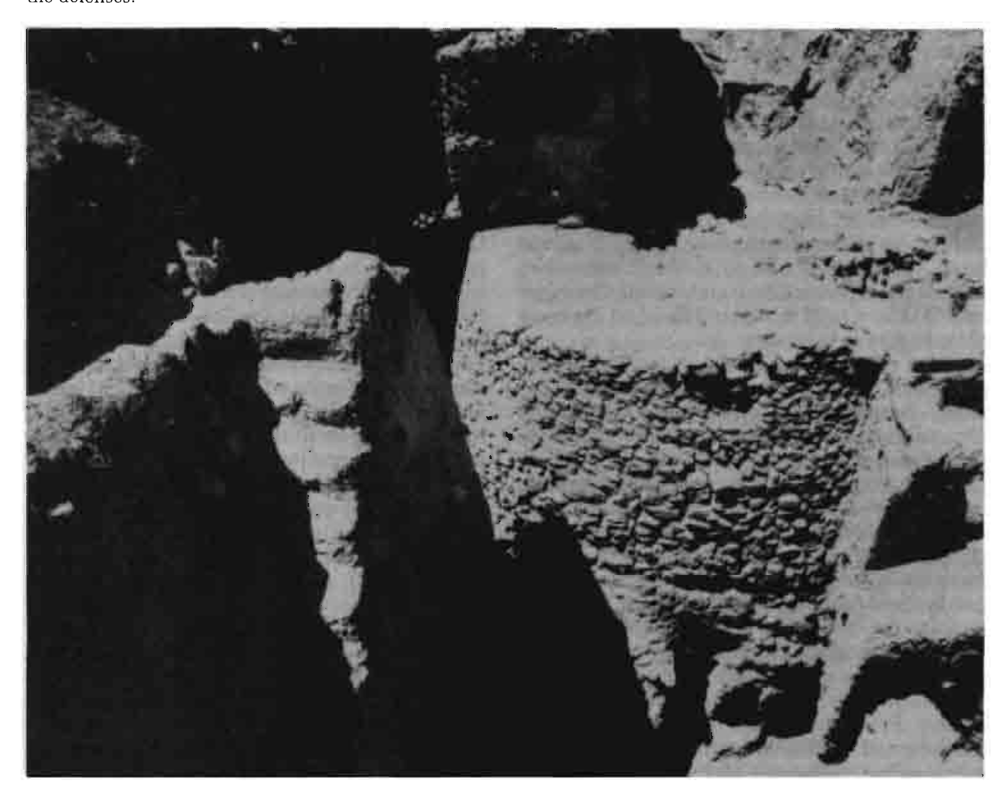
cities, large areas of high population density. In modern usage several terms are used to describe the size or population of communities. Typical terms in ascending order are "village," "town," "city," and "metropolis." In OT usage, the two terms "city" (Heb. *'ir, qrya*) and "village" (Heb. *ḥaṭser*) did not refer directly to size, but to the presence or absence of a defensive wall. Cities were walled; villages were unwalled. Generally villages, being unwalled, were smaller and less important than cities, but this was not always the case.

A number of factors led to the location of a city or village at a particular site. Initially, the presence of food and water nearby, the raw materials for tools and shelter, and ease of defense were critical in site selection. Secondary factors such as proximity to trade routes or to sanctuaries and shrines were also considered.

The earliest city yet excavated in Palestine is OT Jericho, Tell es-Sultan. The pre-pottery Neolithic city there dates to between 8000 and 7000 B.C. This walled city was built before the introduction of pottery. The city had a strong defensive wall with a huge round watch tower inside the wall. The tower was 28 feet in diameter at its base and still stands 19 feet high. Evidently, even at this early period, enough city organization existed to plan, build, and maintain such defenses.

None of the cities in Palestine compare in size to the great cities of Mesopotamia. Nineveh covered approximately 1,720 acres or over 2.5 square miles. Calah (ancient Nimrud) covered over 875 acres or 1.4 square miles. Jerusalem at the time of Solomon, by comparison, covered only 33 acres, and even at the time of Jesus covered less than 200 acres.

In the OT, we find that often the larger cities of Palestine were associated with smaller villages around them. The OT speaks of cities "with their villages" (Josh. 19:16; Neh. 11:30) or a city literally "with its daughters" (Num. 21:25; 2 Chron. 13:19). The two phrases appear to be synonymous. In much the same pattern as our large cities today, with their suburbs and satellite towns, the Palestinian city was the hub of most activity for the surrounding



villages and rural area. Most of the trade and commerce for the region took place in the city. The city sat on or near the main highway and trade route. The chief shrine or sanctuary for the region was most often located in the city. When warfare threatened, the people of the surrounding villages would flee to the walled city for protection. From archaeological excavations of the Israelite cities of the monarchy (1025–587 B.C.) we find a number of common features that suggest a relatively high degree of city planning.

Walls: The walls of cities during the early monarchy were regularly casemates, consisting of two parallel walls reinforced by perpendicular walls at regular intervals. Usually the outer wall was somewhat stronger. The space between the two walls was often used for living space. Later a single massive wall, often as much as 16 feet thick, replaced the casemates. The development of the battering ram is usually cited as the cause for this new defensive wall. A sloping glacis, or plastered embankment, was frequently added to the outside of the wall to prevent easy access to its foundations and to impede the use of a battering ram.

Gate: The weakest point in the defense of the city was the gate. Massive defensive towers usually guarded either side of the gate. The gate opening itself was 12 to 15 feet wide and had two heavy wooden doors that could be shut and braced with bars. The gate complex had two, four, or six rooms that served as guard rooms. The walls of these inner rooms could support additional wooden doors in time of war. Inside and outside the gate were open squares where much of the business of the city was carried on. The city gate was also the courtroom for the OT city (Josh. 20:4; Ruth 4:1–6). It is noteworthy that a fully preserved gate structure from the Middle Bronze Age has recently been excavated at Tell Dan. Dating to the eighteenth century B.C., this mudbrick gate was fully preserved and has the earliest example of an arch known in Palestine. An Early Bronze IV (2500–2000 B.C.) entrance gate with stone benches along both sides has been found at Khirbet Iskander, Jordan.

Water Supply: The water supply was another necessity for a city. A protected water supply available from within the walls of the city was required for it to endure an extensive siege.

The Canaanite moat, tower, and fortification wall at Tell es-Sultan, OT Jericho, the earliest city yet excavated in Palestine. Though built before the introduction of pottery (8000–7000 B.C.), enough city organization existed to plan, build, and maintain the defenses.

Most cities were located near springs, and many had cisterns dug in individual houses. The spring was usually at the foot of the tell (mound) outside the city wall. Hezekiah's tunnel in Jerusalem (cf. 2 Kings 20:20) is but one example of a well-developed system for bringing water into the city. At Hazor, Megiddo, and other sites, great water tunnel and pool systems were constructed by cutting down through the bedrock of the tell to reach the level of the supply.

Acropolis: Many cities of the OT had an upper city or acropolis. This area was located on the highest part of the tell and often served as an inner citadel with its own defense wall. The aristocracy or royalty usually occupied this area and the sanctuary was most often located here. Houses here were large and made of the finest masonry.

Public Buildings: Public buildings were usually located near the city gate or on major streets of the city. The city gate area was a favorite location because of easy access and the presence of heavy fortifications. Public buildings were often clustered together in one section of the city.

Street Plan: Israelite cities of the period of the monarchy had a regular street plan. Immediately inside the city gate was an open court or plaza. From this point, a circular street enclosed the city. A row of houses or public buildings were built between the circular street and the city wall. This street gave easy access to all sections of the city. Other streets branched off this circular street into the core of the city.

Israelite cities were neither large nor heavily populated. Recent projections suggest that most cities could support 160 to 200 persons per acre. Thus Shechem might have had a population of 2,000 to 2,500; Jerusalem in Solomon's time (tenth century B.C.) could have supported 5,000 to 6,500. Even when Jerusalem expanded in Josiah's time (late seventh century B.C.) it would have had no more than 25,000 inhabitants.

Cities changed drastically in the Hellenistic (333–63 B.C.) and Roman (63 B.C.–A.D. 324) periods. Herod (40–4 B.C.) brought the Roman city to Palestine. Roman cities are noted for their broad streets paved with flagstones. Usually the Roman city was rectangular with a main north-south road, the *cardo,* and a main east-west road, the *decumanus.* Recent excavations in the old Jewish quarter of Jerusalem have uncovered an extensive section of the *cardo* there (although this section of the *cardo* dates to the Byzantine period). This street was 39 feet wide and was flanked by colonnaded, covered sidewalks, each an additional 17 feet wide. The street even had a covered drainage system. From these same excavations, a palatial house of the Roman period was discovered overlooking the Temple Mount. This house has several baths and numerous mosaics. Decorated with frescoes, plastered walls, and ceilings, this house must have belonged to a priestly or aristocratic family. Many of the Roman cities in Palestine had the theaters, hippodromes, forums, baths, aqueducts, and villas which brought a bit of Rome to the provinces.

From the reports in the NT, it is clear that the Roman cities from Palestine to Asia Minor and to Greece became centers of evangelizing activity by the apostles. By mid-first century A.D. that was true of Rome itself.

Clauda (klaw'duh). ***See*** Cauda.

Claudia (klaw'dee-uh), woman sending greetings to Timothy, along with Linus and Pudens (2 Tim. 4:21); legends abound concerning their relationships. ***See also*** Eubulus; Linus; Pudens.

Claudius (klaw'dee-uhs; 10 B.C.–A.D. 54), the fourth Roman emperor; he assumed power following Gaius Caligula's assassination (A.D. 41). His weak constitution and ill health contributed to the emergence of rich and powerful freedmen. Though generally conciliatory toward the Jews, he expelled some from Rome because of rioting (Acts 18:3).

Claudius Lysias (klaw'dee-uhs lis'ee-uhs), according to Acts 21:30–23:35, the Roman military tribune who commanded the Roman garrison at the fortress (probably the Tower of Antonia) adjacent to the Jerusalem Temple and who arrested Paul for protective custody to prevent his being lynched by a mob. Afterward, he sent Paul to Caesarea with a letter to Felix, the procurator of Judea, telling about the circumstances of Paul's problems in Jerusalem. The cognomen Lysias indicates that Claudius was of Greek birth. His Roman name would probably have been obtained after he purchased Roman citizenship (Acts 22:28). ***See also*** Antonia, Tower of; Felix, Antonius; Paul. A.J.M.

clay, a plastic (pliable) material composed of various types of earth combined with moisture. The earliest and most widespread use of clay by human beings appears to have been for the production of pottery. That fact has made the identification of the age of various types of pottery a useful tool for dating archaeological dis-

coveries. Clay was also formed into brick for the construction of houses and other buildings (e.g., Exod. 5:6–9). Clay tablets were used in ancient Meosopotamia as the medium on which to preserve writing. Discoveries of libraries of such tablets have added much to our knowledge of ancient cultures. Clay figurines have also been discovered which appear to have served purposes ranging from childrens' toys to cultic images of idols. In the NT, clay functions as a therapeutic agent in an account of Jesus healing a blind man (John 9:11). ***See also*** Amarna, Tell el-; Cuneiform Writing; Ebla; Mari; Nuzi. P.J.A.

Clement (klem´uhnt), **Letters of,** two letters from the late first and early second century A.D. that early tradition attributed to an author named Clement. 1 Clement was written in the late first or early second century from Rome to the church in Corinth, seeking to quell certain disputes that had arisen there over leadership. Regarded as authoritative in the second century, it was finally not included in the canonical NT. Its attribution to a Clement who was an early Pope is uncertain. 2 Clement is more a homily than a letter and appears to have been composed sometime in the mid-second century A.D. Despite its association with the name "Clement," it is not clear to whom the letter was addressed, or from where. P.J.A.

Cleopas (klee´oh-puhs), a disciple who with an unnamed companion encountered the resurrected Jesus as they traveled to Emmaus (Luke 24:18–35).

clothing. ***See*** Dress.

clouds, masses of water vapor suspended in the air. Seasonally limited and encountered as harbingers of life-giving rains in winter, clouds were experienced and perceived as an awesome manifestation of divine power by the Canaanites and ancient Israelites. The Ugaritic texts call the storm god Baal "Cloud Rider." Israel applied the same title to God (Ps. 68:5). The Yahwist reports that by day a cloud pillar represented Yahweh and guided the wilderness march of Israel. A cloud at the Jerusalem Temple manifests the presence of Yahweh (1 Kings 8:10–11). In the NT the voice of God comes from a cloud (Mark 9:7), and a cloud masks the departure from earth of Jesus (Acts 1:9). ***See also*** Baal; Yahwist. R.M.G.

Cnidus (n*i*´duhs), a city near Cape Krio in southwest Turkey; it received a letter from the Roman consul Lucius (Calpurnius Piso) ca. 140 B.C. backing Simon's rule over the Jews (1 Macc. 15:23). Paul's ship sailed past Cnidus en route to Rome (Acts 27:7).

coat. ***See*** Dress.

coat of mail (KJV: "brigandine"), defensive armor consisting of overlapping plates of metal strung on leather or cloth. Cavalrymen and archers are identified as the warriors who wore it (Jer. 46:4; 51:3).

cock, fowl whose crowing highlights the story of Peter's denial of Jesus in all four Gospels (Matt. 26:34, 74–75; Mark 14:30, 72; Luke 22:34, 60–61; John 13:38; 18:27). Prov. 30:31 so translates a word of uncertain meaning. ***See also*** Fowl.

code. ***See*** Law.

codex, one of the two formats in which ancient manuscripts were written, the other being the scroll. The codex or leaf-book soon came to be used by Christians to differentiate their sacred books from the synagogue scrolls of the OT. A codex was made by placing sheets of papyrus or parchment on top of one another and folding them down the middle, producing a quire. Such a single-quire codex tended to be clumsier, the larger the number of sheets used in its manufacture. Scribes soon saw the advantage of utilizing smaller quires, each comprising four sheets folded in half three successive times so as to make eight pages, and then stitching the several quires together at the back.

Some of the most famous parchment codices of the Bible are Codex Alexandrinus, a fifth-century manuscript of the whole Bible, with some lacunae; Codex Vaticanus, dating from the fourth century; Codex Sinaiticus, also from the fourth century; Codex Bezae, a fifth-century manuscript containing the Gospels and Acts in Greek and Latin; Codex Washingtonianus, a fourth- or fifth-century manuscript of the Gospels; the Vienna Genesis, a deluxe purple parchment Greek manuscript of the fifth or sixth century A.D. with forty-eight watercolor miniatures; and the Khludov Psalter of the ninth century A.D., containing more than two hundred miniatures illustrating the LXX text of the Psalms.

college (KJV; RSV: "Second Quarter" [2 Kings 22:14; 2 Chron. 34:22]), that part of Jerusalem in which Huldah the prophetess lived; the western hill. ***See also*** Huldah; Jerusalem.

collop (KJV; RSV: "fat" in Job 15:27), a roll or flap of fatty tissue.

Colossae (kuh-los'ee), a city in Asia Minor located in the upper Lycus River valley about 110 miles east of Ephesus, ten miles east of Laodicea, and twelve miles southeast of Hierapolis. In the fifth century B.C. and later, Colossae was an important center. Herodotus called it "a large city of Phrygia" and Xenophon described it as "a populous city, large and well off." This prominence derived especially from

its wool-working and cloth-dying industries; the dark red wool cloth known as *colossinum* was widely known. However, by the late first century B.C. Colossae had been outstripped by both Laodicea and Hierapolis, and Strabo lists it among a group of smaller towns. A severe earthquake in A.D. 60 or 61 may have further accelerated Colossae's decline. A significant number of Jews probably resided at Colossae; a statement made by Cicero (*Pro Flacco* 68) permits the estimate that over ten thousand Jewish males lived in the Laodicea-Hierapolis-Colossae area. A Christian community, perhaps founded by Epaphras (Col. 1:7–8), existed here in the mid-first century A.D. and was the recipient of a Pauline letter. Colossae passed into oblivion in later Roman times—only a few coins survive from this period—and its site, rediscovered in 1835 and still unexcavated, became a quarry in the Byzantine era. ***See also*** Asia; Colossians, The Letter of Paul to the; Epaphras; Ephesus; Hierapolis; Laodicea; Phrygia.

R.A.W.

Colossians (kuh-losh'uhnz), **the Letter of Paul to the,** a letter written either by the apostle Paul himself or, more probably, by an early follower to the Christian community at Colossae and subsequently included in the NT canon. Its purpose was to offer a response to the "philosophy" or "tradition" (Col. 2:8) proclaimed by certain Christian teachers at Colossae, a teaching that the author viewed as fundamentally antithetical to the true gospel.

The exact identity of this so-called Colossian heresy is still the subject of much scholarly debate. There are certain links with Judaism: the teachers demanded circumcision (Col. 2:11), various dietary restrictions (2:16, 21), and the observance of festivals, new moons, and Sabbaths (2:16). Yet these practices, as well as the ascetic observances alluded to in 2:21, 23, and what in 2:18 the author terms the "worship of angels" (an effort to enlist help from benevolent spiritual powers?) all seem to have been proposed by the teachers as a way to gain freedom from the malevolent influence of planetary and astral rulers, the "principalities and powers" mentioned in 2:15. For the author, these beings were the "elemental spirits" (2:8, 20) referred to quite pejoratively in Gal. 4:3, 9.

The Christians of Colossians lived in a world that took for granted the existence of suprahuman powers who controlled the movement of the stars and planets and thereby influenced human activity and destiny, often for the worse. The author does not deny their existence but argues that even if they once held such power, they hold it no longer. Christ, the "image" of God (1:15) in whom "the whole fullness of divinity dwells bodily" (2:9), creates (1:16), gives coherence to (1:17), and has absolute power over (1:18–20) all beings whether earthly or heavenly. Consequently, the cosmic powers no longer enjoy independent authority but are mere captives in Christ's triumphal procession (2:15).

Christians therefore do not need further mediators or observances to gain deliverance from these powers. They have already been "delivered" and "transferred into the kingdom of the Son" (1:13), are already "raised with him [Christ]" (2:12). Furthermore, perhaps against a view that the new rigorism of the teachers was necessary to oppose moral imperfection, the author stresses that "forgiveness of sins" (1:14; 2:13; 3:13) is an already present reality. Men and women, this Letter insists, need not retreat from the world in order to live upright lives but have power here and now from Christ through baptism to act morally. Indeed, the family household is a privileged locus for ethical activity (3:18–4:1).

In style and diction, Colossians differs markedly from the clearly genuine Letters of

Paul. Many of its sentences are long and involved (e.g., 1:9–20; 2:8–15). Everywhere synonyms and parallel expressions appear in abundance, and the author delights in stringing together, without clear subordination, various types of modifying phrases. More importantly, a number of connective words and particles frequently utilized by Paul do not appear in this Letter. In addition, certain theological themes in Colossians seem at variance with Paul's usual perspectives. The cosmic rule of Christ, the "headship" of Christ over the Body (now viewed as the worldwide church), and the present existence of Christians as already "risen with Christ" are stressed; and Christ's death is mentioned but rarely (1:20; 2:14).

Those who defend Paul's authorship of Colossians ascribe these theological shifts to the natural development of his thinking over time. The stylistic divergences, however, present more problems, and these are often accounted for by suggesting that Paul in preparing this letter gave rather free rein to a secretary (he did not, we note, give such liberty to the secretaries he employed in composing Romans and Galatians [Rom. 16:22; Gal. 6:11]). If Paul is the author, Colossians would date to the end of his life (ca. A.D. 58–60) when he was a prisoner at Rome or, less likely, at Caesarea.

Overall, the accumulated evidence, especially the stylistic data, suggests that someone other than Paul composed Colossians. Epaphras (Col. 1:7–8; 4:12), Onesimus (4:9), and Timothy (1:1) have all been proposed as possible authors, but none is a clear favorite. Following a practice widespread in antiquity, especially within the Greek philosophical tradition, the actual author of Colossians, almost certainly an early disciple of Paul, chose to write under the name of the master. The letter thus produced, a letter almost certainly addressed to an actual rather than a fictional situation, served to demonstrate the continued validity of Paul's teaching for the churches even when Paul himself could no longer be present to provide immediate guidance. Colossians cites Paul's Letter to Philemon, a document that circulated in the same geographical area as Colossae, and its author may also have known Philippians and Galatians, but perhaps not any of the other Pauline Letters. Probably, therefore, Colossians is relatively early in date (before ca. A.D. 80), and its author may have lived in some city in Asia Minor not too far distant from Colossae. *See also* Colossae; Paul; Pseudonym.

OUTLINE OF CONTENTS

The Letter of Paul to the Colossians

I. Epistolary salutation (1:1–2)
II. Thanksgiving for the Colossians' past and present fidelity (1:3–8)
III. The need for continued fidelity to the gospel (1:9–4:6)
   A. The true way of salvation (1:9–3:4)
      1. The author's basic thesis (1:9–12)
      2. Supporting reason: God in Christ has accomplished a complete deliverance (1:13–20)
      3. Reiteration of the thesis (1:21–23)
      4. Supporting reason: Paul's fidelity in proclaiming the gospel (1:24–2:3)
      5. Counterexample: the infidelity of the new teachers (2:4–13)
      6. Reiteration of the thesis (3:1–4)
   B. The ethical practices that follow from this (3:5–4:6)
IV. Concluding greetings and instructions (4:7–18)

Coming of Christ, Second. *See* Eschatology; Millennium; Parousia.

commandment (Heb. *mitzvah*), a verbal or written requirement or order. This important term appears over a hundred and eighty times in the OT. Over ninety percent of these refer to God's requirements of Israel as stipulated in the Pentateuch. The religious usage of "commandment" may be tied to the secular ones of king-subject (e.g., 2 Kings 18:36) and parent-child (e.g., Jer. 35:14; Prov. 6:20). The term appears often in conjunction with *torah* and laws (e.g., Gen. 26:5; Exod. 24:12; Deut. 6:1). The people are enjoined to "keep" (lit., "guard") the commandments (e.g., Lev. 26:3). Far from being burdensome, the commandments are the psalmist's "delight" (Ps. 119:47, 143) and "love" (v. 127). Indeed, in the Ten Commandments, God calls those who observe his commandments "those who love me" (Exod. 20:6; Deut. 5:10).

For Jesus, the two greatest commandments are love of God and neighbor (Matt. 22:35–40; Mark 12:28–34; Luke 10:25–28, based upon Deut. 6:5 and Lev. 19:18)—a perspective rooted in Jewish tradition contemporary with Jesus. *See also* Covenant; Law. J.U.

concubine, a marital associate of a man secondary to his wife. When barren wives such as Sarah, Leah, and Rachel gave their handmaidens as surrogates to their husbands to bear children (Gen. 16:1–3; 30:3–13), they were following a practice known from Babylonia (*Code of Hammurabi,* 144–145). Similarly, that the children Sarah and Rachel later bore inherited more than those of the handmaidens (Gen. 21:10–13; 48; 49:22–26) is also reflected in the Code of Hammurabi (170–171). The Torah legally guaranteed the rights of a Hebrew girl sold into concubinage (Exod. 21:7–11).

For another to engage in sexual intercourse with a man's concubine was perceived as usurption of the latter's authority and was a blatant act of rebellion (Gen. 35:22; 49:4; 2 Sam. 3:7; 1 Kings 2:13–25). It was for this reason that Absalom lay with his father's concubines "in the sight of all Israel" (2 Sam. 16:20–22)! ***See also*** Genesis; Marriage. J.U.

conduit (channel, aqueduct, trench), term translated "streams" in Ezek. 31:4 (RSV), but more likely a reference to channels for irrigation (Job 38:25). It is rendered "trench" in 1 Kings 18:32–38, the channel Elijah dug around the stone altar to retain water he poured over his sacrifice.

A water gallery excavated at Megiddo. The narrow tunnel cut through the Solomonic casemate wall (tenth century B.C.) and carried water to the city from a spring outside the wall.

The more common use of this term is to describe an artificial channel or aqueduct designed to carry water from its source to a particular location, usually inside a city. One such channel is referred to as "the conduit of the upper pool" and it brought water from the Gihon spring down along the side of the Kidron Valley to the lower, "old pool" (Isa. 22:9, 11) or "King's Pool" (Neh. 2:14). It was along this conduit that Isaiah met Ahaz (Isa. 7:3), and that the officers of Sennacherib taunted Hezekiah (2 Kings 18:17; Isa. 36:2).

When it appeared that Sennacherib was about to conquer Jerusalem, Hezekiah ordered that the openings of these conduits be closed, including those associated with the Brook Kidron (2 Chron. 32:1–4). Later Hezekiah had a 1,780-foot tunnel cut through solid rock to bring water from the Gihon into the city (2 Kings 20:20).

Many believe that it was an underground conduit or "water shaft" that David's men used to enter Jerusalem and bring an end to Jebusite control of that city (2 Sam. 5:8). Similar conduits or water tunnels have been discovered at Gezer, Megiddo, Gibeon, and Hazor.

Water conduit systems were varied in their construction. Some were underground tunnels cut through rock while others consisted of plastered troughs or tiled pipes.

Much to the distress of the citizens of Jerusalem Herod the Great and Pontius Pilate used Temple funds to finance the construction of an elaborate system of aqueducts to bring water from pools south of Bethlehem to Jerusalem, a distance of about fifteen miles. J.J.D.

congregation, a gathering, usually of people who share common interests or ancestry. Two basically synonymous Hebrew terms denote "congregation": *'aydah* (from the root "to appoint") and *kahhahl* (the corollary verbal root is "to convoke"; Prov. 5:14).

The antiquity of *'aydah* is seen in its appearance in Ugarit in the phrase "assembly of the gods" (cf. Ps. 82:1). *'Aydah* can refer to gatherings of animals (Judg. 14:8; Ps. 68:30), the nations (Ps. 7:7), and sinners (Ps. 22:16). However, the vast majority of occurrences signify the official Israelite socioreligious body (particularly in Exodus–Numbers) during the period of the desert sojourn and the conquest—an appropriate designation since *'aydah* may indicate the assembly of Israel at the tent of "meeting" (Heb. *mo'ayd*; Lev. 8:3–4).

Although *kahhahl* also signifies official Israel in Exodus–Numbers (as well as Deuteronomy,

Ezra, Nehemiah, and Chronicles), it refers elsewhere in the Bible to both Israelite and other human gatherings (with a military connotation in Ezek. 17:17; 38:15). The Christians may have chosen the Greek word *ekklēsia* for church because its first two consonants (k, l) are the same as this Hebrew word. J.U.

Coniah (koh-ni´uh; a shortened form of Jehoiachin, Heb., "Yahweh has appointed"), the son of Jehoiakim and grandson of Josiah who began his reign as king in Judah about 598 B.C. (Jer. 22:24, 28; 37:1). He was the last king of Judah before it fell to Babylon and was deported to Babylon by Nebuchadnezzar. He is also called Jeconiah (Jer. 24:1; Matt. 1:11). ***See also*** Jehoiachin.

Conquest Era, the time during which Israel invaded Canaan and subdued the peoples living there. The biblical accounts of conquest and settlement occur in the following texts: Numbers 13–14; 21:1–3, 21–32; 22–24; 32; Joshua 1–24; and Judg. 1:1–2:5. These represent different understandings of what occurred during the thirteenth and twelfth centuries B.C. The archaeological evidence is similarly diverse. The issues are twofold: to what extent was Israel's possession of the Promised Land sudden and decisive, and to what extent was possession accomplished through a unified effort of all the tribes or individual tribal efforts? While the answers to these questions are complicated, the predominant remembrance throughout the Hebrew canon is that a unified Israel led by Moses and then Joshua produced sweeping victories that gave Israel unquestioned possession of the land. ***See also*** Joshua; Joshua, The Book of; Moses. K.H.R.

conquest of Canaan, a term used with reference to the forceful occupation of Canaan by the Hebrews after the Exodus, as described in the OT. This historical process can be defined in broad or narrow terms. One can speak about the conquest beginning with Moses' military victories in Transjordan (thirteenth century B.C.) and continuing until the consolidation of the Israelite monarchy under David and Solomon (tenth century B.C.). A more restricted use of the term focuses upon the period between the Israelite attack on Jericho and the Hebrew occupation of the land according to tribal allotments (i.e., from shortly after Moses' death until the death of Joshua). This article recognizes the Israelite conquests in Transjordan as necessary antecedents to the invasion of Canaan proper and defines the conquest as a more gradual process that extended beyond the brief series of campaigns described in the book of Joshua.

After forty years of wandering in the wilderness, the Hebrews launched their invasion by securing the Transjordanian territories of Sihon and Og (Num. 21:21–35). Since Moses had been prohibited by God from entering Canaan (Deut. 32:48–52), the conquest was under Joshua's leadership (Josh. 1:1–6). Spies were sent to reconnoiter the land, the Jordan River was crossed, and the Israelites established their base of operations at Gilgal (Josh. 2–4).

Although the Amorites and Canaanites were demoralized by the reputation that preceded the Hebrews (Josh. 5:1), the conquest was not accomplished without opposition (cf. Josh. 9:1–2). After an unconventional siege and divinely assisted victory over Jericho (Josh. 5–6), the Israelites attacked Ai, which fell after Achan had been punished for appropriating some of the booty that had been dedicated to God (Josh. 7:1–8:29). The Hivites of Gibeon avoided defeat by tricking Joshua into forming an alliance (Josh. 9), and the Hebrews were called upon almost immediately to protect their new allies. When a coalition of five Amorite kings planned to attack the Hivite league to discourage others from making treaties with Israel, the Lord's hailstorm and Joshua's army defeated this powerful force (Josh. 10:1–39). The outstanding theological motif of the book of Joshua becomes explicit in the author's final comment on the battle at Beth-horon: "the LORD fought for Israel" (Josh. 10:14). These major victories allowed the Hebrews to consolidate their hold on central and southern Canaan (Josh. 10:40–42).

When an alliance of Canaanite city-states was formed by Jabin, king of Hazor, to oppose the Hebrews, Joshua led a surprise attack against this army at the waters of Merom. Israel's enemies were gathered there in large number, "like the sand that is upon the seashore, with very many horses and chariots" (Josh. 11:4), but Joshua's army was still victorious. The city of Hazor, "the head of all those kingdoms," was burned, and the other towns were looted by the Hebrews (Josh. 11:10–15). Hazor's fall led to a consolidation of Israelite power in the north. This ended the first phase of the conquest of Canaan, a major military offensive with campaigns against the central, southern, and northern sections of Palestine (Josh. 11:16–23). Joshua 12 lists thirty-one towns that fell to Israel in this major offensive; it is important to note that not all of these victories are described in the preceding chapters of Joshua, a clear indication that the first eleven chapters were not intended to provide an exhaustive narration of the conquest. Indeed, a careful examination of Joshua and Judges (esp. Judg. 1:1–2:5) allows one to see that the occupation of Canaan was not so swift and comprehensive as a superficial reading of the texts may suggest.

Following its account of the initial campaigns, the book of Joshua describes the division of the land among Israel's tribes (chaps. 13–19), the establishment of six cities of refuge (chap. 20), and the assignment of forty-

eight cities to the Levites (chap. 21). This does not mean, however, that the conquest of Canaan was completed in a period of five or six years (cf. Josh. 14:7–10). Indeed, Josh. 13:2–6 says that large portions of Canaan remained unconquered (e.g., "all the regions of the Philistines"). In other words, Joshua's victories provided the Israelites with footholds in their respective allotments, but the individual tribes were responsible for completing the conquest (cf. Judg. 1:3). Furthermore, some towns had to be recaptured (e.g., Hebron; cf. Josh. 10:36–37; 15:13–14).

Since the historical, archaeological, and biblical data are open to significantly different interpretations, scholars continue to debate the nature and date of the Israelite occupation. While dates assigned to the Hebrew settlement range from the fifteenth through the eleventh centuries, the scholarly reconstructions proposed to explain this process include military conquest, peaceful infiltration, and internal revolt models. There is more agreement on the theological themes of the narratives; central among these is the belief that the Lord's promise to Abraham (Gen. 12:1) was fulfilled when the Hebrews took possession of the land of Canaan (Josh. 21:43–45; 23:14). ***See also*** Amorites; Canaan, Canaanites; Israel; Joshua, The Book of.

conscience, the English translation of a word that, in classical Greek, referred to knowledge, especially the knowledge derived from reflection on one's past deeds. The appraisal of these deeds determined whether the conscience was "good" or "bad." The focus of OT faith is primarily on Israel's relation to God, and the Greek idea of conscience as self-reflection finds little place. Something similar to the concern for a "clear conscience" before God is expressed, however, in the OT desire for a "clean heart" (e.g., Ps. 51:10), and a usage similar to that in the Hellenistic world is found in the Wisdom of Solomon 17:11.

In the NT, which appears to be influenced by Hellenistic usage, the term occurs some thirty times, primarily in Paul's Letters (Romans and 1 and 2 Corinthians) and in other writings traditionally associated with Paul (the pastoral Letters), although it also occurs twice in Acts (23:1; 24:16, both times on the lips of Paul), five times in Hebrews (9:9, 14; 10:2, 22; 13:18), and three times in 1 Peter (2:19; 3:16, 21). In a few instances, the meaning apparently is something like "consciousness" or "awareness" (Heb. 10:2; 1 Pet. 2:19, RSV: "mindful"). Elsewhere, the writers can speak of a "good" or "bad" conscience (Acts 23:1; 24:16; 1 Tim. 1:5, 19; 3:9; 4:2; 2 Tim. 1:3; Titus 1:15; Heb. 10:22; 13:18; 1 Pet. 3:16, 21) or of "perfecting" or "purifying" the conscience (Heb. 9:9, 14).

Paul's use of the term is somewhat more difficult to characterize. In Rom. 2:15; 9:1 and 2 Cor. 1:12, he apparently uses it in the sense of one's knowledge or awareness of the nature of one's own thoughts, motives, and actions. In 2 Cor. 4:2 and 5:11, it appears to refer to one's judgments regarding the motives and actions of another. The exact meaning in Rom. 13:5 is unclear. Paul's understanding of the role of conscience is most fully expressed in his correspondence with the Corinthians concerning eating food offered to idols (1 Cor. 8–10). Some Corinthians apparently decided to let their conscience be their guide in this matter. Paul responds that conscience alone is an inadequate guide for Christian ethics. In an extremely sensitive or weak Christian, conscience may become too critical and oppressive. The stronger Christian, on the other hand, may be inconsiderate of the scruples of the weaker Christian. Paul does not think additional knowledge per se will be a sufficient guide for behavior in such a situation; rather, he admonishes that conscience follow the love ethic. ***See also*** Food Offered to Idols; Heart; Love; Mind. R.A.B.

contribution for the saints, an offering from Gentile to Jewish Christians. In 1 Cor. 16:1–2, Paul the apostle gives instructions to the Corinthian Christians about a fund that he is intent on raising for the Jewish Christians in Jerusalem. His churches in Galatia (1 Cor. 16:1) and Macedonia (2 Cor. 8:1–5; 9:1–2) had also been urged to make contributions, and the latter, at least, seem to have responded generously (2 Cor. 8:3–5). The Corinthians, however, while quick to pledge their support, apparently were slow to follow through with any gifts (2 Cor. 8:6; 9:1–5). It may be that opponents of Paul, intruders who were seeking to gain control over the Corinthian congregation, had caused the Christians there to suspect Paul's motives in soliciting their money (2 Cor. 12:14–18).

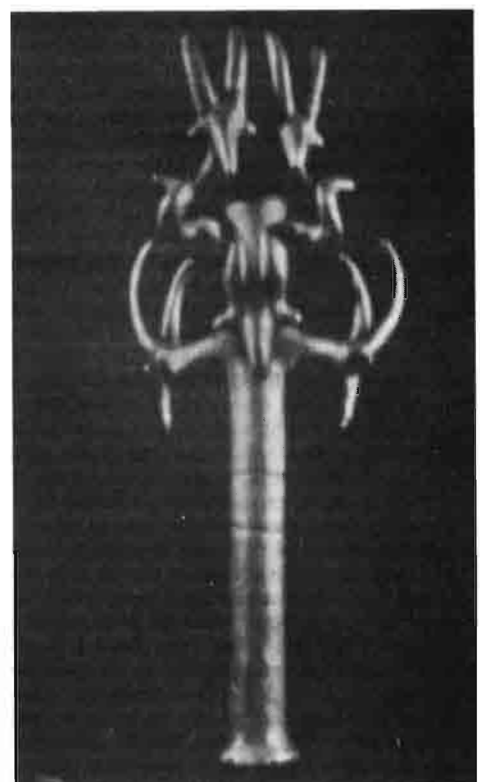
At least two factors account for the high priority Paul seems to have placed on the collection project over a several-year period: first, he considered it a needed act of charity (2 Cor. 8:4; Rom. 15:26), perhaps an extension of the relief fund he and Barnabas had delivered to the

Jerusalem church on behalf of the Christians in Antioch (Acts 11:27–30); second, he had committed himself to it as a part of the agreement reached when the Jewish-Christian leaders in Jerusalem approved his mission to the Gentiles (Gal. 2:1–10); it therefore symbolized the partnership of Jews and Gentiles in the gospel. Perhaps he also associated it with the prophets' expectation of an ultimate Gentile pilgrimage to Mount Zion (Isa. 2:2–3; 60:4–7; Mic. 4:1–2), but the Gentiles would come with the gospel, not in order to embrace the law (Rom. 11:25–26). About the actual completion and delivery of the collection, however, the sources provide little information (Rom. 15:25–31; cf. 1 Cor. 16:3–4; Acts 20:24; 24:17). ***See also*** Paul; Poor. V.P.F.

conversion, a concept whose biblical meaning is especially difficult to understand because of the many connotations associated with the term as a rallying point for various contemporary religious groups. The difficulty is compounded by the fact that the realities associated with the concept in the biblical writings cannot be subsumed adequately under a single lexicographical entry. The basic meaning is that of "turning," "turning to," or "returning," and it can be applied either to God or to human beings in relation to God (e.g., Deut. 13:17; Josh. 24:20; Pss. 51:13; 85:3; Isa. 6:10—note Mark 4:12 and parallels; John 12:40; Acts 28:27—Isa. 44:22; 51:11; 55:7; Jer. 3:14; 8:4–6; Ezek. 33:10–16; Acts 9:35; 15:3, 19; James 5:19–20). Implied in these passages is a change of course or direction, not merely an attitudinal change or altering of one's opinion.

Because the religion of Israel was national in scope and was hence a matter of birth, individual conversion plays a minor role in the OT. While individuals of other nationalities did occasionally become worshipers of Yahweh (e.g., Ruth 1:16–18), a large-scale conversion of Gentiles to Yahweh was anticipated only as part of end-time events (Isa. 2:2–4; 66:18–21; Zech. 14:16–17).

At least three larger complexes in the NT are important for the concept of conversion. First are the traditions associated with John the Baptist and his call to repentance (Matt. 3:1–12; Mark 1:1–8; Luke 3:1–20). Second, the Gospels as a whole present "conversion" as the goal of Jesus' life and ministry. He summons people to repent (change direction); people accept his summons as God's turning to them in forgiveness and healing; they respond in faith and follow in discipleship (e.g., Matt. 8:8, 10; Mark 10:46–52; 10:17–22 and parallels; Luke 7:47–50; 15:7, 10, 18–19; 19:1–10; 22:32). The third complex is the Damascus Road "conversion" of Paul (Acts 9:1–19; 22:3–16; 26:9–18; 1 Cor. 9:1; 15:8; Gal. 1:13–17). While this combined form of "conversion/appearance and commissioning" is atypical in the NT, the life-redirection element is constitutive for the early church (e.g., Acts 2:41, 47; 3:19; 8:5–8; 11:21; 14:15–17; 26:17–29; 2 Cor. 3:16–18; 1 Thess. 1:9–10; 4:1–8). ***See also*** Repentance. J.E.A.



convocation (Heb. *mikrah,* "declaration"), a calling together or a summons to meet. The term appears primarily in the phrase "holy convocation" and signifies the call to assembly at the sanctuary of the Israelite congregation on a holy day. The days decreed as "holy convocation" were: the weekly Sabbath (Lev. 23:3); the first and seventh days of Passover (Lev. 23:5–8; Num. 28:18–25); the Festival of Weeks (Lev. 23:21; Num. 28:26); the first day of the month Tishrei (Lev. 23:24; Num. 29:1); the Day of Atonement (Lev. 23:27; Num. 29:7); and the first and eighth days of the Festival of Booths (Lev. 23:35–36; Num. 29:12–35). Characteristic of these days was the prohibition of work. The convocation was called by the blowing of special trumpets (Num. 10:2, 10). ***See also*** Feasts, Festivals, and Fasts. J.U.

copper, a malleable, metallic element of reddish brown color. The word "copper" (Lat. *cuprum*) derives from "Cyprus," the island renowned in antiquity for its copper industry. The utilization of copper led to the science of metallurgy. The exact origins of metallurgy have recently been the subject of intensive scholarly research (and debate), with the proposed sites of origination stretching from Europe to the Near East and the Far East, in particular Thailand. Though arguments have been advanced in support of independent origins of metallurgy in these three areas, the total evidence still strongly suggests that the Near East was the homeland of metallurgy. The development of this technology must be seen against the larger cultural backdrop of the origins of agriculture, domestication of animals and urbanization, all of which occurred first in the Near East.

The earliest metal finds come from Shanidar Cave in Iraq and Cayönü in Turkey, dated respectively to the ninth and eighth millennia B.C. These objects are of pure copper, that is, copper in its native state, and were worked by cold hammering. The growing demand for copper gradually led to the utilization of copper ores, far more abundant, but requiring a process for extracting the copper from the ore. Thus began true metallurgy, the discovery of smelting techniques, in the fifth millennium B.C. (Chalcolithic period). By the fourth millennium copper metallurgy appeared widespread throughout the ancient world.

In the biblical lands, the discovery of a smelting complex, including remains of ore, slag, and crucibles, at the Chalcolithic site of Tell Abu Matar near Beer-sheba attests a sophisticated industry. In one of the more spectacular discoveries of the same period, a hoard of 416 copper

Copper jug with incised zig-zag pattern and copper ibex scepter (right) from the fourth millennium B.C., found at the "Cave of the Treasure," attest to a sophisticated metallurgy industry.

objects from the "Cave of the Treasure" came to light in the Nahal Mishmar in southern Palestine. This Judean desert find comprised a cache of chisels, axes, maceheads, wands or standards, and crowns, all apparently ritual objects used in the temple cult. From the Early Bronze Age (3000–2000 B.C.) there are copper daggers, pins, awls, axes, spearheads, and jewelry found at nearly every site. About 2000 B.C., the beginning of the Middle Bronze Age, bronze, an alloy of tin and copper, began to supersede copper in the production of metal objects.

According to biblical tradition, the first metallurgist was a figure named Tubal-cain, "the forger of all instruments of bronze [read copper] and iron" (Gen. 4:22). "Cain" means "smith" in Hebrew and the tradition probably derives from the Kenites, a tribe of smiths in the Wadi Arabah region (Gen. 15:19; Num. 24:21; Judg. 1:16). In fact this area, south of the Dead Sea, was and is a principal copper mining area (Deut. 8:9; Job 28:1–5), as is evident from excavations at Fenan and Timna. Timna may have been worked as early as the Chalcolithic period. There is no evidence for "Solomon's copper mines" at Ezion-geber (1 Kings 9:26–28) as formerly thought. The Wadi Arabah copper industry predates the Solomonic period (ca. 965–926). ***See also*** Metals. S.L.R.

cor (kor), a measure of capacity. A cor comprised thirty-five to possibly sixty gallons, wet, or about fourteen bushels, dry (Ezek. 45:14). ***See also*** Weights and Measures.

coral, salt-water submarine growth composed of the calcareous remains of anthozoan polyps. Pieces of coral were considered precious (Job 28:18). They were considered the epitomy of the color red (Lam. 4:7, KJV: "rubies") and were important trade goods (Ezek. 27:16). Found in both Mediterranean and Red Sea coastal waters, coral was a popular material for beads and various forms of jewelry. ***See also*** Jewelry.

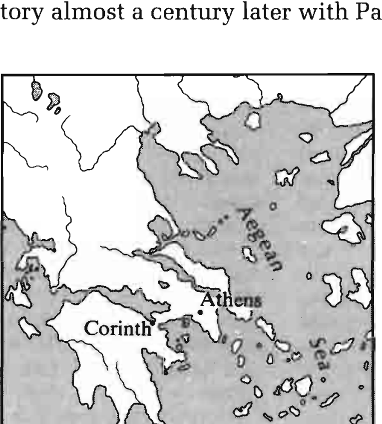
corban (kor'ban), the Hebrew word for an offering dedicated to God (Lev. 1:2; Num. 7:13); it was used of the Nazirites in reference to their life style (Josephus *Antiquities* 4.73). Mark 7:11–13 claims that property declared to be "corban" did not have to be used in support of one's parents. No other evidence of such a rul-

ing exists. The Mishnah, codified after the Gospels were written, appears to hold that a person is to break a vow, if that vow leaves one without enough to support one's parents.

coriander (*Coriandrum sativum*), an herb whose leaves and aromatic seeds were used medicinally and for flavoring breads and other dishes. The round white seeds are likened to the manna found in the desert (Exod. 16:31).

Coriander.

Corinth



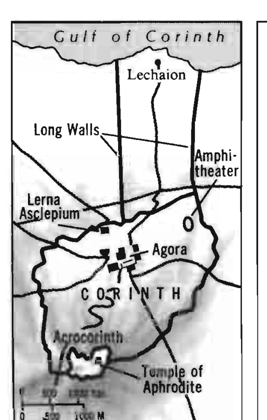
A MAJOR CITY OF ANTIQUITY, occupied at intervals since the fifth millennium B.C., Corinth (kor´inth) acquired its name from pre-Greek inhabitants. During Mycenaean times the area was subject to Argolid powers, but the city known in classical times was effectively founded by Dorian Greeks in about the tenth century B.C. Its first real historical figures seem to be the eighth-century Bacchiads, under whom Corinth established colonies in Corcyra (Corfu) and Syracuse in Sicily. Corinthian sea power was commercial as well as military at the time, and Proto-Corinthian pottery is found around the Mediterranean. Overthrowing the Bacchiads ca. 660 B.C., Kypselos and his son Periander (ca. 625–585 B.C.; one of the Seven Sages of Antiquity) established a solid prosperity that flourished for more than a century. The biennial Isthmian games, founded ca. 580 B.C., brought additional prestige and revenues to the city.

The "street" connecting ancient Corinth with the port at Lechaion. In the background is the Acrocorinth.

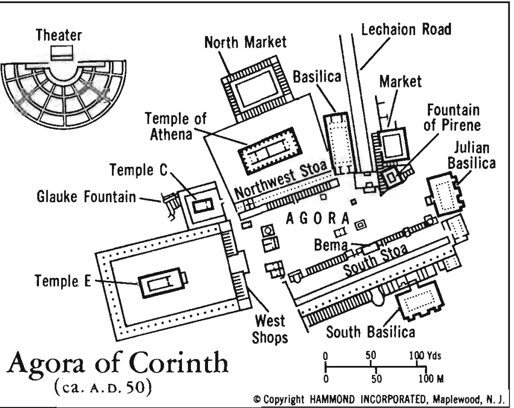
After the Persian War, Corinth found itself increasingly squeezed by the expansion of Athens and, more often than not, on the side of Sparta in conflicts between the two major powers. Following the Macedonian victory at Chaironea in 338 B.C., the Synedrion (council) of Corinth ratified Philip II's rule of Greece and later that of his son Alexander. Corinth regained its independence as a member of the Achaean League after 224 B.C., but it was razed by Lucius Mummius's Roman legions in 146 B.C. after his defeat of the League. Mummius slaughtered the men, sold the women and children into slavery, and left the city in ruins, a condition it remained in for a century.

The commercially strategic location of the site, however, with its virtually impregnable Acrocorinth (altitude 1886 feet), begged for rehabitation, and in 44 B.C. Julius Caesar established a colony of veterans there under the name of *Colonia Laus Julia Corinthiensis*. It was this settlement, which by 27 B.C. had already grown into the flourishing capital of the Roman province of Achaia, that entered biblical history almost a century later with Paul's sojourn in the city.

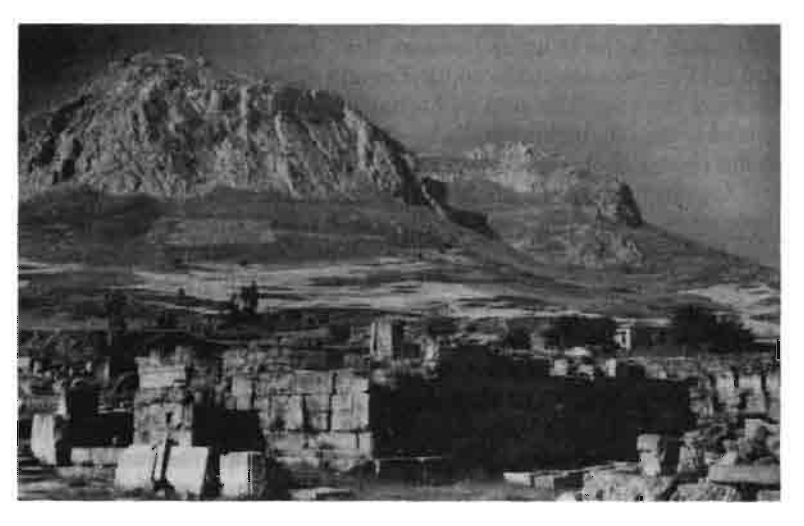
Corinth, located on the isthmus between mainland Greece and the Peloponnesus, had two ports for commerce passing between the Aegean and Adriatic seas.



Situated on the isthmus between the Greek mainland to the north and the Peloponnese to the south, Corinth effectively controlled traffic between the two. The port of Lechaion on the Gulf of Corinth, connected to the city by long walls by 400 B.C., opened to the Adriatic Sea to the west; Cenchreae, only seven miles away on the Saronic Gulf of the Aegean to the east, made of the area a major east-west maritime trade route as well. Periander's *diolkos*, a paved slipway roughly parallel to the modern canal, permitted smaller cargo ships to be carried across the isthmus on wheeled conveyances, thus avoiding the perilous journey around the Peloponnese; larger ships would have to offload their cargo and have it ferried across the isthmus via Corinth.



Having earned renown in Greek antiquity for its wealth and reputed licentiousness, Roman Corinth soon flourished in its own right, and by the time of Paul it was as cosmopolitan as any Mediterranean port. The official language was the Latin of the conquerors, but the common language was the *koine* Greek of both the surrounding area and the merchants. The city was rebuilt with Roman institutions over the Greek ruins, the center dominated by upper and lower fora (marketplaces) and the archaic Temple of Apollo, now perhaps rededicated to Caesar's family, the *Gens Julia*. It was the relative newness of the city and of its immigrant, cosmopolitan urban working class that gave it both a commercial dynamism and an openness to newer ideas. The imperial cult seems to have been the principal religion of the local Latins, with the Greco-Roman pantheon in second place. As the largest central market and capital of Achaia, the intellectual and cultural heartland of Greece, Corinth had an immense cultural as well as economic influence on both the surrounding territories and the Greek-speaking provinces of the eastern part of the Roman Empire. Paul's establishment of Christianity there offered opportunities for diffusion of the gospel no other city could provide.



Part of a colonnade still stands in the agora at the ruins of Corinth.

Jewish communities were well established in the Hellenistic world and throughout the Roman Empire by the first century A.D., and, according to Acts 18:1–3, Paul encountered the Christians Aquila and Priscilla (Prisca) on his first visit to Corinth ca. 50. Paul remained there, preaching in the synagogue, in spite of a suit brought against him by some Jews before the proconsul Gallio, probably in the fall of 51 or the spring of 52 (Acts 18:16). Apollos also visited Corinth (Acts

Agora of Corinth
(ca. A.D. 50)

The *bēma* at Corinth constructed ca. A.D. 44. The Roman proconsul Gallio may have tried Paul from this platform.

18:27–19:1; 1 Cor. 1:12; 3:4–9; 4:6), possibly contributing to the factionalism and difficulties Paul addresses in 1 and 2 Corinthians. Paul's Letter to the Romans was probably written from Corinth (Rom. 15:25–27; cf. Acts 20:3).

The ongoing twentieth-century excavations by the American School of Classical Studies at Athens have revealed much about first-century Corinth. One inscription mentions the name of Erastus the aedile, an official in charge of public works (possibly the "city treasurer" of Rom. 16:23; cf. 2 Tim. 4:20). In the center of the forum was found a platform (Gk. *bema*) constructed ca. A.D. 44, possibly Gallio's "tribunal" at Paul's trial (Acts 18:12, 17). In the Lerna Asclepium and in other temples of the city can be seen the ruins of sacral dining halls that illuminate 1 Corinthians 8 and 10. An early first-century Latin inscription refers to a *macellum,* as Paul uses the Greek *makellon* in speaking of the "meat market" (1 Cor. 10:25). A crude, undatable Greek inscription on a broken lintel stone seems to announce the "Synagogue of the He-

An inscription at Corinth (shown here in part) mentioning the name of Erastus, who may have been the "city treasurer" mentioned in Rom. 16:23.

brews." Again, in the forum have been excavated rows of shops of the type Paul would have shared with his fellow tentmakers Aquila and Priscilla (Prisca). A contemporary villa gives a good understanding of the limitations on the size of "house-churches," perhaps explaining why factions arose in Corinth (several house-churches) and why there was discrimination in the communal meals of the general assembly (the dining room could only accommodate a select few, according to a Roman custom of ranking guests).

Corinthians (kuh-rin´thee-uhnz), **the First Letter of Paul to the,** one of two canonical Letters addressed to Corinth and one of the five letters Paul is known to have written to his congregation there. An earlier letter is described below; three later letters are discussed in the article on 2 Corinthians. A so-called 3 Corinthians, which has been incorporated into the apocryphal *Acts of Paul,* dates only from the end of the second century.

The Church in Corinth: It is probable that Paul's first visit to Corinth, and therefore his founding of a congregation there (see Acts 18:1–18), took place in 50–51, although a date nearly ten years earlier has also been suggested. Silvanus and Timothy were active along with Paul in this venture (2 Cor. 1:19). Apollos is not mentioned as one of the founders, but since he was well known to the Corinthians (1 Cor. 1:12; 3:4–6; 4:6; 16:12), he may have exercised some kind of responsibility in the congregation between the time of its founding and the writing of 1 Corinthians. Peter, referred to as "Cephas" in 1 Cor. 1:12; 3:22; 9:5; 15:5, was most likely known to the Corinthians only by reputation, however.

Paul's earliest converts in the city were Stephanas and his household (1 Cor. 1:16; 16:15). Other prominent converts included Crispus (1 Cor. 1:14), who, according to Acts 18:8, had been the head of the local synagogue, Gaius (1 Cor. 1:14; cf. Rom. 16:23a), and (if chap. 16 of Romans was written from Corinth), Lucius, Jason, Erastus (a public official), Quartus, and perhaps Tertius the scribe (Rom. 16:21–23). Although the Corinthian Christians were primarily gentile, it is clear that some were of Jewish background; and although most were neither wealthy nor socially prominent (1 Cor. 1:26), it is evident that some were financially well off and enjoyed a relatively high social standing in the city.

The religious beliefs and activities of the congregation, as these developed between its founding and the writing of 1 Corinthians, have often been described as "Gnostic," since there is evidence that the Corinthian Christians attached great importance to the acquisition and display of special religious knowledge (Gk. *gnosis;* e.g., 1 Cor. 1:20–2:13; 3:18–19), that they tended to equate spirituality with possession of the more spectacular kinds of spiritual gifts (1 Cor. 12–14), and that they dissolved the Christian hope for resurrection from the dead into pretentious claims about the believer's present life (see esp. 1 Cor. 4:8; 15:12–19). Whether these tendencies be called Gnostic, proto-Gnostic, or simply Hellenistic, it is clear that they contributed to an apparently intense competition for status and therefore to a substantial degree of factiousness within the congregation. Paul's concern about these matters is evident throughout this Letter.

The "Previous Letter": The first letter Paul is known to have written to Corinth is not the canonical 1 Corinthians but rather a letter referred to by the apostle himself as one sent previously (1 Cor. 5:9–11). Paul's remark that it contained instructions "not to associate with sexually immoral persons" (5:9, NRSV) has led some scholars to suggest that part (or most) of this letter has been preserved in 2 Cor. 6:14–7:1, where believers are urged to separate themselves from unbelievers. The hypothesis that certain passages in 1 Corinthians itself (e.g., 6:12–20; 10:1–22 or 10:1–23; 11:2–34) originally stood in the "previous letter" is too speculative to have commanded much scholarly assent. It is impossible to determine where Paul was when he wrote this "previous letter," and it can be dated only to the general period 51–54.

A bronze mirror of Egyptian origin found near Acco. The words of 1 Cor. 13:12, "For now we see in a mirror dimly," may refer to the imperfect image reflected in the mirrors of polished metal of that time.

Authenticity and Literary Integrity: No serious question can be raised about the authenticity of 1 Corinthians as a whole, although certain passages are sometimes held to be later, non-Pauline additions (e.g., 11:3–16; 13; 14:34–35). Various interpreters question the Letter's literary integrity, however, maintaining that in its canonical form it is a composite of parts of two or more originally distinct Pauline letters. In particular, passages such as 6:12–20; 9:1–18; 10:1–22 or 10:1–23; and 11:2–34 are sometimes regarded as intrusive where they stand, and so are assigned to some other letter. Most scholars,

however, do not find the alleged difficulties serious enough to warrant the kinds of partition hypotheses that have been proposed, and therefore continue to accept 1 Corinthians as an integral whole.

Occasion and Purpose: As Paul writes 1 Corinthians, he is in Ephesus, where he intends to remain until Pentecost (16:8). Sosthenes is with him (1:1), but Timothy seems to be en route to Corinth (4:17; 16:10). Stephanas, Fortunatus, and Achaicus are also with Paul, apparently as representatives of the Corinthian congregation (16:17–18). There is no indication that Paul has been back to Corinth since the conclusion of his initial, extended period of evangelization there (see Acts 18:1–18). The present Letter has been dated as early as 49 and as late as 56, but the most likely year is 54.

The purpose of 1 Corinthians is to deal with a number of specific problems Paul understands to be endangering the Christian life and witness of his congregation in Corinth. From "Chloe's people" he has learned that various groups are competing with one another for status within the church, apparently bolstering their claims by invoking the names of luminaries such as Paul, Apollos, and Cephas (1:11–12). Perhaps from the same source, he has heard the alarming report that a man in their congregation who is living incestuously with his stepmother has gone undisciplined (5:1–13). Sources have also told him about certain disorders when the congregation gathers for its common meal and a celebration of the Lord's Supper (11:17–34). Moreover, he has received some kind of official letter of inquiry from the church itself (see 7:1), and his counsels and directives in chap. 7 about sex, marriage, and divorce are in response to that. He has also learned—perhaps, but not necessarily, in the same letter—that the congregation is at odds over whether believers should refuse to eat meat that has been sacrificed to idols (chaps. 8–10) and over the relative importance of "spiritual gifts," especially speaking in tongues (chaps. 12–14). There seems also to have been some uncertainty about the collection of money that he had urged them to take up for the Jerusalem church (16:1–4).

Major Themes: Even though practical issues are uppermost in the apostle's mind as he writes this Letter, he approaches each of them on the basis of his understanding of the gospel of Christ. His thinking about this gospel and its implications is most apparent in an excursus (discussion) on the wisdom of the cross (1:18–2:16), a portrayal of the Christian community as Christ's body (12:4–13:13), and a discourse on hope and resurrection (chap. 15).

Paul argues, first, that in the apparent foolishness and weakness of the cross, the world's understanding of wisdom and power has been turned completely upside down. In Hellenistic society, generally, wisdom and power were closely identified with the attainment of wealth and a high social status. Within the Corinthian church, this seems to have taken the form of boasting about one's special religious status, and thus about one's spiritual wisdom and power. In opposition to this, Paul reminds his congregation that God's power and wisdom have been disclosed in the cross, which represents the laying aside of all claims to status (1:18–25; 2:1–5), and that in their belonging to the crucified Christ, they have become the recipients of true life and salvation (1:18–31). Second, Paul insists that to belong to Christ is to belong to a believing community that has been formed in the Spirit (12:12–13; cf. 2:12) and is continually being built up by and in God's love (chap. 13; cf. 8:1–3). He argues, finally, that a truly believing community lives not only out of faith and in love, but also with a sure hope that God's purpose will prevail, that the powers of sin and death will at last be defeated, and that ultimately God will be "all in all" (chap. 15).

The various appeals, counsels, and directives in this Letter represent Paul's view of how "the mind of Christ" (2:16) should be informing and guiding his readers, both in their conduct within the church and in their dealings with the world. Because "the present form of this world is passing away," all social institutions and worldly relationships have only passing importance (7:29–31, NRSV). This does not render them meaningless or matters of indifference, however, because "all things" are from God (8:6; 11:12) and are destined, finally, to be subjected to God through Christ (15:28).

Paul's summons to "remain with God," whatever the particular circumstances of one's life (7:17–24), derives from his conviction that the present no less than the future belongs to God (3:21–23), that in Christ believers are both graced with and claimed for a new way of life (e.g., 6:9–11; 14:20), and that finally everyone is accountable to God (e.g., 3:10–17). Rather than continuing in their presumptuous quest for some special wisdom about God, the Corinthians are to respond in kind to the love that constitutes God's own prior "knowledge" of them (8:2–3; cf. 13:12), and that is also the saving power of the cross and the energy that "builds up" the believing community in Christ (8:1; 10:23; chap. 14). Indeed, all of the more specific counsels and directives of this Letter are aptly summarized in the most important of Paul's closing appeals: "Let all that you do be done in love" (16:14). ***See also*** Apollos; Church; Contribution for the Saints; Corinth; Corinthians, The Second Letter of Paul to the; Cross; Food Offered to Idols; Fornication; Gnosticism; Knowledge; Lord's Supper, The; Love; Marriage; Paul; Resurrection; Spiritual Gifts; Tongues, Speaking with; Wisdom; Worship.

OUTLINE OF CONTENTS

The First Letter of Paul to the Corinthians

- I. Epistolary prescript (1:1–3)
- II. Thanksgiving (1:4–9)
- III. Appeals, counsels, instruction (1:10–15:58)
  - A. Appeals for unity (1:10–4:21)
    1. Initial appeal (1:10–17)
    2. Excursus: the wisdom of the cross (1:18–2:16)
    3. Continuation of appeal (3:1–4:5)
    4. Conclusion of appeal (4:6–21)
  - B. Counsels about the church in the world (5:1–11:1)
    1. An incestuous man (5:1–13)
    2. Going to pagan courts (6:1–11)
    3. Going to prostitutes (6:12–20)
    4. Sex, marriage, and divorce (7:1–40)
    5. Meat from pagan rites (8:1–11:1)
  - C. Counsels about life within the church (11:2–14:40)
    1. Introduction (11:2)
    2. The hair of men and women who pray or prophesy (11:3–16)
    3. Disorders at the Lord's Supper (11:17–34)
    4. Spiritual gifts (12:1–14:40)
  - D. Instruction about the resurrection of the dead (15:1–58)
    1. The tradition (15:1–11)
    2. Christ, the first fruits (15:12–34)
    3. The resurrection body (15:35–57)
    4. Conclusion (15:58)
- IV. Epistolary closing (16:1–24)
  - A. The collection and various itineraries (16:1–12)
  - B. Summary appeals, final counsels (16:13–18)
  - C. Greetings, autograph subscript, benediction (16:19–24)

Corinthians, the Second Letter of Paul to the, one of two canonical Letters addressed to Corinth, although it may be a composite of two or more letters or parts thereof. The church in Corinth and the two earliest letters Paul is known to have addressed to it are discussed in the article on 1 Corinthians. The correspondence with the congregation represented by 2 Corinthians is of somewhat later date.

The "Tearful Letter": In 2 Corinthians 2 and 7 Paul refers to an earlier letter he had dispatched to Corinth, written "out of much distress and anguish of heart and with many tears" (2:4, NRSV). The apostle explains that he had chosen to send it rather than to make another personal visit, which he feared would have turned out like the last one—painful for all parties concerned (2:1–3). The traditional view is that 1 Corinthians was that "tearful letter," but there are serious difficulties with this identification. First, since 1 Corinthians seems to presuppose no presence of Paul in Corinth other than during his initial period of evangelization there, the "painful visit" referred to in 2 Cor. 2:1 would have to be the visit on which he made his first converts and established a Christian congregation, which is unlikely. Second, if 1 Corinthians is the "tearful letter," then the errant brother with whose case that letter was concerned (see 2 Cor. 2:5–11; 7:8–12) would have to be the incestuous man mentioned in 1 Cor. 5:1–5. Yet there is no convincing way to reconcile Paul's instructions about that man with his instructions about the brother who is in view in 2 Cor. 2:5–11. As a result, many interpreters hypothesize that the "painful visit" to Corinth mentioned in 2:1 had taken place sometime between the writing of 1 and 2 Corinthians. Then on returning, it is argued, a discouraged Paul sent off the "tearful letter" to his congregation, sharply criticizing it for failing to discipline a brother with whom, apparently, Paul himself had been in some kind of serious confrontation. Unless an early editor of the Corinthian correspondence incorporated part (or most) of the "tearful letter" into canonical 2 Corinthians (discussed below), it—like the "previous letter" mentioned in 1 Cor. 5:9–11—no longer survives.

Authenticity and Literary Integrity: The authenticity of 2 Corinthians, taken as a whole, is not seriously in doubt, but many scholars believe that there are good reasons to regard 2 Cor. 6:14–7:1 as a later, non-Pauline addition to the text. For example, the passage seems to disrupt an otherwise clear flow of thought from 6:11–13 to 7:2–3 (or 7:4). A number of words in the passage are found nowhere else in the Letters of undisputed Pauline authorship, or else are used very differently in those other Letters. Also, several of the most important ideas of the passage (e.g., the exhortations to separate oneself from unbelievers and to cleanse oneself "from every defilement of body and of spirit") are hardly compatible with Pauline thought as it is known from authentic materials. And finally there are numerous parallels between this passage and the Dead Sea Scrolls, which originated

within a Jewish sectarian movement at Qumran about two hundred years before Paul. It is not clear why anyone would have wanted to add this material to a letter of Paul—or why Paul himself would have incorporated some preformulated material into it as he wrote, as a few have suggested. Yet these problems do not lessen the seriousness of the difficulties faced by those who defend the authenticity of the passage.

A broader and more fundamental question about 2 Corinthians is whether, as it stands, it is a composite of two or more originally separate Pauline letters to Corinth. There is considerable evidence to suggest that this is the case, including the following general points. First, chaps. 1–9 do not entirely cohere with chaps. 10–13 in either form or content. While in chaps. 1–9 Paul seems generally confident about his readers and his mood is conciliatory, in chaps. 10–13 he is clearly upset and does not hesitate to criticize and threaten them. Moreover, as he writes chaps. 1–9 he seeks to explain why his plans for a visit had to be canceled, but as he writes chaps. 10–13 he is on the verge of another visit. Again, one would not expect the appeal on behalf of his collection for Jerusalem (chaps. 8–9) to be followed immediately by the kind of impassioned invective one finds in chaps. 10–13. Second, since chaps. 8 and 9, both devoted to the matter of the collection, can be read independently, some scholars doubt whether these chapters would have stood in the same letter. Third, if the long discussion of apostleship in 2:14–7:4 were removed from its present position, then the references to Titus and to Paul's journey into Macedonia (2:12–13) would connect up meaningfully with 7:5–16, where the apostle describes his meeting with Titus in Macedonia.

One widely held partition theory finds parts of four or five letters in 2 Corinthians, identifying 2:14–7:4 (excluding 6:14–7:1) as the earliest, chaps. 10–13 as the second, and 1:1–2:13 + 7:5–16 as the third. Some include chap. 8 with the third, while others hold that chaps. 8 and 9 are two independent letters, written about the same time as the third. In addition, certain scholars who accept 6:14–7:1 as authentic regard this paragraph as part of the "previous letter" referred to in 1 Cor. 5:9–11. A division of canonical 2 Corinthians into at least two originally distinct letters, represented by chaps. 1–9 and 10–13 respectively, does indeed seem warranted, whatever one thinks about the alleged redundancy of chaps. 8 and 9. However, there are serious difficulties with the identification of chaps. 10–13 as part of the "tearful letter," and some very good reasons for regarding these chapters as written after the letter(s) represented by chaps. 1–9. Only a relatively few scholars continue to defend the noncomposite nature of the entire Letter.

Occasion(s) and Purpose(s): Assuming, with a number of interpreters, that 2 Corinthians is a composite of two originally separate letters, the earlier represented by chaps. 1–9 and the later by chaps. 10–13, one must take account of two distinct occasions for writing. Chaps. 1–9 were sent from Macedonia (perhaps Philippi) not long after Paul had been met there by Titus, who was on the way back from Corinth with generally encouraging news about the congregation (7:5–7). Chaps. 10–13, also sent from Macedonia, were written shortly after Paul's receipt of some alarming news about the congregation and not long before his own departure for a third visit to the city (e.g., 10:1–2; 12:14, 20–21; 13:1–2). Chaps. 1–9 may be dated tentatively in the summer or fall of 55, and chaps. 10–13 about one year later.

The letter represented by chaps. 1–9 was written to assure the Corinthians of their apostle's continuing care for them, despite his "tearful letter" that had upset them, and despite his apparent wavering in the matter of a promised return visit (1:12–2:13); to clarify the apostolic commission he had sought to carry out in his dealing with them (2:14–5:19); and to appeal to them on behalf of his gospel, his ministry, and his collection for the church in Jerusalem (5:20–9:15). The letter represented by chaps. 10–13 was written to warn and admonish the Corinthian congregation in advance of Paul's forthcoming visit (see esp. 13:10). Certain rival apostles, left unnamed, had intruded themselves and their teachings into the congregation, seeking to displace Paul and his gospel. Chaps. 10–13 are dominated by Paul's attack on these intruders, whom he describes as "false apostles, deceitful workers," and ministers of Satan in disguise (11:13–15, NRSV).

Those who divide 2 Corinthians into four or five separate letters ordinarily regard 2:14–7:4 (excluding 6:14–7:1) as the earliest of these, written by Paul—sometime after 1 Corinthians—in order to defend his apostleship. Most proponents of this view then identify chaps. 10–13 as the "tearful letter," attribute 1:1–2:13; 7:5–16; and chap. 8 to a "letter of reconciliation," and regard chap. 9 (sometimes also chap. 8) as a separate letter written on behalf of the collection.

Theme: The theme that pervades the whole of 2 Corinthians, however many letters be represented here, is the meaning of Christian ministry in general. Throughout, Paul emphasizes that Christian ministry is the service of the gospel of God's reconciling love as present in Christ (see esp. 5:11–19) and that ministers are made adequate for this service by God alone (2:14–3:6). Against the rival apostles who would have the Corinthians believe otherwise, Paul insists that special religious knowledge, ecstatic experiences, or miraculous powers do not certify one as a true apostle. The important

OUTLINE OF CONTENTS

The Second Letter of Paul to the Corinthians

If 2 Corinthians is a composite of two or more originally separate letters, then its present structure is due to the work of some early editor. As it stands in its present form, however, it may be outlined as follows:

I. Epistolary prescript (1:1–2)
II. Blessing (1:3–11)
III. Assurances, instruction, warnings (1:12–13:10)
   A. Assurances of concern (1:12–2:13)
      1. Introduction (1:12–14)
      2. A canceled visit (1:15–2:2)
      3. A tearful letter (2:3–11)
      4. A trip to Macedonia (2:12–13)
   B. Comments on apostolic service (2:14–5:19)
      1. Introduction (2:14–3:6)
      2. The ministry of the new covenant (3:7–4:6)
      3. The ministry and mortality (4:7–5:10)
      4. The ministry of reconciliation (5:11–19)
   C. Various appeals and warnings (5:20–9:15)
      1. About reconciliation with God (5:20–6:10)
      2. About reconciliation with the Pauline apostolate (6:11–7:3)
      3. About the collection for Jerusalem (7:4–9:15)
   D. Warnings about false apostles (10:1–13:10)
      1. A call for obedience and understanding (10:1–18)
      2. "A fool's speech" (11:1–12:13)
      3. Warnings in advance of a visit (12:14–13:10)
IV. Epistolary closing (13:11–13)
   A. Summary appeals (13:11)
   B. Greetings (13:12)
   C. Benediction (13:13)

question is whether, in one's serving of the gospel, the saving death and resurrection life of Jesus are evident (see esp. 4:10–12). For this reason, Paul repeatedly lists the hardships he has experienced as an apostle (4:8–9; 6:4b–5; 11:23b–29; 12:10), not in order to boast of the strength with which he has endured them, but in order to "boast" of his weaknesses (the "fool's speech," 11:1–12:13) and thus of the transcendent power of God (see esp. 4:7; 13:4). ***See also*** Contribution for the Saints; Corinth; Corinthians, The First Letter of Paul to the; Minister; Paul; Reconciliation; Scrolls, The Dead Sea.

V.P.F.

cormorant, any of about thirty species of birds that live near water and feed mainly on fish. It is listed among birds prohibited as food (Lev. 11:17; Deut. 14:17) for the Jews. In Isa. 34:11 the KJV uses it for a term the RSV translates "hawk." The KJV also uses it for an uncertain reading in Zeph. 2:14 (RSV: "vulture").

corn, a term used generically in the KJV and NEB for cereal crops in the OT (RSV: "grain"). An ancient poem designates the Promised Land a place of "corn and new wine" (Deut. 33:28). The noun phrase "corn, new wine, and oil" occurs frequently in the OT and denotes the range of native agricultural produce: cereal farming, viticulture, and olive cultivation.

The development of cereal agriculture antedated the settlement of Israel's tribes (beginning in the thirteenth century B.C.). Israel inherited from Canaan the techniques of farming and a cycle of agricultural festivals: Unleavened Bread; Weeks (Pentecost); and Ingathering (Tabernacles). ***See also*** Pentecost; Tabernacles, Festival of; Unleavened Bread, Feast of the. R.M.G.

Cornelius (kor-neel´yuhs), a Roman centurion stationed in Caesarea. The story of his conversion to Christianity is told at length in Acts 10 and the conversion is defended by Peter in Acts 11:1–18. A further allusion to him is made in Acts 15:5–7. The repetition of his story indicates his significance for Acts as the model Gentile convert. Before his conversion, Cornelius was apparently associated with the synagogue as a "god-fearer." He gave alms and dedicated himself to prayer. While he and his friends listened to Peter present the gospel, the Holy Spirit came upon them. For the writer of Acts, this was divine attestation that Gentiles should be accepted into the Christian community on the same basis (i.e., faith) as Jewish converts. It is significant that, in Acts, it is Peter who opens the door of faith to the Gentiles, but he does so only after having received a vision from God. ***See also*** Caesarea; Gentile; Peter. A.J.M.

cornerstone, most often the large stone placed in the foundation at the principal corner of a building but occasionally (e.g., *Testament of Solomon* 22:7–23:4 [ca. A.D. 200]) the top or final stone of a building. Most biblical occurrences of this term are metaphorical. Job

38:6, for example, imagines God as creator laying a cornerstone upon which to "construct" the world. The cornerstone of Ps. 118:22 is either Israel or its king, rejected as "insignificant" by the nations but exalted by God. In Isa. 28:16 God lays a cornerstone in Zion. This much debated image possibly refers to God's announcement of salvation or to the faith of the renewed Israel. *Targum Jonathan* (Christian era) interprets the "cornerstone" of this text as a king. In the NT both Ps. 118:22 and Isa. 28:16 are applied to Jesus as Messiah (Matt. 21:42; Mark 12:10; Luke 20:17 [Ps. 118:22 used in a saying of Jesus]; Acts 4:11; Rom. 9:33; Eph. 2:20; and 1 Pet. 2:4–8). The passages from Romans and 1 Peter (also Luke 20:18?) allude as well to the "stone of stumbling" of Isa. 8:14, and the various authors may have drawn this "stone" imagery from an early Christian biblical testimony collection not unlike the Qumran text *4Q Florilegium*. R.A.W.

Cornerstone of an unfinished house from the time of the Israelite king Omri, ca. 885–873 B.C.

cornet, a term used by the KJV (RSV: "horn") to translate the Hebrew *qeren* (Dan. 3:5, 7, 10, 15) and *shophar* (1 Chron. 15:28; 2 Chron. 15:14; Ps. 98:6; Hos. 5:8). In 2 Sam. 6:5 the KJV has "cornets" for a different word better translated "castanets," as in the RSV.

Cos (kohs), an island with a city of the same name in the Aegean Sea, southwest of Asia Minor, where Paul spent one night on his final journey to Jerusalem (Acts 21:1). Known for its ointment, purple dye, and excellent wine, it was a major shipping port. Under Ptolemaic rule in the third century B.C., it developed an outstanding library. Several Ptolemaic princes were educated there.

A cult of Asklepios as well as hot springs probably influenced Hippocrates, the father of medicine, to found a medical school on Cos. It was a Coan physician who convinced Claudius to grant Cos immunity from taxation.

Because it was an important Jewish center (1 Macc. 15:23), Herod the Great gave large sums for building purposes. A dedicatory statue to his son has also been found there. D.R.E.

cosmetics, any of a number of products used to dress the hair or beautify the skin. Cosmetics were used by men and women throughout the ancient Near East, although Egyptian paintings and objects illuminate this practice best. The Egyptians, as well as other nations, imported a variety of cosmetics, balms, gums, and myrrh from Palestine (Gen. 43:11; Ezek. 27:17). The most common cosmetics were kohl, henna, rouge, powder, ointments, and perfumes. Kohl was used to line the eyes in black, so clearly illustrated in Egyptian paintings. It appears to have served as protection against light reflected from the bright sun as well as to beautify the eyes. In Israel, women who "painted their eyes" were not held in high regard (2 Kings 9:30; Jer. 4:30; Ezek. 23:40). Henna was used for dying the hair and also for painting the toenails and fingernails. Archaeological finds corroborate the importance of cosmetics in daily life: cosmetic palettes, kohl tubes and sticks, spoons, rods, rouge pots, hairpins, combs, cosmetic dishes, tweezers, ear picks, and mirrors have all been found. S.L.R.

couch. *See* Bed.

coulter. *See* Plowshare.

council, the English translation given in some contexts to the Greek word *synedrion*. In the kind of ancient villages or ethnic communities described in the biblical materials, rules were often made and enforced by a council of community leaders and elders. The Gospels occasionally refer to local councils that render justice (Matt. 5:22) or persecute Christians (Matt. 10:17; Mark 13:9). Paul speaks of a council of elders (Acts 22:5); most other references are to the Sanhedrin of chief priests and leaders in Jerusalem. ***See also*** Sanhedrin.

counsel, advice, human or divine. The city of Abel had a reputation for sound counsel (2 Sam. 20:18). Although private individuals gave advice, professional advisors also existed. They included diviners like Balaam, courtiers (Joseph, Daniel), parents, and teachers. In wisdom literature, the word for counsel became a technical term (Jer. 18:18; Prov. 8:14).

counselor, an advisor to kings. David's court had two counselors, Ahithophel and Hushai. Ahithophel's advice was likened to an oracle from heaven, but even that could not stand when the deity interfered. Disgraced, Ahithophel committed suicide. Late OT texts mention seven counselors of Artaxerxes (Ezra. 7:14) and counselors to the king (Dan. 3:24, 27).

Royal ritual gave birth to messianic hope concerning a wondrous counselor (Isa. 9:6).

courage, the resolve to meet danger with strength, daring, and confidence; it is manifested by Israel's "men of valor" (or "men of courage," Josh. 1:14; 8:3). Other expressions for courage are found in the OT (e.g., Deut. 31:7; Josh. 2:11; 1 Sam. 17:32; 2 Sam. 10:12; Dan. 11:25) and in the NT (Acts 28:15; Phil. 1:20). Christians are summoned to courage on the basis of Christ's victory over death and worldly powers (John 16:33; Acts 23:11; 2 Cor. 5:6, 8).

covenant (Heb. *berith*), a formal agreement or treaty between two parties with each assuming some obligation. In the Hebrew Bible, a covenant might be a pact of mutuality concerning individuals, such as Laban and Jacob (Gen. 31:44–54) or David and Jonathan (1 Sam. 18:3; 23:18); states or other political units, such as Abraham and the Amorites (Gen. 14:13), Abraham and Abimelech, king of Gerar (Gen. 21:22–32), Abner and David (2 Sam. 3:12–13, 21), David and the people (2 Sam. 5:3), Solomon and Hiram (1 Kings 5:26), and Asa and Ben-hadad (1 Kings 15:18–19); husband and wife (cf. Mal. 2:14; Ezek. 16:8).

A covenant also might be imposed by a greater power upon a lesser one. The greater power demands loyalty and obligates itself to the protection of the lesser one, such as Israel and the Gibeonites (Josh. 9) and the request by Jabesh-gilead of the king of Ammon (1 Sam. 11:1–2). The vast majority of the references to covenant in the Bible are to such a treaty—the covenant that God makes with Israel at Sinai. This covenant must be understood on the basis of political and judicial categories.

The Sinai Covenant: The framework of the Sinai Covenant has significant affinities with suzerain-vassal treaties from the ancient Near East, specifically, the Hittite treaties of the fourteenth and thirteenth centuries B.C. and the Assyrian treaties of the seventh and sixth centuries B.C. In these documents a suzerain makes a treaty with a lesser kingship. The main elements of the Hittite treaty, for example, are: the identification of the treaty-maker (i.e., the great king); a historical introduction (prior beneficial acts done by the great power on behalf of the smaller one); the stipulations (the primary demand is for loyalty); a list of divine witnesses; and blessings and curses. The treaty was recited, a ceremonial meal eaten, and the treaty deposited at the feet of the idol.

The narrative concerning the Sinai Covenant in Exod. 19–24 has similar elements: the identification of God and his saving acts for Israel (Exod. 19:4–6; 20:2); the stipulations (Exod. 20:3–23:33); the treaty recital (Exod. 24:7); and the ceremonial meal (Exod. 24:9–11). The other elements appear particularly in Deuteronomy. The deposit of the treaty in the Ark of the Covenant is mentioned in Exod. 25:16; 40:21; Deut. 10:1–5; and 31:25–26 (the Ark elsewhere is called the footstool of God, Pss. 99:5; 132:7–8; 1 Chron. 28:2). Witnesses appear in the form of "heaven and earth" (Deut. 4:26; 30:19; 31:28), in "this book of the Torah" (Deut. 31:26), and the "Song of Moses" (Deut. 31:19, 21). Blessings and curses are listed in Leviticus 26 and Deut. 27:11–28:68 (cf. 29:17–27). This political structure emphasizes the seriousness of the relationship between God and Israel and ipso facto eliminates the possibility of foreign alliances (e.g., Isa. 31:1–3; Jer. 2:18, 36).

The judicial element of the Sinai Covenant is manifested in the stipulations, which are the law of the nation. Now, any crime committed is against God, whether it be ritual or civil. Israel is apparently unique in its perception that all its law is divinely given.

A further social element contained in the Sinai Covenant is the familial one. The Israelites are called God's children in Deut. 14:1 (see also Exod. 4:22 and Deut. 32:9–12, 18 with Exod. 19:4). Furthermore, the stipulations and even the covenant are called *Torah* (Deut. 31:25–26), which originally means "teaching" or "instruction." Within the context of the covenant it is equivalent to law, but if Proverbs (e.g., 3:1; 4:2; 7:2) uses *torah* in its original social context—as parent instructing child—then its usage in the covenant may suggest the analogy of God instructing Israel.

Covenants with Abraham and David: The Sinai Covenant is depicted as conditional; Israel must keep the stipulations (familial, societal, dietary, ritual, agricultural, etc.) or suffer severe punishment. The two other primary divine covenants, those with Abraham (Gen. 15) and David (2 Sam. 7; Ps. 89:1–38), were originally perceived as unconditional. These two covenants are patterned after the promissory royal grant of the ancient Near East as, also, attested in Hittite and Assyrian documents. Under this kind of covenant, fiefs are granted to loyal servants by the king and require no further action on behalf of the grantee. Gen. 17:1–14 does demand circumcision of Abraham and his descendants, but this is only a sign of the covenant, and therefore of a loyalty that is to be expected.

The Davidic covenant assures David of a permanent dynasty in which the Davidic king is depicted metaphorically as the son of God (2 Sam. 7:14; Pss. 2:7–8; 89:27–28) in terminology reminiscent of other ancient Near Eastern documents. There is, however, a tendency to view the Davidic covenant as conditional and dependent on obedience to the Sinai Covenant (1 Kings 2:4; 8:25; 9:4–9; Ps. 132:12). This view was that of the minority and reflects the ideology of the editor of 1 and 2 Kings.

The Davidic covenant captivated the popular imagination, which saw in it a promise of permanent security in the continued stability of government, worship (centered in the Temple), and life

Treaty between Esarhaddon of Assyria and Ramataia, a Medean vassal king (672 B.C.). A typical suzerain-vassal treaty of the ancient Near East, it ends with a sequence of curses against treaty violators and has affinities with the Sinai Covenant.

of the people. As such, it ran contrary to the conditionality of the Sinai Covenant taught in the Pentateuch and understood by the prophets as dominant. The prophets did believe in the ultimate validity of the Davidic covenant, though, as expressed in their prophecies of messianic expectation.

Obedience to the stipulations of the Sinai Covenant was perceived by the prophets as necessary for the continued existence of Israel on its land. The covenant, in its strict sense of a suzerain-vassal treaty, did not, however, totally define the relationship between God and Israel. It only served as a prevalent image of that relationship. When Israel broke the covenant, therefore, the relationship was not destroyed. According to the prophets, the relationship was permanent and the breaking of the covenant once it had taken place was viewed only as a momentary setback. Thus, Jer. 31:27–37 (building upon Hos. 2) predicts the people's return, growth, and prosperity followed by God's establishing a new covenant with Israel. The uniqueness of this covenant lies not in its content, which is identical to the Sinai Covenant (the Torah, v. 33), but in its form—it will be given internally. The covenant will become part of the nature of each individual, so that obedience is guaranteed (v. 34). Thus, it is unbreakable, and its eternality is assured (vv. 35–37; cf. Jer. 32:36–44). Thereby, Jeremiah was able to depict a future in which by an act of God's mercy, sin, the lack of repentance, and the consequent catastrophic punishment would no longer exist.

In the NT: NT authors, influenced by the idea of a new covenant, saw in the death of Jesus of Nazareth the beginning of it (Mark 14:24; 1 Cor. 11:25) and saw his followers as members of that new covenant (cf. 2 Cor. 3:6), although that did not annul the first covenant given to Israel (Luke 1:72; Acts 3:25; Gal. 3:17). The Letter to the Hebrews makes the greatest use of covenant language in the NT (e.g., Heb. 7:22; 8:8–13; 9:15; 12:24). ***See also*** Abraham; David; Sinai; Torah.

craftsman, a smith or carpenter whose work is mentioned with the building of the Temple and often in idol making (Acts 19:24; Isa. 40:19 ["workman"]; 44:12; Neh. 3:8; 1 Kings 7:14). ***See also*** Refining; Smith; Tubal-cain.

crane, a bird of the *Gruidae* family of the *Gruiformes* order. Cranes are tall wading birds similar in appearance to herons. Isa. 38:14 indicates its noisy character, although the Hebrew is uncertain. Jer. 8:7, similarly uncertain, focuses on its nesting habits.

creation, the act of God by which the universe came into being. The Bible's chief account of creation is that in Gen. 1:1–2:3 (or 2:4a). This text is generally attributed to a sixth-century B.C. Priestly author (P), who radically changed (demythologized) the origin of the cosmos depicted in the poetic accounts current in the ancient Near East (esp. the Ugaritic Baal epic and Babylonian *Enuma Elish*). Instead of divine combat and struggle with a willful primordial matter—motifs otherwise abundant in biblical poetry—we find a

The creation story as depicted in a thirteenth-century mosaic from the dome of St. Mark's Basilica, Venice. The inner circle portrays the creation of light and dark; the next, that of the seas, plants, animals, and Adam; the outer circle (partial view) shows the expulsion from paradise.

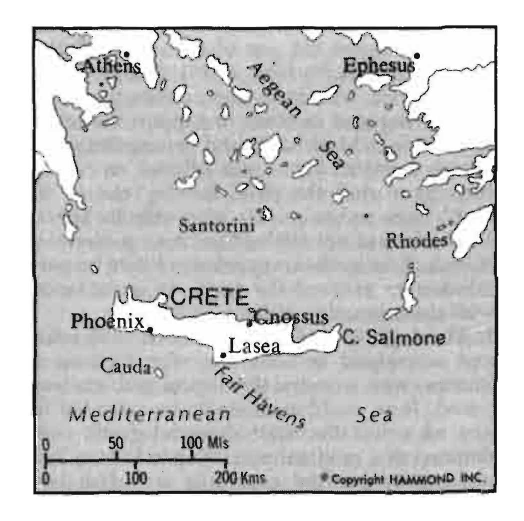
sole, sovereign master of the universe directing the work of creation by verbal command and a freely determined plan. God is here shown making the world in six days and resting on the seventh (cf. Exod. 20:11).

On the first day God created light and darkness, night and day; on the second, the firmament separating earthly and heavenly waters; on the third, dry land and vegetation; on the fourth, the heavenly luminaries of the sun ("greater luminary") for ruling the day and the moon (chief "lesser luminary") for ruling the night; on the fifth, sea creatures and birds; and on the sixth, land creatures and humans. The first three days present frameworks of the cosmos, the last three their respective inhabitants. God names the works of the first three days, the humans presumably (cf. 2:19–20) the rest.

The creation story's verbal structure is artful. The verb "created" (Heb. *bara'*) appears in poetic parallel to the verb "made" (Heb. *'asah*) in 2:4 (the verse's two halves are usually ascribed to separate authors), and the two alternate throughout 1:1–2:3: "created" generally on odd-numbered days (1:1, 21), "made" generally on even-numbered (1:7, 16, 25); both are together in the creation of man and woman (1:26–27) and sanctification of the Sabbath (2:3). Creation by verbal command occurs throughout the six days but seems to alternate with more physical and artisanlike depictions reflecting older poetic conceptions about divine activities.

The first half of the Garden story (Gen. 2) presents another, probably older, view of creation. The order of creation is here reversed: man appears first (2:7), plants and animals later (19–20). Woman is created separately (2:22), instead of simultaneously with the male as in 1:26–27. Whereas 1:26–28 places humans as rulers over earthly creation (cf. Ps. 8:5–9), 2:15–17 makes man a cloistered servant of divinity, assigned menial labors and token responsibilities—though the underlying story is probably one of royal investiture.

Canaanite and Babylonian creation accounts, often associated with New Year festivals, depicted a divine struggle with primordial foes, culminating in the protagonist's victory, triumphal procession, enthronement, promulgation of law, and dedication of a sanctuary. Often, as in Marduk's battle (*Enuma Elish* 4. 28ff.) with Tiamat (cf. Heb. *Tehom*, "the Deep," Gen. 1:2), the protagonist struggles to contain and delimit primordial waters. Divine struggle with waters, victory over chaos, and cosmogonic promulgation of law/wisdom are found throughout biblical poetry (cf. Exod. 15; Isa. 40–42; 45; Heb. 3:8; Pss. 18; 19; 24; 29; 33; 68; 93; 95; 104; Prov. 8:22–33; Job 38–41), and are closely associated with God's saving actions on behalf of Israel and its leaders. Creation accounts also occur in apocryphal sources (2 Esd. 6; Ecclus. 43). Christian authors introduced the idea of Christ as mediator and agent of creation (e.g., Col. 1:15–16). In doing this they were drawing on earlier traditions that said that divine Wisdom was the agent of creation, a tradition that appears both in the OT (e.g., Prov. 8:25–27) and in apocryphal writings (e.g., Wisd. of Sol. 7:24–25; Ecclus. 24:3, 9). Jewish and Christian apocalyptic (esp. *1 Enoch;* Revelation) also project creation motifs onto end time. ***See also*** Firmament; Genesis. J.W.R.



creature, any animate being whose existence is dependent upon God (see Gen. 1:20, 24; Ps. 104:24; Rev. 5:13). Despite some translations of 2 Cor. 5:17, Paul's reference there is probably to "a new creation" inclusively, not specifically to "a new creature." ***See also*** Creation; Life; Soul.

creeping things, a general term for various forms of reptile, insect, or worm life. Gen. 1:24–26 uses it as a generic term. It is similarly used in the Flood story (Gen. 6:7, 20; 7:14, 23; 8:17,19). Such creatures are considered unclean (Lev. 22:5), but they join in praise of God (Ps. 148:10). They are associated with corruption and evil (Ezek. 8:10) and express awe at God's wrath (Ezek. 38:20), but they will participate in God's promised covenant (Hos. 2:18). It appears to be a general term for creatures that are neither birds, fish, nor wild or domesticated animals. R.S.B.

Crescens (kres´uhnz), a person who, when 2 Timothy was written, had left the writer for Galatia (Gaul?; 2 Tim. 4:10). Nothing more is known about him.

Crete (kreet; Caphtor in the OT), the fifth largest Mediterranean island, 152 miles long (243 km.) from west to east, 7.5–35 miles wide (12–56 km.) and 3,189 square miles in area (8,259 sq. km.). Crete forms the southern boundary of the Aegean Sea. While maintaining a resolute identity and culture of its own, its primary relationship is with Greece, rather than with Anatolia, Egypt, or the Levant, although there has been constant communication between them. Structurally related to the mountain ranges of the Peloponnesus and southwest Turkey, Crete is composed of four limestone massifs, reaching an altitude of 8,058 ft. (2,456 m.) in the center, almost that in the west, but only 4,757 ft. (1,450 m.) further east. In the south the mountains drop steeply into the sea, leaving little room for settlement, Kali Limenes (Gk., "Fair Havens," Acts 27:8) being the only good anchorage. The northern coast is less precipitous, with better harbors, and is consequently the most populated region.

The island has winter rainfall (about 20 inches [500 mm.] on the north coast) and heavy snow on the mountains. Summers are dry and hot, especially when the "Libyan wind" sweeps across from the Sahara to the south, but the mountains may have thunderstorms. Winter gales can be severe, especially on the south coast, where northeast winds can pour tempestuously down the steep mountainsides (Acts 27:14–15). The now bare highlands were once thickly clothed with oak, cypress, juniper, pine, and Spanish chestnut. Grapes, olives, barley, and oats have always been the main crops; today citrus is also grown. Sheep and goats are reared on the mountain slopes.

Crete was first settled between 6000 and 5000 B.C., and gradually the brilliant Bronze Age Minoan culture developed. Large palaces were first built around 2000, and, after a severe earthquake about 1700 B.C., the even more splendid "New Palace" culture arose, with superb frescoes and sculpture as well as intricate ceremonial activity and widespread trade throughout the Mediterranean. The language of this period was Greek, written in "Linear B" script, and by 1500 Mycenaean Greek was becoming dominant. About 1450 a disastrous earthquake, related to the gigantic eruption of the volcanic island of Santorini, initiated a cultural decline, and Crete thereafter acted as "middleman" in the development of Mediterranean culture rather than as leader.

Biblical references to Caphtor or Crete are few. The Israelites, who played no active role at all on the Mediterranean Sea, knew the remote island chiefly as the home of the Philistines (Deut. 2:23; Jer. 47:4; Amos 9:7; see also Gen. 10:14; 1 Chron. 1:12), part of the great movement of the "Sea Peoples." Among these Philistine immigrants were the Cherethites and Pelethites, who formed an important part of David's army (2 Sam. 8:18; 15:18; 20:23).

The Letter to Titus speaks of a visit to Crete by the apostle Paul. Paul subsequently left Titus in Crete "to amend what was defective and appoint elders" (Titus 1:5). His derogatory, and probably unjustified, quotation about the Cretans being "always liars, evil beasts, lazy gluttons" (cf. Titus 1:10) comes from the same poem of the Cretan poet Epimenides that Paul had quoted in Athens (Acts 17:28). ***See also*** Fair Havens; Pelethites; Philistines. D.B.

crimes and punishments. ***See*** Law.

Crispus (kris´puhs), according to Acts 18:8 the ruler of the synagogue in Corinth who became a Christian; he was baptized by Paul himself (1 Cor. 1:14). His conversion indicates that the Corinthian church was not entirely Gentile. ***See also*** Synagogue.

criticism, biblical. ***See*** Biblical Criticism.

cross (Gk. *stauros*), an ancient instrument of torture and execution. The use of an upright stake (also *stauros*) to display a corpse or to torture or execute a person was widespread in the first millennium B.C., especially in times of war. Grisly spectacles involving the crucifixion of sometimes hundreds or even thousands of victims were arranged for the intimidation of besieged cities, the punishment of conquered peoples, or the deterrence of rebellious slaves or troops.

The OT does not mention the stake or cross as a mode of execution, but it does refer to the practice of displaying the corpse of an executed person "on a tree" to signify that such a person was accursed by God (Deut. 21:22–23). This text is applied in several Qumran documents to the act

Crosses: (*left to right, top*) Greek; St. Andrew's; St. Anthony's; (*bottom*) Latin; Celtic; Slavic or Russian.

of crucifixion itself, and the Qumran community seems to have used this extreme form of punishment. It was also used by Alexander Jannaeus, a Hasmonean king and high priest (103–76 B.C.) noted for his brutality, who crucified in a single day eight hundred Jews who had rebelled against him. Crucifixion is most closely associated, however, with the period of Roman rule. Though the Romans continued the wartime use of mass crucifixions, they also used it as a form of punishment for individuals accused of particularly heinous crimes (e.g., high treason and violent robbery) and for certain classes of people, especially non-Romans and slaves.

The procedure was subject to wide variation, especially under wartime conditions. The upright stake continued to be used, but frequently a crossbar was added across the top of the stake forming a T (later known as the Tau, or St. Anthony's cross). Condemned persons were nailed or tied to the stake or crossbar, sometimes upside down, sometimes with other sadistic touches added at the executioner's whim. When the object was punishment for individual crimes, several features became fairly standard. The procedure included a flogging, and the victim was usually paraded to the site of execution wearing around the neck a wooden placard proclaiming the crime. The condemned person also carried the crossbar, not the whole cross, to the place of execution, where the upright stake was already in place. Because deterrence was a primary objective, the cross was always erected in a public place. The prisoner was stripped and affixed to the crossbar with nails through the forearms or with ropes. The crossbar was then raised and attached to the upright stake and the victim's feet were tied or nailed to the stake. The weight of the hanging body made breathing difficult, and death came from gradual asphyxiation, usually after a few hours. To prolong the death and thus increase the agony, a small wooden block was sometimes attached to the stake beneath the buttocks or feet to provide some support for the body. Then death came only after several days and resulted from the cumulative impact of thirst, hunger, exhaustion, exposure, and the traumatic effects of the scourging. After death, the body was usually left hanging on the cross. Because of the protracted suffering and the utter degradation of this manner of execution, it was viewed by the Romans as the supreme penalty, the "most wretched of deaths" (Josephus).

Though thousands of persons were put to death in this way, the remains of only one crucified individual have been found, those of a young male Jew named Yehohanan who died in the first century A.D. and was buried northeast of Jerusalem in an area called *Giv'at ha-Mivtar.* The physical evidence from his skeleton is scanty—one heel bone (possibly two) penetrated by a nail and scratches (perhaps from a nail) on the bones of his forearm—and lends itself to various reconstructions of the details of this particular execution.

The Crucifixion of Jesus: Jesus' crucifixion is described in Matthew 27, Mark 15, Luke 23, and John 19. According to these accounts, it was decreed by the Roman prefect (Pilate), who alone had the authority to order this form of execution. The wording on the placard ("The King of the Jews") indicates that the crime for which Jesus was condemned was not the Sanhedrin's charge of blasphemy but the political crime of high treason, probably arising from messianic claims that seemed to pose a threat to Caesar's sovereignty. Jesus was flogged and led away to a place outside the city called Golgotha, an Aramaic word meaning "Skull." According to the Synoptics, a bystander named Simon from the North African city of Cyrene was compelled to carry his cross. Two of the Gospels suggest the use of nails through the hands (Luke 24:39; John 20:25), though it was the forearms, with their larger bones, that were usually impaled in order to support the body. According to Mark 15:23 and corresponding to Jewish custom, Jesus was offered an opiate (myrrh) to dull the pain, but he rejected it. Death came rather quickly, after only six hours. His body was not left on the cross; a disciple, Joseph of Arimathea, appealed to Pilate for permission to remove the body, in accordance with the injunction of Deut. 21:23.

In Theology: When Christians hailed as Messiah and worshiped as Lord one who died on a Roman cross, a central theological problem was posed. How could such status be accorded to one who died the most shameful death, condemned as a criminal according to Roman law and cursed by God according to Jewish law (Deut. 21:23)? Paul's Letters reveal how foolish and scandalous this seemed to both Jews and Gentiles (1 Cor. 1:23). Instead of trying to remove the "offense of the cross" (Gal. 5:11), however, Paul claimed it as a source of boasting (Gal. 6:14) and developed from it a rich theology.

The cross was a source of boasting because God acted through it, and in doing so God rendered a judgment on the wisdom of the world, which viewed the Christian message about the cross as utter folly (1 Cor. 1:18–31). Paul also viewed the cross as God's eschatological event that marked the end of the old age and the beginning of a new creation (Gal. 6:14–15). The cross is thus a symbol and means of transformed human existence. When believers are united with Christ through faith and baptism, they share in his crucifixion. Through this co-crucifixion, they are set free from the powers that controlled their former lives—law and sin—and are empowered for new lives of grace (Gal. 2:19–21; Rom. 6:1–6).

The cross is thus the ultimate symbol of God's love (Rom. 5:8) and at the same time it is the ultimate symbol of Christ's obedience (Phil. 2:8). As such, it becomes a model for Christian existence, which is to be characterized by other-regarding love (cf. Phil. 3:18). In the synoptic Gospels, Christian discipleship is defined as "taking up one's cross" to follow Jesus through denial of self and service for others (Matt. 10:38; Mark 8:34; Luke 9:23). John's Gospel, on the other hand, uses double entendre to link the raising of Jesus on the cross with his resurrection and exaltation (John 12:32). ***See also*** Blasphemy; Calvary; Joseph; Messiah; Pilate, Pontius; Sanhedrin; Trial of Jesus, The.

crown, the translation for several Hebrew and Greek words designating special headpieces worn in biblical times. Among all items of apparel, a person's headgear was perhaps most significant in designating social, religious, and/or political status. The different words for "crown" probably reflect important nuances in the official, royal, or priestly position of those wearing such headdresses. Since crowns recovered from excavations or recognized on ancient monuments cannot be identified with the biblical terms, the specific characteristics of the words for "crown" remain unclear, although surely they represent such headpieces as circlets, diadems, turbans, and mitres, worn individually or in combination.

The most general Hebrew word for crown (*'atarah*) is found frequently in poetic contexts. Another term (*nezer*) tends to have priestly associations, though such a distinction is imprecise because royal and priestly authorities were often closely linked (cf. Zech. 6:11–14). A third term (*keter*) appears only in Esther; and a related term (*koteret*) has architectural significance and is usually translated "capital." In the KJV "crown" renders another architectural term (Heb. *zayr;* "molding" in the RSV; e.g., Exod. 25:11); and the top of the head (*kadkod*) also appears in English as "crown" (Job 2:7). In the NT the royal aspect is frequent in the use of Gk. *stephanos,* even when it denotes the "crown of thorns," but the word is also used to symbolize the final reward of faithful Christians (e.g. 2 Tim. 4:8; James 1:12; 1 Pet. 5:4; Rev. 2:10).

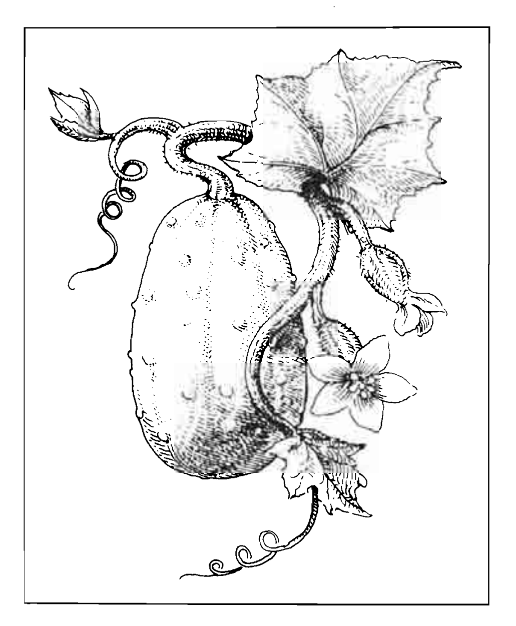
C.L.M.

crucible, a vessel, usually ceramic, employed for heating substances to high temperatures. It was used mainly for the refining of silver (Prov. 17:3; 27:21). It also designates the bottom of a small furnace where a bloom of metal gathers in the refining process. ***See also*** Refining; Silver; Smith.

crucifixion (kr*oo*'suh-fik'shuhn). ***See*** Cross; Jesus Christ.

cruse, a small oil jar. Mentioned in the story of the widow of Zarephath (1 Kings 17:12, 14, 16), such ceramic vessels are common in Iron Age archaeological finds.

crystal, a form of mineral with flat, symmetrical surfaces. The Greek word can mean ice or rock crystal, namely, pure silica or quartz in a transparent and colorless form (Rev. 4:6; 22:1; see also Job 28:17; Ezek 1:22).



cubit (ky*oo*'bit), the standard ancient Near Eastern linear measure. Theoretically it encompassed the distance from the elbow to the tip of the middle finger, about 17.5 to 20 inches. ***See also*** Weights and Measures.

cucumber (*Cucumis sativus*), the familiar cool, water-filled, slender, fleshy "fruit" growing on a vine. It was commonly cultivated in Egypt (Num. 11:5) and Palestine as a staple of the diet. During the growing season, in order to discourage theft, the cucumber fields were guarded (Isa. 1:8).

cults, illicit non-Israelite forms of worship. Throughout the history of ancient Israel, there were those who participated in and fostered the growth of cults (cf. 2 Kings 21). These cults arose from Canaanite influence in the land of Israel itself and from the influence of neighboring countries. One of the main tasks of the prophets was to return the people to the proper worship of God and to eliminate these competing cults (1 Kings 18:20–40). ***See also*** Asherah; Baal; Chemosh; Harlot; High Place; Idol; Milcom; Molech; Queen of Heaven; Tammuz; Topheth; Worship; Zeus.

cummin (kuh'min; *Cuminum cyminum*), a cultivated herb whose tiny aromatic seeds were harvested by beating the stalks with a rod (Isa. 28:25, 27). It was used medicinally, as a perfume

CUNEIFORM WRITING

Cucumber.

Cummin.

oil, and as a seasoning for stews and breads. Jesus uses the tithing even of those tiny seeds while not observing the Law's requirements to act justly and mercifully as an example of hypocrisy (Matt. 23:23).

cuneiform writing, a form of written communication done in wedge-shaped marks. A massive body of writings in cuneiform script has been unearthed during the past hundred and forty years. Most of these texts come from Mesopotamia, are impressed on clay tablets, and are written in the Sumerian or Akkadian languages of Mesopotamia. Writing was first invented in Mesopotamia. The cuneiform ideographic script was devised in the late fourth millennium B.C. in order to facilitate the administration of the large economic complexes that the southern Mesopotamian Sumerian temples had become. Originally the script was largely pictographic/ideographic. Increasingly, it developed a phonetic dimension, and in addition to representing concepts it could now also represent sounds. Moreover, elements began to be written in the order in which they occurred in speech. Even with phonetization, Mesopotamian cuneiform writing never surrendered its ideographic (some prefer logographic) quality and remained a mixed logographic-syllabic system of linguistic representation.

The Earliest Texts: The earliest texts were administrative accounts and sign lists for scribes. With increased phonetization, the script began to convey complex statements in Sumerian as well as words in a foreign language, namely, Akkadian. Narrations and utterances were now recorded, though initially writing served as an aid to memory rather than a full record. Alongside administrative and lexical texts, we witness the appearance of votive inscriptions, narratives, incantations, hymns, myths, and proverbial instructions. Accordingly, a distinction may be drawn between two types of texts: those that have no existence except in writing and require writing as their medium (these come into existence alongside and consequent to the invention of writing, e.g., administrative accounts, lexical lists, collections of omens) and texts that exist independently of writing and are set down as the cultural importance of writing is discovered (e.g., epics, incantations, hymns). The recording of this latter type becomes fuller and more explicit in the course of time and new texts of this type may eventually be composed originally in writing.

With the development of phonetization came the adaptation of the script by Semitic speakers for the representation of Akkadian. The system of writing was eventually adopted and adapted for the rendering of Elamite, Hurrian, Urartian, Hittite, and others. The Mesopotamian writing system was not borrowed in a vacuum; those who borrowed the writing were themselves influenced by the literary forms and, in turn, became bearers of the culture. In this manner, Mesopotamia influenced biblical literature and Greek mythology. And cuneiform forms became the point of origin and model for a developed Near Eastern legal tradition.

Writings in Sumerian and Akkadian: The balance of this article focuses on Mesopotamian writings in Sumerian and Akkadian. The classification of texts according to whether they are

CUNEIFORM WRITING

canonical, archival, or monumental provides a convenient arrangement for purposes of schematic presentation.

Canonical texts include those literary, religious, technical, and scholastic texts that were copied, transmitted, revised, edited, and occasionally even preserved in ancient institutions and private collections. One such institutional collection was the famous library of Assurbanipal. The discovery of this collection in Nineveh in the mid-nineteenth century served as the starting point for the recovery and reconstruction of Akkadian literature. While Sumerian texts were also found in the library, it was the discarded remains of the Old Babylonian schools of Nippur that served as the basis for the reconstruction of Sumerian literature. Canonical literature is normally sorted into four major temporal clusters: Sumerian texts from the third millennium (Fara, Abu-Salabikh, etc.); Sumerian texts from the Ur III and Old Babylonian periods (Nippur, Ur); Akkadian texts from the Old Babylonian period (e.g., *Gilgamesh, Atrahasis, Anzu*); and standard Babylonian Akkadian texts from the end of the second and the first millennium. Prior to ca. 1250 B.C. in the post–Old Babylonian period, canonical texts are found mainly outside of Mesopotamia (e.g., Amarna, Ugarit, Boghazkoi). It is often assumed that almost all major works of Akkadian literature were composed and standardized by the latter half of the second millennium, and that the first millennium was relatively impoverished as regards the creation of traditional religious literature. A more reasoned judgment seems to be that also Mesopotamia of the first millennium was religiously and literarily creative, certainly far more creative than is normally assumed, and that some classics (e.g., perhaps *Enuma elish* and *Maqlû*) were actually composed during the several centuries prior to their attestation in the libraries and collections of Assyria and Babylonia of the eighth century B.C. and later. By the same token, the oft-repeated statement that the religious poetry of the post–Old Babylonian period is characterized in the main by stock phrases combined to create stereotyped forms is to be modified and perhaps disregarded. Because of the small number of workers in the field, the need to sort and decipher tablets, and the concentration by twentieth-century scholars on the literature of the earlier periods, much more penetrating and sophisticated study remains to be done concerning the creative and editorial activities of literati and theologians in the centers of ancient Babylonia and Assyria.

The reader of the Bible as well as all humanists will find particular pleasure in reading such Akkadian texts as the creation epic (*Enuma elish*), the *Epic of Gilgamesh,* prayers of the individual supplicant, sequences of incantations and their accompanying ritual, wisdom compositions, and the humorous *Poor Man of Nippur.* Of no little interest, also, are the scholarly collections of such items as medical prescriptions, omens, and lexical equations. In these scribal handbooks, both the individual entry as well as the pattern of arrangement of units merit attention.

The masses of archival texts and numerous monumental texts allow us to study government administration, international diplomacy, economic enterprises, military organization, and the like. Not always are we able to integrate or even harmonize the contemporary evidence of these texts with the information embedded in the traditional canonical literature. Here the reader of the Bible may be particularly drawn to examine such diverse bodies of texts as the Akkadian Amarna letters written to Egypt from Canaan in the fourteenth century B.C., collections of laws such as the code of Hammurabi, and Neo-Assyrian and Neo-Babylonian royal inscriptions and historiography. Particularly during these last mentioned periods (750 B.C. on) there was direct contact between Israelites on the one hand and Assyrians/Babylonians on the other, and during these periods Mesopotamian literary forms and intellectual life began to have a profound impact on the Bible and rabbinic Judaism.

I.T.A.

cup, a utensil for holding a limited amount of liquid for individual consumption. Cups were made of precious metal (Gen. 44:1–34; Jer. 51:7; Rev. 17:4; cf. the cuplike oil holder of the Temple lamp, Exod. 25:31–35). The world of the Bible is a world of limited good; everything that exists is perceived to exist in limited amounts, in amounts that cannot be augmented without depriving others. In this perspective, all persons can be said to have their "cup," i.e., the limited and fixed amount of whatever God has to offer them in life, either in entirety, such as a lifetime of devotedness to God (Pss. 11:6; 16:5) or a life of abundance (overflowing cup, Ps. 23:5), or in part, such as rescue (cup of salvation, Ps. 111:13; cup of consolation, Jer. 16:7), or punishment (cup of wrath, Isa. 51:17; Hab. 2:15; cup of staggering or reeling, Isa. 51:22; Zech. 12:2). The cup then symbolizes a person's lot or fate (Jer. 49:12; Ezek. 23:31–33; Mark 10:38–39 and parallels; 14:36 and parallels), with a cup of wine serving as a prophetic symbol of the significance of one's fate (Jer. 15:15–28; at the Lord's Supper, Mark 14:23–25 and parallels; 1 Cor. 11:25–29). At a formal meal there was a cup of blessing (1 Cor. 10:16) marking a new stage in the meal and symbolizing the unity of meal participants (1 Cor. 10:21). B.J.M.

cupbearer, a confidant in a royal entourage (1 Kings 10:5). The cupbearer could exercise influence on a king's policies (Neh. 1:11–2:8). The first servant of the Pharaoh imprisoned with Joseph had held the Pharaoh's cup "in my hand . . . " (Gen. 40:11), suggesting that the cupbearer carried responsibility for nurturing (giving food and drink to) those in his care. The term also refers to God in his nurturing relationship with creation (Ps. 104:13). ***See also*** Joseph; Nehemiah, The Book of.

curse and blessing, oral pronouncements for harm or good.

Terminology: The three most frequently used words for "curse" in the Hebrew Bible are *alah, arar,* and *killel.* The first (*alah*), meaning curse as imprecation, describes curse from the point of view of its pronouncement or utterance (hence, properly "malediction"). It is used in oath or adjuration, as a conditional curse to achieve a desired result or to preclude an undesirable one, or as a conditional imprecation or prayer for the punishment of an evildoer whose guilt cannot be proved. The second term (*arar,* especially in its passive participial form *arur,* "cursed") describes curse from an operational point of view, as effecting a ban or barrier to exclude or anathematize (hence roughly equivalent to "spell"). It is a decree rather than an imprecation or prayer. The third term (*killel*) describes a wide range of injurious activity, from verbal abuse to material harm. Its basic meaning is "to treat lightly," i.e., to treat with disrespect, to repudiate, to abuse. In those locutions where the Deity is the object of this verb, it suggests the lack of respect for the ethical standards sanctioned by God. Its opposite is not "bless" so much as "to fear God," i.e., to show respect for the standards ordained by God. The related noun (*kelalah*) describes the result of curse or abusive treatment, i.e., "misfortune, harm, calamity" or the like.

Over against this variety of words for "curse," there is only a single word for "bless" (*berek,* and its related noun *berakah,* "blessing, good fortune," along with the passive participle *baruk,* "blessed," analogous to *arur,* "cursed"). The content of "blessing" includes such goods as vitality, health, longevity, fertility, and numerous progeny; "curse," on the other hand, results in death, illness, childlessness, and such disasters as drought, famine, and war.

Theological Considerations: Curse and blessing are among the basic organizing concepts of the book of Genesis, concepts that link the primeval history of Genesis 1–11 to the history of the Patriarchs in Genesis 12–50. The Priestly author of Genesis 1 places the divine blessing on humankind at the beginning of his work (1:28); but the Yahwist chapters that follow are a narrative dominated by God's curse, from the man and woman (Gen. 3:16–19) to Cain (4:11) to the Flood and the renewal of the divine blessing to its survivors (9:1). The cycle of sin and curse begins again, climaxing in the hybris of the Tower of Babel (11:1–9), but it is countered now by a new act of God, the blessing of Abram (12:1–3). This is the beginning of a history of blessing (22:15–18; 24:60; 26:2–4) that culminates in the blessing of Jacob by Isaac (27:27–29) and by God (32:27).

Balancing this history of blessing is the history of salvation in Exodus, Leviticus, and Numbers. These two alternative modes of divine activity, blessing and salvation, have been studied especially by C. Westermann. In Deuteronomy curse and blessing are structured after the model of the suzerainty treaty. Deuteronomy brings the Torah to a close on the note of covenant, with blessings promised for covenant obedience and curse for covenant breach (Deut. 28). "I have set before you life and death, blessing and curse" (Deut. 30:19); the history that follows (Joshua–2 Kings) demonstrates the tragic consequences of choosing death and curse, a theme fundamental to the pre-exilic prophets. The relationship between blessing and curse in Deuteronomy and the Prophets can be seen by comparing such traditional curses as Deut. 28:30–40; Amos 5:11; Mic. 6:15; Zeph. 1:13; and Hag. 1:6 to corresponding formulations of blessing (Deut. 6:11; Josh. 24:13; Amos 9:14–15; Isa. 62:8–9;

65:21–23). In the NT, blessings are frequent (e.g., Matt. 5:3–11; Rom. 1:25; Eph. 1:3) but Jesus commanded his followers not to curse (Luke 6:28; cf. Rom. 12:14).

cypress (*Cupressus sempervirens*), a kind of tall evergreen found among stands of cedar and oak. Because of their beauty, cypresses were used as ornamentals in gardens and cemeteries. The hard fragrant wood was preferred for buildings and furniture (Isa. 44:14, RSV: "holm tree"). The fir trees supplied by Hiram of Tyre to Solomon for his Temple and palace (1 Kings 9:11) were cypress, as was also the "gopher wood" of Noah's ark (Gen. 6:14). ***See also*** Fir Tree; Woods.

Cypress.

Cyprus (*si*´pruhs), an island lying in the eastern Mediterranean about sixty miles west of the Syrian coast and about the same distance from the coast of Turkey. Approximately a hundred and forty miles long and sixty miles wide (about the same size as ancient Israel), the island was known as Alashia in the cuneiform literature, and Elishah in the OT (Ezek. 27:7; cf. Gen. 10:4; 1 Chron. 1:7). Some also equate the island with the biblical name Kittim (Jer. 1:10), although others identify the latter with Crete. By NT times the island was called *Kypros,* a Greek word from which the word "copper" comes. Cyprus was famous

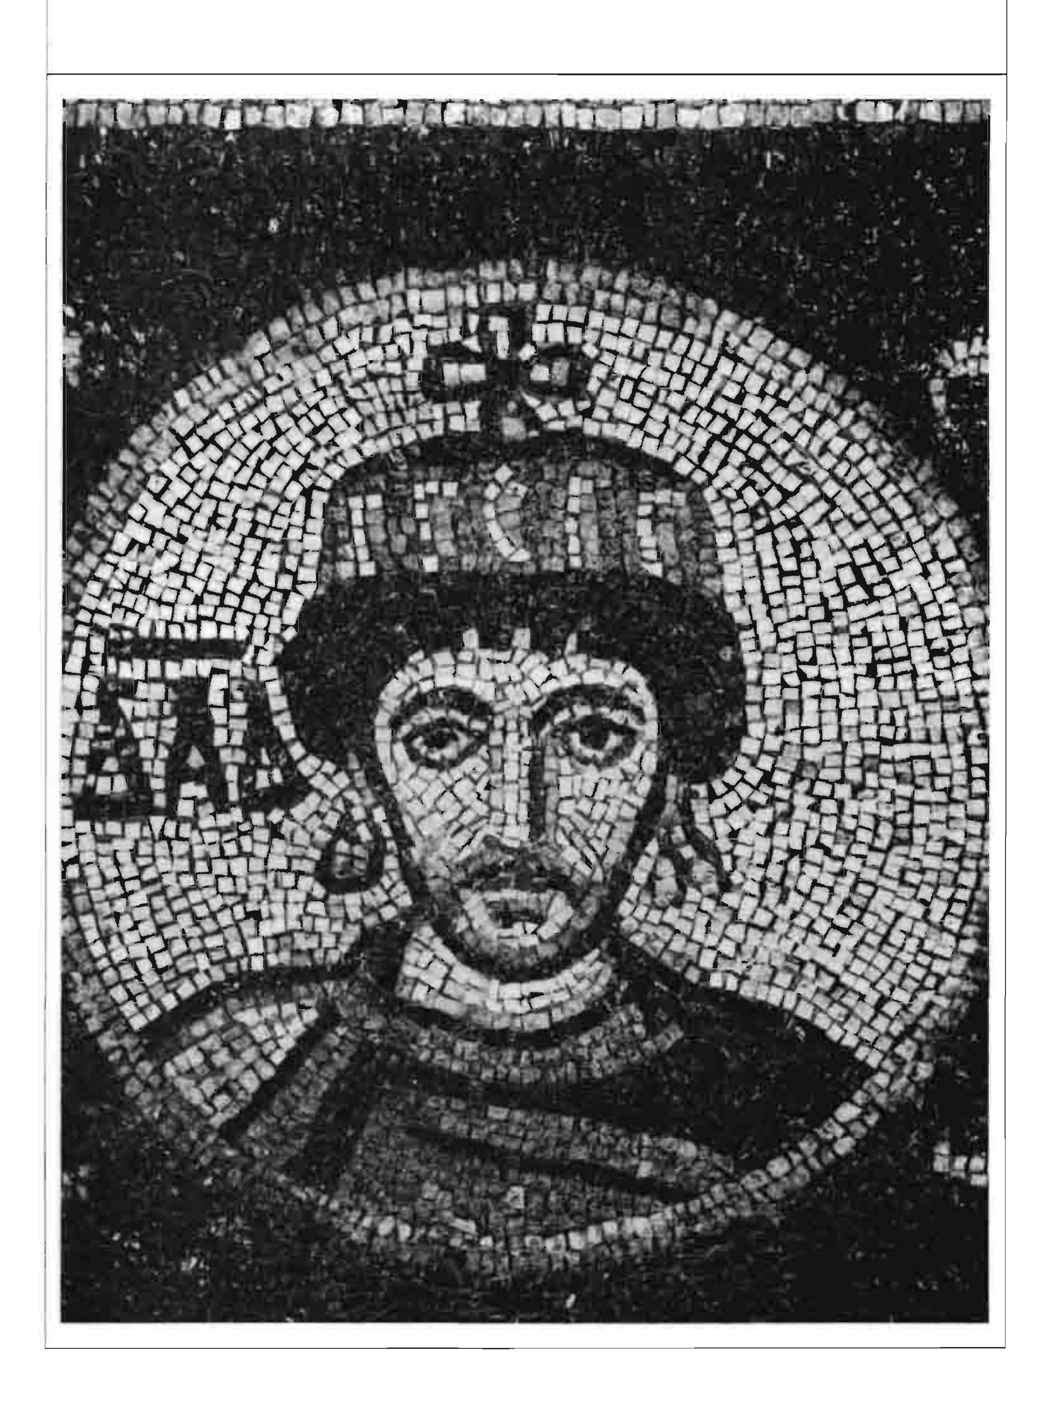
throughout the ancient world for its copper, a metal whose importance made the island a center of seafaring commerce. The island's active participation in world trade is evidenced by the discovery of great quantities of Cypriot imports in ancient Mesopotamia, the Levant, Egypt, Asia Minor, and the Aegean world. Apparently an independent state during the second half of the second millennium B.C., Cyprus was colonized and ruled by Phoenicia in the tenth–eighth centuries, then subjugated by the Assyrians in the late eighth and seventh centuries. Cyprus subsequently became part of the Greek and Roman empires. A Jewish population is attested on the island as early as Ptolemy I (cf. 1 Macc. 15:23; 2 Macc. 12:2), and by the Roman period (63 B.C.–A.D. 325) that population was significant. A Jew named Barnabas, an early convert to Christianity, was a native of Cyprus (Acts 4:36), as were some of the other early disciples (Acts 11:19–20; 21:16). Acts reports that Paul and Barnabas traveled across the island, from Salamis to Paphos, on their first missionary journey (Acts

13:4–13). At Paphos they encountered the sorcerer Bar-Jesus and the proconsol Sergius Paulus. Barnabas and Mark later returned to Cyprus during Paul's second missionary journey (Acts 15:39). D.A.D.

Cyrene (si-ree'nee), city in Cyrenaica (modern Libya) which had a thriving Jewish community of settlers from Egypt from Ptolemaic times (late fourth century B.C.). Two noted Hellenistic Jewish writers, Jason, whose history was abbreviated in 2 Maccabees, and Ezekiel, the tragedian, came from Cyrene. People from Cyrene were known for their patriotism and their ties to Palestine (Acts 6:9). Simon of Cyrene is said to have carried Jesus' cross (Mark 15:21). Cyrenian Christians were prominent in Antioch (Acts 11:20; 13:1).

Cyrenius (si-ree'nee-uhs). ***See*** Quirinius, P. Sulpicius.

Cyrus (si'ruhs; Heb. *kōreš*, Akkadian *kuraš*, Persian *kuruš*; etymology unknown) **II**, a Persian emperor and founder of the Achaemenid dynasty (ruled Babylonia 539–530 B.C.). His name occurs twenty-two times in the Bible, in the books of Daniel, Ezra, 1 and 2 Chronicles, and Isaiah. Extrabiblical evidence comes from the classical Greek authors Herodotus and Xenophon (though their reports are often encrusted with legend) as well as cuneiform records. From the latter we learn that Cyrus's ancestor was Teispes of Anshan. Cyrus's grandfather was named Cyrus (I); his father, Cambyses (I); his mother, Mandane, was the daughter of Median king Astyages. Cyrus is therefore known to moderns as Cyrus II; Cyrus II's son, who ruled Babylonia from 530 to 522 B.C., was Cambyses II. Cyrus's capital was Pasargadae, in what is now southern Iran.



Cyrus's military victories eventually put him in possession of the largest empire the world at that time had yet seen. They began with the conquest of Media (549), followed by Lydia (546) and Babylonia (539). It would seem that the Babylonian provinces of Eber nāri (today's Syria, Lebanon, and Israel) fell to him after the conquest of Babylonia, although no specific mention of them is extant in contemporary records.

Cyrus's policy toward the peoples of his empire was one of tolerance and understanding. His authorization of the rebuilding of the Jerusalem Temple by returning Judeans (end of 2 Chronicles; beginning of Ezra) accords well with what we know from contemporaneous documents. Isaiah (45:1–3) speaks with enthusiasm of Cyrus as the anointed one (messiah) of the Lord. Because of these achievements, Cyrus II's reign has been characterized as "a great turning point in ancient history" by the modern historian Richard N. Frye.

A co-regency with his son, Cambyses, ran for a short while in 530 and ended in the same year with the death of Cyrus in battle. Achaemenid rule in Babylonia continued for two hundred years until another "great turning point in ancient history," the coming of Alexander III, the Great. ***See also*** Persia. D.B.W.

D, the siglum for the Deuteronomist, one of the sources of the Pentateuch. ***See also*** Deuteronomist; Deuteronomistic Framework; Deuteronomistic Historian; Sources of the Pentateuch.

dagger. ***See*** Sword: Weapons.

Dagon (day´gon), an ancient Semitic deity attested in the northern Mesopotamian area from the late third millennium and in the entire West Semitic area through biblical times. The etymology of the name is disputed; Jerome's derivation of it from Hebrew *dag,* "fish," is far-fetched. More probable is the root attested in Arabic *dagana,* "to be cloudy, rainy," appropriate to a god of rain and fertility. The common Northwest Semitic word for grain, *dagan,* is to be derived from the fertility god, like Latin *ceres,* "bread, grain," from the god Ceres. The texts from Ugarit give no information about the god except that he is the father of Baal Haddu, the major god of fertility at Ugarit; Dagon does have a temple at Ugarit so he must have been honored in public worship.

The Philistines, after they settled on the coast of Palestine in the twelfth century B.C., honored Dagon. The Bible sees the god as the chief god of the Philistines, at least as the god to whom thanks were given after a victory. In 1 Sam. 5:2–7, God represented by the captured Ark in the temple at Ashdod causes the statue of Dagon to fall before him; the second fall destroys the statue. In Judg. 16:23, the imprisoned Samson pulls down around his head the temple of Dagon with the help of God. According to 1 Chron. 10:10, the Philistines hung up the head of Saul as a trophy in the temple of Dagon, presumably at Beth-shean (cf. 1 Sam. 31:12). 1 Macc. 10:83 and 11:4 mention a temple of Dagon in Ashdod. The place names Beth-dagon in Judah (Josh. 15:41) and Beth-dagon in Asher (Josh. 19:27) preserve the name of the deity.

R.J.C.

dainties, delicious sweets, delicacies, and confections generally served at the tables of kings (Gen. 49:20). While such foods were not viewed as inherently unfavorable just because they appeal to one's appetite (Job 33:20; Rev. 18:14), the prudent Israelite was to avoid eating them at the table of unscrupulous persons whose intentions might be harmful (Ps. 141:4; Prov. 23:3, 6).

daleth (dah´leth), the fourth letter of the Hebrew alphabet; its numerical value is four. The earliest form of the letter in proto-Sinaitic inscriptions resembles a fish. The later early Phoenician form became a triangle, which has survived in the Greek letter delta. Later Phoenician and early Hebrew forms of the letter add a downward stroke to the triangle. It was

ד

The Ark of God being returned by the Philistines (left; cf. 1 Sam. 6:7–8) after it has caused the statue of Dagon to break in front of his temple (right; cf. 1 Sam. 5:2–5); wall painting from the synagogue at Dura-Europos, third century A.D.

this form that eventually developed into the letter found in the classical Hebrew square script. In Judaism this letter is often used as an abbreviation of the divine name (tetragrammaton). ***See also*** Writing.

Dalmanutha (dal´muh-*noo*´thuh; etymology uncertain), unidentified site to which Jesus sailed across the Sea of Galilee after feeding the four thousand (Mark 8:10; various manuscripts read "Magadan," "Magedan," "Magdala," and the parallel in Matt. 15:39 has "Magadan"). It probably refers to the vicinity of Magdala. ***See also*** Magdala.

Dalmatia (dal-may´shee-uh), the southwestern part of Illyricum along the modern Yugoslav coast of the Adriatic Sea. Illyricum was established as a Roman province in A.D. 9–10. The name Dalmatia dates from the period of the Flavian emperors (ca. A.D. 70) and came to be used interchangeably with the name of the province as a whole. In 2 Tim. 4:10 Titus leaves Paul to go to Dalmatia. ***See also*** Illyricum.

Damaris (dam´uh-ris), a woman who was one of Paul's few converts in Athens (Acts 17:34).

Damascus (duh-mas´kuhs), the capital city of modern Syria, located about sixty miles east of the Mediterranean coast almost directly east of Sidon. On a plateau about 2,300 feet above sea level, the city had the waters of the oasis Ghuta, which was nourished by the twin rivers draining eastward from the Anti-Lebanon range: the Nahr Barada (Abana), which subdivides into numerous branches after a course through a narrow gorge out of the hills; and the Nahr el-'Awaj (Pharpar), just south of the town. Both rivers dissipate into the eastern desert. The quality of its water sources was compared by Naaman with the Jordan (2 Kings 5:12). The "River" (Euphrates) was a political metaphor used by Isaiah to signal Assyria's destruction of the Damascus-based Aramaean kingdom under Rezin (Isa. 8:5–8).

Damascus, one of the oldest continuously inhabited sites known to archaeologists, figured long and often in biblical awareness. It was a reference place for Abraham's rescue of his kinsmen (Gen. 14:15). David brought it within Israelite control (2 Sam. 8:5–6), but during Solomon's reign the first of a series of Aramaean kings made Damascus his capital city, continuing to intervene in the life of Israel and Judah until the Assyrian conquest in 732 B.C. In this series of local dynastic politics, biblical traces occur of the founder Rezon (1 Kings 11:23–25); Tabrimmon, ally of the Judean Abijam against Israel (1 Kings 15:19); his father Hezion (same verse); his son Ben-hadad (I, 900–875 B.C.), who was allied with Baasha of Israel, but later with Asa of Judah (1 Kings 15:18–19); Ben-hadad II (1 Kings 20) and his son Hadadezer who fought Ahab of Israel; and Ben-hadad III who was killed by Hazael (843–797 B.C.; 2 Kings 8:7–15) who then succeeded him. The deepest penetration into Israel was under Ben-hadad IV, who even laid siege to the capital city, Samaria (2 Kings 6:24). Only under Israel's Jeroboam II was Damascus restored to Israel's earlier borders (2 Kings 14:28). When Assyria's pressure worked west, the effort of Rezin of Damascus with Pekah of Israel to bring Judah's king Ahaz into the alliance against Assyria (known as the Syro-Ephraimite War) in 734 B.C. failed (Isaiah's counsel of Judah [7:14] on the occasion is the "young woman shall conceive and bear a son" passage used in Matthew's birth narrative in 1:23), Assyria's success brought the destruction of Damascus in 732 B.C., including Rezin's death.

Damascus became an administrative zone under Assyria, but not until it was made a Nabatean capital under Roman policy (85 B.C.) did any real power revive. The conquest of Aretas III by Rome in 65 B.C. led to Nabatean rule by governors, including Aretas IV who was in charge when Paul came to Damascus (Acts 9:2–30; 2 Cor. 11:3; Gal. 1:17).

As reflected in the names of several monarchs, the chief deity of the city was the storm god Hadad on whose temple site the Roman emperor Theodosius (A.D. 379–395) built the church of Saint John Baptist. Under the Umayyad Muslims (A.D. eighth century) this was destroyed except for the perimeter wall and the towers at the four corners when al-Walid built the famous Great Mosque there. R.S.B.

Dan (dan). **1** One of the twelve sons of Jacob, by Bilhah, handmaiden of Rachel (Gen. 30:1–6); he is the ancestor of the tribe of Dan.

2 One of the twelve tribes of Israel assigned a small piece of land west of Benjamin; when they were crowded out, however, they migrated north (Josh. 19:40–48; Judg. 18).

3 A city on the northern border of Israel ("Dan to Beer-sheba" expresses the northern and southern limits of Israel). Formerly called Laish, it is mentioned in the Egyptian execration texts, the eighteenth-century B.C. Mari

A Greek and Aramaic inscription found at Tel Dan from the late third–early second century B.C. contains the word "Dan" (second line) and helps to identify the site.

tablets, and the records of the Egyptian pharaoh Thutmose III. It is identified with Tell el-Qadi (Arabic) or Tel Dan (Heb.) covering about fifty acres in the center of a fertile valley near one of the principal springs feeding the Jordan River.

Tel Dan has been excavated by A. Biran since 1966. The earliest occupation goes back to the Pottery Neolithic period, but its extent is not yet known. The large and prosperous Early Bronze occupation probably covered the full expanse of the mound, dating to about the middle of the third millennium B.C. A Middle Bronze II rampart (1900–1700 B.C.) surrounds the city and on the southeast a mud-brick triple arched gate with two towers is preserved to a height of over 20 feet. A large Late Bronze Age building and a tomb with quantities of Mycenaean pottery, gold and silver jewelry, bronze swords, and ivory boxes indicate a prosperous fourteenth–thirteenth century occupation in the vicinity.

Occupation is rather continuous, but a change in the material culture may indicate the arrival of the Danites from the south. A metal industry seems to have been a major economic enterprise of the twelfth and eleventh centuries B.C.

An impressive ninth-century B.C. gate and fortifications have been uncovered, and biblical sources claim Jeroboam set up a golden calf at Dan to provide the Northern Kingdom with a sanctuary (1 Kings 12:26–30). Archaeologists have uncovered a sacred area, perhaps a *bamah* (Heb., "high place") on the northwest. In phases related to Jeroboam I, Ahab's rebuilding, and Jeroboam II's prosperity, cultic incense burners and stands, figurines, and a horned altar have been uncovered. The area continued in use down to Hellenistic and Roman times. A bilingual Greek and Aramaic votive inscription of the late third or early second century B.C. to the "god who is in Dan" identifies the site. An elaborate water installation existed near the spring in Roman times, and the latest coins belong to the time of Constantine the Great (ca. A.D. 325). N.L.L.

dancing, rhythmic bodily movement, often to music. As a sign of rejoicing, dance had a place in the secular and religious life of ancient Israel. Dance could be accompanied by song and instrumental music. Women customarily greeted the return of victorious soldiers with music and dance (1 Sam. 18:6), a practice akin to recent bedouin custom. Dancing had a role at the old harvest festival at Shiloh (Judg. 21:21). Dance could be performed in the worship of God (Ps. 149:3). When he led the Ark of the Covenant to Jerusalem, David danced before the Lord (2 Sam. 6:14), a performance his wife Michal thought unseemly. The Song of Songs celebrates the dance of the Shulammite (Song of Sol. 6:13).

Terra-cotta plate with dancers, musicians, and singers (2000–1600 B.C.).

Dance also played a role in the religions of Israel's neighbors. Dance before the golden calf (Exod. 32:19) represents a pagan practice. Cultic dance can be inferred from a Ugaritic text. Egyptian reliefs portray both male and female dancers. Cultic dancers are known to have existed in Mesopotamia.

In the NT, dance is a natural part of the celebration of the return of the prodigal son (Luke 15:25). Dancers were sometimes engaged for entertainment at royal courts in the Hellenistic and Roman worlds (cf. Matt. 14:6). ***See also*** David; Gebal; Michal; Shiloh. R.M.G.

Daniel (dan´yuhl), the hero of the Book of Daniel, represented as a Jew in the Babylonian

Daniel as depicted in a sixth-century A.D. mosaic at the Monastery of St. Catherine, Sinai.

exile who is skilled in the interpretation of dreams and is miraculously preserved in the lions' den. Daniel was already the name of a legendary wise man in Ezek. 28:3 and was linked with Noah and Job (Ezek. 14:14). This legendary figure is probably related to the *Dnil* of the Ugaritic Aqhat legend (from about 1500 B.C.). *Dnil* was a judge who defended the fatherless and the widow. The function of judge is suggested by the name Daniel (Heb., "my judge is God" or possibly "judge of God") and appears again in the story of Susanna. The author of the biblical book probably took over the legendary name for his fictional hero. ***See also*** Daniel, The Book of. J.J.C.

Daniel, the Additions to, several stories, a prayer, and a hymn not found in the Masoretic (Hebrew) Text (MT) of Daniel, but present in both the Septuagint (LXX) and Theodotion, two distinct Greek versions of the OT. These passages are the Song of the Three Children, Susanna, and Bel and the Dragon. The Song of the Three Children is included between Dan. 3:23 and 3:24. In Theodotion, Susanna stands at the beginning of Daniel, and Bel and the Dragon at its end, while the LXX version places both additions at the end. Protestants have relegated the Additions to the Apocrypha, while Catholics retain them as part of Daniel.

It is difficult to disentangle the history of the text of Daniel, and the role of the Additions in it is only one of a series of thorny problems. Daniel seems to have grown by accretion, beginning with the stories of chaps. 2–6. The Additions are only the final stage in that process. Susanna and Bel and the Dragon may represent part of a larger cycle of stories associated with the legendary figure of Daniel, similar to the ones found in chaps. 1–6 of the NT. The prayer (vv. 1–22) and the hymn (vv. 28–68) in the Song of the Three Children are probably independent liturgical compositions. All of these passages seem to have been added to the Hebrew-Aramaic archetypes of the versions of Daniel in the LXX and Theodotion sometime between the composition of Daniel during the Maccabean revolt (167–164 B.C.) and 100 B.C., the probable date of the LXX translation of Daniel. Along with 1 Esdras and the Rest of Esther, the Additions are evidence of the fluidity of the texts of some parts of the OT prior to the end of the first century A.D. ***See also*** Bel and the Dragon; Daniel, The Book of; Song of the Three Children; Susanna; Texts, Versions, Manuscripts, Editions. D.W.S.

Daniel, the Book of, an OT book placed with the Writings in the Hebrew Bible but with the Prophets in the Septuagint. Chaps. 1–6 are stories set at the Babylonian and Persian courts, narrated in the third person. Chaps. 7–12 are apocalyptic revelations, narrated in the first person. The Greek translations include certain additions accepted as canonical by the Roman Catholic church: the Prayer of Azariah and the Song of the Three Children in chap. 3 and the stories of Susanna and Bel and the Dragon in additional chapters. Also, the oldest Greek translation has a text that differs greatly from the Aramaic in chaps. 4–6, and that may be closer to the original in some respects. Even within the twelve chapters of Daniel in the Hebrew Bible there are signs of composite authorship. 1:1–2:4a and chaps. 8–12 are in Hebrew; 2:4b–7:28 is in Aramaic. The form of the text in the Hebrew Bible, part Hebrew and part Aramaic, is supported now by fragments of the book found among the Dead Sea Scrolls.

The stories in Daniel 1–6 bristle with historical problems. Chap. 4 tells of the transformation of Nebuchadnezzar into a beast. This story seems to have its origin in an episode in the life of Nabonidus, the last Babylonian king. A variant of the tradition has been found in the "Prayer of Nabonidus" among the Dead Sea Scrolls. Chap. 5 represents Belshazzar as king of Babylon at the time of its destruction, although he was never actually king. Chap. 6 speaks of a wholly unhistorical Darius the Mede, who is said to have been the conqueror of Babylon. Darius was the name of several later Persian monarchs. In view of these problems, the stories in chaps. 1–6 must have been written a considerable time after the Babylonian exile.

The apocalyptic section of the book, chaps. 7–12, can be dated more precisely. Chap. 11 contains a lengthy prophecy of history communicated to Daniel by an angel. No names are mentioned, but persons and events can easily be identified down to Antiochus IV Epiphanes of Syria and his persecution of the Jews, which began in 168 B.C. The prophecy goes on to predict, incorrectly, that the king would die in the land of Israel. We must infer that the accurate "prophecy" was written after the fact and that the actual time of composition was during the persecution, but prior to the king's death in 164 B.C. The persecution is also the focal point of the other apocalyptic revelations in chaps. 7–12. By contrast, there is no clear allusion to it in chaps. 1–6.

The composition of the book, then, can be reconstructed as follows: the Aramaic stories were traditional tales that probably took shape in the third century B.C. Chap. 7 was added in Aramaic after the outbreak of the persecution. Chaps. 8–12 were then added in Hebrew, perhaps for nationalistic reasons. Chap. 1 was either translated from the Aramaic or composed in Hebrew as an introduction to the book. Scholarly opinions vary on the details of this reconstruction, but there is a consensus on its main outline. Many conservative Christians, however, continue to defend the view that the whole book was composed in the sixth century B.C. and that Daniel was a historical person.

In its final form the book of Daniel was intended to offer hope and consolation to the persecuted Jews. It shows no sympathy for the armed revolt of the Maccabees. Instead it advocates a stance of piety and acceptance of martyrdom. The victory is in the hands of Michael the Archangel. The martyrs will be rewarded in the resurrection, when they will "shine like the stars." Daniel is the only book in the Hebrew Bible that clearly attests a belief in resurrection.

Daniel is also the only OT example of the apocalyptic genre. Daniel's visions are interpreted by an angel. The division of history into a set number of periods, which is characteristic of apocalyptic writings, is found in the four-kingdom prophecy in chap. 2 and again in chap. 7. The prophecy of Jer. 25:11–12 and 29:10, that the Jews would be restored after seventy years, is reinterpreted in Daniel 9 as seventy weeks of years. History is running a predetermined course, which is now reaching its climax. The fate of the individual is not predetermined, however. People can choose to be faithful to the law and thereby decide their own destiny in the resur-

OUTLINE OF CONTENTS

The Book of Daniel

I. The tales (chaps. 1–6)
   A. Daniel and friends are exiled to Babylon and trained at court. Refusing the royal food, they surpass gentile trainees. (chap. 1)
   B. Wise men fail to interpret Nebuchadnezzar's dream; Daniel interprets the dream, in which a great statue represents a sequence of four kingdoms, which in turn are destroyed by the kingdom of God; the king honors Daniel and his God. (chap. 2)
   C. Refusing to worship a statue set up by the king, the Jewish officials are thrown into the fiery furnace, but they are found alive, and with them a godlike, angelic figure; the king again acknowledges the God of the Jews. (chap. 3)
   D. The wise men fail again. Daniel explains that the great tree cut down and transformed into a beast in the dream applies to the king himself; Nebuchadnezzar is transformed into a beast for seven years; restored, he gives praise to the Most High God. (chap. 4)
   E. At a feast, strange writing appears on the wall; interpreting it, Daniel predicts the kingdom will be divided between the Greeks and the Persians; that night King Belshazzar dies. (chap. 5)
   F. When Daniel ignores the edict forbidding prayer to anyone but the king himself, he is thrown into the lions' den, but he is found unscathed; the king throws Daniel's rivals to the lions and pays homage to Daniel's God. (chap. 6)

II. The visions (chaps. 7–12)
   A. In a dream Daniel sees four beasts rise from the sea, the Ancient of Days on his throne, and "one like a son of man" coming on the clouds and receiving a kingdom; an angel explains the four beasts represent four kingdoms that will be destroyed, and the kingdom will be given to the people of the holy ones of the Most High. (chap. 7)
   B. In Daniel's vision of a ram and a he-goat fighting, the goat prevails; a little horn grows on it and acts very arrogantly. An angel explains the ram represents Persia and the goat Greece; the little horn is an insolent king who will rise up against God, but will be broken, not by human power. (chap. 8)
   C. Daniel ponders Jeremiah's prophecy that the desolation of Jerusalem would last seventy years; he recites a long penitential prayer. The angel Gabriel explains the prophecy in terms of seventy *weeks* of years, at the end of which the desolator will be cut off. (chap. 9)
   D. An angelic figure tells Daniel "what is written in the book of truth"; this is a thinly veiled account of Hellenistic history, culminating in the persecution of the Jews by Antiochus Epiphanes. The angel predicts that the king (Epiphanes) will meet his death in the land of Israel, "Michael your prince" will arise in victory, and the dead will be raised; the wise teachers who withstand the persecution will shine like the stars of heaven. Given a calculation of the length of time remaining, Daniel is told to seal the book until the time of the end. (chaps. 10–12) J.J.C.

rection. The book contains at least three calculations of the time remaining until the end (12:7, 11–12). Such calculations are very unusual in ancient apocalyptic literature but have played a prominent role in modern millenarian movements.

Daniel is cited as Scripture in the Dead Sea Scrolls as early as the first century B.C. and was very influential in Judaism and early Christianity. The most influential part of the book is undoubtedly the vision in chap. 7: "with the clouds of heaven there came one like a son of man" (v. 13). This figure is variously interpreted by modern scholars as a collective representation of the Jewish people, or, more probably, as their angelic representative, Michael. In antiquity it was invariably interpreted as an individual, usually as the messiah (see *1 Enoch* 37–71; 4 Ezra [2 Esd.] 13). In the NT the phrase "son of man" from Dan. 7:13 is adapted so that Son of man becomes a title for Jesus, who is expected to fulfill Daniel's prophecy in his Second Coming (see Mark 13:26; 14:62 and parallels. ***See also*** Apocalyptic Literature; Daniel; Darius; Dreams.

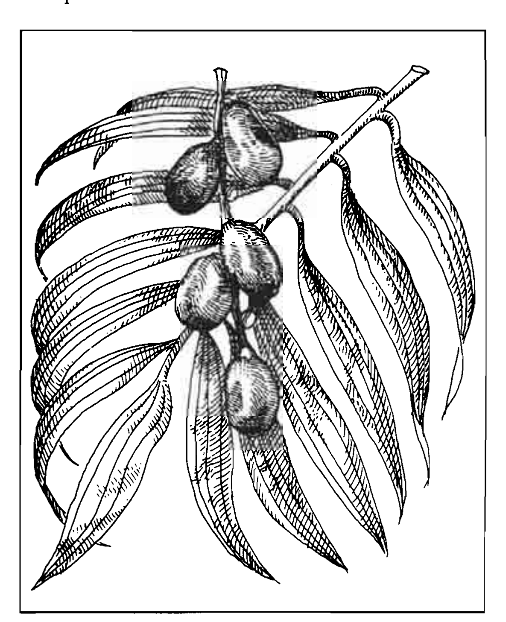
Darda (dahr´duh; probably Heb., "thistle"), the son of Mahol, and one of the four sages of 1 Kings 4:31 whose wisdom was exceeded by Solomon.

Darics, mentioned in 1 Chron. 29:7, were coins issued by the Persian king Darius I (522–486 B.C.). The monarch had his own likeness stamped on the coins showing himself running swiftly, holding a spear and bow.

daric (dair´ik; Heb. *adarkon;* Ezra 8:27; 1 Chron. 29:7; Heb. *darkemon* [drachma?]: Ezra 2:69; Neh. 7:70, 72), a gold coin, probably introduced by Darius I. The Greek term *dareikos stater* denotes a stater of Darius. The word "daric" was originally used as an adjective to modify stater; later the term was shortened to "daric." It is used of Temple building contributions in Ezra 8:27 and anachronistically in 1 Chron. 29:7. ***See also*** Darius; Money.

Darius (duh-ri´uhs). **1** Darius I (the Great, 522–486 B.C.), the first of three Persian (Achaemenid) rulers. This Darius is intended in Ezra 4–6, Haggai, and Zechariah 1–8. He established himself on the throne in a power struggle in the years 522–520 B.C. The account of this appears on the trilingual inscriptions at Behistun in the Zagros mountains in northern Mesopotamia. While they contain important information, allowance must be made for Darius's desire to establish his legitimacy as ruler; his relationship to the royal house is not clear. The upheavals of his accession suggest a background to the prophecies of Hag. 2:6–7 and 2:21–22, with their reference to the overthrow of kingdoms, and to the complaint in Zech. 1:11–12 that peace has been restored without the expected outcome of the reestablishment of Judah and Jerusalem. However, the precise interpretation of these passages is not certain. Ezra 5–6 shows Darius reaffirming Cyrus's authorization for the rebuilding of the Jerusalem Temple, in response to an inquiry by the governor of the province "Beyond the River" and his associates. 1 Esd. 4:42–5:3 credits Darius directly with the appointment of Zerubbabel to restore Judah. Darius's conquests, his organization of the Persian Empire, his successful control of it over a period of nearly forty years, and his building achievements, especially at Susa and Persepolis, point to great administrative and military ability. The later years of his reign mark the development of conflict with Greece and his army's defeat at Marathon in 490 B.C. This conflict was dramatically to affect subsequent Persian history. The records suggest a mixture of extreme cruelty and generosity. He is credited, probably rightly, with the introduction of the coin known as the daric. **2** Darius II (Pers., Okhos, Nothos, 423–405/4 B.C.), who is described in the Elephantine papyri as responsible for a rescript to the Persian satrap in Egypt about religious observance at the Jewish shrine there. **3** Darius III (Pers., Kodomannos, 336–330 B.C.), the last ruler of the Empire, who was murdered shortly after Alexander's final defeat of the Persian army. The reference to Darius the Persian in Neh. 12:22 in relation to high priestly genealogy could be to either Darius II or Darius III. **4** Darius the Mede (Dan. 5:31; 6; 9:1; 11:1),



person identified as a Median ruler after Belshazzar but before Cyrus. There is no satisfactory historical explanation for this reference. It might derive from prophecies speaking of the conquest of Babylon by the Medes (e.g., Isa. 13:17) since a Median Empire is placed between the Babylonian and Persian empires (cf. Dan. 8:20; also the interpretation of the dream in Dan. 2:31–45 and of the vision in 7:3–7; 15–18). ***See also*** Cyrus II; Daniel; Daric; Ezra; Media, Medes; Persia. P.R.A.

darkness, quality regarded as less valuable than light (Eccles. 2:13). Imagery based on darkness is especially prominent in the poetic books where it represents destruction, death, and the underworld (Isa. 5:30; 47:5; Ps. 143:3; Job 17:13; cf. Mark 15:33) in a manner similar to that known in other ancient Near Eastern cultures. Conceived as a curse or punishment (Deut. 28:29; Ps. 35:6), darkness characterizes the coming Day of the Lord (Joel 2:2; Amos 5:18). God's appearance is often accompanied by darkness (1 Kings 8:12), which, according to Gen. 1:2, prevailed prior to creation, although Isa. 45:7 and Ps. 104:20 assert that it was created by God. The Dead Sea Scrolls contrast light and darkness as representing the forces of good and evil, both metaphysically and psychologically; a similar view has been noted in the Gospel of John. F.E.G.

dark saying. ***See*** Parable.

dart. ***See*** Weapons.

Date palm.

date, the sweet fruit of the date palm (*Phoenix dactylifera*). The trees grow as separate male and female plants and must be wind- or hand-pollinated in order to bear fruit five years after reaching maturity. The fruits hang in clusters from the top of the trees and are collected when they ripen in the late summer and early fall. Since the date palm is characteristic of oases and watered places, the fruit is especially valued by the desert traveler. It not only provides a quick, high-energy source when fresh, but also becomes a storable, easily portable food when dried or made into small cakes. The ground and soaked seeds provide a nutritious fodder for camels and other animals. A sweet wine is made from the fermented juice of the terminal buds. The date has been valued as a trade item since early times. ***See also*** Palm. P.L.C.

Dathan (day´thuhn), a Reubenite who, with his brother Abiram, rebelled against Moses, claiming he had led the Exodus in order to rule over the Israelites (Num. 16). The earth swallowed Dathan and Abiram alive (Deut. 11:6).

David

THE MOST POWERFUL KING OF biblical Israel, David (day´vid) ruled from ca. 1010 to 970 B.C. The story of David is recorded in 1 Sam. 16:13–1 Kings 2:12. David belonged to the tribe of Judah and was born in Bethlehem as youngest son of Jesse. He started his career at King Saul's court as player of the lyre, and subsequently became his squire. His courage and leadership in regular skirmishes with the Philistines and the immense popularity he gained as a commander soon earned him great notoriety and caused Saul to feel threatened. A long and complicated process of attraction and repulsion between the two men followed. The psychological scale was turned in favor of David when the old prophet Samuel, who had himself conducted Saul to the first kingship, became disappointed with Saul for theocratical reasons and anointed David as the new favorite of God.

King David playing a harp; from a thirteenth-century Hebrew manuscript.

Path to Kingship: David survived attempts on his life made by Saul in bursts of rage and fled the court. In the south he became a war lord with his own army of outlaws and performed services of protection. He also fought the enemies of Judah in the west and southwest. Although Saul found no way of eliminating him, the pressure he exerted became so strong that David decided to take refuge in Gath, where he became a vassal of the Philistine king Achish. Playing a double game, David maintained good relations with the tribes in the south: Judah, Cain, Jerachmeel, and Simeon. Because of the Philistine generals' mistrust, David was not called upon to perform his duties as a vassal in the final war against Saul. At this time, Israel was defeated on Mt. Gilboa, Saul and three princes were killed in battle, and the Philistines were left a free hand in Ephraim and Galilee. Saul's tribe, Benjamin, emerged to temporarily fill the power vacuum with the impotent kingship of Esbaal in the Transjordan, but the strong man of this rump state, Abner, soon found out that he could not win the civil war that threatened Judah and concluded a pact with David. Retarded by the base political murders of Abner and Esbaal, this development eventually led to the subjection of the northern tribes to David's rule and to their acceptance of him as a king. David ruled Judah from Hebron for seven years and ruled over the whole of Israel for thirty-three years. David created a unified state which would, however, disintegrate after Solomon. The numbers found in 2 Sam. 5:5 for David's reign are, admittedly, typological (seven and forty are holy numbers), but they nevertheless seem to approximate the historical reality as we know it.

Diplomatically, David chose a neutral city for the new capital of his kingdom: Jerusalem. His conquest of this non-Israelite city-state alarmed the Philistine city confederation, but David was able to repel their attacks and settle matters with this enemy for good. During his reign, David increased the status of "the city of David" by bringing to it the ancient Ark, once the mobile palladium of the wandering Israelite tribes. His son,

Solomon, subsequently carried on this policy by building the central state sanctuary, the famous Temple of Solomon. (Three centuries later the Temple became the only legitimate worship center on account of the religious reforms of Josiah; after the Exile the so-called Second Temple, fifth century B.C.–A.D. 70, was its successor.)

Israel an Empire: In the phase of consolidation following his coronation, David triumphed over nearly all the then neighboring nations in a series of military campaigns. In the north he encountered the Aramaic states, and Damascus, Hamath, and Zobah rendered him tribute; in the east and southeast, David subjected the Ammonites and Moab; in the south he took over Edom; in the southwest he subjected small desert tribes like the Amalekites; and in the west he defeated the Philistines. With the Phoenician states and ports, however, he maintained friendly and noncombative relations. David's great power and military effectiveness were internally founded on good organization and the presence of an experienced standing army consisting mainly of mercenaries under the command of the competent military strategist Joab, while externally his power and effectiveness rested on the impotence of the great powers. In the eleventh century B.C. the civilizations along the Nile and between the Euphrates and Tigris passed through a period of weakness that temporarily spared Palestine (a strategic buffer region and zone of passage for trade routes) their meddling influence. Thus, under David and Solomon, Israel was (for a brief century) a powerful empire—for the first and last time.

Faced with Rebellion: This formation of power also had its repercussions. David himself became an absolute ruler after the model of the region, and his place above the law ran counter to the sense of justice and the religious beliefs of many of his subjects. Much discontent was fomented as people viewed the grand court with its predilection for international mores and literature, and especially for its tight administrative grip put on the community in the form of heavy taxes and conscription for purposes hardly understood. The decay of the older tribal and theocratical values and patterns also frightened people. Thus, already during David's lifetime, these growing feelings of discomfort came to a head during Absalom's revolt. This prince made shrewd use of the mood of resistance, suggested political alternatives, and, after thorough preparation, seized power so that David was even forced to leave his own country. When the usurper, however, failed to isolate David at once, the latter gained time to re-align himself with those of his standing army who had remained loyal to him and subsequently to effect a political reversal through a hard battle in the Transjordan. Upon his return to Jerusalem, David discriminated against the northern tribes in favor of his own tribe of Judah and for this he immediately had to pay a high price: a secession of the north under the leadership of Sheba ben Bichri. Once more Joab, who as a statesman had already intervened twice in David's policy toward Absalom, had to save the throne by means of a swift campaign that eliminated Sheba.

Like many great men David omitted arranging for his succession, so that even before his death a vehement struggle broke out at the court. The group around Solomon, headed by his mother,

Bathsheba, and the prophet Nathan, appeared to be the strongest and shortly after David's death eliminated the rival prince Adonijah who was supported by Joab. Joab was subsequently eliminated as well.

David was not only a very powerful leader and personality as both soldier and statesman, he was also a first-class poet. He was the author of the poignant dirge in 2 Samuel 1 as well as many of the compositions the book of Psalms ascribed to him. The court established by him and extended by Solomon gave a tremendous spiritual and literary impulse to the literature of biblical Israel, to its many genres, and to the values conveyed by them. The dynasty David founded survived the disruption after Solomon and kept on ruling in Judah until the Exile, which began in 586 B.C. Its prestige inspired later poets to messianic prophecies; and in the NT his royal line is extended to include Jesus of Nazareth, "the Anointed" (*Christos* in Gk.) as a descendant of David (Matt. 2:6; 21:9; Luke 3:31; 18:38–39). The effect of David's choice of Jerusalem as his city is felt to the present time: in the eyes of the Jews, Christians, and Muslims the city is holy. And the poems of David live on in the liturgy of Jewish and Christian communities, sung to this very day.

A soldier using a sling similar to the type David used in the story of his encounter with Goliath (1 Sam. 17); relief from an orthostat at the palace at Gozan, tenth–ninth century B.C.

The Story of David—the Zenith of Hebrew Narrative: The portrait of David presented here is grounded on the estimate that its only source, 1–2 Samuel, is in outline historically reliable. In any case,

The prophet Samuel anointing David as king of Israel; Byzantine silver plate.

David slaying Goliath and cutting off his head (top) and Abner bringing David with Goliath's head to Saul (bottom). Jonathan, overcome with love for David, gives him his own garments (1 Sam. 17:45–18:4); page from a thirteenth-century French illumination.

the figure of David inspired the narrator(s) to such an extent that this text has become the zenith of Hebrew narrative art. It not only draws a picture of the rise of the untouchable favorite of God, but also of the David who, as a king, yielded to the luxury of absolute power and who, as a father, failed toward his overambitious sons Amnon, Absalom, and Adonijah. Thus a detached, highly critical, but certainly not relentless portrait of profound psychological insight and spiritual depth has come down to us.

David, City of, the name given to the part of Jerusalem that was the Jebusite city, after its capture by David (2 Sam. 5). This oldest part of Jerusalem, which had been an urban site since the early third millennium B.C., was located in the southeastern part of present-day Jerusalem on a land peninsula that is formed by the Kidron Valley on the east and the Tyropoeon Valley (Gk., "Valley of the Cheese-makers") on the west. In area the City of David comprised no more than 7.5 to 10 acres and was thus no more than a medium-sized village.

As a fortified city surrounded by valleys, it was vulnerable only at two points: at its principal water source on the east and at the highest part of the ridge on the north, a part of the city's fortifications that received continuing attention. The city's principal water source was the Gihon spring (Heb., "gusher"), which flowed at the foot of the ridge on the Kidron side, below and outside the city walls. Excavations have shown that the spring was made accessible to the Jebusites by means of a shaft that connected the spring to a point just inside the city walls, about midway down the slope of the valley. The narrative of David's conquest of the city in 2 Sam. 5:7–8 suggests that he took the city by stealthily gaining entry to it through this water shaft. Soon after he took the city, David undertook to secure its strategic weak point on the north. He repaired the walls and the *Millo* (2 Sam. 5:9; Heb., "filling"), which is probably to be identified with the stone retaining walls of the terraces on the slopes, which enabled the expansion of the habitable area of the city. That the spring remained a strategic weak point is attested by the construction of a water tunnel by Hezekiah in the late eighth century B.C. Its purpose was to secure the city's water source against siege by the Assyrians (2 Kings 20:20; 2 Chron. 32:30), a feat recorded in the Siloam Inscription.

Other than the Jebusite water shaft and some of the walls of the Jebusite-Davidic city, almost nothing survives in Jerusalem today from the period of David or Solomon. Neither David's palace nor his tomb have been found. The structure on Mount Zion today called "David's Tomb" has neither archaeological nor historical claim to authenticity.

David's son and successor, Solomon, expanded the city to the north, where he constructed a large platform on which he built the Temple and other elaborate royal buildings (1 Kings 6–7). After Solomon the city grew farther to the north and to the west on the hill today identified as Mount Zion, a hill that is protected on the south and west by the Valley of Hinnom. This identification of Mount Zion, which in 2 Sam. 5:7 is applied to David's city, derives from the Jewish historian Josephus, who identified all of the Jerusalem of his day (the first century A.D.) with the city of David. ***See also*** Hezekiah; Jerusalem; Kidron; Siloam Inscription. Dead Sea, the lake into which the Jordan River flows. The lake is fifty miles (80 km.) long by ten miles (16 km.) wide. The biblical names vary: "Salt Sea" (Gen. 14:3; Num. 34:3, 12; Deut. 3:17; Josh. 3:16; 12:3; 15:2, 5; 18:19), "Sea of the Arabah" (Deut. 3:17; 4:49; Josh. 3:16; 12:3), "Eastern Sea" (Ezek. 47:18; Joel 2:20; Zech. 14:8), and "Sea of Sodom" (2 Esd. 5:7). The shoreline is 1,294 feet (394 m.) below sea level, with the greatest depth about 1,300 feet (396 m.) below that, and it has a twenty-five percent mineral content, entirely the result of evaporation. In ancient times it was valued for its salt and for the asphalt that occasionally floats to the surface. The water is usually calm because of its great density, but dangerous storms can develop.

The average annual rainfall is only 2 inches (50 mm.), with occasional severe thunderstorms. The steep, desolate western slopes leave sufficient room for a north-south road, and there are two important springs, one at modern 'Ain Feshka close to Qumran in the north and the other at En-gedi in the center. An important feature of later prophecy is the promise that living water would flow in both summer and winter from the Jerusalem Temple down these arid slopes into the Dead Sea, making it fresh and productive (Ezek. 47:1–12; Zech. 14:8). In the extreme southwest is the remarkable salt dome of Har Sdom. Most of the eastern shore is formed of forbidding sandstone precipices, cleft by the narrow gorges of the Zerqa Ma 'in and the Arnon, but in the southeast, behind the Lisan peninsula, there is a coastal plain where winter crops are grown. At the exit of the Kerak wadi (probably the OT Ascent of Horonaim; cf. Jer. 48:5) is the important Bronze Age site of Bab edh-Dhra'. The whereabouts of Sodom and Gomorrah (Gen. 13:10; 19:24) remain a total mystery. ***See also*** En-gedi; Qumran, Khirbet; Sodom. D.B.

Dead Sea Scrolls, the. ***See*** Scrolls, The Dead Sea; Texts, Versions, Manuscripts, Editions.

death, the end of physical and/or spiritual life. Ancient Israel's official response to mortality was, first, to accept it as God's original design and, second, to forbid worship that was concerned with the dead (Lev. 19:28; 20:1–11). Neighboring cultures believed that the dead lived on in the underworld in a communicative state (Deut. 18:9–14), but Israel's theologians taught that they were, for practical purposes, nonexistent (Eccles. 9:5–6). Nonetheless, foreign ideas and practices continued (1 Sam. 28; Isa. 8:19).

Mortality must be distinguished from other concepts of death. Biologically, death is the end of every creature's existence; God alone is immortal (Ps. 90:1–6). Metaphorically, "death" is a value judgment upon those things that detract from life as the Creator intended it (1 Sam. 2:6–7). Mythologically, death is a power that acts independently (Job 18:13; Jer. 9:21).

The last usage is a rare vestige of polytheism, since orthodox religion denied the existence of more than one divine force. Thus death was reduced to a natural process and no Devil was acknowledged to exist. The second usage (metaphorical) contrasts "life" with psychological, sociological, and spiritual "death," which holds the world in its grip. "Life" was mediated through Israel's sociology, ethics, and worship.

The first usage (biological) consists of narrative observations that so-and-so died. This reality did not lead to the belief that life was therefore meaningless. Nonetheless, a death that was premature (Isa. 38:1–12), or violent (1 Sam. 15:32), or that left no heir (2 Sam. 18:18) produced anxiety.

Death and the Divine Plan: Mortality, within the divine plan, is outlined in Gen. 2–3. The first humans rebelled against their Creator and were denied further access to the Tree of Life. Their status as creatures thus proceeded to its natural conclusion. This is the understanding of human destiny in the OT and Jewish literature. However, another reading of the text was to become evident in the intertestamental literature and the NT. Since death might have been delayed indefinitely through obedience, perhaps the intent was that the couple live forever! Death could then be understood as an evil intrusion into the divine plan.

This new understanding was suggested by several realities. First, internal conflict within the religious group and external persecution led to a new religious outlook (Apocalypticism). God's assumed desire for a world like that at creation must produce a sudden transformation of the earth (Daniel)—perhaps a return to the paradise of Eden. Second, Greek culture introduced a new view of humans. In traditional biblical thought, death was total (there is no distinction between body and soul). In Greek thought, a "soul" was thought to exist and to be detachable from the corpse. Thus the dead live on, somewhere, and to a Semite (though not to a Greek) they would be available for bodily reconstruction (resurrection). Bodily death, then, came to be seen as a temporary evil. Third, if one's lifespan could be shortened by sin (Prov. 10:21; 11:19; Job 36:13–14), could that also be the cause of mortality?

Therefore, in some of the intertestamental literature, mortality is decried as the creation of a "devil" rather than as the Creator's design (Wisd. of Sol. 1:12–13; 2:23–24).

In the NT: The NT writers accept this new perspective. Paul thus depicts death as an unintended fate unleashed as a consequence of primeval disobedience (Rom. 5:18–19). However, since death came about within history (rather than from the Creator's design), it is subject to a historical solution: if sin can be overcome, mortality can be countered. This has been done through the appearance of a new "Adam" (Christ) who empowers his followers, just as the old "Adam" affected those who came after him (1 Cor. 15:45–49). His resurrection demonstrated that death has lost its power.

In the synoptic Gospels, little attention is given to mortality. It serves primarily as an incentive to obey Jesus while there is yet time (Matt. 3:1–10; Luke 12:16–20). In the Gospel of John, mortality is even less an issue. Rather, it is "death" and "life" in the metaphoric

sense that are crucial. It is not so much that Jesus will return and the dead will be resurrected (as in Apocalypticism) as it is that Jesus is already present, mediating "eternal life" (1:4; 3:36; 5:24), although the idea that the dead will be raised is also present (5:28–29; 6:39, 54; 11:24).

The Bible's final word on the matter is that of Apocalypticism: mortality and martyrdom, as the goal of Satan and his instrument Rome, will shortly come to an end. The paradise the Creator intended will then be restored and "death will be no more" (Rev. 21:4). ***See also*** Devil; Eternal Life; Hades; Resurrection; Soul. L.R.B.

Debir (dee'buhr; Heb., "back part"?). **1** A king of Eglon who joined the Amorite confederation trying to stop Joshua (Josh. 10:3). **2** Part of the north border of Judah (Josh. 15:7), probably Thoghret ed-Debr, "pass of Debir," ten miles east of Jerusalem and about eight miles southwest of Jericho. **3** A city of Gad (Josh. 13:26), probably modern Umm el-Dabar about twelve miles north of Pella. It may be the same as "Lodebar" (Amos 6:13; 2 Sam. 9:4–13; 17:27), a refuge for Jonathan's son Mephibosheth, and later a source of assistance for David. Amos used it as a sarcastic reference to insignificant business by changing the vowels of the word to make it mean "a thing of no value." **4** A Canaanite city in Judah about eleven miles southwest of Hebron (Josh. 10:36–39; 12:13). Inhabited by Anakim (Josh. 11:21), it was assaulted by Joshua or by Calebites (Josh. 15:15–17; Judg. 1:11–15) or both, and became an administrative district headquarters (Josh. 15:49). It was assigned as a levitical city (Josh. 21:15; 1 Chron. 6:58) and is twice mentioned as having another earlier name: Kiriath-sepher, Heb., "city of the scribe" (Josh. 15:15; Judg. 1:11); Kiriath-sannah (Josh. 15:49) is a probable misspelling of that name. The site location is debated. Proposals have included modern Khirbet Rabud (M. S. Astour, M. Noth), but the general weight of opinion has favored modern Tell Beit Mirsim over other possible tells in the vicinity. The excavation of Tell Beit Mirsim by W. F. Albright in four seasons (1926–1932) set a new mark in Palestinian archaeology. The separation of strata and their ceramic contents from each other allowed the first development of a decisive ceramic chronology for the periods from Early Bronze (3000–2000 B.C.) through Iron Age II (900–600 B.C.).

Deborah (deb'uh-ruh; Heb., "bee"). **1** Rebekah's nurse (Gen. 35:8; 24:59). **2** An Israelite judge and prophet. Though the exact duties of the judges are not clear, some appear to have exercised legal functions while others were purely military leaders. Deborah combined these two important offices in addition to holding a third one, that of prophet (Judg. 4:4). She rendered legal decisions to Israelites who came to her in the hill country of Ephraim (Judg. 4:5), and she led an Israelite coalition to victory over the militarily superior Canaanite forces of Sisera in the plain of Esdraelon. This was a strategic battle in the struggle for control of central and northern Palestine. Deborah's victory is recorded in prose (Judg. 4) and poetry (Judg. 5). In the prose version, her general, Barak, refused to go into battle unless Deborah accompanied him. She agreed, declaring that "the Lord will sell Sisera into the hand of a woman." That woman, we discover later on, is not Deborah, but another courageous woman, Jael.

The poem, known as the "Song of Deborah," is one of the oldest examples of biblical literature, dating ca. 1125 B.C. and roughly contemporaneous with the events it describes. Vivid and fast-paced, with a repetitive style akin to older, Canaanite poetry from Ugarit, it is widely acclaimed for its literary qualities. It graphically portrays the excitement of the battle in which God comes from the South (Edom, Sinai) to lead the Israelite troops as well as the cosmic forces against the enemy ("From heaven fought the stars/from their courses they fought against Sisera," Judg. 5:20). The poem concludes with a striking juxtaposition of two "domestic" scenes: Jael's assassination of Sisera (5:24–27) and Sisera's mother waiting anxiously for the return of her spoil-laden son (5:28–30). Whereas the prose version mentions only the tribes of Naphtali and Zebulun, the poem praises Ephraim, Benjamin, Machir, Zebulun, Issachar, and Naphtali for their brave participation in the battle, while censuring Reuben, Gilead, Dan, Asher, and Meroz (otherwise unknown) for not responding to the muster. Though more tribes are mentioned as cooperating in this crucial battle than any other in Judges, the traditional twelve tribes are not all enumerated. Judah, Simeon, and Levi are missing, while Machir and Gilead appear instead of Manasseh and Gad.

Judges 4:4 identifies Deborah in Hebrew as an *'eshet lappidot,* usually translated "wife of Lappidoth" but perhaps meaning "spirited woman." No Lappidoth is known to us. **3** The grandmother of Tobit (Tob. 1:8). ***See also*** Barak; Jael; Judges, The Book of; Poetry. J.C.E.

debt, owing money or property of some kind to another person. Israelite law forbade charging fellow Israelites interest on loans (Exod. 22:24; Deut. 23:20; Lev. 25:35–38). Though it was considered a good deed to lend money to the poor (Ps. 37:21; Ecclus. 29:1–2; Matt. 5:42), many refused to do so because they would not be paid back (Ecclus. 29:3–7).

The prohibition against charging interest was not observed (Prov. 28:8; Ezek. 18:8, 13, 17; 22:12; Matt. 25:27; Luke 19:23). Neh. 5:1–13 speaks of the people as burdened with debts. The annual interest rate among Jews at Elephantine in the fifth century B.C. was 12 percent.

Movable goods might be taken as a pledge to repay, though the law forbade taking a person's means of livelihood (Deut. 24:6–13). Such goods may have represented persons who stood to guarantee a pledge, often the debtor's children, who would become enslaved to the creditor if the debt was not paid (2 Kings 4:1–7; Neh. 5:2–7; Exod. 22:24; Isa. 50:1). Other persons could intervene as surety on behalf of an insolvent debtor and assume the responsibility for getting the debtor to pay or be liable to seizure themselves (Prov. 6:3–5; 20:16; Ecclus. 29:14–20).

Sabbatical year legislation requiring that slaves be set free was aimed at the problem of persons who had become enslaved because they were unable to pay debts. Approach of the sabbatical year then became an excuse for the refusal to grant a loan (Exod. 21:2–6; Deut. 15:1–11). In the time of Herod the Great, Hillel permitted contracts to contain a *prosbol* (Gk.), a clause by which the debtor renounced the sabbatical privilege.

Decapolis (di-kap´uh-lis), a federation of ten cities of Hellenistic culture in an area east of Samaria and Galilee. The Roman scholar Pliny the Elder (ca. A.D. 77) lists them as Damascus, Philadelphia, Raphana, Scythopolis, Gadara, Hippos, Dion, Pella, Gerasa, and Canatha. ***See also*** Cities.

Decision, Valley of, the name given in Joel 3:14 to the place where God will execute judgment on the Day of the Lord against the nations gathered for the eschatological assault against Jerusalem. The valley is also called "Valley of Jehoshaphat" in Joel 3:2, 12. Traditional interpretation identifies the Valley of Jehoshaphat/Decision with the Kidron Valley, east of Jerusalem, where the pious kings Asa and Josiah are reported to have destroyed pagan idols (1 Kings 15:13; 2 Kings 23:4, 6, 12; 2 Chron. 15:16; 29:16; 30:14).

decrees, in the ancient world, declarations (usually in written form) by rulers or other persons in authority directing the conduct of especially significant matters for communities or individuals. The decree of Cyrus calling for the rebuilding of the Temple in Jerusalem (Ezra 5:13, 17) and the decree of Caesar Augustus for a census (Luke 2:1) are but two examples of such decrees in the OT and NT (see also, e.g., Isa. 10:1; 2 Chron. 30:5; Ezra 6:1, 3; Esther 1:20; Dan. 3:10; Acts 17:7). Apparently, God's will and purposes were also considered "decrees," although these did not have to be written to be in force. God exercises these decrees in areas of human conduct and destiny (Dan. 4:17, 24), in the development of human history (Ps. 2:7), and in the founding and ordering of the created universe (Job 28:26). The community of Israel also understood the laws of the covenant, as established initially by Moses, to be God's decrees. ***See also*** Commandment; Covenant; Law.

Dedan (dee´duhn), the city and kingdom of the Dedanites, an Arabian people of unclear origin (Gen. 10:6–7; 25:1–3). Al-'Ula, an oasis ca. fifty miles southwest of Tema, was central to Dedan's far-reaching commercial activities, which included trade with Tyre (Ezek. 27:20). The prophets denounced Dedan (Isa. 21:13; Jer. 25:23; 49:8; Ezek. 25:13). ***See also*** Arabia.

dedication, setting something apart, or marking new use or practice. The Hebrew root *khnk* and its Aramaic cognate appear seventeen times in the Bible, sixteen of which are in the sense of dedication (the one exception is Prov. 22:6 where the verb is used in the sense of instruction or training).

A man who had not dedicated the new house he built was ordered to return home from the mobilized army in order to dedicate it (Deut. 20:5). No ceremony is mentioned, however. According to Num. 7:10–88, the dedication of the sacrificial altar in the desert occurred on the day of its anointing and sanctification (v. 1). The dedication consisted of lavish offerings—silver plates, basins, gold spoons full of incense, bulls, rams, lambs with their meal offerings, and goats—all presented by the tribal princes. The dedication of the altar of Solomon's Temple took seven days (2 Chron. 7:9). Solomon's Temple was dedicated with a multitude of sacrifices (1 Kings 8:63; 2 Chron. 7:5). The relative paucity of offerings at the dedication of the rebuilt Temple of the returned exiles from Babylon indicates their meager resources (Ezra 6:16–17). The words "song of dedication of the Temple" appear to be an editorial interpolation in Ps. 30:1 that assigns that Psalm to the festival of Hanukkah (see *Soperim* 18:2). The dedication of the rebuilt wall of Jerusalem during the days of Ezra and Nehemiah was accompanied by music, song, thanksgiving offerings, and joy (Neh. 12:27–45). The pagan dedication of Nebuchadnezzar's idol was accompanied by music and worship (Dan. 3:2–5).

It appears that a dedication differed from a sanctification (or consecration) in that the community as a whole participated in the former, while the latter was performed only by those responsible for the sanctified object(s) (e.g., the priests). ***See also*** Altar; Dedication, Feast of; Temple, The. J.U.

Dedication, Feast of, or Hanukkah (hahn´uh-kuh), a Jewish festival celebrating the purification of the Temple in the time of the Maccabean revolt. On the 25th of Kislev (December), 167 B.C., during the religious persecution of the Jews by the Seleucid Antiochus Epiphanes, the altar of the Temple was polluted with pagan sacrifices. Observant Jews, under the leadership of Mattathias (a priest) and his five sons, rebelled against the Seleucids. Upon Mattathias's death, his son Judas Maccabee took command of the revolt, won several victories over the Seleucid army, and reconquered Jerusalem. After cleansing the Temple, rebuilding the sanctuary, consecrating the courts, and making a new sacrificial altar and holy vessels, "they burned incense on the [incense] altar and lighted the lamps on the lampstand, and these gave light in the Temple. They placed bread on the table and hung up the curtains . . . " (1 Macc. 4:50–51). Then, on the 25th of Kislev, 164 B.C., three years to the day after the pollution of the altar, the new altar was dedicated with sacrifices, song, music, and joyous worship for eight days (vv. 52–58). Judas and the people determined that those eight days of dedication should be celebrated annually beginning with the 25th of Kislev (December; v. 59). Hanukkah thus became the only Jewish festival not ordained in the Hebrew Bible.

It has been suggested that the eight days of celebration copy Solomon's consecration of the Temple (2 Macc. 2:12) or Hezekiah's (2 Chron. 29:17). However, all the testimony points to the intention to celebrate Hanukkah as a second Feast of Tabernacles. "And they celebrated it for eight days with rejoicing in the manner of the Feast of Booths, remembering how not long before, during the Feast of Booths, they had been wandering in the mountains and caves like wild animals" (2 Macc. 10:6, also vv. 7–8 and 1:9, 18). It was for this reason that Hanukkah was tied to Solomon's consecration, which was held at the time of the Feast of Booths (1 Kings 8:2). Furthermore, as during the Feast of Tabernacles, Jews recite the entire Hallel (Pss. 113–118) daily.

It was apparently the relighting of the Temple candelabras that led to the festival also taking the name "lights" (Josephus *Antiquities* 12:7:7). Eventually it became customary for Jews to light a special Hanukkah candelabra in the home, adding one light each night during the festival. A legendary story (*t. Sabb.* 21b) of a small cruse of holy oil discovered at the cleansing of the Temple that was miraculously able to light the Temple lamp for eight days until more oil could be supplied has supplanted the origins of the festival rites.

Hanukkah's ongoing significance lies in its commemoration of the victory of the few whose desire for freedom to practice their religion impelled them to battle against far greater forces. Indeed, were it not for the Maccabees, the Jewish people and their monotheistic faith might have perished. ***See also*** Dedication; Tabernacles, Festival of. J.U.

defense, protection against hostile acts mounted against an individual, a city, or a nation. The requirements for defense in the ancient world were factors in city planning and in national policy. Regarding the former, the "defensibility" of a city and a protected water supply were of paramount importance. One of the oldest known urban structures in Palestine is the neolithic tower at Jericho. Its purpose was defense against assault, among other things. Major cities from the Early Bronze Age (3000–2000 B.C.) had walls, with some cities surrounded by two of them. This pattern continued through the period of the kings in Israel. To protect the water supply at key sites, water tunnels or shafts were dug from inside the city's walls to the water table or spring located outside the walls. Examples of these can be found at the ancient sites of Gibeon, Jerusalem, Hazor, and Megiddo.

Israel's location at a crossroads in the ancient Near East between Mesopotamia to the north and Egypt to the south required a strategic policy for defense. This requirement was one reason the kings in Israel or Judah maintained a standing army. According to 2 Chron. 11:5–12, Rehoboam fortified key sites in Judah for defensive purposes, perhaps in response to a campaign in Palestine by Pharaoh Shishak (ca. 922 B.C.). According to the annals of the Assyrian king Shalmaneser III (859–824 B.C.), Ahab of Israel was involved in a coalition with neighboring states to oppose Assyrian control of Syro-Palestine and the Mediterranean coast.

In the Sermon on the Mount, Jesus taught an ethic that placed concern for an enemy or opponent above one's personal defense (cf. Matt. 5:23–26, 43–48). J.A.D.

deity, the divine quality that distinguishes God from other entities (Rom. 1:20; Col. 2:9); therefore God cannot be likened to any created thing, however precious (Acts 17:29). ***See also*** God.

Delaiah (di-lay´yuh; Heb., "God draws up"). **1** The head of one of the twenty-four divisions of priests organized by David (1 Chron. 24:18). **2** A royal official who urged Jehoiakim not to burn Jeremiah's scroll (Jer. 36:12, 25). **3** The head of a family that returned from exile with Zerubbabel (Ezra 2:60; Neh. 7:62; 1 Esd. 5:37). **4** A descendant of David through Zerubbabel (1 Chron. 3:24). **5** The father of a contemporary of Nehemiah (Neh. 6:10).

Delilah (di-l*i*´luh), a woman, probably Philistine, who was loved by Samson. After three unsuccessful attempts to discover the secret of his strength, she succeeded and betrayed him to the

Philistines for money (Judg. 16:4–22). Her name (perhaps meaning "loose hair" or "small, slight") is a pun on the Hebrew word for "night" (*laylah*) while Samson's is related to "sun" (*shemesh*). ***See also*** Philistines; Samson.

deluge, an excessive amount of rain (Ezek. 13:11, 13; 2 Pet. 3:6). ***See also*** Flood, The.

Demas (dee´muhs), originally one of Paul's "fellow workers" who joins Paul in sending greetings to Philemon, Apphia, and Archippus (Philem. 24; cf. Col. 4:14). According to 2 Tim. 4:10, Demas, "in love with this present world," deserted Paul and went to Thessalonica.

Demetrius (di-mee´tree-uhs). **1** A silversmith in Ephesus who instigated a riot against Paul because Paul's missionary activities threatened the business of making silver statuettes of the goddess Artemis (Acts 19:24–41). ***See also*** Artemis. **2** A Christian who was commended by the author of 3 John (v. 12).

democracy, a system of government in which sovereignty rests with the people themselves, although not always with all the people; women and slaves are often excluded (see 1 Cor. 7:20–31; Col. 3:22; 4:1). A primitive kind of democracy, in which an assembly of the eligible controlled basic decision making is thought to have preceded Mesopotamian aristocracies (late fourth–early third millennium B.C.). It has occasionally been suggested that a similar system may have existed in early Israel, with power resting in groups such as the elders. The tribal structure that this reflects may even have persisted after the creation of a monarchy and the increased social stratification that followed, although many passages cited in this regard, particularly those alluding to "all Israel" or "all the people," are probably schematic or anachronistic. Some scholars have seen what they call an "economic democracy" in early Israelite tribalism. Others have pointed to a kind of "social democracy," in which the worth of each individual is stressed (see Acts 10:34–35; 2 Chron. 19:7). More to the point, perhaps, are the types of biblical literature like Deuteronomy and the prophetic writings that emphasize just treatment for those in the lower social strata, "the stranger, the widow, and the orphan" (Deut. 24:19–21), and Jesus' habit of disregarding social rank in choosing those with whom he associated (e.g., Matt. 9:10; Mark 2:15–17; Luke 7:34). F.E.G.

demon, the English transliteration of a Greek term (*daimōn*) originally referring to any one of numerous, vaguely defined spirit beings, either good or bad. In the NT they are understood as evil spirits, opposed to God and God's people. In the KJV, the term is regularly translated "devil," a word that appears in the RSV only as the translation of a different Greek term meaning "accuser" or "slanderer" (*diabolos*). It is used as a virtual synonym for "Satan."

In the ancient world, there was widespread belief in spiritual powers or beings that existed in addition to the well-known gods and goddesses. These beings were not understood as necessarily evil, though some might be. The idea that many or even all such beings were allied with the forces of darkness and wickedness only came into focus, probably under the influence of Persian thought, during the intertestamental period of Judaism.

There are traces of the belief in harmful spirits in the OT writings (e.g., Gen. 6:1–4; Lev. 16:6–10, 26; Isa. 34:14; Job 6:4; Ps. 91:5), but little was made of this idea in Hebrew thought until the late postexilic period. Then, the belief developed that there existed not only numerous evil spirits or demons but also a leader for these evil forces. This leader came to be known in Jewish thought by several titles, though the most common designation was Satan (the Greek title "the devil" was then used as a virtual synonym for Satan, as, e.g., in John 8:44). As a result of this type of thinking, the idea developed that there were armies of demons, under the leadership of Satan or the devil, doing battle with God and God's allies.

The idea then developed that demons could invade human bodies and personalities and cause mental illness, physical disease, or other specific problems such as deafness or blindness. Some even believed that demons could take control of nature and cause natural calamities and disasters. Such ideology is clearly reflected in the synoptic Gospels of the NT, where Jesus is known as one who characteristically exorcises demons (e.g., Matt. 8:28–34; Mark 5:1–20; Luke 8:26–39; Matt. 12:22–32; Mark 3:22–27; Luke 11:14–23).

The apostle Paul understood the "principalities" and "powers" to be evil forces in this world (Rom. 8:38; cf. Col. 1:16; 2:15; Eph. 3:10; also 1 Cor. 10:20). In some of the later NT writings, however, the place of the demons began to give way to the centrality of the leader of the demonic forces, namely, Satan or the devil (who is sometimes referred to as "the evil one"). Thus, in the Fourth Gospel, there are no references to demon possession or exorcism. The devil has become *the* instigator of evil (e.g., John 13:2), though the charges fly back and forth between the religious authorities and Jesus as to who "has a demon" (John 7:20; 8:48–49; 10:20–21), probably meaning, in the Fourth Gospel, who was thoroughly evil and opposed to God.

The idea that there are evil forces in the world that manifest themselves in various ways is still valid. How one articulates this idea may change from one culture to another, however. Demonology was a part of the culture of the NT

world and should be interpreted and understood against that background. ***See also*** Angel; Belial; Devil; Magic and Divination; Satan.
J.M.E.

demonology. ***See*** Demon; Devil.

demythologizing, a term associated primarily with the twentieth-century NT scholar Rudolf Bultmann. Bultmann argued that both the language and the conceptual framework of the NT are essentially mythological; that is to say, they reflect a worldview that characteristically attributes both the origin and goal of the cosmos as a whole and certain unusual or astonishing happenings within the cosmos to the activity of nonnatural or supernatural causes, forces, or personages. These are objectified and represented in terms of space, time, causality, and substance and thus treated as but another part of the phenomenal world. They are therefore, at least in principle, subject to the same empirical methods of knowledge as any other objects.

According to Bultmann, such "mythology" is problematic for at least two reasons: first, modern human beings hold a "scientific," not a "mythological," worldview, and this "scientific" worldview refuses—indeed, is unable—to reckon with the possibility of any intervention in this world by transcendent or supernatural powers. Thus, for people in the twentieth century, most of the NT has become unintelligible, unbelievable, and irrelevant. Second, the mythological statements of the NT are inappropriate to Christian faith itself. The real intent of NT mythology, like that of mythology in general, is not to provide information about a supreme being and that being's activity, but rather to present a particular possibility for understanding one's own human existence. Modern people, however, read this mythology in such a way as to objectify God and the divine actions, expressing them in categories suitable only to science, thus doing violence to the true meaning of God's transcendence by reducing God's hiddenness to this-worldly immanence that can be observed and evaluated objectively.

Bultmann argued that the message of the NT could and must be released from both its mythological framework and its mythological formulation. It is important to note, however, that he did not propose to eliminate the mythological elements; rather his intent was to reformulate them in strictly "existentialist" terms. Only then would the gospel's understanding of human existence become clear and challenge people to genuine existential decision regarding their own self-understanding. Bultmann himself believed that modern existentialist philosophy, particularly as developed by Martin Heidegger, with its phenomenological analysis of the formal structure of human existence, offered the best philosophical framework for showing that the mythological concepts of the NT actually correspond to the realities in the life of modern human beings. He summarized authentic Christian self-understanding as one of radical freedom from the past and openness to the future. In other words, authentic existence, which is the concern of the NT, is the abandonment of all human or worldly security and the readiness to find security where none can be discerned, that is, in the unseen and unknown possibilities of every future moment. Authentic existence means understanding oneself no longer in terms of one's past, but solely in terms of one's future, which continually presents itself in the form of a gift.

Although Bultmann's proposal to "demythologize" the NT is rarely discussed today, it provoked heated debate during the 1950s and 1960s, particularly in Europe but also in Great Britain and the United States. Scholarly criticism was directed against his definition of "myth," his understanding of the nature and function of myth, and his picture of modern humanity as wedded to a "scientific" worldview. Of particular concern was the question of whether such a demythologizing and existentialist interpretation of the NT as Bultmann proposed could be carried out consistently and thoroughly without in fact distorting or perverting the essential thrust of the NT message. Many assailed Bultmann's position as an implicit denial of the essentials of Christian faith, a reduction of the gospel to an existentialist philosophy. Others, on the "left," criticized what they viewed as Bultmann's unwillingness to carry his program of demythologizing and existentialist interpretation consistently and thoroughly to its logical conclusion, namely a complete reformulation of the NT message as the expression of a concept of authentic existence that would eliminate both the uniqueness and the necessity of Christ. ***See also*** Myth.

denarius (di-nair´ee-uhs; KJV: "penny"; pl. denarii), Roman silver coin representing a worker's daily wage (Matt. 18:28; 20:2, 9, 13; 22:19; Mark 6:37; 12:15; 14:5; Luke 7:41; 10:35; 20:24; John 6:7; 12:5; Rev. 6:6). Devaluation under Nero early in the second half of the first century A.D. cut the value of the denarius in half.

deputy, an official of secondary rank (1 Kings 22:47); the same term is commonly translated

"officer" or the like in 1 Kings 4:5. Elsewhere, Greek and Hebrew words that the KJV renders "deputy" are now more commonly regarded as indicating specific officials (hence "proconsul," "governor," etc.).

Derbe (duhr´bee), a city in the region of Lycaonia in central Asia Minor where Paul and Barnabas won believers at the end of their first journey through the Roman province of Galatia (Acts 14:20–21). Paul returned here during his second journey (Acts 16:1). Paul's companion Gaius was from Derbe (Acts 20:4). ***See also*** Gaius; Lycaonia.

desert, an area inhospitable to human habitation. Absolute desert, i.e., a region where rain almost never falls, is in the Middle East to be found only in the Sahara, the peninsula of Arabia, and Iran. The deserts of Palestine, Syria, Transjordan, and Sinai are all "tame deserts," with a little rain every winter, often in sudden storms causing dangerous flash floods. Such rain as occurs tends to fall in March and April, or even early May, when the high-pressure system over Arabia is breaking up. Occasionally heavy rain can occur more frequently during the winter, and then the desert does indeed "blossom abundantly" (Isa. 35:2).

The character of the desert varies greatly. On the Transjordan plateau it is mainly a level area carpeted with millions of small stones (Arabic *hamada*), and further east is the formidable and desolate region of black basalt (Arabic *harrah*). In the south the plateau has been broken by a complicated network of geological faults, and the desert here consists of broad sandy corridors between towering cliffs. In Palestine the southern desert contains much *hamada,* with some sandy areas on the west and precipitous slopes to the rift valley on the east. The Sinai desert is low in the northern basin but rises to a towering granite massif in the south, reaching 8,671 feet (2,637 m.) in Jebel Katarina, close to Jebel Musa, the traditional site of Mt. Sinai. Sand dunes exist in only very few places, e.g., parts of north Sinai and the extreme south of Transjordan, and are always extremely small and restricted in area.

In the OT four Hebrew words are used for desert: "desolate land" (*midbar*), which is by far the most common; *'arabah,* normally used for the dry plain of the rift valley, especially south of the Dead Sea; "wasteland" (*yeshimon*), used especially for the barren dissected slopes of Judah overlooking the Dead Sea; and "dry, deserted area" (*ḥarbah*). With the exception of the last all these are also translated as "wilderness," and the two words "desert" and "wilderness" are really interchangeable.

In biblical times, although no longer the case today, the desert, especially in Transjordan and Sinai, was the home of a multitude of wild animals, e.g., gazelles, onagers, wolves, foxes, leopards, hyenas, and ostrich. In the NT period the Transjordan and Palestine deserts had been largely "tamed" by the Nabateans to promote their far-flung trade, and they managed to cultivate patches of ground that had never been farmed before. True deserts, of course, are nowhere to be found in Jesus' homeland in Galilee. The words translated "wilderness" (Gk. *erēmos, erēmia*) refer to uninhabited areas (Matt. 4:1; 14:13; 15:33; Mark 1:12–13; 6:31; Luke 4:2), but the writers certainly also had in mind parallels with Israel's testing and feeding in the desert during the Exodus. ***See also*** Nabatea, Nabateans; Sinai, Transjordan. D.B.

desolating sacrilege. ***See*** Abomination That Makes Desolate, The.

Deuel (d*oo*´uhl), the father of Eliasaph, Moses' assistant from the tribe of Gad (Num. 1:14); he is named in connection with his son's tribal leadership functions in making offerings (Num. 7:42, 47) and in the procession of companies in the wilderness (Num. 10:20).

deuterocanonical (dy*oo*´tuh-roh-kuh-non´i-kuhl) **literature,** those books or parts of books of the OT that are found in the Greek Septuagint (LXX) translation but not in the Hebrew text. These books are accepted as Scripture by the Roman Catholic and Orthodox communions but rejected by the reformation churches, which confined themselves to the Hebrew Scriptures. They are also referred to as the apocryphal ("hidden") books, but "deuterocanonical" is perhaps to be preferred because "apocryphal" has the pejorative connotation of "spurious" or "heretical." Deuterocanonical means secondarily canonical or added later to the canon and is a more descriptive and neutral term introduced by Sixtus of Sienna in 1566. The books recognized as deuterocanonical and authoritative by Roman Catholics are: Tobit, Judith, Wisdom of Solomon, Ecclesiasticus (also called Sirach or Ben Sira), Baruch (including the Letter of Jeremiah), 1 and 2 Maccabees, and additions to the books of Esther and Daniel. The canon of the Greek Orthodox community also includes 1 Esdras, the Prayer of Manasseh, Psalm 151, and 3 Maccabees, with 4 Maccabees as an appendix. ***See also*** Apocrypha, Old Testament; Septuagint; Vulgate. A.J.S.

Deuteronomist (dy*oo*´tuh-ron´uh-mist), the term for the person(s) responsible for a specific view of God's relationship to human beings incorporated in the OT books from Deuteronomy to 2 Kings. The nomenclature used by scholars to describe the book of Deuteronomy and the history writing that emerged from that tradition is complicated and diverse. The term "Deuteronomist" refers

to the history writer(s) who shaped the material in those books (Deut.–2 Kings) to explain that the judgment of Israel by God was due to the grave sins of the people. This judgment was justified and was explained to those who were suffering in order to get them to change their ways and return to obedience to God's law. The view of the relationship between this history writer and the author of Deuteronomy varies among contemporary scholars. The origins and date of the traditions that are included in Deuteronomy have contributed to the nomenclature problems. Therefore it may be best to refer to the historian, irrespective of the dating, as the Deuteronomistic historian (usually abbreviated Dtr.). Deuteronomic (usually abbreviated Dt.) may then be used to refer to the core of materials in the book of Deuteronomy. ***See also*** Deuteronomy; Sources of the Pentateuch. K.H.R.

Deuteronomistic (dy*oo*´tuh-ron´uh-mis´tik) **framework,** the framework that shapes the telling of the story of Israel's judges and kings (Judg.–2 Kings). The stories of the judges repeat a four-part pattern: apostasy, punishment often in the form of oppression by the enemy, a cry for help or conversion, and deliverance or liberation. This pattern can most easily be observed by reading the account of Othniel (Judg. 3:7–11). The accounts of the kings not only give an evaluation based upon the degree to which the Deuteronomic laws concerning the centralization of worship in Jerusalem were followed but also introduce the king by such items as dating in relation to kings in the other Israelite kingdom, residence, length of reign, age of the king at accession, and occasionally his mother's name. The account is concluded by reference to other sources, place of burial, and the name of the successor. A good example is the framework used in the account of Manasseh's reign in 2 Kings 21:1–26. ***See also*** Deuteronomist; Judges, The Book of; King; Law. K.H.R.

Deuteronomistic historian, the person(s) responsible for the history that runs from Deuteronomy through 2 Kings. They combined the old covenant theology that saw the destruction of Israel as due to apostasy and the promise given David as a sign of continuing hope. Scholars differ regarding the date and number of editions of the work. There is considerable agreement on the creative work of this historian, which may be contrasted with the Priestly work and that of the Chronicler. Each of these in differing ways combined diverse traditions to interpret their meanings to a later generation. ***See also*** Chronicler; Deuteronomy; Priestly Writer(s); Sources of the Pentateuch.

Deuteronomy (d*oo*´tuh-ron´uh-mee; Gk., "the second law"), the fifth book of the Pentateuch (Gk., "five books," Gen.–Deut). Its Jewish name, *Debarim* (Heb., "words"), comes from the opening phrase: "These are the *words*. . . "

Content: Deuteronomy is organized as a series of three discourses by Moses (1:6–4:40; chaps. 5–28; chaps. 29–30), with a concluding addendum (chaps. 31–34), his final "words" given to the Hebrews as they prepare to enter the land of Canaan. These "words" recall the past actions of God to instill identity in the present community. The people are then called to continued faithfulness in the future based on that communal identity. This teaching dimension and the theological linking of the community past, present, and future form the literary and theological dynamic of the entire book. The first discourse summarizes the occurrences between the events at Sinai and the encampment in Moab, followed by an urgent appeal for faithfulness to God. The second discourse recounts the giving of the Ten Words (Commandments) at Sinai. This is followed by an explanation of the first commandment centered around the Shema (Deut. 6:4–9; Heb., "hear"), and an extended appeal to the people to remain faithful to God as they face temptations in the new land. Specific instruction in communal life begins in chap. 12, concluding with a covenant ceremony and homily focusing on their responsibilities to God and each other. The third discourse encapsulates the first two, with a historical review, covenant renewal, admonitions to faithfulness, and warnings of the consequences of disobedience. The conclusion includes instructions concerning Moses' successor, final instructions and liturgies, the Song and Blessing of Moses, and his death.

Literary and Theological Context: The opening verses (1:1–5) connect directly with the closing verses of Numbers and establish a setting for the entire book in the Plains of Moab after the Hebrews' sojourn in the wilderness. The commissioning of Joshua (31:1–8) and the account of Moses' death (chap. 34) lead directly into the first chapter of the book of Joshua, resuming the people's movement toward Canaan. These features leave Deuteronomy conspicuous as a historical, geographical, and literary parenthesis in the story line flowing from Numbers to Joshua. The book's close connection to its context combined with its detachment from the surrounding story line testify to a careful shaping of these Mosaic traditions as theological confession. Thus, Deuteronomy provides both the literary and theological interface between the grace of God manifested in the Exodus, Sinai, and wilderness traditions, and the ensuing failure of the people to remain faithful to God seen in the traditions relating to the settlement in the land. The community understood the importance of these "words" in calling the people to obedience at such specific pivotal junctures in Israel's history. At the same time, the "words" functioned dynamically in addressing the

ongoing need of the people for religious, social, and cultural identity.

Literary History: Traditionally, the entire book of Deuteronomy is attributed to Moses. However, some features, including the account of Moses' death, have led scholars to conclude that parts of it come from a later time. While there is little consensus as to its precise history, there is general agreement that the book reflects a process of compilation as the community reapplied the Mosaic traditions in later situations, as the book itself suggests (e.g., 30:1–5; cf. 6:20–25). However, this does not preclude the possibility that some core of the book, perhaps large portions of it, does come from Moses. It is generally believed that Josiah used an early form of Deuteronomy to guide his sweeping reforms (ca. 621 B.C.; 2 Kings 22:1–7; 2 Chron. 34:1–7). There is also some evidence that portions of the book reflect the crisis of Babylonian exile (587–539 B.C.; e.g., 29:28; cf. 29:29–30:5; 28:49–57, 64–68). The present form of the book reflects the application, reuse, and reinterpretation of the older Mosaic instructions in new and changing historical circumstances.

Features and Theology: Deuteronomy is not a book of laws; it is a book of the heart, instruction (Heb. *torah*) in how to live intentionally as God's people in response to his love and mercy (e.g., 4:29; 6:4, 32–40; 11:1). One of the most important features of the book is its homiletical style. The commandments are not presented in legal format, but are cast in the style of a sermon, interwoven with pleas and exhortations to obedience, all grounded in the prevenient (initiating) grace of God. Also, the concept of covenant around which the book revolves is not primarily a legal concept, but a cultural way of expressing relationship between Yahweh and his people. The call to obedience throughout the book is an appeal to order all of life in relation to the One who had revealed himself in their history as the true and living God. It is not just the imposition of law; it is a call to choose God (30:15–20; cf. Josh 24:14–15), which is worked out in practical instructions.

The emphasis on intentional and joyful obedience of the heart as the proper response to God's grace moves toward more responsibility for the individual (e.g., 30:11–14) and an emphasis on motive and intention also advocated by the prophets (e.g., Jer. 7:21–23). Other characteristics of the book are closely related to this emphasis. Total loyalty to God was crucial, which meant rejecting the worship of other gods (6:13–15; 8:19; 9:7–12; 30:15–20). God's love for his people and a desire for a mutual loving relationship are prominent (6:5; 7:13–14; 23:5; 30:6, 19–20). There is concern for justice, especially toward the weaker members of the community (10:18–19; 14:28–29; 15:1–18; 24:14–15). The book develops the idea that obedience brings blessing and life and disobedience brings curses and death (11:26–28; 30:15–20), a way of affirming the positive results of life properly ordered under God. While that view would later be distorted, Deuteronomy itself stresses obedience on the level of proper love (10:12–15; cf. Mic. 6:8). There is concern expressed throughout that the people will fail, perhaps reflecting a time later when Israel had already failed. This leads to two emphases held in tension: the people should be diligent to follow God and not risk forfeiting the benefits of the land (28:47–68), yet God would be merciful in the midst of their failures and bring them (again) into the land (30:1–10).

DEUTERONOMY

OUTLINE OF CONTENTS

Deuteronomy

- I. A call to obedience: history as basis for communal faith (1:1–4:43)
  - A. Introduction and setting (1:1–5)
  - B. Historical review (1:6–3:29)
  - C. Call for response (4:1–40)
  - D. Cities of refuge (4:41–43)
- II. The Ten Words: foundational principles of community (4:44–5:33)
  - A. Introduction and setting (4:44–49)
  - B. The commandments at Sinai (5:1–33)
- III. Memory and heritage: the shaping of community (6:1–11:32)
  - A. One God, one loyalty (6:1–9)
  - B. Remembering for the future (6:10–8:10)
  - C. Dangers of pride and arrogance (8:11–10:11)
  - D. First priorities (10:12–11:32)
- IV. Torah: a community under God (12:1–26:19)
  - A. Communal worship: where and to whom (12:1–13:18)
  - B. Being a holy people (14:1–15:23)
  - C. Communal worship: when (16:1–17)
  - D. Issues of justice and worship (16:18–19:21)
  - E. Rules for holy war (20:1–20)
  - F. Obligations in community (21:1–25:19)
  - G. Communal worship: thankfulness (26:1–15)
  - H. Concluding exhortation (26:16–19)
- V. Covenant making and keeping: the boundaries of community (27:1–34:12)
  - A. Covenant of obedience (27:1–30:20)
  - B. Words of encouragement (31:1–8)
  - C. Concerns for the future (31:9–29)
  - D. Song and Blessing of Moses (31:30–33:29)
  - E. Epilogue: Moses' death (34:1–12)

Influence: The influence of Deuteronomy can hardly be exaggerated. It provided the criteria by which Israel examined and judged itself. The authors of the books of Joshua through 2 Kings weigh Israel's history against the background of Deuteronomy's instructions. With its strict warnings not to add or delete anything from it (4:2; 12:32), Deuteronomy also represents one of the first steps in forming a canon of written Scripture.

Deuteronomy is one of the books most often quoted in the NT. Jesus quoted part of the Shema (6:4–9) as the summary of both legal (priestly) and prophetic teachings (Matt. 22:37; Mark 12:30; cf. Luke 10:27), underscoring the obligations of people under God in community. The Gospels also record that Jesus quoted from Deuteronomy in facing the three temptations (Matt. 4:1–10; Luke 4:1–13; from Deut. 8:3; 6:13, 16). ***See also*** Canon; Covenant; Hexateuch; Josiah; Pentateuch; Shema; Sources of the Pentateuch; Torah.

D.R.B.

devil, the English translation of a Greek word (*diabolos*) meaning "accuser" or "slanderer," used in the Septuagint to translate the Hebrew "Satan" and in the NT as a virtual synonym for the same term. In the KJV, it is also regularly employed as a translation of another Greek word (*daimōn*), which, however, in the RSV is transliterated as "demon." The idea that Satan was an angel put out of heaven because of his rebellion against God and his desire to assume the prerogatives of divinity seems to be reflected in Luke 10:18. Jesus' ability to expel the demons who were Satan's minions was understood to be the result of his having conquered and "bound" Satan (see Mark 3:27). ***See also*** Demon; Satan. J.M.E.

devoted thing, something irredeemably dedicated to God (Lev. 27:28; cf. Mark 7:11). Such items could be dedicated by an individual (Lev. 27:28), but more commonly they were items proscribed in war. People and cities under the status of a devoted thing were destroyed lest they be profaned by human use or contact (Lev. 27:29; Deut. 2:34), while war spoils could become the property of the sanctuary (Josh. 6:24).

dew, water from the air condensed on a cool surface, usually overnight. Its presence is of prime importance if plants are to survive the hot dry months (May–August) in Palestine when no rain falls. It is thus a sign of blessing (Gen. 27:28), nourishment (Deut. 32:2), peace (Ps. 133:3), royal favor (Prov. 19:12), relief from heat (Isa. 18:4), life for the dead (Isa. 26:19), the environment of animals (Dan. 4:25), short-term loyalty (Hos. 6:4), or the promise of good life (Mic. 5:7).

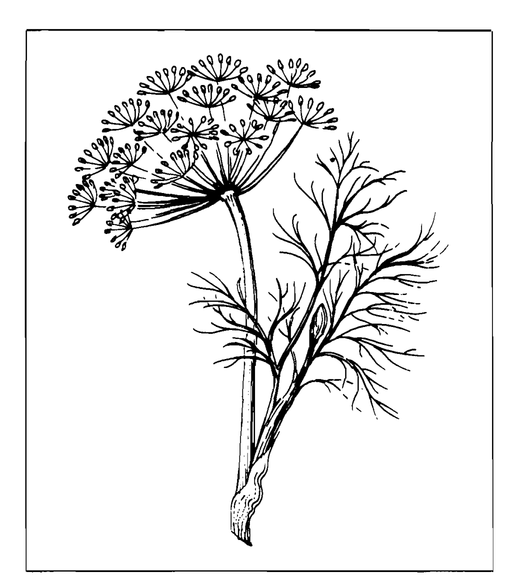
dial, a flat disk with numbers or other symbols around its edge. Though the sundial was known in antiquity, the word in the story of Hezekiah's healing (2 Kings 20:11; Isa. 38:8) probably refers only to a stairway whose steps were gradually shaded by a nearby object as the day progressed.

Diana (d*i*-an'uh) **of the Ephesians.** ***See*** Artemis of the Ephesians.

Diaspora (d*i*-as'puh-ruh; Gk., "scattered abroad"), the Jews who lived outside the land of Palestine after the Babylonian Exile (586 B.C.). They exercised a significant influence on the Jewish faith, ranging from the translation of the Hebrew Bible into Greek (LXX) to the formulation of the Babylonian Talmud, a collection of materials on Jewish religious interpretation and customs. In 1 Peter, the term (RSV: "Dispersion") is applied to Christians who lived in some Roman provinces in Asia Minor (1:1), although it is not clear if the scattering away from the homeland is understood there in a physical or a spiritual sense. P.J.A.

Dibon (d*i*'bon). **1** An important settlement located on the King's Highway, thirteen miles east of the Dead Sea and three miles north of the Arnon River. Dibon's ruins are located adjacent to and are partially covered by modern Dhiban. Before the arrival of the Hebrews in Transjordan (thirteenth century B.C.) the Amorite king Sihon took possession of northern Moab. This same region, including Dibon, was captured by the Israelites (Num. 21:21–31). Because the Moabite plateau was good pasturage, the territory surrounding Dibon was allotted to the Israelite tribes Reuben and Gad (Num. 32:3; Josh. 13:9). Although it was ultimately assigned to Reuben (Josh. 13:17), Dibon was rebuilt by Gad (Num. 32:34), hence the town was also called Dibon-gad (Num. 33:45–46).

The Moabite Stone, which was discovered at Dhiban in 1868, describes King Mesha's rebellion against Israel and the reestablishment of Moabite independence (ca. 840 B.C.). Line one of this inscription refers to Mesha as "the Dibonite." It is clear that ninth-century Dibon was important for military, political, and religious reasons. The site's continuing importance is confirmed by later references to Dibon in Isa. 15:2, 9 and Jer. 48:18, 22.



Excavations were conducted at Dibon between 1950 and 1956; these investigations recovered material from the Early Bronze, Iron Ages I–II, Nabatean, Roman, Byzantine, and Arab periods (3000 B.C.–A.D. 1500), but there is

a notable absence of Middle and Late Bronze Age remains.

2 A village in the northern Negeb that was reoccupied by Jews in the postexilic period (Neh. 11:25). This Dibon, whose location remains uncertain, is probably identical with Dimonah (Josh. 15:22). ***See also*** Gad; Mesha; Moabite Stone, The; Reuben; Sihon. G.L.M.

Didymus (did´uh-muhs, KJV; RSV: "twin"), a Greek name for Thomas (John 11:16; 20:24; 21:2). ***See also*** Thomas.

dill (KJV: "anise"), an aromatic plant used in cooking as a condiment and medicinally as a carminative and breath-freshener. Paying a tithe on dill (Matt. 23:23) symbolizes scrupulous attention to details of ritual law.

Dill.

Dinah (d*i*´nuh), Jacob's daughter by Leah (Gen. 34). That account, which relates her problematic relationship with Shechem, apparently reflects the Israelite struggle to establish proper social boundaries for marital unions. ***See also*** Jacob; Shechem.

Dionysius (d*i*´uh-nish´ee-uhs), a member of the Areopagite council in Athens who is said to have been converted by Paul's preaching there (Acts 17:34).

Diotrephes (d*i*-ot´ruh-feez), church leader mentioned (unfavorably) only in 3 John 9–10. He "likes to put himself first," rejects the authority of the Letter's author, and refuses to receive the latter's emissaries, ejecting from the church those who do. ***See also*** John, The Letters of.

disciple (translates the Gk. for "learner"), an apprentice or pupil attached to a teacher or movement; one whose allegiance is to the instruction and commitments of the teacher or movement. Closely paralleling rabbinic custom, most NT references to "disciple" designate "followers" of Jesus, often a large group including both his closest associates (the Twelve) and a larger number who followed with varying positive response (Luke 6:17). For disciples of other persons, see Luke 11:1 and John 1:35 (John the Baptist), Matt. 22:16 and Mark 2:18 (Pharisees), John 9:28 (Moses), and Acts 6:1–7 (Christians); cf. also Isa. 8:16 (Isaiah). ***See also*** Apostle; Twelve, The. P.L.S.

Disciple whom Jesus loved. ***See*** Beloved Disciple, The.

discus. ***See*** Games.

disease and healing, physical illness and its cure. The diseases recorded in the Bible are many and varied, but imprecise description of them often makes their identification in today's terms difficult. Since disease could have grave social and economic consequences in the ancient Near Eastern and Greco-Roman worlds, its causes and cures were matters of great moment. **Causes:** Some passages dealing with disease name no cause (Lev. 13; 1 Kings 17:17; 2 Kings 5:1; Mark 1:30; 5:25). Others specify a cause, whether natural (2 Kings 4:38–40) or, more commonly, divine (1 Sam. 5:6–12; 2 Kings 6:18; Ps. 38), especially when disease is connected with sin (Num. 12; cf. 2 Kings 5:20–27; Num. 16:41–50; 2 Sam. 12:15–18). The Deuteronomic interpretation of disease is the most emphatic and detailed in ascribing it to sin (Deut. 28:22, 27–28, 35, 59–61). Such an interpretation, or its application to specific instances, is questioned in the book of Job and in the account of the healing of the blind man in John 9:1–3. Ascribing all—both good and evil, disease and healing—to the Lord (Deut. 32:39) posed problems. Why should God torment Saul with an "evil spirit" (1 Sam. 16:14–15) or incite David to a census of Israel for which he then punishes Israel with a plague (2 Sam. 24)? Later OT writings mitigated such problems by reference to "a/the Satan" (lit. "a/the adversary") who, in bringing on disease, is depicted as acting either independently (*he* incited David, 1 Chron. 21:1) or as one of "the sons of God" who report regularly to the Lord (Job 1:6–12; 2:1–6). In 2 Cor. 12:7–8 Satan (now a proper name) retains this functionary role, but in other passages disease is seen as caused by Satan/the devil and his demonic minions acting independently (e.g., Mark 1:35; 3:22–26; 7:25; Luke 13:16, 32). At the same time the

theme of disease as divine retribution is retained (1 Cor. 11:29–30; Acts 12:21–23).
Cures: In the biblical writings, as well as in ancient Near Eastern and Greco-Roman sources generally, diseased persons are seen as having recourse to several means of treatment. One is folk medicine (balm, Jer. 8:22; 46:11; 51:8; wine, 2 Tim. 5:23; oil and wine, Luke 10:34; music, 2 Sam. 16:23). The sick might also turn to physicians for help (2 Chron. 16:12; Mark 5:25–26; note the mention of physicians in Job 13:4; Jer. 8:22; Matt. 9:12; Mark 2:17; Luke 4:23; 5:31; Col. 4:14), or they might appeal to a deity. These various means of healing were generally not sharply distinguished and might, in fact, be conjoined: a fig cake was applied to Hezekiah's boil at the command of the prophet Isaiah (2 Kings 20:7); oil was used by early Christian elders in a healing ritual (James 5:14; cf. Mark 6:13). Sometimes, however, religion and physicians are seen in opposition, explicitly (2 Chron. 16:12) or implicitly: a woman with a chronic hemorrhage turns from physicians to Jesus for relief (Mark 5:25–26).

This theme—the failure of medical science—is common in healing accounts in the Greco-Roman world. As a result of such failure, the sufferer then turns to a healer. These accounts follow a common pattern, both in the Bible and outside it: the sickness is described as incurable by ordinary means; the sufferer (or a representative) approaches the healer, who effects a sudden healing; proof of the healing is followed by acclamation of the healer and/or deity (see 1 Kings 17:17–24; 2 Kings 5:25–37; Mark 5:25–34; 7:32–37). Biblical portraits of certain holy men as healers (Elijah, Elisha, Jesus, Peter, Paul) also have affinities with those of healers in extrabiblical sources, for example, in the use of gestures and material means (1 Kings 17:21; 2 Kings 5:10–11; Mark 7:33; 8:23, 25; Acts 19:12; 28:8) and foreign words (Mark 5:41; 7:34).
Healing in the NT: The NT evidence on healing is ambivalent. The book of Acts presents Paul as a healer (Acts 14:8–10; 16:18; 19:11–12; 28:8–9), and Paul's mention of his apostolic "signs and wonders" (Rom. 15:19; 2 Cor. 12:12) may refer to healings; yet he himself reports that his prayers for his own healing were rejected (2 Cor. 12:7–9). The NT accounts of Jesus as healer are in contrast to the story of his helplessness in the face of his own suffering and death (cf. Matt. 27:42; Mark 15:31; Luke 23:35). Nor is Jesus able to heal consistently where faith in him is lacking (Mark 6:5–6; cf. Matt. 13:58). Belief in healers and their procedures—by sick persons and their social groups—has been shown by modern investigators to be crucial in healing. It presumably figures into some of the wondrous healings reported for the Greek god of healing, Asclepius, with whom the risen Jesus as healer comes into rivalry as early Christians performed healing rituals in Jesus' name. Early followers of Jesus, who are reported as healing by the command of Jesus (Mark 6:13; Matt. 10:8) or in his name (Acts 3:7; 16:18), may well have recounted and recorded some of the stories of Jesus as healer to inspire confidence and as warrant for their healing rituals. In those cases, the details of procedures in these accounts (use of gestures, material means, foreign words) may have served as guides for their own procedures (cf. esp. Mark 9:29). ***See also*** Devil; Leprosy; Magic and Divination; Miracles. H.E.R.

Dishan (d*i*ʹshan). **1** A son of the Horite Seir, listed seventh in Gen. 36:21 and 1 Chron. 1:38, and the father of two sons, Uz and Aran (Gen. 36:28; 1 Chron. 1:42). **2** The name of a Horite clan (Gen. 36:30) in the land of Seir. Current studies suggest that Dishan is an alternate spelling of Dishon, the former presenting an early Semitic, Aramaic, and Arabic form of the name.

Dishon (d*i*ʹshon). **1** A son of the Horite Seir, listed fifth in Gen. 36:21 and 1 Chron. 1:38, and father of four sons, Hemdan, Eshban, Ithran, and Cheran (Gen. 36:28; Hamran for Hemdan in 1 Chron. 1:42). **2** The son of Anah (Gen. 36:25; 1 Chron. 1:41), and the brother of Oholibamah (Gen. 36:25). **3** A Horite clan in Seir (Gen. 36:30). Studies suggest that Dishon is an alternate spelling of Dishan, the former representing an early Northwest Arabic and Canaanite form of the name.

Dispersion (dis-puhrʹzhuhn; Gk. *diaspora* from *diaspeirein,* "to scatter"), terms referring to the exile or emigration of Jews from Israel to other countries. When the northern kingdom of Israel was conquered by the Assyrians in 721 B.C., many Israelites were taken into exile in Mesopotamia. When the southern kingdom of Judah was conquered in 597 and again in 587 many of its leaders and people were exiled to Babylon, laying the foundation of a community that flourished until A.D. 1000. During the Persian (539–332 B.C.) and Hellenistic (332 B.C.–A.D. 63) periods Jews moved to all major population centers in the eastern Mediterranean. Jewish mercenaries settled in upper Egypt and southern Asia Minor. In NT times, under the Romans, Jews were a recognized ethnic group with legal rights. Vigorous communities existed in Rome, Alexandria, Cyprus, the cities of Greece and Asia Minor, Antioch in Syria, and beyond the Empire in Mesopotamia. Acts 2:9–11 names the diverse origins of pilgrims to Jerusalem. Greek was the most common language of the eastern Roman Empire and the Septuagint, the Greek translation of the OT, was made to serve the large Greek-speaking Jewish community. In John 7:35 people speculate whether Jesus will go among the Jews (called Greeks) of the Dispersion. ***See also*** Babylon; Israel; Septuagint. A.J.S.

distaff. *See* Spinning and Weaving.

Dives (di´veez; from the Lat. for "wealth"), a term that became attached as a name to the rich man in the parable of Lazarus and the rich man (Luke 16:19–31) because of its use in the Vulgate, a Latin translation of the Bible.

Divided Kingdom, Divided Monarchy, the two-hundred-year period in ancient Judah and Israel from 922 to 722 B.C. Following Solomon's reign, his son Rehoboam was unable to retain leadership in the northern state of Israel. Judah, the southern state, was much more at ease with the dynastic succession (son following father), but Israel did not follow suit. Therefore when Rehoboam went to Shechem to be confirmed as king over Israel as was the custom (1 Kings 12:1–20), his trip ended in failure. As a result Jeroboam I became king of the northern state and the Divided Kingdom was begun. Israel during this time had no fewer than eighteen kings and Judah twelve kings. While political leadership during the Divided Kingdom lacked distinction, included in the period are great eighth-century B.C. prophets such as Amos, Hosea, and Isaiah. ***See also*** Jeroboam I; Prophet; Rehoboam; Solomon.

Dodanim (doh´duh-nim), a term in Gen. 10:4 that should rather be read Rodanim, as in 1 Chron. 1:7. In both texts the name is that of the fourth and last son of Javan (Ionia), who was the fourth son of Japheth. As reflected in the Greek (LXX) version of the name—*Rhodioi*—it refers to the people of Rhodes, the large island off the southwest coast of Asia Minor.

Dodo (doh´doh; Heb., "his beloved"). **1** A member of the tribe of Issachar and the grandfather of Tola, one of the judges of Israel (Judg. 10:1). **2** An Ahohite, father of Eleazer, one of the three chief leaders of David's fighting men (2 Sam. 23:9). He is probably the same person referred to as Dodai the Ahohite (1 Chron. 27:4), although it is probable that due to an inadvertent omission in the text it was his son Eleazer who commanded the division of twenty-four thousand men under David and not Dodai himself. **3** A man from Bethlehem, the father of Elhanan, one of David's warriors (2 Sam. 23:9).
D.R.B.

Doeg (doh´ig), "the Edomite," unscrupulous henchman of Saul (1 Sam. 21–22). He witnessed Ahimelech, a priest in Nob, giving assistance to David. Doeg reported Ahimelech's action to Saul, who, ignoring Ahimelech's protestation of faith in David's loyalty, ordered all the priests of Nob slain. While most of Saul's servants refused to strike God's priests, Doeg proceeded to kill them, their families, and their livestock.

dog, a domesticated member of the canine family. Dogs were highly esteemed and possibly even worshiped in Egypt, and they were popular in Mesopotamia as hunting companions; dogs are depicted on Assyrian reliefs from the seventh century B.C. The Hebrews, however, viewed them with utter disgust. In the Bible the dog (Heb. *keleb;* Gk. *kyōn*) is usually described as a scavenger. An exception is obviously the dog that followed at the heels of Tobias (Tob. 5:16; 11:4). The little dogs (Gk. *kynarion*) that ate the

Hunting dog and Assyrian hunter; seventh-century B.C. relief from Nineveh.

proverbial bread "crumbs that fall from their master's table" at least had access to the house and may have been pets (Matt. 15:27; Mark 7:28).

The dog (*Canis familiaris*), whose wild ancestor was the wolf (*Canis lupus*), is held to be the earliest domesticated animal. This assumption rests on remains of a presumably domesticated dog found at Palegawra Cave in Iraq and dated to 10,000 B.C. Recently a puppy skeleton buried with a human and ascribed to the Natufian period (ca. 12,000–4500 B.C.) was unearthed at Ein Mallaha in northern Israel. This find testifies to the existence of a close relationship between humans and dogs for the same time in Palestine (ca. 10,000 B.C.).

Dogs were useful as watchdogs and because they cleared away refuse, carcasses (Exod. 22:31), and vermin. But they are also said to eat human flesh (e.g., 1 Kings 14:11; 16:4) and to lick human blood (1 Kings 21:19). 2 Kings 9:30–36 tells the

gruesome story of Jezebel, who was eaten by dogs after being thrown over the city wall.

When applied to a person "dog" becomes a term of disregard and humiliation and in Ps. 22:16 enemies are called "dogs." In 1 Sam. 17:43 Goliath ridicules David's weapons by saying "Am I a dog, that you come to me with sticks?" Considering this attitude of the Hebrews one wonders why in Eccles. 9:4 "a living dog is better than a dead lion." I.U.K.

dominion, rule or lordship, referring to political authority exercised by human beings (Gen. 37:8; Judg. 14:4; Ps. 72:8) or the realm in which such authority is exercised (2 Kings 20:13). Humanity also rules over creation, though under God (Gen. 1:26, 28; Ps. 8:6). Oppressive rule is condemned (Lev. 25:43, 53; Matt. 20:25). Ultimate and eternal dominion over all things belongs to God (Pss. 22:28; 145:13; Dan. 4:3; Rev. 1:6). In the NT, dominion may also refer to certain angelic or cosmic powers (Col. 1:16; Rom. 8:38), which, however, are subordinated to the power of God (Eph. 1:21; Col. 2:15).

doorkeepers, people who guard access to important or restricted places. Doorkeepers were appointed in the Temple as "keepers of the threshold" to collect money from the people (2 Kings 22:4). Levites were appointed as gatekeepers for the Ark (1 Chron. 15:23–24). Eunuchs were doorkeepers at the palace of the Persian king (Esther 2:21) and a woman was doorkeeper at the house of King Ishbosheth (2 Sam. 4:6; cf. John 18:16–17; Acts 12:13).

doors, floor-level breaches in a wall with openable barriers. The biblical use of the term is both literal and symbolic, with shrine doors used in both ways.

Among the literal uses, one finds doors to houses (Gen. 19:6), which could be broken in during assault (Gen. 19:9); doors used for signs for deliverance (Exod. 12:23) or bondage (Deut. 15:17) or work zones (Neh. 3:20); doors used for assignations (Job 31:9); and doors built unwisely (Prov. 17:19), closed for privacy (Matt. 6:6; Luke 11:7), and pounded upon to rouse occupants (Luke 13:25).

Symbolically, doors were places where sin lay in wait (Gen. 4:7), the apertures through which speech made its exit (Ps. 141:3), the model of sluggish action (Prov. 26:14), an access route for hope (Hos. 2:15), the narrow passage to eternal life (Luke 13:24), the right access to the human community of the church (John 10:1), the access route of faith among the Gentiles (Acts 14:27), opportunity to proclaim the gospel (2 Cor. 2:12), and the route of access to one's life (Rev. 3:12).

In references to shrines, the Bible uses the word "door" in the case of tents, buildings, and parts of buildings. Applied to tents and the tabernacle in the wilderness, it is slightly misused, meaning rather the flap or entrance opening which usually had no construction as its support (Gen. 18:1; Exod. 26:36; Lev. 14:11). Elaborate doors were part of the Temple, being described as built of two swinging leaves each (1 Kings 6:34; Ezek. 41:24), and there were numerous doors throughout the structure (Ezek. 40:13–47:1).

Archaeological evidence in numerous locations supports the suggestion that doors were hung from a pivot post set in a socket. They could be bolted shut, both with horizontal and vertical bolt locks. They were sometimes reinforced with iron, carved or otherwise decorated, and, as with gates in city walls, were the most vulnerable point in the building's perimeter when under assault. Stone doors (swinging and rolling type) have been found for both tombs and buildings (especially in the Roman and Nabatean remains in Palestine and the Transjordan; cf. Matt. 27:65–28:2). R.S.B.

Dor (dor), a well-situated natural seaport on the coast of the Mediterranean Sea south of Mt. Carmel. Dor is first mentioned in an Egyptian inscription of the thirteenth century B.C. Tel Dor (modern Khirbet el-Burj) is one of the largest tells in Israel (ca. 35 acres). It was excavated in the 1920s by John Garstang and G. M. Fitzgerald for the British School of Archaeology and in the 1980s by E. Stern for the Israel Exploration Society. The king of Dor was one of a coalition of Canaanite kings defeated by Joshua (mid- or late-thirteenth century B.C.; Josh. 11:2; 12:23). The city was included in the territorial allotment of Manasseh (Josh. 17:7–13; 1 Chron. 7:29), although the Joshua text notes that the Canaanites continued to occupy Dor. Indeed, it is known from the Egyptian *Tale of Wen-Amon* (ca. 1100 B.C.) that the city was occupied by the Tjeker, a sea people related to the Philistines. The city was under Israelite control by the tenth century (Solomon's son-in-law Ben-abinadab was governor of the district of Dor, 1 Kings 4:11) but it became the center of an Assyrian administrative district in the eighth century (probably the "Way of the Sea" of Isa. 9:1–2). It was subsequently controlled by the Persians and the Phoenicians and during the Hellenistic period was a large, well-fortified independent city. The Hasmonean Simon fought against Trypho of Dor in an alliance with Antiochus Sidetes (1 Macc. 15:1–14) and the city was later taken by Alexander Jannaeus. Pompey restored independence to the citizens in 63 B.C. J.D.P.

Dorcas (dor'kuhs), a Christian woman in Joppa whose Aramaic name was Tabitha ("gazelle"). Well known for her works of generosity and charity, she died and was restored to life by Peter (Acts 9:36–42).

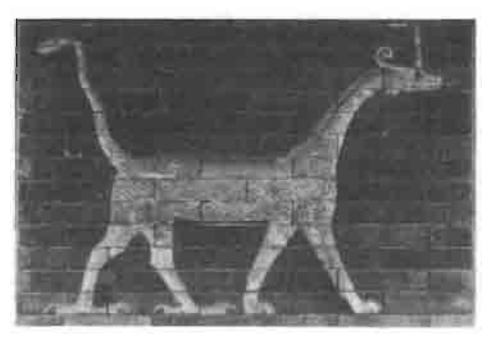
dot, a projection or hook as part of a letter of the alphabet (serif) or of a stroke to mark accents

and breathing, hence a metaphor for something insignificant (Matt. 5:18; Luke 16:17).

Dothan (doh´thuhn), a town in central Palestine where Joseph and his brothers pastured their flocks (Gen. 37:17). It was there also that the king of Syria sought out the prophet Elisha (2 Kings 6:13). Ancient Dothan is identified with modern Tell Dotha, ten miles north of Samaria/Sebaste and near the southern edge of the Esdraelon plain. In antiquity as well as today Dothan was close to the main commercial route and in the midst of pasture lands.

Tell Dotha was excavated by Joseph Free from 1953 to 1960. Thirty feet of debris indicate rather continuous occupation from Late Chalcolithic times (ca. 3200 B.C.) through Iron Age II (to 700 B.C.) and a Hellenistic acropolis, some slight Roman remains, and a Mamluk palace. Widespread Middle Bronze occupation and several Iron Age II levels can be related to the biblical accounts. Particularly rich are the burials from near the end of the Late Bronze Age into Iron I (thirteenth–twelfth centuries B.C.)

N.L.L.



dove, a small bird of the Columbidae family. Three varieties of the small species of pigeon identified as a "turtledove" are known in Palestine. Noah, following a custom of ancient mariners, uses doves to determine if the Flood has subsided (Gen. 8:8–12). Lev. 12:8 prescribed the offering of a pair of doves or two young pigeons to purify the mother after childbirth if the family could not afford a lamb. Doves for such offerings were sold in the Temple court (Mark 11:15; John 2:14). Mary makes this offering after the birth of Jesus (Luke 2:4).

The stories of Jesus' baptism all describe the descent of the Holy Spirit on Jesus "like a dove" (Mark 1:10; Matt. 3:16; Luke 3:22; John 1:32). Although the tradition presumably derives from the early Palestinian community, no early Jewish parallel for the use of a dove to represent the Spirit has yet been found. Some scholars think that the hovering Spirit of Gen. 1:2 might have suggested the image. Others point to the "dove" of Gen. 8:8 or to the comparison of the Spirit of God to an eagle in Deut. 32:11. dragon, a reptilian monster well known in the mythology and iconography of the ancient Near East. In the Babylonian creation myth, *Enuma elish,* the dragon Tiamat is slain by the god Marduk and her supporters taken captive. In a Hattic myth, the dragon Illuyankas defeated the storm god and later was slain by him. The Ugaritic myths from Ras-Shamra refer to various monsters defeated by the storm god Baal or

This composite creature, with the head of a serpent, body of a lion, and hind feet of an eagle, is a reconstruction of the original that decorated the Ishtar Gate at Babylon during the reign of Nebuchadnezzar II, seventh century B.C.

his sister Anat. In the Bible the dragon appears as the primeval enemy of God, killed or subjected in conjunction with creation (Pss. 74:13–14; 89:10; Isa. 51:9; Job 26:12–13), but appearing again at the end of the world, when God will finally dispose of it (Isa. 27:1, using traditional language attested in the Baal myths of Ras-Shamra). The book of Revelation takes up the latter theme. The dragon (identified now with the Devil) and its agents campaign against God and his forces but are finally defeated (Rev. 12–13; 16:13–14; 20:2–3, 7–10). For now, however, it is kept under guard (Job 7:12), its supporters lying prostrate beneath God (Job 9:13). Referred to variously as Tannin, Rahab, or Leviathan, it is usually conceived of as a sea monster, as in the *Enuma elish* and sometimes at Ras-Shamra. As a great opponent of God's people, Egypt was known as Rahab. The oracle of Isa. 30:7 gives Egypt the name "Rahab [is] put down," alluding to the dragon's defeat by God, and Ps. 87:4 simply assumes Rahab as an accepted name for Egypt. The king of Egypt was portrayed as a sea monster lurking in the Nile, whom God would catch and kill (Ezek. 29:3; 32:2). There may be no mythological allusion here, and there is certainly none when the words *tannin* and *leviathan* are used to refer to the monsters of the deep created by God (Gen. 1:21; Ps. 104:26), summoned to praise God (Ps. 148:7), and beyond human capture (Job 41:1). The apocryphal Bel and the Dragon (23–27) relates Daniel's unorthodox disposal of a dragon worshiped by the Babylonians. ***See also*** Leviathan; Rahab. S.B.P.

dreams, visions widely attested in the early books of the Bible (e.g., Jacob's dream, Gen. 28:12; Joseph's dreams, Gen. 37), yet often viewed with distrust in the later tradition, as in Jer. 23:28: "Let the prophet who has a dream tell the dream, but let him who has my word speak my word faithfully" (see also Deut. 13:2–6; Jer.

27:9–10; 29:8–9; Sir. 34:1–8). Dreams are rehabilitated as a mode of revelation in the apocalyptic literature. Daniel interprets the dreams of the gentile king and receives his own revelations in dream-visions (also cf. Zech. 1:8 with the prophecy of Joel 2:28). In the NT dreams figure most prominently in the nativity story of Matthew. ***See also*** Daniel, The Book of; Joseph; Magic and Divination. J.J.C.

dress, clothing worn for utility as well as decoration. The biblical terms for dress, garments, clothes, robes, and various items of garb are general and exchangeable in translation, and the clothes they represent are difficult to describe from them. Artistic representations from the Near East are very helpful, and some forms of dress are defined by function, as with a soldier's helmet (1 Sam. 17:5), which is used metaphorically as well (Isa. 59:17; Eph. 6:17).

The earliest forms of clothing were generally made from animal skins, a practice never really given up to this day (witness the popularity of furs, hides for shoes and gloves, leather for belts, tool carriers, decorative items [watchbands or bracelets and hair fasteners], and billfolds). The beginnings of fabric weaving are lost in the advancing centuries of the Stone Age (ended ca. 4500 B.C.), and the use of straw and reeds for mats and houses probably preceded adaptation of plant fiber for clothing. Linen (from flax) and cotton cloth were apparently distinctively Egyptian developments, whereas the use of wool for fabric seems to have become popular sometime between the Sumerian use of lapped leaves (of leather or metal) for skirts evident in their statuary and the draped robes of Gudea, the king of Lagash in the later Sumerian period. Weaving cloth of wool or hair (for tents), stitching fabric pieces together, and dyeing fabric to allow variation in color are known throughout the biblical period. The tomb paintings from Egypt at Beni-hasan give representations of both styles and colors in use there.

Biblical styles and materials were those shared throughout the Near East from the Early Bronze Age (3000–2000 B.C.) into the Roman period (63 B.C.–A.D. 324). Characteristic references to Israelite garments used by both men and women indicate that the cultural habits in dress changed as different peoples invaded and dominated Syro-Palestine, but there were always certain exceptions for traditional and distinctive official dress.

It is immediately clear that dress was geared to climate and necessities of movement rather than simply to appearance or aesthetic appeal. Again there were exceptions. The notorious dress of the harlot (Prov. 7:10) was probably as much a public advertisement as was her conduct toward the young and unsuspecting prospect. Soldiers' dress was geared to battle efficiency, priestly garments included many symbolic representations (as with some modern clerical garb), and there were special dress arrangements for special occasions, such as a wedding, mourning, or a planned deceit (Josh. 9:5).

Men's Clothing: The term translated "clothes" in 1 Sam. 4:12 and Judg. 3:16 was apparently a long robe of some sort (2 Sam. 10:4) since it could be cut off "in the middle, at their hips." A term for any whole garment could also mean a cover cloth for the Ark (Num. 4:6–9, "a cloth") or a bed (1 Sam. 19:13, "the clothes"), royal robes (2 Sam. 13:31, "garments"), war prisoners' clothing (Jer. 52:33, "prison garments"), mourning garb (2 Sam. 14:2, "mourning garments" worn in this case by a woman), and priestly garments (Exod. 28:2, "holy garments"). Such clothing might be made of either linen or wool, but in the codes in Deuteronomy and Leviticus they were not to be mixed (Deut. 22:11; Lev. 19:19).

The "wrap-around" garment usually called a mantle could cover nakedness (Noah's in Gen. 9:23), a sword (1 Sam. 21:9), or dress clothing while moving incognito (Ruth 3:3), or serve as an offering basket (Judg. 8:25). It was the clothing of wanderers (Deut. 8:4), the strangers (Deut. 10:18), and the poor (Exod. 22:26–27), who used it as a sleeping cover. For that reason it was not to serve as collateral for more than the part of a day remaining until sundown, when the owner would need it for the night. As with all clothing, it could be ripped (1 Kings 11:30). To be without such garments was the extremity of poverty or neglect (Job 24:7). Ezek. 27:23–24 indicates that clothing was a trading item when it was distinctively rich or finely worked goods. NT language for general clothing items includes reference to an oblong outer garment (Matt. 17:2; 27:31) worn over a coat (Matt. 5:40; Luke 6:29, "shirt").

With the outer clothing mentioned above were worn certain items as undergarments. A long or half-sleeved, ankle-length shirt in white or in colors was used by both men and women (Gen. 37:3, 31–33). Gen. 3:21 reports that God made such garments for Adam and Eve out of skins. They were usually anchored over one if not both shoulders. Men's sometimes reached only to the knees. The collared tunic of Job 30:18 was also used by women (2 Sam. 13:18–19; Song of Sol. 5:3), as by priests (Exod. 28:4). Usually made of wool, it was specified to be of linen for priests. The seamless tunic of Jesus (John 19:23) for which the soldiers cast lots was such an item, as was the garment torn by the high priest (Mark 14:63). A linen undergarment (Jud. 14:12–13) is identified by the same term as that for the shroud (Mark 15:46) for the dead. The young man who lost his "linen cloth" (Mark 14:51–52) in a scuffle was probably dressed only in a wrap-around of some sort. The "girdle," whether of leather (as Elijah's, 2 Kings 1:8) or cloth (Jer. 13:1), was in effect a loincloth, and while it was loosened at night, it was not necessarily removed. Linen

Ancient Styles of Dress: **1a.** One type of loincloth (Semite, ca. 1800 B.C.); **1b.** Animal skin; **2.** Men's tunic or coat; **3.** Men's mantle; **4.** *Himation;* **5.** First-century cloak or cape; **6.** Women's dress; **7.** High priest; **8.** Type of prayer shawl; **9.** Hebrew royal attire; **10.** Persian; **11.** Roman toga; **12.** Roman *stola* and *pallium;* **13.** Egyptian loincloth (ca. 1300 B.C.); **14.** Egyptian sheath-like dress (ca. 2000 B.C.); **15.** Babylonian (ca. 2000 B.C.); **16.** Assyrian (ca. 900 B.C.).

breeches covering "from the loins to the thighs" were part of priestly vestments (Exod. 28:42). A true belt, sash, or girdle tying one's clothes together at the waist and serving to suspend a soldier's sword was also normal. If made of folded cloth, it could hold money or other valuables (Mark 6:8).

Footwear in the form of sandals or shoes was essential, given the thistle and thorn growth in the countryside. They could be removed in holy places (Exod. 3:5), for mourning, or for repair (Josh. 9:5). Artistic representation shows them attached to the foot by straps around the ankle or, in some periods, even up the calf of the leg.

Head covering was vital for shade from the sun in summer as well as for warmth during the rainy season. A simple cloth might be draped, folded, or wrapped (as a turban) and be held in place by a headband in the fashion still used as *egal* and *kaffiyeh*. The use of lightweight cloth was remarkably suited to the climate, providing a shade penetrable by breeze in the heat of the summer, but allowing multiple folds in which to wrap both face and head as protection against cold, wind, or dust. Specific headgear with certain decorations was designated for priests and their ceremonial duties.

Women's Clothing: The same general terms for clothing mentioned above applied to the garments women wore. The same divisions of outerwear, undergarments, girdles, footwear, and headgear are appropriate, with the addition of the veil in some situations. Outerwear consisted of a long robe, possibly decorated with fringes, or in later periods, with embroidery. It was fastened at the waist with a belt or girdle (Isa. 3:24, even a rope in hard times). Such a mantle or cloak could enfold goods (Ruth 3:15, grain) as well as the wearer. The undergarments of women included the wool or linen shoulder-suspended shift used by men (2 Sam. 13:18), and artistic representations of them show greater variety of colors than those used by men. For footwear, sandals were normal, and might be made especially attractive (Song of Sol. 7:1; Jth. 10:4; 16:9), with special enhancements appropriate at the time of a woman's marriage (Ezek. 16:10). The most distinctive items of dress for women pertain to the head. The "turban" (Isa. 3:23) or "headdress" (Isa. 3:20) was supplemented at least in certain circumstances by a veil for the face (Gen. 24:65, in the presence of a stranger; 38:14, to allow a ruse) or for the body (Isa. 3:23).

Special Occasions: Aside from the special dress for priests in service and soldiers on duty, there was also a customary dress for mourning, whether for the dead, tragedy, or danger from war, usually referred to as sackcloth (a coarse burlap) and ashes (Isa. 58:5; Jer. 6:26; Luke 10:13). Special adornments were also appropriate for weddings, although they may have comprised unusually ornate garments or headdresses rather than special additional items. Additional jewelry was surely appropriate for any number of celebrations, and the removal of such adornments as signs of repentance was most apparent with the donning of sackcloth and ashes.

Garments were also a symbol of rank and station, especially during the Roman period, when government officials such as kings, legates, and procurators were each marked by distinctive insignia, much in the way the military uses different uniforms for different units, duties, and stations. As in all societies, the poorest folk were most poorly clothed, the wealthiest most ornately dressed. Pretentiousness could show in dress as in manners. Parades tended to draw finery into public view and add color, variety, and festivity, whether to religious, civil, or private ceremonies of celebration. Dress could also be a means of protest, as with the shedding of clothes by Isaiah as a warning to Egypt (Isa. 20:1–6). ***See also*** Jewelry; Priests. R.S.B.

drink, liquid nourishment. In the womb the fetus derives food and shelter from the mother without differentiation between physical and spiritual dimensons. Postnatal liquid foods are milk, water, and wine. Physically milk and water are essential; wine gives superabundance and elation. Used figuratively, all bespeak a consciousness that one does not live by physical elements alone but by intangible realities of which they are symbols. Drinking together connotes fellowship; giving drink to the thirsty connotes compassion. Israel eats and drinks before God at Sinai (Exod. 24:9–11). God's wisdom for the exiles is water, milk, and wine (Isa. 55:1–5). Jesus' teaching is living water (John 4:10, 13–14), his death for others covenanting wine. Paul warns that the Kingdom of God is not food and drink but righteousness and peace and joy in the Holy Spirit (Rom. 14:17); James (2:14–17) and John (1 John 3:16–18) warn that the Kingdom of God is not known apart from compassionate sharing of the physical elements. drunkenness, the state of inebriation induced by the ingestion of too much alcohol, in the Bible, principally wine. On the one hand, wine was enjoyed in Israel as a divinely given fruit of the ground. Used in cultic meals (Deut. 14:26), it was a figure for divine wisdom (Isa. 55:1–2; Prov. 9:1–6) as well as human love (Song of Sol. 7:9). It bespeaks superabundance, connoting the elative sense of life heightened above the ordinary.

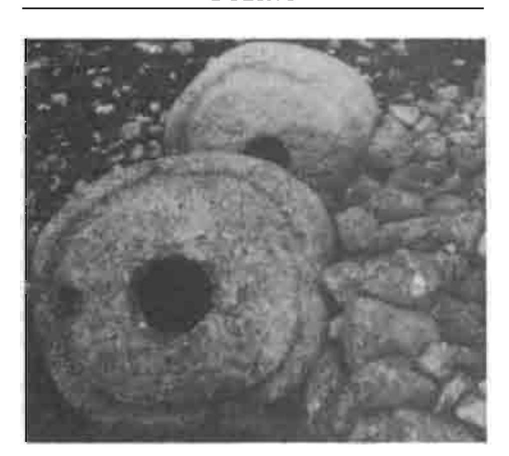
On the other hand, drunkenness was persistently condemned (e.g., Gen. 9:20–27; Gal. 5:21). It rendered one insensible and

imperceptive, a social nuisance, an economic ruin, and a moral and spiritual reprobate. This it caused through its power to deceive, conveying a false sense of clear perception, intelligence, and power. As wine could symbolize divine wisdom, drunkenness could symbolize human folly and the deceitfulness of false gods. Hence it characterized also general moral and spiritual practices of habitual injustice and idolatry.

Sobriety and wine in moderation come to represent a religion opposed to the false consciousness arising from intoxication with false values and practices sponsored by other gods. Similarly, in the NT the wisdom of the cross (1 Cor. 1–2) is offered in the covenanting wine, conveying moral and spiritual insight and enhancing the elative sense (Eucharist), in contrast to the occluded consciousness of the wisdom of the world. J.G.J.



Drusilla (dr*oo*-sil´uh), the wife of Antonius Felix who was procurator of Judea (ca. A.D. 52–59) while Paul was imprisoned in Caesarea. A Jewess, she was the daughter of Herod Agrippa I and great-granddaughter of Herod the Great. Originally given in marriage to the Syrian Azizus of Emesa, she was apparently persuaded to leave him for Felix. In Acts 24:24–27, she is present when Paul speaks about Jesus to her husband. Codex Bezae (an ancient manuscript containing the text of Acts) reports that she instigated the session but adds that when Felix was not responsive to Paul's message, it was Drusilla's wish that Paul remain in prison. ***See also*** Agrippa I; Felix, Antonius; Herod; Paul. dulcimer. *See* Music.

Dumah (d*oo*´muh; Heb., "silence"). **1** A son of Ishmael (Gen. 25:14; 1 Chron. 1:30), possibly resident in south central Arabia at modern Dumat al-Ghandal (el-Jof). **2** A city in the south-central hills of Palestine, probably modern ed-Dome, six miles southwest of Hebron (Josh. 15:52). **3** The subject of an oracle in Isa. 21:11–12, where it may be a scribal error for Edom, or its meaning, "silence," may indicate the uncertain sense of the oracle.

dumbness. *See* Disease and Healing.

dung, human or animal feces. While dried bricks of human and animal dung were used in Egypt to fuel ovens, the Israelite concept of purity (plus the alternative fuel of Canaan's trees) made this practice obnoxious (Ezek. 4:12, 15). Dung was used as fertilizer (Isa. 25:10; Luke 13:8) and continues to be so used in the modern Middle East. There are several references to the scarcities of a military siege constraining a city's inhabitants to consume their own excrement (2 Kings 18:27; Isa. 36:12; cf. Lev. 26:29; Deut. 28:53–57) or "dove's dung" (2 Kings 6:25), which may designate a plant.

Dye vats excavated at Tell Beit Mirsim, seventh century B.C.

Cultic legal texts require that human voiding (Deut. 23:12–14) occur outside of the camp perimeter and the fecal matter in the intestines of sacrificial animals be burned outside of the camp (Exod. 29:14; Lev. 4:11; 8:17; 16:27; Num. 19:5) because of the impurity of excreta (Mal. 2:3). Dung may also refer to an unburied human corpse left as offal (2 Kings 9:37; Jer. 8:2; 9:21; 16:4; 25:33; Ps. 83:12) or to the worthless impious (Zeph. 1:17; Job 20:7).

The "Dung Gate" of Jerusalem's south wall (Neh. 2:13; 3:13–14; 12:31), a still-current appellation, is probably the exit through which the city's refuse was removed. Paul regarded as dung his religious accomplishments and rank achieved prior to his Christian conversion (Phil. 3:8). B.M.L.

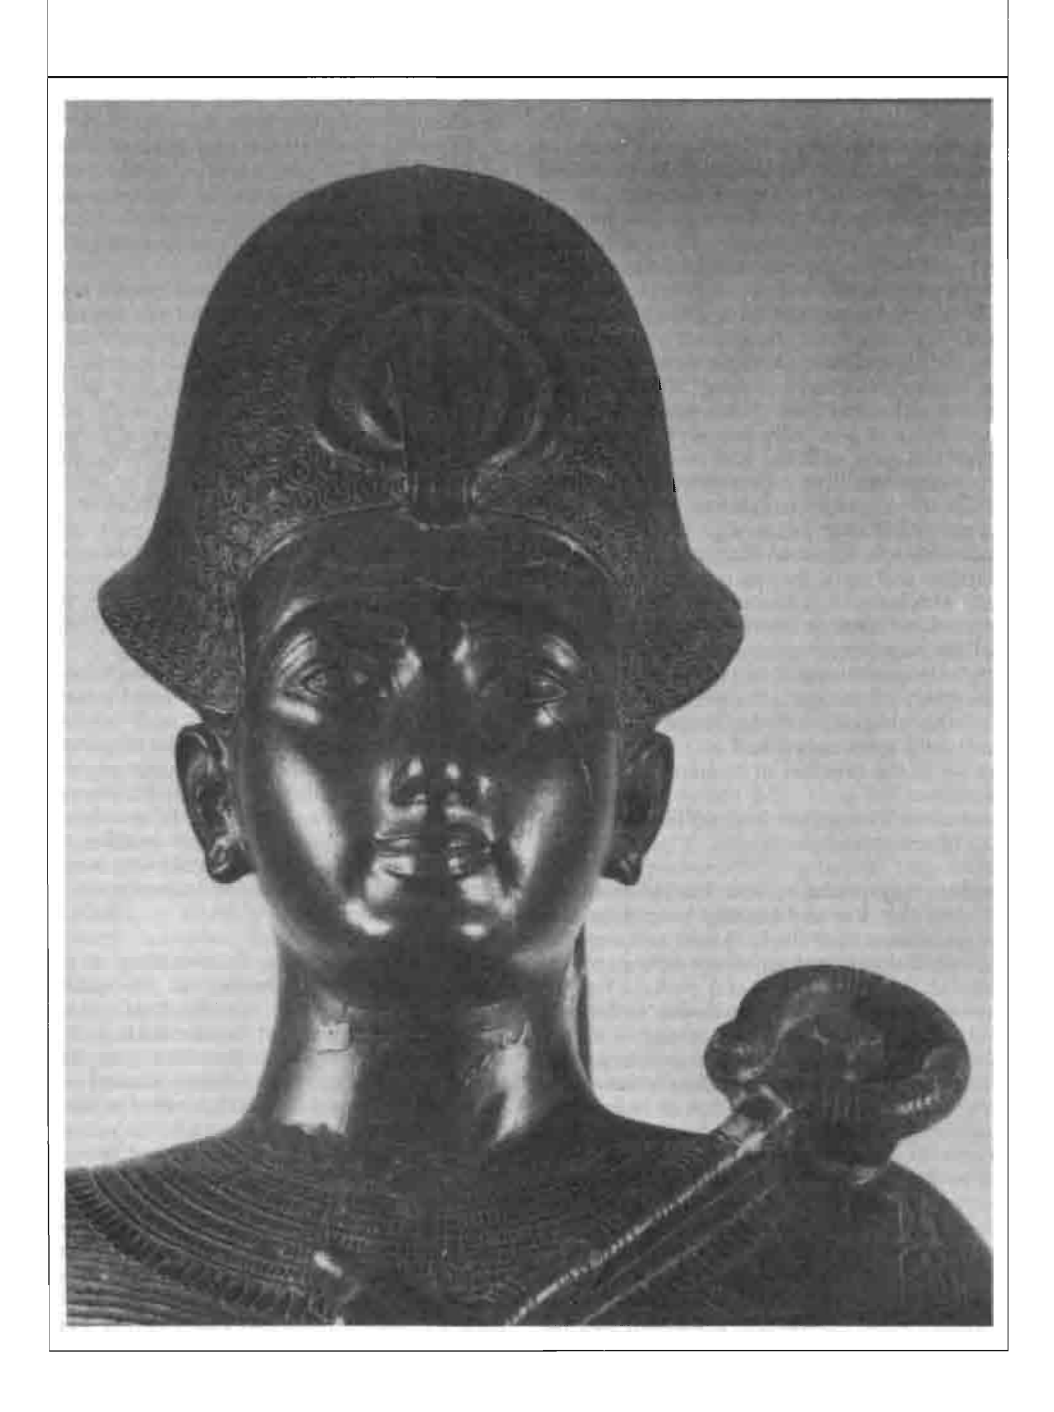
Dura (door´uh), a plain "in the province of Babylon" (Dan. 3:1) where King Nebuchadnezzar set up the golden image for all to worship. Because of the refusal of Daniel and his friends to heed that decree, they were cast into the fiery furnace. The location of the plain is uncertain. ***See also*** Daniel, The Book of.

dyeing, the practice of coloring cloth by adding pigment through hot or cold treatment. Dyeing is discussed only by implication in the Bible. Three references occur in one verse of the poetic version of the defeat of Sisera. In an ironic hypothetical chant of the mother of the dead Canaanite king, she imagines him taking the spoils of the victor, which would include dyed and embroidered cloth, two pieces of which would be for her neck (Judg. 5:30). In a corrected reading of Job 38:14 (where the text has been distorted by transcriptional errors) the poet likens divine control of the dawn to the changes in a garment when it is dyed or clay

when it is rolled or stamped with a signatory seal.

A dyed cloth, known in Ugarit by 1500 B.C., became famous throughout the ancient Near East for its distinctive color, "royal purple." It was long a practical monopoly of the Syro-Phoenician coastal people, but Ezekiel (27:7) was apparently impressed that it was available from Cyprus. Jesus was covered with a "purple cloak" during his incarceration for a time (Mark 15:17–20), and the goods continued to be traded into Roman times (Acts 16:14).

Archaeological evidence of a local dyeing industry in Palestine has been found at Gezer, Beth-zur, Beth-shemesh, Tell en-Nasbeh, and most notably at Tell Beit Mirsim in housed installations numbering about thirty. A 10-by-30-foot room was fitted with two vats with small cover openings and draining rims. Basins and benches were placed near or between the vats. Additional vessels for fixing agents, lime or potash, were nearby. From the vat capacities (cavities about a foot and a half across) and the small openings in the covers, the equipment was apparently intended to dye thread rather than whole cloth. The Hellenistic installation at Gezer included a three-vat room, and vat design was now open-topped in the mode of a tub. A basement furnace here suggested use of hot dyes.



The basis of the coveted royal purple was a coloring agent extracted from two primary gastropods of the Muricidae family, especially *Murex brandaris* and *Murex trunculus*, extensive shell beds of which have been found on the Mediterranean coast of north Lebanon and Syria. The dye derived from the secretion of the hypobranchial gland of the mollusk and the small quantity extractable from each shell contributed to the high cost and value of goods treated with the product. ***See also*** Purple.

R.S.B.

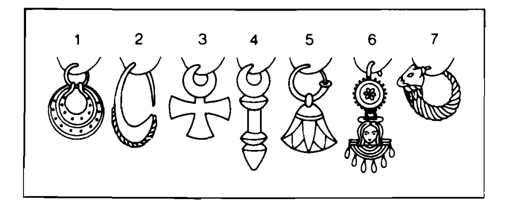
dysentery. ***See*** Disease and Healing.

Opposite: Head of Ramesses II (1279–1212 B.C.), the Egyptian king who may have been the pharaoh of the oppression (Exod. 1–2) or the pharaoh of the Exodus (Exod. 5–12).

E

E, in modern biblical source criticism the letter that refers to materials presumed to derive from a northern Israelite milieu. The letter E itself is an abbreviation of the divine name *Elohim,* the use of which is taken to be one of the characteristics of this source in the patriarchal narratives. ***See also*** Sources of the Pentateuch.

Ea (ee´ah), an early and important Mesopotamian god. Akkadian Ea, a variant of which may perhaps be Haia, corresponds to the Sumerian Enki(k). He was the god of fresh water and its sources. He was a creator god who formed and engendered life. He was a master of crafts and wisdom. Furthermore, he possessed the knowledge and power of magic and was the god of the magician. As flowing water, he both washed away and received evil; as a body of water, he encompassed and controlled monsters and demons.



In origin, he was the local god of Eridu and made his home there. He also shared the direction and rule of the universe with An, Enlil, and the mother goddess Ninhursag. While it is possible that he was secondarily attached to this triad, he is undoubtedly primary to and dominated the gods of Eridu and its environs and this region's tradition of creation myths of irrigation. He appears in myths revolving around figures of his own circle, e.g., "Enki and Ninmah." Here he seems to disappear and then to reappear and (enter into an incestuous relationship with his mother Nammu in order to) create humankind thereby, relieving the gods of their toil. Ea reappears in pan-Mesopotamian myths originating and centering in Nippur. Thus in the "Story of Atrahasis," a probable source of the biblical account of the Flood, the discontent of the gods recurs and it is again Ea who assists in the creation of humankind in order to relieve the gods. The rescue of humanity from utter destruction in the Flood is due to Ea's intervention. I.T.A.

eagle, a large predatory bird. The Hebrew word (*nesher*) that has traditionally been translated "eagle" seems more likely to refer to the griffon vulture. Vultures and eagles are difficult to distinguish from a distance, and perhaps for that reason the same term is applied to both birds. The context determines which one is meant. The passage in Prov. 23:5 where a large bird (Heb. *nesher*) flies toward heaven is thought to refer to the imperial eagle (*Aquila heliaca*), as this bird was believed able to see into the sun. Where the same word depicts a bird as a symbol for swiftness, it may be the golden eagle (*Aquila chrysaetos*) that is alluded to, as this bird possesses great speed (cf. 2 Sam. 1:23; Jer. 4:13).

A number of other eagle species also nest in Palestine or pass through during migration, such as the booted eagle (*Hieraaetus pennatus*), Bonelli's eagle (*Hieraaetus fasciatus*), and the tawny eagle (*Aquila rapax*), some or all of which may also have been present in biblical times. While the kind of "eagle" referred to by Jesus as collecting where a body is to be found (Matt. 24:28; Luke 17:37) probably refers to a vulture, the great bird of Rev. 4:7 may well refer to an eagle. I.U.K.

earrings, jewelry worn at the ear. Earrings were listed together with brooches, signet rings, and armlets (bracelets) as gifts brought to the tabernacle in the wilderness (Exod. 35:22). They were offered with beads and other items as atonement for defiling the dead (Num. 31:50), and Ishmaelite men gave them as material from which Gideon made an ephod (Judg. 8:24–26). They were viewed by Ezekiel as part of the garb of the exquisitely clothed woman (Ezek. 16:12) and reflected God's treatment of Jerusalem.

In archaeological evidence, earrings are most commonly found in burials, and the forms of

Earrings: 1. From Tell el-'Ajjul (1600 B.C.); 2. From the period of the Judges (1100 B.C.), gold; 3. and 4. Assyrian (900–800 B.C.); 5. Egyptian (800 B.C.); 6. Egyptian (100 B.C.); 7. Greek (100 B.C.).

single and multiple pendant designs frequently incorporated the lunar motif as a most popular expression. Materials used included silver and gold, as with rings and bracelets. Filigreed gold is sometimes extremely fine work in these examples, and the numerous burials with single earrings reflect the practice of Roman times. R.S.B.

earthquake, a shaking or trembling of the earth's surface, fairly frequent in geologically active Syro-Palestine. Specific earthquakes within the biblical period include one in 31 B.C. reported by the Jewish historian Josephus, which left clear marks in Qumran's ruins, and one in Uzziah's days (ca. 760 B.C.) cited in Amos 1:1 and remembered in Zech. 14:5. The excavators of Hazor assign the destruction of Stratum VI to this latter earthquake. In legendary but graphically realistic description, earthquakes related to the swallowing up of Dathan and Abiram in Num. 16:30–34, to Elijah's experiences at Sinai (1 Kings 19:11–12), to the destruction of Sodom and Gomorrah (Gen. 19:24–29), to the Holy War panic among the Philistines (1 Sam. 14:15), and to the divine theophany in Exod.

19:18. On virtually every occasion that an earthquake appears in the Bible, it has figurative dimensions of God's intervention; note especially the earthquakes at Jesus' death (Matt. 27:51) and his resurrection (Matt. 28:2). It was readily projected, then, as attending the judgment at the final days (see Isa. 29:6; Matt. 24:7; Rev. 6:12–17; among many others.) ***See also*** Amos, The Book of; Dathan; Eschatology; Hazor; Qumran, Khirbet; Sodom. E.F.C.

east, the, one of the four cardinal points of the compass. The OT terminology for "east" is derived chiefly from two sources. First, it is drawn from language associated with sunrise (Heb. *mizrakh,* "rising, shining," Josh. 4:19), sometimes with sun (*shemesh,* Judg. 21:19) or going forth (*motsah,* Ps. 75:7) with the sun (Ps. 19:5–7), and morning (*boker,* Ps. 65:9). Second, it is drawn from derivatives from the root meaning "before, in front" (*kdm*). Since one orients oneself by facing east, the east is what is before or in front of one. Several derivatives of the root meaning "east" are found in Gen. 11:2; Ezek. 40:6; Gen. 2:14; and Ezek. 10:19. A common use of "east" in the OT, especially in poetry, is in the listing of the four cardinal points to express totality ("everywhere," Joel 2:20; Ps. 75:7; Job 23:8–9). In the NT, "east" (Gk. *anatole*) is similarly used (Matt. 8:11; Luke 13:29). The east is the source of such OT wisdom figures as Job (Job 1:3), Agur (Prov. 30:1), and Lemuel (Prov. 31:1), as well as of the NT Magi (Matt. 2:1). J.S.K.

Easter (ee´stuhr), the Christian festival that celebrates Jesus' resurrection. The name "Easter" derives from the Anglo-Saxon goddess of Spring (Eostre or Ostara), but the Christian festival developed from the Jewish Passover (Heb. *pesech,* Gk. *pascha*), because according to the Gospels the events of Jesus' last days took place at the time of Passover. Easter was originally observed on the day following the end of the Passover fast (14 Nisan), regardless of the day of the week on which it fell. In the mid-second century, however, some Gentile Christians began to celebrate it on the Sunday after 14 Nisan, with the preceding Friday observed as the day of Christ's crucifixion, regardless of the date on which it fell. The resulting controversy over the correct time for observing the Easter festival reached a head in A.D. 197, when Victor of Rome excommunicated those Christians who insisted on celebrating Easter on 14 Nisan. The dispute continued until the early fourth century, when the Quarto-decimans (from Latin for "14") were required by Emperor Constantine to conform to the empire-wide practice of observing Easter on the Sunday following 14 Nisan, rather than on that date itelf.

Currently celebrated on the first Sunday after the first full moon following the vernal equinox, Easter falls differently for Orthodox Christianity which, unlike Western Christianity, did not accept the Gregorian calendar reform in 1582.

Originally a unitary feast celebrating the Exodus and the Christian redemption, Easter was split up in the fourth century into its component parts, Easter Day becoming a separate commemoration of Christ's resurrection. For a long time it was also the preeminent occasion for Christian initiation (baptism), understood as a participation in the paschal mystery. ***See also*** Passover, The; Resurrection. R.H.F.

Ebal (ee´buhl). **1** The ancestral name of a Horite clan in Edom (Gen. 36:23; 1 Chron. 1:40). **2** A variant spelling of Obal (1 Chron. 1:22; cf. Gen. 10:28). ***See also*** Horites.

Ebal, Mount, the salient peak, 3,109 feet above sea level, forming the north side of the Shechem pass opposite Mount Gerizim, in the Samaritan hills. On or at Ebal, Joshua was to erect an altar and memorial stones (Josh. 8:30–35; Deut. 27:1–8), features of an ancient covenant ceremony noted in Deut. 11:29 and 27:11–26. Altar and stones probably relate to the sacred precinct of Shechem on Ebal's lowest slopes, 1,400 feet below the summit near the valley floor. Alternatively they may relate to structures on the heights such as the one on the far side of the summit ridge, found in 1983 to date to the twelfth century B.C. ***See also*** Gerizim; Shechem. E.F.C.

Ebed (ee´bid; Heb., "servant"). **1** The father of Gaal, the leader of a group who settled in Shechem and attempted an ill-fated rebellion against Abimelech (Judg. 9:26–45). **2** The leader of the clan of Adin, a family group who returned from exile in Babylon with Ezra (Ezra 8:6).

Ebed-melech (ee´bid-mee´lik; Heb., "servant of the king"), the Ethiopian eunuch and Jerusalem palace official who was responsible for rescuing Jeremiah out of an empty cistern into which the latter had been thrown by the Judeans, who found offensive Jeremiah's advice to surrender to the Babylonians (Jer. 38:1–13).

Ebenezer (eb´uh-nee´zuhr; Heb., "stone of help"), a site near Aphek, four miles south of Gilgal, according to 1 Samuel. In the account of the double defeat of the Israelites and capture of the Ark by the Philistines (1 Sam. 4:1–11; 5:1), the name has an ironic ring. In 1 Sam. 7:2–12 Samuel names a stone Ebenezer to commemorate God's help in Israel's recovery of the same territory.

Eber (ee´buhr). **1** The great-grandson of Shem, father of Peleg and Joktan (Gen. 10:24–25; 11:14–17; 1 Chron. 1:18–19, 25), ancestor of Abram (Gen. 11:17–26) and Jesus (Luke 3:35). Eber would appear to be the eponymous ancestor

of the Hebrews (cf. Israel), but nothing is made of this beyond the placing of the name in Abram's ancestral line. **2** Beside Asshur (Assyria) in Num. 24:24, probably the region and population "beyond" (the literal meaning of *eber* in Heb.) the river (Euphrates; cf. e.g., Josh. 24:2, 3, 14, 15). **3** The head of the priestly family of Amok in the generation following that of those who returned to Jerusalem with Joshua and Zerubbabel (Neh. 12:20). **4** A Gadite (1 Chron. 5:13). **5** A Benjaminite, son of Elpaal (1 Chron. 8:12). **6** A Benjaminite, son of Shashak (1 Chron. 8:22). S.B.P.

Ebiasaph (i-bi´uh-saf; Heb., "my father has gathered"; more properly Abiasaph, Exod. 6:24), the name of three Levites in the genealogical lists. **1** The son of Korah through Izhar and either the father (1 Chron. 6:23) or the brother (Exod. 6:24) of Assir. **2** The son of Elkanah and great-grandson of a second Korah through Uzziel (1 Chron. 6:37), also the father of Assir. Because of the repetition of names in these lists it is possible that they have been disordered through scribal errors and that these two are the same person. **3** A Levite, the son of Korah and the father of Shallum, the chief gatekeeper of the Levites (1 Chron. 9:19; also called Asaph, 1 Chron. 26:1). Some scholars understand this passage (1 Chron. 9:17–27) to be a postexilic record (corresponding to Neh. 11:1–19); however, other scholars see at least part of this chapter to be adapted from a record of pre-exilic Israel, an introduction to the narratives of Saul and David that follow. If it is pre-exilic, this Ebiasaph may be identified with the first two above; otherwise he is a much later descendant of the clan of Korah. ***See also*** Assir; Korah. D.R.B.

Ebla (eb´luh), modern Tell Mardikh, a large mound of some 140 acres, located in Syria about 42 miles south of Aleppo, astride major routes of east-west and north-south communication. Systematic excavation of the site began in 1964 by an Italian team under the direction of Paolo Matthiae; and it is their finds, especially the statue with the inscription of a king of Ebla, Ibbit-Lim, and the tablets of level IIB1, that have established the identification of the site as ancient Ebla.

The history of Ebla, as revealed by the still ongoing work of Matthiae and his team, stretches over fourteen levels, from ca. 3500 B.C. (Chalcolithic times) to the third–seventh centuries A.D. (Roman–Byzantine periods), with perhaps later, and briefer, occupations in Islamic and Crusader times. Within this range, it is only the four levels IIB1, IIB2, IIIA, and IIIB that cover the whole site, acropolis and lower city, and represent, it appears, Ebla's most prosperous period. The four collectively spanned ca. 2600/2400–1600 B.C., and all but IIB2 have been intensively explored by Matthiae's group.

Cuneiform tablets as they were discovered at Ebla, fallen from their original shelving arrangement ca. 2600–2250 B.C.

Level IIB1 (ca. 2600–2250 B.C.): This is the best-known and most widely discussed level. Debate continues about its exact date. The main position is that of Matthiae's group, arguing for ca. 2400–2300/2250 B.C. (Early Bronze IVA/Mesopotamian Early Dynastic IIIB and perhaps early Sargonic), with the final destruction by an early Sargonic ruler of Mesopotamia, Sargon or Naram-sin, both of whom claim conquest of Ebla in their inscriptions. G. Pettinato and others had supposed a somewhat earlier date of ca. 2600–2500 B.C. (Early Bronze III/Mesopotamian Early Dynastic IIIA–B), but more recently, Pettinato appears to consider lowering the terminus to 2400 B.C.

The main building so far uncovered of Level IIB1 is Palace G, sprawling over the west and southwest part and slopes of the acropolis. Its central element is a large porticoed audience hall, north of which are a massive tower with a stone-inlay stairway, a second stairway, and (storage) rooms, while on its east and south are the monumental gateway to the palace and the administrative quarters.

The objects found in this building include wooden furniture decorated with friezes, seal impressions, and small sculptures—all showing local adaptation of Mesopotamian art of the mid-third millennium B.C. Especially important are the tablets: well over seventeen thousand pieces, recovered largely during the 1974–1976 excavations, but with some additions in the following years, which, allowing for a number of

Large sacrificial basin found at Tell Mardikh (Ebla). The short side shows warriors marching over lions, the long side a banquet scene; Middle Bronze Age.

fragments, comprise perhaps about four thousand whole texts. The tablets come from several places in Palace G, representing different collections or archives; most, however, were found fallen in the debris of two rooms off the audience hall in a way that made it possible to reconstruct the original shelving arrangements. All the tablets are in cuneiform script, reflecting the scribal traditions of the northern area of southern Mesopotamia (especially Kish and Abu Salabikh) during the mid-third millennium B.C. They are apparently in two languages: the less frequent is Sumerian, the principal written language of southern Mesopotamia in the third millennium; the more frequent is a hitherto unknown Semitic language, conveniently labeled "Eblaite," whose linguistic affiliations, though still being discussed, seem to be with (Old) Akkadian and Amorite. As for content, the tablets represent roughly four categories, again with Mesopotamian parallels: economic and other administrative records involving the palace (the most numerous); lexical and grammatical texts for the scribes; literary and religious texts; and texts bearing on the events of the day, like a commercial treaty with the city of Abarsal (which a minority of scholars read as Assur).

Together, these texts appear to reflect a rather short period within the IIB1 level, perhaps about thirty to forty years. But they tell us much about IIB1 Ebla. Presiding over the city, as over various settlements in its vicinity, were rulers called *en* (Sumerian)/*mal(i)kum* (Eblaite), who worked with the city "elders" (Sumerian *AB X AS* and *abba*). Under their authority were a variety of officials (e.g., Sumerian *lugal, ugula, mashkim*) and workers (Sumerian *gurush*), who functioned within the "house of the ruler" (Sumerian *e en*) and other administrative sectors that together made up the city proper (Sumerian *SA.ZAxki*), i.e., what physically comprised the acropolis and lower city. They were also active in the outer settlements of the city (Sumerian *uru.bar*), supplying from separate animal and agricultural farms products to the city. This complex urban structure, which may be called a city-state, was large as well: Pettinato has estimated, from various texts, a population of 260/300,000.

The religious picture was also complex. Administrative and other texts attest Mesopotamian deities like Enki and Enlil, West Semitic deities like Baal, Dagan, Hadad, Rasap (Resheph), and Sham/pash (written as Sumerian Utu, but female, not male as in Mesopotamia), and various deities representing the local substratum, including Kura, the head of the local pantheon, and his consort, Barama. In distinction from these are names like Damu, Il, and Malik, which never appear alone, but only as elements in personal names, and so may not be separate deities, but appellatives meant to describe deities like Hadad and Kura. Among cultic activities in evidence are an enthronement ritual for the ruler and his consort and texts pointing to the ritual veneration of dead rulers.

Finally, the IIB1 texts inform us about a range of localities in contact with Ebla, although reading and identifying the geographical names mentioned continue to be difficult tasks. Most prominent, of course, are those within direct reach of Ebla in the Syrian hinterland, from the south (e.g., Hamath) on through the north and east to the upper and middle Euphrates (e.g., Aleppo, Carchemish, Emar, Harran, Mari, Terqa, and Urshu). Strangely, the Syrian coast is hardly noticed (Ugarit, e.g., appears only in a lexical list, not in administrative texts). In general, the orientation of the texts is toward the east of Ebla, through the upper and middle Euphrates to northern Mesopotamia (Gasur [the later Nuzi]), the northern part of southern Mesopotamia (esp. Kish), and apparently even Iran (Hamazi). Old Kingdom Egypt is also known from imported stone vessels excavated at Ebla, but is not mentioned in the texts. The contacts reflected here are of several kinds: commercial, including trade in textiles, metals, and lapis-lazuli, organized by groups of professional merchants (Sumerian *lu.kar*); diplomatic and military, e.g., with Mari, whose expansion up the middle Euphrates posed a particular challenge; and cultural, most visibly with Mesopotamia, from which, as noted, Ebla adopted and adapted the cuneiform script, the Sumerian language, and various textual traditions and art forms.

In this range of contacts, the southern limit, at least for direct relationships, appears to have been the Homs region of Syria (the contacts with Egypt above must have been indirect). Texts that some claim refer to the Phoenician coast (e.g., Byblos and Tyre) are at best uncertain, while those that have been taken to mention Palestine (e.g., Hazor, Jerusalem, Sodom, and Gomorrah) cannot be sustained. Indeed, the

initial enthusiasm about the light the Ebla tablets would shed on the early stages of biblical culture is now seen as exaggerated, even misplaced. Clearly, no biblical personages can be identified in the tablets; and while personal names can be found there similar to those in the Bible, e.g., Ishmael, such names are not exclusive to Ebla, appearing in other areas of the Near East as well. Moreover, Eblaite, though a Semitic language, does not look specifically close to biblical Hebrew, as originally thought; and the proposal to find the Israelite god Yahweh in the Ebla texts cannot be supported: the supposed form *ya*, which occurs as an element in Eblaite personal names, is ambiguous in reading and interpretation.

The major contribution, thus, of the tablets of Ebla IIB1 is in understanding Syria and Mesopotamia of the third millennium B.C., especially in showing that the complex city-state system attested in Syria in the second millennium had an honorable precedent in the third. In this system, IIB1 Ebla was definitely a major center, but the evidence does not suggest that it was the head of a large empire, as sometimes claimed.

Level IIB2 (ca. 2250–2000 B.C.): This level, built over the destruction of IIB1, belonged to the Early Bronze IVB period, correlating with the post-Akkadian and Ur III periods in Mesopotamia. Palace G was not reused, being covered by other structures; it may be that a new palace, not yet found, was established elsewhere on the acropolis. The few contemporary Mesopotamian references to Ebla suggest that whatever the disruption caused by the destruction of IIB1, some measure of political stability, prosperity, and trade had been restored in IIB2. But how much is not clear; it may be clarified once Matthiae's team is able to explore this level more thoroughly.

Levels IIIA–B (ca. 2000–1600 B.C.): These two levels, however, have been well explored. IIIA, following soon after the apparently extensive destruction of IIB2, fits into the Middle Bronze I/Mesopotamian Isin-Larsa and Old Babylonian periods (ca. 2000–1800 B.C.), when Amorites were gaining political power in many parts of the Near East. One of them may have been Ibbit-Lim, the king of Ebla whose inscription helped identify Tell Mardikh as Ebla, although other scholars argue he was not an Amorite and ruled in the previous IIB2 period. In any case, the political importance Ebla had in IIB1 seems to have declined by IIIA, a decline already under way, perhaps, in IIB2, as its power passed to other city-states to the north, particularly Urshu. Yet outside references to Ebla in the IIIA period suggest the city's continuing vitality in trade, now including the Old Assyrian network into Anatolia, which points to a prosperity that archaeologists have confirmed. Among their findings: a *terre pisée* city rampart, with towers, a small arsenal, and a monumental gate (one of four); two quarters of private houses in the lower city; three new palaces on the acropolis and lower city; and six temples and smaller sanctuaries, which, like the palaces and city gate, have parallels elsewhere in Syro-Palestine.

The following IIIB level (ca. 1800–1600 B.C.; Middle Bronze II/Mesopotamian Old Babylonian periods) saw another change in Ebla's political fortunes, as it came under the control of the neighboring state of Yamhad (Aleppo), which emerged now as dominant in Syria. But once more the prosperity of the city seems not to have suffered. All the buildings of level IIIA continued, without noticeable decline; and a royal necropolis appeared now in full form, constructed out of the natural caves beneath the Western Palace. Of the three excavated tombs (Tombs of the Princess, Lord of the Goats, and Cisterns), two (Princess and Lord of the Goats) yielded treasures of significant wealth; and the complex as a whole attests to the continuation, if not elaboration, of a veneration of the royal dead noticeable earlier in IIB1 and known elsewhere in ancient Syria and Mesopotamia. Level IIIB was destroyed, probably in the Hittite invasion of Syria of either Hattushili I or Murshili I (cf. the recently discovered royal epic text, in Hittite and Hurrian, from the Hittite capital at Hattusha).

Ecclesiastes (i-klee´zee-as˝teez), the twenty-first book in the OT. This book, one of the most often quoted of the Hebrew Bible, is also one of the most mysterious; scholars still do not agree about its provenance, language, literary genre, unity, or overall message.

Name: The name of the book in Hebrew, *Qohelet,* is itself something of a mystery. This word occurs nowhere else outside of the book. It appears to be related, however, to the term *qahal* ("assembly"), which is why the Greek translators of the Bible rendered it as *ekklesiastes,* "assemblyman" (hence, in some translations, "the Preacher" or "Speaker"). *Qohelet,* then, would appear to be some sort of title or office, a supposition supported by the use of this term with the definite article in 12:8 (and possibly 7:27). Some modern scholars, dissatisfied with this explanation, have sought to view *qo-*

Eccles. 2:5–6 describes a garden similar to this one with a pond filled with fish, ducks, and plants surrounded by palm and pomegranate trees; Egyptian wall painting, fourteenth century B.C.

helet as the proper name or nickname of an actual figure or, alternately, as wisdom personified, a walking assembly (*qohelet*) of wise sayings. Perhaps the most promising of recent suggestions connects the word *qohelet* with the rare, but chronologically appropriate, biblical word *qehillah* (Neh. 5:7), which in context seems to mean "harangue" or "argumentative speech." Ecclesiastes may simply be the "arguer" or "haranguer."

Language: The Hebrew in which the book is written shows definite signs of lateness, e.g., by the use of the Persian loan words *pardes* ("garden") in 2:5 and *pitgam* ("decree") in 8:11 (these words must certainly mean that the book was written after the end of the sixth century B.C., when the Jewish homeland became part of the Persian Empire). Apart from this, the language of the book is somewhat strange, with features of grammar, syntax, and vocabulary not paralleled elsewhere in the OT. In the past, scholars have suggested that the book is actually a poor translation of an Aramaic original, but that hypothesis is now largely and justly rejected. More recently, it has been argued that the original language was Phoenician, a dialect closely related to Hebrew but with distinctive features. Yet some of these very features are absent or only intermittently present in Ecclesiastes; this hypothesis too is to be rejected. Most likely, the language of Ecclesiastes is a late brand of Hebrew, with many northern (or at least non-Jerusalemite) features, a language thus situated somewhere between the artificial, "literary" Hebrew of other postexilic writings and the dialect known as Mishnaic Hebrew that was to become a literary language only after the close of the biblical period in the writings of rabbinic Judaism. That is to say, the author of Ecclesiastes did not consistently frame his words, as other late authors did, in a literary, official Hebrew; on the contrary, he seems at times to have relished the brassy sound of contemporary, colloquial speech, especially when debunking accepted ideas.

Content: This view of his language as often consciously down-to-earth and unliterary is in keeping with his message. For although concerned with ultimate issues, Qohelet never loses his focus on the day-to-day life "under the sun." His book is peppered with allusions to the world of commerce and other daily pursuits. Surprisingly, despite the ingenuity of commentators, only a single allusion to Israel's sacred writings or traditions has been convincingly demonstrated to exist in this book (Eccles. 5:3; cf. Deut. 23:22).

The literary form of Ecclesiastes is also unique. Its basic unit of expression is the *mashal,* the two-part proverb or saying. Yet it is not merely a collection of sayings (like, for example, the book of Proverbs). Instead, the sayings seem to frame a life history. The first-person speaker of the book, Qohelet, describes himself as having been "king over Israel in Jerusalem" (1:12). In the opening chapters he describes his experiment in investigating both Wisdom (i.e., the path of patience and restraint) and Folly (hedonism and reckless abandon), an experiment that the resources of a king or ruler make him especially well suited to undertake (2:12). The pursuit of pleasure, with wine, rich living, and concubines—and indeed, the very project of this "scientific" (2:3) inquiry into enjoyment—seems a young man's quest; but Qohelet finds no answer in dissoluteness. He continues to try to grasp the totality of human existence, seeking to embrace it all in the propounding of wise sayings, but it eludes him; everything is "vanity." (The Hebrew *hebel* actually means not "vanity" but something fleeting and futile, utterly insubstantial.) Again and again he tempers his previous observations with "But I returned and saw . . ." or "I saw further . . ." and some of his earlier observations are expressly contradicted by later ones. Some commentators have tried to shape Qohelet's observations into a logical step-by-step argument, but the text resists such an approach as it does any attempt to outline its contents in orderly progression. Instead, what one can say is that Qohelet presents bits and pieces of the truth as he has seen it in his life, and the presence of that life is an all-important framing device. If a youthful inquisitiveness shines through the opening two chapters, the mood then switches to something more somber, resigned, and later, reconciled. The speaker himself seems to age, and by chap. 12, one can feel the weight of his many years and the expectation of death. At the book's end, Qohelet is no more: we get his epitaph (12:9–10).

The book's basic argument seems to be that human existence, like so many things in the

natural world (chap. 1), is round, circular; different activities and desires fit at one moment, when their time comes around, but not at another (chap. 3). Like a sphere, the whole of life's surface cannot be described from any one angle; one must travel around it in order to account for all, and truths apparent from one standpoint prove to be *hebel* from another.

Author: At some point after it was written, Ecclesiastes came to be attributed to King Solomon, the exemplar of wisdom in the Bible; no doubt this attribution helped to preserve its place in the sacred corpus of Jewish writings (for Solomon's wisdom was of divine provenance, 1 Kings 3:12) despite its heterodox, and potentially heretical, teachings. Obviously, for the linguistic reasons cited above, this attribution is impossible; most likely, the book was written in the fourth or fifth century B.C. Its author may indeed have been named or nicknamed Qohelet, and if he was a (Davidide?) governor or administrator appointed by the Persian powers, his self-description as "king over Israel [the Jews] in Jerusalem" may be no literary persona but a statement of fact.

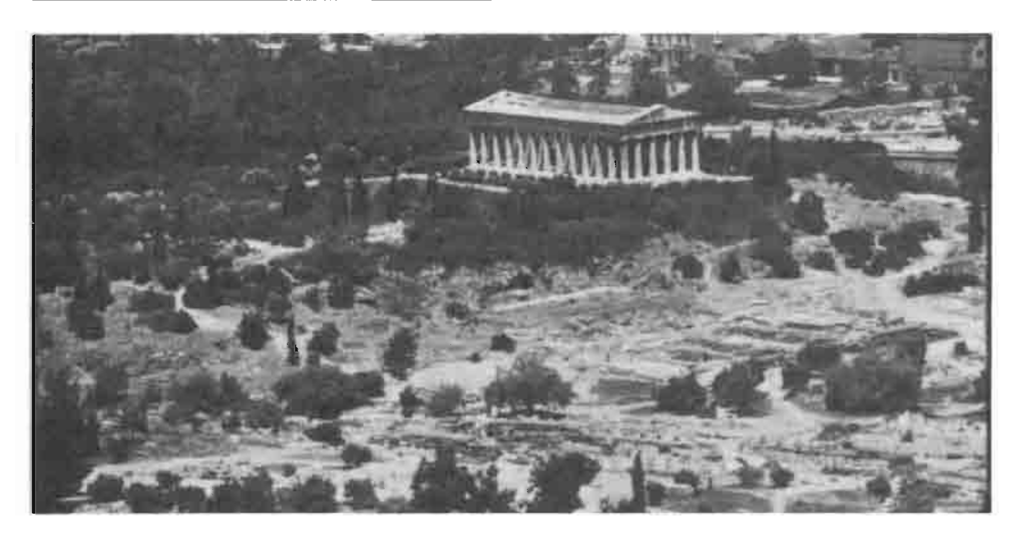
Ecclesiasticus (i-klee'zee-as'ti-kuhs), or the Wisdom of Jesus the Son of Sirach, a book of instruction and proverbs, written in Hebrew around 180 B.C. in Jerusalem by an instructor of wealthy youths. It was translated into Greek in Alexandria by the author's grandson sometime after 132 B.C. The work is of value because it provides extensive evidence for the character of Judaism and Jewish society in Palestine just prior to the Maccabean revolt (167–64 B.C.). We gain a picture of a social order highly polarized between rich and poor, powerful and weak, male and female, pious and nonobservant, and Jew and Gentile, as well as a look into the development of the way of Torah—life centered around the Mosaic law—which will become the central characteristic of Judaism when the Temple is no more.

Much of the Hebrew of Ecclesiasticus has survived in manuscripts found in the Genizah (an attic where badly worn Torah scrolls were "treasured" away when retired from service) of the Ezra Synagogue in Cairo, as well as in a few fragments from the Dead Sea Scrolls. Although not considered canonical, the book remained in use within Judaism as late as the eleventh century A.D. The complete version has survived in Greek translation as a part of the Septuagint. In western Christianity it came to be known as Ecclesiasticus, "the Church's Book," probably because it was the most important of the writings not found in the Hebrew Bible to be preserved in the Vulgate. Protestants relegate it to the Apocrypha, while Catholics classify it as deuterocanonical.



Ecclesiasticus defies outline in any detail, since much of it consists of short passages on a variety of topics, from how to give and attend a party to exhortations to care for the poor. The predominant types of language are the art proverb and the instruction genre, the latter of which is characterized by imperatives followed by reasons for fulfilling the command. The outline which accompanies this article gives some idea of its contents.

OUTLINE OF CONTENTS

Ecclesiasticus

I. The prologue (by the author's grandson)
II. In praise of wisdom (1:1–20)
III. A collection of instructions and proverbs concerning the good life (1:22–23:27), including passages on fearing God (chap. 2), honoring parents (3:1–16), meekness (3:17–31), caring for the poor (4:1–10), friendship (6:5–17), enemies (12:8–18), dealing with the powerful (13:1–26), and sin (21:1–28)
IV. In praise of wisdom (24:1–34)
V. More instruction and proverbs (25:1–37:31), including advice on wives and daughters (25:16–26:18), giving and attending banquets (31:12–32:13), and sacrifice and prayer (chap. 35), as well as a prayer for deliverance from the Gentiles (36:1–17)
VI. A discourse on honorable professions, including the physician, farmer, artisan, smith, potter, and scribe (38:1–39:11)
VII. More proverbs and instruction (39:12–42:25)
VIII. The cosmic order (chap. 43; cf. Psalm 148; Song of the Three Children 35–68)
IX. In praise of the famous (44:1–50:21)
X. Conclusion (50:22–51:30)

Jesus, the son of Sirach, were he alive today, would be a professor of public administration. In some ways, his book reads like a modern-day text on business ethics, although he prefers the public sector to the private and assumes that all merchants are corrupt (26:29). His goal is to instruct the young in the art of living well, in the best sense of the phrase. His students will seek careers in public service as scribes, the class from which public administrators, civil servants, and diplomats were drawn (see 39:1–11). Frugality, hard work, compassion for the poor, honesty, and independence rather than riches are the true measure of character, although wealth is preferable to poverty. The goal of instruction is to learn self-control and correct management techniques in both private and public life in order to enjoy the good life, under the guidance of the Law of

Overview of the ancient agora in Athens. The agora was a center of economic activity in cities in NT times.

God. The major problem for modern readers in his advice is in the treatment of women. He characterizes the wickedness of a wife as the highest of all evil (25:13) and claims that sin and death had their origin from a woman (25:24). The good wife, he asserts, is silent, while one must remain eternally vigilant in caring for a daughter to preserve her purity (26:10–12, 14). While the attitudes are undoubtedly those of the age, the tone with which they are expressed seems more personal in character.

While Ecclesiasticus stands in the wisdom tradition of Proverbs, an important transformation has taken place. Where once there had been a clear separation between the responsibility of the priest for Torah, or Law, and the sage for counsel (Jer. 18:18), the two have come together in Ecclesiasticus. Wisdom is now to be found in the Temple in Jerusalem (24:10) and is identified with "the book of the covenant of the Most High God, the law which Moses commanded us" (24:23). Ecclesiasticus settles the debate in postbiblical Judaism over the dwelling place of wisdom, like Baruch 3:9–4:4, by declaring that it has been revealed to Israel by God in the moral instruction of the Law, rather than reserved in the heavens where only the specially initiated receive instruction in the secrets of the cosmos (cf. Wisd. of Sol. 8:15–22; 9:4, 9–10; *1 Enoch* 42). According to Ecclesiasticus, the sage must be satisfied with the limitations of the human intellect (3:21–24).

The marriage of Torah and counsel is also reflected in the models for the good life offered in the praise of the famous in chaps. 44–50. The highest praise is reserved for Moses, Aaron, and Phinehas the son of Eleazar, priestly heroes important for their work as public administrators and leaders of worship, each of whom, in the son of Sirach's eyes, was the recipient of a covenant with God (chap. 45). Next in rank comes David. He is pictured as an effective ruler concerned for the administration of public worship, who was given a covenant of kingship (45:25; 47:2–11). In his own time, the son of Sirach offers the model of Simon the Just, the high priest who was the theocratic ruler of his people from about 219 to 196 B.C. and as such combined the offices of priest and king (thus wedding Torah and counsel). Simon is pictured both as an effective public administrator and leader of worship in a passage important for its information about the worship of the Temple in the Second Temple period (50:1–21). Ecclesiasticus's praise of the famous also makes it clear that by 200 B.C. both the Torah and the Prophets are fixed divisions of Scripture in Palestinian Judaism. ***See also*** Apocrypha, Old Testament; Education; Proverb; Temple, The; Torah; Wisdom; Women.

D.W.S.

economics in New Testament times. The love of money is the root of all evil (1 Tim. 6:10), and no one can serve both God and mammon (Matt. 6:24). With such attitudes as these, not to mention the many attacks on wealth and the wealthy (e.g., Mark 10:25; Luke 6:24–28; 12:13–21; 16:19–31; 1 Tim. 1:10; 3:3; 6:9–10, 17–19), it might be surprising to find that the NT is also a rather detailed and comprehensive source of information about economic life. This information will be organized in the following survey around the principal geographical divisions of the Greco-Roman world: the city, the countryside, and the wilderness.

The City: The city (Gk. *polis*) was the scene of many economic institutions and roles. In the marketplace retailers (2 Cor. 2:17) displayed

ECONOMICS IN NT TIMES

wares of all sorts: purple cloth (Acts 16:14), swords (Luke 22:36), oil for lamps (Matt. 25:9), linen and spices for burial (Mark 15:46; 16:1), pearls of great price (Matt. 13:45), and even sparrows at five for only two pennies (Luke 12:6). The marketplace was also where men gathered early in the morning to be hired for occasional or seasonal labor (Matt. 20:3; cf. Acts 17:5); indeed, such laborers were called *agoraioi* or "men of the marketplace." In addition, the marketplace was the scene for the sale of slaves (Matt. 18:25; cf. 1 Tim. 1:10). On occasion, one could see in the marketplace a slave girl with a "spirit of divination" bringing in money for her owners (Acts 16:16), young flute players sitting ready to play for a wedding or funeral (Matt. 11:17), or a man carrying water (Mark 14:13).

Also in the marketplace and elsewhere in the city were the workshops where artisans crafted innumerable products. Paul, for example, was a leatherworker, apparently specializing in tents (Acts 18:3; cf. 1 Thess. 2:9; 1 Cor. 4:12; 2 Cor. 11:27), and scattered references identify other artisans as fullers (Mark 9:3), tanners (Acts 9:43), silversmiths (Acts 19:24), potters (Rom. 9:21), and metal-workers (2 Tim. 4:14).

The range of urban economic activity is not limited, however, to retailers and artisans. For example, port cities were involved in shipping (Acts 21:2–3). Especially important was the Roman grain trade, which receives incidental notice in the course of Paul's journey to Rome for trial (Acts 27:2, 6, 38; 28:11). Grain, of course, was not the only import to Rome. Captains and sailors (Rev. 18:11) brought in merchandise from places as far away as Africa, China, and India, to judge from the long list in Rev. 18:12–13: gold and silver, jewels and pearls, purple cloth, silks and fine linen, scented woods, ivory, cinnamon, incense, perfumes, wine, oil, horses, and slaves.

Construction was a ubiquitous urban economic activity. At the time of Jesus, for example, renovations and enlargements of the Temple in Jerusalem had been going on for forty-six years (John 2:20), and references to building are quite common (Matt. 7:24; Mark 12:10; Luke 14:28; 1 Cor. 3:10; Eph. 2:20; Heb. 3:3). Equally ubiquitous, though less reputable, were the economic activities of various urban marginals: thieves breaking into houses (Matt. 24:43; Luke 12:33; 1 Thess. 5:2); prostitutes seeking out prodigals (Luke 15:30); and the blind, lame, and sick begging outside houses (Luke 16:20) or temples (Acts 3:2; cf. also Mark 10:46; Luke 16:3; 1 John 3:17).

Economic activity even characterized some urban settings that today are seldom associated so explicitly with the economy. For example, temples were places of buying and selling sacrificial animals (Mark 11:15; John 2:14; cf. Luke 2:24). Priests were entitled to their share of these sacrifices (1 Cor. 9:13), and temples became receptacles of many offerings, large and small (Mark 12:41–43; Acts 21:24). When such other economic activities as collecting the Temple tax (Matt. 17:24) and money-changing (Mark 11:15) are included, Jesus' use of an economic metaphor when denouncing the Jerusalem Temple as an "emporium" (John 2:16) becomes plausible. In the synoptic Gospels, the Temple is similarly denounced; there the metaphor is stronger, but no less economic in import: the Temple is compared to "a cave for brigands' [booty]" (Matt. 21:13; Mark 11:17; Luke 19:46).

The principal locus of the ancient economy, however, was the urban household, especially the "great households" (2 Tim. 2:20). These households were large, complex, and economically central. They included not only the householder and his wife and children, but also numerous slaves—a social pattern familiar from the household codes of Eph. 5:22–6:9 and Col. 3:18–4:1, where moral instruction is given to husbands and wives, parents and children, and masters and slaves. But these households might also contain other persons for short or even extended periods of time: other rich friends and neighbors invited in for a banquet (Mark 6:21–28; Luke 14:12; 1 Cor. 11:17–34); more formal groups, or associations, provided with room and resources for religious and social meetings (Rom. 16:1–2, 23; 1 Thess. 5:12; Philem. 22; 3 John 5–8); and still others, such as teachers and workers, admitted into the household for indefinite periods (1 Cor. 9:5; cf. Acts 18:3).

The large numbers of people who belonged to a great household filled a variety of economic roles. Most important were the slaves. Loyal and dependable ones had positions of responsibility as stewards (Gal. 4:2), overseeing the householder's accounts (Luke 16:1), paying his occasional hired help (Matt. 20:6), or being put in charge of the other slaves (Luke 12:42–45). These other slaves, in turn, did many tasks: being in charge of a banquet (John 2:8), preparing food and waiting on tables (Luke 17:8), taking down dictation for a letter (Rom. 16:22), delivering letters (Eph. 6:21–22), delivering messages (Luke 14:17), answering the door (Mark 13:34; Acts 12:13), or working as artisans, a role not attested in the NT but implicit, for example, in Paul's perception of his tentmaking as slavish (1 Cor. 9:1, 19). At any rate, older slaves might become tutors of householders' children (1 Cor. 4:15), and infant slaves might be raised as playmates of their householders' children (cf. Acts 13:1).

With slaves to serve food, answer the door, run errands, work at various trades, and watch over or amuse the children, the householder (Matt. 13:27, 52; 20:1; 21:33; 24:43; Luke 13:25; 14:21) did not have to work. As a consequence, the leisurely rich often had only contempt for workers and work itself, a contempt Paul felt directed at him, as is clear from the

ECONOMICS IN NT TIMES

inclusion of his working with his hands in a list of experiences that put him among the dregs of humanity (1 Cor. 4:12–13). But if householders generally remained aloof from work on a day-to-day basis, their responsibility for their households gave them another economic role. On occasion, a householder might inspect a new parcel of land in the countryside (Luke 14:18), decide what to do in the wake of sabotaged fields (Matt. 13:27), deal personally with rebellious tenants (Mark 12:9), dismiss a steward suspected of mismanagement (Luke 16:2), or decide whether to punish a returning runaway slave who may have stolen something (Philem. 10–18). As masters, householders could be harsh (Matt. 18:32–34; 1 Pet. 2:18), inflicting both verbal attacks (Luke 19:22) and physical beatings (1 Pet. 2:19–20) on their slaves. The NT counsels against masters making threats toward slaves and advocates fair treatment (Col. 4:1; Eph. 6:9), but slaves are likewise admonished to obey, work hard, and not steal (Col. 3:22; Eph. 6:5–7; Titus 2:9–10).

A householder's wife also had economic responsibilities. Her roles in the household are succinctly stated in 1 Tim. 5:14: to marry, bear children, and manage the household (cf. Titus 2:4–5). After marrying and entering her husband's household, she was expected to bear children, a role necessary to the preservation of her husband's wealth and property. The third role, managing the household, also had economic dimensions, as she, often with the assistance of female slaves, was responsible for childcare (Matt. 24:19; Mark 7:25), food preparation (Luke 17:35), spinning (Matt. 6:28), and weaving (Acts 9:39). These last two tasks contributed considerably to the economy of the urban household, if largely for internal consumption.

Yet the householder and his wife, despite their roles in the household economy, are probably more appropriately viewed as users or consumers of wealth. They typically used their considerable wealth for public display, for impressing others, and for personal enjoyment. Wealth was displayed in jewelry and fine clothing (Luke 7:25; 16:19; James 2:2) as well as at banquets with gold and silver serving dishes (2 Tim. 2:20), extravagant menus (Luke 16:19), and costly entertainment. Just how costly such entertainment could be is suggested by Herod Antipas's offer to give half of his kingdom to the dancing girl at his banquet (Mark 6:22). A householder's wealth would have impressed those who were poorer whenever he placed much money in the Temple boxes (Mark 12:41) or otherwise made public contributions to the poor (Matt. 6:2; Luke 19:12; Acts 10:2), and especially when he compelled the poor to fill places left vacant at his banquets (Luke 14:13, 21–23). The use of wealth for personal enjoyment is also easily documented: in the hedonistic motto of one household to "eat, drink, be merry" (Luke 12:19), in the depiction of another householder's son as feasting in great magnificence every day (Luke 16:19), and in the general characterization of the rich as always full and sated or otherwise satisfying their many desires (Luke 6:25; 1 Thess. 5:6–8; 1 Tim. 6:9–10; James 5:5).

While money-making activities in the city—loans (Matt. 18:23; 25:20–23), savings (Luke 19:23), the sale of slaves (1 Tim. 1:10)—partially supported the aristocratic household and lifestyle, the principal source of the householder's wealth was land, and this wealth came largely from the agricultural produce of extensive and ever expanding (Mark 12:1; Luke 14:18) properties beyond the city walls in the countryside.

The Countryside: The word "countryside" (Gk. *chōra*) is a technical term with a decidedly economic meaning. It refers to all agriculturally productive land that surrounded the city. Used quite frequently in the NT in this economic sense (Luke 12:16; John 11:55; Acts 10:39; James 5:4), it refers specifically to fields, vineyards, pastures, orchards, and even woods with their supply of nuts, berries, wood, and game. It is here in the *chōra* that the householders owned land that was worked by tenants (Mark 12:1, 9) or slaves (Luke 17:7), who became rural members of their landlords' already sizable households. On occasion, temporary help in the form of hired laborers (from the city or countryside) was required (Luke 15:15, 17), especially during the harvest of grain (Matt. 9:37; 13:30) or the vintage (Matt. 20:7). After the harvest, a slave manager would pay the temporary laborers (Matt. 20:8) and then take his master's portion of the crop (Matt. 21:34), including any surplus (Luke 12:16–18).

These tenants and slaves, along with independent farmers (Mark 4:3; Matt. 21:28), lived in villages scattered throughout the countryside. Villages also had their craftsmen (Mark 6:3), shopkeepers (Luke 9:12; cf. 11:5–6), innkeepers (Luke 10:35; cf. 9:12; 24:28–29), and economic marginals such as beggars (Mark 10:46).

The economic life of the countryside was varied and hence required a variety of agricultural roles, or at least a variety of agricultural tasks. Farming and herding were the basic economic roles. Farmers, of course, grew grain (Matt. 13:24–25; Mark 4:26–29), but they could also take care of a vineyard (Matt. 21:28; Mark 12:1; 1 Cor. 9:7), fig trees (Luke 13:7; James 3:12), olive trees (Rom. 11:17–18), not to mention a garden for planting mustard (Luke 13:19) or vegetables (Matt. 13:32; cf. Rom. 14:2). Likewise, herders obviously tended their livestock, whether cattle (Luke 15:23), sheep (Matt. 18:12; Luke 2:8; 1 Cor. 9:7), goats (Matt. 25:33; Luke 15:29), or pigs (Mark 5:11). And, given the characters and locale of the gospel story, we cannot ignore fishermen (Mark 1:16–20; Luke 5:1–11; John 21:1–3). In addition, on occasion, there

ECONOMICS IN NT TIMES

were other jobs to do: building granaries (Luke 12:18), putting up fencing, making wine presses, building a tower (Matt. 21:33), or even constructing a synagogue (Luke 7:5).

The agricultural tasks can be defined further in order to give a sense of the actual work done in the countryside. Farmers, for example, had much to do: plowing the field (Luke 9:62; 17:7; 1 Cor. 9:10), winnowing (Luke 3:17), burning the chaff (Matt. 3:12), and storing the grain in barns (Matt. 6:26; Luke 12:18). In addition, they might set out vines (1 Cor. 9:7) and then cultivate, water, and prune them (Luke 13:7; 1 Cor. 3:8; John 15:2); or they might make olive grafts (Rom. 11:17–18), water the oxen (Luke 13:15), spread manure (Luke 13:8), burn pruned branches (Matt. 7:19), or chop down nonproducing trees (Luke 3:9). Similarly, herders had to watch their flocks (Luke 2:8), which included chasing after strays (Luke 15:4), digging pits to trap marauding wolves (Matt. 12:11), and separating sheep and goats at nightfall (Matt. 25:32). Fishermen could be found throwing their nets into the water (Mark 1:16), hauling in fish (Luke 5:6–7), sorting fish (Matt. 13:48), or washing and mending nets (Luke 17:35).

Women in the villages were busy, too, spinning and weaving (Matt. 6:28), mending old clothes (Mark 2:21), grinding meal (Matt. 24:41), making bread (Matt. 13:33), sweeping the house (Luke 15:8), or going out to a well for water (John 4:7). On occasion, they might earn some money as mourners for one who had died (Mark 5:38).

Not only the number of tasks but many details about them make it plain that the lives of farmers, herders, and fishermen were hard indeed—a far cry from the leisure and luxury of their urban masters. At any rate, many tasks were physically demanding, such as digging (Luke 16:3). There was also the scorching sun (Matt. 20:12; Rev. 7:16) or, in the case of shepherds and fishermen, working the whole night through (Luke 2:8; 5:5; John 21:3). What is more, these workers toiled on diets near subsistence level. Farmers counted the number of grains produced per seed sown, and some seeds, to be sure, produced spectacularly (Mark 4:8), but such abundance went to the householder (Luke 12:16–19). At other times, the land produced not abundance but thorns (Heb. 6:8; cf. Matt. 7:16), and fishing nets came up empty (Luke 5:5; John 21:3). Consequently, even sparrows could become a meal (Matt. 10:29), and some might be forced to eat the pods fed to swine (Luke 15:15). Not surprisingly, famine was always a specter (Luke 15:14; Acts 121:28; Rev. 6:8). No wonder prayers asked merely for daily bread (Matt. 6:11; Luke 11:3).

Agricultural workers had more to face than hard work, long hours, and little food, however. Herders had to contend with wolves and brigands (Matt. 7:15; John 10:8, 10), fishermen with squalls (Mark 4:37), and everyone with fraudulent tax collectors and their brutal soldiers (Luke 3:11; 19:8). In addition, a householder might withhold the wages of those who had harvested his crops (James 5:4), and when those from the countryside went to the city they could be compelled to do some task (Mark 15:21; cf. Matt. 5:41) or even be misidentified as a brigand (cf. Luke 22:52) and summarily executed (Luke 23:21).

To be sure, the life of farmers and herders was not totally grim and unyielding. There was joy at finding a lost sheep (Luke 15:5–6) or the greater joy at finding a buried treasure (Matt. 13:44), and the return of a son, long thought dead, was an occasion for incalculable joy and celebration (Luke 15:20–32). Still, the overall impression must be of most people toiling incessantly in the countryside in order that a few householders and their families in the city might live in ease and extravagance.

The Wilderness: The third of the general categories for organizing the NT evidence regarding the ancient economy is the wilderness (Gk. *erēmos*). This word is often invested with religious meaning—as a place for repentance and renewal (Mark 1:2–6) or retreat (Mark 1:35), but it also has economic significance in connection with the city and the countryside. If the countryside is the productive land that immediately surrounds and supplies the city, then the wilderness is the more distant and nonproductive land that extends beyond the countryside in all directions. As nonproductive land, the wilderness could consist of desert, such as the barren land in the Jordan Valley near the Dead Sea (Mark 1:4; cf. John 11:54) or the Arabian desert (1 Cor. 10:5). Yet wilderness is not usually desert. It is simply any nonproductive area, such as very hilly, mountainous, or otherwise isolated land (Matt. 15:33; 2 Cor. 11:26). It can even refer to formerly productive and populated areas (Matt. 12:25; Luke 21:20).

Yet to say that wilderness is economically unproductive land (or at best economically marginal land in the sense of accommodating an occasional herder [Luke 15:4]) is not to deny its economic role. A wilderness might be traversed by roads on which traders and other travelers moved (Luke 10:30–33). Here, they were exposed to attack by brigands who operated at will in these distant and isolated areas (Luke 10:30; 2 Cor. 11:26). Indeed, from the safety of their wilderness hideouts, brigands might make forays into the countryside to attack, say, the flocks of herders (John 10:1) and, if numerous and rapacious enough, they might even pose a political threat (Acts 5:36–37; 21:38). Brigands robbed and kidnapped those they attacked, and the later sale of these victims became the major source of slaves, once Rome had completed its conquests.

Summary and Conclusion: In NT times, there was some, perhaps considerable, commercial-

ECONOMICS IN OT TIMES

ization (most clearly reflected in the prophecy about Rome and its merchants in Rev. 18), but the economy remained fundamentally tied to agriculture. Other than the activities of free artisans and shopkeepers in the cities (and rural villages) and of brigand gangs in the wilderness, the vast majority of people lived as farmers, herders, and fishermen in the countryside surrounding a city and worked on land that was usually owned by the urban aristocracy, who lived—and lived well—off its surplus. The two groups—the producers of wealth and the consumers of it—were related socially through the institution of the household and surrounded geographically by economically marginal hills, mountains, and deserts—the wilderness.

The evidence for this description of the ancient economy has been drawn exclusively from the NT itself, yielding a remarkably comprehensive and coherent account. Nevertheless, it is hardly complete, and other sources can add to the study of the economics of NT times.

For example, among literary sources Longus's *Daphnis and Chloe*, despite some pastoral flights of fancy, provides a lengthy and coherent account of the lives of herders and farmers in the countryside. Complementing Longus are the *Letters* of Alciphron, which give details about the lives of farmers and fishermen. For the life of hunters at the outermost reaches of the countryside, there is the seventh oration of Dio Chrysostom, and for considerable attention to brigands and their economic roles, there is Chariton's *Callirhoe*. In addition, householders, artisans, and other urban characters receive detailed, if humorous, treatment in the satires of Lucian. Finally, Apuleius's *Metamorphoses* is perhaps the single most informative literary source for all dimensions of economic life in NT times.

Documentary evidence—on papyrus and stone—is the staple of historians of the ancient world. This evidence comprises countless volumes and fills in many gaps left by the literary sources. Included in these papyri and inscriptions are such documents as apprentice contracts, tax receipts, deeds of emancipation, leases of workshops, sales of produce, contracts of all kinds, and records of gifts to temples that detail virtually every aspect of ancient economic life.

economics in Old Testament times. Economics in the ancient world, like the modern, was a function of three interacting elements: climate and geography, social structures of people living in the land, and historical circumstances affecting the ability of residents to maximize the potential of their locality. Of these three elements, climate and geography remain relatively constant, except insofar as territory may be gained or lost, especially by war or conquest. Social structures must be able to adapt to historical exigencies, arranging and rearranging economic relationships for the continuance of the community. Ancient Israel's socioeconomic history reflects three major stages, marked by radical change in response to communal threat: the early settlement period (1250–1020 B.C.), the period of the monarchy (1020–586 B.C.), and the period of restoration (538–416 B.C.).

The queen of Sheba and Solomon. Her visit may be seen as an effort to establish trade agreements for incense and spices from Arabia; detail from the Gates of Paradise, Florence, ca. 1425.

Climate and Geography: The designation of Israel's homeland as a "land flowing with milk and honey" offers an idyllic and partial picture of ancient Palestine. Lush, richly producing areas like the central hill country and the eastern hills of the Transjordan provide diverse products, including wheat, barley, grapes, figs, olives, and honey. Here the annual rainfall ranges from 20 to 40 inches. But to the south and east this green belt fades rapidly to desert, where rainfall is less than 10 inches per year and sheep, cattle, and other livestock provide a living. Between the western and eastern hills lies the Rift Valley, stretching from the Orontes

ECONOMICS IN OT TIMES

River in the far north to the Dead Sea in the south. Through this valley courses the Jordan River, which winds its way from the Sea of Galilee to the Dead Sea, dropping from 695 feet below sea level to 1,285 feet below sea level. Along the narrow floodplain of the valley, called the Ghor, grows the "jungle of the Jordan" (Jer. 12:5), dense thickets of thorn scrub and tamarisk. This "good broad land" (Exod. 3:8) where Israel made a home is a land of sharp geographic contrasts, which mirror equally sharp seasonal changes. The year is divided into two seasons: a rainy winter season and a dry summer season. The winter season begins in autumn with the "early rains" that mark the beginning of the agricultural season and extends to the "latter rains" of March and April, so important for ripening crops. Mean temperatures in January range from 42 degrees Fahrenheit in the hill country to 58 degrees in the coastal plain and on the desert's edge. The summer season is virtually rainless, and temperatures rise to an August mean of between 71 and 93 degrees Fahrenheit. Available rainfall and temperatures tend to decrease from west to east and from north to south, effecting marked differences in the type and amount of agricultural products available to sustain communities.

The Early Settlement Period (1250–1020 B.C.): In this early period, Israel consisted of a federation of tribes bound together by loyalty to their God who had delivered them from slavery in Egypt and given them the land in which they now dwelt, thus changing their social status from slaves to settlers. Economically, each tribe was autonomous, consisting, in turn, of a collection of extended families organized into protective associations (usually called "clans"). The land—initially the central hill country and later northern and southern territories—was divided into tribal allotments, which were subdivided for family use. According to the federation's view, the land belonged to God and was granted to the tribes in trust for their use and benefit. The land could be inherited, ordinarily transferred from father to son, but it was not to be sold outside the association of families since God had given it to the tribe in perpetuity. Each family lived off the land, growing or raising what it needed and bartering for the few craft items it could not produce. Life was village based and agriculture intensive, producing wine, oil, fruits, and vegetables, supplemented by small cattle herds and larger flocks of sheep and goats.

While pastoral nomadism was likely practiced, especially in regions where rainfall and climate varied greatly, necessitating the relocation of animals for winter and summer pasturage, recent studies indicate that nomadism never played a significant role in the tribal life of ancient Israel. Indeed, where pastoral nomadism occurred, it was probably only a specialization of some herdsmen within the dominant agricultural enterprise of the extended family and certainly not the lifestyle of whole tribes, either before or after settlement in the land.

In this period, Israelite society was structured in an egalitarian fashion, each tribe with its families having the rights to production from its own land. Tribes were self-governed and largely patriarchal, and they were united only for the purpose of mutual self-defense and common religious practices. By the middle of the twelfth century B.C., the force that would lead to a radical change in Israel's way of life was already beginning to grow along the coast of Palestine, as the Philistines expanded their reach into Israelite territory, their presence attested by pottery finds in the Negev (south) and Shephelah (west) regions from ca. 1150 B.C. on. By the middle of the eleventh century, the superior military organization and armaments of the Philistines encouraged their encroachment into the Judean hill country. The tribal federation's military leadership, in an effort to stem the threat from the Philistines, transformed Israelite society into a monarchy.

The Monarchy (1020–586 B.C.): Once the Philistines were defeated by David at the beginning of the tenth century, the modest and limited kingship initiated by Saul and David was transformed by Solomon into a complex, bureaucratic, and expansive royal domain. A process of urbanization had begun, focused especially on the royal city, Jerusalem, and a growing class of courtiers and royal officials, whose increasing wealth and control over the land dominated socioeconomic structures. The royal appetite for expenditures during Solomon's reign was seemingly insatiable, whether for new construction, fortifying towns, or maintaining an increasingly expensive standing army. Solomon resorted to direct taxation for the first time in Israelite history and established a levy of compulsory military and civil service from the population. Population remained largely rural, but socioeconomic power shifted to the cities, favored by royal monopoly over exports and imports. Increasingly, means of production became state owned or state influenced, as family properties were broken up and taken over by rich landlords. These large estates (Lat. *latifundia*) were worked by slave labor or by wage labor. The cities became marketplaces where surplus agricultural commodities could be exchanged for urban-based crafts, with various specialties located on specific streets or in specific quarters of the city. Exchange took place "in the gate," where rural and urban population met, together with traders and caravaners passing through the city en route to foreign markets.

Solomon introduced Israel to foreign trade. Located in the crossroads of trade from Mesopotamia to Egypt or Asia Minor and from Egypt to Asia Minor and Assyria/Babylonia

A Hebrew inscription on an eighth-century B.C. ostracon reads: "gold from Ophir to Beth-horon—30 shekels." Solomon had earlier introduced foreign trade to Israel and built ships to carry goods from Ophir to Israel.

and from southern Arabia to points north, east, or west, Israel was in a most enviable position to broker goods from all over the region. It is not coincidental that the three cities Solomon is credited with refortifying, Gezer, Megiddo, and Hazor (1 Kings 9:15–18), are all on important trade routes. Indeed, Solomon seems to have established a network of storage cities that enabled him to take full advantage of his control over caravan trade coming overland and maritime trade coming from Phoenicia, Egypt, or southern Arabia. Moreover, he built a fleet of ships to carry goods, including ivory, silver, gold, and apes (1 Kings 10:11, 22), from Ophir to Ezion-geber, whence they continued the journey to market overland. One may fairly see in the queen of Sheba's fabled visit to Solomon an effort to establish trade agreements for incense and spice from Arabia. Finally, we are told that Solomon imported and exported horses from Cilicia (biblical Kue) and chariots from Egypt, playing the lucrative role of middleman (1 Kings 10:28–29). In all these commercial ventures, Solomon was aided by a close relationship with Tyre, the most important Phoenician port city, which supplied not only building materials for Solomon's projects but expert technical assistance for the Ezion-geber fleet operations.

Whatever the economic benefits of Solomon's activity, especially for the new urban aristocracy and merchant class, his reign transformed Israelite society remarkably, imposing a highly structured, bureaucratic, state-monopolized system on a formerly tribal, village, largely rural, and self-sufficient population. At Solomon's death, the monarchy splintered over the economic demands of the court and the hardships imposed on the common people. Nevertheless, the monarchic model stayed in place, both in the northern kingdom of Israel and the southern kingdom of Judah. These two kingdoms now found themselves dependent on one another if control of the international trade routes and the export and import efforts initiated under Solomon were to continue. However, the division of the kingdom was fatal, since each kingdom now had to fend for itself in the maelstrom of international politics created by the imperialistic designs of Egypt, Assyria, and Babylonia. While marked by a few brief periods of prosperity, Israel and Judah's economic history was characterized until the end of Israel in 722 B.C. and Judah in 586 B.C. by exploitation at the hands of foreign overlords and widening disparity at home between the beneficiaries of royal monopolies and the common people. To both these crises the prophets of Israel addressed themselves, holding up as standard the memory of earlier, more egalitarian social structures and calling for justice for those exploited by the new system.

The Restoration (538–416 B.C.): With Cyrus of Persia's decree of 538 B.C. granting permission, Israelites began to return to their land from exile. Those returning found others who had never left living on the land, scraping out a subsistence livelihood much as their ancestors had done when the land was first settled. Still under the tutelage of Persia, for whose economic benefit Israel was expected to labor, those returning attempted to set up a semi-autonomous state, with a priestly class and Judean elite at the helm. Despite the efforts of some of the new leaders, like Ezra and Nehemiah, to establish a more equitable relationship between the upper and lower classes (see Neh. 5:1–13), the egalitarian ideal of earlier days was never realized. Israel's economic welfare remained tied to the winds of international politics and the whims successively of Persian, Ptolemaic, Seleucid, and Roman overlords. ***See also*** Ownership.

Eden (ee´duhn), the garden in which the first man and woman were placed and from which they were driven because of their breach of divine law. Although traditionally identified with the Hebrew word meaning "luxury, pleasure, delight" (*eden*), Eden is more probably to be related to a Sumerian word meaning "plain, steppe" or the like (*edin*). Its location "in the east" (Gen. 2:8) probably places it, for the author of Genesis 2–3, in the area at the head of

the Persian Gulf; this location may relate Eden to Dilmun of Sumerian myth—the idyllic land where old age, sickness, and death are unknown to its blessed inhabitants.

In Genesis 2–3, Eden is mentioned in 2:8 ("garden in Eden"), 2:10 (simply "Eden"), and 2:14; 3:23, 24 ("garden of Eden"). In Gen. 2:9, 16 and 3:1, 2, 3, it is referred to as "the garden." It is the source of four great rivers (Gen. 2:10–14) and the site of the Tree of Life and the Tree of Knowledge, both of which are "in the middle of the garden" (Gen. 2:9; 3:3). In Genesis, Eden is a garden created by God for human beings, to provide for human needs.

After Genesis, the most important source of references to Eden is the book of Ezekiel. In Ezek. 28:11–19, a variant of the Eden story in Genesis, the prophet describes Eden as the "garden of God" (28:13) situated on God's holy mountain from which primal man was expelled by the cherub because of his iniquity. While sharing many motifs with Genesis 2–3 (including the abundance of precious stones in Eden, Gen. 2:12; Ezek. 28:13), Ezekiel differs from Genesis in describing Eden as the "garden of God," recalling Sumerian Dilmun, over against the character of Eden in Genesis as a garden created for human beings to till and keep (Gen. 2:15). The account in Ezekiel also differs in having only one inhabitant. Eden as the garden of God also occurs in Ezekiel 31, a complex allegory of a tree that in grandeur and beauty surpassed even the trees in Eden (31:8, 9, 16, 18). The garden of Eden is a metaphor for the renewal of the land of Israel by God after the Exile (Ezek. 36:35; Isa. 51:3, where "Eden" is paralleled by "garden of Yahweh"). In Joel 2:3, the transformation of the land from garden of Eden to devastated wilderness is part of an oracle forecasting the Day of Yahweh. J.S.K.

Eder (ee´duhr; Heb., "flock" or "herd"). **1** A clan leader in the tribe of Benjamin (1 Chron. 8:15). **2** A Levite family leader in the clan of Merari (1 Chron. 25:23). **3** A settlement in southern Judah near the border with Edom, probably in the vicinity of Beer-sheba (Josh. 15:21); the site is unknown. **4** A site called Migdol-eder (Heb., "the tower of Eder" or "the flock tower") near which Jacob camped following the burial of Rachel in Bethlehem (Ramah? Gen. 35:21), probably located somewhere between Jerusalem and Hebron.

Edom (ee´duhm), a name derived from the Semitic root meaning "red," "ruddy," and given to the area situated south of the Dead Sea on both sides of Wadi Arabah because of the reddish color of the sandstone of that district. In biblical passages the country of Edom stands in apposition to the land of Seir (Gen. 32:3; 36:8; Judg. 5:4).

Edom's northern boundary on the east is generally seen to be that of the southern boundary of Moab, that is, Wadi el-Hasa (biblical Zered). West of the Arabah, the northern boundary was the south border of Israel, which was a line running from the Dead Sea southward to the Ascent of Akrabbim to Zin and Kadesh-barnea (Num. 34:3–4; Josh. 15:1–3). Num. 20:16 places the latter site on the edge of Edom (Num. 20:23; Josh. 15:1, 21). Edom's eastern border, since it lay in the desert, would not have been clearly defined. Edom extended southward, at least in certain periods, to the shores of the Red Sea at Aqabah (1 Kings 9:26). There was probably no fixed western boundary.

The eastern region of Edom appears more frequently in biblical references. All the kings of Edom listed in Gen. 36:31–43 seem to reside east of the Arabah.

The term Edom appears for the first time during the reign of Pharaoh Merneptah (1236–1223 B.C.). Here permission is granted to the bedouin tribes of Edom to enter the better pasture land of the eastern Nile Delta. Assyria recognized Edom as a clearly identifiable and even important kingdom from the beginning of the eighth century B.C. onward.

Edom was a descendant of Esau (Gen. 36:1, 8), the brother of Jacob-Israel, and the elder of the twin sons of Isaac and Rebekah (Gen. 25:19–26). Esau-Seir is the ancestor of the Edomites in the same way that Jacob-Israel is the eponym of the Israelites. Edom was probably first identified with Esau in the period after David's conquest.

Archaeological surveys in the eastern segment of Edom have collected evidence of human occupation dating back at least five hundred thousand years. Population appears to have been highest during the Middle Paleolithic (ca. 90,000–45,000 B.C.), Iron II (ca. 900–539 B.C.), Nabatean (ca. 330 B.C.–A.D. 106), and Byzantine (ca. A.D. 324–640) periods.

An important route, the King's Highway (Num. 20:17), passed through the eastern segment of Edom in a north-south direction. Later on, the Roman road Via Nova Triana followed or paralleled this route. It joined Bosra in southern Syria to Aqabah. Other routes traversed the territory in an east-west direction. ***See also*** Aqabah, Gulf of; Arabah; Edomites; Esau; Idumaea; Isaac; Jacob; Kadesh; Rebekah; Seir.

Edomites (ee´duh-mīts), the inhabitants of the land of Edom (Seir). The Bible emphasizes the close relationship between the Edomites and the Israelites.

The Edomite "kings" of Gen. 36:31–39 were probably tribal chiefs, local rulers controlling separate and independent regions. The Edomites refused permission to the group led by Moses to pass through their territory (Num. 20:14–21). Saul fought successfully with the Edomites (1 Sam. 14:47). Doeg, an Edomite, appears among Saul's servants (1 Sam. 21:7; 22:9, 18, 22). David conquered the Edomites (2 Sam. 8:12–14). Solomon appears to have had access to the port of Ezion-geber in the land of Edom (1 Kings 9:26). Pharaoh Shishak's invasion (1 Kings 14:25; 2 Chron. 12:2–9) possibly gave the Edomites a chance to regain their independence. In the time of Jehoshaphat (ca. 874–850 B.C.), Judah expanded southward, ruled Edom (1 Kings 22:47), and used the port of Ezion-geber (1 Kings 22:48–49; 2 Chron. 20:35–37). The Edomites successfully revolted when Jehoram was king of Judah (ca. 850–843 B.C.), set up a king of their own (2 Kings 8:20–22), and maintained their independence for about fifty or sixty years until the middle of Amaziah's reign (ca. 800–785 B.C.; 2 Kings 14:7; 2 Chron. 25:11–12). Amaziah's son, Uzziah (Azariah) recaptured Edom and built Elath (2 Kings 14:22; 2 Chron. 26:1–2). At the time of Ahaz (ca. 742–725 B.C.), the Edomites defeated Judah (2 Chron. 28:17) and recovered Elath (2 Kings 16:6). From this time onward, Judah was not able to exercise control over them.

It is difficult to say whether or not the Edomites participated in the destruction of Jerusalem in 587 B.C. The Babylonian king Nebuchadnezzar seems to have destroyed the Edomites along with the Judeans (Jer. 27:2–3, 6; 49:7–22). Nabonidus (555–539 B.C.), the last Babylonian king, claims that he laid seige to the "town of Edom" in the third year of his reign. The town in question is probably Bozrah, modern Buseirah, the Edomite capital. The oracle of Mal. 1:2–4 indicates that by the time of its writing Edom was in ruin. By the fourth century B.C., the Nabateans replaced the Edomites, many of whom went westward to southern Judea, later to become Idumaea, while others were absorbed by the newcomers.

No major monumental Edomite inscription has been found. Explorations and excavations in Edom, however, have uncovered a number of seals, seal impressions (*bullae*), fragments of pottery with inscriptions in ink (ostraca), and one cuneiform tablet. The Edomites used a regional variant of the Northwest Semitic script and language.

The Edomites were known for their wisdom (Jer. 49:7; Obad. 1:8; Bar. 3:22). It is believed that they were devoted to the gods and goddesses of fertility. Qaus was their peculiar deity. Eloah (Hab. 3:3), another divine name, was perhaps also known to them.

The Edomite economy was based on a combination of animal herding, crop cultivation, and commerce. Copper was also mined in the Arabah from the Chalcolithic through the Mamluk period. ***See also*** Bozrah; David; Edom; Ezion-geber; Idumaea; Moab; Nabatea, Nabateans; Saul; Seir. B.M.

A teacher sits between two students who hold open scrolls; third-century tomb relief.

Edrei (ed′ree-*i*; Heb.). **1** An ancient Transjordanian site, a royal residence of Og, King of Bashan, whose land, following his defeat by the Israelites, was allocated to Manasseh (Num. 21:33; Deut. 1:4; 3:10; Josh. 12:4; 13:12, 31); in Roman times it was called Adraene and today is called Dar'a. **2** A town in Naphtali (Josh. 19:37).

education, the process of handing on acquired knowledge and wisdom.

In Ancient Israel: The Hebrew Bible does not provide a clear picture of education in ancient Israel. A few texts have generally been understood as references to formal education (e.g., Isa. 28:9–13; 50:4–9; Prov. 22:17–21), but the evidence is highly problematic. The first refers specifically to infants who have just been weaned, and the second merely indicates that eloquence was taught somewhere, presumably in the home. The third text pertains to a foreign setting, inasmuch as it reflects an indebtedness to the Egyptian Instruction of Amen-em-opet, an Egyptian sage. Other biblical references have seemed to support a thesis of an Israelite school; the main ones are the existence of a city named Qiriath Sepher (City of the Book; Josh. 15:15–16; Judg. 1:11–12), the mention of a youth who could write in Judg. 8:13–17, Isaiah's allusion to his disciples ("the taught ones," 8:16), references in Prov. 4:5 and 17:16 to buying wisdom, and the inscription about the men of Hezekiah who copied earlier proverbs. The earliest specific reference to an Israelite school occurs in Ecclus. 51:23, which invites students to Ben Sira's *beth hammidrash* (Heb., "house of study").

Extrabiblical Evidence: The paucity of evidence for schools in the Hebrew Bible has been supplemented from two different sources: ancient Near Eastern parallels to the OT materials and Palestinian inscriptions. Knowledge of education in ancient Egypt is quite extensive, thanks to instructional texts and scribal controversies that have survived. Similarly, several school texts from Sumer exist today, allowing scholars to paint a reasonably clear picture of education in Mesopotamia. The same is true for Ugarit, where scribes played a significant role in society. The temptation therefore is to draw upon this combined picture to clarify the situation in Israel. Such a procedure is risky, given the relative simplicity of the Hebrew language and of the Israelite society even during the monarchy. If a school existed in Solomon's time, one wonders why the list of governmental officials does not include the equivalent of a superintendent of education.

Recent evidence from Palestinian inscriptions has elicited differing interpretations. Some critics have used the following data to argue for schools in early Israel: lists, abecedaries (i.e., alphabet lists), transposition of similar letters, repeated words, large letters, poorly formed figures, and evidence of beginnings in a foreign language. None of these requires a school, inasmuch as parental instruction adequately explains all of the above features that might point to the activity of children. Many of the features may be explained otherwise; for example, large letters may indicate poor eyesight and an aged writer, just as less than perfect drawings may suggest a shaky hand or meagre ability as an artist. Perhaps the evidence would be stronger if it had been found in a single site, rather than scattered hither and yon throughout Palestine.

Types of Instruction: While differences of opinion exist about the pertinence of these Palestinian inscriptions and parallels from neighboring cultures to Israel's education, consensus seems to have formed with regard to the centrality of the family in early instruction. As a matter of fact, even the references to "my son" and to "father" in Proverbs, which are usually interpreted as technical language for student and teacher, may be taken literally. That is certainly true where the mother is mentioned alongside the father, although one critic has sought to explain that occurrence as the result of the demands of literary parallelism in the text of Proverbs.

It seems likely that many youngsters acquired training in guilds. We hear of prophetic and priestly guilds, and it is probable that other skills like pottery making, metallurgy, and the like were acquired in various guilds. A decisive shift in the direction of official bureaucracy may have taken place under King Hezekiah (725–697 B.C.), if it had not already occurred in Solomon's reign. In any event, young men now received instruction in the scribal art at the royal court. With the author of Ecclesiastes, it seems that a conscious effort was made to instruct "the people," if that expression really implies a democratization of learning. A different sort of teaching is reported in 2 Chron. 17:7–9, in this instance continuing the earlier religious instruction that assumed such importance in Deuteronomy, but with a decisive difference. In Chronicles official priests, Levites, and princes are said to have instructed the people in the Book of the Law. As is well known, the author of Chronicles was less faithful to historical events than his predecessors, and this report must be viewed cautiously.

It may be easier to describe Israelite education than to determine exactly where it took place, but even here much conjecture is necessary. It seems that education was restricted to boys, for the most part, if the canonical proverbs actually functioned as textbooks, as many scholars think. The constant reference in Prov. 1–8 to the adulteress as the villain was directed at male audiences, as was also true of specific instructions that without exception are aimed at men. Furthermore, teaching was often reinforced by punishment, an unhappy feature of education throughout Egypt and Mesopotamia as well. In Israel the actual subject matter

of instruction may have consisted of religious traditions and proverbial sayings, if Ben Sira's writing (i.e., Ecclus.) reflects the curriculum in his school. Under Hellenistic influence, the author of Wisdom of Solomon adopted a much different curriculum (7:17–22). It follows that education in ancient Israel was remarkably diverse, with respect both to the actual place of instruction and the curriculum.

In the NT: While no formal education is described in the NT, Jesus is pictured as educating ("teaching") large crowds (Mark 4:1–2; 14:49) as well as his disciples (lit. "learners"; cf. Matt. 5:1b–2). The risen Christ commands his disciples to continue such activity (Matt. 28:20). Paul reports he was educated in the law by the famous teacher Gamaliel (Acts 22:3), having left his home to go to Jerusalem for that purpose, thus giving evidence that the rabbinic schools much in evidence in the later traditions of the Mishnah were already highly developed. There is no evidence in the NT of formal education in the Christian faith; at that point it appears to have been a matter of family instruction (1 Tim. 1:5; cf. Deut. 11:19). J.L.C.

Eglon (eg'lon). **1** The fat king of Moab who, together with the Ammonites and Amalekites, invaded Israelite territory during the period of the judges and ruled over the people from "the city of palms" (Jericho) for eighteen years. According to Judges 3:12–30, Eglon's rule ended when Ehud, the left-handed judge, concealed a dagger under his cloak and assassinated Eglon when they were alone. **2** A Canaanite city allied with Jerusalem, Hebron, Jarmuth, and Lachish in an unsuccessful attempt to oppose Joshua's invasion of the land of Canaan (Josh. 10:3–5). Joshua captured the city (Josh. 10:34–35; cf. 12:12), which was later included among the cities of Judah (Josh. 15:39). Modern Tell Aitun is currently identified as the site of Eglon. ***See also*** Judges, The Book of. M.A.S.

Egypt (ee'jipt), one of the great civilizations of the ancient world, centered along the lower reaches of the Nile River in northeast Africa. Egyptian civilization was already ancient by the time of the biblical patriarchs, and its delta settlements reached to within two hundred miles of Israel's territory, yet Egypt's cultural influence on Palestine was considerably less than that of Mesopotamia. For their part, the Egyptians were not very interested in settlement abroad, partly because there were many possibilities for expansion at home. Nonetheless, Egypt did dominate Palestine politically during many periods. Egypt's influence was greater in the Phoenician coastal cities, with which it had important cultural and commercial ties.

The division into dynasties found in this article follows the Egyptian writer Manetho. Scholars do not quite agree on the absolute chronology or on how to organize the dynasties—some of which are contemporary rather than successive—into larger groupings.

Geographical Setting: Apart from the reach of the waters of the Nile, Egypt is almost entirely desert. The Nile has no tributaries in Egypt proper or for several hundred miles to the south, and the land receives little rainfall. Even the Nile Delta has at best 7–8 inches of rainfall annually, whereas the Nile Valley has virtually none. (The recently built Aswan High Dam has changed the rainfall patterns for southern Egypt.) So the designation of Egypt as "the gift of the Nile" is very apt. The Nile waters define the agricultural, populated realm. The settled area of Egypt therefore resembles a tall flower bending in the breeze. The Nile Delta (Lower Egypt), which spreads out north of Cairo for a hundred miles to the Mediterranean and is more than 150 miles wide, is the blossom, and the Nile Valley (Upper Egypt) is the long, slender stalk, between 6 and 9 miles wide and extending 575 miles from Cairo south to Aswan, with its thickest section being the northern portion. The one exception to this image is the Faiyum, an area well watered by a branch of the Nile, about 50 miles south of Cairo and reaching some 50 miles into the desert west of the Nile. The few oases in the Western Desert were not important in terms of population. Since about two-thirds of the serviceable land is in the delta, 20 of the traditional 42 nomes, or administrative districts, of ancient Egypt were also in the delta. Yet, in spite of its great importance, the delta, for various reasons, is not nearly so well known archaeologically as is the Nile Valley.

An Asiatic tribe in traditional costume asking permission to enter Egypt, as Abraham and Jacob may have done; copy of a mural from the tomb at Beni-Hassan, nineteenth century B.C.

Egypt had a strong sense of duality: there were "Two Lands," the delta and the valley, and together they constituted the "Black Land" in contrast to the neighboring desert, the "Red Land." Bordered by the Mediterranean on the north with desert on the remaining sides, Egypt was fairly secure from major movements of people. The overland route to Palestine led through the Sinai wilderness and along the Mediterranean coast before moving up into the hill country and cities such as Hebron and Jerusalem (ca. 215 miles from the easternmost settlements of the delta). Accordingly, only relatively small groups of people from Syro-Palestine went into Egypt, prompted by drought, commerce, and other concerns (cf. Gen. 12:10; 42–43; Matt. 2:14). Asiatics and Libyans came into the Nile Delta, both hostilely and peacefully, and Nubians into the Nile Valley. Drawing like a magnet from the modest adjacent populations, the Egyptians were a heterogeneous people from early times.

Predynastic and Early Dynastic Periods: Predynastic Egypt featured regional cultures and village society throughout a period of several hundred years. Constellations were forming in Upper and Lower Egypt, but with considerable conflict. In Dynasties I–II (ca. 2950–2675 B.C.), the "Two Lands" experienced the formation and consolidation of a unified government, centered at Memphis (Cairo area). Key elements were the development of court culture and royal bureaucracy. An enduring pattern of division into provinces (nomes) was established, provinces that embodied cultural particularities, such as in religious practice, that persevered over the centuries in spite of the subsequent political unification of Egypt.

Old Kingdom Period: Dynasties III–VI (ca. 2675–2180 B.C.) represented a period of immense cultural and political achievement. Building on the accomplishments of the Early Dynastic period, a remarkable level of culture and organization was reached. Dynasty III (ca. 2675–2600) was still a period of some innovation, leading up to the climactic development of Dynasty IV (ca. 2600–2480), whose impressive scale was symbolized by the great pyramids. By this time a distinctive pattern of culture—artistic, political, and religious—had developed that served effectively, with variations and adaptations, for well over two millennia. The central institution was that of the kingship, religiously central in the state cult as the link between the people and the divine powers of the cosmos, and politically central as the embodiment of the unity of the realm. The pharaoh, at the same time both mortal and divine, wielded immense power filtered through an effective bureaucracy. In Dynasties V and VI (ca. 2480–2180) the localized authorities became more prominent. The royal center remained in the Memphis area where the "Two Lands" joined. During the Old Kingdom, Egypt engaged in extensive commercial interchange with Phoenicia, especially Byblos, and also sent many expeditions to Sinai to obtain materials such as turquoise and copper.

First Intermediate and Middle Kingdom Periods: When the system of the Old Kingdom broke down, it was followed by about a hundred and fifty years of civil war and assertiveness by local provinces (Dynasties VII–XI, ca. 2180–1939 B.C.). During Dynasty XI Egypt became unified again (ca. 1970–1939), and during Dynasty XII (ca. 1939–1756) the central organization was furthered, though the king was less powerful than in the Old Kingdom. Southern Egypt, with its center in Thebes, became more prominent, though the kings still ruled from the Memphis area. During the Middle Kingdom Egypt asserted itself in southern Syro-Palestine in more than a commercial relationship. The term "empire" is probably inappropriate, but there was some kind of hegemony. The "Execration" texts list local rulers and peoples of the area, many specifically from Palestine, Transjordan, and Phoenicia, who owed some kind of allegiance to Egypt. The names of many Palestinian locations first appear in these texts. Some of the earlier ancestral traditions of Israel concerning Egypt may relate to this period. Clearly, many Asiatics were now residing in Egypt, especially in the eastern delta.

Second Intermediate (Hyksos) Period: The forces for decentralization again triumphed (Dynasties XIII–XVII, a group of overlapping dynasties, ca. 1756–1520 B.C.), and there were various separatist movements. For the first time pharaonic Egypt experienced a major influx of foreigners, as Asiatic groups, termed Hyksos ("rulers of foreign lands") in Egyptian sources, with superior military technology and organization in spite of their varied backgrounds, gained control in the delta and, apparently, the northern portion of the Nile Valley (Dynasty XV, ca. 1630–1522). Also, Nubia had broken away, so traditional Egyptian rulers were restricted to the Nile Valley and at that were at times under Hyksos domination. This was a period of considerable interchange between Egyptian and Syro-Palestinian cultures, though it is not well documented. Many scholars regard this period as the setting for the Joseph story, although there is no specific confirmation from Egyptian sources. The pharaonic traditions endured most effectively in the south, under the domination of Thebes. Eventually the Theban rulers prevailed against the Nubian-Hyksos tandem and their Egyptian allies.

New Kingdom Period: Theban success against the outsiders ushered in the New Kingdom (Dynasties XVIII–XX, ca. 1539–1075 B.C.). Ahmose I (ca. 1539–1514) captured the Hyksos center of Avaris, drove the Hyksos back into Syro-Palestine, subdued Nubia, and unified again the "Two Lands." Indeed, from the time of Thutmose I and II (ca. 1493–1479) to Ramesses II (ca. 1279–1213) Egypt was politi-

cally powerful also in much of Syro-Palestine as well as Nubia and, at least by the time of Thutmose III (ca. 1479–1426), it is possible to refer to an Egyptian Empire. Egyptian rulers also maintained diplomatic contact with the major powers of western Asia, including Cyprus and Anatolia. In Egypt, an effective administration endured during the whole of the New Kingdom, surviving crises such as the Amarna "revolution" and the changes in dynasties. Noteworthy was the power conflict between the royal court and the major priesthoods, especially that of Amun-Re at Thebes. This conflict reached a climax during Amenhotep IV/Akhenaton's reign (ca. 1353–1336), when the king's sacral centrality was reasserted in the Amarna "revolution" in theology and art. Noteworthy also was the level of cultural interchange with Syro-Palestine. Many Semitic gods had a following in Egypt, and the Asiatic population in Egypt continued to be a significant presence, especially in Lower Egypt. It is most likely that the setting of the Exodus tradition is the time of the long-lived and powerful Ramesses II. The Egyptian sources attest to the presence of Asiatic workers, but they make no reference to the flight of a group of Hebrew (or Apiru) slaves or their miraculous escape through the "Sea of Reeds." In the "Victory Stela" of Merneptah (ca. 1213–1204), the immediate successor of Ramesses II, there occurs the first extrabiblical reference to Israel (with sequential reference to victories over the city-states of Ashkelon, Gezer, Yanoam, and the people Israel). Nevertheless Egypt's power was waning. Though Ramesses III (ca. 1187–1156) could still repel the Sea Peoples and the Libyans, the effort was the last sign of real strength as Egypt subsequently entered a period of depression and disorder.

Third Intermediate Period: By this period (Dynasties XXI–XXV, ca. 1075–656 B.C.) Egypt's political greatness and cultural ingenuity were in the past. In this period Egypt was weakened by regionalism and factionalism. According to 1 Kings 9:16, one of the pharaohs of this period even gave a daughter in marriage to a foreign king, namely Solomon, something formerly unheard of. At times descendants of former Libyan mercenaries and prisoners were in power. One Libyan ruler, Shishak (Shoshenq I, ca. 945–924), gave refuge to the future king of Israel, Jeroboam I, and even campaigned successfully against Israel and Judah, including Jerusalem. Nubian princes succeeded in extending control into Upper Egypt. During Dynasty XXV (ca. 770–656) Nubian pharaohs came to control a united Nubia and Egypt, partly by allowing Thebes practical independence. But the Nubian kings were not able to restrain Assyria, with whom they had many encounters, and again, in the early seventh century, Asiatic forces found their way into Egypt. The Assyrians sacked Memphis (ca. 671) and even Thebes (ca. 664), but managed only temporary control.

Late Period: This period covers Dynasties XXVI–XXXI (ca. 664–332 B.C.). The Saite Dynasty XXVI (ca. 664–525), based in the western delta and aided by Greek and Carian mercenaries, led Egypt in its last period of independence and unity. Neco II even campaigned in north Syria—Josiah of Judah died in opposing him—and dominated Judah from 609 to 605. The Saite period formally imitated the artistic style of the Old Kingdom, but did not capture its grandeur. The Saites did enlarge Egypt's commercial contacts and had sizable resident foreign colonies, including many Greeks. They managed to stop the Babylonian army short of Egypt proper, but subsequently Persian strength proved too great. The invasion of Cambyses (525) brought Egypt into the Persian domain. Although Egypt regained some independence from Persia between 404 and 342, it was precariously involved with Greek mercenaries. The Persians enjoyed a brief but troubled period of renewed control (342–332) prior to their collapse in the face of Alexander's forces.

Hellenistic-Roman Period (332 B.C.–A.D. 324): Alexander stayed only about six months in Egypt, spending a good part of that time on an arduous visit to the oracle of Zeus-Ammon (i.e., Amon?) in the Siwah Oasis, some three hundred airline miles from Memphis into the Eastern Desert, where he apparently was declared a god. He also arranged the foundation of Alexandria, the most important of the many cities named after him and a major city of the Mediterranean world—much more Hellenistic than Egyptian. (Alexandria had a prominent Jewish population within a few decades.) Alexander, now regarded as pharaoh, assigned most of the administrative control to Egyptian authorities and left political matters in Hellenistic hands. Following Alexander's death (323), Ptolemy Soter, one of his generals, gained control of Egypt and soon founded the Ptolemaic dynasty (305–30), of which the famous Cleopatra was the concluding representative. The Ptolemies hellenized the Egyptian administration and exploited the country while also identifying with the pharaonic traditions and sponsoring major building projects, in the traditional manner, throughout Egypt. For much of the period the Ptolemies contended with other heirs of Alexander, the Seleucid rulers of Syria, for control of Palestine, with Ptolemaic dominance ending in 198. In Egypt, the Ptolemies experienced considerable internal strife and became increasingly subordinate to Rome. Rome assumed direct rule from 30 B.C. to A.D. 324, but continued the Ptolemaic administrative system. Many originally Egyptian cults, such as that of the goddess Isis, gained a wide following in the Hellenistic-Roman world. The Christian community in Egypt, which began quite early, developed into the Coptic church.

Captive Asiatics, with arms upraised in a gesture of submissive greeting to Pharaoh Sahure, being taken by ship to Egypt; stone relief ca. 2446 B.C.

Egypt and the Bible: Egypt's influence on the people and culture of Palestine involved serving as a refuge area or place of exile, exercising political domination, and exerting cultural influence either directly or by way of the Phoenician coastal cities. As the great granary of the eastern Mediterranean, Egypt attracted many people to its abundant agricultural resources and its considerable wealth and grandeur. Individuals and families from the patriarchal period on are described as going to Egypt for survival. Similarly, following the fall of Jerusalem to the Babylonians, a group from Judah sought refuge in Egypt. Yet Egypt could also be a place of exile. Israel's model for its self-understanding was the liberating Exodus under Moses from state slavery in the Egyptian delta. Egypt was therefore identified both as the departure point for Israel's liberation from oppression and as the arrival point for threatened divine punishment.

In the few centuries prior to the Exodus, Egypt had been a dominant power in Palestine, ruling basically through local princes and strategically located garrisons. During the Israelite monarchy and the subsequent periods of foreign control, Egypt was generally restricted to brief raids and involvements in various alliances against the great Asiatic powers. Significant control by Egypt occurred again only in the time of the Ptolemies. In connection with the military campaigns, many people from Palestine were taken as captives to Egypt, basically to work for the king and the gods. During the fifth century B.C. there was a Jewish military colony—and a Jewish temple—at the southern border of Egypt (Elephantine), and in Ptolemaic times there were many Jewish settlers. From ca. 163 B.C. until A.D. 71 there was even a Jewish temple at Leontopolis in the eastern delta.

Egypt's cultural influence in Palestine was modest, considering the proximity. Egypt sought raw materials, especially wood and metals, from Syro-Palestine and was not bent on cultural dominance. There are a number of Egyptian loanwords in the Hebrew Bible (Egyptian and Hebrew are distantly related languages), and indeed Moses and many of the priestly class bore Egyptian names, a pattern that endured for several centuries. According to late tradition Moses was "instructed in all the wisdom of the Egyptians" (Acts 7:22). Moreover, Akhenaton's "monotheism" antedated the time of Moses by almost a century and some influence is quite possible. Yet specific influence is difficult to demonstrate, and the contrasts in most areas are considerable; the closest parallel may be that Akhenaton and Moses are similarly entrancing but elusive figures. In spite of some intriguing parallels in details and a plausible initial impetus toward monotheism, Egyptian religion seems to have had little formative influence on that of Israel. The most specific example of literary borrowing is in Prov. 22:17–24:22, which apparently utilized the Egyptian "Instruction of Amenemope." Other literary influence is found in novellas, such as the Joseph story, and in love poetry. The political organization under David and Solomon may well have drawn upon Egyptian models, but, if so, presumably through Phoenician intermediaries. For the prophets, Egypt served as an example of idolatry and arrogant power, Israel's redemption from which in the Exodus proved to be a lasting, central motif of Israel's faith. ***See also*** Akhenaton; Amarna, Tell el-; Exodus; Hyksos; Neco II; Nile; Pharaoh; Sea Peoples.

Egypt, Brook of (KJV: "Egypt, River of"), the Wadi el-Arish, a valley in the Sinai Peninsula of Egypt with a seasonal stream that flows into the Mediterranean (Num. 34:5; Josh. 15:4; 1 Kings 8:65; 2 Kings 24:7; 2 Chron. 7:8; Isa. 27:12). It marked the traditional southwestern border of the land of Canaan (and of the claims of Judah or, in Ezek. 48:28, Gad), the northern border being either the Entrance of Hamath or the Euphrates. The River of Egypt in Gen. 15:18 was apparently the same, as was probably Shihor (1 Chron. 13:5) and the Brook of the Arabah (Amos 6:14). ***See also*** Arabah; Shihor. H.B.H.

Ehud (ee'huhd), a left-handed Benjaminite who through a clever ruse killed Eglon, the fat

Moabite king, and subsequently led the Israelites to victory over the Moabites (Judg. 3:12–4:1). ***See also*** Eglon.

Ekron (ek´ruhn; Heb., "barren place"? or "fertile place"?; Gk. *Akkarōn*), the northernmost city of the Philistine Pentapolis. Now identified as Khirbet el Muqanna' (Tel Miqne), it lies about twenty-two miles west of Jerusalem. It was assigned to the territory of Judah (Josh. 15:11) or to Dan (Josh. 19:43) but was reported to be in Philistine hands when the Ark was taken there (1 Sam. 5:10). The town received defeated forces of the Philistines (1 Sam. 17:52) as David's gains brought compression of Philistine territory.

In prophetic traditions Elijah was called to challenge the authority of Ekron's god, Baal-zebub (Heb., "lord of the flies"?) to indicate Israelite King Amaziah's fate (2 Kings 1:2–16). Amos (1:8), Jeremiah (25:20), Zephaniah (2:4), and Zechariah (9:5, 7) denounced Ekron as a symbol of evil power to be destroyed.

Captured by Assyria's Sennacherib (ca. 705–681 B.C.), as it had earlier been taken by Egypt's Shishak (last quarter of tenth century B.C.), it was later given by Alexander Balas to Jonathan Maccabeus (ca. 160–142 B.C.; 1 Macc. 10:89) and had its Greek name at least into the fourth century A.D.

Excavations on the site led by T. Dothan and S. Gitin have included two pilot seasons (1981, 1982) and five major seasons (1984–1988) in Phase I. Results show occupation of the site from Chalcolithic through Middle Bronze ages. Major development began in the Late Bronze Age with Philistine arrival and expansion (Stratum VII, first third of twelfth century B.C.) to the full fifty-acre site. Israelite ascendancy is reflected in shrinkage to ten-acre occupation in the tenth century B.C., but new growth again occurred under Assyrian occupation (eighth century), at which time industrial development as an olive oil processing center reached its peak. Destruction followed under Babylonian assault (603 B.C. campaign of Nebuchadnezzar). Subsequent survival was minimal on evidence to date.

R.S.B.

El (el), a word for "God" in the ancient Semitic languages. The word could be used as either a proper noun or a common noun. As a proper noun, El refers to a god in the pantheons of the Canaanite world. In the Bible the word occurs often in personal names (e.g., *El*iab, *El*ijah). *Elohim* (Heb.) and not El is the most common biblical word for God, but El occurs frequently in the Bible referring to God, particularly in the book of Job and other works of poetry.

El, the chief god of the Canaanite pantheon, raises his hand in benediction to a king or high priest before him; relief from Ugarit, thirteenth century B.C.

In Ugaritic Literature: The Ugaritic literature produced in the north Canaanite city-state of Ugarit (second millennium B.C.) reveals much of what we know about the Canaanite god El. El is the king, regarded as ruler among the gods. In the assembly of the gods, El holds the highest position. Permission to build a palace for Baal must come from El, and it is El who surrenders Baal to Baal's enemy Yamm. To judge from his epithets, El is a creator. At Ugarit he was called the "Builder of Things Built," and elsewhere he held the title "Creator of the Earth." El has other epithets in the Ugaritic literature. He is called the "Father of Years," a title that recalls his epithet "Eternal" on a Sinaitic inscription. El is an aged god. Ugaritic texts refer to his gray beard and speak of his wisdom. El is called "Compassionate," "The Bull," "Beneficent," and the "Father of Humankind." El lives at the source of two rivers amid the fountains of the (world-encompassing) Deep (cf. Gen. 1:1). This is a localization that lies beyond the boundaries of terrestrial space.

Although in title chief among the gods, El does not always play a forceful role in the Ugaritic myths and legends. His daughter Anat coerces him with threats of violence. His surrender of Baal has the character of submission to Yamm. In one short text, El is portrayed drinking himself into a stupor and wallowing in his own excrement and urine. Such behavior has led to questions concerning El's status in the Ugaritic pantheon. Some have suggested that El at Ugarit was in his twilight, and others believe that Baal was in the process of supplanting El in Ugaritic religion. Yet there are times in the Ugaritic literature when El acts effectively, and this puts the issue in doubt. It is El who brings about the healing of Kirta (Keret) when all other gods fail, and it is the threat of El's intervention that silences a fractious Athtar. It should be noted that while the Ugaritic literature presents a variegated picture of El, other sources are more consistently flattering of the god. Philo of Byblos (ca. A.D. 64–141), a Greek historian who collected Phoenician lore, identified El with Kronos, told of El's marriage to Astarte, Rhea, and Dione, and reported that Zeus (Baal) ruled the earth with the permission of El. Here there is no hint of a declining El or of conflict between El and Baal.

At Ugarit, El's consort was Asherah, a goddess whom the Bible links with Baal. A Canaanite myth "El, Ashertu, and the Storm God" (surviving in a Hittite version) tells of how Asherah was faithless to her consort El and sought the affection of the storm god (Baal).

In Ancient Israel: The cult of El was widely diffused in the Syro-Palestinian world and spread from there to the Phoenician colonies of the central and western Mediterranean basin. El was worshiped in the Holy Land at an early date. The Bible reveals many local manifestations of El. At Beer-lahairoi Hagar encounters El Roi (Heb., "God of Seeing," Gen. 16:7–14). At Beer-sheba Abraham worships El Olam (Heb., "Eternal God," Gen. 21:33). The name El Elyon (Heb., "God Most High") was associated with Jerusalem (Gen. 14:18–20). Jacob has a revelation of El Bethel (Heb., "God of Bethel") at Bethel (Gen. 35:7). El Berith (Heb., "God of the Covenant") is linked to Shechem (Judg. 9:46), but the same god appears to be called Baal-berith elsewhere (Judg. 9:4). Many if not all of these local manifestations of El go back to pre-Israelite times (pre-thirteenth century B.C.). The worship of El at local Palestinian sanctuaries provided a setting for the transmission of aspects of the cult of El to the religion of Israel. During its settlement in Canaan, Israel adopted for itself the veneration of El.

Israelite tradition recognized the primacy of El worship. When the Priestly writer introduces the divine name Yahweh into his narrative (Exod. 6:2–8), he shows that Yahweh was known at first as El Shaddai. The Priestly writer often uses the name El Shaddai for Israel's God. The Bible speaks of "El, the God of Israel" (Gen. 33:20), and when it is recognized that the name Israel is a compound including the divine name El, the importance of El in the early religion of Israel becomes clear.

Some elements from the Canaanite cult of El made their way into the worship of Israel's God Yahweh. Yahweh took over the leading role in the council of the gods (Ps. 89:6–7). He may have taken the title "King" from El. Notions of the compassion and mercy of Yahweh may stem from the image of "Benevolent El." Yahweh as creator and father is reminiscent of El.

In one instance at least, the image of Canaanite El has made its way directly into the Bible. The figure of the Ancient of Days in the book of Daniel is inspired by the aged El (Dan. 7:9–14).

The accommodation of El worship by Yahwism was a remarkable occurrence, for Israel was as a rule hostile to the cults of Canaanite gods and goddesses. Israel identified Yahweh as El. The supremacy of El in the native religions of Palestine made this identification attractive. It has even been proposed that Yahweh was no more than a special name of El. Whatever the cause of the identification, it provides a striking contrast to the general conflict between Israelite religion and that of its neighbors. ***See also*** Baal; God; Ras-Shamra. R.M.G.

Elah (ee'luh). **1** The valley in Judah where David is reported to have killed Goliath (1 Sam. 17:2, 19; 21:9); it was protected by the cities of Libnah and Azekah (modern Wadi es-Sant). **2** The son and successor of Baasha, king of Israel. He ruled for less than two years (ca. 886 B.C.). While he was intoxicated, he was murdered by Zimri in Tirzah (1 Kings 16:6–14). **3** The father of Hoshea, the last king of Israel (ca. 732–723 B.C.; 2 Kings 15:30; 17:1; 18:1, 9).

Elam (ee'luhm), the region east of the Tigris River, which provided Mesopotamia with a rich source of raw materials; hence the continuing Mesopotamian interest in Elam. Three rivers water the region, making it especially fertile. The unification of Anshan, the mountainous eastern region, with the southeastern plain of Shushan meant independence for Elam. The diverse areas of Elam were always organized into a federal state. Elamite pictographs first appear around 2900 B.C., whereas writing begins in Mesopotamia around 3100 B.C. A linear Elamite script, known from only eighteen inscriptions, dates from the twenty-third century B.C. Carved seals from the third millennium B.C. depict various activities of the Elamite economy: hunting, fishing, herding, and agriculture. A female deity, Pinikir, headed the Elamite pantheon until the middle of the second millennium B.C., when the male Humban replaced her.

Contact between Mesopotamia and Elam appears as early as 2550 B.C., when Enmebaragesi

A tablet from Susa, ca. 2900 B.C., showing early Elamite "writing."

of Kish records carrying off "as booty the weapons of the land of Elam." Elam remained under Mesopotamian control until Ibbi-Sin, the last ruler of the Ur III dynasty, was carried off to exile in Elam, where he died. The early Sumerian view of the Elamites as undesirables prevailed throughout the second millennium B.C. Conflict between these two regions continued until the thirteenth century B.C., the floruit of Elamite civilization, when Elam freed itself of Babylon's control.

In the Bible: In the Bible, Elam is best known from Genesis 14, which details the coalition of several kings, including the Elamite Chedorlaomer, against the kings of the Dead Sea region. The coalition captured Lot, who was rescued by his uncle, Abram. The Hebrew name (*Chedorlaomer*) may reflect an actual Elamite name; *Kuter-Lagamar* would mean "the goddess Lagamar is protection." The name, however, is not yet attested in native inscriptions. In the Table of Nations, Elam is listed as a descendant of Shem (Gen. 10:22).

Shushan (Susa), the capital of Elam, is called "the castle" in Neh. 1:1, Dan. 8:2, and Esther 1:2. During the reign of Darius, Susa became the winter palace of the Persian Empire.

In the eighth and seventh centuries B.C., Elam alternatively showed its last independence and joined Chaldean and Aramean coalitions against Assyria. The Assyrians prevailed, and in 646 B.C. Ashurbanipal sacked Susa. Ezek. 32:24 describes the destruction of Elam. Isaiah (11:11; 21:2; 22:6) records Elamite help in Assyrian attacks on Judah. In all of these instances, Elam is depicted as a fierce nation, whose warriors are adept at the use of the bow and arrow as well as chariotry. During the reign of Zedekiah, Jeremiah (49:35–39) prophesied God's promise of a total victory over Elam and a return from the captivity.

Jews from Elam are counted among the returnees from the Babylonian captivity in Ezra 2:7, 31 and 8:7. The chiefs of the Jewish tribes in Elam were among those who set their seals to the reform covenant upon their return (Neh. 10:14). Neh. 12:42 records the participation of a priest named Elam in the rededication of the walls of Jerusalem.

The one mention of Elamites in the NT (Acts 2:9) records their presence in Jerusalem at the feast of Pentecost. ***See also*** Chedorlaomer.

L.E.P.

Elath (ee´lath). ***See*** Ezion-geber.

El Bethel (el-beth´uhl), probably a deity. Among the many El epithets in the OT, El Bethel occurs twice (Gen. 31:13; 35:7). These Hebrew phrases may be understood as either "the El [i.e., god] Bethel" or "the El [i.e., god] of Bethel." Jer. 48:13 and Amos 5:4–6 seem to indicate the existence of a god named Bethel, but other ancient sources refer to the god of Bethel. ***See also*** Bethel; El; God; Names.

Eldad (el´dad; Heb., "El [god] has loved"?), an Israelite elder. With his companion Medad, Eldad was chosen with sixty-eight others to receive God's spirit around the Tent of Meeting. The two tarried in the camp and prophesied there. When Joshua learned of their unauthorized activity, he urged Moses to restrain them, but Moses rebuffed the complaint, saying: "Would that all the Lord's people were prophets!" (Num. 11:16, 26–30). ***See also*** Prophet; Tabernacle.

elders, senior tribesmen of Israel. The elders performed tasks of local government and justice throughout the biblical period. Aspects of their function and historical importance can be seen in Exod. 18:13–17; 24:1–11; Num. 11:16–30; Judg. 21:16–24; and 1 Sam. 8:1–9. In the NT, elders were either important Jewish leaders (e.g., Matt. 15:2; Mark 14:43; Luke 7:3; Acts 4:8) or leaders in the nascent Christian communities (Acts 15:2; 21:18; Titus 1:5; James 5:14; 1 Pet. 5:1) although the word can also mean simply an elderly person (1 Tim. 5:1; perhaps 1 Pet. 5:5).

Elealeh (el´ee-ay´luh), a Moabite city east of the Jordan River that, along with Heshbon and surrounding cities, was given to the tribe of Reuben after they and the tribe of Gad requested that Moses allow them to settle there (Num. 32:1–5). The city was rebuilt by the Reubenites (Num. 32:33–38), although by the time of Isaiah

and Jeremiah it was back in Moabite hands (ca. 700–625 B.C.; Isa. 15:4; Jer. 48:34). The city is identified as modern el-Al, a ruin about two miles northeast of Tell Heshban and about fifteen miles east and slightly north of the north end of the Dead Sea. D.R.B.

Eleasah (el′ee-ay′suh; Heb., "El [God] has made" or "El has acted"). **1** A descendant of Judah (1 Chron. 2:39–40). **2** A Benjaminite descendant of Saul's son Jonathan (1 Chron. 8:37).

Eleazar (el′ee-ay′zuhr; Heb., "God has helped"), the name of seven different persons in the OT, the foremost being the third son of Aaron. He, with his brothers, became a priest (Exod. 29; Lev. 8) and later became high priest when Aaron died (Num. 20:25–28). He served as high priest during the remaining years of Moses' leadership and through Joshua's tenure as leader. An Eleazar is also mentioned in the list of Joseph's ancestors in Matt. 1:15.

election, a technical theological term in the Bible having nothing to do with the democratic political process. The subject of election is God, who chooses on the basis of his sovereign will for his creation. Associated with election are theological terms such as "predestination," "providence," and "covenant."

In the OT, God elects a people (Israel), its king (David), and the city of Jerusalem. His free choice is not based on the previous accomplishment or on the natural superiority of those he chooses; yet, the chosen are under obligation to live by God's will and to be his servants (e.g., Deut. 7:6–11; 1 Chron. 16:9–13; Jer. 33:19–26; Amos 3:2).

In the NT, election is focused on Jesus Christ as the elect one (often with a reference to the OT) through whom God ultimately accomplishes his purpose (e.g., Matt. 12:18; Luke 9:35; 23:35; 1 Pet. 2:4, 6). Through faith and discipleship, his followers are called "elect" (e.g., Mark 13:20–27; Matt. 22:14; Titus 1:1; 1 Pet. 1:2; 2:9–10). Although this elect group is made up of people from all nations, Paul also expects that God's election of Israel will be fulfilled in the end (Rom. 11:2, 28). ***See also*** Covenant; Grace; Predestination; Providence.

Eleven, the, the disciples or apostles of Jesus (originally twelve) during a brief period after the death of Judas Iscariot and before the choice of Matthias (Acts 1:23–26). The Eleven are mentioned in Matt. 28:16; Mark 16:14 (in some manuscripts); Luke 24:9, 33; Acts 1:26; 2:14 (in some manuscripts); 1 Cor. 15:5 (in some manuscripts). ***See also*** Apostle; Disciple; Judas; Matthias; Twelve, The.

Elhanan (el-hay′nuhn; Heb., "God is gracious"). **1** The son of Dodo from Bethlehem; one of David's thirty mighty men (2 Sam. 23:24). **2** The son of Jair (or Jaareoregim) of Bethlehem, who killed Goliath (2 Sam. 21:19) or Goliath's brother Lahmi (1 Chron. 20:5). The apparent confusion as to his victim may be the result of an attempt to harmonize the contradiction that resulted when David was credited with Elhanan's accomplishment (1 Sam. 17). Some scholars, however, consider Elhanan to be David's personal name.

Eli (ee′l*i*; Heb., "[God] is exalted"), judge of Israel (1 Sam. 4:18) and priest in Shiloh where the Ark was located during the period of the Judges. On observing Hannah praying silently for children, he first thought she was drunk, but then assured her that her prayer would be fulfilled. Samuel, the offspring of this promise, was later brought to Shiloh where he was devoted to divine service and subsequently succeeded Eli, whose sons Hophni and Phinehas were both wicked. When Eli learned of their deaths at the battle of Aphek and the loss of the Ark, he fell, broke his neck, and died (1 Sam. 4).

F.E.G.

Eli, Eli, lema sabachthani (ee′l*i*, ee′l*i*, lihmah′ suh-bahk′thuh-nee; NRSV), also *Eloi, Eloi, lema sabachthani*, variant versions (Matt. 27:46 and Mark 15:34) of the so-called cry of dereliction attributed to Jesus on the cross. The words are transliterations of Aramaic renderings of the first verse of Psalm 22, "My God, my God, why have you forsaken me?" *Eli* (Matt.), meaning "my God," has often been misunderstood as the transliteration of a Hebrew word, but this form has appeared in the Aramaic of the Dead Sea Scrolls. *Eloi* (Mark) transliterates the more common Aramaic form for "my God." Both versions of the cry have many variant forms in NT manuscripts, with the most common being the Hebrew *lama* rather than the Aramaic *lema*.

Psalm 22 is quoted and alluded to several times in the passion accounts of Mark and Matthew (e.g., Matt. 27:35, 43) and seems to have been used to interpret the meaning and manner of Jesus' death. The desolation or despair of Jesus' cry has long intrigued and shocked commentators, especially those concerned with the relationship of Jesus' divinity to his humanity. Reformation theologians associated this verse with Jesus' being forsaken by the Father as an atonement for sin; in reaction, other theologians suggested that Jesus recited the entire Psalm, which ends on a note of hopeful confidence in God. Some contemporary interpretations link these words with an existential analysis of human experience. In

context, the citation of Ps. 22:1 (Heb. 22:2) communicates Jesus' sense of human separation from God in the face of sin and death. In the light of the resurrection, it functioned literarily as part of a sharp contrast between Jesus' apparent powerlessness and his ultimate victory. Theologically, the Psalm verse argues that Jesus' suffering and death were planned with a purpose by God. ***See also*** Atonement; Cross; Jesus Christ; Passion. A.J.S.

Eliab (i-l*i*'uhb; Heb., "God is father"). **1** Reubenite father of Dathan and Abiram who rebelled against Moses (Num. 16:1). **2** Son of Helon, leader of Zebulun in the generation prior to the conquest of Canaan (Num. 10:16). **3** A Levite in the line of Kohath (1 Chron. 6:27). **4** David's oldest brother (1 Sam. 17:28) whose stature and appearance impressed Samuel when he sought a king from among Jesse's sons (1 Sam. 6:6–7). **5** A Gaddite who served David in the desert (1 Chron. 12:9). **6** A levitical musician in the time of David (1 Chron. 15:18, 20; 16:5).

Eliada (i-l*i*'uh-duh; Heb., "El [God] knows"). **1** One of David's sons born in Jerusalem (2 Sam. 5:16), also called Beeliada (Heb., "Baal knows," 1 Chron. 14:7). Although Baal was originally another name for the deity, names that contained "Baal" were sometimes changed to avoid any association with the Canaanite fertility god of that name. **2** The father of Rezon, the ruler of Syria and enemy of David (1 Kings 11:23). **3** A Benjaminite commander of two hundred thousand bowmen under King Jehoshaphat (2 Chron. 17:17).

Eliakim (i-l*i*'uh-kim; Heb., "God raises up"). **1** The son of Hilkiah and royal steward under King Hezekiah. He had replaced Shebna in that office in accordance with the prophecy of Isaiah, but he later fell into disfavor with the prophet or with his disciples (Isa. 22:20–25). Together with Shebna, now royal secretary, and Joah, royal herald, Eliakim played an important role in the negotiations with the Assyrian Rabshakeh during Sennacherib's siege of Jerusalem (2 Kings 18:18–19:7). **2** The king of Judah from 609 to 598 B.C. When Pharaoh Neco killed Eliakim's father, King Josiah, the Judean gentry chose a younger son, Jehoahaz, as the new king, but three months later the Egyptian replaced Jehoahaz with Eliakim, whom he renamed Jehoiakim (2 Kings 23:34; 2 Chron. 36:44). **3** A priest who took part in the dedication of the wall of Jerusalem rebuilt by Nehemiah (Neh. 12:41). **4** The son of Abiud, listed in the postexilic genealogy of Jesus (Matt. 1:13). **5** The son of Melea, in Luke's genealogy of Jesus (Luke 3:30). ***See also*** Jehoiakim; Shebna. J.J.M.R.

Eliam (i-l*i*'uhm; Heb., "God is kin" or "uncle"). **1** One of David's mighty men, the son of the Gilonite Ahithophel (2 Sam. 23:34). **2** The father of Bathsheba (2 Sam. 11:3), called Ammiel in 1 Chron. 3:5 (both names include the same components, but in reversed order).

Elias (i-l*i*'uhs). ***See*** Elijah.

Eliasaph (i-l*i*'uh-saf; Heb., "El [God] has added"). **1** The head of the tribe of Gad during the wilderness wandering (Num. 1:14; 2:14). **2** A Levite, the head of the Gershonite clan who were in charge of carrying the fabrics of the tabernacle (Num. 3:24).

Eliashib (i-l*i*'uh-shib; Heb., "God restores"). **1** The head of a priestly division in the time of David (1 Chron. 24:12). **2** The son of Eshyahu and a high-ranking official at the late sixth-century B.C. fortress at Arad, where documents written to him have been found. **3** The name of three postexilic Israelites, including one levitical singer, who divorced their foreign wives in response to Ezra's proclamation (Ezra 10:24, 27, 36). **4** The father of Jehohanan in whose chamber Ezra spent a night (Ezra 10:6). **5** The Jerusalemite high priest in the time of Nehemiah who assisted in rebuilding a northwest section of the city wall (Neh. 3:1) and whose grandson married the daughter of Sanballat (Neh. 13:28; this may be the same as 3 and 4). **6** A priest responsible for the Temple chambers, who permitted an Ammonite to dwell there until he was expelled by Nehemiah (Neh. 13:4–8). **7** A late postexilic descendant of David through the line of Zerubbabel (1 Chron. 3:24). F.E.G.

Eliel (i-l*i*'uhl; Heb., "God is my god"). **1** A Korahite ancestor of Samuel (1 Chron. 6:34, called Elihu in 1 Sam. 1:1 and perhaps Eliab in 1 Chron. 6:27). **2** A Levite from the family of Hebron whom David assigned to assist in bringing the Ark to Jerusalem (1 Chron. 15:4–15). **3** A Gaddite who joined David in the desert (1 Chron. 12:11, Hebrew v. 12). **4** The name of two of David's mighty men, one of them a Mahavite (1 Chron. 11:46–47). **5** A Temple official who assisted in the supervision of offerings during the reign of Hezekiah (2 Chron. 31:13). **6** The name of two Benjaminites, one the son of Shimei (1 Chron. 8:20), the other of Shashak (1 Chron. 8:22). **7** The head of a Transjordanian Manassite household deported by the Assyrian king Tiglath-pileser III (1 Chron. 5:24). F.E.G.

Eliezer (el'ee-ee'zuhr; Heb., "my God is help"). **1** Abraham's servant, who would have been his heir in place of a son (Gen. 15:2). Presumably, it is Eliezer who finds a wife for Isaac in Genesis 24. **2** Moses' second son, the founder of a levitical family (Exod. 18:4; 1 Chron. 23:15–17; 26:25). **3** The son of Dodavahu, and a prophet who spoke against King Jehoshaphat's naval alliance with Ahaziah

(2 Chron. 20:35–37). **4** The son of Becher (1 Chron. 7:8). **5** A priest (1 Chron. 15:24). **6** The son of Zichri, and a Reubenite chief (1 Chron. 27:16). **7** A leading man sent by Ezra to seek Levites for Temple service (Ezra 8:16). **8** Three men who divorced foreign wives (Ezra 10:18; 10:23; 10:31). **9** An ancestor of Jesus (Luke 3:29). M.A.S.

Elihu (i-l*i*´hy*oo*), a young man who speaks to Job just prior to God's speeches from the whirlwind (Job 32–37). Claiming divine inspiration, Elihu merely repeats in other words the views of Job's three friends. Some scholars take Elihu's speeches as interpolations designed to provide the baffling book of Job with a more satisfactory answer. Assessment of these speeches generally turns on one's reading of the book as a whole. ***See also*** Job, The Book of.

Elijah (i-l*i*´juh), an Israelite prophet in the times of kings Ahab and Ahaziah, during the first half of the ninth century B.C. Elijah is the protagonist of four stories in the book of Kings.

The Four Stories: In the first story, 1 Kings 16:29–19:18, Elijah declared a drought to punish the nation for its idolatry. At this time, Elijah himself hid and miraculously survived the famine. The drought ended in a contest between Elijah and the Baal prophets: the god who would answer his prophet's call with fire from heaven would be vindicated as the true god. Elijah won, Yahweh was vindicated, and Elijah's Baalite antagonists were slaughtered. Pursued by Queen Jezebel who sought vengeance for her protégés, Elijah fled to Horeb, reported to the Lord, and was commanded to anoint Hazael, Jehu, and Elisha, three new protagonists in the fight against Baal. This story, which is often considered one of the masterpieces of biblical narrative, was probably written in Judah during the reign of Manasseh, some two hundred years after the events portrayed. Its late composition is indicated by the adoption of a legend from Elisha's cycle (1 Kings 17:8–16, cf. 2 Kings 4:1–7), the adaptation of the royal annals of Samaria to the present plot (1 Kings 16:29–17:1, to which the end, 19:16–18, corresponds), the incorporation of Isaiah's concept of "the remnant" (1 Kings 19:18) and the anachronistic detail about the persecution of prophets (1 Kings 18:4, 13, 22; 19:10, 14).

The second story involving Elijah, in 1 Kings 21, tells about the judicial murder of Naboth. The royal consort, who coveted his vineyard, had him judged and executed for blasphemy. Ahab then went to inherit the vineyard and was confronted by Elijah with a terrible prophecy of doom. It may be suggested that the present story was composed in the postexilic age, on the basis of its late diction and its being acquainted with all the legal corpora found in the Torah (cf. Exod. 22:27; Lev. 24:13–16; Num. 36:7–9; Deut. 19:15). An older, certainly more original, version is hinted at in 2 Kings 9:25–26, 36–37. In spite of the many variations, the older version seems to confirm Elijah's important role in the Naboth affair.

In the third story (2 Kings 1:2–2:17) Ahaziah fell ill and sent to inquire of Baal-zebub of Ekron if he would recover. Elijah intervened and sent the messengers back to the king with a prophecy of doom that he himself reiterated when summoned to the king's presence. The

Elijah (center) receives a dead child from his mourning mother (in black), revives the child, and returns it to his mother (right), who is now clad in the bright clothing of happiness (1 Kings 17:17–24); panel from the third-century A.D. synagogue at Dura-Europos.

derivative character of this prophetic legend, which twice let fire down from heaven in order to save Elijah, although he was in no danger at all, indicates late composition. This is confirmed by its late diction.

The fourth story dealing with Elijah (1 Kings 19:19–21; 2 Kings 2:1–18) relates how Elisha became Elijah's servant, followed him until his ascension to heaven, and then inherited two-thirds of his master's spirit. This story belongs to the Elisha cycle and contains a spurious tradition aimed at binding together two great prophets of the past. Originally, however, the two were quite distinct: while Elijah was a zealot of the Lord fighting against idolatry and injustice, Elisha was a wonder worker who saved Israel during the Aramean crisis. This story should therefore not be taken into account in the assessment of the tradition about Elijah.

Interpretation: The three reliable stories of the Elijah cycle, being all late, contain many of the theological concepts, historical notions, and literary tastes of the latest biblical writers. Nevertheless the traditions preserved in these stories are not altogether spurious, as proved by the comparison of the two versions of the Naboth incident and by the coherent description of Elijah as a zealot of the Lord fighting against Baal in the other two accounts. At the root of the present stories stood older ones, now lost. Due to the popularity of Elijah, stories about him were retold by each new generation so that only the later accounts were incorporated in the book of Kings.

Elijah came from the town of Tosabe in Gilead. His leather attire and his nomadic habits make it plausible that he belonged to a family of shepherds in Transjordan. This may explain his zeal in fighting Baal in both manifestations—Baal as god of the Israelite peasants, who credited him with the land's fertility, and Baal as god of the Phoenicians who was imported into Israel at that age.

The introduction of the Tyrian Baal into Israel during the Omride dynasty (882–842 B.C.) is a historical fact; it was brought about by the marriage of Ahab, son of Omri, to the Tyrian princess Jezebel. From its center in Samaria Baal worship spread out to the provincial towns, given impetus by the syncretistic concept of the Lord to whom the name of Baal and his attributes had been applied from old. In declaring a drought, Elijah challenged Baal in his very quality as a fertility god. A second challenge was contained in the contest with the Baal prophets, for here the real issue was who the true god of the storm was. The story in 2 Kings dwells on related matters: who is the right god to inquire oracles of? Who strikes and heals, gives death and life?

The outcome of the contest on Mt. Carmel is a monotheistic creed: the Lord is God! (1 Kings 18:39). This explicit belief of the seventh-century B.C. author was already intrinsic in the contest, because at first Israelite monotheism did not dwell on the otiose question of the mere existence of gods. The relevant questions were: who besides the Lord is judge (Ps. 82), savior (Deut. 32), bestower of rain and dew (1 Kings 17)? Who is able to answer invocation and prayer (1 Kings 18)? Thus Elijah's zeal for the Lord was the genuine expression of a well-rooted ancient monotheism.

The older version of the Naboth story, reflected in 2 Kings 9:25–26, 36–37, presents some significant variations also regarding the role of the prophet in the story. Elijah is mentioned only in v. 36, which makes his participation plausible, but not beyond doubt. The prophet did not use the messenger formula "Thus says the Lord," but pronounced an oath in the Lord's name, making the verdict irrevocable. Rebuke and doom were not independent of each other as in 1 Kings 21:19 but integrated together (2 Kings 9:26). The doom was expressed in more general terms—"I will requite you in this field"—which were later adapted to history (1 Kings 21:19b, 21–24). However, the most essential part of the prophet's message has been left unaltered: in both stories the prophet proclaims the verdict of the Lord, a supreme, omniscient judge who will requite in due time.

Elijah's role as fighter against Baal and injustice is taken up in 2 Chron. 21:12–15. The historicity of the letter mentioned there is doubtful. It is more appropriate to the time of the Second Temple (ca. fifth century B.C.), when pseudepigraphic prophecies were circulated. The mention of Elijah at the conclusion of the Torah-Prophets canon in Mal. 3:22–24 identifies him with the Lord's messenger (Heb. *mal'akh*) of Mal. 3:1, expected to purify the priesthood (vv. 2–3) and himself described as a priest and a teacher of Torah (Mal. 2:7). These relationships may thus help explain Elijah's role in connection with the observation of the Torah (3:22–23). As supreme teacher, he is expected to "reconcile fathers and sons." In the light of *Jubilees* 23:16–31, this expression must be understood as referring to the various religious sects emerging in Judaism at the beginning of the Hellenistic age.

In the NT, Elijah is identified in the popular mind with Jesus (Mark 6:15; 8:28) but Jesus identified John the Baptist as Elijah who was to return and restore all things (Mark 9:12). ***See also*** Elisha; Prophet. A.R.

Elim (ee'lim), the second stopping place (after Marah) of the Israelites after they crossed the "sea of reeds" (Heb. *yam suph;* Exod. 15:27; Num. 33:9). This oasis was reported to have twelve springs and seventy palm trees. Because Exod. 15:22–27 and Num. 33:8–9 suggest that the Israelites camped there soon after leaving Egypt but prior to reaching the Wilderness of Sin (Exod. 16:1; Num. 33:10–11), Elim is frequently identified with the Wadi Gharandel,

about sixty-three miles southeast of Suez in the western Sinai, which today has fresh water, palm trees, and tamarisks. ***See also*** Exodus.

J.M.W.

Elimelech (i-lim'uh-lek), an Ephrathite clan member who emigrated to Moab when a great famine broke out in Bethlehem of Judah during the period of the judges (Ruth 1:2–3; 2:1, 3; 4:3, 9). After his death, his two sons married local women. The ensuing story is narrated in the book named after Ruth, one of Elimelech's daughters-in-law. The story tells how, despite the death of all male members of his family, Elimelech's estate in Bethlehem remained in the family's hands through Ruth's brilliant maneuvering. The name in Hebrew may mean either "my God is sovereign," "the Divine King," or "my God is Milku." J.M.S.

Elioenai (el'ee-oh-ee'n*i*; a shortened form of Eliehoenai, Heb., "my eyes are toward God"). **1** A Judahite, descendant of the kings of Judah through David (1 Chron. 3:23–24). **2** A family leader in the tribe of Simeon (1 Chron. 4:36). **3** A Benjaminite of the clan of Becher (1 Chron. 7:8). **4** A Levite of the priestly clan of Pashur. He was condemned by Ezra for taking a foreign wife (Ezra 10:22) and may be the same priest who served in postexilic Jerusalem (Neh. 12:41). **5** A member of the clan of Zattu, likewise condemned by Ezra (Ezra 10:27).

Eliphaz (el'i-faz). **1** The eldest son of Esau and father of several Edomite clans, including Teman (Gen. 36:15–16). **2** The first and, presumably, oldest of Job's three friends (Job 2:11; 4:1; 15:1; 22:1; 42:7, 9). Assuming Job's basic piety, he urged submission. Eliphaz's designation, the Temanite, suggests he was from the area settled by the Edomite clan mentioned above. ***See also*** Job, The Book of.

Eliphelet (i-lif'uh-let; Heb., possibly "God's deliverance" or "the divine deliverer"). **1** David's last son, born in Jerusalem to a nameless wife or concubine (2 Sam. 5:16). The repetition of the name in 1 Chron. 3:6 and 8 is difficult to explain (cf. 1 Chron. 14:5, 7). **2** One of David's strong men, son of Ahasbai (2 Sam. 23:34). The author of Chronicles may have named him Eliphal, son of Ur (1 Chron. 11:35). **3** A descendant of Saul and Jonathan, the third son of Eshek (1 Chron. 8:39). **4** The son of Adonikam, a leader returned from the Babylonian exile (Ezra 8:13; 1 Esd. 8:39). **5** The son of Hashum, husband of a foreign woman (Ezra 10:33; 1 Esd. 9:33). J.M.S.

Elisha (i-l*i*'shuh; Heb., "El [God] is salvation"), a prophet of the northern kingdom of Israel who was active for a period of some fifty years (ca. 850–800 B.C.) during the reigns of Joram, Jehu, Jehoahaz, and Jehoash (Joash). The successor and disciple of Elijah, Elisha is remembered in the biblical stories as a man of wisdom and a worker of miracles both on behalf of his nation in times of crisis and in the lives of individuals in time of need.

Elisha was a farmer who lived with his parents at Abel-meholah (location uncertain; 1 Kings 19:16–21). Since he was plowing with twelve pairs of oxen when Elijah met him, scholars have suggested that his father was a wealthy landowner. Elisha was bald (2 Kings 2:23) and carried a staff, which was common to rural residents and aided travel in the rugged hills of Palestine (2 Kings 4:29). However, unlike Elijah who lived in caves in the desert, Elisha stayed in the cities (2 Kings 6:13, 19, 32). He was provided comfortable guest quarters by a wealthy woman of Shunem (2 Kings 4:8–10) and apparently maintained his own house at Samaria (2 Kings 6:32; cf. 2:25; 5:3). He often appears in the company of groups of prophets ("the sons of the prophets"; 2 Kings 2:3–15; 4:1; 5:22; 9:1), and he frequented religious centers such as Bethel (2 Kings 2:23), Gilgal (2:1; 4:38), and Mount Carmel (2:25; 4:25). His actions, notably using his staff as an instrument of activity (2 Kings 4:29; cf. Exod. 4:2–5) and using music to induce a prophetic trance (2 Kings 3:15; cf. 1 Sam. 10:5–7), recall an older era of prophets represented by Moses and Samuel.

Since Elisha left no written works of his own, the Elisha narratives (2 Kings 2–9; 13:14–21) reflect oral traditions about the prophet that first circulated independently among the people and were later (700 B.C.?) reduced to written records. Because of their roots in oral tradition, these narratives (and those of Elijah) are concerned not so much with a static presentation of historical facts as with a retelling of the significance of events that swirled around this prophetic figure in relation to the faith of Israel. In their present form, the narratives consist of loosely collected anecdotes about the prophet interwoven with historical sketches of the period. Taken together, these on one level portray a figure who, through the telling and retelling of his story among the people, has been cast in near legendary terms; but on another level they demonstrate the sovereignty and power of God at work in spite of the political schemings and the personal crises of a nation.

Personal and Political Dimensions: Elisha's work within Israel involved two areas: personal and political. As a man easily accessible to the people, he frequently interceded in the ordinary events of life that bring anguish and crisis. The purification of a vital spring (2 Kings 2:19–22), the raising of the Shunammite's only son (4:18–37), the provision of an antidote for the poisonous stew (4:38–41), the healing of Naaman's leprosy (5:1–19; cf. Luke 4:27), and the recovery of a borrowed axe head (6:1–7) not

Elisha, in the dark robe, with Naaman, captain of the king of Aram's host (cf. 2 Kings 5); from the Amiens Picture Bible, Spain, 1197.

only demonstrate Elisha's ministry on a personal level but also show the power of God over all aspects of nature, an indirect challenge to the worship of Baal. Similarly, the increase of the widow's oil (2 Kings 4:1–7), the multiplication of grain (4:42–44), and the restoration of the Shunammite's land (8:1–6) demonstrate God's power in the economic and social spheres.

But Elisha's greatest work was on a political level. In accepting the hairy mantle of Elijah, Elisha also accepted the commission of Elijah. As his master had been deeply involved in the politics of his day, so Elisha went on to complete the tasks assigned to Elijah (1 Kings 19:15–16; 2 Kings 8:7–15; 9:1–10) and became constantly involved in the affairs of the nation. He provided water to a thirsty army (2 Kings 3:4–20), was instrumental in routing the Moabites (3:21–27), warned the king of enemy plans more than once (6:8–12), helped avert disaster at the hands of the Syrians (6:13–7:23), was involved in the overthrow of Ben-hadad of Damascus (8:7–15) and Jehu of Israel (9:1–13; see also 9:14–36), and from his deathbed prophesied Joash's defeat of the Syrians (13:14–19).

While Elisha was often termed a patriot, like Elijah, much of his political involvement was directed at bringing the apostate monarchy back to a recognition of God's sovereignty in the world. While some of the Elisha narratives are often challenged from a modern ethical and theological perspective as not in harmony with true Israelite belief (e.g., 2 Kings 2:23–25), together they fill an important theological role within the framework of the book of Kings in demonstrating that every facet of life is subject to God's control. ***See also*** Abel-meholah; Baal; Elijah; Kings, The First and Second Books of the Prophet. D.R.B.

Elishah (i-li'shuh). **1** The son of Javan (Greece) in Gen. 10:4 and 1 Chron. 1:7. **2** An island producing valuable dyed goods in Ezek. 27:7. This suggests that Elishah is Cyprus, which was known as *Alashia* in cuneiform (i.e., Babylonian and Assyrian) sources.

Elishama (i-lish'uh-muh; Heb., "El [God] has heard"). **1** The son of Ammihud; the leader of the tribe of Ephraim during the wilderness wandering (Num. 1:10; 10:22). **2** A son of David born in Jerusalem (2 Sam. 5:16). Another list of David's sons gives a second son named Elishama (1 Chron. 3:5–8), but comparison with a third list (1 Chron. 14:4–7) reveals that the repeated name in 1 Chron. 3:6 is probably a scribal error for Elishua, otherwise omitted. **3** A descendant of David and the grandfather of Ishmael, the leader of a group who assassinated Gedeliah (2 Kings 25:25; Jer. 41:1–3). **4** A descendant of Judah (1 Chron. 2:41). **5** A priest during the reign of Jehoshaphat who taught the people about the law (2 Chron. 17:8). **6** The royal scribe of King Jehoiakim of Judah (Jer. 36:12). D.R.B.

Elizabeth (i-liz'uh-buhth; KJV: "Elisabeth"), according to Luke 1:5–80, the wife of Zechariah and mother of John the Baptist. Luke describes her as coming from a priestly family. Her long period of barrenness connects her with earlier women in Israel such as Sarah (Gen. 17:15–21; 18:9–15; 21:1–7) and Hannah (1 Sam. 1:1–20), who gave birth to children who would be important for new eras in Israel's history.

After Elizabeth's five-month period of seclusion, the news that she would have a child was given to her "kinswoman" Mary at the annunciation. Mary then visited Elizabeth. Although, according to Luke, it was Mary who visited Elizabeth, it was also Mary who was honored by Elizabeth's prophecy that she would be the mother of the Lord. Thus, for Luke, just as John the Baptist would be subordinate to Jesus, so also was John's mother subordinate to Mary. ***See also*** Annunciation; Hannah; John the Baptist; Mary, The Virgin; Sarah; Zechariah. A.J.M.

Elizaphan (el'uh-zay'fan; Heb., "El [God] protects"). **1** A Levite, the son of Uzziel; a clan leader of the Kohathites who were in charge of the utensils of the tabernacle (Num. 3:30); he is probably the same person referred to elsewhere as Elzaphan (Exod. 6:22; Lev. 10:4). **2** A levitical family group ("sons of Elizaphan") headed by

Shemaiah who helped bring the Ark of the Covenant to Jerusalem during the reign of King David (1 Chron. 15:8). The same family group later took part in the cleansing of the Temple during the reforms of Hezekiah (2 Chron. 29:13). **3** The son of Parnach; a leader of the tribe of Zebulun who supervised the apportionment of land within the tribe (Num. 34:25).

D.R.B.

Elizur (i-li´zuhr; Heb., "El [God] is Rock"), the leader of the tribe of Reuben during the wilderness wanderings (Num. 1:5; 10:18).

Elkanah (el-kay´nuh; Heb., "God created [the fetus]"), the name of five men in the Bible. The best known is Samuel's father, who favored his infertile wife Hannah, whom God eventually pitied and allowed to bear a son (1 Sam. 1–2).

Elkosh (el´kosh; Heb., "God give"[?]; KJV: "the Elkoshite"), the presumed birthplace of the prophet Nahum, based on the KJV term (Nah. 1:1). No certain location is known. Suggestions have ranged from Galilee to Judea, Turkey, and Syria.

Ellasar (el´uh-sahr), the home country or city of King Arioch (Gen. 14:1, 9). The identification of Ellasar is uncertain but there are three major claimants. **1** Larsa, a city in southern Babylonia that flourished ca. 2025–1763 B.C. **2** A city in middle Mesopotamia: either Til-Asurri, located about twenty-five miles south-southeast of the junction of the Euphrates and Chabur rivers or Al-Assur located on the Tigris River. **3** A district in eastern Asia Minor: either Cappadocia (as in the Qumran *Genesis Apocryphon* 21:23) or its northern neighbor, Pontus (as in the Greek translation by Symmachus and the Vulgate). The first identification seems likely if Shinar, the home of Amraphel (Gen. 14:1, 9), ultimately derives from the Sinjar Mountains of middle Mesopotamia.

J.G.G.

Elnathan (el-nay´thuhn; Heb., "God has given"). **1** A Judean royal official who was sent to Egypt to fetch the prophet Uriah (Jer. 26:22) and later protested the king's burning of Jeremiah's scroll (Jer. 36:25); he may also have been the same as **2** The father of Nehushta, whose son Jehoiachin became king of Judah (2 Kings 24:8). **3** Several leading figures in the time of Ezra (Ezra 8:16).

Elohim (el´oh-him). ***See*** El; Names of God in the Old Testament.

Elohist (el´oh-hist), the name given one of the sources found in the books of Genesis through Numbers. The siglum given the source is "E," which is derived from its use of the name Elohim for God prior to the revealing of the name Yahweh to Moses (Exod. 3:13–15). While it is more difficult, compared to the case of other sources discerned in the Pentateuch, to recognize this as a continuous and independent source, most scholars at least see in it expansions and revisions of the Yahwistic passages (the "J" source). An eighth- or ninth-century B.C. date is usually suggested. The locale for this source is undoubtedly prophetic circles in the north since there is considerable concern with idolatry, worship, and charismatic leadership. The source begins with the call of Abraham (Gen. 12) and therefore does not have a primeval history. Among the passages most prominently mentioned as Elohistic are Gen. 22:1–19; 40:1–23; and Exod. 20:1–26. ***See also*** Abraham; E; El; Sources of the Pentateuch.

K.H.R.

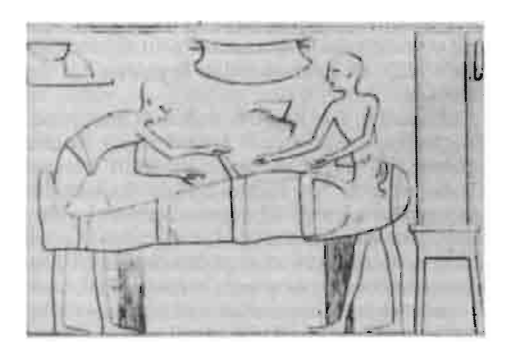
eloi, eloi, lama sabachthani (ee´loh-*i*, ee´loh-*i*, lah´muh suh-bahk´thuh-nee). ***See*** Eli, Eli, Lema Sabachthani.

Elon (ee´lon; Heb., "oak," "terebinth"). **1** A Hittite, father of Basemath, a wife of Esau (Gen. 26:34). **2** A "minor judge" for ten years, of the tribe of Zebulun, buried at Aijalon (Judg. 12:11, 12). **3** A town of the tribe of Dan (Josh. 19:43). **4** A son of Zebulun in the clan lists of Gen. 46:14 and Num. 26:26.

Eloth (ee´loth), a place name that means in Hebrew "a grove of large trees," usually referring to the terebinth tree or the palm. It is also another name for Elath, an important port city located at the end of the northeast arm of the Red Sea, the modern Gulf of Aqabah. The site was passed by the Israelites as they left Egypt (Deut. 2:8) and later expanded by Solomon into a trading port (1 Kings 9:26–28). It was apparently destroyed by Edom (2 Kings 8:20–21), later rebuilt by Uzziah (2 Chron. 26:2), and again lost permanently to Edom (or Syria?) during the reign of Ahaz (2 Kings 16:6). Some scholars identify Eloth/Elath as a later name for Eziongeber, while others maintain that they are two distinct sites (2 Chron. 8:17). ***See also*** Eziongeber.

D.R.B.

El Shaddai (el shad´*i*), a name that God used to reveal himself to the patriarchs in the Priestly source of the Pentateuch. Outside of the passages Gen. 17:1; 28:3; 35:11; 43:14; 48:3; and Exod. 6:3, it occurs only in Ezek. 10:5. El Shaddai is like other Hebrew names of God in Genesis beginning with the element *el*, "God," plus a substantive or adjective, e.g., El Olam ("the Everlasting God"), El Elyon ("God most High"), El Elohe Yisrael ("El the God of Israel"). The etymology of *Shaddai* is not certain; "God, the One of the mountain" is plausible, the mountain being the divine residence.



R.J.C.

Elul (ee´luhl), the postexilic (late sixth century B.C. on) name of the sixth month of the year

(August/September), which is the twelfth month of the older civil calendar, when vintage begins. ***See also*** Time.

Elymas (el´uh-muhs), a Jewish magician (also called Bar-Jesus) associated with Sergius Paulus, the Roman proconsul of Cyprus. He opposed Paul's preaching, but he was blinded, and the proconsul believed (Acts 13:6–12). ***See also*** Magic and Divination; Paulus, Sergius.

embalming, a technique used by the Egyptians to preserve the bodies of humans and certain animals. The most important steps in the procedure were removing the visceral organs, dehydrating the body by immersing it for up to seventy days in a "bath" of dry natron salt, applying various spices and unguents, and wrapping the body in clean linen. Both Jacob (Gen. 50:2–3) and Joseph (Gen. 50:26) were embalmed; the treatment for Jacob is said to have taken forty days (the number forty being one of the symbolic numbers in the OT). ***See also*** Numbers.

Embalmers wrapping a body in linen bandages; detail from an Egyptian tomb painting (ca. 1350–1200 B.C.).

embroidery. ***See*** Needlework.

emerods (em´uh-rodz), an archaic term for hemorrhoids. It is used in the KJV where RSV has "tumors" (1 Sam. 6:11, 17) or "boils" (Deut. 28:27). This illness afflicted the Philistines while they held the Ark of the Covenant (1 Sam. 5:6–6:5).

Emmanuel (i-man´yoo-uhl). ***See*** Immanuel.

Emmaus (i-may´uhs; Heb., "warm wells"), a town of disputed location that figures in the postresurrection story of Luke 24:13–35. Most manuscripts place it about seven miles (sixty *stadia*) from Jerusalem, but others and the ancient Palestinian tradition prefer about twenty miles (160 *stadia*). A town named Emmaus stood at the latter distance in the Valley of Ajalon in the time of the Maccabees (1 Macc. 3:40, 57; 4:1–15), where Judas defeated Gorgias. Bacchides, a Syrian general, later fortified the site (1 Macc. 9:50). A Roman villa, two Byzantine churches and a baptistry, and a Crusader church have been excavated there. Other sites closer to the shorter distance that have been identified with Emmaus since Crusader times are Abu-Ghosh, Qaloniyeh, and Motsa west of Jerusalem, as well as el-Qubeibeh to its northwest. None of these sites, however, has any ancient literary attestation of the name of Emmaus. Anyone familiar with Palestinian bedouin or Arabs in a pre-automotive culture would not doubt the disciples' ability to walk forty miles in a day. C.H.M.

emperor, emperor cult. The English word "emperor" is derived from the Latin *imperator*, "one who gives orders," a title originally used of Roman military commanders. A related term, *imperium*, refers to the right to give orders and administer laws. In 1 Pet. 2:17 Christians are urged to honor the emperor (Gk. *basileus*, "king"). The Latin equivalent for "king," *rex*, was not used of the emperor in the West. Julius Caesar referred to himself as *imperator*, as did his adopted son, Augustus, although the latter preferred the term *princeps*, "first citizen." Tiberius made this distinction: "I am *dominus* (master) of my slaves, *imperator* of my troops, and *princeps* of the rest," i.e., the free civilian population.

The emperor was expected to make public appearances and dispense justice. He ruled so autocratically that the third-century A.D. lawyer Ulpian could say, "What has pleased the emperor has the force of law." Below the emperor was the Senate, or council where laws were made. Normally, an emperor nominated his successor and never passed over his son by blood unless it was for an adopted son. The emperor could issue four types of enactments: "edicts," public policy announcements; "decrees," judicial decisions; "mandates," directives to imperial officials; and "rescripts," written replies conveyed through an elaborate mail system.

Provinces were administered by three classes of governors. *Proconsuls*, under the Senate's authority, and *legates*, appointed by the emperor, both had senatorial rank. Comprising the third type were *prefects* or *procurators*, men of lower equestrian standing. The provinces were linked by well-engineered roads over which the emperor could dispatch his highly efficient professional army.

Augustus to Constantine: According to first-century B.C. antiquarian M. Terentius Varro, Rome was established in 753 by its legendary founder, Romulus. The monarchy lasted from 753 to 509 B.C., when the last of seven kings, Tarquinius Superbus, was defeated. Rome was a republic from 509 B.C. until it collapsed in the

political, economic, and military chaos of 133–31 B.C. Following the Battle of Actium in 31 B.C., Octavian took control of military and political affairs in Rome. Four years later the Senate gave him the title "Augustus" and he became the first in a series of Roman emperors until the last emperor in the West, Romulus Augustulus, was deposed in A.D. 476.

The first century A.D. was dominated by the Julio-Claudian and Flavian dynasties, 27 B.C.–A.D. 68 and A.D. 69–96, respectively. Sources for this period include Tacitus's *Annals* and *Histories*, Suetonius's *Lives of the Caesars*, Dio Cassius's *Histories*, Josephus's *Antiquities* and *Jewish War*, as well as papyri, inscriptions, and coinage.

Living forty-five years after Actium, Augustus (27 B.C.–A.D. 14) established and maintained peace. By assuming tribunician power in 23 B.C., he gained the right to convene the Senate and initiate legislation. He also assumed the titles of *pater patriae*, "Father of the Country," and *pontifex maximus*, "High Priest," with control over state religion. His achievements are preserved in the autobiographical inscription *Res Gestae Divi Augusti*, "Achievements of the Divine Augustus." The Greek translation of Augustus, *Sebastos*, is used of the emperor in Acts 25:21, 25, and Luke 2:1–2 dates Jesus' birth by a Roman census ordered by Caesar Augustus. The term "Caesar" was widely used to refer to the reigning emperor (e.g., John 19:12, 15; Acts 17:7, 25:8; Phil. 4:22).

Tiberius (A.D. 14–37), the adopted son of Augustus, was more tyrannical than his father. Luke 3:1 dates John the Baptist's preaching and hence the beginning of Jesus' ministry in the fifteenth year of the emperor Tiberius (either A.D. 27/28 or 28/29, and the coin shown to Jesus (Mark 12:13–17; Matt. 22:15–22; Luke 20:20–26) was probably a denarius of his reign. The incompetent Gaius (37–41), nicknamed Caligula, "little boots," by soldiers when he was a toddler, was the first autocratic emperor installed with the backing of the Praetorian Guard.

Claudius (41–54) developed the civil service and extended Roman citizenship. He expelled the Jews from Rome, probably in A.D. 49, an event apparently precipitated by disturbances caused by "Chrestus," a distortion of "Christ" (Suetonius *Claudius* 25.4). Nero's (54–68) eccentric reign was marked by a great fire, attributed to the Christians, which led to the first persecutions in Rome. Roman citizens such as Paul had the right to present their cases before the emperor (Acts 25:9–12).

Following Nero's death, Galba, Otho, and Vitellius fought unsuccessfully for the succession (A.D. 68–69). The Flavian dynasty was founded by the popular general in the East, Vespasian (69–79), who was called back to Rome from the Jewish revolt of A.D. 66–70. His son, Titus, reigned for two years (79–81) having brutally sacked Jerusalem and commemorated the event by his arch in Rome. Another son of Vespasian, Domitian (81–96), concluded the rule of the Flavians. Revelation 13 and 17 present a diabolical picture of the empire and its emperors during his reign.

In the age of the Antonines the empire reached its peak. Boundaries were extended to include northern Britain, Dacia, Arabia, Armenia, Mesopotamia, and Assyria. While the reigns of Nerva (96–98) and Trajan (98–117) saw peace and stability, Hadrian (117–138) brought the empire to its greatest height. Permanent frontier fortifications were erected and the emperor was recognized as the ultimate fount of law. The reigns of Antoninus Pius (138–161) and Marcus Aurelius (161–180) brought the period of the Principate (27 B.C.–A.D. 180), based on a civilian conception of the emperor's role, to a close. The empire faltered badly after Marcus Aurelius and his natural son, Commodus (180–192), as new enemies appeared on the frontiers.

Internally, the empire suffered disruption. Septimius Severus (193–211), Decius (249–251), and Valerian (253–260) viewed Christianity as "an empire within the empire" and undertook official repression. In the fifty years between the death of Alexander Severus (235) and the accession of Diocletian in 284, there were twenty emperors at Rome. Civil wars devastated both population and resources. Diocletian (284–305) restored order, divided the empire into East and West, and ruled as a despot. He seized the power of the Senate, which conferred on him the title *Dominus*, symbolizing absolute authority. His reorganization of the empire initiated the period of the Dominate (284–476) based on a military model for the emperor.

The most notable event of Constantine's reign (306–337) was his conversion to Christianity about 312. He showered the churches with favors and granted tax exemption to clergy. To end the Arian controversy he convened and participated in the Council of Nicaea in 325 and five years later moved his capital from Rome to Constantinople, frustrated that he could not convert the ancient city.

Emperor Cult: The emperor cult, also referred to as emperor worship or the Roman imperial cult, was reverence paid to an emperor, living or dead, as divine. Emperor worship originated in the East, where Hellenistic kings had long been regarded as divine "saviors," e.g., Alexander the Great and Ptolemy I. The imperial cult was of greater importance in the provinces, especially Asia, than in Rome. Emperors were frequently referred to as Son of God, Lord, and Savior, but since these titles were also used of Jesus by Paul and other early Christians (e.g., Rom. 1:4; 4:24; Phil. 3:20), the emperor cult inevitably conflicted with the spread of Christianity.

In the West the emperor was worshiped as a god only after his death. By vote of the Senate deceased emperors were "consecrated." Julius Caesar was posthumously deified in 42 B.C. A praetor swore under oath that he had seen Augustus's apotheosis, or ascent into heaven. At his death in A.D. 117 Trajan's apotheosis was attested in several traditions.

Several Roman emperors were reluctant to accept divine honors. Augustus allowed his worship in the provinces only where it was combined with that of the goddess Roma. Tiberius resisted divine honors for himself and his mother, Livia, and forbade the erection of statues. In a letter to Alexandria in A.D. 41, Claudius refused the establishment of priests and temples to himself, saying such observances are "only for the gods." Vespasian generally refused divine honors, although on his deathbed he said ironically, "I suppose I am becoming a god." Trajan also rejected divine honors for himself. In 112 Pliny, his legate in Bithynia and Pontus, required Christians, as a test of loyalty, to abjure their religion and worship the gods, including the emperor. Trajan approved Pliny's action (*Epistles* 10.96–97).

A few emperors believed they were divine in their lifetime. Caligula demanded that he be worshiped, and a temple to him was erected in Rome. He offended the Jews by ordering his Syrian legate Petronius to erect a huge statue of himself in the Jerusalem Temple. Fortunately, Petronius's delaying tactics averted a confrontation. Nero appeared on coins as a "god" wearing the crown of a deified emperor. When the king of Armenia hailed him as a "god," Nero agreed that he was close to being divine. Domitian insisted on being addressed as "lord and god," and a huge statue of him was erected in Ephesus. His persecution of the Christians is reflected in the book of Revelation. Degenerate like Caligula, Nero, and Domitian before him, Commodus demanded divine honors, and Diocletian attempted to revive the imperial cult by demanding that he be called "lord and god." But under Constantine, Christians no longer bowed to the emperor. He was one of them. ***See also*** Roman Empire.

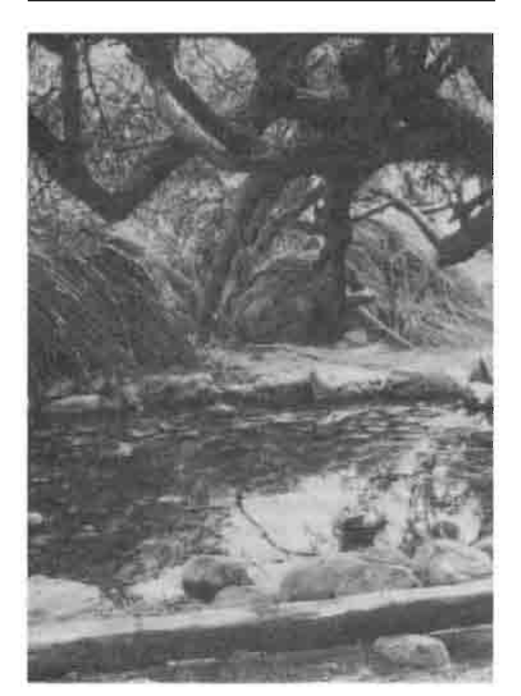
Enan (ee´nuhn; Heb., "little[?] spring [of water]"), the father of Ahira, the tribal leader of Naphtali. He is mentioned five times in tribal lists (Num. 1:15; 2:29; 7:78, 83; 10:27). Functions of his better-known son included leading tribal participation in the census, presenting offerings, and escorting the tabernacle on marches in the wilderness.



encampment, or camp, apart from references in the Pentateuch, a military enclosure (Josh. 8:13; 1 Sam. 13:1; 17:20, KJV: "trench"; 26:5). The Hebrew term translated camp (*maḥaneh*) derives from a verb meaning "to bend, to curve" (*ḥnh*), suggesting an encampment's circular form, a meaning mirrored in the Greek *parembolē,* which translates *maḥaneh* in the Septuagint (LXX) and is used in reference to the Roman garrison in Jerusalem (e.g., Acts 21:34). The term is used symbolically once in the NT (Rev. 20:9) in reference to the church militant. In the Pentateuch the noun translated is *ṭirâh,* which suggests a tribal encampment protected by stone walls (Gen. 25:16; Num. 31:10, KJV: "castle"). Outside the Pentateuch this noun appears in 1 Chron. 6:54 (KJV: "castle"); Ps. 69:25 (KJV: "habitation"); and Ezek. 25:4 (KJV: "palaces").

enchantment. ***See*** Magic and Divination.

En-dor (en´dor; Heb., "spring of circle," "habitation," or "generation"), a Canaanite city belonging to Manasseh (according to Josh. 17:11–12). It was situated about three miles southwest of Mt. Tabor. In a famous episode (1 Sam. 28:3–25) on the eve of King Saul's fatal defeat by the Philistines at Gilboa, he journeyed there to enjoin its medium to raise up Samuel from the dead. En-dor is also mentioned as the site of the defeat of Midian by Gideon (Ps. 83:10). ***See also*** Magic and Divination; Saul. J.U.

En-gannim (en-gan´im; Heb., "fountain of gardens"). **1** A town belonging to the allotment of Judah, located in the lowlands (Josh. 15:34). The literary context would indicate that it is in the region near Azekah and Jarmuth. **2** A border town between Issachar and Manasseh (Josh. 19:21; 21:29). It may be the "garden house" of 2 Kings 9:27. However, in both circumstances, the specific location of the site is undetermined.

En-gedi (en-ged´*i*; Heb., "spring of the young goat"), an important oasis, with fresh water and hot springs, on the west shore of the Dead Sea near its center, about eighteen miles southeast of Hebron. It was part of the allotment of Judah (Josh. 15:62). Archaeological interest in En-gedi began in 1949 with a trial dig at Tell el Jurn. More recently the work of Hebrew University excavations in 1961–64 has

The spring that feeds the pool at En-gedi, an oasis near the Dead Sea.

yielded some interesting finds. The earliest settlement (Stratum V) appears to be from the period of Josiah up to the destruction of Jerusalem (ca. 639–587 B.C.). The settlement was completely destroyed and a new settlement built in the Persian period, probably in the time of Zerubbabel (mid-sixth century B.C.) (Stratum VI). The romance and beauty of the site, which is a modern-day tourist attraction, is evident in Hebrew Scriptures (Song of Sol. 1:14; cf. Ecclus. 24:14). S.B.R.

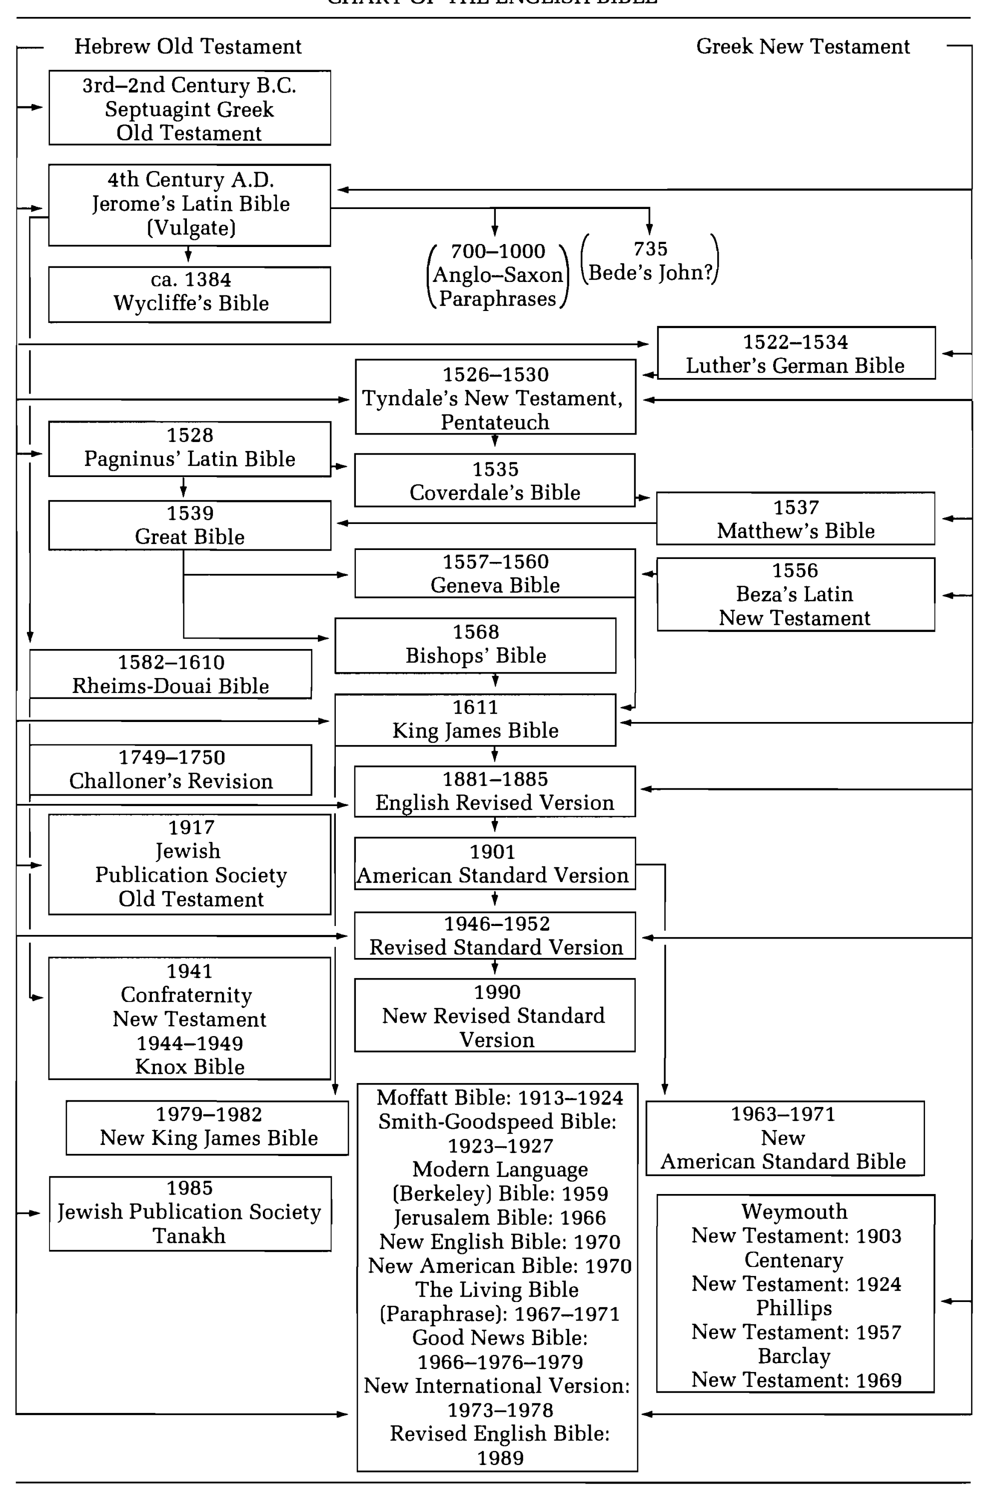
engines of war, the machinery for warfare, which could be used for either offensive or defensive purposes. Offensively, battering rams were used quite effectively by armies campaigning in Palestine. Graphic examples of fortified battering rams are given in the Assyrian king Sennacherib's palace reliefs depicting the siege of Lachish (701 B.C.; 2 Kings 18:13–14). Variations of this siege machine were used by the Babylonians and the Romans. Defensively, catapults were used to hurl stones from battlements on city walls. According to the Chronicler, King Uzziah had catapults in some of his fortified cities for hurling stones and for shooting arrows (2 Chron. 26:15). In open-field warfare chariots were well known and extensively used. Like the battering ram, they required support troops for maximum effectiveness. J.A.D.

English Bible, the The earliest written translation of any part of the Bible into English may have been made by the Venerable Bede, who died in 735, but none of his translation has survived. The *Wessex Gospels,* of the tenth century, are the oldest surviving Old English translation of the Gospels. The first translation of the whole Bible, in 1382, is credited to John Wycliffe (1324–1384), "The Morning Star of the Reformation." His translation work was part of his larger task of reforming the church. It is not certain, however, how great a part Wycliffe himself played in this version or in the second one, which appeared after his death in 1384. Both were made from the Vulgate (Vg), but the second one was less a word-for-word equivalent of the Latin than the first one. Wycliffe was denounced as a heretic; in 1415 his Bible was condemned and burned, and in 1428 his body was exhumed and burned.

From Tyndale to King James: William Tyndale (1484–1536), "The Father of the English Bible," wanted to make the Scriptures available to all: "I had perceived by experience how that it was impossible to establish the lay people in any truth, except that the scriptures were plainly laid before their eyes in their mother tongue, that they might see the process, order, and meaning of the text." Unable to get permission from church or Parliament to do his translation in England, he went to the Continent, where in February 1526 his NT, translated from the Greek, was printed. Copies of it soon arrived in England, where they were publicly burned by Cuthbert Tunstall, bishop of London. Tyndale continued his work of translating the OT from the Hebrew; the Pentateuch (Gen. through Deut.) was published in 1530, and Jonah followed. Tyndale was arrested in May 1535 and imprisoned in a fortress in Vilvorde, six miles north of Brussels. In August 1536 he was tried and found guilty of heresy, and on October 6, 1536, he was strangled and burned at the stake. His last words were, "Lord, open the King of England's eyes." The king was Henry VIII.

Readers of the English Bible owe more to Tyndale than to any other person in history. It is estimated that eighty percent of the King James (KJV) NT is Tyndale's work, and his influence is seen also in the OT. "Tyndale's honesty, sincerity, and scrupulous integrity, his simple directness, his magical simplicity of phrase, his modest music, have given authority to his wording that has imposed itself on all later versions" (J. Isaacs, "The Sixteenth-Century English Versions," in H. W. Robinson, ed., *The Bible in Its Ancient and English Versions,* p. 180).

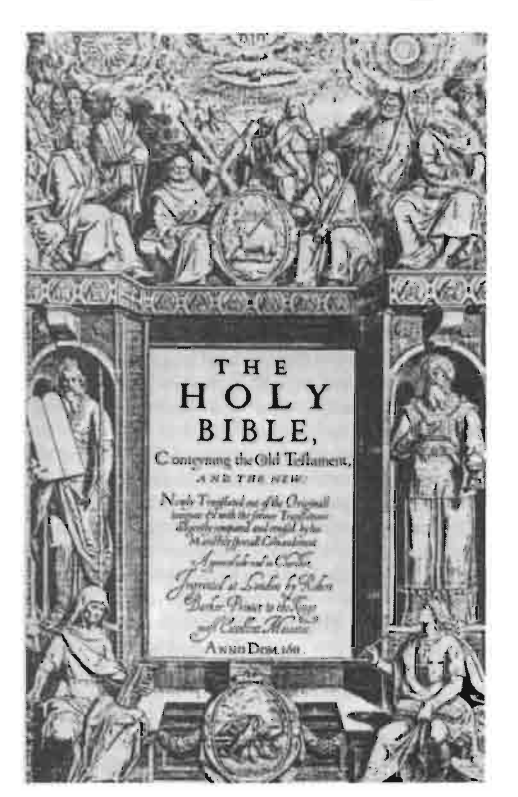
Before Tyndale's death a complete Bible in English, edited by Miles Coverdale (1488–1569), was published on the Continent. It was dedicated to Henry VIII, and the NT was essentially a revision of Tyndale's translation; Coverdale made use also of Tyndale's translation of portions of the OT. The first authorized Bible was published in 1537, the so-called Thomas Matthew Bible, edited by John Rogers, a friend



A manuscript copy, ca. 1420, of the NT of Wycliffe's Bible. John Wycliffe (1324–1384) is credited with the first translation of the whole Bible into English.

of Tyndale's. The NT and the Pentateuch were Tyndale's work, and his manuscripts of Joshua through 2 Chronicles were used. The "Great Bible" (its pages were 9×15 inches) of 1539 was Coverdale's revision of the Matthew Bible, and it was enthusiastically received by Tunstall, now bishop of Durham. In 1539 a lawyer, Richard Taverner, published a revision of the Matthew Bible.

In the reign of "Bloody Mary" Tudor (1553–1558) all printing of English Bibles in England stopped, and the English Bible could not be used in church services. Many Protestant leaders—perhaps as many as eight hundred—sought refuge on the Continent. The pastor of the English Church in Geneva, William Whittingham, translated the NT (1557) and served as editor of the OT translation. The whole Bible was published in 1560 and dedicated to Queen Elizabeth, who had begun to reign in 1558. It was printed in Roman type, bound in small octavo size, and was the first Bible in English to have verse numbers. The Geneva Bible (also known as the "Breeches Bible," because of its rendition of Gen. 3:7) became the Bible of the people: it was the Bible of Shakespeare and of Bunyan; of the pilgrims to the New World, and of the Mayflower Compact; of Oliver Cromwell and his army, for whom the "Soldier's Pocket Bible" was published in 1643. It was the first Bible published in Scotland (1579) and was dedicated to James VI, King of Scotland. It ran through 140 editions, and remained popular for nearly a hundred years. The last edition was published in 1644. Its extremely Protestant notes were offensive to the bishops, but its immense success showed up the inadequacy of the Great Bible. A revision of the Great Bible, published in 1568, was named "The Bishops' Bible" because of the great number of bishops on the committee. In 1570 the Convocation of Canterbury ordered it to be placed in all the cathedrals, thus making it the second Authorized Version in England. It went through twenty editions before 1606, but did not replace the Geneva Bible in popular esteem.



The KJV and Its Revisions: When James VI of Scotland ascended to the throne of England as James I in 1603, there were two competing Bibles in the realm: the Bishops' Bible, preferred by the church authorities, and the Geneva Bible, the favorite of the people. In January 1604 James called a conference of theologians and churchmen at Hampton Court "for the hearing, and for the determining, things pretended to be amiss in the Church." A Puritan leader, John Reynolds, president of Corpus Christi College of Oxford, proposed that a new translation be made, to replace the two Bibles. The King, who had an amateur's interest in Bible translation, gave his approval, and on February 10, 1604, he ordered that "a translation be made of the whole Bible, as consonant

Title page from the first edition of the King James Bible, 1611.

as can be to the original Hebrew and Greek, and this is to be set out and printed without any marginal notes and only to be used in all Churches of England in time of Divine Service." Fifty-four "learned men" were organized into six panels: three for the OT, two for the NT, and one for the Apocrypha. Fifteen rules were drawn up to guide their work, the first one of which was: "The ordinary Bible read in the Church, commonly called the *Bishops' Bible,* to be followed, and as little altered as the truth of the original will permit." Rule 6 stipulated that no marginal notes be affixed "but only for the Explanation of the *Hebrew* or *Greek Words,* which cannot without some circumlocution, so briefly and fitly be express'd in the text." Rule 14 specified that "when they agree better with the Text than the Bishops' Bible" the following translations were to be used: Tyndale, Matthew-Coverdale, Whitchurch (that is, the Great Bible), and Geneva.

The translation was published in 1611 and very rapidly went through several editions, nearly all of which had some changes in the text. The most careful and comprehensive revision was published in 1769, the work of Benjamin Blayney, of Oxford, who spent nearly fourteen years on the task. Although never formally authorized by King or Parliament, the name "The Authorized Version" became attached to it, and that is how it is known in Great Britain.

There were some fierce critics of the new Bible, notably the eminent Hebrew scholar Hugh Broughton, who had not been invited to work on it. He himself was preparing a Bible, based on the Geneva Bible, but did not live long enough to see it published. It took nearly forty years for the KJV to replace the Geneva Bible in the affection of the people; once established, however, it became the Bible of English-speaking peoples for over 350 years, down to the present time.

In 1870 the Church of England authorized a revision of the KJV. Fifty-four scholars were appointed, most of them Anglicans, but including Methodists, Presbyterians, Congregationalists, Baptists, and one Unitarian. Americans were invited to participate, by correspondence, with the proviso that an American edition not be published until fourteen years after the publication of the British edition. The work was carefully, not to say pedantically, done, and in the NT alone about 30,000 changes were made, over 5,000 of them on the basis of a better Greek text. The NT, published in May 1881, was greeted with wild enthusiasm. The complete text was published in special Sunday supplements (May 22) of the Chicago *Tribune* and the Chicago *Times.* The complete Bible appeared in 1885, with an appendix which listed the changes preferred by the American scholars. The *American Standard Edition* of the Revised Version was published in 1901. Neither the English nor the American Version replaced the KJV in church and private usage.

The latest, and probably the last, Bible in the Tyndale–King James tradition, is the *Revised Standard Version* (RSV), authorized in 1937 by the International Council of Religious Education. The NT was published in 1946, the OT in 1952, and the Apocrypha in 1957. In 1977 an Expanded Edition appeared: in addition to the books considered deuterocanonical by Roman Catholics, it includes also 3 and 4 Maccabees and Psalm 151, from the canon of the Septuagint (LXX), thus making this Bible acceptable to Eastern Orthodox Churches. The RSV is not so much a new translation as it is a revision which sought to preserve the language of the KJV where that language could still be understood by modern readers. Where it could not, the RSV expresses the thought in contemporary language. The "Preface" published in most copies of the RSV gives an extensive account of these matters.

Mention should be made of John Wesley's revision of the KJV NT (1755) "for plain unlettered men who understand only their Mother Tongue." In 1833 Noah Webster published a complete KJV in which he corrected some 150 words and phrases that were either misleading

or wrong. In Matt. 23:24 he correctly identified "strain at a gnat" as a printer's error and corrected it to "strain out a gnat." *The New King James Bible* (Thomas Nelson, 1982), falsely claiming to be "the first major revision of the KJV since 1867," claims to "unlock the spiritual treasures found uniquely in the King James Version of the Holy Scriptures."

Versions Independent of the KJV: Many Bibles and perhaps as many as 250 NTs in English have appeared since 1611. Only a few can be mentioned here. In 1862 Robert Young, an Edinburgh bookseller best known for his exhaustive *Analytical Concordance to the Bible,* produced a literal translation, which is practically a word-for-word equivalent of the original. Charles Thomson, Secretary of the Continental Congress, began his work of translating the LXX and the NT after retiring at age sixty from politics and business. It took him almost twenty years to complete his work (1808) and he holds the distinction of producing the first English NT to be translated and published in America, as well as the first English translation of the LXX (see John H. P. Reumann, *The Romance of Bible Scripts and Scholars,* pp. 122–144). Ferrar Fenton, an English businessman, translated the NT in 1895 and the whole Bible in 1903; his translation enjoyed considerable success, and as late as 1944 a new edition was published. He claimed his translation was the most accurate ever made, "not only in words, but in editing, spirit, and sense."

Modern Translations: The modern era in Bible translation began with the *Twentieth Century* NT of 1901–2. The translators—mostly laymen and laywomen—did a remarkable job of producing a scholarly and faithful translation into clear and idiomatic English. One of the consultants of the group was Richard Francis Weymouth, a London classical scholar who in 1866 published an edition of the Greek NT. His translation of this text was published posthumously in 1902. But it was the Scottish scholar James Moffatt whose *New Testament: A New Translation* (1913) had the greatest impact upon the reading public. His translation of the OT appeared in 1924, and the whole Bible was revised in 1935. Moffatt was at work translating the Apocrypha when he died in 1944. Ernest J. Goodspeed was the American counterpart of Moffatt. His NT was published in 1923; the OT, translated by a panel headed by J. M. Powis Smith, was published with the Goodspeed NT in 1935 as *The Bible, an American Translation.* In 1938 Goodspeed translated the deuterocanonicals, and *The Complete Bible: An American Translation* came out in 1939.

Many major translations of the Bible into English have appeared in the United States and Great Britain in the last thirty years: Monsignor Ronald Knox's translation of the Bible from the Vg (1955); the Jehovah's Witnesses' *New World Translation of the Holy Scriptures* (1961); *The Jerusalem Bible,* the English version of *La Bible de Jérusalem* (1966), which has the most comprehensive and scholarly readers' helps of any Bible in English at this time; the *New American Bible* (1970), the first Catholic Bible in English translated from the original Hebrew and Greek texts; *The New English Bible* (1970), a new translation, rather than a revision of earlier translations, produced by a group of scholars from the British Isles that included experts in both Bible and English literature; the *Good News Bible* (1976), sponsored by the American Bible Society (edition with deuterocanonicals, 1979); and the *Tanakh,* a translation of the traditional Hebrew text by American Jewish scholars (1985).

The RSV was condemned as unfaithful by the vast majority of American conservatives, and several translations have been made with the purpose of providing conservatives a translation they would accept, such as the *Amplified Bible* (1965), the *Modern Language Bible* (1969), and the *New American Standard Version* (1971). The culmination of this process was reached in 1978 with the publication of the *New International Version,* produced by an international team of conservative Protestant scholars "with a high view of Scripture," as they described themselves. Although it is not a translation, Taylor's *The Living Bible, a Paraphrase* (1971) may also be mentioned.

Of the spate of new translations that have appeared in recent years, pride of place goes to the *Revised English Bible* (1989) and the *New Revised Standard Version* (1990), replacing the *New English Bible* and the *Revised Standard Version,* respectively. The NRSV succeeds in eliminating "male-oriented" language where the biblical text is inclusive of both sexes; and even though its motto is "As literal as possible, as free as necessary," in many places it has been able to shake off the fetters of formal equivalence to make the text speak standard American English. Beside some drastic changes in exegesis (see Gen. 1:1–2), the NRSV incorporates material from the Dead Sea Scrolls not found in the Masoretic Text or ancient versions (see 1 Sam 1:11, 22; 10:27). The REB is somewhat of a disappointment; after the dramatic breakthrough made by NEB, REB in places reverts to traditional exegesis and language (see Gen. 1:1–2); however, it still remains the leading dynamic equivalence translation in English.

The New Jerusalem Bible (1985), a revision of *The Jerusalem Bible,* is based on the French edition of 1973. The revised *New American Bible* NT (1986) is a deliberate step backward toward the worst kind of a formal equivalence translation. The second edition of *Today's English Version* (1992) eliminates exclusive language and changes a number of passages deemed unacceptable to some readers. In 1991 the American Bible Society published the *Contemporary Eng-*

lish Version NT, with the whole Bible scheduled to appear in 1996.

Future Translations: Although "the rage to translate" seems to have abated, the translation of the Bible into English will continue, because we have or will have better Hebrew and Greek texts from which to translate, a greater knowledge of the meaning of the original, a better understanding of the translator's task, and the need to keep up with changes in the English language. As Goodspeed said, any translation of a masterpiece must be a failure. Consequently, no one translation should become *the* Bible for all readers, and a major revision, if not a new translation, should appear at least every thirty years. Perhaps the greatest current need for the American Bible-reading public is a translation that will use the full resources of the language and achieve a level of style, grace, and beauty not yet reached by any American Bible. No translation can ever be perfect, but better translations can help achieve Tyndale's goal of enabling readers to "see the process, order, and meaning of the text."

Enlil (en´lil; Akkadian, "Lord Wind"), an ancient and important god of Mesopotamia. He was associated with agriculture and was the god of the wind, of the destructive storm and the beneficent breeze of spring. Enlil was the creator of the primitive farming tool, the hoe, and his wife Ninlil was a grain goddess. The god of the city Nippur, Enlil's main temple there was Ekur ("House-mountain"). In a mythological tradition originating in Nippur, Enlil separated heaven from earth, and humankind sprouted forth—was created—at the place of the division.

Like Ea and the Canaanite El, Enlil is a creator god; like these, he also appears as a patriarchal ruler on whose behalf a young god takes up arms and organizes natural and political structures. In a developed form of the pantheon, he shares control of the world with An, Ea, and a mother goddess. He is the head of the gods and master of the land. In early Mesopotamia, he was the primary executive of the gods, and he bestowed and legitimated divine and human kingship. Assur, the god of the Assyrians, was later identified with Enlil.

In Mesopotamian accounts of the creation of humankind and human order (the Atrahasis Epic; Gilgamesh Epic, Tablet XI), Enlil brought the Flood to destroy humankind; the present order emerged as an adjustment necessary to allow humanity to exist without distressing Enlil. The biblical story of the flood in Genesis 6 may be dependent upon these accounts. ***See also*** Ninlil; Nippur. I.T.A.

Enoch (ee´nuhk), seventh patriarch from creation in Gen. 5:18–24; he was the son of Jared and the father of Methuselah. He lived 365 years, walked with God, and God took him (*Elohim,* the Heb. word usually rendered as "God" may, in the first instance, be more appropriately translated as "angels"). The figure is modeled in part on ancient Mesopotamian heroes, especially Enmeduranki, the seventh king. In the Hellenistic age (300 B.C.–A.D. 300) a corpus of apocalyptic writings was attributed to Enoch (*1 Enoch, 2 Enoch*). In later Jewish mysticism he was identified with Metatron, the "Little Yahweh," or angel closest to God himself. ***See also*** Apocalyptic Literature. J.J.C.

Enoch, Books of. ***See*** Pseudepigrapha.

Enosh (ee´nosh; Heb., "humanity" or "the human race"), a name used to identify the son of Adam through whom the genealogies to Noah, to Abraham, and eventually to Christ are traced (Gen. 4:26; 1 Chron. 1:1). He is called Enos in Greek (Septuagint; Luke 3:38).

En-rogel (en-roh´guhl; Heb., "spring of a treader or fuller"), the name of a spring near Jerusalem that served as the boundary line between the tribes of Judah and Benjamin (Josh. 15:7; 18:16). During the rebellion of Absalom against his father David, this spring was the place where information was passed by a maidservant to David's men (2 Sam. 17:17). Later, when David was near death, his other son, Adonijah, prematurely declared himself king while sacrificing animals and celebrating with his friends by the Serpent's Stone, which was beside En-rogel (1 Kings 1:5–10). ***See also*** Absalom; Adonijah. F.R.M.

enrollment, a census that identifies, locates, and numbers the people in a particular group or area, usually for purposes of taxation but also at times for other ends such as conscription or forced labor. Several such enrollments are mentioned in the OT (e.g., Exod. 30:11–16; Num. 1:1–49; 26; 2 Sam. 24:1–9; cf. 1 Chron. 21:1–5; 1 Chron. 7:40; 2 Chron. 2:17; 25:5; Ezra 2:2b–67). In the Roman Empire, it appears that periodic enrollments were common (in Egypt, for example, every fourteen years). The most famous of the enrollments is that mentioned in Luke 2:1–5 (cf. Acts 5:37) in connection with the birth of Jesus. The association of this enrollment with

the governorship of Quirinius, however, raises a problem. Most scholars agree that Jesus was born about 6 B.C., but the available evidence indicates that Quirinius was governor of Syria about eleven years later and that he did, at this later date, supervise an enrollment. Some believe that Quirinius held a military position in Syria at the earlier date and, since he was more widely known, the historical connection was made with him rather than with the lesser known governor in 6 B.C., a Sentius Saturnius. In the story, the enrollment is apparently carried out in accordance with Jewish, not Roman, custom, since Joseph goes back to his ancestral home. It has also been suggested that Joseph perhaps owned some property in Bethlehem, which necessitated the journey from Galilee to Judea. It has been conjectured that the entire story represents an attempt to reconcile Jesus' Galilean (Nazareth) background with traditions of the Messiah's birth in Bethlehem. ***See also*** Bethlehem; Messiah; Nazareth; Quirinius, P. Sulpicius; Tribute, Tax, Toll. J.M.E.

En-shemesh (en-shem´ish; Heb., "spring of the sun [god]"), a spring located east of Jerusalem and Bethany. Known as the "Spring of the Apostles" in the first century A.D. and known today as Ain el-Hod, it is the last spring on the road between Jerusalem and the Jordan Valley. In premonarchical Israel it served as the boundary between Judah and Benjamin (Josh. 15:7; 18:17).

Epaphras (ep´uh-fras), person mentioned in Philem. 23 and Col. 1:7; 4:12–13 as an associate of Paul ("fellow prisoner" in Philemon). Apparently a native of the Lycus Valley in Asia Minor, he may have been Paul's personal representative to such cities as Colossae, Laodicea, and Hierapolis in that area. His being named before Mark, Luke, and others (Philem. 23–24) perhaps indicates the high esteem in which Paul held him. There is no evidence that Epaphras is a short form of Epaphroditus, the name of another co-worker of Paul mentioned in Phil. 2:25–30 and 4:18. ***See also*** Colossae; Colossians, The Letter of Paul to the. A.J.M.

Epaphroditus (i-paf´ruh-d*i*´tuhs), a Philippian Christian who brought gifts from Philippi to Paul in prison (Phil. 4:18). Epaphroditus had been seriously ill but had recovered. Because of anxiety in Philippi concerning the illness of Epaphroditus, and because Paul himself was unable to go, he sent Epaphroditus back to Philippi (Phil. 2:25–30). ***See also*** Philippians, The Letter of Paul to the.

ephah (ee´fuh), a dry measure equal to the liquid *bath* and approximately the equivalent of three-eighths to two-thirds of a U.S. bushel. It may also represent the container for such a quantity (see Zech. 5:6–11). ***See also*** Weights and Measures.

Epher (ee´fuhr; Heb., "fawn" or "kid [of mountain goat]"). **1** A son of Midian and grandson of Abraham and his concubine Keturah (Gen. 25:4). **2** The son of Ezrah, a descendant of Judah (1 Chron. 4:17). **3** A clan leader of the eastern half-tribe of Manasseh (1 Chron. 5:24).

Ephesians (i-fee´zhuhnz), **the Letter of Paul to the,** the tenth book in the NT. The earliest manuscripts of Ephesians do not contain the words "in Ephesus" (Eph. 1:1). If originally present, "in Ephesus" is unlikely to have been omitted in later manuscripts. The Letter is also very general, lacking any personal references to the readers. The author has never visited them, and they do not know him (1:15; 3:2–3; 4:21). Yet, according to Acts, Paul founded the church in Ephesus (Acts 18:19–20; 19:8–10). Ephesians was probably written, therefore, to a group of churches, one of which may have been Ephesus, or it may have been written from Ephesus. "In Ephesus" was then inserted later to distinguish the Letter from other Pauline writings.

Style and Authorship: There are good grounds for doubting that Paul was the author of Ephesians. Much of it is written in an elevated or liturgical style, and, though Paul writes brief passages in this manner, he never sustains it for long. The sentences are longer and more complex than those Paul normally writes (e.g., 1:3–14, 15–23; 2:1–7; 3:1–7); translations regularly disguise their length, breaking them up in English for easier understanding. Words and ideas are used in ways foreign to Paul. The *Haustafel*, a code of household duties (5:22–6:9), is addressed only to households where all are believers; Paul knew that there were mixed households (1 Cor. 7:12–16; cf. 1 Pet. 2:18–3:7) and that such mixed households provided major problems for believers living among unbelievers. In contrast to Paul, the apostles appear to be figures of the past (2:20, 3:5), and there is no interest in the return of Christ. While for Paul the resurrection of believers is future, in Ephesians they already sit with Christ in heavenly places (2:6). The dispute about the admission of Gentiles into the church is no longer a living issue as in the genuine Pauline Letters. While none of these reasons by itself would be an insuperable obstacle to Pauline authorship, their cumulative effect makes it unlikely. In many of its differences from Paul's other Letters, Ephesians is closely related to Colossians, though it is unlikely that the same person wrote both.

A disciple of Paul probably wrote the Letter about A.D. 80–90, wishing to continue the apostle's teaching and apply it to changing circumstances. He or she directed it to churches in Asia Minor, most of whose members had been Gentiles (1:11–14; 2:1–3, 11–22; 3:1; 4:17–19; 5:8). The Letter itself affords no clue as to why it was written. Though employing Gnostic terms, the writer does so not directly to oppose

EPHESIANS, THE LETTER

Gnostic teaching but to interpret Christianity for those familiar with such terms. The rich style reflects liturgical material in use in the church. A hymn is quoted in 5:14, and a *Haustafel* is taken and amplified in 5:22–6:9 (cf. Col. 3:18–4:1; 1 Pet. 2:13–3:7 for similar material). The Letter may also incorporate portions of hymns and creeds used in the contemporary church.

Theme and Content: The author meditates on a number of interrelated themes centering on the church and its relation to Christ and on Christian behavior within the church. A divine plan, in God's mind since before the creation of the world (1:4), has now been revealed to the apostles and prophets (3:5) and is being accomplished through the death, resurrection, and ascension of Christ. He is Lord not only of humanity but also of all supernatural powers, both good and evil (1:20–23), and in him all things will finally be united (1:10). Thus, God redeems the whole universe as well as humanity. Prior to Jesus, Jews alone had been central to God's plan. Now, Gentiles are also included, for both have been delivered from sin and reconciled to one another through Christ's death (2:13–18). Jewish and gentile Christians together form a third group, the church, which is neither Jewish nor gentile but Christian. Like a building, the church has a chief cornerstone, Christ, and a foundation, the apostles and prophets (2:20). As a body with various members (4:7–11), its head is Christ, by whom it is continuously nourished (4:15–16). As a bride or wife, its groom or husband is Christ, who died for it (5:22–33). It brings God's salvation to the supernatural powers (3:9–10) as well as to humanity. Paul himself occupies a special place in relation to the Gentiles (3:2, 3, 8).

In the description of the church and its relation to Christ it is only its internal nature that is discussed. Nothing is said about the relation of the church or of individual believers to the outside world (cf. Rom. 13:1–7; 1 Pet. 2:13–17). Consistent with this, when in the second half of the Letter (4:1–6:20) believers are instructed in their behavior, it is only their behavior toward one another that is treated, e.g., they are to speak the truth to other church members (4:25) and to forgive one another (4:32). The virtues that are advocated (humility, 4:2–3; love, 5:2) are those that would build up the community, and the vices that are repudiated (anger, 4:26–27; bawdy talk, 4:29) are those that would destroy it. It is not clear why the author should have restricted himself to discussing the internal life of the community. Finally, Christian conduct, reflecting the cosmic dimension of the Letter, is depicted as a struggle against supernatural powers of evil (6:10–17); believers need to stand firm as soldiers who have been equipped for this struggle by God. Some of the details of conduct to which the author refers, such as the rejection of theft (4:28) and the need to avoid sexual sin and greed (5:3, 5), may seem obvious to us, and lack the penetrating insight of Paul into Christian conduct, but as former Gentiles the readers required detailed guidance as to the way they should live. ***See also*** Ephesus; Paul; Pseudonym.

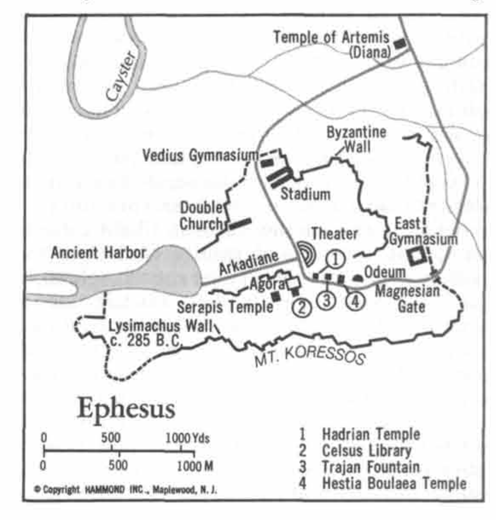
OUTLINE OF CONTENTS



The Letter of Paul to the Ephesians

I. Address (1:1–2)
II. The church as a fellowship of the redeemed (1:3–3:21)
    A. Praise of God (1:3–14)
    B. Intercession (1:15–23)
    C. Life from death (2:1–10)
    D. Jew and Gentile reconciled (2:11–22)
    E. Paul's ministry in revelation (3:1–13)
    F. Renewed intercession (3:14–21)
III. Life among the redeemed (4:1–6:20)
    A. Unity and diversity in service (4:1–16)
    B. The old life and the new (4:17–24)
    C. Christians in their communities (4:25–5:14)
    D. How Christians should live together (5:15–6:9)
    E. The Christian's armor (6:10–20)
IV. Closing greetings (6:21–24)

Ephesus

A PORT CITY of western Asia Minor at the mouth of the Cayster River, Ephesus (ef´uh-suhs) lay between Smyrna and Miletus. Although the area had an immemorial primitive shrine to the Anatolian mother goddess, was visited by Mycenaeans, and was peopled by Carians and Lelegians, it was first colonized by Ionian Greeks under the leadership

The city plan (right) shows buildings and walls over several centuries before, during, and after Paul's time in the mid-first century A.D.

of Androclus of Athens in the eleventh century B.C. The Greeks identified the deity with their own Artemis, but the attributes remained those of the ancient fertility goddess. A new phase of Ephesus's history began with its conquest ca. 560 B.C. by Croesus of Lydia, who contributed columns to the Archaic Artemision and reorganized the layout of the city. Lydian influence in Ephesus through the succeeding centuries assured a greater synthesis of Greek and Asiatic culture than anywhere else in Ionia. After Cyrus the Persian defeated Croesus in 547 B.C., Ephesus remained subject to Persian rule until Alexander's arrival in 334 B.C. In the meantime, the Artemision had burned (356 B.C.), and a new temple had been begun, the classical structure that was known as one of the Seven Wonders of the World in Hellenistic times, lasting until its destruction by Goths in the third century A.D. Only a single reconstructed column and the remains of an altar now mark the spot.

The Temple of Artemis, considered one of the seven wonders of the world during Hellenistic times. Today only one column of an interior row remains.

Lysimachus led the building of a new city in the third century B.C., with a new five-mile-long wall, a new harbor, and a Hippodamian street plan. From 281 B.C., the Seleucids held Ephesus until Antiochus III's defeat by the Romans left it in possession of the kings of Pergamum. Rome took direct rule at the death of Attalos III in 133 B.C. An abortive revolt, linked to Mithradates VI of Pontus in 88 B.C., was put

down by the Roman general Sulla, and the city remained peacefully Roman and then Byzantine for the rest of its history. Having dedicated a sacred precinct to Rome and Julius Caesar in 29 B.C., Ephesus became capital of the Roman province of Asia and enjoyed the height of its prosperity in the first and second centuries A.D. as the fourth largest city in the empire. As the harbor silted up, the city declined in the Byzantine period (ca. fifth to tenth centuries A.D.), but a new wall and churches were built. The Turkish town of Seljuk today is the sixth city on the site.

Portion of the Ephesus city wall built by Lysimachus, ca. 285 B.C.

Paul in Ephesus: In the NT, Ephesus and Ephesians are mentioned more than twenty times. According to Acts 18:19–21, Paul sailed from Corinth to Ephesus with Priscilla (Prisca) and Aquila for his first visit there. The latter couple instructed Apollos in Ephesus (Acts 18:24–26). Paul returned on his "third" missionary journey (Acts 19:1–20:1) to stay for more than two years, preaching and exorcising. The silversmiths in the commercial agora (marketplace) finally rioted at the threat of Paul's monotheism against their income from miniatures of the Artemision and dragged Paul's companions, Gaius and Aristarchus, into the city's theater before the town clerk was able to

Remains of the Temple of Hadrian at Ephesus.

calm the mob (Acts 19:23–41). Later, on his way back to Jerusalem, Paul met with the elders of Ephesus at Miletus (Acts 20:16–38). The presence of Paul's companion Trophimus, an Ephesian, was later the reason for a riot of Jews in the Jerusalem Temple and the arrest of Paul (Acts 21:27–22:30). In 1 Cor. 15:32, Paul writes that he "fought with beasts at Ephesus," but whether this is meant figuratively or literally is uncertain. 1 Tim. 1:3 charges Timothy to remain at Ephesus. 2 Tim. 1:18 refers to service rendered by Onesiphorus at Ephesus, and 4:12 to the sending there of Tychicus. The church of Ephesus is the first of the seven churches of Revelation (1:11; 2:1–7). Ephesus as the location of the "saints" addressed in Eph. 1:1 occurs in some manuscripts, but not in the best ancient witnesses (see note in the RSV and NRSV).

Austrian and Turkish archaeologists in this century have excavated the theater, which seated twenty-five thousand, and the commercial agora, as well as many other public buildings, private homes, and streets of the first and second centuries A.D., so that the modern visitor can gain some impression of the city as known by Paul. There has not yet come to light, however, any archaeological evidence of the Jewish community referred to in the NT and by the first-century Jewish historian Josephus Flavius. In postbiblical tradition, Ephesus was associ-

ephod (ee´fod), the most prominent of the elaborate Aaronide garments described in the tabernacle texts (Exod. 28; 39), it designates the only article of priestly apparel that plays a significant role outside the priestly writings contained in the Pentateuch. A "linen" ephod appears in stories of Samuel (1 Sam. 2:18; 22:18) and David (2 Sam. 6:14; 1 Chron. 15:27), and an ephod linked with teraphim is found in Judges 17–18 (cf. Hos. 3:4; Isa. 30:22). Not simply a ceremonial garment or a divination device, the ephod can best be understood in relation to the special trappings that adorned cult statues in Mesopotamian or Egyptian temples and that, in Israelite religion as priestly garments or objects, similarly helped bring human beings into contact with the deity. ***See also*** Priests; Tabernacle.

C.L.M.

ephphatha (ef´uh-thuh), the contraction of an Aramaic verb meaning "Let it be opened." In Mark 7:34 Jesus gives this command while curing a man who is deaf and unable to speak.

Ephraim (ee´fray-im; Heb., probably "fruitful place"; note Gen. 41:52 for a popular etymology). **1** Joseph's younger son born in Egypt to Asenath. Ephraim was blessed by Jacob (Gen. 48:1–20) designedly ahead of his brother Manasseh, portending tribal Ephraim's ascendancy.

2 An increasingly prominent Israelite tribe (unit of social organization and the territory it occupied). Joshua 16 and 17:14–18 show Joseph, one tribe and territory, replaced by two: note how Josh. 16:4 shifts abruptly from defining Joseph's territory to defining Ephraim's and then Manasseh's. Josh. 16:5–10 with 17:7–12 gives Ephraim's boundaries from premonarchical times (prior to tenth century B.C.); here Shechem with its fertile vale belonged to Manasseh. Even so, Ephraim's lands had better soil and were more easily protected than were Manasseh's. Probably with the definition of districts under Solomon (1 Kings 4:7–19), Shechem became part of *Mount* Ephraim (RSV: "the hill country of Ephraim"; see Josh. 20:7; 21:15, 20–21). Possibly 1 Chron. 7:28–29 retains an authentic memory of the further expansion of Ephraim. Clearly, by the mid-eighth century B.C., Ephraim could become for Isaiah and Hosea a designation for the whole Northern Kingdom; in Isaiah, it is allied with Syria in the "Syro-Ephraimite war" (Isa. 7:1–17; cf. 2 Kings 16:5–9), and throughout Hosea it is the disloyal covenant partner of God (Hos. 5:3–14). Ephraim's immensely important role in Israel was partially veiled by the Jerusalem focus of our sources, but a large number of indicators point to it: Bethel, Shiloh, and at some point Shechem, all ancient worship centers, were in Ephraim. Joshua was an Ephraimite (Num. 13:8; cf. Deut. 34:9); he and Eleazar, who allotted the land (Num. 34:17; Josh. 14:1), were buried in Ephraimite towns (Josh. 24:29, 33). Samuel (1 Sam. 1:1) was an Ephraimite, as was Jeroboam (1 Kings 11:26), men who embodied the northern attitude toward monarchy, which urged its severe limitation in view of God's identification as Israel's true king. The "judges" Tola, Abdon, and Deborah were all connected to Ephraim (Judg. 4:5; 10:1; 12:15).

3 A town in 2 Sam. 13:23 where Absalom avenged Tamar upon Amnon. It was most likely located near Bethel in Ephraimite territory (see also John 11:54; 1 Macc. 11:34) but may have derived its name simply from being a "fruitful place." Similarly, the forest of Ephraim, in Transjordan near Mahanaim, where Absalom met his death, may be so named because of its fruitfulness; otherwise it may be evidence along with Judg. 12:4 (a difficult verse) that Ephraimites controlled this portion of Manasseh's eastern holdings at some time. ***See also*** Abdon; Absalom; Bethel; Deborah; Hosea, The Book of; Isaiah, The Book of; Jeroboam I; Joseph; Joshua; Mahanaim; Manasseh; Samuel; Shechem; Shiloh; Tola; Tribes, The.

E.F.C.

Ephraimite (ee´fray-uh-m*i*t), the term for a person of the tribe of Ephraim (translating Heb. *'eprātî*, in Judg. 12:5; 1 Sam. 1:1; and 1 Kings 11:26, which is elsewhere translated "Ephrathite").

Ephrath (ef´rath). **1** A place on the way to which Rachel was buried (Gen. 35:16). It was located in the territory of Benjamin (1 Sam. 10:2) near Ramah (Jer. 31:15), and thus it was not Bethlehem. **2** A place identified with Bethlehem (Gen. 35:19; 48:7) and spelled Ephrathah in Ruth 4:11; Ps. 132:6; and Mic. 5:1. **3** The wife of Caleb (1 Chron. 2:9) spelled with feminine ending in 1 Chron. 2:50 and 4:4. **4** A Hebrew word the adjectival form of which, Ephrathite (1 Sam. 17:12), also designates an Ephraimite (Judg. 12:5; 1 Sam. 1:1; 1 Kings 11:26).

Ephrathah (ef´ruh-thuh; Heb., "fertility"). **1** The wife of Caleb, a descendant of Judah; the mother of Hur, the ancestor of Bethlehem, Kiriath-jearim, and Beth-gader (1 Chron. 2:50; 4:4). She is also called Ephrath (1 Chron. 2:19). **2** Another name for Bethlehem or the area immediately surrounding it (Ruth 4:11; Mic. 5:2). Jesse, David's father, is called an Ephrathite of Bethlehem (1 Sam. 17:12) as are Naomi's sons (Ruth 1:2). There seems to be some relationship between the persons in the genealogical lists (see 1 above) and the name of Ephrathah applied to the area of Bethlehem, although the exact nature of that relationship is not evident. The families could have given their names to various sites or the clans could have taken their names from the localities since some of the sites predate Israelite settlement. Some scholars suggest that the genealogies were composed to account for the place names. The identity of Ephrathah in Ps. 132:6 is uncertain. Some

scholars understand "field of Jaar" to be Kiriath-jearim west of Jerusalem on the border between Judah and Benjamin. Ephrathah would then refer to the district around it, perhaps including the area around Bethlehem some ten miles to the southeast. Other scholars simply equate Ephrathah here with Bethlehem. ***See also*** Bethlehem; Ephrath; Kiriath-jearim. D.R.B.

Ephron (ee´fron). **1** A Hittite, the son of Zohar, who sold Abraham the cave of Machpelah as a burial place for Sarah (Gen. 23; 25:9; 49:30–31; 50:13). **2** A city near Bethel mentioned in 2 Chron. 13:19. The place is not mentioned elsewhere, and there have been various attempts to correct the text. The Masoretic Text (MT) with the vowels "Ephrain" and others take it to be the Ophrah of Benjamin mentioned in Josh. 18:23. **3** A major fortified city east of the Jordan between Karnaim and Beth-shean, captured by Judas Maccabeus (1 Macc. 5:45–51; 2 Macc. 12:27–28; Josephus *Antiquities* 12.8.5). **4** Mount Ephron, a hill on the Judean boundary (Josh. 15:9; cf. Josh. 18:15 RSV). ***See also*** Hittites; Machpelah. G.M.T.

Epicureans (ep´i-ky*oo*-ree´uhnz), followers of the philosopher Epicurus (342–270 B.C.). Members of the Epicurean school of philosophy established in Athens are mentioned in Acts 17:18. Epicurean teaching was expounded in a lengthy poem by the first-century B.C. Latin writer Lucretius. Epicureans were often attacked as atheists, since they held that sense perception was the only basis for knowledge. Everything had come into being out of atoms and the void. A random "swerve" in the path of the atoms caused the world to come into being and provided the material basis for free will, since no god had created or ruled over human beings, according to the Epicureans.

Epicureans argued against fear of death, since in their view death was merely the dissolution of the atoms entangled to make up the human, and against fear of the gods, who would enjoy their own blessedness without troublesome concern for human affairs. Free from these fears, they counseled, one should seek to live a peaceful life in which the body is free from pain and the mind peaceful and undisturbed. Consequently, one should choose a private life, pursuing this ideal in the pleasant company of friends. Some Epicurean philosophers in Athens discussed Paul's religious beliefs with him (Acts 17:18). P.P.

Epiphany (i-pif´uh-nee), or the manifestation of Christ to the world (January 6), a Christian observance originally commemorating Jesus' baptism (Mark 1:9) and his changing water into wine at Cana (John 2:1–11). Later, the visit of the Magi (Matt. 2:1–12) from Christmas was added. ***See also*** Christmas.

epistle, written communication, letter. The English word is derived from the Greek *epistolē*, a common word in the NT world for all kinds of letters. In modern times, the German biblical scholar Adolf Deissmann (1866–1937) distinguished between the letter and the epistle. He suggested that the letter was unliterary and intended only for the person(s) to whom it was addressed. Because it was personal and transitory, it was a "real" letter. By contrast, the epistle was literary and intended for circulation or publication. The epistle was both more impersonal and permanent and the most essential features of the "real" letter, its address and its confidential/spontaneous message, were only a stylistic device in the epistle.

Though Deissmann's use of the term "epistle" is useful in identifying writings that are in the form of a letter but that are actually intended for a broader public, a genuine letter is not to be determined merely by whether it is unliterary or transient. Personal letters were often written by masters of style. In fact, the more unpracticed and hurried the letter, the more likely it is that it will be dependent on conventions and be impersonal.

In the NT, all of the undisputed Letters of Paul (Rom., 1, 2 Cor., Gal., Phil., 1 Thess., Philem.), as well as 2 and 3 John, are genuine letters in Deissmann's sense: they are personal and are actually intended for the recipients identified in the opening address. However, this does not mean that they are written in an unliterary manner. Most, if not all, of the remaining NT documents that are in letter form are to be classified as epistles, often belonging more to the classification of sermon or theological essay than to letter. Thus, Hebrews and 1 John are sermons; James is a treatise on moral teaching and wisdom; 1 Timothy and Titus contain a body of instructions on church offices; 2 Timothy and 2 Peter are literary testaments. ***See also*** Letter; Salutations. J.L.W.

Epistles, Pastoral. ***See*** Timothy, The First and Second Letters of Paul to, and Titus, The Letter of Paul to.

Erastus (i-ras´tuhs), a common name (Gk., "beloved") designating one or more men associated with Paul. **1** City treasurer (superintendent of public works?), probably of Corinth, among Paul's "fellow workers" sending greetings (Rom. 16:23). **2** Paul's colleague sent with Timothy from Ephesus into Macedonia (Acts 19:22). **3** An associate who remained in Corinth (2 Tim. 4:20).

Erech (ee´rik; Akkadian *Uruk;* Gk. *Orchoi*), the ancient name of a southern Babylonian city situated near the Euphrates River, now known as Warka. Shortly after its founding in the fourth

millennium B.C., it covered approximately two hundred acres. German archaeologists have been excavating Warka since 1912.

The first evidence of pictographic writing and numerical notation on clay tablets appears at Uruk around 3100 B.C., lending support to mythological speculation that the place to which the goddess Inanna brought the arts of civilization is in fact Uruk.

Holy to Inanna and to Anu, head of the Sumerian pantheon, Uruk housed two major temple complexes. Eanna, Inanna's temple, preserves eighteen archaic levels. The "White Temple" of Anu is the best example of the Sumerian "high temple." The Uruk Vase depicts components of the Sumerian cultic practices. Uruk housed an important cuneiform scribal school and astronomical observatory until the last century of the first millennium B.C.

The Table of Nations in Gen. 10 includes Erech in the kingdom of Nimrod. Ezra 4:9 mentions Ashurbanipal's seventh-century deportation of Uruk citizens to Samaria. L.E.P.

Esaias (i-zay'yuhs). ***See*** Isaiah, The Book of.

Esarhaddon (ee'suhr-had'uhn; Assyrian *Assur-aha-iddina*), king of Assyria, 681–669 B.C. Esarhaddon came to the throne after the murder of his father Sennacherib by his brothers. He was not an accomplice to the murder. Still, he seems to have reverted to earlier imperial policy as regards the management of the Assyrian Empire. He rebuilt Babylon and became king of Babylonia; he defended the northern borders against Cimmerian and Scythian incursions; he reasserted and strengthened imperial control, especially in the west, in part for the purposes of controlling mercantile centers (e.g., Phoenicia), and expanded the borders of the empire into Egypt. Some of the cultural and religious policies of King Manasseh of Judah (2 Kings 21:1–18) may have been due to the constant presence of, and Manasseh's involvement with, Assyrians in the west, although the Assyrians did not require vassals to accept Assyrian religious practices. In Esarhaddon's reign, diviners and exorcists exercised particular influence in the royal court—their activities are known from a large body of correspondence—in part perhaps because of the king's chronic ailments. It is likely that he suffered from a skin disease, systemic lupus erythematosus. His health was failing especially during the last years of his reign, and most of the letters date to the last three or four years of the reign (the numerous letters are a rich source of information on Mesopotamian religion and medicine). At the beginning of this period (672), Esarhaddon established the succession: Ashurbanipal was to be king of Assyria, and Shamashshumukin, king of Babylonia. A treaty binding governors and vassals to abide by and support the succession was drawn up. The vassal treaties show points of similarity to Deuteronomy and have contributed to its understanding. ***See also*** Manasseh. I.T.A.

Esau (ee'saw), the older son of Isaac and Rebekah (Gen. 25–36). As such, he was entitled to the primary blessing and birthright of his family. He forfeited both, either because of his own foolishness (25:27–34) or by Jacob's trickery (27:1–45). He was the rejected son displaced by the younger Jacob, who became the bearer of the promise. Esau is portrayed as a gracious older brother (33:1–17) and the tradition continues to have a positive regard for him (36). Some have argued that he is to be understood as a folk figure in tradition stories, i.e., a literary construct.

In the ongoing Hebrew tradition, Esau was linked to the territory of Edom, Israel's rival and threat for territory (Deut. 2:4–29; Jer. 49:8–10; Obad. 6–21). Through this linkage Esau, the folk hero, became the focus of great hostility, an attitude absent from the original Genesis narrative, and was enmeshed in a deep political conflict. Esau's portrait in the later tradition is rooted in the Genesis narrative but is handled with great imagination. Esau is also mentioned in two NT writings, once in a favorable context (Heb. 11:20), twice in an unfavorable one (Rom. 9:13; 12:16). ***See also*** Edom; Jacob. W.B.

eschatology (es'kuh-tol'uh-jee), beliefs or teaching about last (Gk. *eschatos*) things. Biblical, intertestamental, and rabbinic writings often distinguish between the present age or aeon, the period of history in which life is being lived, and the future, coming age, or period of transformed existence that God will bring at the end of history. The latter age or aeon is sometimes also referred to as the age to come or coming age, the kingdom of God, the new world, or the new or messianic age. In this context, the term "eschatology" is inherently ambiguous, since it may refer to teachings either about events expected to take place during the last days of the present age or about occurrences anticipated at the beginning of or during the age to come.

Old Testament: In early biblical times, it was popularly believed that on "the day of Yahweh" (or "the day of the LORD"), God (or Yahweh) would deliver his people by overthrowing their enemies (Amos 5:18–20). Some later OT texts likewise give expression to the hope that, on "the day of Yahweh," he will bring judgment against other nations for their offenses (e.g., Isa. 13:1–19:17; Jer. 46–51; Ezek. 25–32; Obad.; Zeph. 2:4–15). Generally, the implication is that after "the day of Yahweh" these nations will never again cause Israel or Judah grief. Most of the OT prophets warned their contemporary Israelites (or Judahites) that Yahweh would bring disasters upon them because they had violated the covenant relationship he had established with them. Such violations consisted of wor-

shiping other deities, failing to practice justice and mercy, or otherwise neglecting to observe Yahweh's commandments or "walk" according to his "ways" (e.g., Jer. 2–8; Hos. 4–10; Amos 4–8; Mic. 1–7).

Most of the prophets also promised that Yahweh would make a new beginning or establish a new covenant with his people. In many texts, such promises give expression to the hope that Yahweh will radically transform the conditions of historical existence, bringing about, in effect, the new or messianic age (e.g., Isa. 2:2–4; 11; 35; Jer. 31:1–37; Ezek. 16:53–63; Hos. 2:14–23). These texts often look for the appearance of David, or one of his descendants, who will rule over the newly transformed world on Yahweh's behalf (e.g., Isa. 11:1–5; Jer. 30:9; Ezek. 37:24–25; Zech. 3:8; 9:9). Other texts describe transformed conditions, but without mentioning any Davidic or other human king (e.g., Isa. 2:2–4; Jer. 31:1–37; Zech. 14:1–21). Likewise, prophetic texts that promise such a new future for Israel, Judah, or the whole world characteristically refer to "the day of Yahweh." A few prophetic visions look for the creation of a "new heaven" and a "new earth" (Isa. 65:17; 66:22).

Among the other "eschatological" events that would mark the beginning of, or life in, this new age were the return of Elijah, the preaching of repentance (Mal. 4:5–6; Ecclus. 48:1–10); certain cosmic signs or phenomena (Joel 2:30–32); the reunification of Israel and Judah (Ezek. 37:15–22); the establishment of a new covenant (Jer. 31:31–34; Ezek. 11:19–20; 34:25–31; Hos. 2:18–23); peace among all nations (Isa. 2:2–4; Mic. 4:1–4), whose people, in some visions, would join in honoring and worshiping Yahweh (e.g., Isa. 2:2–3; 19:23–25; 66:18–19; 23; Zech. 14:16–19; Tob. 13:11). Some prophets also looked for the new age as a time of peace and harmony among all creatures, human and animal alike (e.g., Isa. 11:6–9; 65:25; Hos. 2:18). It would be a time when the earth would yield preternatural crops of grain and fruit—perhaps signifying that the ground was no longer "cursed" because of human depravity (Isa. 25:6; Ezek. 47:6–12; Joel 2:21–26; 3:18; Amos 9:13; cf. Gen. 3:17–19; 4:12). Some texts visualize the new age as one where Israel or the Jewish people will rule over other nations, or even where other nations will no longer exist (e.g., Joel 3:19–21; Obad.; Zeph. 2:4–15). And a few passages in Ezekiel anticipate that wild beasts that threaten human life will be removed (Ezek. 34:25–28). Ezekiel and two postexilic prophets picture a magnificent new temple at the center of the transformed, messianic world (Ezek. 40–48; Hag.; Zech. 1–8).

OT Apocrypha and Pseudepigrapha: Additional eschatological themes begin to appear in the apocryphal (deuterocanonical) writings as well as in the Pseudepigrapha and the Dead Sea Scrolls. Some may derive from Zoroastrian or Persian religious beliefs. Thus, we find references to holy angels or "watchers" who function as divine emissaries or viceroys (e.g., Dan. 10:13–14; Tob. 12:15), and also to Belial (or Beliar), the devil, Satan, demons, or other evil, cosmic, quasi-supernatural beings bent upon causing harm (e.g., Tob. 3:7–8; Wisd. of Sol. 2:24; *Jub.* 10:5–9; *1 Enoch* 15:11–16:1). At some point in the future, God and his angels will fight it out with these evil powers and, after a time of terrible tribulation, prevail over them (Rest of Esther 11:5–9; Qumran *War Scroll*; 2 Esd. 13:31–34; cf. Ezek. 38:1–39:20; Dan. 12:1; Joel 3:9–15). There will be a day of judgment, and then God's reign will be established forever on earth as well as in heaven. Jerusalem will be besplendored with jewels (Tob. 13:16–18). The righteous will enjoy abundant food and drink—sometimes characterized by interpreters as "the messianic banquet" (e.g., *2 Enoch* 8; *2 Bar.* 29:3–8). But the wicked will be condemned to eternal torment or even extinction (e.g., Jth. 16:17; *1 Enoch* 103:7–8; 2 Esd. 7:61; cf. Isa. 66:24). Some of these motifs or expectations also appear in the background in many early Christian texts.

New Testament: The term "eschatology" is used by NT scholars in a variety of ways, sometimes simply as a synonym for "kingdom of God" but also to refer to some or all of a wide range of "eschatological" phenomena or events, first, that were expected to mark the last days of the present age; second, that were anticipated in connection with the transition between the present age and the coming age; and third, that were visualized as aspects of life in the future kingdom of God. Interpreters sometimes neglect to distinguish carefully among these meanings.

Synoptic Gospels: Controversy among NT scholars since Johannes Weiss and Albert Schweitzer has focused principally on Jesus' teaching or preaching regarding the kingdom of God. Weiss and Schweitzer highlighted such texts as Matt. 4:17; 6:10; 10:5–23; 16:27–28; Mark 1:14–15; 9:1; 15:43; Luke 9:26–27; 10:1–12; 11:2; 21:31–32. They proposed that such synoptic texts show that Jesus expected the kingdom of God to come in the then near future, thereby radically transforming the conditions of existence. Many European NT scholars such as Rudolf Bultmann, Martin Dibelius, and Maurice Goguel concurred in this judgment. In response, C. H. Dodd and J. A. T. Robinson contended that Jesus regarded the kingdom of God and attendant eschatological phenomena as essentially present, "realized" or actualized in the form of his own person or ministry. Dodd read many of Jesus' parables to this effect. Other texts sometimes interpreted to mean that the kingdom of God was already present include Matt. 11:11–22; 12:28; Luke 11:20; 17:20–21. Recent European and most Anglo-Saxon scholars have tended to affirm both that Jesus believed the kingdom to be in some sense

already present and, at the same time, that he expected it to come in the future. Some of these scholars urge that Jesus thought of the kingdom of God as "dawning" or "breaking in." The expression "eschatology-in-the-process-of-realization" is sometimes used in this connection.

Sayings that look for the future coming or appearance of the Son of man were another focal point for controversy (e.g., Matt. 19:28; 25:31; Mark 8:38; 13:24–27; 14:62 [Matt. 26:64; Luke 22:69]; Luke 12:8). Some texts appear to link the coming of the Son of man with that of the kingdom of God (e.g., Matt. 16:24–28 [Mark 8:38–9:1; Luke 9:23–27]; Matt. 19:16–30; Luke 17:20–24; 21:25–32). Several scholars suggest that all sayings that speak of the future appearance of the Son of man (as well as some or all of the future kingdom passages) should be regarded as secondary additions, rather than authentic sayings of Jesus (Schweitzer characterized such proposals as "the literary solution to the problem of eschatology"). Other interpreters propose that Jesus' futuristic eschatological sayings should be read as symbols for ineffable or transcendent realities either in human experience or beyond space and time. Interpreters often imply that Jesus' futuristic expectations were or are unimportant.

In the synoptic Gospels, it is clear that some eschatological expectations remained to be fulfilled. The world had not yet been transformed. Rome still ruled the world, and Satan and his minions, the demons, or evil spirits, still sought to do harm. The anticipated final tribulation had not yet occurred (Matt. 6:13; Mark 13:19; 14:38). The resurrection of the dead of previous generations was still to come (Matt. 12:41–42; Luke 11:30–32). The judgment had not yet taken place (Matt. 11:21–24 [Luke 10:13–15]; Matt. 12:38–42 [Luke 11:29–32]; Matt. 25:31–46; Mark 9:43–48). When it does, the righteous will be invited to enter or "inherit" the kingdom of God, while the wicked will be forever condemned to exclusion from it (Matt. 25:46; Mark 9:43–49). In the kingdom, the righteous will gather at table, eating and drinking together, and otherwise enjoy the life of transformed existence in the "new world" (Matt. 8:11–12; 26:29; Luke 13:28–29; 22:28–30).

It also appears that Jesus and/or the Gospel writers believed that some eschatological events had already occurred. John the Baptist had come, in the role of Elijah, the final prophet and preacher of repentance before "the great and terrible day of the LORD" (Matt. 11:2–15; 17:10–13; Mark 9:9–13; cf. Mal. 4:5–6). Jesus and his followers were exorcising or casting out demons and healing the sick, thereby, perhaps, overcoming the power of the Evil One in preparation for the arrival of the kingdom, as well as preparing those formerly afflicted for entry into it. Already, the good news of the kingdom was being preached. And, if Jesus himself was to be the designated Messiah in that new age, he, at any rate, was already present. It is not certain, however, that either Jesus or any of the synoptic Evangelists understood that the kingdom of God itself was already present. All three synoptic Gospels contain texts indicating that Jesus expected it to arrive in the near future, and that their readers should do likewise.

Eschatology and Ethics: If Jesus expected the kingdom of God to come during his lifetime or shortly thereafter, how can his ethics be relevant for latter-day followers? Though characterizing Jesus' teaching as an "ethic for the interim" remaining before the coming of the kingdom, Schweitzer insisted that Jesus and his sayings remain relevant for all times. Adolf von Harnack thought it possible to extract "the kernel" of Jesus' ethical teachings from "the husk" of Jewish eschatological dogma. Likewise, Bultmann undertook to recover the existentially relevant core of Jesus' ethical proclamation through "demythologizing." Amos Wilder proposed to distinguish between Jesus' eschatological teachings and his noneschatological and therefore still meaningful wisdom sayings. Many commentators appeared to believe that Jesus' ethics could be relevant for later times only if he himself thought the kingdom (and all related eschatological phenomena) somehow already present.

Pauline Eschatology: Paul affirmed that those "in Christ" were already experiencing "a new creation" that had begun with Jesus' death and resurrection (2 Cor. 5:17; Gal. 6:15). At the same time, the coming, or parousia, of Jesus as Christ or Lord had yet to happen (1 Cor. 4:5; Phil. 3:20–21; 4:5; 1 Thess. 2:19; cf. 2 Thess. 2:1–4). Then, the dead (in Christ), those who had "fallen asleep," would be raised, those still alive (including, Paul thought, himself) would be "changed" or transformed "in the twinkling of an eye," and all would join together "in the air," or heavenly commonwealth, to enjoy a spiritual existence apparently forevermore (1 Cor. 15:35–55; Phil. 3:20–21; 1 Thess 4:13–18; cf. 2 Tim. 4:18). In the meantime, however, the faithful should live "according to the Spirit," that is, rightly, in relation to one another, for only those who did so would "inherit the kingdom of God" (1 Cor. 6:9–10; Gal. 5:13–6:10; cf. Rom. 13:8–14; 14:10–12; 1 Thess. 5:1–24).

Other NT Writings: Most of the other NT writers indicate that, in their view, critical future eschatological events are yet to occur (e.g., John 5:28–29; 12:48; Acts 17:30–31; Eph. 5:3–16; Col. 3:1–25; 2 Thess. 1:5–10; 1 Tim. 6:11–16; 2 Pet. 3:11–13; Jude 17–21; Rev. 12:1–12). These writers generally urge their contemporary readers to be prepared, morally and otherwise, for the pending eschatological or parousia events (e.g., Acts 3:19–21; James 5:7–9; 1 Pet. 4:7–17; 2 Pet. 3:9–18; 1 John 2:18–29; Rev. 1:3; 22:10–15). Instead of looking for the coming of the kingdom, these writings typically look for the com-

ing of Jesus as Lord or Savior (e.g., 1 Tim. 4:13; Titus 2:13; 1 John 2:28). Thus, the early Christians prayed not so much "Thy Kingdom come!" as "Our Lord come!" (1 Cor. 16:22; Rev. 22:20). Two later NT writings expected the creation of "new heavens" and a "new earth" in place of the old (2 Pet. 3:10–13; Rev. 21:1). The Fourth Gospel emphasizes more the presence or fulfillment of some eschatological hopes, either in Jesus or in the experience of those who believe in him, most notably, eternal life and a preliminary, existential judgment (e.g., John 3:36; 5:24).

Many NT writers urged readers to look for Jesus' coming "soon" or within their own lifetimes (cf. John 21:20–23). At the same time, the later NT writings often indicate that the earlier "ethics for the interim" have been adjusted in view of the fact that the kingdom of God has not yet come. Thus, marriage was now not only permissible but favored (John 2:1–11; 1 Tim. 3:1–5; 4:1–3; cf. 1 Cor. 7:25–28). Rather than sell all and give to the poor, it was enough for latter-day Christians to practice charity and provide hospitality to passing strangers (1 Tim. 6:17–19; 3 John 5–8; cf. Mark 10:23–25 [Matt. 19:23–24; Luke 18:24–25]; Luke 12:33; 14:33). Implicitly, the late first- and early second-century churches were beginning to accommodate to the prospect that life in the old world might continue a while longer. ***See also*** Apocalyptic Literature; Devil; Eternal Life; Heaven; Hell; Judgment, Day of; Jesus Christ; Kingdom of God; Messiah; Millennium; Parousia; Prophet; Resurrection; Satan; Son of God; Son of Man.

Esdraelon (ez´druh-ee'luhn; Gk. for "Jezreel"), the western section of the valleys and plains that separate Galilee from Samaria. The smaller eastern section is the Valley of Jezreel; sometimes this name is used for the whole area. Esdraelon itself is not mentioned in the OT, but includes the Plain of Megiddo, stretching along the northern slopes of Mt. Carmel to the Plain of Acco, to En-gammin (modern Jenin) on the south, and northeast to the slopes of Mt. Tabor. The river Kishon wanders through the plain and alluvium has left the valley rich and fertile.

Roads north and south, east and west pass through the plain. The "Way of the Sea" (Isa. 9:1) connecting Egypt with the north led from the Philistine coast through the Carmel pass at Megiddo, then either crossed the Esdraelon plain northwest around Mt. Tabor to Hazor and on to Damascus, or led between Moreh and Mt. Gilboa descending the Valley of Jezreel to Beth-shan, crossing the Jordan and then northward to Damascus. To the northwest one could reach the Plain of Acco, and traveling south through Ibleam enter the Dothan Plain, then go into the hills of Samaria or west to the Plain of Sharon.

The strategic site during OT times was Megiddo, guarding the Carmel pass. It was controlled by the Canaanites probably until the time of David (Judg. 1:27), but Taanach and the river Kishon were the scene of Deborah's victory (Judg. 4:7; 5:19). ***See also*** Acco; Carmel; Deborah; Ibleam; Jezreel; Kishon; Megiddo; Taanach; Tabor. N.L.L.

Esdras (ez´druhs), **the First Book of,** an alternative version of 2 Chron. 35:1–36:23, all of Ezra, and Neh. 7:38–8:12. It is included in the Septuagint (LXX), the Greek version of the OT in use in the early church. The LXX also includes the primary translation of the works of the Chronicler (1 and 2 Chronicles, Ezra, and Nehemiah). The book is called 3 Esdras in the Vulgate. Since the sixteenth century, it sometimes appears in Catholic Bibles with 2 Esdras and the Prayer of Manasseh in an appendix following the NT. Protestants treat it as one of the Apocrypha.

The work is either the remnant of a distinct Greek translation of Chronicles, Ezra, and Nehemiah or a selection of parts of these books edited and translated into Greek sometime late in the second century B.C. Its Greek reflects greater freedom and style than that of the more extensive version of Chronicles, Ezra, and Nehemiah in the LXX. Along with the Rest of Esther and the additions to Daniel, the existence of 1

OUTLINE OF CONTENTS

The First Book of Esdras

I. Josiah's Passover and the account of his death (1:1–33; cf. 2 Chron. 35:1–27)
II. The fall of Jerusalem (1:34–58; cf. 2 Chron. 36:1–21)
III. Cyrus the Great's edict permitting Jews to return and restore the Temple (2:1–30; cf. Ezra 1:1–11; 4:7–24)
IV. The contest of the three bodyguards in the court of Darius (3:1–5:6)
V. Lists of the exiles returning under Zerubbabel and their efforts to reconstruct the Temple (5:7–73; cf. Ezra 2:1–70; 3:1–5:5)
VI. The completion of the Temple under Haggai and Zechariah (6:1–7:15; cf. Ezra 4:24–6:22)
VII. Ezra's reforms (8:1–9:55; cf. Ezra 7:1–10:44 and Neh. 7:73–8:12)

Esdras suggests that the format and content of some of the latest books in the OT were still in flux in the second and first centuries B.C.

What the purpose of 1 Esdras was is not certain, although concentration on the Temple, its worship, and leaders who reformed or restored its worship suggests that it may have been intended to make a statement of some sort concerning the Temple cult or its leadership. The book begins with the Passover celebrated at the culmination of Josiah's reform of the Temple (ca. 621 B.C.), then moves swiftly to the restoration of the Temple and its worship under Jeshua and Zerubbabel (516 B.C.), and concludes with Ezra's reform a generation or so later. It builds up the role of Zerubbabel at the expense of Sheshbazzar, the leader of the first group of returned exiles in 538 B.C., and minimizes that of Nehemiah in relation to Ezra, whom it calls the "high priest" (1 Esd. 9:40, 49). Unique to the OT is its fanciful account of the three bodyguards in the court of Darius (1 Esd. 3:1–5:6), an account told in order to honor the wisdom of Zerubbabel and to explain how Darius came to commission him to return to Jerusalem and restore the Temple. The history of the restoration is confused in 1 Esdras, although the first-century A.D. Jewish historian Josephus used this book as his primary source for the period when he wrote his *Antiquities*. ***See also*** Apocrypha, Old Testament; Exile; Josephus; Septuagint; Temple, The.

D.W.S.

Esdras, the Second Book of, a Jewish apocalypse dating from the very end of the first century A.D. The material was written under the pseudonym of Ezra in order to use the conquest of Jerusalem by the Babylonians a century prior to Ezra as a means of reflecting upon the intense suffering occasioned by the destruction of Jerusalem by Rome in A.D. 70. The work is at times designated 4 Esdras or 4 Ezra (chaps. 3–14). It is included among the Apocrypha by Protestants and is sometimes printed by Catholics along with 1 Esdras and the Prayer of Manasseh in an appendix following the NT. The original language was probably Hebrew, which was then translated into Greek. Neither the Hebrew nor the Greek is extant, but the book survives in a number of versions made from the Greek, including Latin, Syriac, Ethiopic, and Armenian. Chaps. 1–2 and 15–16 represent Christian additions to the original Jewish apocalypse and are occasionally designated 5 and 6 Ezra, respectively.

The apocalypse in chaps. 3–14 is divided into seven visions, some of which contain dialogues between Ezra and the angel Uriel concerning God's justice in permitting his chosen people to suffer at the hands of the unrighteous Babylonians, others of which deal allegorically with history, the sufferings of the present, and the coming of the messianic age. In this they are similar to the visions of Revelation. The seventh vision, chap. 14, parallels Ezra to Moses and has Ezra dictate while in a trance the twenty-four books of the Hebrew Scriptures lost in the burning of Jerusalem. The book thus reflects the Palestinian or rabbinic definition of the canon of Scripture, which implicitly treats Moses and Ezra as the beginning and end of revelation.

While chaps. 3–14 ultimately conclude that the mysteries of sin and suffering are unfathomable, they do develop a theology of history that claims that the whole of the human race from Adam on is sinful, subject to the evil inclination, and therefore deserving God's punishment. After the fashion of the wisdom tradition, various analogies are drawn from nature and human life to deal with the limits of human knowledge and to justify the suffering of the righteous and God's slow pace in setting things right. The goal of history is a four-hundred-year messianic age, following which the messiah will die and all things will be returned to a seven-day primeval silence. Then will come the

OUTLINE OF CONTENTS

The Second Book of Esdras

I. 5 Ezra: an apocalypse of Christian composition concerned with the rejection of Israel and the announcement of the rewards of the coming kingdom to all of the nations (chaps. 1–2)

II. 4 Ezra: a Jewish apocalypse of seven visions (chaps. 3–14)
   - A. Vision 1: a dialogue between Ezra and Uriel concerning God's justice and the seed of evil sown in Adam (3:1–5:20)
   - B. Vision 2: a dialogue concerning the mystery of God's choice of Israel in light of the people's subsequent suffering (5:21–6:34)
   - C. Vision 3: a dialogue concerning creation, the messianic age, and the subsequent judgment (6:35–9:25)
   - D. Vision 4: Ezra encounters Zion as a woman mourning for her dead son (9:26–10:59)
   - E. Vision 5: an allegorical vision of an eagle (cf. Dan. 7:3–8), representing the Roman Empire (chaps. 11–12)
   - F. Vision 6: an allegorical vision of a man from the sea (chap. 13; cf. Dan. 7:13–14)
   - G. Vision 7: the legend of Ezra and the restoration of the Scriptures (chap. 14)

III. 6 Ezra: an apocalypse of Christian origin describing the tribulations of the end of history (chaps. 15–16)

resurrection and last judgment. The sixth vision of the man from the sea in chap. 13 is remarkable in that it is based on Dan. 7:13–14 and thus plays an important role in scholarly discussions of the christological title "Son of man" in the NT. ***See also*** Apocalypse; Apocrypha, Old Testament; Eschatology; Messiah; Pseudonym; Son of Man.

D.W.S.

Eshbaal (esh-bay´uhl). ***See*** Ishbosheth.

Eshcol (esh´kol; Heb., "cluster"). **1** The name of the valley near Hebron, in south-central Judea, from which spies sent by Moses brought back on a pole a cluster of grapes and some pomegranates and figs (Num. 13:23–24). Although this fruit indicated a good land, their report of giants discouraged the people of Israel from entering the land (Num. 32:9). **2** The brother of Mamre and Aner, Amorite allies of Abram, who helped the patriarch rescue Lot (Gen. 14:13, 24). ***See also*** Mamre.

Eshtaol (esh´tay-uhl), a city in the lowlands of Judah counted as belonging to both Judah and Dan (Josh. 15:33; 19:41). It was probably originally occupied by Danites (Judg. 13:25; 18:2–11) and then later occupied by Judah when the Danites were forced to move to the north (Judg. 18:11). Evidence of this is seen in 1 Chron. 2:53 where Eshtaolites are regarded as descendants of Judah. It is also possible that the camp of Dan at Kiriath-jearim (Judg. 18:12) led to a mixing of the two tribes in this region. Eshtaol is tentatively located near modern Ishwa, about fourteen miles west of Jerusalem and about six miles slightly southwest of Kiriath-jearim.

D.R.B.

Eshtemoa (esh´tuh-moh´uh). **1** A city in the hill country of Judah that was given to the Levites (Josh. 21:14). David shared his booty with the city following his defeat of the Amalekites (1 Sam. 30:28). It is also called Eshtemoh (Josh. 15:50) and is tentatively identified as modern es-Samu, about ten miles south and slightly east of Hebron. **2** A son of Ishbah, descendant of Simeon (1 Chron. 4:17). It is not clear whether Eshtemoa the Maacathite (4:19) is the same person or of a different family since the text is disordered in these verses.

Essenes (es´eenz), a sect of Judaism from the middle of the second century B.C. until the war with Rome in A.D. 66–70. They are described by the first-century A.D. authors Josephus and Philo and mentioned by some non-Jewish writers. They have been convincingly identified with the inhabitants of Qumran who wrote the Dead Sea Scrolls. The meaning of the Greek name "Essenes" is unclear; it may come from the Aramaic for "pious" or "healers."

Archaeological research at Qumran, data from ancient sources, and cryptic allusions to

Aerial view of Qumran showing cave number four. Qumran is at the northwest edge of the Dead Sea.

the sect's history in its writings suggest that the group, whose members were probably some of the Hasideans who supported the Maccabees, withdrew from Jerusalem and active participation in the Temple because Jonathan Maccabee assumed the high-priesthood in 152 B.C. though he was not from the correct, hereditary priestly family. The group was led by a prominent priest whose identity is hidden behind the designation "Teacher of Righteousness." The community built a complex of buildings on the cliffs around the Dead Sea at Qumran, between Jericho and En-gedi, and went through several stages of development there, including a refounding of the community after an earthquake in 31 B.C. The community was persecuted and attacked by Jonathan Maccabee, survived other pressures, but was finally destroyed by the Romans in A.D. 68. Some Essenes also lived in towns and cities, probably in small communities, and a few are mentioned by name in Josephus as playing a political role.

The Qumran community was sharply divided into hereditary priests and nonpriests. They were ruled by an elaborate hierarchy of officers and councils and guided by a detailed set of rules based on biblical law. Numerous practices were peculiar to this sect. Property was held in common, celibacy was practiced, a high state of ritual purity was maintained, economic and social

relations with nonmembers were greatly restricted, admission to full membership was preceded by three years probation, solemn ritual meals were held regularly, participation in the ritual of the Jerusalem Temple was forbidden for as long as the Temple was improperly run, and detailed rules of behavior supported a rigorous ethic that was sanctioned by judges and punishments, including excommunication. The Essenes who lived outside the Qumran community seem to have married, had private property, and engaged in some social relations with outsiders.

Besides some OT books and other Jewish pseudepigraphical writings the Essenes had their own biblical commentaries, hymns, rules, and apocalyptic writings. Though Josephus compares them to the Greco-Roman Stoics, the Essenes were apocalyptic in their thought and orientation, maintaining ritual purity, ethical probity, and spiritual readiness for the intervention of God to destroy evil. No convincing evidence has been produced to demonstrate any dependence on Essene thought by John the Baptist, Jesus, or other early Christian leaders. The similarities that exist are more likely due to their common Jewish background than to any direct relationship. ***See also*** Qumran, Khirbet; Scrolls, The Dead Sea; Teacher of Righteousness.

A.J.S.

Esther (es'tuhr), the name of a biblical book and its heroine, which is derived from the Persian *stara* ("star") and has its prototype in the name of the Babylonian deity Ishtar. This is typical of the book's and heroine's emersion in the Persian world. The book serves as a festal legend for Purim, the celebration of the deliverance of Jews in the eastern Diaspora from a pogrom. Some suggest the link between book and festival is secondary, the story serving to legitimize a popular festival that originated in Persian New Year celebrations (called Mordecai's Day in 2 Macc. 15:36). The story probably dates from the later Persian period (400–322 B.C.) and the book from the early Hellenistic period (322–200 B.C.).

Form: The story is best described as a novella. Some suggest "historical novella," but while a historical core is possible, the events are not attested to elsewhere and such central figures as Esther, Mordecai, Haman, and Vashti have left no historical trace. Literary perspectives enrich readings of Esther more than concern about historical issues. As a novella it serves to entertain and to show how particular types of humans act and interact in particular situations. It represents a type of narrative popular in the ancient world that told of the adventures of certain figures in royal courts where great power and

OUTLINE OF CONTENTS

The Book of Esther

- I. Introduction to the Persian court and king (1:1–22)
  - A. Ahasuerus's feast (1:1–4)
  - B. The king's second feast and command to Vashti (1:5–11)
  - C. Vashti's refusal and banishment (1:12–22)
- II. Esther becomes Ahasuerus's queen (2:1–23)
  - A. The king searches for Vashti's replacement (2:1–5)
  - B. Mordecai instructs Esther (2:6–11)
  - C. Esther becomes queen (1:12–18)
  - D. Mordecai uncovers a plot against the king (2:19–23)
- III. Elevation of Haman and his plans to destroy the Jews (3:1–15)
  - A. Conflict between Haman and Mordecai (3:1–6).
  - B. Royal approval for and determination of the day for the pogrom (3:7–15)
- IV. Haman's plot is thwarted (4:1–8:2)
  - A. Mordecai stirs Esther to action (4:1–17)
  - B. Esther appears unsummoned before the king and her first soiree (5:1–8)
  - C. Events of a fateful night (5:9–6:14)
    1. Haman's scheme to hang Mordecai (5:9–14)
    2. Royal insomnia (6:1–6)
    3. Advice on how to rectify an oversight (6:7–9)
    4. Mordecai's reward and Haman's shame (6:10–14)
  - D. Esther's second soiree (7:1–8:2)
    1. Haman's plot is revealed to the king (7:1–6)
    2. Haman is hanged (7:7–10)
    3. Mordecai is given Haman's office and estate (8:1–2)
- V. The pogrom is prevented (8:3–10:3)
  - A. An edict allows Jews to defend themselves (8:3–17)
  - B. The Jews are victorious (9:1–15)
  - C. Letters fix the celebration of Purim (9:16–23)
- VI. Summary of a happy resolution (10:1–3)

Events in the story of Esther: Ahasuerus selects Esther, Haman and Mordecai, and Haman hangs from the gallows; nineteenth-century embroidered sheet.

wealth were rewards to be won or lost (cf. the story of Joseph in Gen. and Daniel in Dan. 1–6).

A set of more or less archetypical characters interact within a plot that twists and turns, building and sustaining suspense. Esther (whose Jewish name is Hadassah) first appears quite passive, acted upon rather than acting, and living under the guidance of Mordecai. Yet once she resolves to appear unsummoned before the king, she takes charge as the primary instigator of actions that lead to Haman's fall and the Jews' deliverance. Among the other characters, Haman is perhaps the most villainous figure in the Hebrew Bible. King Ahasuerus is invested with great authority but exercises minimal power, except as he is manipulated by others. Vashti and Zeresh make brief but telling appearances: the former creates an empirewide crisis that results in her banishment and opens the way for Esther to become the Persian queen; the latter announces and underscores Haman's fall.

Playing on a series of repetitions (especially of feasts), the plot builds to a climax through a series of delightful coincidences and juxtapositions. While sometimes condemned as harsh and vengeful, the story is nevertheless artfully told and rarely fails to delight.

The story is laced with irony, as when on the fateful night between Esther's two soirees the king cannot sleep, Mordecai's past service to him is recalled, and failure to reward him is noted. Haman, coming to court for permission to hang Mordecai, is asked to advise on how the king might reward "the man whom the king wishes to honor (6:6)." Haman fatally misreads the situation, and the tables begin to turn on him. The reader delights in the dramatic irony as Haman must lead in honor through the streets of Susa the very man he sought to hang. His fall is soon complete. He is hanged on the immense gallows he erected for Mordecai, and the reader experiences for a time in this story a universe that is ultimately just—a satisfaction real life rarely provides.

Distinctive Aspects: Three aspects of this story call for special attention. First, the protagonist is a woman. Women's roles were quite circumscribed in diaspora Judaism, especially within public spheres. It is striking to find a woman playing the central role in a story of deliverance set in that most public of domains, the royal court with its many intrigues. It is a story told, moreover, within communities of Jews who were themselves often marginalized within the larger world (see also Jth.).

Second, instructions from Torah that define Jewish life, for example in matters of diet, Sabbath, and marriage, are notable in their absence. Esther can keep secret her Jewish identity, and nothing about her or Mordecai's Jewishness inhibits full and effective activity in the Persian court.

Third, God is not directly mentioned in this story of deliverance from danger in an alien context (cf. Exod.). The story is remarkably secular on the surface, even if the "other quarter" mentioned by Mordecai in 4:14 is an oblique reference to the deity. When read within its larger biblical context, however, such hints of providential design might be reinforced.

Greek texts of Esther provide forms of the story that seem to engage these distinctive aspects. Segments of these Greek forms of Esther that are absent in the Esther of the Hebrew and Protestant Christian Bibles are found in the Apocrypha as "Additions to Esther" or "Rest of Esther." They serve to enhance the drama of the story (Esther's appearance unsummoned before the king provokes first rage and then, as she swoons, compassion), to bring it in line with Torah (Esther and Mordecai pray for divine aid and lament that they must violate Jewish practices involving diet and intercourse with pagans), to further villainize Haman (through copies of edicts), and to underscore divine knowledge and control of events (Mordecai has a dream at the outset predicting the course of events and recalls it at the end as he realizes all happened as predicted).

Not only the form of the book to be included in Jewish and Christian canons, but its very place within these collections of Scriptures, was contested. Luther, for example, strongly denounced it; Maimonides, by contrast, placed it just after the Torah in importance. ***See also*** Ahasuerus; Haman; Lot, Lots; Mordecai; Persia.

Esther, the Rest of the Book of, five additions found in the Septuagint (LXX), or Greek, version of Esther but not in the original Hebrew. Jerome, in making his Vulgate translation of Esther, removed all but one of these passages and placed them at the end of the book, so that chapter and verse numbers in modern editions treat them as though they were an ending to Esther.

OUTLINE OF CONTENTS

The Rest of the Book of Esther

The following outline shows the way in which the LXX intersperses the *additions* with the original text of the book (italics indicate additions). The LXX also embellishes the passages it translates from the Hebrew version, adding references to God and altering the plot at several points.

I. *Mordecai's dream* (11:2–12:6)
   A. An apocalyptic vision (11:2–12)
   B. Mordecai foils a plot against the king (12:1–6)
II. Esther 1:1–3:13 (the beginning of the Hebrew version)
III. *Artaxerxes' decree enjoining the persecution of the Jews* (13:1–7)
IV. Esther 3:14–4:17 (part of the Hebrew version)
V. *The prayers of Mordecai and Esther* (13:8–15:16)
   A. Mordecai's prayer (13:8–18)
   B. Esther's prayer (14:1–19)
   C. Esther appears before the king (15:1–16; replaces 5:1–2 in the Hebrew version)
VI. Esther 5:3–8:12 (part of the Hebrew version)
VII. *Artaxerxes' decree rescinding the persecution* (16:1–24)
VIII. Esther 8:13–10:3 (the ending of the Hebrew version)
IX. *Mordecai's dream interpreted* (10:4–11:1)
   A. The apocalyptic vision explained with reference to the story of Esther (10:4–13)
   B. The colophon (11:1)

The purpose of the additions is to give a more specifically religious cast to the book as well as to the festival of Purim associated with it. Since the Hebrew version of Esther never mentions God, its canonical status within Judaism was sometimes a matter of dispute. The additions attribute to God the deliverance of his people through the device of the apocalyptic vision and its interpretation, which now begin and end the book, as well as through the composition of prayers for Mordecai and Esther. Salvation now comes not as a consequence of Esther's courage and beauty, but as a result of her piety, in order to show that God answers prayer and protects his people. The vision draws upon the genre of the apocalypse current in Judaism of the Hellenistic age to suggest that God is in control of history, while the addition of prayers at appropriate places is another device used in the period to expand a text (cf. Jon. 2). The two decrees of Artaxerxes may have been composed in Greek with the intention of adding authenticity to the story. The other passages were probably written first in Hebrew. Along with 1 Esdras and the Additions to Daniel, the Rest of Esther suggests the fluidity of the biblical text within Judaism of the Hellenistic era.

The colophon of the Greek version attributes translation of the book to a certain Lysimachus, apparently a Hellenistic Jew, and suggests that it was brought to Egypt in the fourth year of Ptolemy and Cleopatra (either 114 B.C., 77 B.C., or 44 B.C., depending upon which royal pair is intended) possibly in an effort to introduce Purim to the Alexandrian Jewish community. For Protestants, the Rest of Esther is included among the Apocrypha, isolated from the translation of the Hebrew version. Catholics consider it deuterocanonical and print it either at the end of Esther or, following the order of the LXX, interspersed with the passages of the Hebrew version. ***See also*** Apocrypha, Old Testament; Daniel, The Additions to; Esdras, The First Book of; Esther, The Book of; Purim, The Feast of.

D.W.S.

Etam (ee´tuhm). **1** The place where Samson defeated the Philistines and was subsequently delivered to them by the people of Judah (Judg. 15:8, 11). **2** A village in the territory of Simeon (1 Chron. 4:32), possibly identified with **3** A city near Bethlehem fortified by Rehoboam (2 Chron. 11:6). **4** The Israelites' first desert stop before turning back after they had left Sukkot (Exod. 13:20). It was located on the edge of the wilderness (Num. 33:6).

eternal life, a life uninterrupted by death. It is surprising to learn that in ancient Israel there was no belief in a life after death. Ezekiel 37 speaks of life returning to dry bones, but that should be understood only as a metaphor for the restoration of Israel after the Exile.

The Idea of an Afterlife: The idea of an afterlife or eternal life came late in postexilic times and is attributed to Jewish contact with Persian doctrines. Dan. 12:1–2 is conceded to be the first biblical reference to an afterlife (ca. 175 B.C.); it speaks of a time of terrible persecution of Jews by Antiochus IV Epiphanes who ordered loyal Jews to give up their ancestral faith or face death. He martyred many of them. Their survival of death is announced in Dan. 12 in terms of their resurrection, which is God's radical vindication of his faithful ones. The same historical background illuminates 2 Macc. 7 where the seven brothers die in defense of the Torah, confident that "the King of the universe will raise us up to an everlasting renewal of life, because we have died for his laws" (7:11).

In the Wisdom of Solomon we are told that God created Adam deathless: "God created man for incorruption and made him in the image of his own eternity" (2:23). Death came because of sin: "The day you eat of it you shall die" (Gen. 2:17; 3:19). Yet the Wisdom of Solomon is unusual in Jewish literature for it speaks not of resurrection from death but of the immortality of the soul by which humankind survives after death: "Their hope is full of immortality" (3:4). The wicked would seem to vanish at death, while "the righteous live for ever" (5:15).

Despite Daniel, 2 Maccabees, and the Wisdom of Solomon, however, not all Jews believed in life after death, whether by resurrection or through immortality. In describing the Sadducees and the Pharisees, the Jewish historian Josephus contrasted their views on postmortem existence. The Sadducees did not believe in the afterlife; God does not reward or punish and certainly not in the afterlife. The Pharisees believed in "an immortal soul," and so in an afterlife when God rewards the righteous and punishes the wicked (*Bella Judaica* II.162–166; *Antiquities* XVIII.11–22). Acts 23:6–9 records a dispute between Sadducees and Pharisees over the resurrection (see also Mark 12:18–27). The Sadducean position is not so implausible when one recalls that until Daniel, there was no notion of an afterlife in the Hebrew scriptures. We know, moreover, from the targumic discussions of Gen. 4:8 (see Tgs. Yer. I, II Gen. 4:8), that the issue continued to be debated in Jewish circles.

Eternal Life in Early Christian Preaching: Afterlife and eternal life become an essential part of Christian preaching in virtue of Jesus' resurrection from the dead. That survival of death enjoyed a variety of interpretations: it was the vindication of the Son of man (Mark 14:62), echoing God's vindication of the Maccabean martyrs in Dan. 7; it was a new creation in which the new Adam, who is sinless, is restored to deathlessness (Rom. 5:12–21); and it was a heavenly exaltation, an ascent like that predicted in Ps. 68:18 (see Eph. 4:6–8). NT authors regularly speak of the prophecy of the resurrection in the Scriptures (see Luke 24:44–46), alluding to Psalms 110 and 16 as well as Hos. 6:1–3. But this is surely Christian commentary (midrash) on those texts.

In Christian preaching, Jesus is said to offer his followers eternal life, not just in the future, but now: "he who hears my word . . . has eternal life; he does not come into judgment, but has passed from death to life" (John 5:24). In John, this mode of discourse is related to the claim that Jesus' truth, sacraments, and rites are superior to those of the synagogue: "This is the bread which came down from heaven, not such as the fathers ate and died; he who eats this bread will live for ever" (John 6:58). Thus, Christian baptism allows one to "have eternal life" (John 3:15); unlike Jacob's well, Jesus' waters will become a spring welling up to eternal life (John 4:14); unlike those who ate Moses' manna, those who eat Jesus' bread of life "have eternal life" (John 6:40, 47).

This type of discourse, while understandable in its dialectical context in John, nevertheless led to problems. Some took the preaching literally and considered themselves already beyond death and in the resurrection (see 2 Tim. 2:17–18; perhaps also 1 Cor. 4:8). Some who took this literally were shocked by the death of a beloved disciple such as Lazarus (John 11). These problems led to adjustments in the understanding of eternal life. The importance of present conversion to Jesus' group is still underscored by the assertion that one has passed from death to life (1 Pet. 1:3); but this is balanced with other statements that remind converts that, while there is a realized aspect to this eternal life, it remains a promise to be realized fully in the future. Converts may have crossed from death to life in baptism, but it is also affirmed that Jesus "raises them on the last day" (John 6:40; 11:25). ***See also*** Death; Immortality; Resurrection; Soul.

Etham (ee'thuhm), the first stopping place after Succoth used by the Exodus escapees from Egypt. Its location is not known, but it is said to be "on the edge of the wilderness" (Exod. 13:20; Num. 33:6), and is called an area of wilderness in or near which are located Pi-hahiroth and Baal-zephon (Num. 33:7–8). Recent suggestions include its identity as Pithom, possibly in the Wadi Tumilat lying between the eastern Nile Delta and the Sinai wilderness.

Ethan (ee'thuhn; Heb., "enduring," hence "long-lived"). **1** A wise "Ezrahite" (meaning uncertain), credited with Psalm 89 (see 1 Kings 4:31). **2** Grandson of Judah and Tamar through the line of Perez (1 Chron. 2:6–8). **3** A levitical musician

from the Merarites in the time of David, possibly to be identified with Jeduthun (1 Chron. 15:17, 19; see 16:41–42; 25:1–2). **4** A levitical attendant from the line of Gershom (1 Chron. 6:42).

ethics, human moral conduct according to principles of what is good or right to do. Ethical concerns occupy a central position throughout the Bible with respect to the actions of individuals as well as the whole community. At points this is presented in terms of general and absolute norms (as in the Ten Commandments), and in other places it can be discerned in the actions of people and the customs of the society.

In the OT: It is clear from the OT that the people of Israel faced a full range of moral problems as well as dilemmas in which they had to make moral choices. Marriage and the family form one such sphere of morality, and here the cohesiveness and continuation of this basic unit are the highest values. Israelite society was structured on a patriarchal base, with primary power and legal rights vested in the male as head of the household. This colored marital and familial morality, as is often evident in laws and stories. A woman's legal rights were restricted in areas of property ownership, inheritance (Num. 27:1–11), and oath taking (Num. 30); essentially every female was under the protection and authority of some male, first her father and then later her husband. Divorce could be initiated only by the husband, but the law did attempt to ensure against unjust cause (e.g., Deut. 22:13–21) and required a "bill of divorce" (Deut. 24:1). Children were also under the authority of their parents, especially the father. A harsh law proscribing death for a stubborn child is mentioned in Deut. 21:18–21 (see also Exod. 21:15, 17), although there is no evidence that such a penalty was ever enforced. The fifth commandment (Exod. 20:12) may actually be directed toward adult children, charging them to "honor" their parents by, among other things, caring for them in their old age.

Sexual Ethics. Sexual ethics in the OT is also affected by the patriarchal nature of that ancient society. Sexual license was granted much more to males than to females. Polygyny and concubinage were allowed, and going to prostitutes was apparently condoned for men (e.g., Gen. 38:12–26; Josh. 2), although prostitutes themselves were often stigmatized and prostitution became a prophetic metaphor for apostasy (Hos. 1–3; Ezek. 16; 23). Adultery, which in the OT refers to intercourse between a married or betrothed (engaged) woman and any man who is not her husband or her betrothed, is strictly prohibited and punishable by death (Deut. 22:20–27) or ordeal (Num. 5:11–31). However, by no means is the sexual ethics of the OT only negative and restrictive. Gen. 2:24–25 declares the intimate bond between a husband and wife to be completely appropriate and good. The Song of Solomon amounts to a virtual sexual reverie, with the male and the female as equal partners reveling in the delights of each other's bodies.

Justice. Justice is one of the most important aspects of OT ethics. Individuals as well as the society as a whole are expected to act justly, promoting proper relationships within the community (Mic. 6:8; Ps. 112; Job 31). God's great release of the Israelites from slavery in Egypt serves often as the basis for other efforts to overcome oppression and exploitation within the Israelite society. With no catalogue of an individual's inalienable rights, the OT focuses more on the moral responsibility that persons should have for each other. There are persons who are especially vulnerable and defenseless in society, such as the poor, the widow, the orphan, the slave, and the stranger, and protecting them is not just a moral requirement but also a religious duty as a reflection of God's compassion for the world. The problem was especially severe in the eighth century B.C. when the country experienced a fair degree of affluence, and prophets like Amos, Isaiah, and Micah were quick to criticize the wealthy who had no regard for the plight of those suffering economically. God, they maintain, is the guarantor of justice and will intercede on behalf of the poor by punishing the powerful if the community itself does not act morally in correcting the injustice.

OT ethics is thus geared toward creating and maintaining right relationships—in the family, in the larger society, in business dealings, in government, and in other arenas. The covenant between God and Israel is a symbol of proper relations among humans, and because of the covenant God can command the people to practice a life of obedience and responsibility. At the base of this also is a fundamental affirmation of the goodness of life in this world (Gen. 1), a stance that means that it is urgent that persons act morally here and now, making this a just world rather than pinning all hopes on a world to come.

In the NT; Jesus: In OT ethics morality is fundamentally interwoven with religion: that which is good and right to do has been commanded by God. The same is true in the NT. In preaching the coming of the Kingdom of God and the future hope, Jesus also teaches the importance of acting mercifully and responsibly to others in the present. At points it may seem that Jesus is thinking mostly about the future: he makes moral acts a strict requirement for admission to the Kingdom (e.g., Mark 10:24–25; Matt. 25:31–46), threatens persons with the final judgment (Mark 9:42–48; 12:40; Matt. 5:22), and promises final reward to those who act rightly (Mark 10:21; Matt. 6:19–21). However, it is clear from the range of Jesus' teachings that one's primary motivation for morality should be the desire to live in conformity to God's standards, not simply for one's own benefit and not merely in accord with common practices (Matt. 5:43–48).

Jesus' view of the OT law is positive, upholding it generally and departing from it usually only to make it more radical, as in his teachings on murder, adultery, divorce, oath taking, and retaliation (Matt. 5:21–42). Most fundamental in Jesus' ethic is the two-fold love commandment taken from the OT law—to love God and to love one's neighbor (Mark 12:29–31; from Deut. 6:4–5 and Lev. 19:18). With this as the primary principle Jesus proceeds, in his teachings and parables, to indicate concrete ways in which love should affect moral behavior: affirming marriage and discouraging divorce (Mark 10:2–9), granting women equality with men (note the role of women in Jesus' ministry, e.g., Luke 23:55–56), using wealth to benefit the poor (Luke 19:8), caring for anyone in need (the parable of the good Samaritan, which broadens the OT understanding of "neighbor"), loving one's enemies and avoiding violence (Matt. 26:52), giving proper support to the state (Mark 12:13–17), and living a life of service (Luke 22:26–27).

Paul. For Paul the Christ event is fundamental to the Christian ethic in that it has direct implications for the understanding of human nature, the Law, and sin. Paul discusses this with considerable care in Romans 5–8. He maintains that the Christian is transformed by Christ, is free from the Law as a means of salvation, and yet still remains subject to the commandments of God (1 Cor. 7:19). Paul especially emphasizes Jesus' love commandment, "the law of Christ" (Gal. 6:2), as the basis for morality (Rom. 13:8–10; Gal. 5:14). In his letters to the churches Paul often responds to specific problems that must have existed among the early Christians, including relationships between men and women, the use of possessions, the issue of slavery, and the claims of the state. It is also apparent to him that Christians must search in harmony for God's will and for the specific ways to fulfill it (Rom. 15:5–6; Phil. 2:1–4). ***See also*** Ancestor; Covenant; Family, The; Women.

Ethiopia (ee'thee-oh'pee-uh) (or Nubia), the ancient name of the Nile valley region between the first and second cataracts south of Aswan. At the height of Ethiopian power, however, the name denoted an area reaching as far as the junction of the Blue Nile and White Nile at Khartoum (not to be confused with modern Ethiopia, i.e., Abyssinia). The Hebrew term is *Cush,* which the KJV keeps, but some translations use the Greek word *Aithiopia* (for "Cush" in Gen. 2:13, ***see*** Gihon).

For two hundred years, from about 1971 to 1786 B.C., Egyptian control and trading ventures penetrated farther and farther up the Nile but were then forced to withdraw. After expelling the Hyksos invaders (ca. 1550) the Egyptian rulers once more controlled Nubia, but during the period of the Israelite monarchy Nubia became the independent kingdom of Nabatea, which dominated Egypt. The Nubian ruler Taharka (RSV: "Tirhaka"; 690–664 B.C.) appears in both Assyrian and Judean records (Isa. 37:9) as the ally of Hezekiah, despite protestations from the prophet Isaiah (Isa. 18:1–2; 20:1–6). Egypt fell to the Assyrians in 670, but Nubia remained independent until it became part of the Persian Empire in the sixth century B.C. In Acts 8:26–40 the Ethiopian eunuch was probably a high official in the court of "the Candace," i.e., the queen mother. ***See also*** Hezekiah; Hyksos.

D.B.

Ethnarch (eth'nahrk), a title whose Greek etymology ("leader" or "ruler of a people") is clear but whose application and significance in the Hasmonean and Roman periods remain unclear. It occurs only once in the NT (2 Cor. 11:32), where the RSV, TEV, and NIV render it "governor." From other sources, it is known to be a title given to Simon Maccabeus, Hyrcanus II, and Archelaus. Perhaps it was a title given to rulers over their own people (e.g., the Jews) while under the overall rule of a foreign power (e.g., Rome), ranking somewhat lower than "king." ***See also*** Governor; Tetrarch.

Eubulus (y*oo*-by*oo*'luhs), a Christian who, according to 2 Tim. 4:21, was with Paul during one of Paul's imprisonments. ***See also*** Claudia; Linus; Pudens.

Eucharist (y*oo*'kuh-rist). ***See*** Lord's Supper, The.

Eunice (y*oo*'nis), Timothy's mother, who was born Jewish but became a Christian, the wife of a Gentile (Acts 16:1). Influenced by her mother, Lois, Eunice gave Timothy religious instruction (2 Tim. 1:5; 3:14–15), but he was not circumcised until he joined Paul's mission (Acts 16:3; cf. 2 Tim. 3:10–11). ***See also*** Timothy.

eunuch (y*oo*'nuhk), a male who has been castrated. Eunuchs were in demand as guards of royal harems. Consequently, most biblical references to these persons who by accident or design had lost their capacity to procreate come from narratives about the kings and their courts. Although excluded from the sacred assembly (Deut. 23:1), eunuchs often received favorable report (one rescued Jeremiah; cf. the Ethiopian eunuch in Acts 8:27). Becoming a eunuch for religious reasons is mentioned in Matt. 19:12, although the exact meaning of that

verse is unclear. It is probably metaphorical for remaining celibate to serve God better (cf. 1 Cor. 7:32–34).

Euodia (*yoo*-oh´dee-uh; KJV: "Euodias," *yoo*-oh´dee-uhs), a woman in the church at Philippi who was urged by Paul to settle her dispute with Syntyche (Phil. 4:2). The dispute apparently troubled Paul, because, uncharacteristically, he opened the hortatory portion of his letter to the Philippians by referring to it. ***See also*** Philippians, The Letter of Paul to the; Syntyche.

Euodias (*yoo*-oh´dee-uhs). ***See*** Euodia.

Euphrates (*yoo*-fray´teez) **River,** the largest river in western Asia. It was one of four rivers flowing from Eden (Gen. 2:14) in biblical tradition. It served as the northern boundary of Israelite territory under David (2 Sam. 8:3) but was terrain usually under Aramaean control.

The headwaters of the system are two branches that originate in Armenia in eastern Turkey. The western branch (Kara Su) runs first westward from its source in a pond. The eastern branch (Murat Suyu) similarly runs westward, then both join north of Malatiya from which the course runs southeast and southwest into the Syrian plain. The Hellenistic city of Somasata was built near an important ford. Running south, the Euphrates passed Carchemish where Nebuchadnezzar decisively beat the Egyptian-Assyrian alliance in which Neco of Egypt participated (Jer. 46; 2 Kings 24:7). Main tributaries from the north are the Belikh and the Khabur. Farther downstream were Dura-Europos, famous for a synagogue with Hellenistic painted scenes, and Mari, notable for its palace and library of texts. Continuing its southeast course the river divides just above Babylon. It reunites and then joins the Tigris for the last hundred miles before emptying into the Persian Gulf.

The bed of the river ran somewhat higher than that of the Tigris, and this allowed ancient irrigation canals to carry Euphrates water across the land between the two rivers for agriculture and transport. The lower reaches provided some ten thousand square miles of land for such reclamation, allowing the foundations of cities and city-states in what we know as one of the earliest centers of civilization, Sumer. ***See also*** Damascus; Tigris River. R.S.B.

Eurakylon (*yoo*-rahk´i-lon). ***See*** Euroclydon.

Euroclydon (*yoo*-rok´li-don), in the RSV, JB, and NIV (Acts 27:14) "the northeaster," a violent, springtime, northeast wind that blew Paul's ship, en route to Rome, south of Crete. The best manuscripts read *eurakylōn* (from Gk. *euros*, "east wind," and Lat. *aquilo*, "northeast wind").

Eutychus (*yoo*´tuh-kuhs), a youth who dozed during a long discourse by Paul, fell from a third-story window, and was presumed dead; Paul intervened and the youth lived (Acts 20:7–12).

evangelist (Gk., "one who proclaims good news"), a noun occurring only three times in the NT (Acts 21:8; Eph. 4:11; 2 Tim. 4:5); the idea of proclaiming the good news about God's Kingdom and about Jesus the Christ, however, is found throughout the NT writings. The cognate verb, evangelize (lit. "to proclaim good news"), is frequent, as is the Greek noun translated "gospel" or "good news," which comes directly into English as "evangel." In the earliest days of the church, the work of evangelism, that is, proclaiming the Christian gospel to those who had not heard, was carried out by the apostles and others (Philip is specifically labeled an evangelist in Acts 21:8). Later, as the church grew and spread and as time passed, "evangelist" came to designate a specific office (cf. Eph. 4:11).

By the third century, the authors of the four canonical Gospels ("evangels") had come to be known as "Evangelists." Earlier, an identification was made between the Gospels and their authors, and the four living creatures of Rev. 4:7 (an identification not intended, however, by the author of Revelation). On that basis, the lion came to symbolize Matthew, the ox to symbolize Mark, the man to symbolize Luke, and the eagle, John. ***See also*** Apostle; Church; Gospel, Gospels; Philip. J.M.E.

Eve (eev), the first woman, created by God (Gen. 2:21–22). The meaning of the name is uncer-

Eve spins while Adam digs; thirteenth-century stone relief, Sainte Chapelle, Paris.

tain. In sound, but not in derivation, the name resembles the Hebrew word "life." The association pertains in Gen. 3:20, where the primal woman is designated "the mother of all living." Scholars speculate whether mythological images such as Earth Mother or Mother Goddess lie behind the figure. The story may suggest that by naming the woman Eve, the man rules over her and so corrupts their God-given relationship of equality (Gen. 2:23). In this context the name may be ironic. It suggests life even as life for the woman is diminished. Eve also appears in Gen. 4:1, 2 Cor. 11:3, and 1 Tim. 2:13. P.T.

everlasting life. *See* Eternal Life.

evil, a term with several nuances of meaning in the biblical writings. At base, the primary understanding evolves from a religious perspective, since all forms of evil are regarded as ultimately occasioned by the disobedience and rebellion of the human race with regard to God and God's will. Evil occurs where and when God's will is hindered by human sin. Bad situations or natural calamities were sometimes referred to as "evil," and such occurrences were frequently interpreted as having been sent by God as a punishment for sin (e.g., Deut. 31:17; Amos 3:6; Jer. 26:19). Moreover, if something did not function properly or could not be understood, this too was seen to be "evil" (e.g., Eccles. 6:1–2).

Quite early in the development of Israel's religious understanding, evil came to be concretized in specific persons or events. Later, it came to be understood as a separate and pervasive power in the created order. This system of evil had a leader (Satan, the devil) who exercised control over numerous underlings (demons). However it was seen to be manifested in human experience, evil was interpreted as rebellion against God or the thwarting of God's will through actions (by humans or others) that were at odds with God's plans and purposes for the world.

Various biblical passages locate evil in different places: the human will (e.g., 1 Sam. 24:13; Mark 7:20–23; cf. also Gen. 6:5), the desire for worldly wealth (e.g., 1 Tim. 6:10), or demonic powers that take control of human lives (cf. the stories of demon possession in the synoptic Gospels). Wherever evil originated, however, it was understood to be effective only as it took human form. It was clear from observation, if nothing else, that human beings are inclined toward, open to, and perpetrators of evil and that evil always has tragic consequences for the human race. ***See also*** Demon; Devil; Satan; Sin. J.M.E.

Evil-merodach (ee´vuhl-mair´uh-dak), a Neo-Babylonian (Chaldean) king (561–560 B.C.) and the immediate successor of Nebuchadnezzar II. Evil-merodach released King Jehoiachin from imprisonment; the Judean king was given an allowance, and for the remainder of his life he dined at the Babylonian king's table (2 Kings 25:27–30; Jer. 52:31–34). Evil-merodach may have been trying to modify his father's policies; he was killed in a revolution.

evil spirits. *See* Demon; Devil.

ewe, a female sheep (Heb. *raḥel*). Ewes are mentioned, for example, in Gen. 32:14, where Jacob presents Esau with two hundred ewes, and in Lev. 22:28, where it is forbidden to kill a ewe on the same day that her lamb is killed.

excavation. *See* Archaeology, Methods of.

Exile, a term used, often synonymously with "captivity," to refer to the period in the sixth century B.C. when part of the Judaean population was exiled to Babylonia. The term is not historically satisfactory, since it is too easily taken to suggest that the whole population was deported.

Deportation as a policy was practiced by various ancient powers: Assyria deported part of the population of the Northern Kingdom (Israel) in

Two Judean captives of Sennacherib's conquest of Lachish, 701 B.C.; Nineveh.

722 B.C. 2 Kings 17:6 and 18:11 list places to which they were taken; their subsequent history is unknown. Sennacherib's siege of Lachish (701 B.C.) resulted in deportation of captives. Babylon deported Jehoiachin and other members of the royal family in 597 B.C., together with leading military men, military personnel, and craftsmen (2 Kings 24:15–16); a second deportation followed in 587 B.C. consisting of survivors in Jerusalem and deserters (2 Kings 25:11). Jer. 52:30 records a third deportation in 582 B.C. The

numbers are differently computed: Jer. 52:30 gives a total for all three deportations of 4,600; 2 Kings 25:14 has 10,000 for 597 B.C. alone. Similar policies are attested for the Persians and for later Greek and Roman rulers.

The Assyrians brought deportees from elsewhere to Samaria (2 Kings 17); the Babylonians appointed a Judaean notable, Gedaliah, to control the area (2 Kings 25:22–24). The parallel in Jeremiah 40 implies a considerable population in Judah; 2 Kings 24:14 and 25:12 know only of "some of the poorest of the land" left to tend crops. 2 Chron. 36:21, taking up prophecies of total desolation (e.g., Jer. 7:34, cf. Lam. 1:3), clearly envisages a land emptied of population. This theological motif reflects the view that restoration came only from the exiles in Babylonia (cf. Jer. 24:5–7; 29:4–14; Ezek. 11).

The biblical account provides no direct information about Judah during the exilic age. Jeremiah 41–44 implies that no population was left in Judah after Gedaliah's death. The accounts of restoration in Ezra are problematic, but hints appear of local inhabitants in addition to returned exiles (cf. also Hag. 2:4). Some continuity of population in Judah must be assumed.

Conditions in Babylon are also poorly attested. Jer. 29:5–6 envisages settlement and some independence of life. Ezek. 8:1 and 20:1 refer to elders of the community meeting with the prophet. Ezek. 1:1; Ezra 1:4; and 8:15–17 suggest various settlements at which Jews were to be found; both Ezek. 11:16 and Ezra 8:17 may imply the existence of temples. That Jews continued to live in Babylonia is clear from renewed movements to Judah with Ezra and Nehemiah, the presence of some Jewish names in Babylonian documents of the fifth century B.C. (e.g., those of the firm of Murashu), and the later importance of Babylonian Jewry. Impetus to renewed faithfulness of Jewish customs evidently came from there on more than one occasion.

Exile as a theological theme becomes clear in later writings. Thus, the sins for which the Exile is punishment are variously assessed and theologically justified; and various preconditions are given for the termination of the Exile, like divine grace, human repentance, or a combination of the two (cf. Jer. 24; 31; Ezek. 18; Lam. 5). In Jer. 25:11–12 and 29:10 (cf. Zech. 1:12) a seventy-year figure is used for the Exile; Ezek. 4:5–6 has a forty-year scheme, as well as 390 (or 150 or 190) for the Northern Kingdom. Dan. 9:2, 24–27 reinterprets the seventy-year period as 490 years, seeing the end of Exile as sequel to the desecration of the Temple in 167 B.C. The theme reappears in various intertestamental writings. Psalm 137 offers an interpretation of the experience in terms of desolation and hope. It would also appear that the Exile was a time when national traditions were consolidated and cadres of interpreters of Scriptures were trained (see Neh. 8).

Exodus, the Book of, the second book of the OT and the story of Moses' call by God to rescue his people from oppression in Egypt. After encountering God and entering into covenant in the wilderness at Sinai, the Israelites constructed a portable shrine (tabernacle) and set out on a journey toward Canaan, the land promised by God to their ancestors as an inheritance. Exodus is the book's Greek title in the Septuagint (LXX); in Hebrew it was called (from its opening words) *ve'elleh shemôth,* "And these (are) the names," or simply *Shemôth,* "Names."

The Event: The event was the successful escape of Semitic residents from hardship and forced labor in northern Egypt. According to the Joseph stories (Gen. 37, 39–50), they had entered the country considerably earlier to avoid famine in Canaan (perhaps as part of a larger population movement). The underlying historical events are now obscure. Later Israelites frequently retold their past and reenacted it in worship, but they inevitably expanded and modified the very traditions they preserved.

Like the biblical accounts in their time, modern reconstructions of the Exodus event cannot avoid being partially subjective. Judgments about content or tone, about what is possible or likely depend on the evaluator's training, attitude, and experiences of God's presence in (or apparent absence from) human life. Different evaluations of the biblical record, while not compulsory, may lead to new insights or better understanding.

The movement of Israel's ancestors into Egypt and out again is hard to reconstruct. Some groups may have gone there as early as the late eighteenth century B.C., at the start of foreign (Hyksos) rule; others may have arrived in the late fourteenth or early thirteenth century, only a few years before the oppression reflected in Exodus 1. Similarly, groups of these ancestors may have left Egypt at different times, separated by many years, and under varied circumstances. The later Israelites preserved few stories from the period of their ancestors' earliest movements into Egypt until the oppression and Exodus, but they knew it had been very long ("four hundred and thirty years," Exod. 12:40; "four hundred years," Gen. 15:13). If there were repeated departures from Egypt, surviving traditions merged them into one complex movement. That simplification, the distance in time between even the latest departures from Egypt (thirteenth century B.C.) and

The map outlines the traditional route of the Exodus and also shows ancient routes of travel across the Sinai that Israelites may have used between Egypt and Canaan.

the composition of the major literary sources for Exodus (tenth–sixth centuries, or later), and the likelihood that the biblical authors knew nothing of the geography of the Exodus events make it unwise to propose one route for the Exodus or to expect that all the Exodus stories will form a fully consistent narrative.

The Exodus traditions are marked by humor and lively imagination (especially in the repeated confrontations between Moses and Pharaoh). The accounts of the covenant at Sinai represent varied theological understandings of its consequences for the people's life. The wilderness traditions have been shaped by later writers to provide useful perspectives on Israel's subsequent experiences in the land. Emphasis on the miraculous serves to highlight God's involvement in the people's deliverance.

Most scholars tend to date the (final) Exodus from Egypt early in the reign of Pharaoh Ramesses II (ca. 1290 B.C.), so that the oppression would have begun not long after the nineteenth dynasty took power (ca. 1350 B.C.), and the invasion of Canaan would have started some years before the end of Ramesses' reign (ca. 1230 B.C.). Another view is that the Hebrew tribes entered Egypt from Canaan at the time of the Hyksos, that the rise of the eighteenth dynasty (ca. 1580 B.C.) began the oppression, and that the Exodus occurred during the reign of Thutmose III (ca. 1450 B.C.). While this is in harmony with the statement (1 Kings 6:1) that the construction of Solomon's Temple (ca. 970) began 480 years after the Israelites left Egypt, that figure (twelve generations of forty years) is too exact and probably secondary.

Different routes have been proposed for the Exodus, as well. One route turns south after crossing the line of the modern Suez Canal (near the Bitter Lakes), parallels the eastern coast of the Gulf of Suez to the vicinity of the turquoise mines at Serabit el-Khadem, and continues inland to the traditional site of Mount Sinai at Gebel Musa. After the stay at Sinai, the people would have journeyed in a northeasterly direction to the northern tip of the Gulf of Aqabah, then around Edom and Moab, and on to Transjordan. While this route locates Mount Sinai at the place accepted since Byzantine times, it lacks earlier support and conflicts with the biblical view that the people first headed for Canaan and were only condemned to wander after they had been at Sinai and had rejected the report of the spies sent into the land from Kadesh in the wilderness of Paran (Num. 13–14).

Another proposed route runs north (a little east of the present Suez Canal), turns east along the Mediterranean coast, and follows the narrow strip of land that divides Lake Sirbon from the sea. This allows Lake Sirbon to be identified as the sea where Israel was delivered and the Egyptian pursuers were drowned (Exod. 14–15). Unfortunately, there is neither any obvious route from Lake Sirbon to Kadesh nor any easy access across the sand dunes to Sinai proper. Consequently this route also has little to recommend it.

At least three trails extend east-west across the northern half of Sinai: a coastal road just south of Lake Sirbon and on past Gaza and Megiddo toward Damascus; a central route from Lake Timsah through Khatmia Pass, south of Gebel el Maghara, north around Gebel Halal, then southeast to Ain Qudeirat and Kadesh, and northeast toward Beer-sheba, Hebron, and Shechem; a southern road (the Darb el-Haij, or "Pilgrim's Road," to Mecca) from the northern end of the Gulf of Suez eastward through Mitla Pass and then southeast toward the northern end of the Gulf of Aqabah. Three other routes across Sinai connect those roads: one branching northeast off the road from Suez to Aqabah and extending to Kadesh; another heading southeast from Kadesh to Aqabah; and a third north from Aqabah to the southern end of the Dead Sea. The different pentateuchal sources may have put the route of the exodus on different combinations of these trails, but all apparently located it in the northern half of Sinai with a stop at Kadesh-barnea and an approach to the northern end of the Gulf of Aqabah.

The Book: The book of Exodus is based on the unified J (Yahwist) source, supplemented by a number of E (Elohist) passages and a few D (Deuteronomist), with a new outline and a great deal more material from P (Priestly writer). While the details of source division are often disputed, and some scholars question even the main lines of the analysis, the general validity of the pentateuchal sources may be assumed.

J's version of Exodus, part of a longer narrative extending from the creation account in

OUTLINE OF CONTENTS

The Book of Exodus

- I. Introduction: the new threat (1:1–22)
- II. Moses (2:1–7:7)
  - A. A child is found (2:1–10)
  - B. Escape to Midian (2:11–22)
  - C. Transition (2:23–25)
  - D. Call and commission (3:1–4:17)
  - E. Return to Egypt and encounter with Pharaoh (4:18–6:1)
  - F. Covenant promises and commission (6:2–13)
  - G. Genealogy and summary and transition (6:14–27)
  - H. Renewed commission (6:28–7:7)
- III. Contest with Pharaoh (7:8–12:32)
  - A. Rod to serpent (7:8–13)
  - B. Plagues (7:14–10:29)
  - C. Death of firstborn I (11:1–10)
  - D. Interlude: Passover observance (12:1–28)
  - E. Death of firstborn II (12:29–32)
- IV. Departure from Egypt (12:33–15:21)
  - A. Initial haste (12:33–42)
  - B. Regulations for Passover (12:43–13:16)
  - C. Divine guidance (13:17–22)
  - D. Pharaoh's pursuit and defeat (14:1–31)
  - E. Victory song (15:1–21)
- V. In the Wilderness (15:22–18:27)
  - A. Water at Marah and Elim (15:22–27)
  - B. Manna and quail (16:1–36)
  - C. Water at Massah and Meribah (17:1–7)
  - D. Victory over Amalek (17:8–16)
  - E. Jethro's visit (18:1–27)
- VI. At the mountain (19:1–40:38)
  - A. Preparations and Decalogue (19:1–20:21)
  - B. The covenant (20:22–24:11)
  - C. Moses and God (24:12–18)
  - D. Prescriptions for the tabernacle (25:1–31:11)
  - E. Sabbath observance and covenant provisions (31:12–35:3)
  - F. The tabernacle (35:4–40:38)

Genesis 2 to the Balaam stories in Numbers 22–24, presents a general theology of human life in covenant with God. People can on occasion acknowledge their weakness and their need of divine assistance, but more often they respond inappropriately to God and to the challenges of human life. Consequently, God appears as the dominant agent in J, Moses is more of a witness or messenger than a primary actor, and the people's role is to "stand firm, and see the salvation of the LORD, which he will work" (Exod. 14:13). The human propensity for failure or inappropriate response finds expression in disbelief, murmuring, even open rebellion against the Lord and his chosen representatives.

The incident of the golden calf (Exod. 32) is an integral part of the J narrative and has been crafted to make two related points: first, the people's failure was present from the earliest moments of the Sinai covenant (but God's care for them continued); and, second, the Northern Kingdom's departure from the Davidic covenant after the death of Solomon is not the collapse of the divine plan, but another instance of the constant human tendency to reject the good. God's care will continue even now, and the divine assistance will be available for those who do not walk away (or who return). Even when the Exodus generation failed to trust the Lord's help and were excluded from entry into the promised land, God's promises remained in effect for their descendants (cf. Num. 13–14).

The intent of the J narrative was to encourage and support faithful members of the covenant community discouraged at the covenant's apparent collapse in Jeroboam's revolt (ca. 924 B.C.) and the resulting split between north (Israel) and south (Judah) by suggesting that the crisis was neither unique nor definitive. Only God's reaction really matters, and God can be trusted to be faithful to the chosen ones.

Elements from E are hard to detect, at least in Exodus, and no clear statement can be made about their nature and purpose. D materials in Exodus are also too limited for analysis here.

P expanded the available J traditions and recast them into a new work with an entirely different intention. Thus the plague narrative (Exod. 7–12) becomes a dramatic contest between God's champions (Aaron and Moses) and those of Pharaoh (the magicians). Bit by bit the magicians are defeated and finally disappear from view. Somewhat earlier, in Exod. 6:14–25, P's genealogy of Moses and Aaron is carried down an extra generation to culminate in the birth of Aaron's grandson Phinehas; he will have a decisive role in the climactic incident where "the covenant of a perpetual priesthood" is promised to him and his descendants after him (Num. 25:6–13). The Sinai events are important to P primarily because they provide a context for the revelation of instructions for the proper performance of worship. Temple worship can be seen as the continuation and completion of what was begun at Sinai, and consequently the absence of a Davidic ruler in the Exile or after the return is not particularly important for P or for the audience to which the P version is directed.

Deliverance from bondage, protection in the wilderness, and the covenant at Sinai all find their deepest meaning and abiding value, for P, in the proper performance of the worship whose regulations were communicated through Moses at Sinai. This narrowing of focus stands in some tension with the J materials, and that tension is itself a part of the biblical challenge for readers of the present book of Exodus. Discovering how to respond to that challenge is the task that beckons each person who reads Exodus with care. ***See also*** Baal-peor; Canaan, Canaanites; Covenant; Hebrews; Hyksos; Jethro; Korah; Law; Manna; Moses; Pentateuch; Plagues; Quail; Sinai; Ten Commandments, The; Yam Suph.

exorcism. *See* Magic and Divination.

expiation, a term associated with the removal, cleansing, or forgiveness of sin; it is often confused with "propitiation" (cf. Rom. 3:25; 1 John 2:2; 4:10 [KJV: "propitiation"; RSV: "expiation"]). Both terms create confusion for many modern readers because of their infrequent occurrence in contemporary usage (even in translations of the Bible) or because of their apparent synonymity. They are to be differentiated, however, and their categorical distinction is of considerable importance.

The root meanings in Latin (expiate: "to make satisfaction"; propitiate: "to cause someone to become favorably inclined") are of some help initially when translated into the context of atonement texts in the OT and the NT and the content of their practices and concepts. Both terms presuppose a common starting point as fundamental: God has established a covenant with his people; he is faithful to that covenant; the covenant people, on the other hand, are not faithful and sin against God corporately or individually, ritually or personally; but God provides a means for restoration to the right covenantal relationship, i.e., atonement is possible. The need for interpreting the atonement

creates the occasion for use of the terms "expiation" and "propitiation."

Expiation and propitiation provide two angles of vision: the former looks at the object causing the broken covenantal relationship (sin), while the latter looks at the subject initiating and sustaining the covenant (God). Propitiation as a category of interpretation tends to think in forensic, legal terms; i.e., it thinks of God as the injured party in a liability case. It adds to this perspective the theological dimension of the divinely instituted order. The human being has transgressed that order and the injured deity is justifiably angry with the transgressor. Punishment is to be expected. The fundamental notion is that God is going to remain angry until he is suitably appeased or placated. Propitiations ward off, or turn away, the divine wrath; they are apotropaic in function. Expiation, on the other hand, tends to concentrate on the transgression itself and the issue of how it is to be removed, cleansed, and forgiven. It does not specifically counter the notions associated with propitiation as though they were groundless, but as a matter of choice it declines to speculate about the degrees of divine anger or to calculate the proportions necessary to appease or satisfy God's wrath.

On the whole, expiation as a category of interpretation is far more in keeping with the angle of vision taken by biblical writers of both Testaments (though not always for the theories of atonement in modern theological textbooks) than is propitiation. This judgment is based largely on the following consideration: the provision of a means for atonement is itself a strong indication that, while God's wrath over the transgression of his order and his covenant is real and justified, it is important to concentrate on the initiative taken to remove the transgression. This angle of vision seeks to honor the perspective of God who makes forgiveness possible because of his mercy, love, and grace.

For the OT levitical sacrificial system, there were basically two types of expiatory offerings: the sin offering and the guilt offering (Lev. 4:1–6:7; 6:24–7:1). The former purified or cleansed in the area of ceremonial offenses, while the latter involved offenses in social intercourse (broken pledges, property violations, etc). As a rule, the object of the verb "to expiate" is not God; thus, the notion of appeasement should be avoided. In a few cases, an apotropaic, propitiatory notion is likely, however (Gen. 32:20; Num. 16:47–48; 25:11; 1 Sam. 26:19; 2 Sam. 21:3–4; 24:25; Prov. 16:14). Hence, propitiation may not be a useless category altogether; yet, as pertains to God it is an interpretive possibility where words are few and inadequate.

In the NT, the Greek term variously translated as "expiation" or "propitiation" is applied to the work of Christ in four passages (Rom. 3:25; Heb. 2:17; 1 John 2:2; 4:10). In all of these passages, the RSV reads "expiation"; in all except the second, where it has "reconciliation," the KJV reads "propitiation." Taking Paul's theology of the cross as our angle of vision, we sense that there is something about the crucifixion of Jesus that is awe-inspiring, cosmic drama. What exactly happened there with regard to God's holy nature, his wrath at the presence of sin, and his will to destroy it is something into which human eyes cannot penetrate and human reason cannot discern (Rom. 3:21–26; 2 Cor. 5:21). It is perhaps not entirely inappropriate to leave open the possibility that a propitiatory moment is present in the atoning sacrifice of Christ, while mortals choose by necessity to focus their attention on expiation. ***See also*** Atonement; Blood; Forgiveness; Grace; Justification; Pardon; Reconciliation; Redemption; Salvation; Sin; Worship.

J.E.A.

eye, an organ adapted to perceive light and darkness. In the Bible, the word can refer to the eyes of humans and animals (Gen. 27:1; Job 21:20) and appears in a number of combinations such as "raising one's eyes" (Gen. 18:2). "Eye" may also be used to refer to a person's look or appearance (Lev. 13:55). "Eye" also appears in a number of metaphorical senses. A person whose eye is "evil" is one consumed with jealousy, envy, or malice toward another (Ecclus. 14:10; Matt. 6:23; Mark 7:22). "Eye" can be used in connection with the heart or mind (Ecclus. 17:8; Eph. 1:18; Luke 19:42). Therefore, those who are without understanding can be spoken of as having their eyes blinded (Isa. 6:10; Mark 8:18; Matt. 13:15; John 12:40; Acts 28:27). God is often pictured with multiple eyes (Zech. 4:10). They rove over the world like the agents of the great king (cf. Job 1:6). A figurine of the goddess Ishtar shows multiple eyes on top of the goddess's head vanishing toward infinity. "Eye" also appears in the names of springs or fountains in the OT (Gen. 16:7; Num. 33:9). P.P.

eye of a needle, the. ***See*** Needle's Eye.

Ezekiel (i-zee'kee-uhl), **the Book of,** an OT book of prophecies attributed to the sixth-century prophet Ezekiel (Heb., "God strengthens").

The Prophet: When King Nebuchadnezzar of Babylon captured Jerusalem in 597 B.C., he took many of the leading citizens of Jerusalem as hostages to Babylon, among whom was Ezekiel

Ezekiel's vision of dry bones; a detail from a panel at the third-century A.D. synagogue at Dura-Europos. Ezekiel, touched by the hand of the Lord, stands among disjointed human remains; he is told to prophesy that the bones would live again (Ezek. 37:1–14).

the priest, the son of Buzi (1:3). They were resettled at a place called Tel Abib (Heb. "mound of the flood") on the river Chebar, one of the tributary canals of the Euphrates River southeast of Babylon, near the ancient city of Nippur. It was there that Ezekiel received his call as a prophet of the Lord in 593 B.C. From then on, he prophesied intermittently until 571 B.C.

Ezekiel seems to have been deeply affected by the message he was called upon to deliver. Following his initial call, he sat overwhelmed for seven days (3:15). He was given to extraordinary visions and engaged in prophetic symbolic acts, which must have appeared strange to many of his contemporaries (3:1–3; 4:1–17; 5:1–3). From the time of his call and until the final fall of Jerusalem in 586 B.C., he was a virtual recluse in his house and afflicted with fits of dumbness and immobility (3:24–27; 24:25–27; 33:21–22). The sudden death of his wife and his inability to mourn for her according to custom become a symbol of the sudden destruction of God's sanctuary in Jerusalem (24:15–18). His contemporaries viewed him as somewhat of a curiosity (33:30–33). Only in retrospect was his true greatness recognized and his words were preserved for posterity. We do not know when or under what circumstances Ezekiel died, though presumably it was in exile.

The Book: Ezekiel gives evidence of having been shaped editorially by a school of disciples, who, however, were not far removed in time from the prophet himself. Its outline exhibits a clear threefold structure. Chaps. 1–24 consist chiefly of oracles of judgment against Judah and Jerusalem prior to the fall of the city. This is followed in chaps. 25–32 by oracles against various foreign nations. After a transitional chapter (33) that links the first and third sections, there follow in chaps. 34–48 prophecies about the future restoration of the people in the promised land.

The Message: Ezekiel was called to be a watchman in the service of God, whose chief task it was to warn his people in accordance with the words God had given him (3:16–21; 33:1–9). This he did faithfully throughout his ministry, irrespective of whether his compatriots heeded him or not. Ezekiel's message is imbued with a strong sense of the sovereignty of God and the self-directed purposefulness of God's activity in history, which cannot be thwarted by human failure. This divine activity in history involves both judgment and salvation and is designed to bring Israel and the nations to the true knowledge of God. Because of Israel's repeated failure and sin, God had resolved to destroy the nation. This decision was irrevocable (14:12–20; 21:1–7). Unlike Hosea and Jeremiah, who viewed Israel's history as one of initial faithfulness followed by disobedience, Ezekiel describes Israel's entire existence from Egypt on as one of disobedience and rebellion (20:1–38). The harlotry metaphor, already used by Hosea and Jeremiah to describe Israel's waywardness, is elaborated to the extreme by Ezekiel in chaps. 16 and 23. Ezekiel also attacks all false human hopes (12:21–28; 33:23–29), thereby preparing

OUTLINE OF CONTENTS

The Book of Ezekiel

- I. Oracles of judgment against Judah and Jerusalem (1:1–24:27)
  - A. Vision of God's glory and call of Ezekiel (1:1–3:21)
  - B. Symbolic acts: the coming siege of Jerusalem (3:22–5:17)
  - C. Oracles of judgment and announcement of its imminence (6:1–7:27)
  - D. Abominations in the Temple: God's glory departs (8:1–11:25)
  - E. Symbolic acts describing the Exile and sayings against unresponsive people and false prophets (12:1–14:23)
  - F. Historical allegories and sermons: against the people, their kings, and individual wickedness (15:1–20:49)
  - G. Further oracles of judgment (21:1–32:49)
  - H. Symbolic acts: the siege begins (24:1–27)
- II. Oracles against foreign nations (25:1–32:32)
  - A. Judah's immediate neighbors: Ammon, Moab, Edom, the Philistines (25:1–17)
  - B. Tyre (26:1–28:26)
  - C. Egypt (29:1–32:32)
- III. Prophecies of future restoration (33:1–39:29)
  - A. Announcement of Jerusalem's fall: Ezekiel's role as watchman and importance of individual responsibility (33:1–33)
  - B. Promises of deliverance from exile and restoration in the land (34:1–37:28)
  - C. God and Magog: the enemy's ultimate defeat (38:1–39:29)
- IV. Program for reorganization of the restored community (40:1–48:35)
  - A. Plans for new Temple: God's glory returns (40:1–43:12)
  - B. Temple regulations and personnel (43:13–46:24)
  - C. The healing waters of the Temple spring (47:1–12)
  - D. Division of the land (47:13–48:35)

the ground for a hope based not on human merit or potential, but on God's own character and purpose (36:16–38).

With the destruction of Jerusalem in 586 B.C., Ezekiel's message of judgment received its ultimate validation. From that point on, the prophet's message increasingly focuses on the theme of hope and salvation. Ezekiel reminds those who felt cut off from God in a pagan and unclean land that the glory of the Lord was not tied to the Temple in Jerusalem but had traveled with them into exile (chaps. 1 and 10). God himself had even become their sanctuary for a while, until he would bring them back to their own land (11:16–17). Ezekiel gently reminds those crushed by a sense of guilt and despair (33:10) that the Lord takes no pleasure in the death of the wicked, but that he is more than willing and able to forgive penitent sinners and restore them to life even in exile (33:11–20). The sins of past generations could not prevent the present generation from making life-affirming choices (18:1–20); and the same truth was operative even within the life span of one human being or generation (18:21–32). God's intentions for humanity are fundamentally salvific (18:32; 33:11). Ezekiel goes on to speak of the future restoration of his people in their own land, where they would live in peace and security, under righteous rulers, and with God as their good shepherd (34; 35:1–36:15; 37:1–28). God's sanctuary would be restored in their midst and the glory of the Lord would return to the place from which it once had departed (40:1–43:5). Not only would the nation be restored outwardly, but God would also renew them inwardly through the gracious bestowal of his spirit and the renewal of the human heart (36:26–27; 37:14; 11:19–20).

W.E.L.

Ezem (ee´zuhm; Heb., "bone"), a town in southern Judah counted as belonging to both Judah (Josh. 15:29) and Simeon (Josh. 19:3). Since the tribe of Simeon was early assimilated into Judah, the town was probably originally assigned to Simeon but was absorbed into Judah as Simeon lost its identity (note Gen. 49:5–7). The site is unknown.

Ezer (ee´zuhr), the English translation of two OT words. As a translation of the Hebrew word *'etser* ("treasure") it is the name of a son of Seir and chieftain of the Horites, ancient inhabitants of Edom (Gen. 36:21). As a translation of the Hebrew word *'ezer* ("help") it names the following: **1** A descendant of Judah in the clan of Hur (1 Chron. 4:4). **2** A Manassehite, the son of Ephraim; he was killed with his brother Elead in a raid against Philistine livestock at Gath (1 Chron. 7:21). **3** A Gadite who joined David's fighting men at Ziklag (1 Chron. 12:9). **4** The son of Jeshua; he helped rebuild the walls of Jerusalem under Nehemiah (Neh. 3:19). **5** A priest who took part in the dedication of the rebuilt walls in postexilic Jerusalem (Neh. 12:42); he is possibly the same as 4. ***See also*** Horites.

D.R.B.

Ezion-geber (ee´zee-uhn-gay´buhr), a town in Edom on the Gulf of Aqabah. It is listed in Num. 33:35–36 as a stopping place during the Exodus. Solomon "built a fleet of ships at Ezion-geber" and sent them on profitable journeys to southern Arabia and East Africa (1 Kings 9:26–28; 10:11; 2 Chron. 8:17; 9:10–11). After Solomon's death (ca. 976 B.C.) the region reverted to Edomite control. It was reconquered by Jehoshaphat of Judah, who also built a fleet of ships that were, however, "wrecked at Ezion-geber" (1 Kings 22:48; 2 Chron. 20:36). They may have been destroyed by the Edomites, or quite probably by a tempest, for although the average rainfall is only 2 inches (50 mm.), savage winter storms can bring floods from the Edomite mountains and, along the Arabah, howling gales stirring the sea to fury.

The exact site of Ezion-geber is far from certain. Some authorities equate it with Elath (although Deut. 2:8; 1 Kings 9:26 [RSV: "Eloth"]; and 2 Chron. 8:17 [RSV: "Eloth"] speak of two separate places, suggesting that Ezion-geber was the Israelite name and Elath the Edomite), and identify the site with the oasis of Aqabah at the northeast corner of the gulf, an area with a good water supply and easy access to the Edomite plateau via the Wadi Ytem. Unquestionably, this is the obvious place for settlement, but there is, unfortunately, absolutely no evidence of Iron Age (1200–334 B.C.) occupation in this area, although it is possible that all vestiges of a settlement could have been washed away by flash floods. Those who believe that there were two distinct settlements usually place Elath at Aqabah and Ezion-geber at modern Tell el-Kheleifeh, which is located almost in the center of the northern tip of the gulf and 550 yards (457 m.) from the shore.

This site was excavated by the American archaeologist Nelson Glueck between 1938 and 1940 and revealed five periods of occupation. The earliest structure, probably erected in the reign of Solomon, was a small well-built mudbrick building with a courtyard and massive southern gate. Glueck first equated this with Solomon's copper refinery, but the modern archaeologist B. Rothenburg has shown that the nearby copper mines are in fact some centuries earlier, and he suggests that the building was a Solomonic fort or caravanserai. Since the site is completely exposed to the occasional furious winter storms, it can hardly have served as an important anchorage for shipping; a military outpost to guard the south end of the Arabah seems far more probable.

The second period had a much stronger building, with double mudbrick wall and massive four-chambered gate, probably belonging to the reign of Jehoshaphat. The last biblical mention of Ezion-geber occurs in connection with Jehoshaphat's rule (1 Kings 22:48), but Elath was recaptured for Judah either by Amaziah (2 Kings 14:22) or more probably by Uzziah (2 Chron. 26:2, RSV: "Eloth"), whose son Jotham appears to be mentioned on a seal found in the third period of Tell el-Kheleifeh. In about 733 B.C. Elath fell to the Edomites (2 Kings 16:6), who evidently rebuilt Tell el-Kheleifeh, for some Edomite jar handles have been found at the fourth level. The fifth and final occupation was sometime in the sixth century B.C. during the Babylonian and early Persian empires, but the site was abandoned in the early fifth century B.C.. ***See also*** Amaziah; Edom; Jehoshaphat; Solomon. Ezra (ez´ruh; Heb., "help"), an OT book and the person to whom it is ascribed.

The Book of Ezra: What the English translations divide into the two books of Ezra and Nehemiah is traditionally only one book in the Hebrew Bible. Most of the book of Ezra in the English translations is also found as part of 1 Esdras in the Apocrypha. The first part of Ezra (chaps. 1–6) concerns the restoration of the Jewish community after the Exile and the second part (chaps. 7–10) the account of Ezra's mission (continued in Neh. 8–9).

Chaps. 1–6 provide several different elements mainly concerned with the early years of the restoration of Israel under Darius and Cyrus (late sixth century B.C.). Chap. 1 relates a decree authorizing the rebuilding of the Temple and the handing of the sacred Temple vessels to Sheshbazzar. 2:1–3:1 interrupts the narrative with a list, found also in Nehemiah 7, said to be of those who returned to Judah; the list is composite and clearly includes material belonging to quite different stages. It ends in a narrative fragment that in its present form provides a lead-in to chap. 3 (2:70–3:1). 3:2–13 relates the restoring of the altar (vv. 2–7) and Temple (vv. 8–13), both attributed to Zerubbabel and Jeshua. The sequel appears to be in 4:1–4, which relates an attempt by "adversaries" to collaborate in the building of the Temple, a collaboration rejected by the leaders of the returned exiles. As a result, further building was prevented by the "people of the land" (4:4, local inhabitants). More probably the real sequel is in the Passover ceremony of 6:19–22. The intervening material is almost entirely in Aramaic, though the first two verses, 4:6–7 (in Hebrew), report two further initiatives against the returned exiles, addressed to Xerxes and Artaxerxes. 4:8–23 has a fuller account of opposition, particularly associated with the authorities in Samaria—there is no hint here of religious opposition—and concerned with the rebuilding of the city, not the Temple. 4:24 provides a link to 5:1–6:18, where another account of the Temple is given, in which the main activity is attributed to the elders supported by the prophets Haggai and Zechariah. An inquiry to Darius brings renewed authority to rebuild the Temple, work that is described as having continued without interruption from the days of Cyrus. It is clear that the various elements in

these chapters do not provide a fully harmonized account of the restoration; distinct elements stand side by side, with some linkages between the various themes. For the relation between Chronicles, Ezra and Nehemiah, ***see*** Chronicles, The First and Second Book of the.

The Man Ezra: The story of Ezra, priest and scribe (secretary), appears in Ezra 7–10 and Nehemiah 8–9. The setting is the time of Artaxerxes (7:1), but it is not clear which king of this name is intended. As the narratives now stand, the activities of Ezra and Nehemiah overlap, but there is no real contact between them and it is most often believed that they worked entirely separately. This had led to the proposal that Ezra should be placed later than Nehemiah, Nehemiah in the reign of Artaxerxes I and Ezra in that of Artaxerxes II, but there is no certainty here. If Ezra was active under Artaxerxes I the date of his journey to Jerusalem will have been 458 B.C.; if under Artaxerxes II, 398 B.C. A number of scholars, influenced by these uncertainties and the strange lack of reference to Ezra in other sources (e.g., the list of "famous men" in Ecclus. 44–50), have questioned his very existence, but this may be excessively skeptical. There is, however, genuine doubt whether his mission should be regarded as mainly political—as a trusted servant of the Persian king sent to maintain order in a distant province—or mainly religious—as the instrument through whom the law of Moses was made available to the Jerusalem community.

In the biblical tradition Ezra 7 describes his commissioning and sets out (in Aramaic, 7:11–26) his authority to impose the law within the Persian province "Beyond the River." Ezra 8 provides a list of those who went with him and gives an account of the journey. Ezra 9–10 deals with the problems created by marriages with women of foreign origin, and the action taken by Ezra to eliminate this religious danger. It incorporates a poetic prayer in 9:6–15. 7:27–9:15 is a first-person narrative, while the remainder of the Ezra material is in the third person. The story continues in Nehemiah 8, though this passage, dealing with the proclaiming and acceptance of the law, would more logically precede the material of Ezra 9–10. Nehemiah 9 has a short opening narrative (vv. 1–6), which appears to be a duplicate or summary of what precedes, followed by a long psalm-prayer that the Greek translators of the Septuagint (so too RSV) attribute to Ezra.

Ezra is also mentioned in Neh. 12:26, 36, probably as a harmonizing addition to the Nehemiah narrative. The name appears also in lists in Neh. 12:13, 33. In 12:1, 13 he is named as a priestly leader.

Ezra occupies a prominent place in later Jewish tradition, particularly in connection with the writing of the Scriptures; this tradition is evident in 2 Esdras (4 Ezra) 14, where he has become a prophet (2 Esd. 1:1) and is described as dictating the whole ninety-four books, to replace what had been lost in the Exile. Of these, twenty-four are canonical books, to be made public; the remaining seventy, presumably works like 2 Esdras itself, were to be kept secret for the "wise." Ezra thus becomes the preserver of the religious tradition from its earlier stages through to the forerunners of the great rabbis, and thus occupies a place in some respects similar to that of Moses. A markedly hostile view of Ezra is to be found in Samaritan tradition, which reflects the views of those who opposed the returned exiles and their attempt to assume the religious leadership of Palestine. ***See also*** Artaxerxes; Law; Nehemiah, The Book of.

OUTLINE OF CONTENTS

The Book of Ezra

- I. Restoration of the community (1:1–6:22)
  - A. Decree authorizing rebuilding (1:1–11)
  - B. List of returnees (2:1–70)
  - C. Restoration (3:1–13)
    - 1. Altar (3:1–7)
    - 2. Temple (3:8–13)
  - D. Opposition to restoration (4:1–24)
  - E. Restoration completed (5:1–6:22)
    - 1. Temple completed (5:1–6:18)
      - a. Work begun (5:1–2)
      - b. Official reports (5:3–6:12)
      - c. Work completed (6:13–18)
    - 2. Completion celebrated (6:19–22)
- II. Ezra's mission (7:1–10:44)
  - A. Ezra introduced (7:1–10)
  - B. Ezra's commission (7:11–26)
  - C. Ezra's departure (8:1–36)
    - 1. Preparations (8:1–30)
    - 2. Departure (8:31–36)
  - D. The purity of God's people (9:1–10:44)
    - 1. Mixed marriages: problem (9:1–2)
    - 2. Mixed marriages: reaction (9:3–10:6)
    - 3. Mixed marriages: action (10:7–19)
    - 4. Mixed marriages: result (10:20–44)

fable, a short fictitious story that usually uses animals, plants, or inanimate objects as characters to teach a moral lesson. There are two clear examples of this form in the Bible: Jotham's fable of the thorn tree (Abimelech) that was chosen king instead of more worthy trees (Jerubbaal's sons; Judg. 9:7–15) and Jehoash's fable of the thorn bush (Amaziah) that arrogantly challenged the cedar of Lebanon (Jehoash) and was trampled (2 Kings 14:9: 1 Chron. 25:18). In some older English translations (e.g., KJV) "fables" (Gk. *mythos*) refer to false teachings that were being urged upon the early church (1 Tim. 1:4; 2 Tim. 4:4; 2 Pet. 1:16). Most newer translations use the word "myths."
D.R.B.

Fair Havens (fair′ hay′vinz), a bay on the south-central coast of Crete, where Paul's ship put in on his journey to Rome (Acts 27:8); it is still known by the same name in Greek. The nearby town of Lasea flourished in Roman times. The bay itself is protected by some small islands, the second largest of which is today known as St. Paul's Island. Weighing anchor here in the fall, Paul's ship, against his advice, made a run for the safer harbor of Phoenix to the west but was driven off course by a sudden northeast wind, the Euraquilo (KJV: "Euroclydon"; RSV: "northeaster"; Acts 27:9–15). ***See also*** Crete; Euroclydon; Paul; Phoenix. C.H.M.

faith, in the Bible trust in, or reliance on, God who is himself trustworthy. The NT and the Greek OT express the understanding of faith primarily with two terms (*pistis, pisteuein*), which are related to the primary OT verb "to be true" or "be trustworthy" (*'aman*). The OT concept is considerably broader than this term and its cognates, yet *'aman* remains the most profound expression to describe faith in the OT.

God ordering Noah to build the ark (Gen. 6:14–22) exemplifies the exclusive demand of obedience of the covenant relationship; ninth-century ivory plaque, Italy.

Faith in the OT: It is important to recognize the context in which the concept of faith functions in the OT. God stands at the center; it is his initiative and faithfulness as described by the OT writers in creation, in the Exodus event, in the covenant and the subsequent history of Israel that allow his people to respond to his fidelity. Since God's promises are intended for his people, the emphasis of faith is not focused primarily on the individual, but on the relationship of the people of Israel to God. However, in the Psalms, and to a limited extent in Deutero-Isaiah (i.e., Isa. 40–55) and elsewhere, the individual expression of faith is given attention. The prophets intensify the covenant dimension of faith and in Isaiah the imagery of faith is given a new and creative impulse. Throughout the OT the focus of faith is exclusively on the God of Abraham, Isaac, and Jacob: "And Israel saw the great work which the Lord did against the Egyptians, and the people feared the Lord; and they believed in the Lord and in his servant Moses" (Exod. 14:31). God's mighty acts allow and call for trust and belief in him.

The Hebrew verb means, for the most part, "to be true"; lying behind this is the root meaning "solid," "firm." This sense of "to be true" is intensified in the passive (Niphal) form of the verb so that one can speak of a person as "trustworthy" or "reliable." The causative (Hiphil) form of the verb suggests the acceptance of someone as trustworthy or dependable. Thus, one accepts God as trustworthy and believes his word (Deut. 9:23) and his promises, as is the case with Abraham in Gen. 15:1–6: "And he believed the Lord; and he reckoned it to him as righteousness." It has been argued that it is the use of the verb in the causative form that encompasses the most personal relationship of faith between God and the believer.

The primary nouns derived from the verb "to trust" (*'aman*) are "firmness, stability" (*'emunah;* Isa. 33:6: "and he will be the stability of your times . . . ") and "truthfulness, fidelity, faithfulness" (*'emet;* Ps. 71:22: "I will also praise thee with the harp for thy faithfulness, O my God"). Throughout the OT stability results in security and together they are signs of God's fidelity to his people. Another term used in this connection refers to Yahweh's loving-kindness in a covenant context (*ḥesed:* Ps. 33:18: "Behold, the eye of the Lord is on those who fear him, on those who hope in his steadfast *love*"). God chose Israel (Deut. 7:6–7: "the Lord your God has chosen you to be a people for his own possession . . . ") and his loving-kindness is demonstrated by the many blessings they have received. This covenant relationship presupposes a mutuality of obligation (Deut. 7:9: "Know therefore that the Lord your God is God, the faithful God who keeps covenant and steadfast love with those who love him and keep his commandments . . . "); Israel's response of faith is possible only because of God's prior and continued faithfulness. Out of this mutuality

of obligation the paradoxical relationship between faith and fear in the OT (Exod. 14:31 above) becomes more intelligible. The covenant relationship between God and his people results in an exclusive demand (Exod. 20:3; Deut. 6:5; 18:13; 1 Kings 8:61; Isa. 38:3) of obedience (Noah in Gen. 6:9, 22; 7:5; Abraham in Gen. 22:1–18; Joshua in 1:7–8; 24:22–31; Samuel in 1 Sam. 15:17–33) in which idols must be totally rejected (Isa. 42:17). In fact, the opposite of faithfulness is apostasy, as, for example, in Deut. 32:20, in which the phrase "children in whom is no faithfulness" is synonymous with idolatry. Since the faith of Israel is always reflective of God's fidelity and loving-kindness, it must be expressed not only in obedience but also in praise (Pss. 5:11; 9:10; 13:5; 18:1–3; 22:1–5; 27:14; 62:1, 5–8; 141:8).

The prophets deepen the meaning of faith in several ways. For Isaiah (7:1–9) security does not rest in political power but in utter trust in God; in fact, the totality of life must be based on such trust in him (Isa. 7:9: "If you will not believe, surely you shall not be established"). This point is also stressed in Isa. 28:16, a verse of importance for the NT: "Therefore thus says the Lord God, 'Behold, I am laying in Zion for a foundation a stone, a tested stone, a precious cornerstone, of a sure foundation: "He who believes will not be in haste." ' " Deutero-Isaiah broadens the concept of faith in the direction of hope and knowledge. Typical of the former is Isa. 40:31: "But they who wait for the Lord shall renew their strength, they shall mount up with wings like eagles, they shall run and not be weary, they shall walk and not faint." Faced with difficult predicaments, the energy of faith results not in despair, but in hope. The broadening of faith in the direction of knowledge is particularly evident in Isa. 43:10: "You are my witnesses," says the Lord, "and my servant whom I have chosen, that you may know and believe and understand that I am He." Knowledge is not used here in a speculative sense; the reference is to the knowledge of God's fidelity and loving-kindness experienced in history.

Faith in the NT: For the NT understanding of faith, Hab. 2:4 is an important reference: "Behold, he whose soul is not upright in him shall fail, but the righteous shall live by his faithfulness." Here the characteristic meaning of trust (*'emunah*) is well summarized: fidelity to God as the sign of the righteous person. God alone can be the object of trust and faithfulness because he "is my rock, and my fortress, and my deliverer, my God, my rock, in whom I take refuge, my shield, and the horn of my salvation, my stronghold" (Ps. 18:2).

In the NT the noun and verb denoting faith (*pistis/pisteuein*) appear frequently. In the synoptic Gospels, they are used least frequently, and among them it is used with least precision in the Gospel of Mark. Faith for Mark can have as its object God (Mark 11:22: "And Jesus answered them, 'Have faith in God'") or faith in Jesus as the manifestation of God's power (Mark 5:36; 9:23–24). Closely related to this last usage are the direct references of Jesus to the faith of his audience (Mark 2:5: "And when Jesus saw their faith, he said to the paralytic, 'My son, your sins are forgiven'"; Mark 5:34: "And he said to her, 'Daughter, your faith has made you well; go in peace, and be healed of your disease'"; Mark 10:52: "And Jesus said to him [the blind man], 'Go your way; your faith has made you well'"). Finally, Mark can have the gospel, in a way not dissimilar to Paul, as the object of faith (Mark 1:15: "Jesus came . . . saying, 'The time is fulfilled, and the kingdom of God is at hand; repent, and believe in the gospel'"). Lack of faith can be referred to in a similar way (Mark 4:40: "He [Jesus] said to them, 'Why are you afraid? Have you no faith?'"). In the Gospel of Luke faith is often used in the most general sense of faithfulness (Luke 16:10–12; see also 1:20, 45: "And blessed is she who believed that there would be a fulfillment of what was spoken to her from the Lord"). In addition, faith is used with the verb "to save" (7:50: "And he said to the woman, 'Your faith has saved you; go in peace'"; 8:12: "believe and be saved").

The Gospel of Matthew further intensifies the theme of faith. At the conclusion of the story about the healing of the centurion's slave, Matthew adds the words: "And to the centurion Jesus said, 'Go; be it done for you as you have believed'" (Matt. 8:13). Similarly, Matthew modifies the Marcan and Lucan account of the healing of two blind men by inserting the question from Jesus: 'Do you believe that I am able to do this?' They said to him, 'Yes, Lord'" (Matt. 9:28). Other Matthean passages also emphasize faith. In the account of the Canaanite woman Matthew alters the Marcan account precisely for this purpose: "Then Jesus answered her, 'O woman, great is your faith! Be it done for you as you desire.' And her daughter was healed instantly" (Matt. 15:28). Similarly, in an encounter with the chief priests and the elders Matthew elevates the issue of faith: "Jesus said to them, 'Truly, I say to you, the tax collectors and the harlots go into the kingdom of God before you. For John came to you in the way of righteousness, and you did not believe him, but the tax collectors and the harlots believed him; and even when you saw it, you did not afterward repent and believe him'" (Matt. 21:31b–32; cf. Luke 7:29–30). In a polemical passage dealing with scribes and Pharisees Matthew accuses them of neglecting the weightier matters of "the law, justice and mercy and faith" (Matt. 23:23; Luke 11:42 does not contain the reference to faith). In the passage dealing with the false christs and false prophets Matthew twice uses the verb "to believe" while Luke does not (Matt. 24:23–25; Luke 17:23–24). This same pattern can be found in Matt. 17:19–20 and in Matt. 21:21. The former is an account of the boy possessed by a spirit who was healed by Jesus. Of the three

evangelists, only Matthew adds this statement of Jesus by way of response to the disciples' question, "Why could we not cast it out?": "Because of your little faith." In Matt. 21:21 there is a clear intensification over against Mark 11:22. In Mark Jesus answers, "Have faith in God"; in Matthew Jesus answers, "Truly, I say to you, if you have faith and never doubt . . . "

Paul's Concept of Faith: In the apostle Paul one finds the broadest and profoundest articulation of the concept of faith in early Christianity. Faith has as its object God (1 Thess. 1:8), specifically God's salvific manifestation through the death and resurrection of Jesus Christ (1 Thess. 4:14). This act of God in Christ is preached (Rom. 10:17: "So faith comes from what is heard, and what is heard comes by the preaching of Christ") and is received by faith (Rom. 3:25), a faith that rests "in the power of God" (1 Cor. 2:5). Those who have received the good news of God's act in Christ, namely, the gospel, are called "believers" (1 Thess. 1:7). There is only one gospel (1 Cor. 15:11) and its goal is salvation (1 Cor. 1:21).

For Paul the concept of faith is a dynamic one. Thus, he can refer to the "activity of faith" (1 Thess. 1:23), an activity that manifests itself in love (Gal. 5:6: "faith working through love"). Faith involves "progress" (Phil. 1:25); it is not something static, captured once for all, but involves striving (Phil. 1:27: "with one mind striving side by side for the faith of the gospel . . . ") and it increases (2 Cor. 10:15) and it is an energy at work in believers (1 Thess. 2:13). Since faith is not a static possession, Paul urges that faith be established (1 Thess. 3:2) and made firm (1 Cor. 16:13; 2 Cor. 1:24), for it is possible not only to have deficiencies in faith (1 Thess. 3:10; Rom. 14:1) but also to believe in vain (1 Cor. 15:2; Rom. 11:20). Essential for Paul's understanding of faith is the conviction that God assigns to each the measure of faith he wishes (Rom. 12:3, 6; 1 Cor. 12:9). Yet no matter what that measure of faith is, the obedience of faith is expected from all (Rom. 1:5; 16:16).

Paul on several occasions uses the triadic formulation "faith, love and hope" (1 Thess. 1:3; 5:8; 1 Cor. 13:13). On the one hand, as noted above, faith must be active in love; without love faith is empty. On the other hand, faith must be grounded in hope so that it recognizes that the first-fruits of God's promises manifested in the death and resurrection of Christ will be fulfilled on the last day (Gal. 5:5; Rom. 6:8; Rom. 15:13: "May the God of hope fill you with all joy and peace in believing, so that by the power of the Holy Spirit you may abound in hope". The specific hope of faith is rooted in the resurrection of Christ as an anticipation of the fulfillment of the last day (1 Cor. 15:14, 17; 2 Cor. 4:14: "knowing that he who raised the Lord Jesus will raise us also with Jesus and bring us with you into his presence"). Yet this faith that is received in baptism (Gal. 3:27–28) and allows one entrance into the body of Christ, the church, is a faith that has as its model the suffering and death of Jesus and so during this earthly sojourn faith may well be called to a cruciform existence (Rom. 8:18; Phil. 1:29: "For it has been granted to you that for the sake of Christ you should not only believe in him but also suffer for his sake . . . "). Further, this new act of God in Christ received by faith involves not only new existence for the believer but for the world itself (Rom. 8:18–25).

Particularly in Galatians and Romans Paul links his concept of faith to terms like the righteousness of God and justification and to a negative attitude toward the works of the law. This development of his thought is brought about, on the one hand, by his conflict with certain Judaizers, and, on the other hand, his reflections of the relation of Jews and Gentiles. Thus, in Gal. 2:16 he can write that "a man is not justified by works of the law but through faith in Jesus Christ . . ." and in Rom. 10:4 that "Christ is the end of the law, that every one who has faith may be justified." These points are articulated at length with much use of the OT, including Gen. 15:6, in such chapters as Galatians 3 and Romans 4. For Paul the villain is not the law, but sin, which renders its usefulness ineffective. Thus the basic dilemma of the human situation is captivity to sin (Rom. 3:9–18). Christ has come to free humanity from this captivity; whether Jew or Greek, all have sinned and all can come to God in Christ only through faith (Rom. 3:21). Thus Paul can ask rhetorically: "Wretched man that I am! Who will deliver me from this body of death? Thanks be to God through Jesus Christ our Lord!" (Rom. 7:24–25a).

The same dynamic of faith is evident when Paul links faith with righteousness/justification language, as, for example, in Rom. 1:16–17: "For I am not ashamed of the gospel: it is the power of God for salvation to every one who has faith, to the Jew first and also to the Greek. For in it the righteousness of God is revealed through faith for faith; as it is written, 'He who through faith is righteous shall live.'" The righteousness of God, which faith receives as God's gift, is viewed as part of a much broader historical and eschatological context. It is for Paul God's sovereignty over the world that reveals itself eschatologically in Jesus. When Paul speaks of the "gift of righteousness" in Rom. 5:17 he is referring to a gift that is both present and future, already received and still expected. It is a gift that recognizes God's sovereign power and the fact that the believer is placed under that power in obedient service. For the person who is justified, who has received the gift in faith, salvation is not yet completed in the present; it has still to be consummated and fulfilled on the last day. Only as Christians wait and hope are they saved (Rom. 8:23–25; Gal. 5:5). It is precisely for this reason that the apostle is so careful in his language about present and future as, for example, in Rom. 6:8 ("But if we have died with Christ,

we believe that we shall also live with him") and Rom. 5:9 ("Since, therefore, we are now justified by his blood, much more shall we be saved by him from the wrath of God"). This process of the Christian life is similarly emphasized in Philippians (2:12–13; 3:9–14). While the Christian life is for Paul a single process, he does stress three different nuances of the process: justification, an initiating event that is actualized and made concrete through sanctification; sanctification, a present process, dependent upon justification, that has future implications, namely, consummated salvation; and salvation, a gift to be consummated in the future, already anticipated and partially experienced in justification and sanctification and definitely dependent upon them.

Other NT Writings: Other NT writings that stress the concept of faith include the Gospel of John, where only the verb form is found. The author describes his Gospel as intended to produce faith: "Now Jesus did many other signs in the presence of the disciples, which are not written in this book, but these are written that you may believe that Jesus is the Christ, the Son of God, and that believing you may have life in his name" (John 20:30–31). This Evangelist's view of faith is very much linked to the contingency of his situation, especially his dialogue and polemic with Judaism, many of whom do not believe (9:18) and reject faith in Jesus (5:38) despite the signs performed (4:48) and the testimony of Scripture, Abraham, and Moses. The view of faith found in the Fourth Gospel is also closely linked to its understanding of Christology, namely, Jesus as the one sent by the Father as his revealer (John 6:29: "Jesus answered them, 'This is the work of God, that you believe in him whom he has sent'"). The Acts of the Apostles is also a rich witness to the NT concept of faith. Here the term "believer" is used with frequency (e.g., Acts 2:44) and the object of belief is the preaching of the apostles (Acts 4:1–4). In James 2:14–20, the view of faith that insists that faith without works is useless is most likely not a criticism of Paul, but of those who have lost sight of the Pauline relationship between the activity of faith and its expression in and through love. The oft-quoted verse from Hebrews, "Now faith is the assurance of things hoped for, the conviction of things not seen" (11:1), has no specific Christian emphasis as it stands; the entire chapter serves as a model for the purposes of exhortation and reaches its culmination and Christian interpretation in chapter 12: "Therefore . . . let us run with perserverance the race that is set before us, looking to Jesus the pioneer and perfecter of our faith, who for the joy that was set before him endured the cross . . . " (12:1–2). This reference to Jesus as "the pioneer and perfecter" of faith expresses concisely the dynamic conception of faith found in much of the NT. ***See also*** Hope; Love; Righteousness. Fall, the, the original disobedience of Adam and Eve and the results of this disobedience, as depicted in Genesis 3. There are two different accounts of creation in Genesis 1–3. The second, found in 2:4b–3:24, is the older of the two and is considered part of an ancient history of Israel known as the Yahwistic history (dating from perhaps as far back as 950 B.C.). This history, designated "J," was one of the various collections of traditions later combined and edited to form the Torah or Pentateuch. The J creation story depicts God forming a male human being, placing him in a garden, and eventually creating a suitable mate for him. The subsequent disobedience of this human pair and their expulsion from the garden is usually designated as "the Fall."

According to the story, the serpent (*not* Satan or the devil, as assumed by later interpreters) deceived the woman into eating the fruit of the forbidden tree, that is, the Tree of the Knowledge of Good and Evil, and she, in turn, gave the fruit to the man. The meaning of "knowing good and evil" may indicate the ability to make moral judgments, as some interpret it, but it more likely carries the connotation of "knowing everything." The central idea, however, is that human sin is rooted in the desire to "be like God," to usurp God's rightful place as Creator, and for humans to have life revolve around themselves and their own desires.

Because of the Fall, the positive relationship the humans had with God was broken, and all evil and tragedy in the created order were explained as a result of this rebellion and disobedience. The Fall resulted in humanity being trapped in its sinful state, which issued in death, not simply (or primarily) physical death but rather spiritual separation from God.

The doctrine of the Fall is never worked out in any systematic manner in the OT, but, in the NT, Paul alludes to the story, setting up a parallel between "the first Adam" and Christ as "the

Serpent around the forbidden tree, Eve with hand outstretched, and Adam beside her; fifteenth-century relief, Italy.

last Adam" (Rom. 5:12–21; 1 Cor. 15:21–22, 45–49). In later Christian theology, the doctrine of the Fall is developed in great detail. ***See also*** Adam; Atonement; Creation; Death; Devil; Eden; Eve; J; Redemption; Salvation; Satan; Serpent; Sin; Sources of the Pentateuch. J.M.E.

familiar spirit. ***See*** Magic and Divination.

family, the (Heb. *bayit,* "house"; *bet 'ab,* "father's house"; *mishpaḥah,* "clan"), the basic social unit in Israel during the biblical period.

The Nuclear Family: The smallest family unit was the nuclear family (the "house"), which usually occupied its own dwelling. The nuclear family normally consisted of parents and their unmarried children, although occasionally nonkin such as slaves or long-term visitors also shared the family's living quarters. Archaeological evidence suggests that no more than six or seven people occupied the average house on a regular basis. Within the nuclear family children were socialized by being taught the customs and lore of their people (Prov. 1:8; 6:20), including the story of God's dealings with Israel (Exod. 10:2; 12:26; 13:8; Deut. 4:9; 6:7, 20–25; 32:7, 46). Well into the monarchical period (ca. 1020–586 B.C.) each nuclear family was also a self-sustaining economic unit. Agricultural products grown by the family were stored in the house, and any animals that the family might own were quartered there. Living arrangements may have been different in the period before Israel's settlement in Canaan (thirteenth–twelfth centuries B.C.), but there is little firm evidence on this point.

Most of the authority in the nuclear family belonged to the father, who exercised legal control over his children and wife, although his power was not absolute (Exod. 21:7–11; Deut. 21:15–21). Children were expected to honor and obey their parents, and failure to do so was considered a serious matter (Exod. 20:12; 21:15, 17; Lev. 20:9; Deut. 27:16; Prov. 30:17). The integrity of the family was further protected by harsh laws against adultery and incest (Exod. 20:14; Lev. 18:20; 20:10–21; Deut. 5:18; 22:22). However, families could be dissolved through divorce (Deut. 24:1–4).

Children remained under their father's control until they were married, when they left home to start a new family unit. Marriages were carefully regulated (Lev. 18). In early Israel polygyny was common (Gen. 4:19; 16:1–2; 22:20–24; 25:1, 6; 29:15–30), although by monarchical times this practice was limited primarily to the royal family. Even after marriage children were expected to honor their parents and were exhorted to care for them in their old age (Prov. 23:22).

The Extended Family: The extended family (the "father's house") was composed of two or more nuclear families that claimed descent from the same ancestor. Members of the extended family sometimes lived together in adjoining houses, although this does not seem to have been common, and occasionally worked at the same trade or profession (1 Chron. 4:14, 21, 23). The extended family acted as a corporate entity and was granted certain legal rights in order to maintain its solidarity. When one of its nuclear families was forced to sell property, the extended family had the right to redeem the property in order to keep it from leaving the family (Lev. 25:25; Jer. 32:6–15). Individuals threatened with being sold into slavery could be redeemed by a member of their extended family, and, at least in the early period, the family was allowed to avenge a wrong done to one of its members (Lev. 25:47–49). Power in the extended family was exercised by the ancestor from whom all of its constituent nuclear families were descended. If this individual was not living, then questions of authority were negotiated among the heads of the nuclear families.

Clan and Tribe: Several extended families were sometimes linked together to form a clan. In this case they traced their genealogies to a single ancestor, although at the level of the clan factors other than genuine consanguinity often played a role in establishing group unity. Clan members usually lived in the same geographical area and sometimes made up an entire village (Judg. 18:11–13). Clans may have helped to protect their members against outside attack but otherwise seem to have had few social functions.

The family metaphor was extended beyond the clan to include the tribe and the nation of Israel itself, so that the whole people could be seen as one enormous family represented by a complex segmented or branched genealogy (Gen. 46:8–27; Num. 26:5–62; 1 Chron. 1–9). Because of the large numbers of people involved in these groups, it is difficult to know how effectively they functioned as social units.

Although some of the power of the tribes and clans was taken away by the monarchy, the nuclear and extended families seem to have survived intact throughout Israel's history. After the Exile caused many changes in Israel's structure, the family played an even greater role in maintaining the people's stability.

In the NT: NT views of the family are somewhat different from those found in the OT. On the one hand, some of Jesus' sayings subordinate family loyalty to loyalty to the gospel (Matt. 10:34–39; 12:46–50; Mark 3:31–35; Luke 12:49–53). On the other hand, Jesus quoted approvingly the command to honor parents and thus supported the traditional Jewish family structure (Matt. 19:16–22; Luke 18:18–30). In the early church support of one's family was seen as a virtue (1 Tim. 5:8), but the traditional view of family was transformed by seeing the Christian community as a new family (Gal. 6:10; Eph. 2:19). ***See also*** Genealogy; Sociology of the Old Testament.

R.R.W.

famine, a prolonged scarcity of food, accompanied by extreme hunger. It is listed as one of God's "four sore acts of judgment" along with the sword (war), evil beasts, and pestilence (Ezek. 14:21). It is also a divine judgment in Jeremiah, along with the sword (fourteen times), and with the sword and pestilence (fifteen times). In Deuteronomy 28, hunger (v. 48) is one of the many curses God will send for disobedience.

Perhaps the most widely-known famine in the Bible is the one predicted by Joseph in his interpretation of Pharaoh's dream (Gen. 41). It, too, was sent by God (v. 25). Other periods of severe famine are recorded during the days of Abraham (Gen. 12:10), Isaac (Gen. 26:1), Elisha (1 Kings 7; 8:16), and Zedekiah after the siege of Jerusalem (2 Kings 25:3; cf. Lam. 5:10). Philistia was threatened with famine in an oracle from Isaiah (Isa. 14:30).

Famine may lead to disease (Jer. 14:18) and, most gruesome of all, cannibalism of one's own offspring (Deut. 28:47–57). Other attendant judgments may be captivity (Jer. 15:2), exile (Ezek. 5:12), nakedness (Deut. 28:47), and earthquakes (Matt. 24:7). The prophet Amos speaks of a famine not of bread, nor of thirst for water, but "of hearing the words of the Lord" (Amos 8:11).

The NT (Acts 11:27–30) refers to a worldwide famine at the time of the Roman emperor Claudius, prompting the church in the Roman world to send help to the Christians in Jerusalem at the hands of Barnabas and Saul (Paul). Paul also affirms that famine will not be able to separate believers from the love of God in Christ (Rom. 8:35–38). Famine is symbolized by the third horseman of the Apocalypse, who announces exorbitant prices for food and precedes the horseman named Death (Rev. 6:5–8). J.G.G.

farming, the whole process of cultivating land and raising crops, from soil preparation to the storage and transport of crops to market. Archaeologists have discovered that farming has been practiced in Palestine for almost ten thousand years. If one includes the breeding of livestock, it is clear that agriculture has always been the basis of Palestine's economy. No human activity is as prevalent in the Bible as farming. Agricultural pursuits are mentioned in the opening pages of Genesis (2:15; 4:2; 9:20), and farming activities were important enough to be regulated by Mosaic law (e.g., Lev. 19:9; 25:3–5; Deut. 22:9–10). The orderly system used in working the land was attributed to God (Isa. 28:26), and Jesus used figures derived from farming to picture the coming of God's Kingdom (Mark 4:3–8, 26–29).

A farm near Jerusalem, dating to ancient times, is still under cultivation.

The most important crops were wheat, grapes, and olives (Ps. 104:15; Joel 2:19); other crops included barley, flax, lentils, chick-peas, cucumbers, onions, melons, dates, figs, and spices. Because of variations in soil productivity, temperature, and rainfall, certain areas of the country were better suited than others for specific crops, but a wide range of crops and trading and pastoral activities enabled farmers to provide for their families.

Unlike their Egyptian and Mesopotamian counterparts, Palestinian farmers were not dependent upon irrigation to water crops; rainfall and dew usually sufficed (Deut. 11:10–11; 1 Kings 17:1). Naturally, ancient farmers contended with the elements, pests, and warfare, but the major enemy was drought (cf. Jer. 14:1–6).

Farmers were occupied throughout the year with animal husbandry, and heavy field work never ended. Land was marked off with boundary stones (Prov. 22:28); ground was cleared of rocks and thorns (Isa. 5:2); fields, vineyards, and orchards were hedged and walled (Isa. 5:5; cf. Mark 12:1); and hillsides were terraced. Most farming activities, however, were controlled by the seasons.

Plowing for winter crops did not begin until after the "early" or "former" rains of autumn (Prov. 20:4); only then could lightweight plows scratch the surface of sun-baked fields. Once the plowman and his team of draft animals had broken the soil, clods were pulverized and the surface flattened with hoes or harrows (Isa. 28:24–25).

Sowing, which was usually accomplished by broadcasting seed, could precede or follow

plowing. Fields or individual plants were fertilized with dung (Jer. 9:22; Luke 13:8), and the rain and sun brought different crops to maturity at different times. Following the winter rains and the "latter" rains of March–April, barley was ready to be harvested in April and May, and wheat matured three or four weeks later. Grain was pulled up by the roots or cut with flint-bladed or iron sickles (Deut. 16:9).

The harvested sheaves were spread out on a threshing-floor (i.e., a rock outcropping or a hard-packed earthen surface), and the stalk, chaff, and grain were cut apart by animal hooves (Deut. 25:4), flails (Ruth 2:17), or threshing sledges (Isa. 41:15). Grain was separated from the chaff by winnowing (Isa. 41:16), and the kernels were sifted to remove bits of straw (Luke 22:31). After a bumper crop, the threshing and winnowing process could last all summer. The finished product was bagged, hauled away for storage or sale, and the chaff was burned (Matt. 3:12).

Meanwhile, summer crops had been planted after the winter rains; these plants were cultivated throughout the dry summer months. The harvesting of fruit, including olives and grapes, began in late summer and continued into fall.

The Bible demonstrates that almost every aspect of agricultural work assumed a figurative meaning in the minds of ancient speakers and writers (e.g., Isa. 21:10; Amos 9:13; Mic. 4:12–13; Matt. 9:37–38; 13:3–32; Luke 9:62; 1 Cor. 9:9–11; Gal. 6:7; Rev. 14:14–20). ***See also*** Plow; Sowing; Winnowing. G.L.M.

farthing (fahr´*th*ing). ***See*** Money.

fasting, abstention from food. In the OT there are two kinds of fasting, public and private. Public fasts were periodically proclaimed (2 Chron. 20:3; Ezra 8:21–23; Neh. 1:4–11; Jer. 36:9). The fasts were always accompanied by prayer and supplication and frequently by wearing sackcloth as a sign of penance and mourning (Neh. 9:1; Dan. 9:3; 1 Macc. 3:47). In the tragic days surrounding the fall of Jerusalem, four fast days were proclaimed (Zech. 7:5; 8:19). "Humbling or afflicting oneself," synonymous with "fasting," is required on the Day of Atonement (Lev. 16:31–34). Public fasts ordinarily lasted a day, and offerings of various sorts were made (Lev. 16:1–5; Judg. 20:26; Jer. 14:11–12). The prophetic writings contain strong warnings against abusing the fasting rituals (Isa. 58:1–9; Jer. 14:11–12; Zech. 7:3–5; 8:18–19). The prophet Joel, however, unhesitatingly calls for a public fast and communal lamentation (Joel 1:8–2:17). Private fasts were observed as acts of penance (2 Sam. 12:15–23; 1 Kings 21:27; Ps. 69:1–15), when others became sick (Ps. 35:13–14), and when one was accused and scorned (Ps. 109:4–21).

In the NT Jesus stresses that there should be joy in fasting (Matt. 6:16–18; cf. Zech. 8:19), and he fasted at the outset of his ministry (Matt. 4:2). He does not, however, enjoin his disciples to fast as did John the Baptist (Mark 2:18–20). Later textual tradition adds "and fasting" to Jesus' assertion that certain kinds of demons could not be "driven out by anything but prayer" (Mark 9:29). In the early church fasting accompanied prayer prior to the consecration of teachers and elders (Acts 13:2–3; 14:23) and during times of severe trial (Acts 27:1–38). J.G.G.

fat (Heb. *ḥelev*), greasy tissue of sacrificial animals burnt on the altar as an offering. Specifically, *ḥelev* refers to the fat covering and surrounding the entrails and the fat on the kidneys (Lev. 3:3–4), but it also has a more general sense that includes the kidneys, liver appendage, and tail (of a sheep; Lev. 4:31; 7:3–4).

The fat of sacrificial animals must not be eaten (Lev. 7:23–25; cf. 3:17).The word is also used of human fat or fat in general (Judg. 3:22, 2 Sam. 1:22; Ps. 119:70) and can also be used to mean "best of" (Num. 18:12, 29–32; Pss. 81:16; 147:14). D.P.W.

father, in the OT the immediate male progenitor, the head of a people or tribe (Gen. 19:37), the grandfather (32:9), or the founder of a town (1 Chron. 2:41–52) or a profession (Gen. 4:20, 21). The plural "fathers" refers to previous generations (Jer. 31:32; Ps. 22:4; Lam. 5:7). "Father" can be an appellation for advisors to the king or high governmental officials (Gen. 45:8; Isa. 22:21) or an honorary title given to prophets and priests (Judg. 17:10; 2 Kings 2:11; 6:21; 13:14).

A father was permitted to arrange his daughter's marriage and receive her bride-price (Gen. 34:12; 1 Sam. 18:25), the fine of the seducer (Exod. 22:17; Deut. 22:19, 29), and the compensation of a gored child (Exod. 21:31). However, the patriarchal narratives indicate that it was the custom to ask the daughter if she agreed to a marriage (Gen. 24:57–58). The father also had the right to cancel his daughter's vows (Num. 30:4–6). Although the Torah forbade selling one's daughter into prostitution (Lev. 19:29), it did permit the selling of a daughter into servitude on the condition that she become the wife of her master or his son; if the condition was not met, she would be freed (Exod. 21:7–9). As in the ancient Near East, the father apparently could sell his sons into servitude for his debts (Isa. 50:1; cf. 2 Kings 4:1). But this practice was condemned by Nehemiah (Neh. 5:1–9).

Deut. 24:16 decrees that children may not be punished for the sins of the parents (cf. 2 Kings 14:6) and vice versa, which was upheld by the prophets (Jer. 31:29–30; Ezek. 18:20). Whether or not Exod. 20:5–6 (Deut. 5:9–10) acknowledges such vicarious punishment by God is problematic; the text may refer to successive generations that continue to sin (but see Josh. 7:15, 24–25; 2 Sam. 21:6–9).

The father was obligated to circumcise his sons (Gen. 17:12, 23; 21:4; Lev. 12:3), to redeem his firstborn son (Exod. 13:13), and to educate the children in the Torah (Exod. 13:8; Deut. 4:9; 6:7, 20–25; also Prov. 3:12; 4:1). The children were to revere and obey the father equally with the mother (Exod. 20:12; Lev. 19:3; Deut. 21:18, 20; cf. Exod. 21:15; Lev. 20:9). The father's love and blessing (Gen. 27:27–40; 49) is the basis for the image of God the Father of Israel (Exod. 4:22; Deut. 14:1; 32:6; Hos. 11:1; Jer. 3:4, 19; 31:9; Ps. 103:13) and David (2 Sam. 7:14; Pss. 2:7; 89:27–28).

In the NT, "father" can refer to the male progenitor (e.g., Matt. 1:1–16; Mark 1:20; Acts 28:8), but in most instances it is used to refer to God. This Christian practice probably derives from the intimate term for father that Jesus used to address God (Heb. and Aram. *abba;* Mark 14:36; cf. Rom. 8:15; Gal. 4:6). "Father" is also the term for God Jesus used in the prayer he taught his followers (Luke 11:2). Rather than being derived from a human analogy, the term "Father" for God represents the ideal by whom every human father is to be judged (Eph. 3:14–15). ***See also*** Curse and Blessing; Family, The. J.U.

fear of the Lord, the awe that a person ought to have before God (Prov. 5:7; Eccles. 12:13). As such it can be said to constitute "true religion" (Ps. 34:11). This "fear of the Lord" is represented by the "fear and trembling" with which Paul exhorts the Philippians to work out their salvation (Phil. 2:12). It describes the piety of the growing church in Acts 9:31. However, it may also carry overtones of judgment (2 Cor. 5:11; 1 Pet. 1:17).

feasts, festivals, and fasts, activities that, in the Bible, are observed to commemorate or emphasize events in the relationship between God and human beings. In the OT, feasts and festivals were occasions of joy. They were times for thanking God for blessings and granting relief to the poor and oppressed. They were often accompanied by singing, instrumental music, dancing, elaborate meals, and sacrifices. Depending on the nature and the requirements of the occasion, they were celebrated either at a sanctuary or at a person's home.

OT Feasts and Festivals: The Pentateuch prescribes the observance of several recurring festal or otherwise positive religious occasions: every seventh day was to be set apart as a Sabbath on which no work was to be performed (Exod. 20:8–11; Deut. 5:12–15). In every seventh year (Sabbatical Year), Israelite slaves were to be released (Exod. 21:2–6; Deut. 15:12–18), land was to lie fallow (Exod. 23:10–11; Lev. 25:1–7), and debts of Israelites were to be suspended or cancelled (Deut. 15:1–6). In every fiftieth year (Jubilee Year), property was to return to its original owner, Israelite slaves were to be freed, and the land was to lie fallow (Lev. 25:8–17, 23–55). On the first day of each lunar month, a special series of sacrifices was to be made (Num. 28:11–15; cf. Ezek. 46:6–7). These new-moon festivals were days of feasting (1 Sam. 20:5, 18, 24, 27) and apparently days of rest (Amos 8:5). Of the new-moon festivals, that in the seventh month (the Feast of Trumpets) was the most important (Lev. 23:23–25; Num. 29:1–6). Three festivals, called pilgrimage festivals, required the participation of Israelite males at the sanctuary (Exod. 23:14, 17; 34:23; Deut. 16:16–17): (a) the Passover and Feast of Unleavened Bread, which were celebrated from the sunset of the fourteenth to the twenty-first day of the first month (Exod. 12; 23:15; 34:18, 25; Lev. 23:5–8; Num. 9:1–14; 28:16–25; Deut. 16:1–8; Ezek. 45:21–24); (b) the Feast of Weeks, which occurred at the beginning of the wheat harvest seven weeks after the presentation of the barley omer (Exod. 23:16; 34:22; Lev. 23:15–21; Num. 28:26–31; Deut. 16:9–10); and (c) the Feast of Booths, which was celebrated on the fifteenth through the twenty-second days of the seventh month when the harvest and produce were gathered in (Exod. 23:16; 34:22; Lev. 23:33–36; Num. 28:12–39; Deut. 16:13–18; Ezek. 45:25).

Beside the foregoing prescribed festivals, there are descriptions of other types of festivals and feasts in ancient Israel. Judg. 21:19–24 tells of a yearly festival in Shiloh. This may have been Shiloh's version of the Feast of Booths or it may have been a separate festival celebrating the new vintage. According to 1 Samuel 1 and 2, Elkanah and his family made yearly visits to the sanctuary at Shiloh to offer sacrifice and worship God. These visits may have been connected with the yearly festival mentioned in Judges 21, but more probably they were separate family or clan celebrations in the sanctuary city (cf. 1 Sam. 20:5–6, 24–39).

Public celebrations accompanied dedication or renovation of temples (1 Kings 8; 2 Chron. 29) and the coronation of kings (1 Kings 1:39–40; 2 Kings 11:12, 13, 20). Military victories were occasions of celebrations (1 Sam. 18:6–7; cf. 30:16). Families celebrated major events in the lives of their members such as the weaning of children (Gen. 21:8) or marriages (Gen. 29:22; Judg. 14:10–11; Tob. 10:7; Mark 2:19; John 2:1–2). Sheepherders, with families and friends, held festivals when flocks were sheared (1 Sam. 25; 2 Sam. 13:23–29; cf. Gen. 31:19; 38:12). Finally, sharing a sacrifice made to celebrate one's well-being with invited guests was a joyful festive occasion (cf. Lev. 3; 7:11–18; Deut. 12:6–7, 11–12, 17–18; 1 Sam. 9:22–24; 16:2–5; Job 1:4).

There were certainly festal observances in biblical times about which the Bible says little or nothing. The *Temple Scroll* from Qumran (columns 19–25) prescribes new-wine, new-oil, and wood-offering (cf. Neh. 10:35; 13:31) festi-

FEASTS, FESTIVALS, AND FASTS

vals in addition to the three pilgrimage festivals in the Pentateuch. These are probably not inventions but reflect ancient practice that was never codified in the Bible.

Later Jewish religious victories gave rise to celebrations that have remained part of Judaism to this day. Hanukkah (the Feast of Dedication) commemorates the rededication of the Temple altar by Judas Maccabeus on the 25th of Kislev (December) in 164 B.C. (1 Macc. 4:36–59; 2 Macc. 10:6–8; John 10:22). Purim, celebrated on the fourteenth and fifteenth of Adar (Feb.–March), commemorates the deliverance from the persecutions of Haman as described in the book of Esther (cf. 9:19–28).

Fasts: In contrast to feasts and festivals, fasts were times of mourning and self-denial arising from misfortune and sin. They could be single spontaneous responses of individuals, single spontaneous responses of the public, or recurring annual public observances.

Individuals fasted to obtain divine aid (2 Sam. 12:16–23; Dan. 9:3), to repent (1 Kings 21:27), to mourn (Neh. 1:4), to obtain revelation (Exod. 34:28), or to express devotion to God (Ps. 35:13; Luke 18:12). Similarly, the community often undertook a single fast to obtain God's help or protection (Judg. 20:26; 1 Sam. 14:24; Joel 1:14; Esther 4:3; Ezra 8:21–23), to express repentance (1 Sam. 7:6; Jon. 3:5–10), or to mourn the death of leaders (1 Sam. 31:13; 2 Sam. 1:12).

The only prescribed annual fast is that on the Day of Atonement (Lev. 16:29–34; 23:26–32; Num. 29:7). It occurred on the tenth day of the seventh month. The people were to "afflict themselves," meaning they were to abstain from food and drink and other bodily gratifications (cf. 2 Sam. 12:16–20; Dan. 10:2–3).

After the destruction of Jerusalem and the Temple by the Babylonians (580 B.C.), fasts were annually held in the fourth, fifth, seventh, and tenth months to mourn this calamity (Zech. 7:3, 5; 8:19). A public fast preceded the festival of Purim on the thirteenth of Adar; Esther 9:31 apparently refers to this (cf. 4:16).

In the NT: In the NT, the Gospels report that Jesus observed Jewish feasts (John 5:1; 7:2, 10; Matt. 26:17–18), and a tradition recorded by Paul reports that Jesus transformed Passover for his followers into a ritual remembrance of his death (1 Cor. 11:24). Aside from that, however, the NT contains few regulations pertaining either to fasts (Matt. 6:16–18 does not prescribe fasts, it simply gives advice to those fasting; but see Mark 2:20) or to festivals. Those that are observed by Christians have grown out of the traditions of the life and practices of Jesus and the experiences of the church: for example, Christmas, to celebrate Jesus' birth (Luke 2:1–20); Epiphany, the appearance of the Magi (Matt. 2:1–12); Lent, Jesus' temptation in the wilderness (Matt. 4:1–11; Luke 4:1–12); Easter, Jesus' resurrection (Mark 16:1–8); Ascension Day, his

The joyous festivities marking the occasion when David brought the Ark of the Lord to Jerusalem; from a thirteenth-century French miniature.

ascent into heaven (Acts 2:9–10); and Pentecost, the gift of the Holy Spirit (Acts 2:1–11). Because the cardinal event of the Christian faith, the resurrection of Jesus, occurred on a Sunday, Christians turned to that day, rather than the Sabbath (Saturday), for their regular worship. ***See also*** Atonement, Day of; Easter; Esther; Fasting; Jubilee; Lord's Supper, The; Passover, The; Pentecost; Purim, The Feast of; Sabbath; Sabbatical Year; Tabernacles, Festival of; Trumpets, Feast of; Worship.

Felix, Antonius (fee´liks, an-tohn´ee-uhs), Roman procurator of Judea (ca. A.D. 52–59). According to the historians Tacitus and Josephus, he was brutal in his rule. He owed his position to his influential brother Pallas, but, because of immorality and incompetence, he was eventually replaced.

According to Acts 23:23–24:27, Felix became involved with Paul when the apostle was sent to Caesarea for trial upon recommendation of Claudius Lysias, the tribune in Jerusalem. The writer of Acts indicates that Felix followed appropriate judicial procedure during Paul's hearing. After listening to Paul speak on matters pertaining to faith in Jesus Christ, however, he is pictured in unfavorable terms. Hoping for a bribe, which was not forthcoming, and "desiring to do the Jews a favor," he allowed Paul to languish in prison for the remainder of his term in office. ***See also*** Claudius Lysias; Paul. A.J.M.

felloe (fel´oh; KJV; RSV: "rim"), the edge of a wheel on the portable water stands in the Jerusalem Temple (1 Kings 7:33).

fellowship, communal association for the mutual benefit of those involved. In the OT the Sinai covenant binds together all Israelites into what is, ideally, a grand fellowship of mutual obligation and concern. Furthermore, covenant images clearly suggest a kind of fellowship between God and his people. For example, Israel is the wife of God (Hos. 1–3; Jer. 2:2; Ezek. 16); God has "known" (chosen) Israel (Amos 3:2), and Israel is to "know" (acknowledge, obey) God. God's election of Israel is motivated by his love (Deut. 7:7), and Israel is to be his own possession among all peoples (Exod. 19:5). The language of petition and worship often reflects the close bond between ancient Israel and its God (e.g., Pss. 42, 46, 63), as do the rituals of sacrifice.

Occasionally the Bible presents instances of a special fellowship with God enjoyed by individual persons. Enoch "walked with God" (Gen. 5:24); Abraham is called the "friend" of God (2 Chron. 20:7; Isa. 41:8); and Moses talks with God "face to face" (Exod. 33:11; cf. Deut. 34:10). The prophets' experience of being commissioned by God suggests a special bond between the deity and his spokesmen (Isa. 6; Jer. 1; Ezek. 1), and the Davidic king is called God's son (2 Sam. 7:14; Ps. 2:7). In spite of all this, however, the Hebrew equivalent of the word "fellowship" is remarkably rare in the OT.

In the NT, fellowship is the bond among Christians created by their common confession that Jesus is Lord. In Paul's Letters this fellowship is marked by the spiritual oneness effected by baptism and bestowal of the Spirit (Gal. 3:27–28; 1 Cor. 12). It is manifested by the gathered community at the Lord's Supper (1 Cor. 11:17–34) and characterized above all by self-giving love (1 Cor. 13). This fellowship of believers is dependent on—and an expression of—their fellowship with Christ. Eating the one loaf of the Lord's Supper makes the many into one body even as it enables the participants to commune with the Crucified One (1 Cor. 10:16–17).

Fellowship with Christ means that believers share his death and experience the new life that corresponds to his resurrection (Rom. 6:1–11; Phil. 3:8–11), sustained by the hope that at his coming they will forever be with him (1 Thess. 4:13–17). The apostle stresses, further, that communion with Christ excludes other types of fellowship, for example, fellowship with prostitutes or demons (1 Cor. 6:15–17; 10:19–21).

In the Gospel of John Christian fellowship is characterized by a perfect oneness grounded in the closest of relationships with the Father and the Son (17:11, 21–23; see also 1 John 1:3, 6, 7). Jesus is the true vine in which believers must "remain" if they would bear fruit—which is, above all, love for one another (John 15). ***See also*** Covenant; Friendship; Lord's Supper, The.

S.K.W.

feminist hermeneutics (huhr´muh-nyoo´tiks), a mode or process of interpretation that rests on two frameworks: feminism and hermeneutics.

Feminism is a political term identifying a movement that acts to "critique the oppressive structures of society" and works for transformation of these structures. In this sense feminism is a liberation movement that focuses on gender as a primary analytical category, making explicit the interconnections among all systems of oppression. Just as feminism reaffirms and promotes the full humanity of women, it rejects and denies anything that diminishes the full humanity and equality of women, as well as any dominance pattern that seeks to separate, alienate, and oppress. Feminism offers a broad-based critique built from the experience of women, but not exclusive to women.

Hermeneutics, often translated as "interpretation," refers to the theory, practice, or art of interpretation based on interactions among the author,

FEMINIST HERMENEUTICS

the text, and the reader. The reading strategies of the reader and the compositional techniques and style used by the author to create a text provide the necessary interplay between the act of communication and the making of meaning.

In 1895, Elizabeth Cady Stanton's *The Woman's Bible* launched a public debate in the United States about the Bible and its authority. In this project Stanton saw how the issues of translation, canon, biblical authority, and the androcentric bias of the text had broad social and political implications in how the Bible was represented in the culture and used against women. In this period, women reading the Bible as women and offering, through their interpretations, a critique of society and cultural institutions was unpopular.

For both past and present, then, feminist hermeneutics of the Bible is concerned with both the theory and the practice of interpretation as they embrace a variety of methodological approaches and disciplines and are attentive to the relation between interpretation and social location, particularly with reference to race and class. Women reading the Bible as women represent a diverse array of perspectives and address issues associated with the theory of interpretation from disparate standpoints; e.g., how one reads (interprets), what one reads (canon question), and what the reading process does to the reader and to the community in which a text is read (translation, authority). The feminist scholar approaches and studies these issues recognizing that the Bible is a product of ancient patriarchal cultures demonstrating both androcentric biases and patriarchal values.

The practice of feminist hermeneutics recognizes that reading is a social activity, that texts have a political function, and that interpreting biblical texts has implications in and an impact on both ecclesial and cultural institutions. How the synagogue and the church use and read the Bible has religious, political, and cultural implications for women and for men. The issue of how one reads is further informed by who does the reading. Privileging women's experiences, concerns, and interpretations is at the heart of feminist hermeneutics. Recognizing that reading is not a value-neutral activity (readers always read from experience and read what they know how to read), feminist biblical scholars understand that gender, as a fundamental organizing category of experience, requires that women read the Bible with different interpretative lenses because their experience is different.

Feminist hermeneutics is practiced in at least three modes, none of which is exclusive of the others. These modes—deconstructive, reconstructive, and constructive—are elastic categories that demonstrate something of the perspectives and the interests of feminist biblical scholarship. For example, those engaged in the deconstructive mode frequently reconstruct, and those engaged in the reconstructive mode must deconstruct certain elements of the text and historical world first. Both the deconstructive and the reconstructive modes provide the possibility for and contribute to the constructive mode.

The Deconstructive Mode: Those engaged in the deconstructive mode suggest that one way to transform the present is to understand and alter the dynamics of the past and the patterns of dominance that result in the present situation. Two examples, translation theory and the history of biblical interpretation, serve to illustrate the contributions of feminist biblical scholarship in the deconstructive mode. In understanding Bible translation as a claim to authority issues and power relations, feminist scholars experienced (in culture and in ecclesial communities) that translation "has been a highly gendered activity" and by identifying patriarchialized interpretative traditions have exposed the fiction of "objective readings" as well as the pretense that interpretation is a value-neutral activity.

The Reconstructive Mode: For many the biblical texts not only obscure women; they erase them from textual (and community) memory. The fragmentation of some stories of women and the eclipse of others prompt some feminist scholars to examine both ancient texts and the ancient social world in an attempt to recover and reconstruct the social, political, economic, communal, and ministerial legacy of women in the ancient world. Others are involved in charting women's history in the ancient world, noting how cultural values (particularly the male as normative) determine access to power, economic autonomy, and social and legal limitations, which in turn affect what stories are told, how stories are told, and who tells the story. Yet others are engaged in new interpretations of texts that specifically portray women, attempting to illustrate the overlooked, underrepresented, or hidden treasure of women characters or to demonstrate that the Bible contains "texts of terror" that continue to be used against women to defend patriarchal positions.

The Constructive Mode: Women cannot claim a biblical literature of their own (in the canonical sense). The biblical texts about women were written by men and presume the values of patriarchal cultures, so for much of the last twenty-five years feminist scholarship has provided studies of texts that deal, explicitly or implicitly, with women. During this time a library of resources has appeared including countless journal articles, a few commentaries, and at least one introduction to the Hebrew Bible using feminist methods, but almost always such works were restricted to texts about women.

The constructive mode is made possible because of the work done in both the deconstructive and the reconstructive modes, i.e., this feminist library of biblical research materials. And both the deconstructive and the recon-

structive modes have affected, to some extent, how academic and ecclesial communities now approach, interpret, and translate the biblical texts. As feminist hermeneutics moves into the next decade, the constructive mode will increasingly be evident. In this mode feminist hermeneutics is moving toward producing scholarly resources that study the entire canon, that translate, analyze, and interpret the entirety of a work from a feminist perspective. This is a mode in which feminist hermeneutics (still attentive to both the deconstructive and the reconstructive modes) will contribute commentaries, dictionaries, translations, and other resource tools that will take their place on library shelves as perspectival studies next to the already existing perspectival studies (what is commonly called traditional research). ***See also*** African Americans and the Bible; Bible; Biblical Criticism; Canon; Hermeneutics; Liberation Theology, Hermeneutics of; Women.

fenced cities, a term used by the KJV where the RSV has "fortified cities" (Josh. 14:12; 2 Kings 18:13; 2 Chron. 8:5). ***See also*** Forts; Walls.

Fertile Crescent, a term coined by the modern scholar J. H. Breasted to describe the crescent-shaped area of fertile land extending from the Tigris and Euphrates rivers, commonly known as Mesopotamia, westward over Syria to the Mediterranean and southward through Palestine and the Nile Valley of Egypt. While the term does not appear in the Bible and is used less frequently today, it is a convenient term to use for this important strip of land in which some of the earliest sedentary cultures emerged. The ancient cities in this region included Ur, Mari, Nuzi, and Alalakh. Sumerians, Assyrians, and Hittites passed through this land. Hebrew tradition developed here. The region also provided a bridge between Africa, Asia, and Europe for armies, merchants, and pilgrims and continues to do so in the twentieth century. ***See also*** Hittites; Mari; Mesopotamia; Nuzi; Sumer; Ur.

fertility cult. ***See*** Worship.

Festus, Porcius (fes´tuhs, pohr´shuhs), the Roman procurator over Judea who replaced Antonius Felix (ca. A.D. 59). According to the historian Josephus, he was a competent public official. He died in office several years after his appointment.

According to Acts 25:1–26:32, Festus encountered Paul, a prisoner in Caesarea, when Festus arrived as procurator. He was bewildered by Paul's religious convictions. After Paul appealed his case to Caesar in Rome, Festus arranged for a hearing in the presence of the visiting King Agrippa II and Bernice, where Paul again gave a defense of his belief in Jesus. Again, while Festus was incapable of perceiving anything worthwhile in Paul's preaching and declared him mad, neither could he find any reason to imprison him or put him to death (26:30–32). Nevertheless, because Paul had appealed to Caesar, he was sent, under guard, to Rome (Acts 27–28). ***See also*** Agrippa II; Bernice; Felix, Antonius; Paul. A.J.M.

fig (*Ficus carica*), a fruit tree common in both wild and cultivated forms throughout the Near East since ancient times. It is a beautiful shade tree whose large palm-shaped leaves were said to have been used to cover the nakedness of Adam and Eve in the Garden of Eden (Gen. 3:7). The pear-shaped fruit, which is produced more than once during the year, has a high sugar content and is very sweet when ripe. It is eaten fresh or dried into cakes, which like those made from dates are storable and thus an ideal food for travelers (1 Sam. 25:18).

The fertilization of the fruit is dependent on a tiny wasp, which carries pollen into the inner parts by boring into the center of the fruit. The fig tree therefore will not bear fruit if the wasp is absent and may even require hand-fertilization by incision.

The fig also has medicinal properties as a poultice applied to wounds and boils (2 Kings 20:7; Isa. 38:21). The beauty and shade quality of the fig tree, as well as the popularity of the fruit, makes it a favorite even today in house gardens and orchards where it is often planted alone in a corner. The fig is often associated with the grape vine as a symbol of peace and

Fig.

prosperity, providing shade and sustenance for the family it protects (1 Kings 4:25). A fig tree that failed in its purpose of bearing figs was cursed by Jesus (Matt. 21:18–19) perhaps as a metaphor for the destruction of the Temple that similarly failed to bear proper religious fruit (cf. Mark 11:12–25). ***See also*** Mulberry; Sycamore. P.L.C.

figurines, small carved or molded figures that function in ornamental or symbolic fashion. The *teraphim* (Gen. 31:19, 34; Lev. 26:1) is an example. Probably small representations of divinities, they were a form of protection in the Greco-Roman world (Acts 19:24), as well as in more ancient Palestine (Jer. 10:24). They have been found in almost every era of occupation in a number of archaeological sites.

fine, a verb (KJV) that designates the process by which impurities are removed from precious metals (RSV: "refine," Job 28:1; see also Prov. 25:4; 27:1). As an adjective it means of good and delicate or firm quality (Gen. 41:42) or composed of extremely small particles (Exod. 9:9).

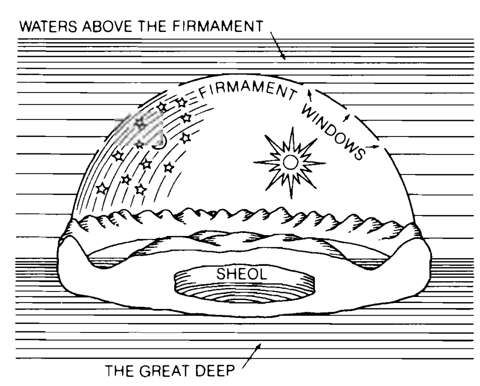
finer (KJV; RSV: "smith"), one who processes metals by purifying ore (Prov. 25:4).

fining-pot. ***See*** Crucible.

fire, combustion giving off light, flame, and heat. Besides normal domestic uses (cooking, heating, lighting), it was used in the refining of metals, in various crafts, in the waging of war, and in sending messages. Fire also had specialized uses in worship. A perpetual fire burned in the Temple, and fire was used both for roasting sacrifices for human consumption and for burning incense. Of much greater importance in the Bible, however, is its symbolic meaning.

Fire is a common symbol of holiness and in some cases of protection (cf. Zech. 2:5). It represents divine action, with God himself presented as "a consuming fire" (Heb. 12:29; cf. Deut. 4:24). Fire is God's servant (Ps. 104:4; Heb. 1:7), and his word is like fire (Jer. 23:29). In reference to God's action, fire is most frequently a symbol of destruction associated with the wrath of God and his jealousy. As a metaphor of God's holiness, however, it may also purge or purify. The Babylonian exile is described as purification by fire (Ps. 66:12; Isa. 43:2), and certainly the Day of the Lord will purify Israel (Zech. 13:9; cf. 1 Cor. 3:13–15).

Fire is a central element of the description of theophany throughout biblical literature. God's appearance for covenant with Abraham (Gen. 15:17), the appearance in the burning bush (Exod. 3:2), the leading of Israel with the pillar of fire by night (Exod. 13:21–22), and the appearance in fire on Mount Sinai (Exod. 19:18) are central elements in Israel's faith. Such fiery theophanies continue in the NT as well. Christ's appearance in the vision of John is with "eyes of fire" (Rev. 1:14; 2:18), and the descent of the Holy Spirit is accompanied by "tongues of fire" (Acts 2:3). ***See also*** Theophany. D.L.C.



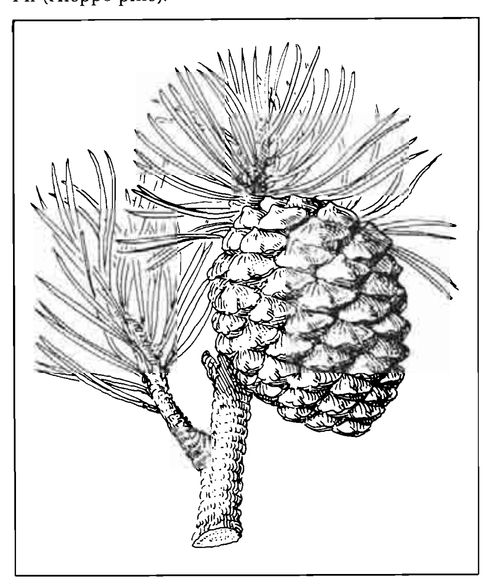
fire, tongues of. ***See*** Tongues as of Fire.

firebrands, usually pieces of wood set on fire. They were used by Samson in his revenge against the Philistines (Judg. 15:4); they were tossed over the city wall in time of military siege, as were the olive boughs during the attack of Lachish; or they were hurled as missiles by madmen (Prov. 26:18). Plucked by God "from the burning," they symbolized individuals rescued by the Lord (Amos 4:11).

firepan, a portable metal pan for carrying hot coals on which incense was placed as an offering (Lev. 16:12–13; Num. 16:46). Firepans were made for use with the lampstand and the burnt offering altar (Exod. 25:38; 27:3).

firkin (fuhr'kin). ***See*** Gallon.

firmament, God's division between cosmic waters on the second day of creation (Gen. 1:6–8), forming the sky. One must here imagine a flat earth and a domed expanse of heavens holding back celestial waters from terrestrial. The Hebrew term *raqia'* suggests a thin sheet of beaten metal (cf. Exod. 39:3; Num. 17:3; Jer. 10:9; also Job 37:18). Similar metaphors for sky are found in Homer and Pindar. Job 26:13 depicts God's breath as the force that calmed (or "spread," "smoothed" or "carpeted") the heavens. Luminaries were set in the firmament on the fourth day of creation (Gen. 1:14–19). Rains



The Hebrew universe. The ancient Hebrews imagined the world as flat and round, covered by the great solid dome of the firmament which was held up by mountain pillars (Job 26:11; 37:18). Above the firmament and under the earth was water, divided by God at creation (Gen. 1:6, 7; cf. Pss. 24:2; 148:4). The upper waters were joined with the waters of the primordial deep during the Flood; the rains were believed to fall through windows in the firmament (Gen. 7:11; 8:2). The sun, moon, and stars moved across or were fixed in the firmament (Gen. 1:14–19; Ps. 19:4, 6). Within the earth lay Sheol, the realm of the dead (Num. 16:30–33; Isa. 14:9, 15).

were believed to fall through sluices or windows in its surface (cf. Gen. 7:11). During the Flood, the upper waters joined with the waters of the primordial deep (Heb. *tehom*). In more pacific contexts, the firmament, or its pattern of luminaries, is said to declare the praises of God (Ps. 19:1; cf. 150:1). In Ezekiel's "chariot" vision, a crystal firmament supports the divine throne (Ezek. 1:22, 25, 26), just as something resembling a pavement of lapis lazuli is said to lie at the feet of Yahweh's throne in Exod. 24:10. Dan. 12:3 alludes to the "radiance" (Heb. *zohar*) of the firmament. Rabbinic sources regarded the firmament as the chief source of light for heavenly denizens. ***See also*** Creation; Genesis. J.W.R.

firstborn, first fruits, firstling, the firstborn male child (Exod. 13:12–15; Num. 18:15–16), the seasonal initial produce of agriculture (Exod. 23:19; Lev. 23:10; Num. 15:20–21; Deut. 26:1–11) and food products (Num. 18:12–13; Deut. 18:4; Ezek. 44:30), and the first offspring of domesticated pure and impure animals (Exod. 13:12–13; Lev. 27:26–27; Num. 18:16–18; Deut. 15:19–23). These three "firsts" are all accorded a sanctified status in the Hebrew Bible (and were also often similarly regarded in other cultures of the ancient Near East). The first fruits of agriculture are given to God in religious ritual in acknowledgment of his ownership of the earth (Ps. 24:1), upon which humans are mere tenants (thus, Abel's offering is preferable to Cain's, Gen. 4:3–5). This transfer invokes God's blessing on the rest of the produce (Lev. 19:24–25; Prov. 3:9–10). The male firstborn of humans and beasts in Israel become dedicated to God because he saved them from the slaughter of the firstborn of Egypt (Exod. 13:14–15). This plague, in turn, was brought upon the Egyptians for enslaving Israel, God's own appointed firstborn (Exod. 4:22; cf. Jer. 2:3; 31:9). Israel's firstborn status is reflective of sociolegal realities. The firstborn son inherits a double portion of his father's estate (Deut. 21:15–17; Isa. 61:7), the paternal blessing (Gen. 27), and succession to authority (Gen. 27:29, 37; 37:21–22; 2 Kings 2:9). The Davidic king is also viewed metaphorically as God's firstborn (Ps. 89:28), an appellation the NT applies to Jesus (Heb. 1:6). ***See also*** Curse and Blessing; Priests; Worship. J.U.

fir tree, a general term often mentioned in the book of Isaiah in reference to coniferous evergreens, such as the cypress, juniper, and pine. Specifically, "fir tree" most likely refers to the stately Aleppo pine (*Pinus halepensis*), a tree common to the arid hilly regions of Palestine and Lebanon. It is often found growing mixed with cedars (Isa. 60:13; 2 Kings 19:23 KJV; RSV: "cypress") and was one of the trees sent by Hiram to Solomon for the construction of his Temple (1 Kings 5:10; 2 Chron. 2:8; RSV: "cypress"). Aside from its use in architecture, the fir tree was also cut into planks for shipbuilding (Ezek. 27:5) and made into some musical instruments (2 Sam. 6:5). ***See also*** Cypress; Forest; Pine; Woods. P.L.C.

Fir (Aleppo pine).

fish, aquatic gilled animals. The Bible takes fish and fishing for granted and makes no distinction between fresh- and salt-water fish, access to both of which was readily available in certain parts of the country. The major salt-water fish sources were the long coast of the Mediterranean Sea and the waters of the Gulf of Aqaba. The primary source of fresh-water fish was the Sea of Galilee and some of the reaches of the Jordan River. Archaeological recovery of both salt- and fresh-water fish bones used as food, jewelry, or both indicates that they were shipped considerable distances, illustrated for instance by both Mediterranean and Red Sea (Gulf of Aqaba) species recovered at Tell Hesban in Moabite Transjordan, east of the Dead Sea. The main fresh-water species available in the Sea of Galilee included the mouth breeding Cichlidae, of which two varieties of Tilapia (*Tilapia galilaea* and *Tilapia nilotoca*) were common, Cypinidae, including two common carp (*Barbus canis* and *Barbus longiceps*), and Siluridae, the catfish *Clarias lazera.*

Levitical law considered fish with fins and scales to be clean, but others unclean (Lev. 11:9–12). Catfish were thus spurned among the fresh-water species, but salt-water eels, sharks, rays, and lampreys were also shunned. In addition to the "fish of the sea" (Gen. 1:26), the Bible recognized the habitats of fish to include the Nile (Exod. 7:18; Num. 11:5), streams (Ezek. 29:4), the Mediterranean ("Great Sea," Ezek. 47:10) and the Sea of Galilee (Luke 5:1–11, "Gennesaret"). Methods of catching fish mentioned include dragnet (John 21:8), angling with hook (Job 41:1; Amos 4:2; Matt. 17:27), harpoons and spears (Job 41:7), and thrown hand-nets (Matt. 4:18).

While the primary use of fish was for food (Luke 11:11; Mark 6:41), preparation of which included broiling (John 21:9), the symbolism of fish included the death of the plagues (Exod. 7:21) and the death of drought (Isa. 50:2) as well as untimely death (Eccles. 9:12). Fish being caught symbolized the helplessness of humans before the power of God (Hab. 1:14–16). The techniques of fishing became a model for the work of Jesus' disciples as "fishers of men" (Mark 1:17; Matt. 4:19). One of the gates of Jerusalem was named the "Fish Gate" (2 Chron. 33:14; Neh. 3:3; 12:39; Zeph. 1:10) in postexilic reconstruction, possibly in the north wall of the Mishneh or Second Quarter of the city.

Sometime in early church life, the figure of a fish took symbolic value as the sign of the Christ. The acrostic derived from the Greek letters of the word "fish" (*ichthys*) were understood to stand for the Greek words for "Jesus [*i*] Christ [*ch*], God's [*th*] Son [*y*], Savior [*s*]" and the use of the symbol persists to this day in Christian iconography. R.S.B.

fitch, a designation (KJV) for two plants. In Ezek. 4:9 it designates an inferior species of wheat (RSV: "spelt"), either *Triticum spelta* or *Triticum dicoccoides.* In Isa. 28:25, 27 it probably designates black cumin (RSV: "dill") or "nutmeg flower" (*Nigella sativa*) rather than the true cumin with which it is paired. True dill, *Anethum graveolens,* and true cumin, *Cuminum cyminum,* were both cultivated as condiments. Fitch is also an archaic term for "vetch," a group of plants in the *Vicia* genus.

flagon, a vessel for storing and/or serving liquids. The word appears four times in the OT, in three instances paired with bowls, thus suggesting complete service for food and drink in ritual contexts (Exod. 25:29; 37:16; Num. 4:7). In Isa. 22:24, flagons are referred to metaphorically for the weight of the responsibility placed on Eliakim as royal vizier to his ancestral house, a house that will perish with his downfall.

flags (KJV; RSV: "reeds" in Exod. 2:3, 5; Job 8:11 or "rushes" in Isa. 19:6), a variety of plants growing in marshy or river bank locations, such as iris or cattails. The Hebrew term *suph* ("soof") is used for the reeds or rushes at the edge of the Nile in the story of Moses' infancy (Exod. 2:3, 5) and is the name of the "Sea of Reeds" through which Moses led the Israelites out of Egypt (Exod. 13:18), although the latter is translated by the Septuagint as "Red Sea." In Job 8:11 the watery matrix needed by the plants is cited, and in Isa. 19:6 the decay of the plants is a sign of desolation and destruction. R.S.B.

flax (*Linum usitatissimum*), a delicate plant with beautiful blue flowers. It has been known since prehistoric times in the Near East. It is the earliest known cultivated fiber plant and was

Flax.

used to make linen. Linen of varying quality was used for Temple vestments (Exod. 25:4) as well as for ordinary garments, sails, nets, and even twine. It was also the wrapping cloth used for the dead (Matt. 27:59). The harvested flax plants were soaked in water in order to separate the fibers and then spread to dry, the hot exposed rooftops being an ideal place for such activity (Josh. 2:6). Linseed oil is extracted from the seeds, and the dregs are then given to the animals as fodder. ***See also*** Linen. P.L.C.

flesh, the soft material of the body (Job 10:11). More narrowly, it can refer to the penis (Exod. 28:42), foreskin (Gen. 17:9–14), and hence sexual union (Gen. 2:24) and generation (John 1:13). More broadly, it refers to the whole body or person as represented by the body (John 1:14), to one's kin (Rom. 9:3), to humanity and therefore what is human (Isa. 40:5; Phil. 3:3–4), and to humans and animals (Gen. 6:17–20). Animal flesh is "meat" (Dan. 10:3) or the meaty part of a sacrifice (Lev. 6:24–27). "Flesh" connotes sensitivity (Ezek. 11:19), superficiality (John 8:15), weakness (2 Chron. 32:8), and mortality (Ps. 78:39). Paul uses "flesh" for the urge to sin (Gal. 5:19–21). ***See also*** Body; Flesh and Spirit; Human Being. R.H.G.

flesh and spirit, complementary and contrastive terms whose meaning must be derived from the context in which they are used. The phrase "the spirits of all flesh" (Num. 16:22; 27:16) refers to human beings as animated physical bodies. Their spirit, or breath, comes from God. He can withdraw it from flesh so as to produce death (Gen. 6:3) or grant it to flesh so as to produce life, even life after death (Ezek. 37:1–14). Thus, in the NT, Jesus' resurrection by the Spirit is more impressive than his fleshly descent from David (Rom. 1:3–4; cf. 1 Tim. 3:16).

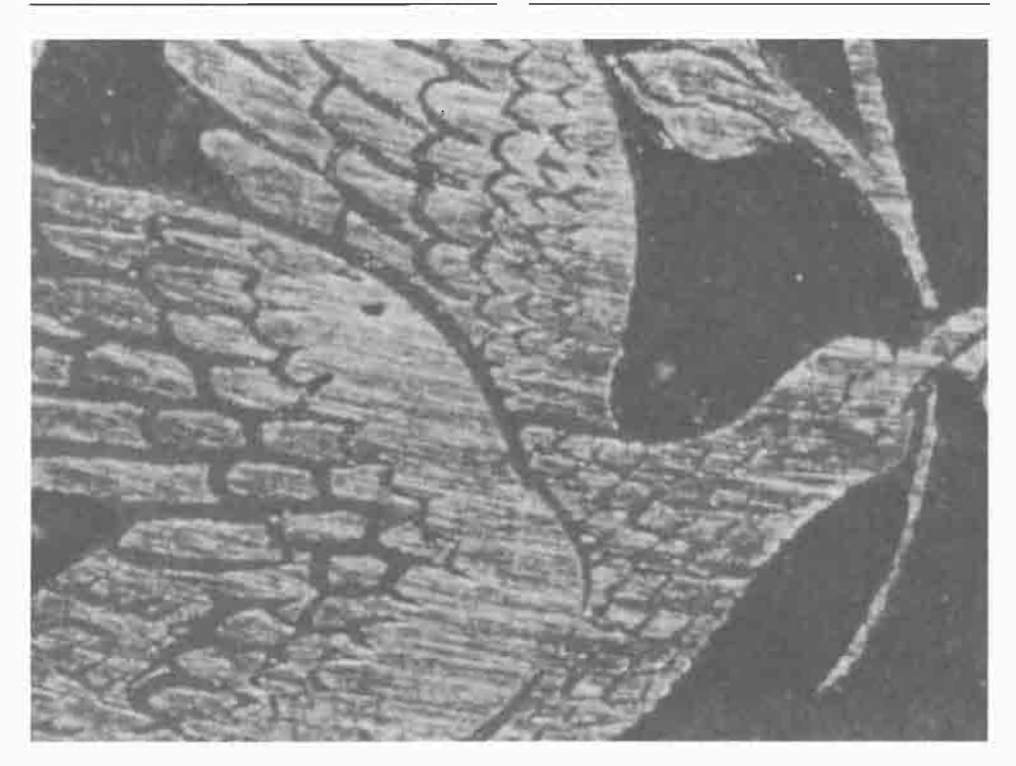
Since flesh connotes weakness (Ps. 56:4; Rom. 8:3) and spirit connotes power (Zech. 4:6; Luke 24:49; Acts 1:8), the two stand side by side for the contrast between weak human beings and Almighty God (Isa. 31:3). Similarly, acceptable worship of God in the Spirit contrasts with unacceptable attempts to please God in the flesh (Phil. 3:3). But the weakness of flesh (simple tiredness) can prove stronger than the human spirit's will to pray (Mark 14:38, a will some people think refers to the Holy Spirit's desire).

According to 2 Cor. 7:1, sin may defile both the flesh (in the sense "body," as in the RSV) and the spirit (not the Holy Spirit, which is hardly the object of defilement). One can be absent in flesh (again in the sense "body," as in the RSV) but present in spirit (Col. 2:5). At the last day, the spirit may be saved even though the flesh (presumably the present mortal body, though some think the sinful urge) has to be destroyed prematurely in punishment for a heinous and unrepented sin (1 Cor. 5:5).

In Paul's writings, the contrast between the Holy Spirit and flesh (often as the sinful urge) looms larger than the distinction between the human spirit and the physical flesh it animates (in some passages, however, it is unclear whether God's Spirit or the human spirit is intended). Paul associates the Spirit favorably with faith, the flesh unfavorably with the works of the law (Gal. 3:2–3). Isaac, freeborn according to the Spirit, represents God's gracious promise; Ishmael, slaveborn according to the flesh, represents the law, which brings a curse (Gal. 4:21–31). The spiritual person is determined by God's Spirit; the fleshly person behaves like unbelievers, who do not have the Spirit (1 Cor. 2:12–3:4). Vices (nonphysical as well as physical) are the works of the flesh; virtues are the fruit of the Spirit (Gal. 5:16–25). Fleshly behavior leads to death; behavior according to the Spirit leads to eternal life (Gal. 6:7–8; Rom. 8:1–17).

In the Gospel of John, the gift of the divine Spirit makes up for what is lacking in merely human (but not evil) flesh (John 3:3–8; 6:52–63). ***See also*** Flesh; Holy Spirit, The; Human Being. R.H.G.

fleshhooks, forklike implements used by priests for sacrifices (Num. 4:14; 1 Sam. 2:13–14, which speak of their having three prongs), now usually translated "forks." Those in use at the Jerusalem Temple were made of gold (1 Chron. 28:17) and bronze (2 Chron. 4:16).



flint, an impure quartz rock, usually gray, brown, or black, abundant in Palestine. It fractures on conchoidal lines, and holds an extremely sharp edge, either smooth or serrated. It was used for a variety of tools from the earliest tool-making period and continues in use to the present. It was especially efficient for awls, axes, knives, picks, scrapers, sickles, and weapons (arrowheads and spear points).

Knives used for circumcision were made of flint (Exod. 4:25; Josh. 5:2, 3). Flint serves as a metaphor for sharp-cutting destructive power (Isa. 5:28) and stubborn faithfulness (Isa. 50:7) and is a dubious source of water (Ps. 114:8; Deut. 8:15). It can be manipulated by humans (Job 28:9) but is a most unlikely source of any nourishment (Deut. 32:13).

Flint tool technology is an increasingly helpful datum for dating prehistoric cultures, and archaeological research is adding constantly to such resources and their precise use in identifying historical epochs. R.S.B.

Flood, the, the catastrophic excess of water described in Genesis 6–8. The biblical story of the Flood relates how God destroyed the existing world but saved Noah and his family and representatives of each animal species in an

Dove with olive leaf, which indicated to Noah that the waters had subsided from the earth (Gen. 8:11); panel from the Verdun Altar, 1180.

ark. After the waters subsided and the ark rested on Mount Ararat (8:4), Noah sent out a raven and then a dove (which brought back an olive branch); seven days later he sent out another dove, which did not return (8:6–12). Noah disembarked, offered sacrifices, and formally rebegan the world by a contract (covenant) in which Noah and his sons received instructions and God promised not to bring a flood again (8:13–22; 9:8–17), a promise signaled by the appearance of the rainbow.

The OT word for the cosmic flood is *mabbul,* which also refers to the heavenly ocean (cf. e.g., Ps. 29:10). The Flood was an undoing of creation: the cosmic waters overwhelmed the earth, coming through the windows of the sky and the fountains of the great deep beneath the earth (7:11; cf. 8:2). Thus, return to the primeval watery condition set the stage for a new beginning for the world (cf. Gen. 1:2, 9).

Mesopotamian Flood Stories: The meaning of the Flood story is illuminated by comparative studies. Although there are many Flood legends throughout the world, particularly in America, Australia, and the Pacific Islands, the many parallels between the biblical and Mesopotamian Flood stories (most strikingly the sending of the birds) indicate that these stories come from the same literary tradition. There are three major cuneiform retellings of the Flood: the Sumerian Flood story (which is somewhat fragmentary), the Gilgamesh Epic, and the Atrahasis Epic. In the Gilgamesh Epic, the survivor of the Flood, Utnapishtim, tells Gilgamesh about the Flood in order to show him how his own attainment of immortality was unique. Although this tale tells little about the significance of the Flood, it shows a contrast in the concept of the survivor. In the Gilgamesh Epic and the Sumerian Flood story (Atrahasis is broken at this point), the hero-survivor is rewarded with immortality. In the Bible, by contrast, Noah has a more human fate: he becomes drunk, is sexually embarrassed or abused by his own son, and ultimately dies (9:20–28).

The Atrahasis Epic presents the Flood in the context of a primeval history of humanity. In this story, the creation of humanity caused a problem that prompted Enlil and the gods to send plague, drought, saline soil, famine, and ultimately a Flood to destroy humankind. One god, Enki, helped people escape the early problems and then had Atrahasis build an ark; after the Flood he created barrenness, miscarriage, and stillbirth in women, celibate women, and additional provisions that are now lost. It seems that the Flood was seen as the result of an overpopulation problem that could not be permanently solved by the "natural disasters" but that could be controlled by the permanent population safeguards initiated by Enki after the Flood.

The Biblical Story and Its Meaning: The biblical story is emphatically not about overpopulation, for people are strongly commanded to be fruitful, multiply, and fill the earth (8:1). As in Atrahasis, however, the biblical Flood came because of a problem for which God provided a remedy after the Flood. In the Bible, the problem was the progressive pollution of the earth by the misdeeds of humanity (6:5–7). Immediately after the Flood, therefore, God gave Noah and his sons several laws. The difference between the ante- and postdiluvian worlds is in these laws, for laws are considered the *sine qua non* of humanity's ability to continue to live on the earth. There are three laws presented in Genesis 9: an iteration and reiteration of the commandment to multiply (vv. 2, 7); permission to eat meat accompanied by an injunction not to eat blood or eat from a living animal (vv. 3–4); and a demand for capital punishment for murderers (vv. 5–6). These are important principles in biblical law: the Pentateuch prohibits eating the blood of animals six times (Gen. 9:4; Lev. 3:17; 7:26; 17:10–14; Deut. 12:16; 12:23–24). The reason is that blood is the life of the animal; the penalty was death (Heb. *karet*, "to be cut off"). The inviolability and incomparability of human life is one of the fundamental axioms of Israelite religious law. Capital punishment was never invoked for property offenses, and homicide could not be compensated for by the payment of a monetary fine—it could only be rectified by the execution of the murderer, even if the murderer were an animal (for example, a goring ox, Exod. 21:29). Despite its importance, this demand for execution of murderers was a postdiluvian provision, for both Cain (Gen. 4:8–16) and Lemech (4:23–24) were kept alive under divine protection. This had disastrous consequences for the earth. The ground on which Abel was killed became barren (Gen. 4:10–12), and by the time Noah was born the barrenness had become widespread. Noah was to bring relief (LXX: "give rest") from human toil on the land that God had cursed (Gen. 5:29), for by the time of the Flood the whole earth had become polluted (Gen. 6:11–12). The Flood was a means of getting rid of a polluted world and starting again with a well-washed one. Then, since God had recognized humanity's evil impulses, he gave Noah the basic laws, particularly the strict instructions about the shedding of blood in order to prevent the earth's becoming so polluted again.

The idea that moral misdeeds can contaminate the earth is an important idea in biblical thought, for Israel believed that it had inherited the land after the previous inhabitants had polluted it and it had "vomited them out," and that it too might lose its land for the same reason (Lev. 18:24–28). Israel worried that it might contaminate the land because of unsolved murders (Deut. 21:7–8), the failure to execute murderers (Num. 35:31–34) or sexual impropriety (Jer. 3:1). Ultimately, the prophets came to believe that Israel had polluted its land (Jer. 2:7) and was therefore exiled (Ezek. 36:18). Israel's retelling of the flood story showed a cosmic parallel to Israel's pollution, purgation, and ultimate restoration. There are several allusive references to the Flood in the first nine chapters of Ezekiel, which portray Israel just before the destruction, and the one explicit biblical reference to the Flood outside of Genesis (Isa. 54:9) promises that like the Flood, Israel's exile was a unique occurrence, not to be repeated.

Despite numerous attempts to find archaeological evidence for a universal deluge, one has not been found, although localized flood levels have been discovered in various Mesopotamian cities. The tradition of the flood, which may have been very old, was retold in Mesopotamia to illustrate Mesopotamia's concern with overpopulation and was retold in the Bible as a dramatic portrayal of Israel's concern with misdeeds, pollution, and the destruction they can bring.

T.S.F.

floor, a flat, sometimes enclosed area. In biblical usage the term designated primarily the "threshing floor" (Gen. 50:10; Judg. 6:37; Ruth 3:14; 2 Sam. 24:21; Hos. 13:3; Matt. 3:12; Luke 3:17). In ancient as in modern times, it was usually a flat rock surface large enough to accommodate piles of grain from individual farmers with sufficient space to allow each farmer to drive a threshing sledge over the grain at the edge of his harvested pile to shred it prior to winnowing. It was usually a communal installation, although individual farmers may have had their own spots for their operations.

Of the references to floors of structures, those included are of the tabernacle (Num. 5:17, evidently an earthen floor), a roof chamber (Judg. 3:25, possibly a rolled earthen or plastered floor), Solomon's Temple (1 Kings 6:15, described as partly overlaid with gold [6:30]), and the Temple in Ezekiel's specifications (Ezek. 41:16, 20).

Archaeological evidence indicates that floors were built of various materials, from plain tamped or rolled earth, to pebble, cobble, unfitted and fitted slab stone paving (see John 19:13), to plain, geometric, and elaborately decorated and inscribed mosaic tile. Floors and the artifacts associated with their construction and use form part of the data most helpful to archaeologists for dating the construction and use of a building. R.S.B.

flour. ***See*** Bread; Mill.

flowers (Heb. *nitṣanum*), a general term referring to the colorful array of blossoms that abound in the Holy Land, especially when the rains of winter and the warmth of spring combine to bring new life to the land (Song of Sol. 2:12). The previously arid and parched fields, waste places, and desert areas burst into a showy display of color that persists until the summer droughts again desiccate the landscape.

The earliest flowers of spring are diverse in form and color. The pink, white, and lilac blossoms of the cyclamen appear as early as January. The various shades of reds and pinks of the abundant crown anemones, poppies, and mountain tulips successively dominate the landscape. The flowers of the diverse tuberous plants of the lily family also add their array of colors to the mosaic. As the summer progresses, the short-lived delicate blossoms of spring are replaced by fields of yellow and white daisylike flowers of chamomile and chrysanthemums. The less showy yellow, blue, white, pink, and purple flowers of the various hardy thorny shrubs and plants remain through the summer to decorate the dry hills, rocky terrain, and waste places (Hos. 10:8).

Since flowers are referred to in general terms in the Bible, the specific identity of individual species is difficult to ascertain. Although context often may elucidate which flowers are indicated, it is not enough to identify a specific plant. Even in those cases where specific flowers such as lilies or roses are named they are not necessarily botanically correct designations.

In general, the term "lily" applies to the family of plants that have bulbs, tubers, or rhizomes as roots (*Liliaceae*). Such plants commonly found in the Holy Land are the true lilies, such as the white Madonna lily and the deep red Martagon lily. The tulip, asphodel, Star of Bethlehem, hyacinth, and related narcissus, daffodil, crocus, and iris inhabit the rocky ground and dry places of the hill country. The "lily of the valleys" of the Song of Sol. 2:1–2 is probably the blue hyacinth. The lilies of the field of Matt. 6:28–30, however, are most likely not true lilies but rather one of the numerous showy spring flowers such as the crown anemone.

As is the case with the lily, the specific references to the rose do not necessarily indicate a true rose, but rather a showy, colorful, flower. The true roses of the Holy Land, such as the wild Phoenician rose, may have been the "rose plants in Jericho" (Ecclus. 24:14). Fruit-bearing shrubs such as raspberry and blackberry blossom along watercourses. Fruit trees such as the apple, plum, cherry, apricot, and almond (genus *Prunus*) are also of the rose family and display light pink and white clouds of blossoms in the spring time. The rose of Sharon (Song of Sol. 2:1) may also have been one of these or one of the more common flowers such as the tulip or narcissus, both of which grow profusely on the plains of Sharon. The showy roselike flowers of the woody shrubs of the rock rose family (*Cistaceae*), which adorn the rocky and dry areas in the spring and early summer, may also be candidates.

Flowers enter many aspects of life in the Holy Land. The flowering trees and shrubs, the flowers of the fields, and the less showy blossoms of various herbaceous plants such as mints and mustards provide nectar for the bees in this land of milk and honey (Isa. 7:22; Num. 13:37). Their fragrances are extracted as essential oils to form the basis for various perfumes and unguents. Their scents freshen homes and garments, and their colors decorate in garlands of blossoms. The forms of the flowers provide inspiration for decorative motifs as well. The columns of King Solomon's Temple are capped by lilies, probably the lotus seen in Egyptian design (1 Kings 7:19, 26).

Various references to flowers in the Bible are symbolic as well as literal. The flowers of spring signify renewal (Song of Sol. 2:12) as well as the fragility and transience of life (Isa. 40:6–7; 1 Pet. 1:24; Job 14:2). The qualities of beauty, purity, and sweetness are also likened to flowers (Song of Sol. 2:1–5; 5:13; Isa. 28:4). ***See also*** Lily; Rose; and such individual entries for plants and trees as Almond; Fig; Flax; Mustard. fly, a small flying insect. Many species of flies are known in Palestine and Egypt. In the Bible two Hebrew words mean "fly." **1** 'arōb, the flies visited on the Egyptians as the fourth plague (Exod. 8:20–32; alluded to in Pss. 78:45; 105:31). The species of fly involved in this plague is uncertain; it may have been the Tabanid fly (*Stomoxys calcitrans*). **2** *zebūb* (Eccles. 10:1; Isa. 7:18), probably the ordinary housefly (*Musca domestica*). Baal-zebub, "lord of flies," was a deity worshipped at Ekron, whom King Ahaziah wanted to ask whether or not he would recover from his final illness (2 Kings 1:2–6, 16). ***See also*** Plagues. J.M.W.

food, one of the necessities for the sustenance of life. The chief staple in biblical times was bread, as suggested by the fact that the Hebrew word for bread (*lekhem*) can also designate food in general. Barley, wheat, and emmer were the most common varieties of grain from which bread was baked. Besides their use in flour, these cereals were also eaten in roasted form, either whole or crushed (Josh. 5:11; Lev. 2:14). Next to bread, fruits, vegetables, and dairy products were the most important staples of the Israelites. Common fruits were grapes, olives (used mostly in the form of oil), figs, dates, apples, and pomegranates. Among the vegetables, beans, cucumbers, lentils, onions, leeks, and garlic were most commonly grown. Dairy products, derived more from goats than cows,

Geese being presented, possibly as payment of taxes; ivory from Megiddo, thirteenth–twelfth century B.C.

were consumed chiefly in the form of cheese, curds, and butter. Meat was also part of the diet, but for the ordinary Israelite only on special occasions, since it was too expensive for daily fare. Both domesticated and wild animals, such as deer, gazelle, fish, and fowl, were used for food. Boiling or roasting were the preferred methods of preparing meat, from which all blood had to be drained carefully, since blood was considered sacred as the seat of life which belonged to God alone (Gen. 9:4–6; Lev. 17:10–11; Deut. 12:23–25; Acts 15:19). Certain animals considered ritually unclean could not be consumed (see Lev. 11:1–47). The Israelite diet was rounded out by spices and other natural products such as salt and honey. Those Christians who lived in the Holy Land will have had similar food available, although the category of "unclean" was eliminated (Mark 7:14–20; Acts 10:9–15; Rom. 14:20). Because Christians were of all nationalities and were scattered throughout Europe and the Mediterranean basin, their eating habits reflected those of their respective native lands.

Availability: While the food supply was generally adequate, famines, caused either by natural calamities, such as drought and locusts, or by human warfare, were not infrequent in biblical times (Gen. 26:1; 43:1; Amos 4:6–9). Some regions of the country were more fertile and productive than others. Thus, for instance, the tribe of Asher, situated on the northern coast of Palestine, was known for its abundance of food (Gen. 49:20); and the Transjordanian region of Bashan was blessed with very fertile soil, which made possible the raising of herds of cattle known for their sleekness (Amos 4:1). The adequacy of one's diet also depended to a large extent upon one's wealth and social status. Kings and nobles usually ate better than peasants. The quantity of food consumed at Solomon's court was enormous, as suggested by the following list of daily provisions: "And Solomon's provision for one day was thirty cors [ca. 330 bushels] of fine flour, and sixty cors [ca. 660 bushels] of meal, ten fat oxen, and twenty pasture-fed cattle, a hundred sheep, besides harts, gazelles, roebucks, and fatted fowl" (1 Kings 4:22–23).

Significance: Besides its obvious function for the maintenance of physical life, food had other functions and uses in the Bible. It was a means of bonding social relationships and of establishing covenants (Gen. 31:54; Exod. 24:11). Food was also used as presents or as tribute (Gen. 32:13–18; 1 Sam. 25:18; 2 Sam. 16:1; 1 Kings 14:1–3). It was also used for making loans (Deut. 23:19) and as wages or payments for goods and services rendered (1 Sam. 2:5; 1 Kings 5:9–11; Ezra 3:7; Matt. 10:10). Not eating was a sign of grief (1 Sam. 1:7), scant rations were a means of punishment (1 Kings 22:27; Amos 4:6), and feasting on an abundance of food was a sign of joy and celebration (Isa. 25:6; Luke 15:23). Food was also used for religious purposes, such as the bringing of offerings (Lev. 1–7; 1 Sam. 2:12–17; 1 Cor. 8) and in sacred communal meals (Exod. 12; 1 Sam. 1:4–5; Matt. 26:17–29; Acts 2:46). God, however, does not need or partake of food (Ps. 50:12–13).

Because food was of such fundamental significance, it could easily be misused or be given undue importance. Consequently, the Bible also warns against the misuse of food and reminds us that there is more to life than food and drink. While humans may produce bread from the earth, God is seen as the ultimate source of all food (Pss. 104:14; 136:25; 147:9; 2 Cor. 9:10). Furthermore, human beings do not live by

bread alone, but by everything that proceeds out of the mouth of the Lord (Deut. 8:3; Luke 4:1–4). The absence of God's life-giving word may cause a famine as severe as any lack of food (Amos 8:11–12). Life consists of more than food (Matt. 6:25), and the kingdom of God does not consist of food and drink, but of righteousness and peace and joy in the Holy Spirit (Rom. 14:17). In the kingdom of God, one's food is to do the will of God (John 4:34; 6:27), and citizens of that kingdom are enjoined to progress from simpler to more solid forms of spiritual food (1 Cor. 3:2; Heb. 5:12–14). ***See also*** Bread; Feasts, Festivals, and Fasts; Meals. W.E.L.

food offered to idols, the English translation of one Greek word that was used first by Greek-speaking Jews to refer to the sacrifices (often of animals, thus the reference to "meat" in 1 Cor. 8:13) that were regularly a part of pagan cultic observances (see 4 Macc. 5:2). The classical Greek term for such sacrifices meant, literally, "(something) offered to a deity," and in later Greek a related term meant, simply, "(something) offered to a divinity." The latter occurs in 1 Cor. 10:28, where Paul quotes what someone might say to a Christian dinner guest about the food being served. Sacrificial offerings were customarily divided into three portions: part was burned on the altar, part was placed on a special table for the deity, and part was allotted to the worshipers for their consumption within the temple precincts. What was left was sold in the public market.

According to Acts, when a special Jerusalem meeting of apostles and elders agreed to endorse the preaching of the gospel to the Gentiles, several restrictive provisions were laid down. One was that Gentile converts to Christianity should abstain from eating anything that had been offered in sacrifice to idols (Acts 15:29; cf. 21:25). The Nicolaitans opposed in Rev. 2:14–15 (cf. Num. 25:1–2; 31:16) and the Christian prophetess (perhaps their leader) opposed in Rev. 2:20 are accused of laxity in exactly this regard.

Despite what Acts reports about Christian strictures on eating food that had been sacrificed in pagan rites (Paul never mentions the decree of the Jerusalem leaders in his letters), some members of Paul's Corinthian congregation saw nothing wrong in doing so. They apparently reasoned that, because the only true God is the one known in Jesus Christ, other "so-called gods" had no real existence and sacrifices made to them had no real significance (1 Cor. 8:4–6). Perhaps these folk occasionally ate in pagan temples (see 1 Cor. 8:10), or their eating of sacrificial food could have been done at the quasi-religious dinners of fraternal associations or at meals hosted by pagan friends or relatives who had offered some special sacrifice. Whatever the particular setting(s) may have been, they seem to have participated with a certain bravado, alleging their possession of a superior "knowledge" (1 Cor. 8:1b) and criticizing those brothers and sisters as persons "weak" in conscience (1 Cor. 8:7) who declined to eat what had been offered in sacrifice.

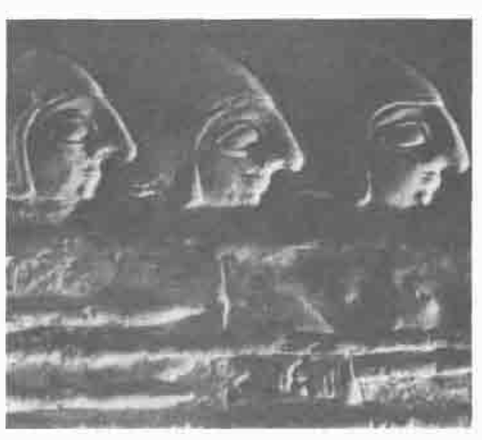
In 1 Cor. 8:1–11:1, Paul responds to this situation without either appealing or alluding to the prohibition reported in Acts 15:29. Instead, the apostle insists that neither eating nor abstaining from food offered to idols is in itself consequential (8:8). Thus, he thinks it unnecessary that Christians inquire about the origin of the meat they are considering purchasing in the market or that pagan friends serve at a private dinner (10:25–27). Paul also insists, however, that this Christian freedom must always be exercised in love (note 8:1c; 10:23–24) and without endangering one's partnership in the body of Christ (note 10:18–22). He understands this to exclude a Christian's participation in any pagan sacrificial meals (10:14–22) and to require abstention from what has been sacrificed previously whenever eating it might be injurious to other Christians or confusing to nonbelievers (8:7–13; 10:28–29a). It may be that Romans 14 refers to the same problem, although the reference to "meat" is more general. ***See also*** Idol; Jezebel; Love; Worship. V.P.F.

fool, foolishness, folly, terms referring to the lack of wisdom. Since wisdom, however, has so many different connotations and nuances, there are numerous characteristics of a life of foolishness or folly. In general, a fool in the Bible is a person who lives life as if God and God's will were of no consequence: "The fool says in his heart, 'There is no God'" (Pss. 14:1; 53:1; cf. Prov. 1:7).

A fool can be recognized by various characteristics: lack of intelligence or experience, sometimes without being aware of it (Prov. 12:15; Eccles. 5:1; Luke 12:20); an inability to be cautious in speech (Prov. 18:6–7); or pursuing courses of conduct or action that ultimately prove to be harmful (2 Sam. 24:10). There is another aspect of foolishness or folly that is even more insidious: the actions of one who deliberately sins against God's laws (Jer. 29:23; Deut. 22:21; 2 Sam. 13:11–14). A fool is one who, either by ignorance or by deliberate and calculated premeditation, follows a lifestyle or commits specific acts that are detrimental for the person or for society. Such actions and lifestyles can be described as foolishness or folly. In the Bible these characteristics stem from the lack of a proper relationship with God.

In Matt. 5:22, Jesus warns that anyone who calls another person a "fool" is in danger of eternal punishment. ***See also*** Wisdom. J.M.E.

foot, a body part used in a variety of figurative ways in the Bible. God required Moses to go barefoot on the holy ground of Horeb (Exod. 3:5). Barefootedness was part of David's mourning (2 Sam. 15:30). God commanded Isaiah to



walk barefoot as a symbol of future captivity (Isa. 20:2–4). Placing the foot on the neck of the vanquished enemy indicated victory (Josh. 10:24; Ps. 110:1; Matt. 22:44); God's placing all things "under the feet" expresses absolute dominion (Ps. 8:7; 1 Cor. 15:27; Eph. 1:22; Heb. 2:8). Listeners and pupils sat at their master's feet: Mary at Jesus' feet (Luke 10:39); Paul at Gamaliel's feet (Acts 22:3). Love is shown Jesus by the washing, kissing, and anointing of his feet (Luke 7:38, 44–47; John 12:3). Jesus washed his disciples' feet as an example of humble service (John 13:5–17). Homage is shown Jesus by falling down at his feet (Mark 5:22; Luke 8:41). Jesus heals those placed at his feet (Matt. 15:30). The disciples are to shake the dust from their feet to reject inhospitality (Matt. 10:14; Mark 6:11; Luke 9:5; 10:11). J.P.H.

footman (KJV), an infantry soldier. The RSV has variously men "on foot" (Num. 11:21), "foot soldiers" (1 Sam. 4:10), "footmen" (2 Kings 13:7), or "guard" (1 Sam. 22:17).

footstool, a royal symbol (see 2 Chron. 9:18), most often used figuratively for the Ark (1 Chron. 28:2), the Temple (see Isa. 60:13), or even Zion (Lam. 2:1). Elsewhere and in response to this view, the entire earth is described as God's footstool (Isa. 66:1; cf. Matt. 5:35; Acts 7:49). The term is also used to represent vanquished enemies in Ps. 110:1 (cf. Matt. 22:44; Acts 2:35; Heb. 10:13).

forbearance, divine patience in refraining from angry or vengeful, but deserved, punishment. In Jer. 15:15 it describes God's allowing his prophet added life to complete his mission. In Rom. 2:4 God's patience is held up for celebration and imitation, not despising, because it is intended to lead to repentance. In Rom. 3:25 Christ's atoning work is the result of divine forbearance displayed by God's passing over former human sins.

ford, shallow crossing place in marsh, river, or stream where firm footing is available. Until Roman occupiers built the first bridges in Palestine, all crossings of water were by boat or through available fords. Bridges and fords had been constructed by the Persians in much of Asia Minor in their control of territories from the sixth through the fourth centuries B.C. Such ford crossing points mentioned in the biblical stories include one on the Jabbok, an eastern tributary of the Jordan (Gen. 32:22), crossed by Jacob and his family. There were also fords on the Jordan itself, crossed by various groups (Josh. 2:7; Judg. 3:28; 12:5, 6; 1 Sam. 13:7), fords "of the wilderness" (2 Sam. 15:28; 17:16), the ford of the Arnon, an eastern river draining into the Dead Sea (Isa. 16:2), and fords leading to Babylon (presumably through the Euphrates River; Jer. 51:32) R.S.B.

Armed Lagashite warriors wearing tight-fitting helmets that nearly cover, but reveal the shape of, their foreheads; detail from Eannatum's stele, ca. 2450 B.C.

forehead, the portion of the face between eyebrows and hairline. The Bible depicts the forehead or brow as a significant spot due to its location and visibility. As represented in ancient Near Eastern art, the upper portion of the forehead was often covered by hair, a headband, or some type of head covering; but the lower portion was generally visible. Even soldiers' helmets sometimes left the lower brow somewhat vulnerable (which is also evident from the story of Goliath, 1 Sam. 17:49).

The following passages illustrate the visual prominence of the forehead. The phrase "Holy to the Lord" was to appear over the high priest's forehead (Exod. 28:36–38). God struck Uzziah with leprosy on his forehead (2 Chron. 26:19, 20; see also Lev. 13:41–43). A frontlet or phylactery was to be worn "between the eyes," a phrase referring to the forehead (Exod. 13:9, 16; Deut. 6:8). In visions of the future, allegiance to God was often represented by a mark or seal on the forehead (Ezek. 9:4; Rev. 7:3; 9:4; 14:1; 22:4); association with "the beast" was likewise depicted in such a manner (Rev. 13:16; 14:9; cf. Rev. 20:4).The term "forehead" was also used figuratively to represent persistent obstinancy (Isa. 48:4; Ezek. 3:7–9) and shamelessness (Jer. 3:3; this allusion probably derived from an actual mark; cf. Rev. 17:5). ***See also*** Phylacteries. D.M.P.

foreigner, one not native to a land. Any non-Israelite having temporary contact with Israel was considered a "foreigner" and if friendly was entitled to hospitable treatment. In contrast, a "sojourner" was a resident alien who enjoyed some social and religious privileges. This distinction is frequently blurred in translation. For example, the KJV rarely uses the word "foreigner," but often translates the Hebrew terms for both "foreigner" and "sojourner" as "stranger."

The RSV, while delineating more clearly, occasionally uses "stranger" to render both terms. Another Hebrew term with the general meaning of "stranger" adds to this confusion.

Israelites were frequently warned that extended contact with foreigners would lead to religious corruption (Exod. 23:31–33; Isa. 2:6–8); thus the directive against foreign wives (1 Kings 11:1–4; Neh. 13:26–27). Also, foreigners were not permitted to participate in ritual festivities (Exod. 12:43; Neh. 9:1–3), nor could their animals be used for Israelite sacrifices (Lev. 22:25). In economic dealings, interest was chargeable on loans to foreigners, but not on those to fellow Israelites (Deut. 23:19, 20), and a foreigner's debt was not remitted in a year of release (Deut. 15:2, 3). References to foreigners as enemies occur in passages such as Obadiah 11 and Lam. 5:2 (RSV: "aliens"; NEB and NIV: "foreigners").

NT writings continued the OT usage of "foreigner" (Luke 17:18; Acts 26:11). However, as nationality became less of a guide to religious affiliation, terms such as "foreigner" and "sojourner" developed a theological orientation as well. Eph. 2:19, for example, states that those accepting Jesus as Christ are "no longer strangers and sojourners, but . . . fellow citizens with the saints" (RSV; KJV: "strangers and foreigners"). ***See also*** Gentile; Stranger. D.M.P.

forerunner (translates the Gk. for "one who goes before"), in antiquity a military term for soldiers who ran ahead of the regular army either to announce (herald) or to prepare for (scout) its arrival (cf. Wisd. of Sol. 12:8). Heb. 6:20 refers to Jesus entering the Holy of Holies as forerunner, thereby preparing for the access of others to God's presence. John the Baptist serves as forerunner (although the term itself is not used) to Jesus by announcing and preparing for God's kingdom (Matt. 3:1–12; 11:10; Mark 1:2–8; Luke 3:1–18; 7:27; John 1:6–8, 19–34; cf. Isa. 40:3–11; Mal. 3:1). ***See also*** John the Baptist.

foreskin, a portion of loose skin, also called the prepuce, located at the end of the human male penis. Hebrew ritual law specified that it should be surgically removed ("circumcision") from every male child eight days after birth (Lev. 12:3), although the practice attributed to Abraham, is performed at different ages (Gen. 17:11, 14, 24–25). It is also attributed to Zipporah, Moses' wife, in the context of marriage rites (Exod. 4:24–26). Also in arranging for David's marriage to Michal, one of King Saul's daughters, a bride price of a hundred Philistine foreskins was required and delivered (1 Sam. 18:25, 27; 2 Sam. 3:14).

Removal of the foreskin can be used symbolically as a sign of authentic membership in the Israelite community; such a use is found when the people are admonished to circumcise the foreskin of their hearts (Deut. 10:16; Jer. 4:4). Such symbolic circumcision is a call to renewed loyalty to the ancestral covenant with God. ***See also*** Circumcision. R.S.B

forest, a general term for the once extensive wooded areas of the Levant. In ancient times forests were a source of timber for both local use and foreign export. Wood was important for a wide range of uses such as domestic and industrial fuels, the construction of buildings, and the manufacture of furniture and household items. The highlands of Lebanon boasted forests of majestic cedars, while oak and pistachio, the characteristic trees of the Mediterranean region, were especially common in the northern hill country. Stands of Aleppo pine, mixed with components of the oak forest, existed in Galilee, Samaria, and Judea. Scrub forests in the foothills, composed of mixed evergreens, once provided shelter for wild animals such as boar and lions (Ps. 80:13; Amos 3:4).

Biblical references to specific stands of trees such as the forest of Hereth (1 Sam. 22:5), the forests of the south (Negeb; Ezek. 20:46–47), the forests of Arabia (Isa. 21:13), the king's forest (Neh. 2:8) and the forest (wood) of Ephraim (2 Sam. 18:6), indicate the importance of these natural resource areas.

In modern times little evidence remains of the past luxuriant tree growth. Centuries of overgrazing by sheep and goats, decimation for timber and fuel, the clearing of land for agriculture (Josh. 17:17–18), and the modern felling of timber for railroad ties have depleted the once prevalent forests. Recent replanting schemes have been unable to replenish the original tree cover but have nevertheless once again brought areas of green to the hills and plains of the Holy Land. ***See also*** Woods. P.L.C.

forgiveness, a term denoted in the OT by words that mean "send away," "cover," "remove," and "wipe away." In the NT "send away" is used most often; forgiveness is also communicated by words which mean "loose" (Luke 6:37), "be gracious to" (Luke 7:43; 2 Cor. 2:7), and "pass over" (Rom. 3:25). The Bible records human sinfulness, God's eagerness to forgive, and frequent calls by the prophets, Jesus, and Jesus' followers for repentance from sin and return to God.

The OT system of worship provides sacrifices for expiating the guilt of those who have sinned unwittingly or repented of their sins (Lev. 4–5), but sacrifice must always be accompanied by a proper disposition (1 Sam. 15:22; Hos. 6:6). The prophets testify repeatedly that God desires to forgive human sins and asks for repentance (Isa. 1:18–19; Hos. 12:2–3; Joel 2:13) as a prerequisite for a renewed relationship between God and Israel.

The NT continues the tradition of God's mercy shown in forgiveness of sins. God initiates contact with humans (Gal. 1:4; 2 Cor. 5:19; Rom. 9:23–26) and forgives sins through the death of Jesus (Rom. 3:21–26; 4:25; Mark 10:45;

Gal. 1:4; Acts 13:38). God's forgiveness is variously described as justification, salvation, and reconciliation. It is associated with the celebration of the Lord's Supper (Matt. 26:28) and in some passages Jesus himself forgives sins (Mark 2:5–6; Acts 5:31). Members of the Christian community also have a role in the forgiveness of each other's sins (John 20:23; James 5:13–16). Community relations depend on members forgiving one another (Matt. 18:21–35; Luke 17:3). The Lord's Prayer makes divine forgiveness dependent on forgiveness of others (Matt. 6:12, 14–15; Luke 11:4) and another Gospel saying instructs early Christians to be reconciled before offering sacrifice to God (Matt. 5:23–24; Mark 11:25). ***See also*** Justification; Mercy; Repentance; Salvation; Sin. A.J.S.

forks. ***See*** Fleshhooks.

form criticism. ***See*** Biblical Criticism; Oral Materials, Sources, and Traditions.

fornication, any type of illicit sexual activity. Included in the realm of sexual misconduct in the OT are seduction, rape, sodomy, bestiality, certain forms of incest, prostitution (male or female), and homosexual relations (cf. Lev. 18; 19:20–22, 29; 20:10–21). The specific sin of adultery, related to marriage, was considered more serious than the others, however, so that a special set of laws governed it.

In the NT, almost any form of sexual misconduct (that is, sexual activity outside the marriage relationship) could be designated as fornication or "immorality" (cf. 1 Cor. 6:9; 2 Cor. 12:21; Eph. 5:5; Col. 3:5; 1 Thess. 4:3; 1 Tim. 1:10; Heb. 13:4; Jude 7). ***See also*** Adultery; Family, The; Harlot; Homosexuality; Marriage; Sodomy. J.M.E.

fortification. ***See*** Defense; Fenced Cities; Forts; Walls.

forts, fortified locations, often towns. A series of forts usually implies a regional if not a state authority. A fortress system did not appear in Israel until the monarchy (eleventh–tenth centuries B.C.), although individual forts were known in the period of the judges. According to the OT, David garrisoned troops in outlying areas to ensure his political control (2 Sam. 8:6). Solomon had cities for his chariots (1 Kings 9:19), and archaeological investigations have dated several forts in the Sinai to the period of David and Solomon. The presence of trade routes in the Sinai required some kind of military watch and control, and whenever the fortunes of Judah increased, parts of both the Sinai and the Negev were under Judean control.

The fortress of Arad is a good example of a Judean site used for regional control and administration. Originally constructed under David or Solomon's rule, its successive strata give a good

Battered brick tower of ancient fortification system excavated at Tell el-Hesi, biblical Eglon(?), in the district of Lachish.

indication of the type of fortifications used throughout the history of the monarchy in Judah. A number of fortified cities guarded important passes into the heartland of either Israel or Judah. In addition to Arad, which guarded the southern approach to Jerusalem, Judah was defended by several other fortresses (2 Chron. 11:5–11), including the imposing site of Lachish, which guarded an approach into the Judean hill country from the southwest. Israel possessed several highly fortified sites, including Megiddo and Hazor. Megiddo guarded the western entrance into the Jezreel Valley and Hazor guarded the approach from southern Syria into Israelite territory.

In the Transjordanian kingdoms of Ammon, Moab, and Edom, archaeologists have discovered various fort systems ranging from watchtowers and what could be termed police outposts to regional garrisons and even double-walled fortresses. Because of the trade routes running north-south through these kingdoms and the agrarian, pastoral nature of their economies, these different types of forts were necessary for what little security they could ensure. J.A.D.

Fortunatus (for'chuh-nay'tuhs), one who with Achaicus and Stephanas brought information to Paul in Ephesus about troubles in the church at Corinth (1 Cor. 16:17). Perhaps they came as emissaries, bearing a letter from some in the Corinthian church (1 Cor. 7:1). ***See also*** Achaicus; Stephanas.

forum. *See* Architecture.

foundations, constructions providing a stable base for any superstructure. Translating a variety of biblical terms, the word is used both literally and figuratively. Thus it occurs referring to natural formations (Deut. 32:32) or humanly prepared anchorages for buildings (Solomon's Temple, 1 Kings 5:17; its rebuilding, Ezra 3:10; a house, Luke 6:48; a prison, Acts 16:26; and city walls, Rev. 21:19 [where it refers to the new Jerusalem but reflects real construction procedures]). Such foundations could be elaborate and costly (1 Kings 7:10–11) or dust (Job 4:19), each yielding its appropriate durability (Luke 6:48–49).

Among the figurative uses, the word refers to universal stability (2 Sam. 22:16; Pss. 18:15; 82:5), the righteousness and justice of God (Ps. 89:14), God's redemption (Isa. 28:16), the beginning of things (Matt. 13:35; John 17:44), prior Christian work (Rom. 15:20), Jesus Christ (1 Cor. 3:11), the apostles, prophets, and Jesus (Eph. 1:4), God's work (2 Tim. 2:19), and a permanent basis of life because it is crafted by God (Heb. 11:10).

Archaeological evidence shows that bedrock was preferred for major construction, but if such were not available the next best was a solid stone platform constructed of layers of blocks of stone closely fitted. As references to the cornerstone indicate, it was important to all wall foundations, and frequently served as a repository for inscriptions or other commemorative goods. To improve a cornerstone's stability, it would frequently be worked even in a wall of unworked stone. For storage buildings foundations were made rodent tight by use of plaster in the chinks. For more modest housing, stone foundations one course high and one or two courses thick were minimal. Leveling in the foundation trenches was frequent, using gravel or small rock. ***See also*** Cornerstone. R.S.B.

founder, the (KJV's) archaic word for a "smelter" or "refiner," i.e., a metal-smith (Judg. 17:4; Jer. 6:29; 10:9, 14; 51:17).

fountain, a spring or source of flowing water. The RSV uses "spring" and "fountain" in an indiscriminate way to translate a number of Hebrew and Greek terms. It is clear, however, that the ancients distinguished between a natural outflow of water, an artificial water-storage system (i.e., cisterns and reservoirs), and a manmade well. Palestine's geological structure is conducive to the formation of springs (Deut. 8:7). Campsites and permanent settlements were often located in close proximity to springs; this situation is reflected in place names beginning with the syllable *en*, a prefix derived from a Hebrew word translated as "fountain" (e.g., En-gedi).

Springs represent divinely bestowed security and bounty (Ps. 104:10–13; Isa. 41:17–18; Ezek. 34:13), especially when water symbolizes eschatological blessings (e.g., Ezek. 47:1–12; Joel 3:18; Zech. 14:8; Rev. 21:6; 22:1–2). The Lord is described as "the fountain of living waters" (Jer. 2:13), a symbol that Jesus later applied to himself (John 4:10–15).

While copious springs symbolize God's favor, reference is still made to water that quenches thirst, physically or spiritually. The fountain also symbolizes the source of something besides water, e.g., descendants (Deut. 33:28), wisdom (Prov. 18:4), and forgiveness (Zech. 13:1). God was praised as "the fountain of life" (Ps. 36:9). ***See also*** Cisterns; Water. G.L.M.

Fountain Gate (RSV; KJV: "Gate of the Fountain"), a city gate in the southeast sector of Jerusalem opening either to Gihon or to En-rogel spring (Neh. 2:14; 3:15; 12:47). It was repaired by Nehemiah. It may be identical to the "gate between the two walls" (2 Kings 25:4).

fowl, in its wider sense a collective term for edible birds. Fowls are represented by the Hebrew word meaning "flyers" (*'oph*) (see Lev. 7:26; Neh. 5:18). Fowl in the narrower sense of domesticated poultry is mentioned in the NT, either referring to the hen gathering her young (Matt. 23:37) or the crowing of the cock (Matt.

A seal found in a grave at Tell en Nasbeh depicts a fighting cock; sixth century B.C.

26:34). When the chicken first appeared in Palestine is unknown, but a Hebrew seal from Tell en Nasbeh from the sixth century B.C. depicts a fighting cock.

fowler, a person who hunts birds. Hunting birds may be done by bait, lure, or snare for food or sport. Biblical usage sees it as a metaphor for danger (Prov. 6:5; Pss. 91:3; 124:7), even from fellow humans (Jer. 5:26).

fox, a carnivorous doglike mammal. Three species of fox live in Palestine: the European fox (*Vulpes vulpes*) dwells in temperate zones, and the desert fox (*Vulpes rüppeli*) and the fenek (*Fennecus zerda*) are desert-adapted species; any one or all three may have been there in biblical times as well. In the NT the fox is mentioned in connection with its habit of burrowing holes (Matt. 8:20; Luke 9:58). It is also used in the Bible as a symbol for slyness; in Luke 13:32 Jesus calls Herod Antipas, the ruler of Galilee, a fox. Similarly, in Ezek. 13:4, false prophets are termed foxes.

frankincense, a fragrant gum resin exuded in large, light yellowish-brown tears from Boswellia trees (*Boswellia Carterii, Boswellia Papyrifera, Boswellia Thurifera*) which grow in South Arabia, Ethiopia, Somaliland, and India. Frankincense was imported into Judah by camel caravan from Sheba (Isa. 60:6; Jer. 6:20), a trade connection that originated with the queen of Sheba's visit to Jerusalem in the reign of Solomon (1 Kings 10:10; 2 Chron. 9:9).

Frankincense could be used for secular purposes as a perfume (Song of Sol. 3:6; 4:6, 14), but it appears most frequently in the Bible in a religious context. Exod. 30:34–38 contains the recipe for a frankincense-based incense dedicated for ritual use. No other incense was permitted on the altar (Exod. 30:9) and secular use of the sacred recipe was absolutely forbidden (Exod. 30:38).

Offerings of frankincense were made at the Temple (Isa. 43:23; 66:3; Jer. 17:26; 41:5) where it was stored for later use (Neh. 13:5, 9; 1 Chron. 9:29). Frankincense was set beside the Bread of the Presence (Lev. 24:7) and accompanied cereal offerings (Lev. 2:1–2, 14–16; 6:14–18). It was prohibited with a sin offering (Lev. 5:11) or a cereal offering of jealousy (Num. 5:15). Frankincense was among the gifts offered to the infant Jesus by the Wise Men (Matt. 2:11). Rev. 18:13 lists frankincense as part of the cargo of the merchants who weep for the fallen city. ***See also*** Sheba, Queen of; Worship. M.A.S.

Boswellia Thurifera, a source of frankincense.

freedman (KJV: "libertine"), a person in the Greco-Roman world who had been a slave but had secured release from that status by purchasing freedom or working to achieve it. When Jewish slaves in the world of that time, especially from the city of Rome, won their freedom, many of them went to Jerusalem. Consequently, a synagogue was established there for them. Acts 6:9 reports that "some of those who belonged to the synagogue of the Freedmen" argued with Stephen. ***See also*** Freeman, Freewoman; Liberty; Slavery; Stephen.

freeman, freewoman, a person who had been born free. One of the most fundamental distinctions of status (and hence of rights and duties)

in the Roman world was that of slave or free. Those who were free persons might either be free by birth (Lat. *ingenui*), that is, freemen or freewomen, or free because they had received a grant of freedom from slavery, that is, free*d*men or free*d*women (Lat. *liberati*). The latter remained bound to their former masters (see 1 Cor. 7:22). If they died without an heir, their property was given to the master. They were not eligible for the higher ranks in the army or free to embark upon an official career of public office holding, though there were influential freedmen at the imperial court. However, children born after a slave had been freed were considered to be free born. Paul enunciated a major tenet of the early Christian faith when he declared that in Christ all such differences among people had been nullified (Gal. 3:28). P.P.

fret, an act of causing unease, used in the Bible as a reflexive imperative verb: "fret not yourself" (Ps. 37:1, 7, 8; Prov. 24:19).

friendship, a relationship of mutual trust and congeniality. While many biblical writers realized that friendship enriches human life, as a subject of serious reflection the theme of friendship is not developed in the Bible—in sharp contrast to the Greek and Roman traditions. Thus, although Deuteronomy characterizes a friend as a person "who is as your own soul" (13:6), the mutual affection and devotion of David and Jonathan strike the readers of the OT as extraordinary (see 1 Sam. 18:1; 19:1; 20:17; 2 Sam. 1:26). Where the covenant concept prevails, natural attraction and personal preference appear to be less important than covenant obligations as the bases of relationships between persons.

The benefits and requirements of friendship are among the subjects addressed by Israel's wise men, especially in Proverbs and Ecclesiasticus. The sage stresses loyalty and steadfastness as marks of the true friend (Prov. 17:17; 18:24; Ecclus. 6:14–16) but warns that poverty or adversity often reveals people to be friends in name only (Prov. 19:4, 6–7; Ecclus. 12:9; 13:21; 37:4–5). An irony of the book of Job is that Job's three friends, in their frenetic attempts to effect his repentance, intensify rather than relieve his suffering. Because they are more loyal to their theological certainties than to Job, they are unable to attain the genuine sympathy that marks real friendship.

The special bond between God and a person chosen as his instrument is occasionally described as friendship. God spoke to Moses face to face, "as a man speaks to his friend" (Exod. 33:11), and Abraham is called God's friend (2 Chron. 20:7; Isa. 41:8; see also James 2:23).

In the NT, Jesus' effort to mirror God's love and mercy even to religious outcasts earns him the epithet "a friend of tax collectors and sinners" (Matt. 9:11; Luke 7:34). In the Gospel of John, two persons, Lazarus and the unnamed "beloved disciple," are the objects of Jesus' special affection (11:3, 36; 13:23; 19:26; 20:2; 21:7, 20). Jesus says that his disciples are his friends if they do what he commands; he calls them friends because he has revealed to them what he heard from his Father (15:14–15). To be Jesus' friend is to love one another (cf. 15:12–14). In a saying highly reminiscent of the Greek tradition, Jesus declares that the supreme manifestation of love is a person's willingness to give his life for his friends (15:13). S.K.W.

fringes (tassels, borders, hems), a common decoration on Near Eastern garments. The oldest rule about fringes in the OT says simply, "You shall make yourself tassels on the four corners of your cloak with which you cover yourself" (Deut. 22:12). The more elaborate command in Num. 15:38–40 says that the tassels shall be of blue cord and function as a reminder to obey the commandments. In the Gospels the woman with the hemorrhage touches the fringe of Jesus' garment (Matt. 9:20; Luke 8:44) and other sick wish to do likewise (Mark 6:56; Matt. 14:36). Jesus criticizes Pharisees for hypocrisy in wearing ostentatious fringes (Matt. 23:5). The Talmud commands the wearing of fringes as part of its devotion to God through Torah (observing God's teachings, and thus obeying his will). The Talmud allows white threads to be used, specifies that each tassel have eight threads, and describes the knots that must be tied. Over the centuries tassels were transferred to the prayer shawl and to a linen vest worn under the outer garment. A.J.S.

frog, a tailless amphibian especially of the family Ranidae, common in Egypt and Palestine. As a second plague on the Egyptians, God threatened to send hoards of frogs out of the water and into their homes, even into Pharaoh's bedroom (Exod. 8:1–15; alluded to in Pss. 78:45; 105:30). When the frogs came, Pharaoh appealed to Moses and Aaron and promised to let the Israelites go if the frogs were removed. However, after the frogs died, Pharaoh refused to let the Israelites leave. ***See also*** Plagues.

frontlet, a headband, the most common form of headdress worn in Syria and Palestine in OT times. The Torah enjoins that certain of God's teachings (Deut. 6:8; 11:18) and rites commemorating the Exodus (Exod. 13:16, cf. v. 9) are to "be as frontlets between [the Israelites'] eyes" (i.e., on their foreheads, cf. Deut. 14:1). ***See also*** Phylacteries.

fruit. ***See*** Food; also such individual entries as Fig; Pomegranate.

fuels, materials used to start and maintain fires. Wood and charcoal were the most common fuels in antiquity, the latter becoming more important with the advent of metallurgy and other

crafts because of its higher burning temperature. Other fuels were thorny shrubs (Nah. 1:10), withered sticks and twigs, straw or stubble from the fields (Exod. 15:7), fat remains, date kernels, dung of cattle, bones of fishes, birds, and animals (Ezek. 24:5–10), logs (Gen. 22:3; Lev. 1:7) and chips from the carpenter's shop (Wisd. of Sol. 13:12). Figuratively, "the fuel for the fire" in Ezek. 21:32 is Israel. The NT knows braziers with charcoal or charcoal fires on the ground (John 18:18; 21:9). R.A.C.

fuller, a person whose occupation it is to clean, whiten, bleach, thicken, shrink, or dye cloth. The fuller cared for newly shorn wool or woven garments. The process varied but generally included washing with lye (Mal. 3:2) and cleansing by pressure, usually the treading of feet, as the Hebrew word implies (Exod. 19:10; 2 Sam. 19:24). The cloth was then spread out on the ground to be bleached by the sun. There were areas outside the city, the fuller's field (2 Kings 18:17; Isa. 7:3), designated for these professional laundering and cleaning services. A fuller apparently was also one who traded in textiles (2 Kings 18:17; Isa. 7:3; 36:2). Biblical writers found the fuller's profession to be an apt metaphor for purity (Ps. 51:7; Jer. 2:22; 4:14; Zech. 3:3; Rev. 4:4). Christ's transfiguration garments were whiter than any fuller could bleach them (Mark 9:3). S.L.R.

funeral. ***See*** Burial.

furlong, one-tenth of a mile. Used only once in the RSV (Matt. 14:24) in a phrase of uncertain textual origin, it is a measurement no longer in common use except in horseracing. ***See also*** Weights and Measures.

furnace, an installation for containing fire, whether for domestic or industrial purposes. The word is used in the Bible for various installations employed in daily life, and metaphorically for God's presence (Gen. 15:17), for the judgment or redemption of his people (Deut. 4:20; 1 Kings 8:51; Isa. 48:10; Jer. 11:4; Ps. 102:3; Isa. 33:14), for the refining of God's word as silver is worked in a crucible (Ps. 12:6), and in the NT for the fires of hell (Matt. 13:42, 50; Rev. 9:2) and the appearance of Christ's feet (Rev. 1:15).

Six words in Hebrew and one in Greek lie behind the word "furnace." The most common OT term (Heb. *tannûr*) is an oven, often of the kind used for baking bread (Ps. 21:9; Dan. 3:6). Other terms refer to a pottery or lime kiln (Gen. 19:28; Exod. 9:8; 18:18) or a smelter or refining installation for metals (Prov. 17:3; 27:21; Ezek. 22:20).

Archaeological and metallurgical researchers in Palestine have uncovered numerous furnaces of antiquity from the Chalcolithic period (fourth millennium B.C.) at Teleilat et-Ghassul in the southeast Jordan rift, across the valley from Jericho, and at Abu Matar near Beer-sheba (ca. 3500 B.C.), to the late medieval period (A.D. 1450) at Mugharat Wardeh in the Gilead mountains (Ajlun district) of Jordan. Perhaps the best examples of early copper furnaces are from Timna in the southern Negeb.

Iron-smelting furnaces were used in Palestine in the twelfth and eleventh centuries B.C. The furnace site at modern Tell el-Kheleifeh excavated by Nelson Glueck and once thought to be "the Pittsburgh of ancient Palestine" is now known to have been used as early as the Chalcolithic period (4000–3000 B.C.) and as late as the Roman (63 B.C.–A.D. 324) but is not likely to be Solomonic in origin. A number of smithing furnaces dating from twelfth century to 870 B.C. were found at Gerar (modern Tell Jemmeh). ***See also*** Metals. R.A.C.

furnishings. ***See*** Furniture.

furniture, equipment for basic human actions such as sitting, lying, eating, worshiping, and the like. In the Bible, it usually describes the equipment (also called "furnishings") of the tabernacle (Exod. 25:9; 40:9; Num. 1:50; 3:8; 4:15; 7:1) or a person's dwelling (tent, Num. 19:18; or house, Neh. 13:8). "Furniture" applies to the equipment of the Temple (1 Chron. 9:29) as well. The KJV also uses it (RSV: "utensils") when speaking of the tabernacle table (Exod. 31:8), lampstand (Exod. 35:14), or altar of burnt offering (Exod. 31:9).

Archaeological and artistic evidence indicates that the most common furnishings in wealthy homes were tables, beds, chairs, and storage chests. Royal tomb fittings from Ur in Mesopotamia and from Egypt show that such items of wood were frequently inlaid, carved, gilded, and otherwise embellished with ivory, precious metal, and precious stones. That such opulence was imitated by Solomon may be reflected in the records concerning his palace (1 Kings 7:1–11; see also Amos 6:4a). The largely intact materials of the tomb

Clay model of a bed; found at Gezer, from ca. 3000 B.C.

of Tutankhamen of Egypt excavated by Howard Carter beginning in 1922 have given us spectacular samples of such furniture in remarkable states of preservation.

The ordinary family furniture in a typical Palestine home is less clearly evident. Such a room as Jesus directed the disciples to locate (Mark 14:15; Luke 22:12) may have had a table and some stools, but it also may have had only mats for seating, a lamp, and serving vessels for bread and wine. Other contexts suggest that furnishings in such a home included sleeping mats or rolls (Mark 2:9), grinding equipment (Matt. 24:41), a broom (Luke 15:8), a niche or stand for a lamp (Matt. 5:15), and water storage vessels (John 2:6). Special accommodations for a guest might include a bed, table, chair, and lamp (2 Kings 4:10). Because wood and cloth decay rapidly, they seldom survive in archaeological ruins. The most commonly recovered furnishings are cookpots, lamps, bowls, and grinding stones. R.S.B.

future life. *See* Eschatology; Eternal Life; Hades; Heaven; Hell.

G

Gaal (gay´uhl; Heb., possibly "beetle"), the son of Ebed who lived in Shechem and usurped leadership from Abimelech (Judg. 9:26–33). This usurpation caused Abimelech to retaliate in force, destroying the city (9:34–49) before further expanding his conquests (9:50–57). Gaal was apparently a Canaanite and may have been a native of Shechem, although the action above is set on his "return" to the city. Both he and Abimelech (half Israelite, half Shechemite) offer competing credentials for royal political leadership. In the framework of Judges, chap. 9 is intended to demonstrate the futility of life under a king for the Israelite tribes. Both Gaal and Abimelech led them to disaster. R.S.B.

Gaash (gay´ash), a mountain in the territory of Ephraim. It is a landmark for the burial location of Joshua (Josh. 24:30; Judg. 2:9) at Timnath-heres, "north of Mount Gaash." It also marked the location of some "torrents of Gaash" (2 Sam. 23:30), identified as the home of Hiddai, one of David's "Thirty," an elite force or bodyguard. The "wadis of Gaash" are identified as the home of Hurai, one of David's warriors (1 Chron. 11:32), although the name may simply be a variant for Hiddai. No certain location is known for Mount Gaash. Speculations locate it some twenty miles southwest of Shechem. The torrents and wadis are probably runoff features of the mountain, water rushing through gullies in heavy rainstorms. R.S.B.

Gabbatha (gab´uh-thuh), a term that appears but once in the NT in John 19:13 as the Hebrew (actually Aramaic) equivalent of the Greek term *lithostrōton*, "the pavement" (which does appear in the other Gospels) where the hearing of Jesus before Pontius Pilate was held. The first-century Jewish historian Josephus (*Wars* 2.14.8) refers to a paved yard adjacent to Herod's palace where court was held, but no paved court has yet been discovered there, even though some still hold this area, today part of the citadel adjacent to Jaffa Gate, to be the most likely site of Jesus' trial. The other probable location of the *lithostrōton* is what would have constituted the courtyard of the fortress Antonia, a garrison Herod constructed on the northwest corner of the Temple Mount, a site that is today visible in the basement of the Convent of the Sisters of Zion on the Via Dolorosa. Some 2,500 square yards of pavement made of large flagstones, averaging 4 feet by 3.5 feet by 2 feet thick, and having incised treads to prevent animals from slipping, have been excavated here, together with a Roman gaming board that illustrates the narrative about Roman soldiers on capital punishment details in the Gospels (e.g., Matt. 27:35), and large Herodian cisterns. ***See also*** Antonia, Tower of. F.S.F.

A gaming board scratched into the flagstone pavement of the courtyard of Herod's Antonia fortress, excavated in Jerusalem.

Gabriel (gay´bree-uhl), one of the archangels in Jewish and early Christian thought. In the OT, Gabriel appears only in Dan. 8:15–26 and 9:21–27, and, in the NT, only in Luke 1:11–20, 26–38. In these passages, Gabriel appears as a messenger ("angel") from God and an interpreter for the people to whom he is sent. In the apocryphal and pseudepigraphical writings, angels were organized into categories with specific duties and status before God. In Tob. 12:15, for example, "Raphael" is mentioned as "one of the seven holy angels who present the prayers of the saints and enter into the presence of the glory of the Holy One" (cf. also Rev. 8:2). In *1 Enoch* 40, Gabriel is considered one of the top four in rank, perhaps second only to Michael. Gabriel's duties included intercession on behalf of God's people (*1 Enoch* 9:1; 40:6) as well as being the instrument for destruction of the wicked (*1 Enoch* 9:9–10). Tradition associated Gabriel with the archangel whose trumpet blast would announce the return of Christ (cf. 1 Thess. 4:16; Matt. 24:31). ***See also*** Angel; Michael. J.M.E.

Gad (gad; Heb., "luck"). **1** Canaanite god of fortune (Isa. 65:11). **2** Son of Jacob and Zilpah (Gen. 30:9–11); eponymous ancestor of the Israelite tribe of that name. Gad occupied territory between the Jabbok and Arnon rivers, which it shared with the tribe of Reuben. The Jabbok served as the boundary between Gad

and the half-tribe of Manasseh. Mesha, king of Moab, ca. 830 B.C., conquered Ataroth, which "the men of Gad inhabited from of old." Sometime afterward the territory of Gad was overrun by Hazael of Damascus (2 Kings 10:32–33). The region may have been restored to Israel by Jeroboam II (2 Kings 14:25), but it was lost again to the Assyrian conqueror Tiglath-pileser, who deported its population (1 Chron. 5:26). **3** A prophet-seer of David (2 Sam. 24:11).
In Poetry: In the Blessing of Jacob (Gen. 49:19), by means of an alliterative play on the name "Gad," the poet alludes to military tactics of the tribe. In the Blessing of Moses (Deut. 33:20–21) Gad is described as a lioness who tears both arm and head and is praised for having performed the righteous ordinances of Yahweh. In the Song of Deborah (Judg. 5:17) Gad, under the designation Gilead (cf. Judg. 12:7), is listed among those tribes that failed to participate in the war against Sisera and is chided for having remained across the Jordan. ***See also*** Mesha; Tribes, The. S.G.

Gadara (gad´uh-ruh; inhabitants: Gadarenes [gad´uh-reenz]), site (modern Umm Qeis) of Jesus' healing a demoniac (Mark 5:1–10); one of the hellenized cities of the Decapolis in which Jesus is reported to have ministered (Matt. 4:23–25; Mark 7:31). It lies about six miles southeast of the Sea of Galilee. A number of Cynic philosophers, orators, and poets are associated with the city. One of the love poems of Meleager of Gadara (first century B.C.) mentions the Jewish Sabbath: "If your love is a 'sabbath-keeper,' no great wonder. Not even love burns on cold Sabbaths." The city was granted to Herod by Augustus. In an inscription from the Hellenistic period it calls itself "cultivator of the arts." There seems to have been only a small Jewish population in the city. P.P.

Gaius (gay´yuhs), a common masculine name (a Latin praenomen) in NT times, apparently used to refer to several people in the NT. **1** A person in Corinth baptized by Paul (1 Cor. 1:14); he likely was partial to Paul's position in the church disputes in Corinth. He may be the same Gaius identified as "host to me and to the whole church" in Rom. 16:23. **2** A traveling companion, with Aristarchus, of Paul mentioned in Acts (19:29). Coming from Macedonia, they were caught up in a riot provoked by Paul's missionary work in Ephesus. This may be the same Gaius mentioned as a traveling companion of Paul in Acts 20:4, although this Gaius is identified as being from Derbe (in Asia Minor). **3** A recipient of 3 John (v. 1). His leadership is favored over that of a certain Diotrephes (vv. 9–10). ***See also*** Aristarchus; Diotrephes; Paul. A.J.M.

Galatia (guh-lay´shuh). **1** Territory located in north central Asia Minor dominated by the Gauls, a Celtic tribe famed for warcraft and cunning, from the third to the first century B.C. **2** Roman province after the first century B.C. that included the traditional Galatian territory plus portions of other ethnic territories, especially to the south.

Because Galatia can refer both to the territory and to the province, it is difficult to know in which sense the word is used in the NT. 1 Pet. 1:1 and 2 Tim. 4:10 (if one prefers the reading "Galatia" to the variant "Gaul") surely refer to the province, but there remains doubt concerning the other four references (Acts 16:6; 18:23; 1 Cor. 16:1; and Gal. 1:2), all of which relate to Paul's ministry. Some think they refer to the province (the "south Galatian hypothesis"), arguing that Acts records no mission to north central Asia Minor but does record Paul's visits to Antioch, Iconium, Lystra, and Derbe, cities outside the Galatian territory but inside the province. Those who think the texts in question refer to the territory (the "north Galatian hypothesis") argue that Acts 16:6 should be read "Phrygia and the Galatian region" (cf. 18:23), thereby referring to territories, since there was no Phrygian province. The issue may be insoluble. Paul's letter to the Galatians is silent about their ethnic composition and location, and scholars reasonably doubt the reliability of Acts for reconstructing Paul's itinerary. ***See also*** Galatians, The Letter of Paul to the. D.R.M.

Galatians (guh-lay´shuhnz), **the Letter of Paul to the,** the ninth book in the NT and one of the most important historical and theological documents from early Christianity. Chaps. 1–2 especially are the only extant primary source of information concerning the earliest period of primitive Christian history. Theologically, the

Letter to the Galatians is the first complete statement of gentile Christian theology and thus its oldest self-definition, in which the new Christian religion is separated (as far as we can tell, for the first time) from Judaism. Written by Paul (1:1; 6:11–18) between A.D. 50 and 55 (from Corinth? Ephesus?), the letter is addressed to a group of congregations, "the churches of Galatia" (1:2). Scholars are still debating whether these churches were located in central Anatolia (the so-called North Galatian hypothesis) or, as seems less likely, farther to the south (the so-called South Galatian hypothesis, by which the churches may be connected with the cities of Antioch, Lystra, Derbe, and Iconium mentioned in Acts 13–14). Paul himself names the cause for writing his letter (1:6–7): the newly founded churches are about to shift their allegiance away from their apostle and founder to his opponents, who are competing Jewish-Christian missionaries. Paul's letter is designed to prevent such a shift. Its thoroughgoing argument amounts to a defense of the gospel as he preached it and as gentile Christians had accepted it. In order to understand the Letter, today's reader must comprehend the rather complicated theological arguments made and presupposed in the text. Paul's explicit argument attempts to reassure the Galatian readers that the gospel they have received from Paul is fully sufficient for their salvation. After hearing this gospel (3:1–5), they received the Holy Spirit (3:2–3, 14; 4:6) and became partakers "in Christ" (3:26–28). Paul assures them that they, equipped with the benefits of justification by faith in Christ (1:4; 2:15–16), can look forward with confidence to their eternal inheritance, the kingdom of God (3:29; 5:5; 6:8, 16–18). Embedded in the Letter we also discover an implicit argument being used by the Jewish-Christian missionaries against Paul, according to which the Galatians have come to doubt Paul's message when they were faced with "transgressions" in their midst (6:1). Apparently, Paul's opponents have helped them understand these transgressions as evidence that they were still "sinners" outside salvation (2:15–17, 21), and the opponents have almost persuaded them to accept circumcision (2:3; 5:2–3, 6; 6:12–13, 15) and the Jewish Torah (3:2, 5; 4:9–10, 21; 5:2–4, 18).

The Opposition to Paul: The problem of who Paul's opponents were has been the subject of much discussion for almost two centuries. Were there two oppositional fronts (W. Lutgert) or just one? Were they Christian or non-Christian Jews, or were they Gentiles attracted to Judaism ("Judaizers")? Were they resident Galatians or outside intruders? F. R. Crownfield held them to be Jewish-Christian syncretists (those who took elements from one religion into another) interested in circumcision as a symbolic ritual. J. Munck took them to be Gentiles who had recently become converts of a Judaizing Christian movement in Galatia, a "heretic" offshoot of Paulinism. W. Schmithals advanced the hypothesis that they were (Christian or non-Christian) Jewish Gnostics who practiced circumcision as a magically potent ritual, but who were otherwise "libertines." Schmithals's hypothesis was later modified by G. Bornkamm, K. Wegenast, H. Koester, and D. Georgi, all of them assuming that the opponents of Paul were Jewish-Christian missionaries representing some kind of Asia Minor syncretism.

A further problem is the connection between Paul's opponents and the "men from James" and Jerusalem (Gal. 2:11). Were they agitators moved by political nationalism in Jerusalem (D. B. Bronson)? Did they try to ease the pressures the church in Jerusalem suffered from the hands of the Zealots by organizing a campaign to "Judaize" gentile Christians in Asia Minor (R. Jewett)? H. D. Betz proposed that 2 Cor. 6:14–7:1, a section that had long been identified as non-Pauline, be regarded as a piece of anti-Pauline theology compatible or even identical with that of Paul's opponents in Galatia. G. Lüdemann has shown that these opponents must be seen in connection with the history of anti-Paulinism in Asia Minor in the first two centuries of the Christian era.

Composition: Galatians is an apologetic letter, the epistolary "frame" consisting of the prescript (1:1–5) and the postscript (6:11–18). The prescript follows the basic Pauline pattern with the superscription (Lat. *superscriptio*, i.e., opening words; 1:1–2a: the name of the principal sender, his official title and the definition of the title, and stating the [unnamed] co-senders); the ascription (*adscriptio*, i.e., those to whom the letter was addressed; 1:2b); and the greetings, or salutation (*salutatio*; 1:3–4), expanded by Christological and soteriological formulas indicating the major concerns of the letter and ending in a doxology with the concluding "amen" (1:5). The postscript, written in Paul's own hand (6:11), presupposes that the preceding parts of the letter (1:1–6:10) show the hand of an amanuensis (cf. Rom. 16:22). The postscript authenticates the letter and sums up its major points, thus serving as the *recapitulatio* (summary) and *peroratio* (conclusion).

The body of the Letter (1:6–6:10) is composed as an apologetic speech with its traditional rhetorical parts. The introductory statement (*exordium*; 1:6–9) names the problem (*causa*; 1:6–7) and presents Paul's immediate response, the reissuing of a previously issued curse against apostates (1:8–9). The defense arguments are presented in four major sections: first, the narrative (*narratio*; 1:12–2:14) gives account of the events preceding and leading up to the present situation. These events are of course told with a partisan slant so as to assist the defense; they end with the dilemma the Galatians are now facing (2:14). Second, the statement of the problem (*propositio*; 2:15–21) sets forth the major points of agreement and disagreement be-

tween the author and his readers. Third, the demonstration, or proof (*probatio*; 3:1–4:31), includes an interrogation (3:1–5) and arguments from Scripture and tradition. The final section (5:1–6:10) is exhortation, with three subsections, each beginning with the restatement of the doctrinal presupposition (5:1a, 13a, 25a).

Reading the Letter Today: Modern readers will have to learn how to read Galatians as a piece of ancient epistolary literature. In these terms, the letter represented the author, Paul, who was physically absent and had to communicate despite the limits of a written text (cf. 4:18–20). His letter carried his entire defense speech to the readers, who, reading it aloud, transposed it into oral speech. They then had to make up their minds whether Paul's line of argument was convincing. Whatever they decided would activate the conditional curse and blessing (1:8–9; 6:16) that was also carried to them by the letter. The same situation must be faced by modern readers: the Letter again confronts readers in every age by arguing the central points of Paul's theology and by presenting to them the fateful choice between salvation and condemnation. ***See also*** Circumcision; Faith; Flesh and Spirit; Galatia; Gentile; Gnosticism; Holy Spirit, The; Justification; Kingdom of God; Law; Paul; Syncretism.

OUTLINE OF CONTENTS

The Letter of Paul to the Galatians

I. Epistolary prescript (1:1–5)
II. Introduction (*exordium*; 1:6–11)
III. Statement of facts (*narratio;* 1:12–2:14)
  A. Thesis (1:12)
  B. First part: from Paul's birth to mission in Asia Minor (1:13–24)
  C. Second part: Paul's second visit in Jerusalem (the Jerusalem conference; 2:1–10)
  D. Third part: conflict at Antioch (2:11–14)
IV. Proposition (*propositio*; 2:15–21)
V. Proofs (*probatio*; 3:1–4:31)
  A. First argument: the Galatians' experience of the Spirit (3:1–5)
  B. Second argument: God's promise to Abraham (3:6–14)
  C. Third argument: common human practice of law (3:15–18)
  D. Digression: Jewish Torah (3:19–25)
  E. Fourth argument: Christian tradition (3:26–4:11)
  F. Fifth argument: friendship (4:12–20)
  G. Sixth argument: allegory of Sarah and Hagar (4:21–31)
VI. Exhortation (*exhortatio*; 5:1–6:10)
  A. Warning against acceptance of Jewish Torah (5:1–12)
  B. Warning against corruption of flesh (5:13–24)
  C. Recommendations for the Christian life (series of *sententiae*; 5:25–6:10)
VII. Epistolary postscript (6:11–18)

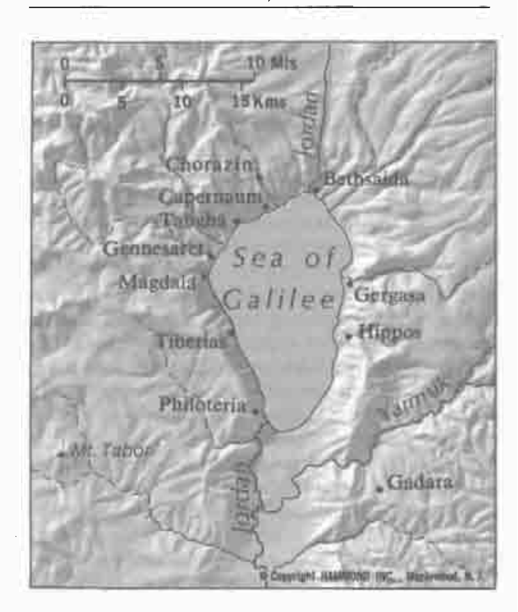
galbanum (gal'buh-nuhm), a gum resin derived from several plants (such as *Ferula galbaniflua*). It is an ingredient in incense (Exod. 30:34) for use in worship. Yellow or greenish brown, it had a prominent aroma and a bitter taste. In Ecclus. 24:15 it is one of a list of sweet spices that symbolize wisdom.

Galilean (gal'uh-lee'uhn), inhabitant of Galilee (Matt. 26:69; Acts 1:11; 2:7; Mark 14:70; Luke 13:1, 22:59; 23:6; John 4:45; 7:52). The term appears as an epithet for the insurrectionist Judas (Acts 5:37). The regional accent of Galilean speech apparently enabled others to identify their origin by it (Matt. 26:73).

Galilee (gal'uh-lee; Heb. *galil*), the region of northern Palestine that is situated between the Litani River in modern Lebanon and the Jezreel Valley in modern Israel. The designation "Galilee" first occurs as a proper name in Joshua (20:7; 21:32) and in Chronicles (1 Chron. 6:76) in reference to the site of Qadesh of Naphtali. It occurs with the definite article in 1 Kings 9:11, "in the land of Galilee." From Isa. 9:1 we learn it was known as a land of foreigners. The proper name occurs regularly in the writings of the first-century historian Josephus and the NT (Gk. *galilaia*).

This tiny region, approximately forty-five miles long north to south, is first mentioned by Pharaoh Thutmose III in 1468 B.C. when he captured twenty-three Canaanite cities there. From the time of the Israelite settlement (late thirteenth–early twelfth century B.C.) Galilee is associated with the tribes of Naphtali, Asher, Issachar, and Zebulun; the tribe of Dan eventually moved there. The reorganization into administrative districts under King David saw a consolidation of Israelite presence there. King Solomon, however, returned some twenty Galilean cities to Hiram, king of Tyre, in payment for building materials (1 Kings 9:10–11).

During the period of the Divided Monarchy (924–586 B.C.) Galilee was invaded by Pharaoh



Shishak in 924 B.C. in the fifth year of Rehoboam. In ca. 885 during the reign of Israel's King Baasha, Ben-hadad of Damascus captured Ijon, Dan, Able-beth-maacah, and "all the land of Naphtali" (1 Kings 15:18–20). The confrontation of Ahab, king of Israel, with Shalmaneser III of Assyria at Qarqar in 853 B.C. ultimately led to the confrontation at Mt. Carmel in 841. Tiglath-pileser III, also of Assyria, however, took much of Galilee in 732 B.C. when he captured thirteen of its cities (2 Kings 15:29) and united it to Assyria as a province. From then on Galilee as a region became known as the Assyrian province of Megiddo. Galilee's history remains obscure until the Greek conquest by Alexander the Great in 332 B.C.

Jewish settlement in Galilee followed the Maccabean revolt in 164 B.C. Galilee was annexed by Judah Aristobulus I in 104 B.C. His brother and successor Alexander Jannaeus further extended the borders of Galilee during his reign. With the Roman conquest of Palestine in 63 B.C. Pompey recaptured many Galilean cities and incorporated them into a new Roman administration. Under Herod the Great (40–4 B.C.), Galilee, together with Judea and Perea, formed a large portion of the new Judea. Upon Herod's death in 4 B.C. Galilee and Perea were made part of the tetrarchy of Herod Antipas, his son.

Galilee constitutes the area in which Jesus conducted the major part of his ministry. His youth and early ministry took place in Nazareth in Lower Galilee; much of his public ministry was located at the northwestern end of the Sea of Galilee, at Capernaum, which was known as Jesus' own city (Matt. 9:1). Galilee is also the area in which Judaism assumed its definitive form, ultimately producing the Mishnah and Palestinian Talmud there.

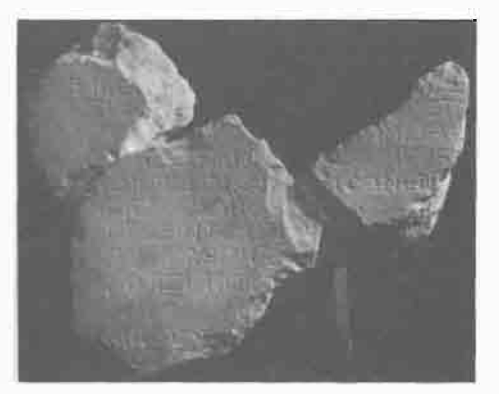
The first-century historian Josephus (*Life* 45.235) maintains that there were 204 villages in all Galilee. Archaeology has shown that that figure is not improbable. In Lower Galilee the major centers in the first centuries A.D. were Tiberias and Sepphoris. In Upper Galilee, called Tetracomia ("Four Villages") by Josephus, Gush Halav (Gischala) and Meiron were certainly among the largest villages. Jewish population in both areas of Galilee, however, did not fully accelerate till after the two devastating wars with Rome in A.D. 66–73 and 132–135. It was in the aftermath of these debacles that Jews as well as Christians relocated themselves there. E.M.M.

Galilee, Sea of, a harp-shaped fresh-water lake in the district of Galilee in northern Palestine, given various names throughout history: "the Sea of Chinnereth" (or "Chinneroth"), from the Hebrew word for a harp-like instrument (Num. 34:11; Josh. 12:3; 13:27); "the Sea of Tiberias" (John 6:1; 21:1); "the Lake of Gennesaret" (Luke 5:1); and "the waters of Gennesaret" (1 Macc. 11:67). Elsewhere, it is referred to simply as "the lake"

(Luke 5:2; 8:22–33) or "the sea" (John 6:16–25). It appears as "the Sea of Galilee" in Matt. 4:18; 15:29 and Mark 1:16; 7:31.

Along with the Jordan River and the Dead Sea, this body of water is an integral part of the Syro-African rift, a geological fault that extends from Syria in the north to the northeastern part of Africa in the south. The lake is approximately 700 feet below sea level and has a maximum depth of 150 feet. The Jordan River, carrying the melted snows of Mt. Hermon, enters the lake from the north, flows through its thirteen-mile length, and continues its course after leaving the lake along the southwestern shoreline. The water surface of the lake varies according to the season and the amount of rainfall. At its widest part, the lake measures about eight miles, and its circumference is about thirty-two miles.

Due to the height of the hills (1,200 to 1,500 feet) surrounding the below-sea-level lake, abrupt temperature shifts occur, causing sudden and violent storms, as the NT accounts indicate (Matt. 8:23–27; Mark 4:35–41; Luke 8:22–25; Matt. 14:22–33; Mark 6:45–52; John 6:16–21). The northern end of the lake has little protection and remains subject to strong winds. Nevertheless, the natural features of climate, fertile soil, and abundance of water attracted inhabitants from prehistoric times to the present day to settle along the shores of the lake.



The main route of an international highway known as the *Via Maris* followed a portion of the western coast of the lake, helping the area to develop as one of the larger population centers in NT Palestine. Fishing, agriculture, and fruit growing added to the attraction of the area. Some forty different species of fish inhabit the waters, and salted fish were exported widely throughout the Roman Empire. Fishing remains

an important occupation of the region today. Some of the towns and areas near the Sea of Galilee that are mentioned in the Gospels are Bethsaida, Capernaum, Chorazin, Gadara, Gennesaret, Magdala, and Tiberias. Numerous hot mineral springs near Tiberias, Gadara, and Tabgha, combined with the tropical climate around the lake, have made the area a natural health spa throughout the centuries. ***See also*** Bethsaida; Capernaum; Chorazin; Gadara; Galilee; Magdala; Tiberias; Winds. M.K.M.

gall, liver bile (Job 16:13) or venom ("gall of asps," Job 20:14). It is used as a metaphor for bitter punishment for evil (Job 20:25). It is also an herb both bitter (Matt. 27:34) and poisonous (Ps. 69:21). It stood for bitterness (Acts 8:23) and in Lam. 3:19 it is paired with wormwood as the extremity of bitter experience. The "poisonous weeds" of Hos. 10:4 (KJV: "hemlock") may possibly be *Conium maculatum,* such as Socrates reportedly drank.

Gallio (gal´ee-oh), the son of the Roman rhetorician Seneca, brother of Seneca the philosopher, and holder of several important civil positions in the Roman Empire. His full name was Lucius Junius Gallio Annaeus. According to Acts 18:12–17, Paul was brought before Gallio's judgment seat in Corinth (discovered in recent times in the old city) when Gallio was proconsul in Achaia. After a perfunctory hearing, Gallio perceived that the dispute between Paul and his Jewish accusers was over an internal religious matter and refused to proceed with the case. In this account, Gallio is characterized as one possessing no inclination, in the case either of Paul or of the subsequent beating of Sosthenes, to make official intervention in what he perceived as strictly internal Jewish issues.

An inscription discovered at Delphi mentions Gallio as proconsul of Achaia during the reign of the emperor Claudius, important extrabiblical evidence for establishing the date of Paul's presence in Corinth.

There are no further references to Gallio in the NT. Roman sources indicate that, after spending time in Achaia and Egypt, he returned to Rome to take an official position. After his brother Seneca's death in a conspiracy against Nero in the early 60s, Gallio fell into disgrace and ultimately committed suicide.

Gallio is important to biblical studies because his stay in Corinth is generally regarded as providing important extrabiblical evidence for establishing the chronology of Paul's activities. An inscription discovered at Delphi mentions Gallio as proconsul of Achaia at the time of the twenty-sixth accolade (an honor given to Roman officials) of the Emperor Claudius. It is not clear whether this was A.D. 52/53 or 51/52, but most scholars prefer the earlier date. Thus, according to Acts 18:12–17, the inscription, and Paul's own writings (1 Cor. 3:5–15), it would appear that Paul was in Corinth ca. A.D. 51/52 and that he founded the church there.

If Acts 18:1–17 is read as an accurate account of Paul's first visit to Corinth, it could be concluded that Paul founded the church there ca. A.D. 51–53. It is possible, however, that the text has condensed the accounts of several visits of Paul to Corinth, and thus the links between the Gallio inscription and Paul's activities in Corinth may not be as sure an indicator as some suppose regarding the date when Paul founded the church in Corinth. ***See also*** Achaia; Chronology, New Testament; Corinth; Paul; Tribunal. A.J.M.

gallon, a word appearing only in John 2:6, where the RSV converts a Greek term (translated "firkins" in the KJV) into an approximate equivalent in gallons. The Greek term equals about nine gallons. ***See also*** Weights and Measures.

gallows, a device for execution by hanging. Most gallows comprise a platform from which a vertical support ascends to anchor a horizontal arm from which the strangling rope descends. Biblical law made no provision for such a form of execution, and it figures exclusively in the book of Esther. In that account, Bigthan and Teresh, who had plotted to assassinate the Persian king, were hanged once their threat was found to be true (Esther 2:23). A gallows "fifty cubits high" is built for the execution of Mordecai at the instigation of Haman on a similar charge (5:14). The remaining five references show how Haman and his sons are executed for their deceitful evil plotting against the Jews (chaps. 6–9). These events provide the setting for the Feast of Purim.

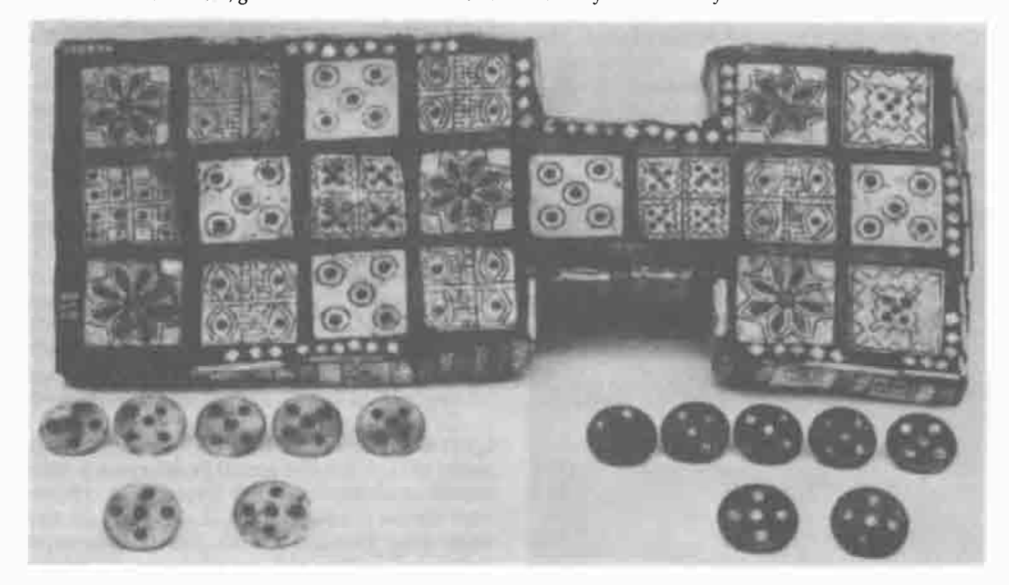
Gamaliel (guh-may´lee-uhl; Heb., "recompense of God"). **1** The son of Pedahzur, a prince of Manasseh on the march through the wilderness (Num. 1:10; 2:20). **2** A Pharisee in the Sanhedrin, honored by all the people, who counseled letting the apostles out of prison

(Acts 5:34–39) and a teacher of the law who instructed Paul (Acts 22:3). In rabbinic literature Gamaliel is identified as Gamaliel I or the Elder, who flourished in the mid-first century. Little is known of him reliably; the list of princes or patriarchs of Judaism in *Pirke Abot* (part of the Mishnah) lists him after Hillel. **3** Gamaliel II (late first and early second century), the leader of the rabbinic assembly which gathered after the destruction of the Temple in A.D. 70. To him and his predecessor or colleague, Johanan ben Zakkai, are credited many of the adaptations made by Judaism in response to the loss of Temple and priesthood in A.D. 70. A.J.S.

game, the meat of any of a variety of wild animals hunted for food. Jacob prepared a dish of game (KJV: "venison") for his father Isaac as part of his plot to gain the birthright of his brother Esau by trickery (Gen. 25:28; 27:3–33).

games, activities of varying degrees of structure and organization that are pursued for pleasure. Games in biblical times may be categorized as mental exercises, sporting events, or board games.

The riddle proposed by Samson (Judg. 14:12–14) is an instance of a mental exercise. Riddles were widely known in the ancient Near East but were supposed to deal with common experience or knowledge.



One reference to a sporting event in the OT, described in 2 Sam. 2:12–17, set twelve of Joab's men against twelve of Abner's men. The contest, which was probably intended to be wrestling, had, however, a fatal outcome.

The NT shows the influence of Greek culture and Greek games on Palestine. These games included foot races, horse races, chariot races, boxing, wrestling, the discus throw, and the javelin throw, among others. Paul frequently uses the metaphor of sporting events. He speaks of running a race (1 Cor. 9:24–27; Gal. 2:2; 5:7; Phil. 3:14) and of fighting a good fight (1 Tim. 1:18; 2 Tim. 4:7).

Board games, though not mentioned specifically in the Bible, have been found in a number of archaeological excavations. In the NT, the soldiers cast lots for Jesus' garments, probably gambling with dice (Matt. 27:35). Inlaid gaming boards were known from Ur as early as the twenty-sixth century B.C. Likewise, game boards and boxes have been uncovered from Egypt dating to the third and second millennia B.C. One Egyptian set is fully preserved. Of the ten ivory playing pieces five were carved with dogs' heads and five with jackals' heads. These pieces were apparently moved around a playing board with numerous holes for the pieces. Three astragali (animal knuckle bones) served as the dice to determine moves.

Game boards have also been found in Palestine. An ivory board from Megiddo is largely circular with fifty-eight holes for pieces to move along. A limestone game board from Tell Beit Mirsim has fifteen ruled squares and ten playing pieces of blue faience, five cone-shaped and five tetrahedrons. It also has a small die in the shape of a truncated pyramid, with numbers on the four sides. Unfortunately, no evidence remains to indicate how these games were played. However, games must have been enjoyed as much in biblical times as checkers, chess, backgammon, and similar games are today. J.F.D.

A game board decorated with shells found in a tomb at Ur. Although not specifically mentioned in the Bible, game boards date as far back as the twenty-sixth century B.C.

garden, a plot of cultivated land enclosed by walls made of stones, mudbrick, or hedges. Entrance was normally through a gate which could be locked (Song of Sol. 4:12; 2 Kings 25:4). Located near ample supplies of water, gardens were lush and desirable pieces of property used both for decorative and utilitarian purposes (Gen. 13:10; Num. 24:6; Jer. 31:12). Vegetables, spices, fruit trees, and flowers were grown in them (1 Kings 21:2; Jer. 29:5; Song of Sol. 4:12–16; Luke 13:19). Gardens were also used as meeting places for social occasions and for meditation and prayer (Esther 1:5; John 18:1). Occasionally, idolatrous religious practices were carried on in gardens (Isa. 65:3; 66:17). Ancestral tombs were often located in gardens. Thus, many Judean kings were buried in garden tombs (2 Kings 21:18, 26), and the body of Jesus was placed to rest in a garden tomb belonging to Joseph of Arimathea (John 19:41–42). The care of gardens might require the employ of a gardener (John 20:15).

The word "garden" is also used metaphorically and symbolically in the Bible. Thus, in the Song of Solomon, the word refers to the young woman or bride whom the lover comes to court (Song of Sol. 4:12; 5:1; 6:2). Elsewhere, the word refers to the mythical "garden of God" or "garden of the Lord," also known as "Eden," where God walked among the trees in the cool of the day and from which the primordial human beings were banished (Gen. 2:15; 3:1, 2, 3, 8, 10, 23, 24; Ezek. 28:13; 31:8–9). In this latter sense it is also used as a simile to describe the eschatological restoration of the land of Israel (Isa. 51:3; 58:11; Ezek. 36:35). ***See also*** Eden; Paradise. W.E.L.

gate. ***See*** Walls.

Gate, Beautiful. ***See*** Nicanor.

Gath (gath), one of the Philistine Pentapolis cities located on the coastal plain in southern Palestine (Josh. 13:3). It, like Ashdod, was one of the remaining homes of the Anakim (giants; see Josh. 11:22; 2 Sam. 21:22). The city is mentioned twice in conjunction with the stories about the Ark of the Covenant (1 Sam. 4–6; 2 Sam. 6). The Philistine inhabitants of Ashdod sent the Ark to Gath (1 Sam. 5:8; 6:17; 7:14). Gath was also the home of Goliath the Philistine (1 Sam. 17:4, 23). David befriended Achish, the king of Gath, during his period of social banditry (1 Sam. 27:2–11). However Gath continued as a center of opposition to the Hebrews, and it provided fighting men who opposed the Hebrews (2 Sam. 15:18; 21:20). During the reign of Joash (ca. 800–785 B.C.) Hazael, king of Damascus/Syria, took the city (2 Kings 12:17). According to the Chronicler, the city was captured by David (2 Chron. 26:6) and recaptured by Uzziah (ca. 783–742 B.C.). However, there is no corroboration of those conquests in the Deuteronomistic history (Joshua–2 Kings). We know from ancient Near Eastern sources that Sargon II of Assyria destroyed the city (ca. 712 B.C.).

Gath is a common place name. The biblical references given do not make for an easy or certain determination as to which site was ancient Gath. W. F. Albright identified it with Tell esh-Sheikh Ahmed el-Areini, but this has not received much support in recent years. Some have argued in favor of Tell en-Nagileh. Y. Aharoni and A. Rainey have proposed Tell es-Safi as the correct site. S.B.R.

Gath-rimmon (gath-rim´uhn; Heb., "the winepress of Rimmon"), a city originally assigned to Dan but later given to the Levites (Josh. 19:45; 21:24). In a parallel account it is listed as being given to the Levites from the tribe of Ephraim (1 Chron. 6:69), but the Chronicles account omits a verse preserved in Joshua (21:23) that specifies that the city is in Dan. A second Gath-rimmon given to the Levites from the half-tribe of Manasseh is also recorded (Josh. 21:25), but in the parallel account (1 Chron. 6:70) the city is called Bileam. There is probably only one Gath-rimmon and the confusion in the accounts is usually attributed by scholars to scribal errors. The city is thought to be located northeast of Joppa, although the exact site is not known. Perhaps the fact that this area is near the borders of Dan, Ephraim, and Manasseh contributed to the confusion in the accounts. D.R.B.

Gaza (gay´zuh), a settlement about three miles from the Mediterranean coast, marking the southern border of Canaan. It was captured by pharaoh Thutmose III (ca. 1469 B.C.). It is also mentioned in the Tell el-Amarna tablets and Taanach tablets as an Egyptian administrative center. It was captured by men of the tribe of Judah (Judg. 1:18) and was included in the allotment given to that tribe (Josh. 15:47). It was part of the Philistine Pentapolis, the southernmost city in that league of five cities (Josh. 13:3; 1 Sam. 6:17; Jer. 25:20). The city was later taken by Tiglath-pileser III, king of Assyria. We also have an account of Hezekiah's conquest of the city (2 Kings 18:9). Pharaoh Neco II occupied the city briefly in 609 B.C. It was a royal fortress under the Persian control of the area, according to the Greek historian Herodotus (2.159); it was called Kadytis.

It was the only city in its area to oppose Alexander the Great (332 B.C.). Later on, it was an outpost of the Ptolemies, who were the ruling power in Egypt during the Hellenistic period, until its capture in 198 by Antiochus III, the Seleucid king who was in control of Syria. The Seleucid city was subsequently attacked by Jonathan the Hasmonean (145 B.C.; see 1 Macc. 11:61–62). During the Hasmonean civil war, the city was taken by Alexander Jannaeus in 96 B.C.

The Roman Pompey restored the city and Galbinius, also a Roman official, rebuilt the city (ca. 57 B.C.). King Herod the Great held the city for a short time, but after his death it came under the authority of the Roman proconsul of Syria. It flourished as a Roman city and remained a center for the Jewish community and the emerging Christian community throughout the Roman era (63 B.C.–A.D. 324) and continuing into the Byzantine period (324–1453).

As part of the Philistine Pentapolis, Gaza played an important role in the Samson saga (Judg. 13–16). Modern Tell Harube has been identified as ancient Gaza. It was excavated by W. J. Phythian-Adams in 1922 for the Palestine Exploration Fund. In 1965, a mosaic pavement was discovered by the Egyptian Department of Antiquities. In 1967 A. Ovadiah excavated the area and discovered a synagogue from the sixth century A.D. There appears to have been continuous occupation from the Late Bronze era until the Byzantine period (ca. 1500 B.C.–A.D. 632).

S.B.R.

gazelle, an antelope-like creature. Three species of these antelope lived in Palestine: the Dorcas gazelle (*Gazella dorcas*) in the deserts, the mountain gazelle (*Gazella gazella*) in the hillier areas, and the goitred gazelle (*Gazella subgutturosa*) east of the Jordan. They were symbols of love and beauty for the Hebrews (Song of Sol. 2:9, 17). They were also a major game animal, regularly supplied at Solomon's table (1 Kings 4:23), though they were difficult to catch because of their swiftness (2 Sam. 2:18;1 Chron. 12:8).

A gazelle tended by a western Asiatic; detail of a wall painting from a tomb at Beni-Hasan, Egypt, second millennium B.C.

Geba (gee'buh), a town to the northwest of the Dead Sea given to the Levites from the tribe of Benjamin (Josh. 21:17). It guarded the Michmash pass and was the scene of Israelite battles with the Philistines (1 Sam. 13:3). It is sometimes confused with Gibeah and Gibeon in the Hebrew text. Geba was later fortified by Asa (1 Kings 15:22) and was repopulated in the post-exilic period (after mid-sixth century B.C.) (Neh. 11:31). ***See also*** Gibeah; Gibeon; Michmash; Philistines.

Gebal (gee'buhl; Heb., "mountain"). **1** A Canaanite and Phoenician port about twenty miles (32 km.) north of Beirut, known to the Greeks as Byblos, from which comes our word "bible," and today called Jebail. Mentioned in Josh. 13:5 as part of "the land that yet remains" to be conquered, it was famous for its craftsmen: stonemasons and carpenters who helped construct Solomon's Temple (1 Kings 5:18), and shipwrights (Ezek. 27:9) who used cedar, spruce, and cypress from the high mountains immediately east of the city.

Excavations by P. Montet (1921–1924) and M. Dunand (since 1925) reveal a long and fascinating history. First settled in the pre-pottery Neolithic period as early as ca. 8000 B.C., it was already important during the Chalcolithic period (ca. 3500–3100 B.C.). In the Bronze Age (ca. 3000–1200 B.C.) Gebal traded as far afield as Anatolia, Mesopotamia, and the Sudan, not only in lumber, but also in such goods as wine, leather and oil. So important was the wood for Egypt, which had none of its own, that whenever strong enough it maintained control there. However, between ca. 1800 and 1500 B.C. Gebal fell to the Hyksos, who fortified it strongly. Egypt regained control after 1500 but never attained its earlier authority. The Tell el-Amarna Letters indicate that Rib-Addi of Gebal alone remained faithful to Egypt, but his repeated appeals for help apparently evoked no Egyptian response. Despite the defeat of the Sea Peoples by the pharaoh Rameses III (ca. 1175 B.C.) Egyptian dominance came to an end, and an account of how an Egyptian official, Wen-Amon, was rudely received in ca. 1000 B.C. vividly reveals Gebal's complete freedom of action.

To the following century belongs the fine sarcophagus of King Ahiram, bearing the earliest known Phoenician alphabetic inscription. In fact, almost all early Phoenician inscriptions so far discovered come from Gebal. Although the city strongly supported the coalition against the Assyrian invasion at Qarqar in 853 B.C., it was already being supplanted by Tyre and was never again so

powerful. It remained an important trading center until the Byzantine period (A.D. 324–632), but suffered a sudden eclipse after the Muslim conquest in A.D. 636. In 1103 it was captured by the Crusaders, whose strong citadel still stands, but it fell to Saladin in 1189.

2 A tribal area south of the Dead Sea mentioned in Ps. 83:7 in connection with Moab and Edom; some modern scholars equate it with 1 above. ***See also*** Egypt; Hyksos; Mesopotamia; Temple, The. D.B.

Geber (gee'buhr; Heb., "vigorous"), the son of Uri; he was Solomon's provisions procurement officer in Gilead (1 Kings 4:19).

Gedaliah (ged'uh-li'uh), the son of Ahikam son of Shaphan, who was appointed by the Babylonian king Nebuchadnezzar as governor of Judah after its capture in 586 B.C. (1 Kings 25:22). Gedaliah was a member of a prominent Jerusalem family; his father and grandfather had served in Josiah's court (2 Kings 22:3, 14). He, too, may have been a royal official, if he is identical with "Gedaliah, the royal steward" whose name appears on a stamp seal discovered at Lachish.

Though viewed with suspicion by his contemporaries as being a Babylonian collaborator, Gedaliah succeeded in restoring order to the countryside with the support of former army officers and the prophet Jeremiah. But his tenure at Mizpah, the provincial capital, was cut short by a conspiracy led by Ishmael, son of Nataniah, of the royal line. Despite prior warnings, Gedaliah and his entourage were slaughtered; the conspirators escaped across the Jordan to Ammon (Jer. 40–41). A national day of fasting and mourning was inaugurated among the exiles to mark his tragic murder (Zech. 7:5). ***See also*** Nebuzaradan. M.C.

Gederah (gi-dee'ruh; Heb., "a wall"), a city in the lowlands of Judah noted for its royal potters (Josh. 15:36; 1 Chron. 4:23). It was also the home of Jozabad, one of David's warriors (1 Chron. 12:4) and of Baal-hanan, an agricultural official under David (1 Chron. 27:28). The site is unknown.

Gedor (gee'dor; Heb., possibly "stone pile"). **1** The name of a town inherited by Judah (Josh. 15:58), possibly Khirbet Jedur southwest of Bethlehem and northwest of Hebron. **2** A son of the Judahite Penuel (1 Chron. 4:4) who, it has been suggested, may have been the founder of the town inherited by Judah. **3** A son of the Judahite Jered (1 Chron. 4:18). **4** The name of the entrance to some rich grazing land (1 Chron. 4:39). Suggestions have been made that, in this case, "Gedar" should be changed to read "Gerar." **5** A son of the Benjaminite Jeiel and Maacha (1 Chron. 8:31; 9:37). **6** The residence of Jehoram (1 Chron. 12:7).

Gehazi (gi-hay'zi; Heb., "valley of vision"), the servant or younger associate of Elisha the prophet. In the story of the wealthy Shunammite woman (2 Kings 4:8–37), Gehazi is portrayed as Elisha's faithful messenger and perhaps overzealous protector (v. 27). Some time later Gehazi is in conversation with the king of Israel when this same woman appears seeking recovery of her property after a sojourn in Philistia (2 Kings 8:1–6). In the story of Naaman (2 Kings 5) Gehazi is portrayed as greedy and deceitful and is cursed with Naaman's leprosy by Elisha. A rabbinic tradition suggests the identification of the four lepers at the gate who discover the mysterious rout of the Syrians (2 Kings 7:3–8) with Gehazi and his three sons. D.L.C.

Gehenna (gi-hen'uh), hell or hellfire. The word is derived from Hebrew *ge-hinnom,* meaning "valley of Hinnom," also known in the OT as "the valley of the son(s) of Hinnom." Located west and south of Jerusalem and running into the Kidron Valley at a point opposite the modern village of Silwan, the valley of Hinnom once formed part of the boundary between the tribes of Judah and Benjamin (Josh. 15:8; 18:16; Neh. 11:30). During the monarchical period, it became the site of an infamous high place (called "Topheth" and derived from an Aramaic word meaning "fireplace"), where some of the kings of Judah engaged in forbidden religious practices, including human sacrifice by fire (2 Chron. 28:3; 33:6; Jer. 7:31; 32:35). Because of this, Jeremiah spoke of its impending judgment and destruction (Jer. 7:32; 19:6). King Josiah put an end to these practices by destroying and defiling the high place in the valley of Hinnom (2 Kings 23:10).

Probably because of these associations with fiery destruction and judgment, the word "Gehenna" came to be used metaphorically during the intertestamental period as a designation for hell or eternal damnation. In the NT, the word is used only in this way and never as a geographic place name. As such, Gehenna is to be distinguished from Hades, which is either the abode of all the dead in general (Acts 2:27, 31; Rev. 20:13–14) or the place where the wicked await the final judgment. By contrast, the righteous enter paradise, or a state of bliss, immediately upon death (Luke 16:19–31; 23:43; 2 Cor. 12:3). Jesus warned his disciples of committing sins that would lead to Gehenna (Matt. 5:22, 29–30; 23:33; Mark 9:45; Luke 12:5). In the NT, Gehenna designates the place or state of the final punishment of the wicked. It is variously described as a fiery furnace (Matt. 13:42, 50), an unquenchable fire (Mark 9:43), or an eternal fire prepared for the devil and his angels (Matt. 25:41). ***See also*** Hell, Sheol. W.E.L.

Gemariah (gem′uh-rī′uh). **1** The son of Shaphan, of an influential Jerusalem family of scribes in the early sixth century B.C. The scroll of Jeremiah's collected prophecies was first read in Gemariah's chamber in the Temple precinct (Jer. 36:10). Later, Gemariah appears among the prophet's supporters at the court of Jehoiakim. **2** The son of Hilkiah, who carried Jeremiah's letter to the exiles in Babylonia (Jer. 29:3).

genealogy, a history of the descent of a person or group (family, tribe, or nation) from an ancestor. The term appears in both the OT and the NT (1 Chron. 5:1, 7, 17; 2 Chron. 31:16; Ezra 2:62; Neh. 7:5, 64; 1 Tim. 1:4; Titus 3:9; also Matt. 1:1 RSV [KJV: "origins"]).

The OT contains about two dozen genealogical lists. The first is at Gen. 4:17–22 (from Cain through seven generations). Other prominent lists are the generations from Adam to Noah (Gen. 5:1–32), the descendants of Noah (Gen. 10:1–32), the generations from Shem to Abraham (Gen. 11:10–26), the descendants of Jacob (Gen. 46:8–27) and Levi (Exod. 6:16–25), and the list of persons and families of the postexilic community who continue the line from preexilic times (Ezra 2:2b–61). The most extensive genealogy is in 1 Chron. 1:1–9:44 (Adam to the descendants of Saul).

These genealogies vary in historical value and purposes. The aim of constructing genealogies was to establish descent and thereby one's identity. Certain generations and individuals, however, were omitted. For example, Exod. 6:16–20 identifies Moses as the great-grandson of Levi, which is hardly possible in a strict sense, since the time span is over four hundred years (cf. Exod. 12:40).

The earliest sources of the Pentateuch (J and E) contain relatively little genealogical material (Gen. 4:1, 19–24; 9:20–27). These serve chiefly to account for differences among peoples and cultures. The impetus for genealogies arises above all after the Deuteronomic reform (seventh century B.C.), which stressed purity of the community (Deut. 7:1–4; 23:1–8). This was intensified in the postexilic era when ethnic purity had to be documented and foreign influence had to be removed (Ezra 2:59–63; 10:9–44; Neh. 13:23–28). Moreover, genealogies were constructed for the Aaronic priesthood (restricted to descendants of Levi; Exod. 28:1–29:44).

Since royal succession in the Southern Kingdom was determined by Davidic descent, a royal genealogical record had to be kept. Furthermore, it was expected (although not in all circles) that the Messiah would be a descendant of David (Isa. 11:1–5), whose "house" and "throne" had been established forever by divine promise (2 Sam. 7:16; Ps. 89:3–4).

The NT genealogies of Jesus in Matt. 1:1–17 and Luke 3:23–38 seek to establish above all his Davidic descent (Matt. 1:1, 6, 17; Luke 3:31). Matthew's also establishes his descent from Abraham (1:1–2, 17), while Luke's traces his descent to "Adam, the Son of God" (3:38). Although both genealogies cover the span from Abraham to Jesus, they cannot be harmonized. Matthew computes three groups of fourteen generations each for this span (1:17), although only forty-one (not forty-two) names actually appear (inclusive of Abraham and Jesus), while Luke lists fifty-seven names. The names are mostly the same from Abraham to David in both (Luke 3:33 adds Arni and Admin), but thereafter only three names appear in common (Shealtiel, Zerubbabel, and Joseph). In spite of attempts to explain the discrepancies, these genealogies should be seen as containing some historical information but designed primarily in light of the intent of the Evangelists: to establish that Jesus fulfills the messianic hopes of Israel. ***See also*** David; King; Messiah; Priests. A.J.H.

general Letters, the seven NT Letters attributed to James, Peter (2), John (3), and Jude, also known as "catholic Epistles." The Letters are written either to a general audience or to an individual not otherwise identifiable (2 and 3 John). ***See also*** Epistle; Letter.

generation (Heb. *dor*), the period of time between the birth of parents and the birth of their children; all of the people alive during that time. The OT uses "generation" only loosely as a measure of time, and it is therefore difficult to use the term in exact chronological calculations. Although a generation sometimes covers up to a hundred years (Gen. 15:13, 16; Exod. 12:40), most biblical writers seem to consider thirty to forty years to be a normal generation (Deut. 2:14; Job 42:16; Ps. 95:10). Usually "generation" simply refers to all of the people at a given time (Gen. 6:9; Pss. 14:5; 24:6; 49:19; 24:6; 112:2; Jer. 2:3).

Some English translations use "generations" to translate the Hebrew word *toledot,* a term that refers to a sequence of people or events and that might better be translated "genealogy" or "story." In Genesis the formula "these are the generations of X" is used to give structure to the book. Sometimes the formula introduces genealogies that summarize a history of events, trace the transmission of something from one generation to another, or relate characters to each other (Gen. 5:1; 10:1; 11:10; 25:12; 36:1). Elsewhere the formula introduces a new block of narrative (Gen. 2:4; 6:9; 11:27; 25:19; 37:2). Outside of Genesis, the word "generations" usually introduces or concludes a genealogy (e.g., Exod. 6:16, 19; 28:10; Num. 3:1; 1 Chron. 5:7; Matt. 1:17). ***See also*** Genealogy. R.R.W.

The frontispiece to Genesis from the first Bible of Charles the Bald (ninth century) shows (top) the creation of man and woman, (middle) eating the fruit of the forbidden tree, and (bottom) the banishment of Adam and Eve from the Garden of Eden.

Genesis (jen´uh-sis), the first book of the Bible; it is the narrative account of both the world's and Israel's inception.

Content: The book divides into two major sections, the primeval or world history in Gen. 1–11 and the family history of Israel's ancestors in chaps. 12–50. The former begins with the creation of the cosmos. Unique among the traditions of the ancient Near East, the biblical view of creation begins with a series of divine commands that systematically bring about and structure all of creation. The creation of human beings in God's image, male and female, on the sixth day, marks the final creative act (1:26–27). The pinnacle of creation, however, is the Sabbath, the seventh day on which God rested (cf. Exod. 20:8–11). With creation comes blessing in the command to "be fruitful and multiply" (Gen. 1:22, 28), the great commission of the OT, as it were. All of creation is declared "very good" (1:31), but the approbation does not last.

After the creation of the first man and woman described in 2:4–25, primordial harmony is disrupted with the disobedience of the first couple, resulting in ejection from the Garden, followed by fratricide (4:1–16) and a general increase in wickedness and violence (6:5, 11). Yet coupled with this downward spiral of violence and sin is the steady progress of blessing, which endures even through the Flood with the family of Noah (see the genealogical lists of 5:1–32; 10:1–32; 11:10–31).

Moving from world history to family history, the remainder of the book focuses upon the adventures and hardships of Israel's ancestors: Abraham and Sarah (Gen. 12–25), Isaac and Rebekah (Gen. 25–26), Jacob ("Israel") and Rachel (Gen. 25–36), and Joseph (Gen. 37–50). Tracing four successive generations, this family history begins when Abraham and Sarah are called to journey to an unknown land to bear God's promise of blessing for all the families of the earth (12:1–3). Wandering throughout the lands of Mesopotamia, Egypt, and Canaan, these fallible ancestors of Israel share in common God's promise to bless them with land and posterity (e.g., 13:15–17; 15:5, 7, 18–21; 17:2–8; 22:17–18; 26:2–4; 28:3–4, 13–15; 50:24).

Critical Study: Scholars have long noted the diverse array of traditions, genres, and literary sources that make up this extensive work: divergent accounts of creation in Gen. 1:1–2:4a and 2:4b–25, genealogical lists (cf. 4:17–26; 5:1–32), poetic blessings (27:27–29, 39–40), cycles of narrative tradition (chaps. 25–36), and even a smattering of mythology (6:1–4). In addition, the literature evinces a long and complex history of transmission, from the earliest oral traditions to the final edited version. Noting changes in style and content, scholars have traditionally identified four literary layers or sources: J, E, D, and P. However, new gains in this area of study are mounting, placing into question some of the once well-accepted theories about the book's development. The literary extent, social provenance, and dating of the literary sources, for example, are increasingly open to question. Scholars are noting a creative, literary logic behind the countless stylistic shifts and repetitions (doublets) in the book. In any case, like the Pentateuch in which it belongs, the book of Genesis is essentially a pastiche of various kinds of literature and traditions joined together like finely woven tapestry.

Theology: Genesis is first and foremost an account of God's ardent initiative to create and bless the world. Divine discourse commences as well as directs the course of history. God's character as depicted in Genesis is full and complex: God creates, deliberates, and recreates (Gen. 1:26; 11:6–7; 18:17). Resolute in intent, God is also stricken with grief (Gen. 6:6). Utterly transcendent, God enters into the fray of earthly existence, blessing and guiding human beings through the travails of history. God both acts and reacts to the choices human beings make (e.g., Gen. 11:1–9). The story of the Flood marks a watershed in this sweeping narrative, for here God must begin anew the whole creative enterprise. Yet God never relents in blessing and renewing life.

OUTLINE OF CONTENTS

Genesis

- I. Primeval history: creation and human history (1:1–11:32)
  - A. Creation and its goodness (1:1–2:25)
    1. Creation of the world (1:1–2:4a)
    2. Creation of man and woman (2:4b–25 [cf. 1:26–27])
  - B. Creation gone awry (3:1–4:16)
    1. Disobedience in the Garden (3:1–24)
    2. Strife among brothers (4:1–16)
  - C. Life before the Flood (4:17–6:4)
  - D. The Flood story (6:5–9:29)
    1. Human corruption and divine resolve (6:5–22)
    2. The coming of the Flood (7:1–24)
    3. The resolution of the Flood (8:1–22)
    4. The covenant of rainbow (9:1–17)
    5. The family of Noah (9:18–29)
  - E. The generations of the sons of Noah (10:1–32)
  - F. The Tower of Babel (11:1–9)
  - G. The generations of Shem (11:10–32)
- II. The family history of Israel's ancestors (12:1–50:26)
  - A. Stories of Abraham and Sarah (12:1–25:18)
    1. The initial call and promise (12:1–9)
    2. At residence in Egypt (12:10–20)
    3. Division of the land with Lot (13:1–18)
    4. Victory over the kings (14:1–24)
    5. The covenant of land and progeny (15:1–21)
    6. Sarah and Hagar (16:1–16)
    7. The covenant of circumcision (17:1–27)
    8. The promise of a son (18:1–15)
    9. Sodom and Gomorrah (18:16–19:38)
    10. At residence in Gerar (20:1–18)
    11. Isaac's birth and Hagar's dismissal (21:1–21)
    12. The covenant at Beer-sheba (21:22–34)
    13. The testing of Abraham (22:1–24)
    14. The death of Sarah (23:1–20)
    15. The marriage of Isaac and Rebekah (24:1–67)
    16. Abraham's genealogy and death (25:1–18)
  - B. Stories of Isaac and Jacob (25:19–36:43)
    1. The birth of Jacob and Esau (25:19–34)
    2. At residence in Gerar (26:1–30)
    3. The blessings of Jacob and Esau (27:1–40)
    4. Jacob's journeys and residence in Haran (27:41–31:55)
    5. Jacob and Esau reconciled (32:1–33:20)
    6. Jacob's children at Shechem (34:1–31)
    7. Various Jacob traditions (35:1–29)
    8. The descendants of Esau (36:1–43)
  - C. The story of Jacob's sons: Joseph and his brothers (37:1–50:26)
    1. Joseph's dream and trouble (37:1–36)
    2. Judah and Tamar (38:1–30)
    3. Joseph's rise to power in Egypt (39:1–41:57)
    4. Joseph and his brothers (42:1–44:34)
    5. Joseph's self-disclosure (45:1–28)
    6. Jacob's settlement in Egypt (46:1–47:26)
    7. The blessing and last days of Jacob (47:27–50:14)
    8. Joseph forgives his brothers (50:15–21)
    9. Joseph's last days (50:22–26)

Attesting to God's intent to lead history toward its consummation and to return it to its glorious beginning, the rest of Scripture continues the message of Genesis. This first book of the Bible sets the stage for the ongoing course of history as well as prefigures history's fulfillment. The prophetic visions of the final days reflect God's plan to bring about a new creation, a creation that is anticipated "in the beginning" and yet exceeds it (e.g., Zech. 14:6–8; Rev. 21:1–27). ***See also*** Patriarch; Pentateuch.

An inscription forbidding non-Jews (i.e., Gentiles) from entering the Temple in Jerusalem; cast of the original stone, which dates to 20 B.C.

Gennesaret (gi-nes´uh-ret). ***See*** Galilee, Sea of.

Gentile (from Lat. *gens*, "nation"), a non-Jew. The distinction has its roots in the OT in the seven nations (Heb. *goyim*) not driven completely from the land (Josh. 24:11). According to several traditions, the Israelite was enjoined to maintain strict separation from them in matters of religion, marriage, and politics (Exod. 23:28–33; Deut. 7:1–5; Josh. 23:4–13), although, historically speaking, the amount of interchange between Israel and the peoples of the land seems to have been considerable. Only in postbiblical Hebrew did it become possible to speak of an individual "Gentile" (*goy*) as, after Ezra, the Jewish community began to close ranks in the wake of the Exile.

Jew and Gentile: The distinction between Jew and Gentile is related to a tension between universalism and particularism. The Isaianic tradition spoke of Israel as "a light to the nations" (Isa. 42:6; cf. 60:3). In the latter days, the nations would flow to Jerusalem to learn Torah (Isa. 2:2–4) or to participate in the coming reign of God (45:22–24; 51:4–5). On the other hand, in an effort to establish a separation between Jew and Gentile, Ezra and Nehemiah commanded Jews in Jerusalem to divorce their non-Jewish wives—not just those of the seven nations (Ezra 9–10; Neh. 10:30; 13:23–31). Ruth and Jonah seem to be parables written to protest this action in the name of a more universal understanding of God's care for his human creation.

The Apocrypha and Pseudepigrapha give evidence of a wall being erected between Jew and Gentile (see 2 Macc. 14:38), although expressions of universalism are still found. The claim that the world was created for Israel alone (*T. Moses* 1:12; 2 Esd. 6:56) contrasts sharply with echoes of the Isaianic "light to the nations" (*T. Levi* 2:11; 14:4; Tob. 13:11; *T. Judah* 24:5–6; *1 Enoch* 10:21). Ecclus. 11:34 warns against receiving a stranger into your household, lest your way of life become alienated. The prohibition of mixed marriages became a central concern (Tob. 4:12–13; *T. Levi* 9:10; 14:6). Other areas in which separateness was particularly apparent include food (Dan. 1:8–15; Tob. 1:10–12), circumcision (1 Macc. 1:11–15), and avoidance of the idolatry characteristic of gentile society (1 Macc. 3:48). 1 Macc. 1 presents in bold relief the contrast between life according to Jewish and gentile law and custom. While it was possible for a Gentile to become a proselyte, many of those attracted to Jewish monotheism became "God-fearers" (Acts 10:2; 13:16) rather than undergo circumcision and keep the food laws required of full converts.

Rabbinic attitudes toward Gentiles vary depending upon the conditions of Jewish life. The righteous Gentile was expected to keep the seven Noachian laws (*Gen. Rab.*, Noah, 34:8) and, according to some, would be given a place in the world to come (*t. Sanh.* 13:2). The Jew was to deal honestly with Gentiles in order to avoid profanation of the name of God (*Abod. Zar.* 26a) and was obligated to relieve their poor (*Gittin* 61a). The charging of interest to Gentile as well as Jew was prohibited (*B. Mes.* 70b–71a). On the other hand, one finds polemics directed against Gentiles for their idolatry and immorality as well as regulations designed to maintain Jewish separateness—for example, prohibitions against wines and cooked foods prepared by Gentiles.

In the Early Christian Community: The development of Christianity, which began as a Jewish movement, was profoundly affected by the success of the gentile mission undertaken by the apostle Paul and others. The Jerusalem conference of about the year A.D. 49 determined that gentile converts to Christianity did not have to become Jewish proselytes (Gal. 2:1–10; Acts 15:1–35), thus opening membership in the Christian community to those who might otherwise have remained "God-fearers." Paul fought efforts to distinguish between Jew and Gentile in the Christian community (Rom. 3:29–30; Gal. 2:11–21; 3:26–29). He was opposed by the Judaizers or "circumcision party" (Gal. 2:12), Christians who insisted that gentile converts become Jewish proselytes. Paul's practice furthered the success of Christianity within the empire and led to its emergence as a distinct religion by the end of the first century.

As a result of the controversy over the role of Gentiles in the church, it is difficult to determine the attitude of Jesus himself, since both sides seem to have affected the preservation of the Jesus tradition. Some scholars suggest that Jesus understood the activity of the Messiah in traditional terms as directed toward the Jewish people (Matt. 10:5–6; 15:24) with, perhaps, the inclusion of the Gentiles in the final rule of

God. On the other hand, Jesus does not seem to have been a supporter of Jewish nationalism, and some of his more radical sayings and actions (Matt. 21:31; Mark 11:15; Luke 10:30–35) suggest that he proclaimed a kingdom that confronted men and women rather than Jew and Gentile. ***See also*** Monotheism; Paul; Proselyte; Stranger.

Gera (gee´ruh). **1** A son of Benjamin (Gen. 46:21). **2** A son of Bela and grandson of Benjamin (1 Chron. 8:3). **3** A second son of Bela and grandson of Benjamin (1 Chron. 8:5). **4** A Benjaminite, the father of Ehud (Judg. 3:15). **5** A Benjaminite, son of Ehud (1 Chron. 8:7). It is difficult to separate these names and assign them to specific persons. They may all represent the same person whose ancestry has become confused in the records; or the name may represent an ancient clan within the tribe of Benjamin whose exact genealogy was not known. **6** A member of Saul's family and father of Shimei, the man who pronounced a curse on David (2 Sam. 16:5; 19:16). D.R.B.

gerah (gee´ruh), measure of weight comprising one twentieth of a shekel (Exod. 30:13; Lev. 27:25; Num. 3:47; 18:16; Ezek. 45:12). Recovered samples to date indicate an average weight of 0.565 grams. ***See also*** Weights and Measures.

Gerar (gee´rahr), a town in the Negev whose exact location remains undetermined. Abraham visited the town and entered into some type of agreement with the king of Gerar, Abimelech (Gen. 20:1–2). However, the bulk of episodes in the OT involving Gerar are in the Isaac stories (Gen. 26). This has led some scholars to argue that the Isaac stories originated in that region.

The only other references to the town are in 2 Chronicles (14:9–14). Here we have a story of Asa's (905–874 B.C.) defeat of Zerah, an invading Ethiopian.

The stories about Gerar are of such a sort that it is difficult, if not impossible, to discern its location with any certainty. W. M. F. Petrie identified modern Tell Jennah as Gerar during his 1927 excavation. W. J. Phythian-Adams had excavated the site in 1922 for the Palestine Explo-

Remains of public buildings from the first and second centuries A.D. excavated at Gerasa, one of the three greatest cities of Roman Arabia.

ration Fund. This site has been by and large discarded as a possible candidate for Gerar. Y. Aharoni argued in 1956 that modern Tell Abu Huweirah was ancient Gerar. The fact is that the excavation of the site by D. Alon, which turned up Middle Bronze material, does not clearly demonstrate that Tell Abu Huweirah is Gerar. S.B.R.

Gerasa (gair´uh-suh; modern Jerash), one of the three greatest cities of Roman Arabia. It is thirty-three miles southeast of the Sea of Galilee in the mountains of Gilead. Hence Luke's identification of it with Jesus' healing of the demoniac (8:26) cannot be correct. The city was administered by an appointee of the legate of Syria and officially known as "Antioch on the Chrysorrhoas." Excavations have revealed extensive remains of public buildings from the first and second centuries A.D. The city wall, gates, and towers, several main streets, the forum, as well as remains of the hippodrome, theaters, triumphal arch, and temples of Zeus and Artemis have been found. A coin from the reign of Commodus attests that the city was founded by Alexander the Great. The earliest dates for the city come from the second century B.C. Josephus, a Jewish historian, reports that the Jews living in the town were spared by the gentile population when the city was attacked by Jewish rebels during the Jewish revolt (*War* 2.480). P.P.

Gergesenes (guhr´guh-seenz). ***See*** Gadara; Gerasa.

Gerizim (gair´uh-zim), the bulky mountain (summit 2800 feet above sea level) opposite Ebal in the central Samaritan highlands; in the pass between Ebal and Gerizim lies Shechem, at the intersection of main north-south and east-west roads. Deut. 11:29; 27:12; and Josh. 8:33 portray a ceremony of blessings shouted from Gerizim, curses from Ebal: the consequences of covenantal loyalty or disloyalty. In Judg. 9:7 Jotham speaks his fable from Gerizim, perhaps from the ruined seventeenth- or sixteenth-century B.C. sanctuary on the knoll called Tananir one-quarter mile southeast of Shechem, elevated 300 feet above it. Judg. 9:37 mentions Tabbur-erez, the "navel" of the land, suggesting that Gerizim was for some the mythic meeting place of heaven and earth. For Samaritans, Gerizim is the highest of all mountains, *the* place to worship God (John 4:20). Josephus, the first-century A.D. Jewish historian, reports that the Samaritans built a temple there in the fourth century B.C. In the second and third centuries A.D., coins and contemporary writings attest a peristyle temple built by Hadrian ca. A.D. 130 on Gerizim above Neapolis (Nablus). Excavation on Tell er-Ras, the Gerizim spur nearest the Shechem/Nablus pass, has found Hadrian's temple foundations, elevated on a podium that may encase the Samaritan sanctuary platform. On the main summit, a half mile south, are ruins of Zeno's Maria Theotokos Church, built ca. A.D. 484 and fortified by Justinian ca. 532. Adjacent is the Samaritan celebration site, still in use for Passover by modern descendants. Stretching southwest from this cluster on the summit is the ruin field of a Hellenistic town (Loza of Eusebius?). Under excavation since the mid-1980s, it has a fortification wall enclosing over one hundred acres of houses as well as a precinct separated by its own wall, within which is a fine paved court with steps up to it—another nominee for the ancient Samaritan high place. Aramaic and Hebrew inscriptions point to a sacred use. Coinage and pottery are confined to the second century B.C., ending with violent destruction around 110 B.C. at the hands of John Hyrcanus I. ***See also*** Covenant; Ebal; Samaritans; Shechem. E.F.C.

Gershom (guhr´shuhm). **1** Moses' eldest son, born to Zipporah in Midian (Exod. 2:22). The name, popularly explained as "sojourner there" (Heb. *ger sham*), may be based on the verb *garash* ("drive away"), used for Pharaoh's release of Israel from Egypt (Exod. 6:1; 11:1) and for the expulsion of earlier inhabitants from Canaan (Exod. 23:28–31 and elsewhere). It also recalls Moses' rescue of Zipporah and her sisters from the shepherds who "drove them away" from the well (Exod. 2:17). This Gershom is the ancestor of the priest at Dan (Judg. 18:30). **2** A descendant of Phinehas (Ezra 8:2). The Gershom of 1 Chronicles 6 (cf. 15:7) is a scribal error. ***See also*** Gershon. K.G.O.

Gershon (guhr´shuhn), the first son of Levi, followed by Kohath and Merari (Gen. 46:11 and elsewhere). The name appears as Gershom several times in 1 Chron. 6 (cf. 15:7), but this is an error. Numbers 4 and Joshua 21 list Gershon's descendants between Kohath's and Merari's, while 1 Chron. 15:5–7 and 2 Chron. 29:12 put them third. Num. 7:7–9 allocates two wagons to Gershon's sons and four to Merari's (for carrying sections of the tabernacle), but none to the sons of Kohath (for the smaller tabernacle furnishings). Gershon's two sons are Libni (Exod. 6:17; Num. 3:18) or Ladan (1 Chron. 23:7; 26:21) and Shimei. ***See also*** Gershom. K.G.O.

Geshem (gesh´uhm), an Arab opponent of Nehemiah who ridiculed the plan to rebuild Jerusalem's walls and subsequently plotted against him (Neh. 2:19; 6:1–9). We may assume that he was the ruler of the Persian province of Arabia, south of Judah. This position may explain his motivation to interfere in Judah's domestic affairs.

Geshur (gesh´uhr). **1** A small ancient kingdom whose territory formed part of southern Golan, east of the Sea of Galilee (Josh. 12:5; 13:11). During the wars of conquest (late thirteenth–early twelfth centuries B.C.) it proved difficult for Israel to win (Josh. 13:11, 13), and it remained an independent Aramean kingdom in the time of David. Seeking to establish political relationships with this kingdom, David married Maacah, the daughter of Geshur's king, Talmai (2 Sam. 3:3). She bore him Absalom who, after killing Amnon, fled to his grandfather's territory (2 Sam. 13:37–38). **2** A region in the south of Palestine, mentioned in Josh. 13:2 as yet to be won and in 1 Sam. 27:8–11 as conquered by David while he was with the Philistines. Y.G.

gestures, movements of the hands and other parts of the body by which humans and other primates consciously or unconsciously express attitudes or feelings.

The Bible, like other literatures from the earliest antiquity to the present day, employs words and phrases to enable readers to visualize gestures, postures, and facial expressions. In many cases the words and phrases in the Bible that refer to gestures can be correlated with specific gestures illustrated in sculptures, seals, reliefs, and tomb paintings from the ancient Near East.

The analysis of gestures, postures, and facial expressions and the systematic investigation of their role in the conscious or unconscious expression of emotions and ideas are today referred to under the rubrics of body language, kinesics, nonverbal communication, and semiotics. Research in these fields has demonstrated, among other things, that gesticulation is universal among humans; that no gesture has precisely the same meaning in every culture; and that the pattern of gesticulation within a given culture operates in consonance with the spoken language to effect a two-channel communication. These findings have put to rest the assumption, widely held until recently, that the Bible frequently refers to gestures, postures, and facial expressions because the Bible is a product of the Middle East, whose inhabitants, it was alleged, being less civilized than the peoples of northern Europe, exert less control over the spontaneous physical expression of their emotions.

Kneeling figure, probably Hammurabi, in a gesture of prayer; from Larsa, ca. 1750 B.C.

Prayer Gestures: The prayer gesture most frequently mentioned in the OT is "spreading the palms" (Exod. 9:29, 33; 1 Kings 8:22, 38, 54; 2 Chron. 6:12, 13, 29; Ezra 9:5; Job 11:13; Ps. 44:21; Isa. 1:15; Jer. 4:31). Apparently this gesture was employed with prayers of petition to suggest that God fill the hands of the petitioner with the requested benefit. This gesture is probably to be distinguished from "lifting up the hands" toward the holy place or sanctuary (Pss. 28:2; 134:2). While in both its attestations the latter gesture was directed toward an earthly sanctuary, Akkadian, Ugaritic, Greek, and Roman parallels suggest that it originated as a salute to God in his heavenly temple.

Prayer Postures: Bending over is the posture of worship prescribed for one who presents the first fruits of the harvest in Deut. 26:10 and for one who approaches any of the gates of the Temple in Ezekiel 46, but bending over is associated with idolatrous worship in Lev. 26:1 and Ezek. 8:16. Other OT references to bending over in the worship of the Lord include 2 Kings 18:22; Pss. 5:8; 22:28; 86:9; 132:7; 138:2; and Isa. 66:23. Other postures of worship mentioned in the Bible include stooping (1 Kings 8:54; 19:18; 2 Chron. 29:29; Ezra 9:5; Ps. 22:30; Isa. 45:23), falling on the face (Gen. 24:26, 48; Exod. 4:31; 12:27; 34:8; 2 Chron. 29:30; Neh. 8:6; Ezek. 44:4; Matt. 26:39; Mark 14:35; Rev. 1:17), throwing oneself down (Deut. 9:18, 25; Ezra 10:1), and bowing the head (Isa. 58:5; Mic. 6:6). Kneeling, to be distinguished from stooping, is mentioned as a posture of prayer in 2 Chron. 6:13; Ps. 95:6; Dan. 6:11; and Luke 22:41. Standing is attested as a posture of prayer to God in Neh. 9:2; Ps. 106:30; Jer. 18:20; Matt. 6:5; and Mark 11:25 and as a posture of idolatrous worship in Dan. 2:3. King David is portrayed as praying to God in a seated position in 2 Sam. 7:18.

Reading and Teaching Scripture: While no specific posture is prescribed for the septennial reading of the Torah in Deut. 31:10–13 (contrast

m. Sota 7:8), Nehemiah 8–9 states that when Ezra read from the Torah both he and the congregation were standing. Luke 4:17–20 informs us that Jesus stood to read from the book of Isaiah in the synagogue at Nazareth but that he afterward sat down to teach. According to Matt. 5:1, Jesus was seated while preaching the Sermon on the Mount, while Luke 6:17 asserts that Jesus stood on that occasion. Matt. 26:55 and Luke 2:46 both refer to Jesus' sitting while teaching in the Temple.

Postures of Entreating Jesus for Healing: According to Matt. 8:2 and Mark 1:40 the leper kneels in supplication before Jesus while in Luke 5:12 the leper falls on his face in entreaty. According to Matt. 15:25 the Phoenician woman kneels when asking Jesus to exorcise the demon from her daughter, while in Mark 7:25 she falls at Jesus' feet. Entreating Jesus for healing in a kneeling posture is attested also in Matt. 17:14 and Matt. 20:20, while falling on the face while supplicating Jesus for healing is mentioned in Mark 5:22; Luke 8:41; and Luke 8:28.

Obeisance: One bends over (Gen. 23:7, 12; 33:3, 6, 7; 37:10; 2 Sam. 9:6; 14:22; Isa. 49:23), stoops (Esther 3:2, 5), or falls down (Gen. 50:18; Esther 6:13) before sovereigns or grasps their feet (2 Kings 4:27) in order to acknowledge that one is beneath them in rank.

A courtier kisses the ground in a gesture of obeisance; bas-relief from Hermopolis, Egypt.

Greeting: Lev. 19:32 prescribes that when younger persons encounter their elders the former should stand. In 1 Kings 2:19 King Solomon stands up to greet his mother. Job tells us that before disaster befell him he was so highly esteemed in the community that even the elderly when encountering him "rose and stood" (Job 29:8). An alternative posture for greeting high-status persons is bending over (Gen. 19:1; 43:28; 1 Sam. 25:41; 2 Kings 2:15).

Kissing: While 1 Sam. 20:41 and 2 Sam. 19:40 show that close friends might kiss upon taking leave of each other, kissing is generally reserved in the OT for greeting close relatives (Gen. 29:11, 13; 33:4; 45:15; 48:10; Exod. 4:27) or taking leave (Gen. 31:28; 32:1; 50:1; Ruth 1:9, 14). The purely erotic kiss is mentioned in the Bible only in Prov. 7:13 and Song of Sol. 1:2; 8:1. The kiss of betrayal is attested only in 2 Sam. 20:9 and Matt. 26:49 (parallels, Mark 14:45; Luke 22:47). In the NT the kiss is a greeting exchanged between Christians (see Acts 20:37; Rom. 16:16; 1 Cor. 16:20; 2 Cor. 13:12; 1 Thess. 5:26; 1 Pet. 5:14).

Sadness: Sadness is expressed by the fallen face (Gen. 4:5–6; Mark 10:22), the "changed countenance," i.e., the gloomy face (Job 14:20; Eccles. 8:1; Dan. 5:6, 9, 10; 7:28), and darkened eyes (Lam. 5:17). "The face is bad," i.e., "the face is gloomy" (Gen. 40:7; Neh. 2:2; Eccles. 7:3) and weeping (Gen. 27:38; 42:24; 50:17; Ezra 3:12; Ps. 126:6) also show sadness.

Happiness: Contentment, joy, and kind disposition to others are associated with one's face being lit up (Job 29:24; Isa. 60:1), the head (Pss. 3:4; 110:7) or face (Num. 6:26; Deut. 28:50) being lifted up, and shining eyes (1 Sam. 14:27, 29; Pss. 13:4; 19:9; Prov. 29:13; Ezek. 9:8).

Anger: One of the most common expressions for being angry in the OT Hebrew is a phrase that means literally "the face burns." This expression reflects the well-known reddening of the face of angry persons. It is applied to persons (Gen. 39:19; Judg. 9:30; 14:19; 1 Sam. 11:6) and, by extension, to God (Exod. 4:14; Num. 11:10; 12:9; 25:3; 32:10, 13; Deut. 29:26; 2 Sam. 6:7). Descriptions of divine anger that reflect the angry person's increase in body temperature include Isa. 30:27: "Behold, the name of the Lord comes from far, burning with his anger, and in thick rising smoke; his lips are full of indignation, and his tongue is like a devouring fire" (see also Deut. 32:22). Frowning is referred to as "stiffening the face" in Mic. 7:18 and as "hardening of the face" in Ps. 90:11. Fuming in anger is referred to in 2 Sam. 22:9 (Ps. 18:9); Ps. 74:1; and Isa. 65:5.

Patience: Just as anger is referred to in the OT primarily by reference to its manifestation on the countenance, so is patience referred to primarily by a phrase whose literal meaning is "broadness of face." Examples include Exod. 34:6; Num. 14:18; Ps. 86:15; Prov. 14:29; Joel 2:13; and Jon. 4:2.

Judicial Postures and Gestures: Because one lifted one's hand, thereby pointing to God's heavenly throne, when taking an oath (Deut. 32:40), swearing came to be referred to simply as "lifting the hand" (see Gen. 14:22; Exod. 6:8; Ezek. 20:5, 6, 15, 23, 28, 42). That the judge was seated while hearing cases is reflected in Exod. 18:13, which also informs us that the litigants stood during the legal proceeding (see also Judg. 4:4; Ruth 4:2; Ps. 9:8; John 19:13). ***See also*** Dancing; Mourning Rites; Prayer.

M.I.G.

Gethsemane (geth-sem´uh-nee; Heb., "oil press"), the site mentioned twice (Mark 14:32, Matt. 26:36) where Jesus prayed in lonely anguish just before his public betrayal and subsequent arrest there. Its precise location is not known. Mark and Matthew refer to a "place" called Gethsemane and imply it was near the Mount of Olives. Luke does not mention Gethsemane, suggesting instead that these events took place on the mount itself. Though John records neither name nor anguished prayer, he locates the betrayal in a "garden," which he locates across the Kidron Valley from Jerusalem and thus on the western slopes of the Mount of Olives. Today authenticity is claimed for several sites on or near this mountain, but none can trace their claim back earlier than the fourth century. Heb. 5:7–8 interprets the events in Gethsemane as proof of the "godly fear" and "obedience" that formed a prelude to Jesus' perfection. ***See also*** Jerusalem; Olives, Mount of.

Gezer (gee´zuhr; also *Tell Jezer, Gazru*), a 33-acre mound, five miles south-southeast of Ramleh, one of the largest Bronze and Iron Age sites in ancient Palestine. It is situated on the last of the central foothills sloping down to the northern Shephelah, guarding the crossroads of the Via Maris and the trunk road to Jerusalem, at the entrance of the Valley of Aijalon.

Identified with biblical Gezer by C. Clermont-Ganneau in 1871, the site was the scene of the first modern excavations in Palestine, directed by R. A. S. Macalister for the Palestine Exploration Fund from 1902 to 1909. It was dug again briefly by A. Rowe in 1934. From 1964 to 1973 the first large-scale American excavations in the state of Israel were directed at Gezer by G. E. Wright, W. G. Dever, and J. D. Seger. These excavations, sponsored by the Hebrew Union College, Harvard University, and the Smithsonian Institution, pioneered in new stratigraphic and scientific methods.

Occupation began ca. 3500 B.C. in the Late Chalcolithic period, and Gezer continued as a small village throughout most of the Early Bronze Age until a gap ca. 2400–2000 B.C. Beginning in the subsequent Middle Bronze Age, Gezer gradually grew into the most massively fortified site in Palestine, with a three-entryway,

The six-chambered gate at Gezer with the entrance at the far end. Solomon similarly fortified Hazor and Megiddo (cf. 1 Kings 9:15–17).

two-story gate and an inner stone and mudbrick city wall more than 50 feet thick at one point. An outdoor alignment of ten large stelae may be a Canaanite "high place" of the type recalled in the Bible (e.g., 2 Kings 18:4; Jer. 32:35). Gezer was finally destroyed ca. 1482 B.C. by Pharaoh Thutmose III, whose inscription on the walls of the Temple of Karnak records this victory.

In the late Bronze Age, ca. 1500–1200 B.C., Gezer was largely under Egyptian domination. Ten letters from three successive kings of Gezer, written to the pharaohs of Egypt, were found in the famous archives at el-Amarna in Egypt. The outer city wall was built in the fourteenth century B.C., enclosing an even larger area, but Gezer declined toward the end of the thirteenth century B.C. It seems to have been partially destroyed in 1208 B.C. by Pharaoh Merneptah, whose well-known "Victory Stela" mentions both Israel and Gezer.

In the twelfth and eleventh centuries B.C. Gezer remained a Canaanite outpost. It was not taken by the incoming Israelites, although the king of Gezer was killed at the battle of Lachish (Josh. 10:31–33). Philistines, possibly Egyptian mercenaries, are attested by Philistine bichrome pottery, a granary, and several patrician houses.

After several destructions within the Philistine period, Gezer was partially destroyed in an Egyptian punitive raid ca. 950 B.C. The pharaoh then ceded it to King Solomon as a dowry in giving his daughter to the Israelite king in marriage. The historical note in 1 Kings 9:15–17, recording these events and Solomon's subsequent fortification of "Jerusalem and Hazor and Megiddo and Gezer," has been dramatically confirmed by archaeology. A magnificent four-entryway city gate and a double wall—identical to those at Megiddo and Hazor—have been brought to light immediately above a destruction layer.

Gezer remained an Israelite site, albeit rather unimportant, until its destruction by the Assyrians ca. 734 B.C., attested both by archaeological remains and a relief of Tiglath-pileser III (ca. 745–728 B.C.) depicting the siege of "Gazru." The site recovered, as several Neo-Assyrian cuneiform inscriptions found there indicate, but it was destroyed again by the Babylonians ca. 587 B.C.

There are only scant remains from the Persian and early Hellenistic periods. In the Maccabean wars of the second century B.C., however, Gezer became the residence of Simon Maccabeus (RSV: "Gazara," 1 Macc. 13:43–48), and the city gate and walls were repaired for the last time. Gezer then fell into decline, and by the first century A.D. its lands had become a private holding of a certain "Alkios," as a series of boundary inscriptions shows. The Muslim wêli (shrine) was built in the sixteenth century A.D., and the modern Arab village of Abu Shusheh (now destroyed) was established in the nineteenth century A.D.

Ghor (gor), **the.** ***See*** Jordan River, The.

ghost, a disembodied spirit. Belief in disembodied "shades" is attested both in biblical writings and in their cultural contexts. "Shades" (Heb. *rephaīm*) inhabit Sheol (Job 26:5; Ps. 88:10; Prov. 2:18; 9:18; 21:16; Isa. 14:9; 26:19; cf. 29:4, "a ghost [Heb. *ohb*] from the ground"). Samuel's shade is summoned up (1 Sam. 28:12–14). A nocturnal "spirit" (*ruach*) terrifies Eliphaz and he sees a "form" (Heb. *temunah*) (Job 4:15–16). Jesus' disciples, seeing him walking on water (Mark 6:49; Matt. 14:26) or risen (Luke 24:37), think it is a "ghost" (Gk. *phantasma*). ***See also*** Death; Magic and Divination; Sheol.

giant, a term used by the Greek translators of the LXX in the third and second centuries B.C. and by English translators until recently to render several different Hebrew words. Hebrew *gibbor,* one of the words translated "giant," is more accurately "mighty man, warrior," in Gen. 10:8, 9 and in Job 16:14, with the RSV and other modern translations. The RSV is cautious with another term, *Nephilim,* transliterating rather than translating it in its only two occurrences (Gen. 6:4; Num. 13:33). In Gen. 6:4 the Nephilim are the offspring of the sons of God and the daughters of men, part of the formidable

race of humans before the Flood. Num. 13:33 says that the sons of Anak, ancient inhabitants of Canaan so huge that the Israelite spies felt like grasshoppers in comparison, were part of the Nephilim of olden times. Other passages also speak of the ancient inhabitants of Canaan, traditionally rendered as "giants" (Deut. 2:11, 20; 3:11, 13; Josh. 12:4; 13:12; 15:8; 17:15; 18:16). Another Hebrew word often rendered "giants" is *rephaim*. The precise meaning of the word is uncertain; it has been suggested that it means "the hale ones" and describes a group of gods, and sometimes humans, who are related to "The Hale One," El, the high god of Canaanite mythology. Biblical *rephaim* may well have been an elite group of warriors, men with sufficient wealth to provide chariots and other weapons of war for themselves; there is some evidence that the *rephaim* met together for feasting. The Israelites might have encountered these military guilds and attributed to them great size and power. At any rate it is clear that the people of the Bible, like many of their neighbors, believed that there were giants of old in the land. There is no archaeological evidence to support the view that the pre-Israelite inhabitants were giants; to attribute great size to them was probably a narrative way of expressing their military prowess. R.J.C.

Gibbethon (gib´uh-thon; Heb., "mound" or "height"), a city originally assigned to Dan and later given to the Levites (Josh. 19:44; 21:23), although by the time of King Asa of Judah (ca. 900 B.C.) it was in Philistine hands (1 Kings 15:27). It was the site of the assassination of Nadab, king of Israel (Northern Kingdom) by his general Baasha during an attempt to take the city from the Philistines (1 Kings 15:27). It was also the site twenty-four years later of a revolt against Zimri by his general Omni during another siege of the city (1 Kings 16:15). It is identified with modern Tel el-Malat, about four miles northeast of Joppa, although the location is not certain. D.R.B.

Gibeah (gib´ee-uh), a Hebrew word meaning "hill," in contrast to "mountain." As a name it is attached in OT tradition to a site in Benjamin, the home of Saul and center for his career as king (1 Sam. 10:26). Under the modern name Tell el Ful the site, located about five miles north of Jerusalem, reveals a succession of occupations that, at least in part, corresponds with the OT's account of Saul's residence. The earliest relevant level, destroyed by fire in the twelfth century B.C., provides the context for a more extensive and fortified construction from the Early Iron Age. The most important building from this level is an eleventh-century structure, a fortress with casemate wall and corner tower, perhaps the "rustic palace" of King Saul. Successive constructions suggest that some violent destruction occurred, with rebuilding in more modest quality. The site was finally abandoned.

In the biblical tradition, Gibeah was the location for Saul's association with a band of prophets (1 Sam. 10:1–10), an event related to selection of Saul as king. From this site Saul engineered a liberation of Jabesh-gilead from the Ammonites (1 Sam. 11:1–11) as well as a contest of strength with the Philistines (1 Sam. 14). From this site, Saul sought help in his search for David. Ironically, some of David's associates were from this site (2 Sam. 23:29).

The most important tradition about Gibeah unrelated to Saul is the account of inhospitable reception for an Ephraimite, including the rape and murder of his concubine, and the ensuing war between Ephraim and Benjamin (Judg. 19–20). Perhaps the parallel between this violation of the rules of hospitality and the notorious violation of the same principle in Sodom (Gen. 19) points to a folk tradition about the evil quality of Gibeah's residents (including Saul?). Perhaps use of the word in reference to the site where David discovered the Ark, in preparation for establishing Jerusalem as the religious center of his kingdom, should be taken as a place name, not simply a noun (2 Sam. 6:3). Such a combination would reflect an attempt in tradition to unify David and the circles associated with Saul. It could also suggest that the Ark functions as a symbol of unity between the traditions about Saul and those about David. ***See also*** Saul. G.W.C.

Gibeath (gib´ee-uhth), the KJV term for Hebrew spelling of Gibeah in Josh. 18:28.

Gibeon (gib´ee-uhn), a town identified with modern el-Jib, five and a half miles (9 km.) northwest of Jerusalem. The identification was made when excavations there from 1956 to 1962 by J. Pritchard uncovered over fifty jar handles of the seventh and sixth centuries B.C., many of which were inscribed with the name

The spiral staircase cut along the edge of the shaft of the pool of Gibeon becomes a tunnel at the bottom and provided access to the water table during times of siege.

Gibeon. Towns associated with the Gibeonite enclave were Chephirah, Beeroth, and Kiriath-jearim (Josh. 9:17).

During the conquest of Canaan the Gibeonites, who are described as Hivites (Josh. 9:7) or Amorites (2 Sam. 21:2), tricked the Israelites into making a treaty not to harm them. It was upheld, but the Gibeonites were reduced to becoming hewers of wood and drawers of water (Josh. 9:3–27). In an ensuing battle near Gibeon (Josh. 10:1–14), the Israelites defeated a coalition of Canaanite kings led by Adoni-zedek of Jerusalem. Although Gibeon figures prominently in these narratives of the conquest, an event often dated to the thirteenth century B.C. (the Late Bronze Age), no evidence for a settlement at el-Jib during that period has been found.

Later (eleventh century B.C.) King Saul broke the treaty with the Gibeonites when he attempted to annihilate them, an act that caused famine during David's reign. The Gibeonites gained revenge by impaling seven of Saul's sons on the mountain of Yahweh (2 Sam. 21:1–15), possibly the high place at Gibeon. At the beginning of his reign Solomon traveled to Gibeon to sacrifice at what was called the great high place (1 Kings 3:4–15). The great stone at Gibeon (2 Sam. 20:8) may be associated with this high place.

In the time of King David young warriors led by Joab and Abner fought on the edge of a pool at Gibeon (2 Sam. 2:12–17). A circular shaft identified as the pool was found cut into bedrock at a point immediately inside the city wall. It is approximately 36 feet (11 m.) in diameter and 36 feet (11 m.) deep. Cut along its edge is a stairway that spirals down to the bottom of the shaft. Thereafter the stairway continues to descend in the form of a tunnel, to a room whose floor is 1.5 feet (.5 m.) below the modern water level. The purpose of such shafts was to provide access to the water table or springs from inside the city during times of siege. It was still a landmark in the early sixth century B.C. (Jer. 41:12).

During the eighth and seventh centuries B.C. there was a winery, attested by inscribed and stamped handles of wine jars and clusters of rock-cut pits that functioned as wine cellars. Over fifty tombs were found dating from the third to the first millennia B.C., attesting to the length of time there were settlements on this site. T.L.M.

Giddel (gid´uhl). **1** The ancestor of a family of Temple servants (Ezra 2:47; Neh. 7:49). **2** The name of an ancestor of a family of Solomon's servants (Ezra 2:56; Neh. 7:58).

Gideon (gid´ee-uhn; from the Heb. root meaning "to cut off"; also called Jerubaal, Judg. 6:32), the son of Joash the Abiezrite of the town of Ophrah in the tribal area of Manasseh. Gideon is counted among the major judges although the narrative describing his exploits (Judg. 6:11–8:32) does not refer to him as such.

There is scholarly disagreement concerning the sources of the Gideon story and their dates of composition. Nonetheless, the placement of Gideon after Deborah appears logical, since Deborah's victory over the Canaanites may have opened the door to incursions by desert nomads. These incursions were common in times of political and military weakness. The story of Gideon is prefaced by the camel-mounted invasions of the Midianites, Amalekites, and "children of the East" who looted the Israelite crops and animals (6:1–6).

It is at this time of dire circumstances and impoverishment (6:2, 6, 11) that Gideon receives his call to action by an angel (6:11–23). His hesitancy (6:15–21) is reminiscent of the call to Moses (Exod. 3–4), while his confrontation of the divine "face-to-face" (6:22) recalls Jacob's wrestling with the angel (Gen. 32:30; thereby, the author indicates to the reader that Gideon will be one of the great heroes of Israel). The building of the altar (6:24) indicates Gideon's preparedness. His first act is a religious revolt—an attack on the local Baal-Asherah cult (6:25–32), which is deemed to be at the root of Israel's suffering (6:1, 7–10).

Battle Against the Midianites: After the initial success, Gideon began preparation for his battle against the Midianites, which occupies the main body of the story (6:34–8:21). He gathered together men from the tribes of Manasseh, Asher, Zebulun, and Naphtali (6:36–40). In order to emphasize God's might (and not the people's), Gideon's army was pared down from thirty-three thousand (7:3) to ultimately only three hundred—the most courageous and able warriors (7:2–8). That night Gideon and a servant gathered intelligence information (by way of a dream interpretation, 7:8–15) at the Midianite camp at En-dor between the hill of Moreh and Mt. Tabor (7:1; Ps. 83:11). That same night, using psychological warfare, surprise, and darkness, Gideon and his band attacked the Midianites with maximum effect, causing them to flee toward the Jordan Valley (7:16–22). Soldiers from the tribes of Naphtali, Ephraim, Asher, and Manasseh (the thousands sent back to lie in ambush?) cut the Midianites down at the Jordan fords and two Midianite princes, Oreb and Zeeb, were killed (7:23–25; Ps. 83:12–13). After calming down the Ephraimites who complained of not being included in the initial preparations (8:1–3), Gideon and his three hundred pursued the kings of Midian, Zebah, and Zalmunna beyond the Jordan. On the way, Gideon requested food for his men from Succoth and Penuel but was rebuffed (8:4–9). At Karkor, once again using stealth and surprise, Gideon fell upon the remnants of the Midianites (8:10, fifteen thousand out of a hundred and twenty thousand!) and captured the two kings (8:10–13). After exacting punishment

upon Succoth and Penuel (8:14–17), Gideon, acting as the blood-avenger for his brothers' deaths, killed Zebah and Zalmunna (8:15–21). The fame of this victory over the Midianites is attested by its reference in other biblical sources (Isa. 9:3; 10:26; Ps. 83:10–12; cf. 1 Sam. 12:11; Heb. 11:12).

Gideon's humility (cf. 6:15) and religiosity are evinced by his refusal to accept hereditary rulership over Israel with the immortal words, "I will not rule over you, and my son will not rule over you; the Lord will rule over you" (8:23). This incident illustrates the need for a stable leadership that eventually culminated in the monarchy as well as the view of the religious elite during the period of the judges that Israel could have only one king who was the permanent ruler—God; any attempt to create a human kingship was perceived as a revolt and rejection of God (1 Sam. 8:7). Despite Gideon's rejection, after his death his son Abimelech tried to take the kingship for himself (Judg. 9).

One element of Gideon's religiosity is criticized: his fashioning of an ephod out of the spoil of the golden earrings (cf. Exod. 32:2–3), which became the people's fetish (8:24–27). The editor's conclusion mentions Gideon's seventy sons and his burial in the crypt of his father (8:29–32). ***See also*** Abimelech; Chronology, Old Testament; Jotham; Judges, The Book of; Midianites. J.U.

Gideoni (gid´ee-oh´n*i*), the Benjaminite father of Abidan. His son was appointed to assist Moses in the wilderness with the census as head of the Benjaminite clan (Num. 1:11). The son also led the marching Benjaminite group (Num. 2:22), presented the Benjaminite offering on the ninth day of the dedication of the altar (Num 7:60, 65), and supervised the Benjaminite encampment (Num. 10:24).

gier (jihr) **eagle** (KJV; RSV: "vulture," Lev. 11:18, or "carrion vulture," Deut. 14:17), a bird considered unclean by the Hebrews.

gifts of the Spirit. ***See*** Spiritual Gifts.

Gihon (g*i*´hon; Heb., "a bursting forth"). **1** The second of the four rivers flowing "out of Eden to water the garden. . . . it is the one which flows around the whole land of Cush" (Gen. 2:10, 13). Once Gihon was equated with the Nile on the assumption that Cush meant Abyssinia, but it almost certainly indicates a now unidentifiable irrigation channel in southern Iraq, "Cush" being the land of the Kassites.

2 A pulsating spring in Jerusalem, south of the temple area on the west side of the Kidron Valley, called in Arabic by the Muslims Ain Umm el-Daraj, "spring of the steps," and by Christians Ain Sitti Maryam, "the Virgin's Fountain." Because of the steepness of the slope the spring was outside the town walls at the summit, and although water was normally obtained by carrying jars down to it, perhaps using donkeys, in times of siege the jars could apparently be lowered down a vertical shaft ("Warren's Shaft"). Another, less deep, shaft exists, which was perhaps used at an earlier date when the water table may have been higher. Probably Warren's Shaft was the one by which David was able to capture Jerusalem (2 Sam. 5:8).

Gihon is Jerusalem's only immediate source of water and could support a population of about twenty-five hundred. As were a great many other springs in a land where water is often scarce, the Gihon fountain was evidently a sacred place, and for this reason Solomon (and probably also later rulers) was anointed king there (1 Kings 1:32–40). That anointing was accomplished to thwart Adonijah, who had offered a sacrifice at En-rogel, a spring somewhat further down the valley (1 Kings 1:9–10). Later in the monarchy the supply of water from Gihon seems to have been supplemented by water brought from a greater distance along a conduit, perhaps to the "upper pool," where Isaiah met and rebuked King Ahaz (Isa. 7:3).

Hezekiah, who succeeded Ahaz, was confronted by the danger of Assyrian invasion and therefore sought not only to prevent the invaders from obtaining water in the vicinity of Jerusalem (2 Chron. 32:4) but to ensure the security of the city's own supply. This he did by means of his celebrated tunnel, 1,750 feet (533 m.) long, leading from Gihon to the Pool of Solomon, then possibly an underground cistern. The tunnel was carved from both ends simultaneously and follows a curiously winding course, perhaps to permit cutting a vertical shaft from inside the city to reach the water in a crisis. ***See also*** Adonijah; Ahaz; En-rogel; Hezekiah; Kidron; Siloam Inscription; Solomon. D.B.

Gilboa (gil-boh´uh), modern Jebel Fuqu'ah, a hill opposite the Hill of Moreh. Together Gilboa and Moreh guard the eastern pass from the Plain of Esdraelon into the Valley of Jezreel, the main access from the coastal plain to the Jordan Valley. Gilboa rises to a height of 1,696 feet above sea level, but plunges abruptly 2,000 feet below on the east to the Jordan. Its more gradual western slopes are probably where Saul fought his last battle with the Philistines: his three sons were killed and Saul took his own life after he was seriously wounded (1 Sam. 31). In his lament over Jonathan David levels a curse upon the scene of his death (2 Sam. 1:22). ***See also*** Esdraelon; Jezreel; Moreh. N.L.L.

Gilead (gil´ee-uhd), a region in Transjordan (modern Jordan) from the Arnon to the Yarmuk rivers, between Bashan and Moab. Its name, which in Hebrew means "rugged," describes it

well: it is mountainous, and in antiquity was densely forested (see Jer. 22:6). The major trade route in Transjordan, the King's Highway, which went from the Gulf of Aqaba to Damascus, passed through Gilead, and the inhabitants of the region thus controlled this important thoroughfare. Southern Gilead (from the Arnon to the Jabbok) was under the control of Sihon, the king of the Amorites in the Mosaic period (thirteenth century B.C.). It was assigned to the Israelite tribes of Reuben and Gad in the division of the land, and later corresponded approximately to the kingdoms of the Ammonites, with their capital at Rabbath-ammon (modern Amman), and Moab. This area was especially well suited for herding (Num. 32:1; Song of Sol. 6:5). Northern Gilead (from the Jabbok to the Yarmuk) was assigned to Manasseh, and remained under Israelite control until the Assyrian conquest (721 B.C.), although both the Ammonites to the south and the Aramaeans to the north occupied it at times (see Judg. 10:8; 1 Kings 22:3; Amos 1:3). In the Persian period (ca. 538–333 B.C.) Gilead was a separate province, and in the Roman period Gilead was subdivided into the districts of Perea and the area controlled by the Decapolis. Major cities in Gilead include Heshbon and Rabbath-ammon (later Philadelphia) in the south, and Pella, Gerasa, Gadara, Abila, Jabesh-gilead, and Ramoth-gilead in the north. The exact composition of the proverbial "balm of Gilead" (Jer. 8:22; cf. Gen. 37:25) has not been definitely established. ***See also*** Cities; Perea. M.D.C.

Gilgal (gil'gal; Heb., "circle," probably of stones), the name of several towns in the OT, at least three of which have been identified with some certainty. **1** Gilgal between Jericho and the Jordan, the Israelites' first encampment after crossing the Jordan (Josh. 3–4), which became Joshua's base of operations. This Gilgal is probably modern Khirbet el-Mafjir, about one and a quarter miles from ancient Jericho, or possibly Khirbet en-Nitleh, about two miles southeast of Jericho. In the tribal period and the early monarchy (thirteenth–eleventh centuries B.C.) it became an important political, religious, and military center, especially for the tribe of Benjamin. It was one of the places visited by Samuel on his yearly circuit (1 Sam. 7:16). A number of the early traditions about Saul are set here. It was a rallying point in Saul's campaigns against the Philistines (1 Sam. 13:4–7). It is here that he was affirmed by the people as king (1 Sam. 11:14–15) and it was here also that the kingship was taken from him (1 Sam. 13:8–15) for presuming on Samuel's priestly prerogatives. This Gilgal is denounced by the eighth-century prophets as the site of a national sanctuary under royal patronage with a corrupt sacrificial cult (Hos. 4:15; 9:15; 12:11; Amos 4:4; 5:5; Mic. 6:5). **2** Gilgal of Elijah and Elisha (2 Kings 2:1–4; 4:38), probably the present village of Khirbet 'Alyata about seven miles north of Bethel. **3** Gilgal near Dor mentioned in a list of conquered Canaanite kings in Josh. 12:23 (RSV: "Galilii"). Probably the modern village of Jiljulieh, about five miles north of Antipatris (*Ras el-'Ain*). F.S.F.

girdle. ***See*** Apron; Dress.

Girgashites (guhr'guh-shīts), one of the peoples whom God displaced for the Israelites at the time of Joshua (Gen. 15:21; Josh. 3:10). According to the genealogy in Gen. 10:16 these nations are the offspring of Canaan. The personal name Girgishi is also known from Ugarit. Some texts of the NT include a reference to the Gergesenes at Mark 5:1 and its parallels.

Gittite (git'īt), someone who lives in or is from Gath. Gath was one of the five major cities of the Philistines located in the coastal plain of southwestern Judah. The giant Goliath and his brother Lahmi were Gittites (2 Sam. 21:19; 1 Chron. 20:5), as were Obed-edom, whose house was the temporary resting place of the Ark of the Covenant (2 Sam. 6:10–11; 1 Chron. 13:13), and Ittai, the refugee who joined David and became one of his military commanders (2 Sam. 15:19–22; 18:2). ***See also*** Gath; Philistines.

Gittith (git'ith), a Hebrew word appearing in the phrase *al ha-gittith.* Of uncertain significance, it appears at the beginning of Psalms 8, 81, and 84. It is often left untranslated ("according to the Gittith"), though some translators have sought to explain the term via the Hebrew *gath* "(wine-)press" or the Philistine city of Gath. Like the similar (and equally mysterious) phrase *al ha-sheminith* ("on the eighth"), this phrase has been taken to refer to a musical mode, such as exist in traditional Arabic music, or to a particular musical instrument, or even to a particular well-known song that served as a contrafact for the psalms in question. ***See also*** Psalms, The. J.L.K.

gleaning. ***See*** Farming.

glede (gleed; KJV; RSV: "buzzard," Deut. 14:13), a word derived from an Old English root meaning "to glide," it applies especially to the red kite, *Milvus milvus.*

glory, an important theological term in both the OT and the NT. The most important Hebrew word for glory, *kabod,* means "weight" or "importance." Thus, to have glory is to be weighty or important to oneself or others. In the OT, glory is applied to humans, showing their significance in the world (Job 19:9; Prov. 16:31; 20:29; Isa. 8:7). Frequently, it is also applied to God. God's

glory is particularly God's visible manifestation to humans (Num. 16:19, 42; Ps. 102:16; Ezek. 10:4). At the giving of the law at Mount Sinai, God's glory appears as or in a cloud and as fire (Exod. 16:10; 24:16–17). It is associated with the tabernacle and the Temple (Exod. 40:34; Num. 20:6; Pss. 24:7–10; 78:60–61). God's glory frequently appears in Ezekiel's visions (Ezek. 10:4; 28:22; 43:2–5). Finally, glory may refer to God's future eschatological appearance (Isa. 4:5; 60:1–2). The appropriate human response to God is to ascribe glory to him (Pss. 22:23; 29:2; 86:9; Isa. 66:5).

The NT continues OT meanings of glory. Occasionally, it is applied to humans (Luke 12:27; John 7:18). More often, it is applied to God: God's glory is seen (Luke 2:9; John 11:40; Acts 7:55; Rev. 15:8). People are to give glory to God (Acts 12:23; 1 Cor. 10:31). The NT also extends OT usages referring to God to include Christ: glory is applied to the risen Christ (1 Cor. 2:8; Heb. 2:7, 9; 1 Pet. 1:11; Rev. 5:12–13) and to Christ's Second Coming as Son of man (Matt. 25:31; Mark 8:38; cf. Titus 2:13). The latter often draws on the OT image of clouds (Matt. 24:30; Luke 21:27).

The Gospel of John develops furthest the notion of glory as applied to Christ's human existence. God's glory appears in Jesus (John 13:31; 17:5). Christ is the Word incarnate: "we have beheld his glory, glory as of the only Son from the Father" (John 1:14). Glory is revealed through Christ's miracles (John 2:11; 11:4). It is also closely associated with his death as his hour of glorification (John 12:23; 17:1). Finally, both the Gospel of John and Paul extend the OT eschatological hope of seeing God's glory to the hope of participating in it (John 17:22; Rom. 5:2). ***See also*** Shekinah. J.D.

glosses and interpolations, additions to a text made by someone other than the author. Although a distinction must be made in principle between a "gloss" and an "interpolation," the distinction sometimes becomes blurred. A gloss is a brief explanatory note or comment, usually written in the margin or between the lines of a manuscript by a scribe or copyist; an interpolation is foreign material, usually more extensive than a gloss, that is actually incorporated into the text of a document. At times, however, glosses were copied into the texts by later scribes, in which cases the glosses became interpolations. There is no definitive method for identifying a gloss or an interpolation; indeed, the arguments often become circular. Text-critical evidence is best, but sometimes the apparent intrusiveness of the material may indicate a gloss or interpolation. An example of a gloss is the expansion of "Father" to "Our Father who art in heaven" in a number of manuscripts of Luke 11:2 (Luke's version of the Lord's Prayer). A number of possible interpolations have been identified, particularly in the Pauline Letters (e.g., Rom. 13:1–7; 1 Cor. 11:3–16; 1 Cor. 14:34–35; 2 Cor. 6:14–7:1). ***See also*** Texts, Versions, Manuscripts, Editions. W.W.

glossolalia (glos´uh-lay´lee-uh). ***See*** Tongues, Speaking with.

gnat, a nonspecific term referring to gnats, lice, mosquitos, or sand flies. It probably includes all such blood-sucking, two-winged insects. In Exod. 8:16–18 gnats are the third plague upon the Egyptians. In Matt. 23:24 scribes and Pharisees are charged with straining out the gnat and swallowing the camel, that is, paying close scrutiny to details of ritual impurity while neglecting the ethical demands of justice, mercy, and faith.

Gnosticism (nos´tuh-siz-uhm), a generic term for a variety of religious movements of the first centuries of the Christian era. Although the theology, ritual practice, and ethics of these groups differed considerably, all purported to offer salvation from the oppressive bonds of material existence through *gnōsis,* or "knowledge." Such knowledge was diverse, although it regularly dealt with the intimate relationship of the self to the transcendent source of all being, and this knowledge was often conveyed by a revealer figure.

What is known about Gnosticism traditionally depended upon reports in the church fathers such as Irenaeus, Hippolytus, Tertullian, Origen, and Epiphanius, who were opponents of Christian Gnostic teachers. Since the eighteenth century, several original Gnostic works have been discovered, including Codex Askew, Codex Bruce, the Berlin Gnostic Codes and, most recently, the Nag Hammadi collection.

The relationship between Gnosticism and early Christianity has been a controversial issue. Against the patristic view that Gnosticism was a Christian heresy begun by Simon Magus, many modern scholars have held that it was originally an independent movement. Earlier expressions of this opinion, which posited at the core of Gnosticism a redeemed-redeemer myth of possible Iranian origin, have proven questionable. Primarily on the basis of the Nag Hammadi evidence, many today hold that Gnosticism first emerged in the late Hellenistic or early Imperial period among speculative and syncretistic Jews.

By the second century, Gnosticism achieved its classical form among both Christian and non-Christian exponents. One example is found in the teachings of the Valentinians, Christian Gnostics who held that the world emerged from a primordial pair, or "syzygy," Depth and Silence, from which emanated a complex spiritual world or "Pleroma." One element or "aeon" in that world, Sophia, fell and produced from her passion and repentance the psychic and material realms of existence. In a movement that typifies the whole soteriological process,

Christ came to restore her to her original condition. Humanity is composed of the results of this process, having spiritual, psychic, and material components. The *gnōsis* provided by Jesus, a being separate from Christ, awakens the awareness of the spiritual component of humanity about its essential identity with the Godhead and leads to ultimate restoration.

Despite its suppression by ecclesiastical authorities in the third and fourth centuries, Gnosticism continued in the guise of Manichaeism and Mandaeism and in various medieval speculative movements. ***See also*** Gospel of Thomas, The; Nag Hammadi; Simon Magus. H.W.A.

goad, an implement used to control oxen. Acquaintance with ox goads in daily life (1 Sam. 13:21) gave rise to figurative speech, where the teachings of the wise were said to stimulate thought in others (Eccles. 12:11), although these words of wisdom prodded thoughtful persons. Refusing to acknowledge the obvious or to act on one's insight constituted kicking against the goads (KJV: "pricks"; Acts 26:14). At least one judge, Shamgar, is reputed to have used an ox goad as a weapon (Judg. 3:31).

goat, a ruminant mammal related to the sheep. The goat (*Capra hircus*) is one of the most versatile of domestic livestock animals. It has always been of special importance in the Near East, to whose arid climate it is excellently adapted. Goat bones attributed to domesticated animals are the most frequently found faunal remains on the Early Neolithic sites of the southern Levant, as at Jericho, Beidha, and Ain Ghazal. They testify that humans started herding goats in this area about 9,000 years ago. At the beginning goats were kept mainly for their meat, but it is thought that by the Chalcolithic period (ca. 4000 B.C.) they were also used for milk, with hair and skin being useful by-products.

Goats are very hardy beasts that can live off shrubs and the scanty vegetation of the desert, thereby utilizing areas that are useless for agriculture. Even today they form the basis for the nomadic existence of many bedouins, who live in tents woven from black goat hair, eat goat milk, butter, yoghurt, and cheese, sell goat meat, and use goat skins as containers. It seems that the bedouin life style has hardly changed since biblical times, since numerous references are made in the Bible to the same usages of the goat. Lev. 7:23 and Deut. 14:4 mention its meat, while Deut. 32:14 and Prov. 27:27 report that it provided milk. Gen. 21:14 and Josh 9:4 refer to goatskin bottles. 1 Sam. 19:13 implies that goat hair was processed into fabric. The roof of the tabernacle was made of goat hair (Exod. 26:7; 36:14–15).

The goat was also of importance as a sacrificial animal. Male animals were preferred (Lev. 1:10; 22:19), but sometimes female goats were demanded (Lev. 4:28; 5:6). The efficacy of such sacrifices was rejected by the early Christian community, however (Heb. 9:12–13, 19; 10:4). That they were nevertheless common in Palestine at that time is attested by Jesus' reference to them in one of his parables (Matt. 25:32–33). I.U.K.

God (god), a general term for the deity (or, in the plural, deities). In the Bible, the word is used to refer both to the deity worshiped in the Judeo-Christian tradition (God) and to deities worshiped by other peoples (god or gods).

In the OT: In the OT, the word "God" most often translates the Hebrew *El* (or the plural form, *Elohim*), the general Semitic term for deity which is probably derived from a root denoting power or strength. Although Israel's faith apparently emerged from a polytheistic environment as a strong henotheism (i.e., worship of only one among a plurality of deities) and evolved into a highly developed ethical monotheism, the frequently used plural form should not be understood as a residue from an earlier period. The form is the plural of majesty (magnitude) and a sign of honor paid to the Deity.

The authors of the Bible do not concern themselves with abstract questions of definition (i.e., about the existence or nature of God) but rather portray God through a series of images or incidents in which God becomes the subject of the narrative rather than an object of thought. In the OT God is presented as the Creator and Sustainer of the world, who enters into covenantal relationship with a chosen people, Israel, and who guides the history of that people toward a redemptive goal. Although masculine images for God dominate (e.g., king, judge, father, brother, shepherd, etc.), it must be recognized that feminine images are also frequently used to describe God's activity. Among these are images related to feminine anatomy (e.g., womb and breasts) and feminine function (e.g., conception, pregnancy, childbirth, maternal nurture, etc.).

It may be suggested, therefore, that any comprehensive understanding of the way in which God is portrayed in the OT must be grounded in an equally comprehensive understanding of Israel's history, since history is seen as the primary locus of God's self-revelation. In that history, the events surrounding the revelation of the divine name, the Exodus, and the establishment of the covenant at Sinai occupy a special place. In these incidents, many characteristics of God, more fully developed in other narratives, are illustrated. For example, the transcendent Deity, who controls both nature and history, draws near to Israel in a highly personal, even intimate, way. In the covenant, the past beneficence of God and a concern for all people are connected with an emphasis on the holiness, justice, righteousness, and wrath of a Deity who alone is to be worshiped. It is, indeed, the story of this Deity, first known

only partially, then by name (Yahweh) as the God of Israel (henotheism), and ultimately as the one true God (radical monotheism), that unfolds in the pages of the OT.

In the NT: In the NT, the word "God" translates the Greek *theos,* also a general term for deity and used in the Septuagint to translate *El* and *Elohim.* Since much has been written drawing sharp contrasts between "the God of the OT" and "the God of the NT," it may be well to comment that in most respects there is a remarkable consistency in the portrayal of God throughout the Bible. Certainly, there is no solid ground for contrasting a God of wrath (OT) with a God of mercy (NT), for mercy and judgment are among the characteristics of God in both Testaments. The major difference is that the NT reflects the conceptual world of the late Hellenistic and early Roman periods (i.e., 100 B.C. to A.D. 100), a later stage in intellectual history than that of the OT. Further, belief in the incarnation substantially changes the understanding of God presented in the NT. For Christian thought, the primary locus of God's self-revelation is not in the events of the history of a people but rather in the person of Jesus Christ (e.g., Matt. 1:23; John 14:9; 20:28–29). For this reason, the dominant image used to refer to God is the language of familial intimacy: *Abba,* Father.

Although reference to God as Father is not unique to Christianity (it is found in the OT, in late Judaism, and in other religions), it may be suggested that the doctrine of the incarnation brought new meaning to this familiar terminology. It seems likely that Christian use of this image originated in the teaching and practice of Jesus and was enriched as the first stages of trinitarian thought developed during the first century A.D. In the NT, although there are passages stressing the unity of Father and Son, a clear distinction is also drawn between the two. As in the OT, there is a balance between immanence and transcendence. While drawing near in the incarnation, God remains the Deity who alone is worshiped as Creator and Ruler of the world. ***See also*** Abba; El; El Shaddai; Holy Spirit, The; Incarnation; Jesus Christ; Names of God in the New Testament; Names of God in the Old Testament; Revelation; Son of God; Trinity, The.

God, names of in the Old Testament. *See* Names of God in the Old Testament.

godlessness, a mode of thinking or being that excludes God from life and ignores or perhaps even deliberately violates God's laws and commandments. There are, of course, numerous characteristics that can demonstrate the godlessness of a person, including worthlessness, ruthlessness, wickedness, pride, impiety, and the like.

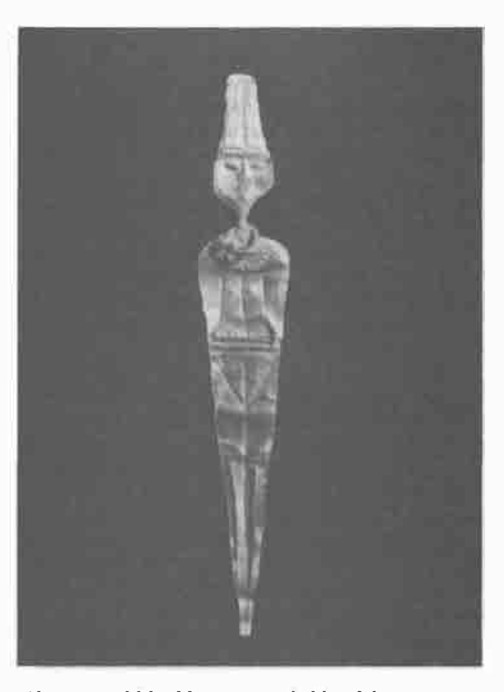
In the KJV, the various Hebrew and Greek designations for "godless" or "ungodly" are frequently translated as "hypocrite." Hypocrisy was, indeed, one of the manifestations of godlessness, but the state should not be understood as identical only with hypocrisy. Basically, the godless or ungodly person is one who lives, acts, and thinks as though God could be ignored or spurned. For some illustrations of the varieties of godlessness, see Deut. 8:11–20; Job 8:13; Ps. 119:51; Rom. 1:18–32; 4:5; 5:6; 1 Tim. 1:9; 4:7; 6:20; 2 Tim. 2:16; 2 Pet. 2:5–6; and Jude 4, 15. ***See also*** Evil; Fool, Foolishness, Folly; Hypocrisy; Sin.

J.M.E.

godliness, godly, the English translation of a Greek root (also translated as "religion, religious," "piety, pious," "devotion, devout," or "worship, worshipper") common in the NT world to describe respect for Greek and Roman gods and for the orders of society. This may be why the term seldom appears either in the Septuagint (LXX) or in the NT. Biblical writers prefer such words as "righteousness," "faith," "steadfastness," "holiness," etc., to describe the faith and life pleasing to God. In the OT, true godliness or piety usually finds expression as covenant loyalty, steadfastness, faithfulness, kindness, goodness, or holiness: "Help, LORD, for there is no longer any that is godly; for the faithful have vanished . . . " (Ps. 12:1); "But know that the LORD has set apart the godly for himself" (Ps. 4:3); God desires "godly offspring" (Mal. 2:15). Faithfulness to God is expressed in faithfulness to covenant partners.

In Acts 3:12, Peter denies that "our own power and godliness" (RSV: "piety") healed a lame man. Only in the later Letters of the NT (the Pastorals and 2 Peter) does the term occur as a description of Christian life, and then it is linked with such characteristic biblical words as "righteousness," "faith," "love," "steadfastness," and "gentleness" (1 Tim. 6:11). Similarly, 2 Pet. 1:5–7 links godliness with "faith," "virtue," "knowledge," "self-control," "steadfastness," "brotherly affection," and "love." The adjectival form of the root, sometimes rendered as "devout" (e.g., Acts 10:2, 7), is, at times, linked more specifically with Christian behavior: "the grace of God has appeared . . . training us . . . to live sober, upright, and godly lives in this world, awaiting our blessed hope" (Titus 2:11–13). Godliness is more than correct behavior; it is possible to have "a form of godliness" (RSV: "form of religion") while denying its power (2 Tim. 3:5). That power is found in Christ; thus, 1 Tim. 3:16 calls an early confession of faith "the mystery of godliness" (RSV: "the mystery of our religion"). Only through Christ is true godliness possible, for God's power "has granted to us all things that pertain

to life and godliness" (2 Pet. 1:3). ***See also*** Religion, Religious; Worship. J.F.J.



Gog (gog), historically probably Gyges, a seventh-century B.C. king of Lydia. Whatever his origin, he has been transformed in Ezekiel 38–39 into an apocalyptic figure who marches from the north (Ezek. 38:6, 15; 39:2) and ravages Israel before being destroyed by God (Ezek. 38:19–22; 39:3–5). The sources for the description of Gog's attack and defeat include Jeremiah's "enemy from the north" (Jer. 1:14; 4:6; 6:1, 22; 10:22; 13:20) and the Isaianic motif of the destruction of Israel's foes on the mountains of Israel (Isa. 14:24–25; 17:12–14; 31:8–9). Gog reappears in the NT (Rev. 20:18–20), paired with Magog; in Ezek. 38:2 Magog is probably equivalent to a phrase in the Akkadian language, *mat Gog* ("land of Gog"). ***See also*** Ezekiel, The Book of. J.S.K.

Golan (goh'luhn; Heb., "circuit"?), part of the plateau of Bashan between Mt. Hermon and the Wadi el-Yarmuk east of the Jordan River. It was called Gaulanitis by the historian Josephus. Golan is also the name of a city of refuge in Manasseh assigned to the levitical family of Gershon (Deut. 4:43; Josh. 20:8; 21:27; 1 Chron. 6:71) in this region. ***See also*** Bashan.

gold, the precious metal most often named in the Bible (385 times). It was imported from the yet to be located sites named Uphaz (Jer. 10:9), Raamah (Ezek. 27:22), Sheba (1 Kings 10:2), Havilah (Gen. 2:11), and Ophir (1 Chron. 29:4; 2 Chron. 8:18). Occasionally gold was acquired as booty (Exod. 12:35; Judg. 8:26) but more often through commercial enterprises (1 Kings 10:14–24).

Ancient sites outside Palestine proper knew of gold and early learned to work it beautifully, as the excavations at Ur in ancient Sumer demonstrate (ca. 2500 B.C.). There the archaeologist Woolley found fluted vases, bowls of pure gold, intricately fashioned ornaments, and 9 yards of gold ribbon in a headdress. At Ebla (modern Tell Mardikh; ca. 3200 B.C.) in Syria excavators found objects of gold such as a ceremonial hammer and wooden frames overlaid with gold. Also at Ebla commercial texts report a caste or guild of smiths including goldsmiths. Precious metals measured in bars with specific weights given in minas (a mina equaled 47 grams) were held in an Eblaite storehouse. One text showed the tribute paid by the kingdom of Mari to include 134.26 minas of gold. More well-known and much later is the golden treasure of Egypt's Tutankhamen (mid-fourteenth century B.C.).

The Bible employs thirteen different words for gold in a variety of forms and usages. Jewelry made of gold includes necklaces (Song of Sol. 1:11), rings (James 2:2), and other unspecified items (Exod. 3:22).

Above: A gold-leaf figurine, probably of the Canaanite goddess Astarte, found at the excavations at Gezer dates to the sixteenth century B.C. *Below:* Gold cup from the royal tomb at Ur, third millennium B.C.

In public worship gold played a part in both idolatry such as the calf fashioned by Aaron (Exod. 32:2–4; cf. Deut. 29:17; 1 Kings 12:28; Isa. 2:20; Rev. 9:20), and in the worship of God in both the tabernacle and later in the Solomonic Temple in Jerusalem. The Ark was covered with gold (Exod. 25:11). Most of the furniture was gold-plated, while the vessels and other articles of pure gold included the high priest's clothing, crown, ephod, and breastplate (Exod. 39:2–30). In Solomon's Temple the entire inner sanctuary was overlaid with gold, as were the cherubim, carved palm trees, and flowers (1 Kings 6:14–31).

While valued as a standard of importance (Isa. 60:17; Hos. 2:8; 1 Pet. 1:18), gold is less worthy than wisdom (Job 28:15, 17; Prov. 3:14; 8:10; 16:16), faith (1 Pet. 1:7), and knowledge (Pss. 19:10; 119:72; Prov. 20:15). One should not put one's trust in gold (Job 31:24) for it can become a stumbling block (Ezek. 7:19) and finally is of no value at all (Isa. 46:6; Ps. 135:15; 1 Tim. 6:9). Nevertheless, the Bible recognizes its value as a gift since one of the Wise Men laid gold before the infant Jesus (Matt. 2:11); elders will wear golden crowns (Rev. 4:4); metaphorically gold is spiritual wealth (Rev. 3:18); and the new Jerusalem will be constructed of pure gold (Rev. 21:18). R.A.C.

Golden Rule, a modern term (first attested in English in the seventeenth century as "golden law") for a saying of Jesus regarded as of inestimable ("golden") and universal importance: "Whatever you wish that persons would do to you, do so to them" (Matt. 7:12; Luke 6:31). Similar statements, in negative form, are found in Judaism and Confucianism.

Golgotha (gol´guh-thuh). ***See*** Calvary.

Goliath (guh-l*i*´uhth), a Philistine champion from Gath. He was defeated by David in single combat in the Valley of Elah according to 1 Sam. 17, where the might of the seasoned Philistine warrior is contrasted with the vulnerability of the callow Israelite shepherd, who fells his heavily armed opponent with a sling stone. According to 2 Sam. 21:19, however, Goliath was defeated by Elhanan, one of David's warriors. Perhaps the name of the Philistine slain by David was not given in an older tradition, and the name of Elhanan's victim was substituted for the anonymous adversary of the better-known David. According to an old textual tradition of 1 Sam. 17:4 (preserved at Qumran, in Josephus, and some LXX versions), Goliath was a giant "four cubits and a span" (6 feet, 9 inches) in height. An exaggerated figure is found in the received Hebrew text (MT) where Goliath's height is recorded as "*six* cubits and a span" (9 feet, 9 inches)! ***See also*** David.

P.K.M.

Gomer (goh´muhr). **1** A son of Japheth (Gen. 10:2) and the ancestor of a people from southern Russia called Gimirrai by the Assyrians and Cimmerians. **2** The harlot wife of Hosea (Hos. 1:3), who bore him three children.

Gomorrah (guh-mor´uh). ***See*** Sodom.

Good Friday, the Friday immediately before Easter on which Christians memorialize the day Jesus was crucified (see Mark 15:42).

Good Samaritan, the man who, by aiding a Jew who had been wounded by thieves, proved neighbor in Jesus' famous parable (Luke 10:29–37). A "good Samaritan" would have been a contradiction in terms for most Jews of Jesus' day, because of the centuries-long mutual hatred between Jews and Samaritans. ***See also*** Samaritans.

gopher wood, the material Noah was instructed to use in building the ark (Gen. 6:14). Its identification is uncertain.

Goshen (goh´shuhn). **1** The fertile region in the eastern Nile delta of Egypt (modern Wadi Tumilat) where the family of Jacob was allowed to settle (Gen. 47:28–29, 34). Also known as "the land of Rameses" (Gen. 47:11), this territory was well suited for grazing, as evidenced both in the Egyptian sources and in the Bible (Gen. 47:3–6). Goshen (evidently not called by that

The four Evangelists as represented by their symbols in one of two Evangelist pages from the eighth-century *Book of Kells*.

name except in the Bible) was apparently somewhat of a hinterland to the Egyptians, perhaps because of its distance from the network of Nile irrigation canals (cf. Gen. 46:34). The Hebrews were still dwelling in the region at the time of the plagues (Exod. 8:22; 9:26). From this territory Moses led the Israelites out of Egypt (Exod. 4–13). **2** A geographical region between the southern hill country of Judah and the Negev, mentioned only in Josh. 10:41 and 11:16. Its precise delineations are unknown. Possibly it should be related to 3. **3** A city in the southern hill country of Judah, in the same district as Debir (modern Khirbet Rabud), Anab, Socoh, and Eshtamoh (Josh. 15:41). Its identification is unknown. Proposals include such modern locations as Tell Beit Mirsim, Dhahariya, and, more recently, Tell el-Kheleifeh, all sites near the southeast edge of the Judean hill country. ***See also*** Egypt; Exodus; Patriarch. D.A.D.

gospel, Gospels, the English translation of the Greek *euangelion,* which means "good news." In the NT, it refers to the good news preached by Jesus that the kingdom of God is at hand (Mark 1:14–15) and the good news of what God has done on behalf of humanity in Christ (Rom. 1:1–4). The background for the noun is found in the Greek version of the OT, the Septuagint (LXX), where the verbal form, "to bring good news" or "to announce good news," appears rather than the noun. Thus, in Isa. 40:9; 41:27; 52:7; and 61:1 the messenger announces the good news of Israel's redemption from Exile. In Luke 4:18–19, Jesus quotes Isa. 61:1–2 to announce his glad tidings, and in Matt. 11:5 and Luke 7:22, Jesus tells the messengers of John the Baptist that the poor have the good news preached to them, thereby affirming his messiahship. In addition to this background, the NT reflects Hellenistic usage. The Roman proconsul Paulus Fabius Maximus, for example, honored Caesar Augustus by reckoning Caesar's birthday as the beginning of the new year. In doing so, he called the day of Caesar's birth "good news" (*euangelion*) for the whole world.

Although "gospel" is commonly associated with the four documents Matthew, Mark, Luke, and John, Paul uses the noun more than any other writer of the NT. On several occasions, he simply refers to "the gospel" (Rom. 10:16; 11:28; 1 Cor. 4:15; 9:14, 18), suggesting that his audience readily understood its content. At other times, he speaks of "the gospel of God" (Rom. 1:1; 15:16; 2 Cor. 11:7), "the gospel of Christ" (Rom. 15:19; 1 Cor. 9:12; 2 Cor. 2:12; 9:13; 10:14; Phil. 1:27; 1 Thess. 3:2), or "the gospel of his Son" (Rom. 1:9). "The gospel of God" refers to the origin of the gospel (God), while "the gospel of Christ" and "the gospel of his Son" point to its object (Christ). In Rom. 1:1–6 and 1 Cor. 15:1–8, Paul describes the gospel further: it comes from God; it was promised through the prophets; its content is Jesus, a descendant of David according to the flesh, designated Son of God in power by the resurrection. This Risen Lord appeared to chosen witnesses.

Paul speaks of "my gospel" (Rom. 2:16; 16:25) and "our gospel" (2 Cor. 4:3) and affirms that there is no other gospel (Gal. 1:7). The one gospel was disclosed to Paul when God revealed his Son to him (Gal. 1:16). Paul's gospel is not a human affair; it has its origin in God (Gal. 1:11–12). Consequently, the apostle strives to prevent his audience from turning to false versions of the gospel (2 Cor. 11:4; Gal. 1:6). The true gospel demands obedience (Rom. 10:16), and Paul does everything for its sake (1 Cor. 9:23), even surrendering his legitimate rights so that the gospel can be preached free of charge (1 Cor. 9:18).

Among the Evangelists, only Mark and Matthew employ the noun "gospel." Mark begins his narrative, "The beginning of the gospel of Jesus Christ, the Son of God." Here, gospel does not refer to a literary genre but the message that is proclaimed in the narrative that follows. The gospel is the proclamation of the kingdom, announced by Jesus (Mark 1:14–15) and now proclaimed by the church. In Mark 8:35 and 10:29, the gospel is equated with the person of Jesus, and in Mark 13:10 and 14:9 with the story of Jesus.

The literary genre of the Gospels has been the focal point of an intense scholarly debate. On the one side stand those who see analogues to the Gospels in Jewish literature (apocalypse, biography of a righteous individual, biography of a prophet) or literature of the Greco-Roman world (popular biography, laudatory biography, aretalogy, tragedy). On the other side are those who argue that the Gospels represent a new literary genre, most likely created by the author of Mark. Here, different theories abound. For some, the Gospels are the end product of an evolutionary process that began with the preaching of the Christian kerygma (message). For others, the Markan Gospel is a narrative retelling of the church's earliest proclamation as represented in Acts (10:36–43). Although the Gospels bear some resemblance to ancient biographies and histories, they are a new literary genre inasmuch as no one has been able to produce a convincing analogue to them from the ancient world. Nevertheless, one must keep in mind that the writings of this "new genre" are heavily dependent upon earlier oral and written traditions, and to this extent the Gospels are not a wholly new creation.

In addition to the four canonical Gospels, other Christian writings are called Gospels. Five writings bear the title "Gospel" among the Nag Hammadi documents, as do numerous apocryphal writings from the second century, e.g., the *Gospel of Peter.* Many of these writings,

however, are merely collections of Jesus' sayings or revelatory discourses and do not share the genre of the canonical Gospels.

The formation of the Gospels encompassed three stages. In the first, Jesus gathered disciples who heard his teaching and witnessed his deeds. In the second, a period of oral tradition between the death of Jesus and the first written Gospel (A.D. 30–70), the church assembled collections of Jesus' words and deeds, e.g., his sayings, parables, miracles, and the passion narrative. The collections were employed for liturgical, catechetical, apologetical, and missionary use. In the third stage, the Evangelists gathered these diverse collections to form their Gospels. Most scholars believe that the first to do so was the author of Mark, about the year 70. Fifteen to twenty years later, the authors of Matthew and Luke, independently of each other, wrote their Gospels using the Gospel of Mark as a primary source. Each also had access to a collection of Jesus' sayings unknown to Mark. In addition, each had special material, such as is found in their infancy narratives. Because Matthew and Luke depend upon Mark as their primary source, there is a striking similarity among the first three Gospels, for which reason they are called "the synoptic Gospels."

The Gospel of John was composed toward the end of the first century. Although it manifests some knowledge of the synoptic tradition, it is different in style, tone, and theology, focusing upon the person of Jesus more than the kingdom of God. Written in a deceptively simple style and making abundant use of dramatic irony, the Fourth Gospel presents a profound theological meditation upon the person of Jesus. ***See also*** Apocryphal New Testament; John, The Gospel According to; Kingdom of God; Luke, The Gospel According to; Mark, The Gospel According to; Matthew, The Gospel According to; Synoptic Problem, The.

gossip. ***See*** Talebearing.

gourd, a hard-rinded inedible fruit of the genus *Lagenaria* (large) or of the species *Cucurbita pepo* (small), used both as utensils (dippers, cups, storage vessels) and for ornamentation. In Jon. 4:4–10 the KJV has "gourd" where the RSV has "plant" due to uncertain identification. Gourd motifs decorated the Temple interior (1 Kings 6:18) and the bronze sea in the Temple (1 Kings 7:24; 2 Chron. 4:3). A "wild gourd" (only in 2 Kings 4:39) had poisonous fruit.

government, the administration of society by those in power. The form varies greatly with village assemblies, heads of familial and tribal associations, intertribal judges, theocratic kings, and worldly emperors with their representatives (procurator or subordinate king) and local council (Sanhedrin). The purpose and dangers of government, however, receive attention, particularly in relationship to the king. Government, uniquely representing God, the ultimate source of justice (Ps. 72:1–4; cf. Rom. 13:1, 4), is responsible for justice for the weak (1 Kings 10:9; Prov. 31:8–9; Ezek. 34:1–6, 23; even secular governments: Dan. 4:27). Executing justice requires power (Ps. 101:1, 5, 8; conversely, Isa. 3:4–5). Government needs limits; rule is a function, not a status or class (Deut. 17:14–20). The people are not mere subjects but are also participants, even in the covenantal aspects of kingship (2 Kings 11:17; 23:1–3). ***See also*** King; Law; Procurator; Sanhedrin. S.C.M.

governor, the ruler of a Roman province, usually a former consul. Pilate was governor over the province of Judea when Jesus was crucified (Matt. 27:2). In the larger senatorial provinces a governor would usually serve for three years. Governors of provinces in which two to four legions were stationed held an important military command. Entrusted with the responsibility of maintaining peace, they would investigate any potential source of difficulty, such as the dispute between Paul and his enemies (Acts 24:1; 25:1–4).

Gozan (goh'zan; Akkadian *Guzana*), a city (modern Tell Halaf) on the Habor (Heb. *Khabur*) River, the city and its surrounding region which became part of the Assyrian Empire in the ninth century B.C. (alluded to in 2 Kings 19:12; see Isa. 37:12). Gozan was one of the places to which the Israelites were deported after the capture of Samaria (2 Kings 17:6; 18:11; 1 Chron. 5:26); texts from Tell Halaf mention some of the exiles' descendants. ***See also*** Habor.

grace, the English translation of a Greek word meaning concretely "that which brings delight, joy, happiness, or good fortune." Grace in classical Greek applied to art, persons, speech, or athletics, as well as to the good fortune, kindness, and power bestowed by the gods upon divine men, moving them to miraculous deeds.

The LXX employs this word to translate the Hebrew root meaning "favor." Thus, Noah found favor before the Lord (Gen. 6:8); Jacob sought favor in the eyes of Esau (Gen. 32:5). Similarly, those showing favor do gracious deeds. For example, showing kindness to the poor (Prov. 14:31) or generosity to all living (Ecclus. 7:33) was an act of grace. Likewise, the

Psalms speak confidently of God's graciousness in hearing prayers, healing (6:2; 41:4), rescuing the oppressed (9:13), giving the Law (119:29), forgiving sin, rescuing the weak, and the like.

Even where the vocabulary of grace is absent, God's actions are suffused with grace. God loved Israel in spite of its puny numbers (Deut. 7:6–9) and rescued the community from the howling wilderness, encircling it with care (Deut. 32:10). God kept covenant with Israel even when the covenant was violated by the people (Ezek. 16:8) and brought the captives home from Babylon (Isa. 49:14–18). Promises abound in the OT that flow from God's graciousness.

In the Apocrypha and Pseudepigrapha, grace was synonymous with divine mercy on the elect (Wisd. of Sol. 3:9). For deliverance from the flood, Noah prayed: "For Thy *grace* has been great towards me, And great has been Thy *mercy* to my soul" (*Jubilees* 10:3). The Qumran community used "covenant loyalty" synonymously with grace: "Behold you have begun to show covenant loyalty to your servant. You are gracious to me with your mercies" (*Thanksgiving Hymn* 16:8–9). Even while relying on God's grace, the community strictly hewed to the Law with no sense of contradiction. The way of grace and the demand of the Law were integral to the *one* path to salvation.

Except for its emphasis on Jesus, the NT understanding of grace resembles that just surveyed. In Luke and Acts, power from the divine realm infuses god-like men, moving them to perform miraculous deeds. The divine grace rests on the infant Jesus (Luke 2:40), who subsequently grows in grace (2:52), speaks gracious words (4:22), and, like a divine man, passes unharmed through a hostile mob (4:30). Followers of Jesus, such as Stephen, full of "grace," do signs and wonders (Acts 6:8; cf. 14:3). Likewise, Paul assumes that recipients of God's grace will perform deeds of grace. The gracious gift he received is apostleship (Rom. 1:5; 12:6–8); the range of gifts ("graces") others receive runs from esoteric, ecstatic speech to mundane, administrative skills, but all are deemed important (1 Cor. 12:4–31).

Elsewhere, grace connotes God's favor shown sinners through Jesus Christ. Historically condemned as "sinners," Gentiles gain entrance to the messianic community through the "gift" (Rom. 3:24) or "free gift" (Rom. 5:15) of grace (Gal. 2:17–21; Rom. 4:16). While Paul forbade no Jewish Christian to observe the Law, Christ revalued the Law. Although he disassociated grace and Law observance for Gentiles (Galatians), Paul, like the Qumraners, expected obedience to accompany the life of grace. Repeatedly, Paul cautioned against using grace as a license to sin, lest believers "accept the grace of God in vain" (2 Cor. 6:1).

Paul also used grace to mean "thanks to God" (Rom. 6:17; 7:25; 1 Cor. 15:57), a thank offering, or an acknowledgment of God's good gifts. In the opening of his Letters, Paul offers the traditional Greek greeting, "grace" (coupled with the Hebrew "peace" wish), expressing delight at touching the addressee's world. The letters characteristically close with a petition for divine favor, "grace," on the recipients. ***See also*** Covenant; Forgiveness; Love; Mercy; Promise; Spiritual Gifts. C.J.R.

gracious, to be kindly disposed or to show favor and mercy to someone, usually by a person of superior position and power to a person of inferior position and power. Thus, Potiphar dealt graciously with Joseph (Gen. 39:4), Ruth found favor in the eyes of Boaz (Ruth 2:10), and Esther was treated graciously by King Ahasuerus (Esther 2:17; 5:2). In the Bible, it is above all God who is gracious toward human beings, as stated in the ancient liturgical formula: "The Lord, the Lord, a God merciful and gracious, slow to anger, and abounding in steadfast love and faithfulness" (Exod. 34:6; see also Pss. 86:15; 103:8; 145:8). This is one of the few doctrinal statements about God in the OT in adjectival form. In the NT, the adjective "gracious" is virtually absent; the noun "grace," however, is used frequently in salutations (Rom. 1:7; Eph. 1:20), but most often to describe what God has done in Christ for humanity (Rom. 5:2, 15, 17; 1 Cor. 15:10; Eph. 2:8). ***See also*** Grace; Mercy. graft. ***See*** Olive.

grain, a general term used throughout the Bible to indicate the seed of cultivated cereal grasses such as wheat, barley, millet, and sorghum. Ground into flour, it was the major component of breads and other cooked foods. ***See also*** Barley; Corn; Millet; Rye; Spelt; Wheat.

granary, a storage facility for threshed and winnowed grains such as wheat and barley. The facility ranged in size and format from an entire building of rooms or compartments to plastered or unplastered pits or silos to individual jars or containers. The presence of large granary structures in the ancient Near East implies a surplus production of wheat to guard against famine years as well as some type of organized system for redistribution of the grain (see Jer. 50:26; Joel 1:17; Matt. 3:12; Luke 3:17).

graven images. ***See*** Idol.

graving, engraving, incising, the practice of impressing deeply in metal, clay tablets, or stone with an iron tool or stylus. The OT men-

tions an engraver who did work for the Temple (2 Chron. 2:7), one Huramabi by name (2 Chron. 2:13–14), but the OT also contains a prohibition against making graven images (Exod. 20:4). Engraving was done on a gold plate for Aaron's turban with the inscription, "Holy to the Lord" (Exod. 28:36; 39:30). On bronze stands in the Temple cherubim, lions, palm trees and wreaths were engraved (1 Kings 7:36; 2 Chron.

A reed stylus ready to engrave a clay tablet typifies those used widely throughout the ancient Near East.

3:7). Isa. 8:1 mentions clay tablets and Jer. 17:1 engraving with a pen of iron with a diamond point. Exod. 28:9, 11 and 39:6, 14 refer to two onyx stones with six Israelite tribal names incised on each. Job 19:24 mentions an incised tablet with lead-filled letters. Zech. 3:9 speaks of a seven-faceted stone engraved with an inscription. Artifacts such as seal cylinders and stamps for impressions on documents are relatively frequent. Inscribed Egyptian and Hyksos scarabs can be used for dating archaeological finds. Paul assures his listeners they can learn nothing about God from the result of the engraver's technique. R.A.C.

Great Assembly, a succession of Jewish scholars in the sixth to the third centuries B.C. The chain of tradition in the Mishah tractate Abot (also called Pirke Abot and the Chapter of the Fathers) traces the handing on of Torah from Moses to the rabbis of the second and third centuries. The gap in the chain between the traditional last prophets (Haggai, Zechariah, and Malachi) and Simeon the Just, high priest ca. 200 B.C., is filled by the "men of the Great Assembly" (Heb. *keneset*), sometimes referred to as the Great Synagogue. Talmudic authors (third century A.D. on) identified this group with the assembly in Nehemiah 8–9 and attributed various legal and ritual enactments to it. Though scholars have argued about the nature of this institution, it is unlikely that any historical institution is remembered here. Organs of community leadership probably varied considerably from 500 to 200 B.C. ***See also*** Sanhedrin. A.J.S.

greave, armor protecting the lower leg. The ones Goliath wore were made of bronze (RSV; KJV: "brass," 1 Sam. 17:6).

Grecia (gree´shuh), an archaic form of "Greece," found in the KJV (e.g., Dan. 8:21; Zech. 9:13; Acts 20:2). Similarly "Grecians" is the archaic form to describe the inhabitants of Greece (KJV, Joel 3:6; Acts 9:29), in modern parlance "Greeks." ***See also*** Greece.

Greece (grees), a country that lies at the terminus of the central mountain structure of southern Europe. By the eighth century B.C. city-states built around a fortress on the acropolis (Gk., "high city") had replaced the older tribal states or villages. Between 750 and 500 B.C. Greeks, pressed for land, founded numerous colonies in the Aegean, along the Black Sea, in Cyrenaica, Sicily and southern Italy as well as Asia Minor. By 500 B.C. Sparta had united most of the Peloponnesus. After defeating the Persians, the Athenians united most of the Greeks in the Aegean as well as those along the coast of Asia Minor. Athens's defeat by Sparta ended this league, though attempts would be made to form new leagues around prominent cities. In the north, Greece had remained divided into weak tribal monarchies until Philip II of Macedon consolidated power in the region. Philip defeated Athens and a weak coalition of cities at Chaeronea in 338 B.C. The Romans gained control of Greece in 146 B.C. Greece is mentioned only in two later OT books (Dan. 8:21; 10:20; 11:2; Zech. 9:13). It figures prominently in the NT, however. Three of the cities to which Paul addressed letters were in Greece (Corinth, Philippi, Thessalonika), and he visited other cities there as well (see Acts 16:9–18:18; 2 Cor. 2:12). P.P.

Greek, New Testament. History of the Ancient Greek Language: All the books of the NT were written in Greek. The exact nature of NT Greek, however, has long been a subject of scholarly controversy. The major issues are the relationship of NT Greek both to antecedent dialects and to contemporary secular Greek of the first century A.D., and the extent of Hebrew and Aramaic influence on the language of the NT.

The historical roots of the Greek language can be traced to the arrival of Indo-European peoples called Achaeans as reported in the *Iliad*. Their migration, which is usually dated to the beginning of the Middle Helladic period (ca. 1900 B.C.), produced the Greek dialects of Aeolic and Ionic. A second major wave of Indo-European invaders occurred at the beginning of the Iron Age (ca. 1100 B.C.). These invaders introduced the Doric dialect and forced many of

the Achaeans to resettle on the western coast of Turkey, subsequently referred to as Ionia. The *Iliad* (ca. 750 B.C.) and the *Odyssey* (ca. 700 B.C.) were composed in an early form of Ionic. The *Histories* of Herodotus, a native of Halicarnassus, were written in new Ionic at the beginning of the Peloponnesian War (ca. 430–425 B.C.). The writings of Plato, Thucydides, Euripides, and Demosthenes, to name a few, were composed in Attic, the dialect of Athens. (As a result of their literary influence, Attic Greek is the "standard" form of the language still taught in elementary Greek courses and is referred to as classical Greek.) Because of the political dominance of Athens in fifth-century B.C. Greece, Attic became the *lingua franca* of the Delian League, serving as the basis of communication for both merchants and soldiers who spoke different Greek dialects. This transformation of Attic into a common Greek dialect, called Koine ("common") Greek, was one of the reasons for Alexander the Great's success in conquering the Persian Empire and for the subsequent spread of Hellenic culture over the Middle East during the last three centuries B.C. Koine Greek (also called Hellenistic Greek) was a "common" dialect in both senses of the word: it became the universal language of late antiquity, serving as the *lingua franca* for over a millennium (fourth century B.C.–sixth century A.D.), and it was simplified into a colloquial idiom by both non-Attic-speaking Greeks and non-Greeks for whom Koine was a second language. Some literary purists such as Dionysus of Halicarnassus and his circle resisted this transformation (from their viewpoint, "vulgarization") of Attic into Koine and, especially in the second century A.D., consciously imitated the Attic of the Classical period in their writings (this phenomenon is called "Atticism," and it influenced the writing and editing of some parts of the NT).

A major boon to the study of Koine Greek has been the discovery during the past century of tens of thousands of papyrus documents, mainly in Egypt, as well as inscriptions and ostraca unearthed during archaeological excavations. Scholars now possess a wide spectrum of written materials from late antiquity, thus permitting a comparative analysis of NT Greek with secular Koine Greek documents of the time. As a result, most NT Greek scholars now view NT Greek as more closely related to the Koine vernacular of the first century A.D. than to literary Attic. Nevertheless, NT Greek differs somewhat from Koine Greek owing not only to the influence of Hebrew and Aramaic patterns on the NT authors (such patterns are referred to as "Semitisms" and come both from the translation patterns preserved in the Septuagint and from the Aramaic background of the oral tradition), but also to the new connotations of Greek words generated by the process of community formation in early Christianity. Moreover, NT Greek varies from book to book as a result of each author's educational level and familiarity with Koine Greek (these variations are referred to as "stylistic" differences).

Description of NT Greek: The earliest extant Greek texts were written in a script called Linear B and are dated to the Late Helladic period (1400–1200 B.C.). This script was adapted from a Minoan form of writing, Linear A, which is evidently based on a syllabic system employed by western Semitic language groups of the Levant. Sometime after 1000 B.C., Linear B was transformed into an alphabetic system that Herodotus (5.58) attributes to Phoenician influence. The alphabets of most European languages were, in turn, derived from the Greek alphabet. Several of the Greek letters were lost during the Archaic period so that the official alphabet (the name itself is derived from the first two letters, *alpha-bet[a]*, of the Greek alphabet) adopted in Athens at the end of the Peloponnesian War, and used by NT authors, contained twenty-four letters (see the table which includes the English equivalents).

In addition to the vowels *alpha* (*a*), *iota* (*i*), and *üpsilon* (*u*), the Greek alphabet has separate letters for long *ē* (*ēta*) and *ō* (*ōmega*) and for short *e* (*epsilon*) and *o* (*omicron*), thus totaling seven vowels. The exact pronunciation of ancient Greek sounds is no longer known. The examples listed in the table therefore represent a more or less arbitrary system of pronunciation that derives from the Renaissance scholar Erasmus.

THE GREEK ALPHABET

Greek Form *Capital*	*Small*	*Name*	*Translit-eration*	*Approximate Pronunciation*
Α	α	alpha	a	drama
Β	β	bēta	b	bible
Γ	γ	gamma	g	glucose
Δ	δ	delta	d	decalogue
Ε	ϵ	epsīlon	e	ego
Ζ	ζ	zēta	z	Zeus
Η	η	ēta	ē	they
Θ	θ	thēta	th	theist
Ι	ι	iōta	i	intrigue
Κ	κ	kappa	k, c	crisis
Λ	λ	lambda	l	logic
Μ	μ	mu	m	mother
Ν	ν	nu	n	anti
Ξ	ξ	xī	x	axiom
Ο	ο	omīcron	o	apology
Π	π	pi	p	poet
Ρ	ρ	rhō	r	catarrh
Σ	σ, ς	sigma	s	syntax
Τ	τ	tau	t	topic
Υ	υ	üpsilon	u, y	*tu* (French) *Tür* (German)
Φ	φ	phī	ph	phonetic
Χ	χ	chī	ch	chasm
Ψ	ψ	psī	ps	apse
Ω	ω	ōmega	ō	ode

Two guidelines are helpful in pronouncing ancient Greek words: first, every letter is vocalized; and second, words should be divided into the same number of syllables as there are separate vowels or diphthongs, e.g., *a*-pe-cr*i*-thē, *a*-lē-th*ei*-*a*, pr*o*-phē-tēs, with the consonant(s) beginning the next syllable.

Linguists divide languages into three major types: *isolating* (all words are separate roots), *agglutinative* (words are formed by combining separate morphemes), and *inflectional* (words are formed by modification of stems or word bases with prefixes, suffixes, or internal changes). Ancient Greek is an example of a highly inflected language like Latin and German. There are three major inflectional patterns (called declensions) in the nominal system, divided according to stem endings: nominal stems ending in *a* or *ē* belong to the first declension, those ending in *o* to the second declension, and those ending in consonants to the third declension. Suffixes are added to nominal stems according to regular patterns in each declension and signal the following grammatical information: *gender* (each nominal word is masculine, feminine, or neuter and is so indicated by the corresponding article in a Greek dictionary), *number* (singular or plural; the dual number of classical Greek has disappeared in Koine Greek), and *case* (in general, the nominative case signals the subject, the accusative the direct object, the dative the indirect object, and the genitive the possessive case; separate case endings for the vocative of direct address, ablative signaling origins, and instrumental and locative functions have become almost fully assimilated to the nominative, genitive, and dative cases respectively in Koine and NT Greek).

Greek verbs are also divided into inflectional patterns (called conjugations) according to which vowel or consonant occurs at the end of the verb base. By the presence or absence of a variety of prefixes, infixes, and suffixes, each verb form signals the following grammatical information: *person* (first, second, or third), *number* (singular or plural), *voice* (active, middle, or passive), *mood* (indicative, subjunctive, optative, imperative, infinitive, or participle), and *tense* (both as *time*: past, present, or future, and as *type of action*: punctiliar, durative, or completive). Because Greek is so highly inflected, there is the possibility that each verb can occur in more than six hundred separate forms.

While Greek morphology contains a large number of variables, the advantage is soon apparent: first, because there is a separate form to indicate each nuance of meaning in the nominal and verbal systems, translation from Greek to English, for example, is relatively free from ambiguity and far "easier" than from a less fully inflected language (though translators still differ over a number of "hard" passages in the NT). Second, because the grammatical function of words in Greek is indicated by their inflectional signals rather than by word order, subject, verbs, and predicates can occur in a variety of sequences in Greek texts, reflecting compositional style and emphasis. Third, the full contours of a highly inflected language began to erode already in the Koine, and modern Greek is far less inflected than its ancestor dialects.

The following modifications of the inflectional patterns described above can already be observed in the Koine: (1) the substitution of prepositional phrases for oblique (genitive, dative, and accusative) case endings to indicate syntactical relationships within the predicate; (2) a decline in the use of the middle voice to indicate that the subject has a special interest in the verbal action, and its replacement with the active voice and a reflexive pronoun; (3) the gradual domination of regular over irregular conjugation patterns; (4) the loss of distinction in the protasis ("if" clause) of a conditional sentence between probable (subjunctive mood) and doubtful (optative mood) conditions so that the optative is very rare in the NT; (5) an increase in the use of periphrastic constructions (auxiliary verb plus participle) in place of the appropriate tense stem; (6) a decline in the use of the imperfect and pluperfect tenses to distinguish different kinds of action in the past; and (7) confusion among subordinating conjunctions and prepositions so that syntactical distinctions between contrasting pairs are blurred. In sum, the historical changes in the Greek world after Alexander the Great, despite the archaizing efforts of the Atticists, produced a movement away from the intricate structure of classical Greek toward simpler phonological, morphological, and syntactical forms of expression in the Hellenistic period.

Implications for the Study of the NT: Study of the Greek language is helpful, if not crucial, for the interpretation of the NT at a variety of points. First, knowledge of Greek enables the scholar or preacher to compare the variant readings contained in the multitude of manuscripts of the NT books and to establish the text that will serve as the basis for a commentary or sermon. Having constructed the text, the translator can then craft his or her own equivalent meaning in the target language. Second, attention to an author's compositional style often illuminates the strategy and purpose in writing. The Pauline Letters, for example, while presumably composed with some urgency and in a conversational style to reflect Paul's apostolic presence, contain arguments and rhetorical conventions reminiscent of contemporary Stoic-Cynic preachers and orators such as Seneca. The author of the Gospel of John, on the other hand, employs a very different compositional strategy only fully evident in the Greek text. He frequently strings together simple sentences with the conjunction *kai* ("and"): "After these things Jesus and his disci-

ples went into the land of Judea *and* he stayed there with them *and* he baptized. *And* John was also baptizing at Aenon near Salim because there was much water there, *and* they [the people] came *and* they were baptized" (John 3:22–23). As a result of this paratactic style, the Greek of the Fourth Gospel is often judged to be the closest to the vernacular and NT Greek textbooks usually begin with passages from John. Yet the author sprinkles his work with double entendres and symbolic terms that can trap those who, like Nicodemus in John 3, take the simple style literally, i.e., as an indication of conceptual simplicity.

Whether Jesus taught in Aramaic or Greek is another critical issue relating to the language of the NT. Because Aramaic was the native language of Palestine in the Persian and Hellenistic periods, some NT scholars have argued that the canonical Gospels are Greek translations of a primitive Aramaic Gospel. While most contemporary NT scholars have abandoned this hypothesis, there is still considerable debate over the extent to which the peculiarities of NT Greek are the result of Semitisms and whether the sayings of Jesus are translations from Aramaic. Some scholars, on the basis of inscriptional evidence from first-century Palestine that show how common Greek was, have recently argued that Jesus was bilingual and, on the grounds that the parables are so poetic that they must have been composed in Greek, that he may even have taught in Greek. These three examples illustrate how a study of the language of the NT can illuminate key issues in the interpretation of its contents. ***See also*** Aramaic; Hebrew; Septuagint; Texts, Versions, Manuscripts, Editions.

Greeks, persons of Greek descent, language, and culture as opposed to non-Greek "barbarians." In a broader sense, persons, whatever their origins, who had come under the influence of Greek culture and who lived in the hellenized cities of the Roman Empire as opposed to the rustic, rural population could be called Greek. In the Bible, "Greeks" may refer to pagans in contrast to Jews (2 Macc. 4:36; Acts 9:29). From a Jewish standpoint the expression "Jews and Greeks" embraces all of humanity (Acts 14:1; Rom. 2:9–10; Gal. 3:28; Col. 3:11; 1 Cor. 12:13). The expression "pious Greeks" can be used for proselytes or God-fearers, Greeks who converted to Judaism or were interested in it (Acts 17:4). P.P.

grisled ("grizzled"), a term meaning "gray-streaked" or "roan," the archaic KJV translation for "mottled" (Gen. 31:10, 12) or "dappled" (Zech. 6:3, 6).

grove, a cluster of trees or a resting spot such as an orchard or an oasis. The sacred places referred to in the Scriptures are probably groves of oaks (Josh. 24:26). Often designated as "high places," they are the places of worship of the pagan gods Baal and Astarte (Deut. 12:2–3; 2 Kings 17:10, 16). The grove planted by Abraham in Beer-sheba was of tamarisk trees (Gen. 21:33). ***See also*** Oak; Trees; Woods.

grudge, a feeling of anger, prohibited by Lev. 19:18, although elsewhere God is said to maintain his anger (Nah. 1:2), albeit not forever (Jer. 3:5, 12; Ps. 103:9). Ungrudging behavior is encouraged in Deut. 15:10 and 1 Pet. 4:9. The word translated "grudge" in the KJV of Ps. 59:15 and James 5:9 is better understood as "grumble" or "complain."

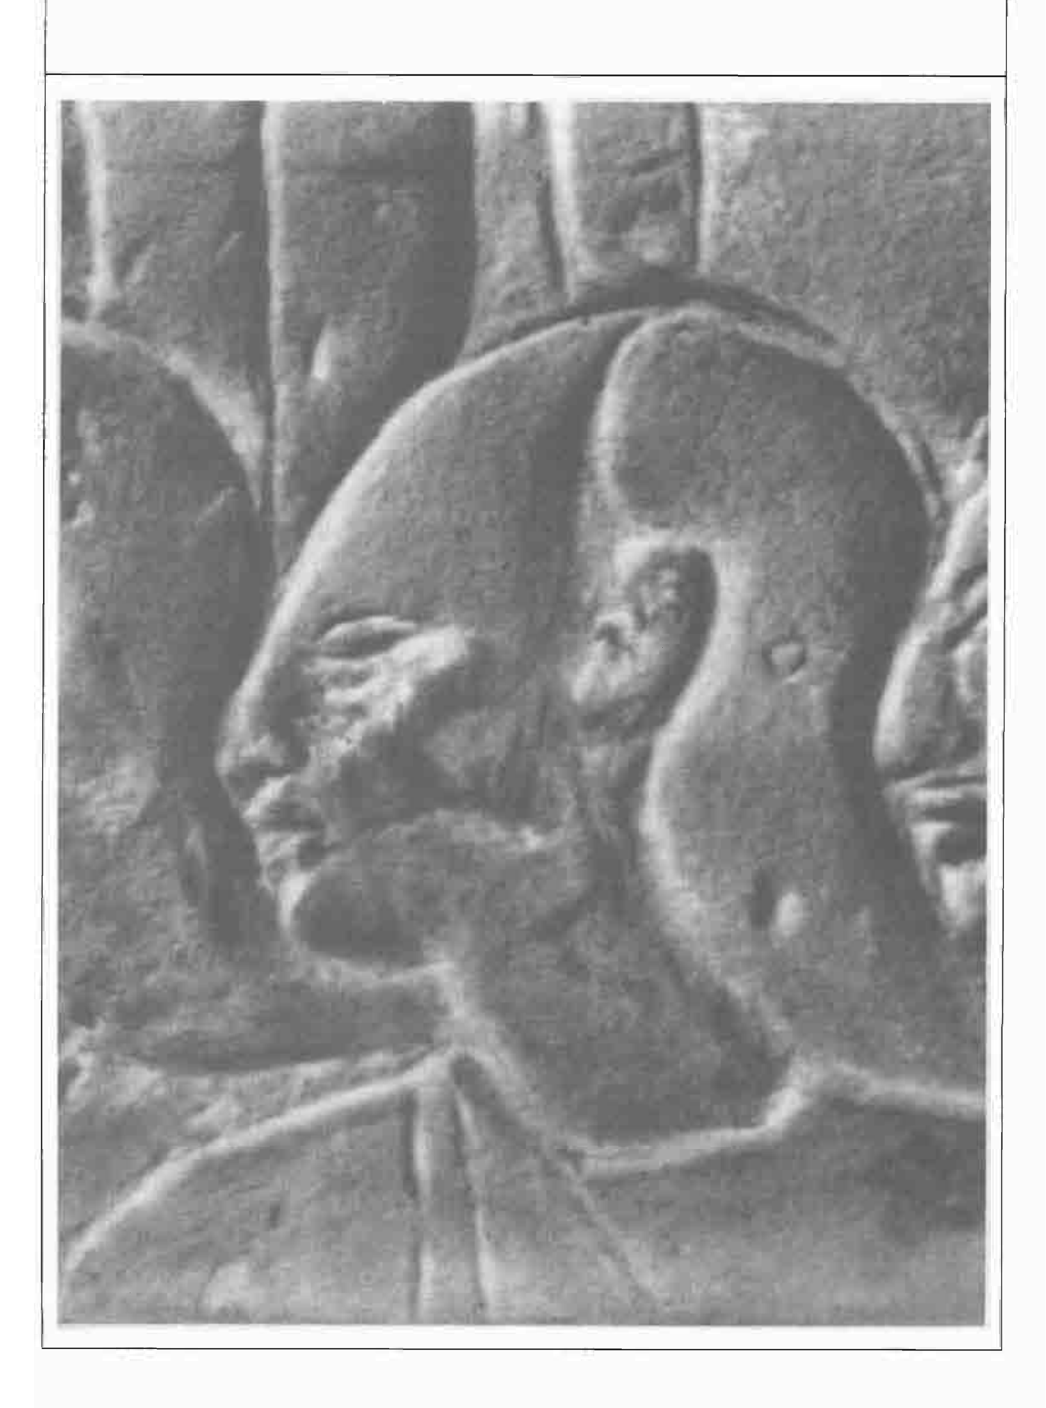
guard, bodyguard, a person or persons assigned to the protection of an important person or group of persons. Both OT and NT give evidence of persons who functioned in these capacities. In the OT various royal figures are depicted as having guards (Gen. 37:36; Dan. 2:14; 2 Kings 25:8–21). David had an elite troop of Cherethites and Pelethites who served as his bodyguard (2 Sam. 8:18; 23:23). As "foreigners" these soldiers would have personal loyalty to their employer and would be less likely to be influenced by competing internal political factions. The Temple area in Jerusalem also required guards (1 Kings 14:27–28; 2 Kings 11:19).

During the Roman occupation of Palestine the Temple area had at least two different sets of guards. One set of Roman soldiers was stationed in the fortress of Antonia (see Acts 21:30–34) and the priestly officials had levitical "security officers" as well. Roman guards watched the tomb of Jesus (Matt. 27:65–28:4) and supervised the house arrest of the apostle Paul (Acts 28:16). J.A.D.

guest, one invited to a feast (1 Kings 1:41; Matt. 22:10–11) or to lodge overnight (Luke 19:7). In the ancient Mediterranean world, it was considered obligatory to lodge travelers and strangers (Judg. 19:15–21; Heb. 73:2).

guest chamber. ***See*** House.

guilt, a concept that is difficult to define precisely and with every nuance present in the various writings of the Bible. For the biblical writers, guilt is not understood primarily as an inward feeling of remorse or a bad conscience, but rather as involving a situation that has arisen because of sin committed against God or one's neighbor (sin either of commission or of omission). Thus, in the Bible, guilt appears to have two primary presuppositions for its existence: first, human beings are responsible and accountable for their actions, thoughts, and attitudes; and second, these actions, thoughts, and attitudes constitute a state of guilt when relationships between human beings and God or other human beings have been broken because of sin. **Responsibility:** The principal ingredient in the biblical concept of guilt appears to be the dimension of responsibility. Human beings are accountable for what they do and for the consequences of what they do. This accountability lies at the center of the biblical understanding of guilt. So great was this sense of responsibility that people could be guilty without even being aware that they had done anything wrong (e.g., Lev. 5:17–19). When a person sinned, guilt was the natural consequence. Often guilt was depicted in the OT as a burden or weight that could crush a person (e.g., Ps. 38:4, 6), or as a cancer that could destroy a person from within (e.g., Ps. 32:3–4), or as a debt that must be paid (e.g., Lev. 5:1–6:7; Num. 5:5–8). **Reconciliation:** Because of these understandings that all people were guilty before God and each other, there developed in Israel a system of sacrifices and rituals that were designed to "purify" the people involved by their paying a penalty for the wrong done. This ritual was not designed simply to relieve the conscience of the guilty party but rather to make restitution, to lay aside the burden of guilt, and to restore the broken relationship caused by the guilt. The system was designed, in part at least, to establish a reconciliation between the guilty party and the party sinned against. In the NT, Paul makes frequent use of this idea (e.g., Rom. 5:6–11; 2 Cor. 5:16–21; cf. Col. 1:19–20). **Collective and Individual:** Because of the biblical understanding of the importance of the community, i.e., the people of God, guilt could be both collective and individual. What one person did could cause guilt to come upon an entire group of people (cf. esp. the story of Achan, Josh. 7). The basis for this view was the Hebrew belief in corporate solidarity, the essential importance of the people as a whole, not just as an aggregate of individuals. Individuals might sin, however, and bring guilt and the consequences of sin upon themselves. The famous lament and confession of sin in Psalm 51 points to such a situation, as does the well-known challenge of Ezekiel to the people in Exile (chap. 18).



Guilt brought with it serious consequences, such as separation from God and one's neighbors and specific penalties for sins committed. The NT writers used a particular word (Gk. *enochos*) with regard to guilt, which usually means "deserving of punishment" (e.g., Matt. 26:66; 1 Cor. 11:27; James 2:10). According to Paul, all human beings are guilty before God (e.g., Rom. 1:18–3:20). In both the OT and the NT, it is only because of God's grace that guilt can be set aside through God's forgiveness. ***See also*** Atonement; Evil; Expiation; Justification; Reconciliation; Sanctification; Sin; Worship. J.M.E.

guilt offerings. ***See*** Worship.

Guni (gyoo´ni). **1** A son of Naphtali who settled with Jacob's family in Egypt (Gen. 46:24) and became the head of the Gunite clan (Num. 26:48). **2** A descendant of Gad (1 Chron. 5:15).

Opposite: Hittite warrior taken prisoner by the Egyptians at the battle of Kadesh; from a relief ca. thirteenth century B.C.

H

H, the siglum for the "Holiness Code," a modern term for the material contained in Leviticus 17–26, which consists of regulations Israel is to observe so it may separate itself from those practices not pleasing to God. To be separated for God in that way is what "holy" means. ***See also*** Holiness.

Habakkuk (huh-bak´uhk), **the Book of,** the thirty-fifth book in the Christian OT and one of the twelve Minor Prophets. Nothing is known about the prophet Habakkuk except what can be deduced from his oracles. The reference to the coming of the Chaldeans in 1:6 makes it likely that Habakkuk was active in the last quarter of the seventh century B.C. The oracles of Habakkuk were probably composed at different times during his prophetic career and only later assembled to form a reflection on the problem of divine justice, perhaps after 597 B.C. The book consists of two distinct parts, each with its own heading. Chaps. 1–2 are identified as an "oracle" or "pronouncement" (Heb. *massa'*), and chap. 3 as a "prayer" (*tephillah*). Despite the separate headings and the difference in form, the two sections are part of a unified composition. The "prayer," which is a vivid poetic description of God as Divine Warrior, is probably to be taken as the content of the "vision" referred to in 2:2–3.

The parts of the book are related as follows. After the heading in 1:1 there is a lament concerning the success of the wicked and the inaction of God (1:2–4). It is unclear to whom Habakkuk refers as "the wicked." It may be the Assyrians, who ruled Judah until their defeat by the Babylonians in 612 B.C. (an event referred to in the book of Nahum, written at about this time). On the other hand, Habakkuk may have been referring to corrupt Judean nobles, perhaps those who supported King Jehoiakim (criticized also by Jeremiah, a contemporary of Habakkuk). God responds in 1:5–11 that he is raising up the Chaldeans (i.e., Babylonians), whose cruel power is irresistible. In 1:12–18 the prophet renews his complaint, protesting against the Babylonians' cruelty, which God seems to ignore. Although the notion that God might use a foreign enemy as a means of judgment against Judah is found in Isaiah and in Jeremiah, Habakkuk appears to argue against the injustice of such a method of punishment. God responds a second time in 2:1–5, instructing Habakkuk to "write [down] the vision." The content of the vision is not specified at this point, but God insists that despite the apparent delay, the fulfillment of the vision will be accomplished in its proper time, and the righteous who remain faithful will be preserved (Paul quotes Hab. 2:4b with an altered sense in Rom. 1:17 and Gal. 3:11). A series of five threats against the wicked (each introduced by "woe to" ["alas for"]) follows in 2:6–19. Although the object of these threats is not specifically named, the context indicates that they apply to the Babylonian king Nebuchadnezzar.

A liturgical summons to keep silence before God introduces the prayer of Habakkuk in chap. 3. The prayer is actually a hymn with strong mythological overtones, describing God's appearance to do battle with his enemies (cf. Judg. 5; Deut. 33; Ps. 68). This graphic depiction of God the Warrior, which is presumably the content of the vision written down by the prophet, serves as the decisive resolution to the protests raised by Habakkuk.

The lament-response form of chaps. 1–2 and the psalmlike hymn in chap. 3 may indicate that the book took shape as a liturgy for use in the Temple. Other prophets whose work is probably to be related to the Temple worship are Nahum, Obadiah, and Joel. It is equally possible, however, that the book was composed simply as a prophetic reflection and that the "prayer" was secondarily adapted for use in worship. However that may be, the text of the hymn now contains technical notes concerning its (musical?) performance, such as one finds in the book of Psalms.

In the first century B.C. the Qumran community (responsible for preserving the Dead Sea Scrolls) produced a commentary on Habakkuk 1–2, relating it to historical events in its own time. The prophet Habakkuk also appears as a character in the apocryphal story Bel and the Dragon (second century B.C.), where he is whisked off to Babylon by an angel in order to deliver a meal of stew and bread to Daniel, who is imprisoned in the lions' den. ***See also*** Bel and the Dragon; Chaldea; Jeremiah, The Book of; Nahum, The Book of; Scrolls, The Dead Sea.

OUTLINE OF CONTENTS

The Book of Habakkuk

I. Title (1:1)
II. Dialogue-lament (1:2–2:19)
  A. Lament on the success of the wicked (1:2–4)
  B. God's response (1:5–11)
  C. Lament on the success of Babylon (1:12–17)
  D. God's response (2:1–5)
  E. Five woes against the wicked (2:6–19)
III. Hymn on God's victory over his enemies (2:20–3:19)

habergeon (hab'uhr-juhn), the KJV's term for the RSV's "garment" (Exod. 28:32; 39:23), "javelin" (Job 41:26), and "coat of mail" (2 Chron. 26:14; Neh. 4:16). It was a short coat of mail, part of defensive armor.

Habiru (hah-bee'*roo*). ***See*** Khapiru.

Habor (hay'bor), ancient and modern Habur (Khabur), a major tributary of the Euphrates River, which it enters from the northeast below modern Deir ez-Zor. The Habor was a major route in antiquity and was densely settled, as the many tells that dot its banks show. In the OT the Habor is called the river of Gozan and is named as one of the places to which the Israelites were exiled in 722 B.C. (see 2 Kings 17:6; 18:11; 1 Chron. 5:26). ***See also*** Gozan.

Hachilah (huh-k*i*'luh), an unidentified hill in southern Judah in the wilderness of Ziph not far from Hebron. David hid there from Saul (1 Sam. 23:19; 26:1), and Saul encamped on that very hill in his search for David (26:3). ***See also*** Ziph.

Hadad (hay'dad), a Semitic storm god, also known as Haddu, Adad, and Addu. The meaning of the name is unclear, but it may be connected with the noise of a storm. A late folk etymology erroneously took the name to signify "the unique."

The veneration of Hadad is attested by some of the earliest Mesopotamian texts. Apparently of West Semitic origin, the god found a special following in Assyria (both early and late) and among the Aramaeans. At Ras-Shamra (Ugarit), Hadad (Haddu) passes as the storm deity Baal and is once called "the shepherd." An Aramaic inscription from Zinjirli dedicates a statue of the god, to whom the local king Panammuwa owed personal thanks. Lucian, a Greek author of the second century A.D. (or Pseudo-Lucian), treats the cult of Hadad in his work on the Syrian goddess Atargatis; at Hierapolis Hadad was coupled with Atargatis (Anat?), just as earlier at Ras-Shamra Baal (Haddu) was coupled with Anat.

In the Bible, "Hadad" survives chiefly in personal names (Gen. 36:35, 39; 1 Kings 11:14–22; 1 Chron. 1:30). The book of Zechariah once condemns the practice of offering lamentations for Hadad-rimmon, a god behind whose name we recognize the storm deity (Zech. 12:11). ***See also*** Anat; Baal; Ras-Shamra. R.M.G.

Hadadezer (hay'dad-ee'zuhr; Heb., "Hadad is help"), the king of Zobah who was defeated by David in various campaigns against Aramaean resistance (2 Sam. 8:3–12; 10:15–19; 1 Chron. 18:3–11; 19:16–19). David's victory consolidated his control over both southern Syria and the Transjordan. His tactics included hamstringing his enemy's horses to cripple their defensive power (1 Chron. 18:4).

Hadad-rimmon (hay'dad-rim'uhn), a name, probably a combination of the names for the Syrian gods Hadad and Rimmon. Hadad was the storm god Baal of the Ugaritic texts. Rimmon, an alternate name for Hadad, was worshiped in Damascus (2 Kings 5:18). The mourning to come in Jerusalem is compared to the ritual mourning for Hadad-rimmon at Megiddo (Zech. 12:11). ***See also*** Baal; Hadad; Ras-Shamra; Rimmon.

Hadar (hay'dahr). ***See*** Hadad.

Hadassah (huh-das'uh), another name for Esther (Esther 2:7), probably her given Hebrew name. "Esther" is a Babylonian or Persian name (the goddess Ishtar or "star"), which may have been the name given her in the royal court (see Esther 2:8–9) or a name adopted in conformity with Persian style.

Hades (hay'deez), a Greek god whose name means "The Unseen." He was lord of the underworld, the abode of the dead. The Greek word "Hades" was used to translate several Hebrew words in the Bible, namely, "the pit," "stillness," "death," "those who bring death," "deep darkness," and, most commonly, "Sheol." "Sheol" probably derives from the verb "to ask or inquire" and thus refers to the realm of the dead as the place from which oracles were sought. The seeking of such oracles was forbidden by the Torah (Deut. 18:11) but was apparently practiced (1 Sam. 28:3–25).

Sheol sometimes refers to a place (Gen. 37:35) and sometimes to a being (Job 26:6). As a place, Sheol was a watery abyss (Job 26:5; 2 Sam. 22:5), the waters of chaos confined beneath the earth that corresponded to the waters of chaos above the firmament. As a being Sheol is portrayed with an immense, devouring mouth and as insatiable (Isa. 5:14; Prov. 30:15–16). This imagery derives from Canaanite myths about Baal, Anath, and Mot (Death). Mot reigns over the underworld and swallows Baal and all who die.

The dead are referred to as "shades," pale reflections of the men and women they had once been (Isa. 14:10; Eccles. 9:10). Existence in Sheol is characterized by forgetfulness and inactivity (Ps. 88:12; Eccles. 9:10). Sheol is not a place of punishment in the OT.

In the NT likewise, Hades appears both as a place (Acts 2:31) and as a being (Rev. 6:8). As a place it is the abode of the dead (Acts 2:27, 31). The notion that the realm of the dead had one or more gates controlling movement into and out of it is a very ancient one. It appears in the OT (Isa. 38:10) and in the NT (Matt. 16:18). In Rev. 1:18

the risen Christ says that he has "the keys of Death and Hades." The saying implies that Christ is able to unlock and lock the gates of Hades, that he has power over life and death. The saying in Matt. 16:18 means that the powers of death and other God-opposing forces will not triumph over the church (the community of believers in Jesus as the Christ).

Gehenna is the word most commonly used in the NT for the place where sinners will be punished after death (Matt. 5:22). In one passage Hades is presented as a place of torment (Luke 16:23). ***See also*** Abyss; Death; Gehenna; Heaven; Hell; Sheol. A.Y.C.

Hadoram (huh-dor´uhm). **1** A son of Joktan, descendant of Shem (Gen. 10:27). **2** The son of Tou (Toi), king of Hamath; he was sent with gifts to congratulate David on his victory over Hadadezer (1 Chron. 18:10). He is also called Joram (2 Sam. 8:10). **3** An official of King Rehoboam (926–910 B.C.) of Judah; he supervised the conscripted labor force and was stoned to death by the people of Israel (the Northern Kingdom) when he attempted to enforce the harsh policies of Rehoboam (2 Chron. 10:18). He is called Adoram in the Hebrew text of 1 Kings 12:18, but Adoniram in the Greek text (Septuagint), and he may be identical with persons of both these names (1 Kings 4:6; 5:13–14). ***See also*** Adoniram; Adoram. D.R.B.

Hagar (hay´gahr), the Egyptian maidservant whom Sarah gave to Abraham as his concubine; she bore him Ishmael. There are two stories concerning Hagar, both showing the rivalry between her and Sarah. In the first (Gen. 16:1–16) Sarai (Sarah) was barren and, in accordance with custom, gave her maidservant to her husband so that she could bear a child in place of her mistress. When Hagar became pregnant, she acted arrogantly towards Sarah and so Sarah, with Abraham's permission, dealt so harshly with her that Hagar fled into the Wilderness of Shur. There she met an angel who announced that she should return to her mistress and that she would bear a son, to be named Ishmael, from whom would spring many descendants.

In Gen. 21:8–21 Hagar is back in Abraham's household. Some time has passed and Sarah has given birth to Isaac. Sarah felt that Ishmael threatened Isaac's position as heir, so she urged Abraham to expel Hagar and Ishmael. He acquiesced only after God assured him that he should heed Sarah, for Abraham's main line of descent was to be through Isaac, although God would also make a nation from Ishmael's descendants. Hagar was sent away with some bread and water and her child. When the provisions were used up and the child's death seemed imminent, an angel appeared and reassured Hagar that the child would produce a great nation. A well of water appeared and she gave her son water to drink. Ishmael grew up and became an archer in the Wilderness of Paran and married an Egyptian woman.

These stories show that Ishmael's descendants, the bedouins living to the south of the Israelites, were of the same stock as the Hebrews but from a religiously less important branch of the family. The inferiority of Hagar and Ishmael is used allegorically in the NT by Paul (Gal. 4:21–31). A.B.

Haggadah (huh-gah´duh; Palestinian Talmud: "Aggadah"), the interpretation of the historical and religious passages of Jewish Scripture that are not legal in character. Haggadic texts often supplement the biblical narrative. A rich variety of Jewish "retelling" of the tradition comes under the category "Haggadah." Chronicles is sometimes described as a "historical midrash" (i.e., commentary) on the earlier historical writings. Hellenistic Jewish historians such as Josephus and Philo and writings such as the Apocrypha, the Pseudepigrapha, and the Dead Sea Scrolls all contain a wealth of haggadic material. Many stories and legends came to be told about such central figures in Israel's history as Adam, Enoch, Abraham, Joseph, and Moses.

Some NT examples of haggadic material about Moses show that its writers were familiar with such traditions. 2 Tim. 3:8 gives the names of the Egyptian sorcerers defeated by Moses, namely, Jannes and Jambres. Several writers refer to a tradition that the Law was given by angels rather than God (Gal. 3:19; Acts 7:53; Heb. 12:2). The water-giving rock is said to have accompanied the children of Israel on their journey (1 Cor. 10:4). Jude 9 refers to a legend that the archangel Michael and Satan struggled over the body of Moses.

Unlike the strict logic of legal interpretation, Haggadah could give free play to the imagination. Haggadic expositions are not bound to the previous tradition. However, the story had to remain within the bounds of what was acceptable to the religious community. ***See also*** Halakah. P.P.

Haggai (hag´*i*; Heb., "festal," "of a festival"), an OT prophetic book and the prophet named in that book who, with Zechariah, is also mentioned in Ezra 5:1 and 6:14; he is one of the twelve so-called minor prophets. There is no biographical material given in either book and, as a result, we know little more than the prophet's name. The framework to the book associates the message with dates in the second year of Darius I (about 520 B.C.). The similarity of this material to elements in the Priestly Code, the last of the four Pentateuchal sources, and also to Chronicles, suggests that this framework may be of later, editorial, origin.

The message is given to Zerubbabel and Joshua the high priest, and (in 1:12; 2:2) to the

"remnant of the people." The first section (1:2–11) associates failure to rebuild the Temple with drought and agricultural disaster which has its origin in divine judgment. The second section (1:12–14) tells of the rebuilding as the response of leaders and people to the divine messenger (v. 13). The date in 1:15 is fragmentary and does not enable us to date the material with any accuracy. The next section (2:2–9) develops the Temple theme. The contrast between the glorious former Temple and the modest restored Temple will be reversed in the splendor of the new building. Both 2:6–7 and 2:21–22, with their picture of upheavals among the nations, may reflect the political uncertainties in Darius I's struggle to achieve supremacy. They also suggest a theophany, a divine intervention in human affairs. 2:10–14 use a priestly decision to comment on the people's life. While these verses can be interpreted in a variety of ways the most probable interpretation is that they criticize false trust in the rebuilt shrine. 2:15–19 speaks again of former disasters and present blessings (see 1:2–11). The book concludes (2:20–23) with a strongly worded hope centered on Zerubbabel as the divinely chosen Davidic leader, the "servant," the "signet ring," royal executive of God.

Central to Haggai's message is a concern for the priority of the rebuilt Temple and for a purified and faithful community. This message is set in the framework of this community as the true remnant of God's chosen people and as the recipient of glorious hopes for the future. Because Haggai emphasizes that God will keep his promises, later readers can also find a message of hope for their own day. ***See also*** Darius; Sources of the Pentateuch; Temple, The; Zechariah; Zerubbabel.

Bibliography

Coggins, R. J. *Zechariah, Malachi.* Sheffield: Academic Press, 1987.

Meyers, C. L. and E. M. *Haggai, Zechariah, 1–8.* Garden City, NY: Doubleday, 1987. P.R.A.

OUTLINE OF CONTENTS

The Book of Haggai

I. God's call to repair the Temple (1:1–11)
   A. The need to repair it (1:2–6)
   B. Problems caused by failure to repair it (1:7–11)
II. Response to God's call (1:12–15)
III. Future glory of the Temple (2:1–9)
   A. God will fulfill his promise (2:1–5)
   B. Future splendor of the Temple (2:6–9)
IV. God's promise of blessing to come with Temple repair (2:10–19)
   A. Former misery (2:10–17)
   B. Future blessing (2:18–19)
V. God's confidence in Zerubbabel (2:20–23)

Haggith (hag´ith; Heb., "festive"), one of David's wives and the mother of his fourth son, Adonijah (2 Sam. 3:4).

Hagiographa (hag´ee-og´ruh-fuh; Gk., "sacred writings"), the final section of the Hebrew Bible in the tripartite arrangement attested before the rise of Christianity and maintained in Jewish versions to this day. This arrangement apparently reflects the three stages whereby the canon came into being. The Greek-derived name corresponds to the Hebrew *Kethubim* ("writings"), reflecting the miscellaneous character of these books, which include what the early rabbis called the "three big writings" (Psalms, Proverbs, Job), the later collection of "five scrolls" (Heb. *megillot*) arranged in order of the holidays at which they are read in the synagogue (Song of Songs, Ruth, Lamentations, Ecclesiastes, and Esther), and historical-narrative books (Daniel, Ezra-Nehemiah, and Chronicles). The section is called by a variety of names in the earliest sources, including "wisdom of the ancients" (Ecclus. 39:1), "writings of David" (2 Macc. 2:13), "Psalms" (Luke 24:44), and "other books" (introduction to Ecclus.; see also Josephus *Against Apion* 1:8 and Philo *On the Contemplative Life* 3), reflecting its still fluid contents, a condition that may also be mirrored in rabbinic uncertainty as to the canonicity of Song of Songs, Ecclesiastes, and Esther. The sequence of this group of eleven books, which does not exist as a discrete entity in the Christian canon where the books are arranged generically, was still not fixed in the Middle Ages. ***See also*** Bible; Canon; Old Testament.

F.E.G.

Hagrites (hag´rīts), the name of a tribe with whom the eastern Israelite tribes of Reuben, Gad, and the eastern half-tribe of Manasseh fought and whom they eventually defeated in the time of Saul (ca. 1000 B.C.). Their territory lay east of the Jordan beyond Gilead in northern Arabia (1 Chron. 5:10, 19–20). The similarity of the names Hagrite and Hagar, Sarai's handmaid who bore Ishmael to Abraham (Gen. 16:1, 15), suggests to some scholars that the early Jewish historians saw some connection between this tribe and the Ishmaelites; however, such a connection is not certain. The Hagrites are listed with the traditional enemies of Israel, including the Ishmaelites (Ps. 83:6), although Jaziz the Hagrite was the overseer of the royal flocks under David (1 Chron. 27:30 [v. 31 in some versions]), and another Hagrite may have fought with David (1 Chron. 11:38, although "Gadite" in 2 Sam. 23:36). ***See also*** Ishmaelites. D.R.B.

Hai (hī). ***See*** Ai.

hail (hayl), ice pellets formed when raindrops are thrown through alternating warm and cold air currents. Usually destructive to plants, hail

is seen as a plague (Exod. 9:18–34; 10:5–15), as divine judgment (Hag. 2:17), as a destroying power (Isa. 28:2, 17), and always as part of violent storms (Pss. 148:8; 105:32; 78:47–48; cf. Rev. 8:7; 11:19).

hair, outgrowth from the head or elsewhere on the body. Several men in the Bible are known for their hairiness or their long hair. Esau's hirsuteness (Gen. 25:25; 27:11) contrasts with Jacob's smoothness and also links him phonetically with the place in which he ultimately settled: Se'ir (Gen. 36:8) has the same consonants as se'ar, "hair." The prophet Elijah was apparently identified by his hairiness (or perhaps his mantle, 2 Kings 1:8). Absalom's long, thick hair is a mark of handsomeness (2 Sam. 14:26) and also figures in his death—he was caught by the "head" in a terebinth (2 Sam. 18:9). Samson's long hair was the source of his strength. When it was shaved he was helpless (Judg. 16:17), but when it grew back (Judg. 16:22) he was able to pull the temple of Dagon down upon the Philistines.

Samson had long hair because he was a Nazirite (Judg. 13:5), a group whose vows included the injunction that "no razor shall come upon his head" (Num. 6:5; cf. 1 Sam. 1:11). The hair of the Nazirite was left uncut for the duration of his vow; when the period of Nazir-ship came to an end, either because the vow was fulfilled or through defilement (accidental contact with a corpse), his head was shaved and the hair offered as a sacrifice (Num. 6:9–18).

Shaving of the body was part of the purification of Levites (Num. 8:5–7), but a priest was not to make his head bald or shave the corners of his beard (Lev. 21:5). Priests in Ezekiel's description of the Temple were not to shave their heads or let their hair grow long (Ezek. 44:20). According to another priestly rule, lay Israelites were forbidden to cut the hair of their temples or beard (Lev. 19:27). Shaving was connected with the cure from leprosy (Lev. 13:33; 14:8–9), and shaving is also mentioned in various contexts in connection with mourning (Job 1:20; Isa. 15:2; Jer. 41:5; 47:5; 48:37; Ezek. 7:18). It is likely that the shaving of captive women (Deut. 21:12–13) is a sign of their mourning.

Disheveled hair was a sign of public shame. Thus the leper's hair was loosened (Lev. 13:45), as was the hair of a woman accused of infidelity (Num. 5:18). A priest's hair could not be let loose (Lev. 21:10, cf. Lev. 10:6).

One from whose head not one hair shall fall is one who is safe from harm (1 Sam. 14:45; 2 Sam. 14:11; 1 Kings 1:52; cf. Luke 21:18; Acts 27:34). The hairs of the head may be used to represent a large number (Pss. 40:13; 69:5); that their number is known to God Jesus cites as a sign of his care (Matt. 10:30; Luke 12:7). Wiping Jesus' feet with their hair was a way two women showed him their devotion (Luke 7:38; John 12:3). A.B.

Hakkoz (hak´oz; Heb., "the thorn"; possibly also Koz, Accos). **1** The seventh priest chosen by lot in David's time, reported in postexilic records (1 Chron. 24:10). **2** The father of descendants who could not prove their Israelite ancestry (Ezra 2:61; Neh. 7:63). **3** The grandfather of Meremoth who made repairs near the Fish-Gate in rebuilding Jerusalem (Neh. 3:4, 21). Opinions divide on whether these all refer to the same or to different families.

Halah (hay´luh), a region in Assyria to which Israelite exiles were deported by the triumphant Assyrian kings (Pul, Tilgath-pilneser, 1 Chron. 5:26) who overthrew Samaria in 722 B.C. (2 Kings 17:6; 18:11; Obad. 20). Its exact location in Mesopotamia is still a matter of dispute among scholars, though a location in the north, near Nineveh, seems most likely.

halakah (hah´lah-kah´; from Heb. *halak*, "to walk, go, follow"), in Judaism the teaching one

From left to right: Head of one of the "Sea Peoples" (Philistines) captured by Ramesses III. He is beardless and wears a high feathered helmet; Medinet Habu, twelfth century B.C. Life-sized head of the Persian king Darius. His elaborately curled beard extends to his chest, his hair is arranged in ringlets in front and hangs in a bun at the back, and his mustache is curled at the tip; Behistun, fifth century B.C. The Assyrian king Tiglath-pileser III with long flowing hair and beard; copy of a wall painting from Tell 'Ahmar, eighth century B.C. Head of a Mede with pointed beard, mustache, and hair bunched at the neck—all elaborately curled; Persepolis, fifth century B.C.

is to follow, the rules or statutes that are to guide a person's life. In the first instance, the ancient interpretation of the legal texts of the Torah (the first five books of the OT) sought to expound the consequences of individual commandments, the cases in practical life to which they applied, and how they might be accurately observed. However, halakic interpretation had to solve a number of difficulties: it had to eliminate discrepancies within the Law itself by determining an authoritative interpretation; in cases where the changed conditions of life made literal observance impossible or extremely inconvenient it had to show how one could "obey" yet not violate the wording of the Torah; and in cases where the written (and oral) tradition was incomplete, it had to establish a tradition. A considerable portion of Jewish Law was not directly connected with the Torah but has been established by custom, habit, or long-standing legal tradition. However, halakah is always understood to be a restatement of the Torah.

Hillel, a late first century B.C. rabbi, is said to have given seven rules for providing evidence in reaching a halakic decision: (1) arguing from a lesser case to a greater; (2) using an inference based on analogy; (3) deriving a legal principle from one text in the Torah; (4) deriving a principle from two texts; (5) making a general case more precise using a particular instance or defining a general case on the basis of a particular; (6) using similarities between two passages to provide one passage with a more precise definition; and (7) understanding the matter from its subject. These rules were later expanded into thirteen by dividing the fifth rule into eight more specific applications and dropping the sixth rule.

Since the Torah was to be the foundation of all Jewish life, halakic interpretation was in principle unending. The rabbis devoted much of their effort to religious matters such as precepts about sacrifices, about the Sabbath and other festivals, about dues to the Temple, and about tithes, offerings for firstborn, first fruits, vows, and other voluntary offerings. In the area of civil law, marriage receives the most attention. Criminal law is least developed in Talmudic sources, since it was frequently in the hands of those who ruled over the Jewish people, e.g., the Romans.

Examples of halakic debate between Jesus and the Pharisees are found in such NT passages as the story of plucking grain on the Sabbath (Matt. 12:1–8), the healing of the man with the withered hand (Matt. 12:9–12), and Jesus' teaching about divorce (Matt. 19:1–9). ***See also*** Haggadah. P.P.

hallel (hal´el; Heb., "praise"). ***See*** Hallelujah.

hallelujah (hal´uh-*loo*´yuh; Heb., "[let us] praise the Lord"), in the Hebrew Bible, a word restricted to Psalms, where it occurs only in Pss. 104–150. It is used twenty-three times as the introduction or conclusion of a psalm and, contrary to the rules of Hebrew grammar, is written as one word, though this practice was not universally accepted in the Talmudic period. Only in Psalm 135:3, where "hallelujah" is an intrinsic part of a verse rather than an introduction or conclusion of a psalm, is it written as two words. Both the Septuagint and Vulgate transliterate the word rather than translate it. These factors suggest that "hallelujah" was a religious cry, probably used to encourage audience participation in the liturgical recitation of psalms. Later, "hallelujah" became a stereotyped cry of joy; the Jews of Alexandria sang it after being saved from annihilation by the Egyptians (3 Macc. 7:13) and it introduces the angelic praise of God in Rev. 19:1–8. The recitation of the word "(h)allelujah" played an important role within the early church liturgy. M.Z.B.

hallow, to make holy or to set apart for special service. In the OT hallow is used to render a form of the Hebrew word *qādēsh,* the primary meaning of which is "separation" or "setting apart." In its various forms the Hebrew word is also translated as "holy," "holiness," "consecrate," "sanctify," "dedicate," "purify," or something similar. Thus, a "hallowed thing" was something set apart for a special use or purpose, such as the gifts Israel dedicated to God (Exod. 28:38) or the Jubilee Year (Lev. 25:10), and "to hallow" (consecrate, sanctify) persons or things was to remove them from the realm of ordinary profane labor or use to that of the sacred, such as the consecration of Aaron's sons as priests (Exod. 29:1; cf. 20:11). Associated with this appointment for special use was a sense of respect and reverence, clearly seen in the application of the term "hallowed" to God's name, which was understood to be in the sacred realm and therefore deserving of special reverence (Matt. 6:9; Luke 11:2). ***See also*** Holiness; Sanctification. D.R.B.

Ham (ham). **1** In the Priestly notices of Gen. 5–10, Noah's second son (between Shem and Japheth) and the father of Cush, Egypt, Put, and Canaan. In Gen. 9:20–27 (attributed to J), disrespect for Noah by Ham, there his youngest son, earns Noah's curse on Canaan. Since the curse subordinates Canaan to both Shem and Japheth, perhaps the narrative was originally about Canaan, too. Occasionally Ham is a synonym for Egypt, one of Ham's sons. **2** A city of the Zuzim in Transjordan (Gen. 14:5).

Haman (hay´muhn), the villain in the book of Esther, who was appointed prime minister by the Persian ruler Ahasuerus. He plotted to destroy all Jews when Mordecai the Jew refused to prostrate himself before him. Esther and Mordecai collaborated to defeat Haman, and the tables

were turned when he was hanged on the gallows he had erected for Mordecai; Mordecai then assumed Haman's office and estate.

Haman is called an Agagite (Esther 3:1) and Mordecai is placed in the line of Kish (Esther 2:5), linking their enmity with that of Agag the Amalakite and Saul son of Kish (1 Sam. 15). ***See also*** Esther; Mordecai; Purim, The Feast of.

W.L.H.

Hamath (hay´math), a city (modern Hama) on the Orontes River in Syria between Damascus and Aleppo; it also designated the district of which Hamath was the capital. Excavations have shown that the city was inhabited almost continually from the Neolithic period (ca. 8000 B.C.) to the present. Because of its strategic location and political importance it is mentioned frequently in extrabiblical sources (including a number found at Hamath itself) beginning in the first millennium as well as in the Bible. The first known ruler of Hamath was Toi (2 Sam. 8:9), who sent David gifts after the latter's victory over Zobah. According to 2 Chron. 8:3–4 Solomon captured Hamath-zobah, probably an inaccurate designation of Zobah loosely based on David's campaign, and built store-cities in Hamath, which is historically questionable. During the Assyrian period Hamath figured prominently in the Assyrian annals; Sargon II (ca. 722–705 B.C.) describes himself as "the destroyer of Hamath." Following usual Assyrian practice, inhabitants of Hamath were deported to Samaria after its capture (2 Kings 17:24), and apparently Israelites were exiled to Hamath (Isa. 11:11). The phrase *lebō'-ḥamāt* (RSV: "the entrance of Hamath," Num. 13:21; Josh. 13:5) refers to a town (modern Lebweh) within the jurisdiction of Hamath but considerably to its south; it was the traditional northern limit of Israel's territory (see Num. 34:8; Ezek. 47:15). ***See also*** Zobah.

M.D.C.

Hammath (ham´ath). **1** A town on the west shore of the Sea of Galilee, a mile south of Tiberias where there are hot springs. It was part of Naphtali (Josh. 19:35) and perhaps the same as Hammoth-Dor (Josh. 21:32) and Hammon (1 Chron. 6:76). The springs are claimed to be the earliest known thermal baths in Palestine; Herod Antipas was probably the first to exploit them. **2** The proper name of the father of the house of Rechab (1 Chron. 2:55), or, as recently interpreted by some scholars, the "family (in-law)" of the father of the house of Rechab.

Hammedatha (ham´uh-day´thuh), the father of Haman, the Persian official of King Ahasuerus who attempted to exterminate the Jews (early fifth century B.C.; Esther 3:1; 8:5).

hammer, a striking tool used to fracture or to transmit force to a spike or other object. It could be used for murder (Judg. 4:21; 5:26, RSV: "mallet"), stonecutting (1 Kings 6:7), jewel-working (Isa. 41:7), woodworking (Jer. 10:4), or breaking rock (Jer. 23:29). It is a symbol of power (Jer. 51:20); when broken, it becomes a figure for helplessness or weakness (Jer. 50:23).

Hammon (ham´uhn; Heb., "hot spring"?). **1** An Asherite town (Josh. 19:28), probably modern Umm el-'Awamid near the Mediterranean coast fifteen miles north of Acco. **2** A yet unidentified levitical town of the Gershomites (1 Chron. 6:76) in Naphtali.

Hammoth-dor (ham´uhth-dor). ***See*** Hammath.

Hammurabi (ham´uh-rah´bee; alternate spelling, Hammurapi), the most famous member of the first dynasty of Babylon. The members of the dynasty were of Amorite stock. Under this Old Babylonian dynasty (1894–1595 B.C.) the once unimportant city of Babylon became a new, major center for the first time and started taking on the appearance of a national capital. Hammurabi ruled for forty-three years (1792–1750) and eventually unified the country under the rule of Babylon. Though his military and diplomatic achievements do not seem to have lasted much beyond his reign, he transformed a small city-state into a large territorial state, created the prototype or even the pattern of the country of Babylonia with its capital in Babylon, and shifted the balance of

Hammurabi (left), king of Babylon (1792–1750 B.C.), worships the god Shamash in a detail from the upper part of Hammurabi's stele found at Susa. (A full view is included with the color photographs.)

activity and power to the north. Babylon now began to gain the power and prestige that allowed it to eclipse the southern centers as well as Nippur; and in later periods of Assyrian domination, the Assyrian conquerors found themselves compelled to work out various plans of accommodation with the city and the political, cultural, and religious forces that it came to represent.

Hammurabi's activities and times are known to us from year names, royal inscriptions, administrative and legal texts, literary texts, and, most of all, numerous letters and the rightly famous "Code of Hammurabi." The letters and the code have become the standard for what is now treated as the classic form of the Akkadian language.

Letters from Mari inform us of diplomatic and political events; letters from such centers as Larsa reveal the intricacies of local administration under Hammurabi and of Hammurabi's personal involvement. He seems to have devoted much attention and energy to administrative and judicial details. His style of government was similar to that of other successful contemporaries. His involvement in the execution of justice and in matters of routine administration seems to indicate a concern for an effective and just governance and for the public perception of such concern. His concerns conform to and continue the earlier tradition and ideal of the king as the one responsible for the peace, well-being, and justice of the land and its inhabitants.

Hammurabi's concern for justice finds its finest expression in what is the single most important document of his period, the Code of Hammurabi. Written near the end of his reign, the code is attested on stelae and tablets from the Old Babylonian and later periods. The most important witness is the stele found in Susa, where it had been moved by Elamites in the twelfth century B.C. The code comprises a prologue that catalogues Hammurabi's conquests of the various cities and his care of their cults, 282 paragraphs—the paragraph divisions are modern—presenting the laws in casuistic or case form, and an epilogue emphasizing the significance of this promulgation of justice. However, the term "code" is a misnomer; the document is neither a code in the accepted sense of the word nor even a collection of actual laws. The format of the code is not new with Hammurabi. This type of document, as well as individual representatives, derives from misharum edicts (adjustment of prices and wages, remission of debts and obligations) promulgated at the beginning of a reign in order to alleviate distress and create a new socioeconomic balance. Yet the code is a literary document whose publication was intended to mark Hammurabi as a good shepherd of his people and a model of a just king, for his generation and for generations to come. In part, the text takes the form of a royal inscription encasing laws rather than campaigns. Incorporating *misharum* materials as well as legal formulations of earlier collections, the code may perhaps also include examples of customary law, outstanding precedents, and innovations.

Most of all, however, it is a work of legal and literary scholarship. And certainly the code of Hammurabi is fuller and more elegantly articulated and arranged than earlier texts. It is a monument to the legal speculation of the period. Scribal scholarship is here seen at work: the legal mind plays out various possibilities, including the theoretical and/or the unlikely, and thereby examines cases that are extreme or unusual but logical alternatives to previously stipulated situations in order to explore, exemplify, and even invent principles. The code is not binding and does not necessarily reflect actual practice; it is, however, a literary and intellectual construct that gives expression to legal thinking and moral values. The importance of the Code of Hammurabi for the interpretation of such biblical collections as the Covenant Code (Exod. 21–23) can hardly be exaggerated. ***See also*** Babylon.

I.T.A.

Hamor (hay'mor), the Hivite ruler of Shechem (Gen. 34:2) from whom Jacob bought a piece of land (Gen. 33:19) where Joseph's remains were later buried (Josh. 24:32; cf. Acts 7:16). Hamor died when his son Shechem raped Dinah, the daughter of Jacob and Leah, and her brothers attacked the city in revenge (Gen. 34).

hamstring (KJV: "hough"), to cut the tarsal joint tendons, preventing an animal from being able to walk (Josh. 11:6, 9; 2 Sam. 8:4; 1 Chron. 18:4).

Hamul (hay'muhl; Heb., "spared"), the son of Perez and grandson of Judah (Gen. 46:12); he was the head of the clan of the Hamulites (Num. 26:21).

Hanamel (han'uh-mel), the son of Shallum and the cousin of the prophet Jeremiah. Hanamel sold a field to Jeremiah according to the laws of redemption. Its purchase at the time the Babylonians were laying siege to Jerusalem (ca. 588 B.C.) became a symbol to Jeremiah of God's promised restoration of Israel (Jer. 32:7–15). The transaction is also of interest because it sheds light on the legal system then in operation.

Hanan (hay'nuhn). **1** One of David's warriors (1 Chron. 11:43). **2** A Benjaminite (1 Chron. 8:23). **3** A descendant of Saul (1 Chron. 8:38; 9:44). **4** The head of a prophetic guild in the

time of Jeremiah (Jer. 35:4). **5** The head of one of the families of "Temple servants" after the Exile (Ezra 2:49; Neh. 7:49). **6** A Levite who interpreted the law (Neh. 8:7) and subscribed to Ezra's covenant (Neh. 10:10). **7** The assistant to the Levites appointed by Nehemiah as Temple treasurers (Neh. 13:13). **8** Two of "the chiefs of the people" who subscribed to Ezra's covenant (Neh. 10:22, 26). P.K.M.

Hananel (han´uh-nel; Heb., "God is gracious"; KJV: "Hananeel"), a tower repaired by Nehemiah (Neh. 3:1; 12:39) in the north wall around Jerusalem near the northeast corner (Jer. 31:38; Zech. 14:10). It flanked an approach to the Temple and is named for an unknown person.

Hanani (huh-nay´n*i*; Heb., a shortened form of Hananiah, "God has favored me [with a child]"). **1** A musician, the son of Heman, a contemporary of David (1 Chron. 25:4). **2** A prophet who rebuked the Judean kings Asa (2 Chron. 16:7) and Jehoshaphat (2 Chron. 19:2) and whose son Jehu rebuked the Northern king Basha (1 Kings 16:1). **3** A postexilic priest who married a foreign wife (Ezra 10:20). **4** Nehemiah's brother or kinsman (Neh. 1:2). **5** A musician who helped Nehemiah restore Jerusalem's wall (Neh. 12:36). Perhaps the sentiment which the name conveyed made it so popular among the Israelites. M.Z.B.

Hananiah (han´uh-n*i*´uh; Heb., "God has favored me [with a child]"), a name borne by at least ten biblical personages. Two are well known. **1** Hananiah, the son of Azur, who died for falsely prophesying against Jeremiah (Jer. 28). **2** Hananiah, also called Shadrach, one of Daniel's three friends who was miraculously saved from the fiery furnace (Dan. 1–3).

hand (Heb. *yadh*; Gk. *cheir*), a term occurring approximately fifteen hundred times in the Bible meaning, among other things, hand, side, and power. It can operate on behalf of the whole person, frequently as a substitute for an individual's activities, dealings, and even spiritual impulses. Offering one's hand indicates a token of sincerity and willingness to help another (2 Kings 10:15). Conversely, the hand is the means of murder (Gen. 4:11) and retaliation (Exod. 21:24; Deut. 25:11). The hand's ability to seize, control, or manipulate explains its association with strength or power. The hand of God, a prominent Jewish symbol and popular motif for later Christian iconography, symbolizes God's sovereign power (Deut. 3:24; Job 19:21; Heb. 10:31; 1 Peter 5:6). God's hand governs the forces of history (Exod. 13:3, 14; 1 Sam. 5:9; Ps. 8:7) and strengthens believers (Mark 6:2; Acts 5:12). The NT places Jesus at the right hand of God, the side of authority and power (Mark 12:36; Acts 2:25; Heb. 1:3; cf. Ps. 110:1, 5; Dan. 7:13).

The hand's equation with power or strength helps explain such phrases as "the hand of the tongue" (Prov. 18:21 [RSV: "power of the tongue"]; cf. Josh. 8:21) and "to raise the hand," meaning a revolutionary uprising (1 Kings 11:26). Job is placed in Satan's hand, i.e., under his domain and authority (Job 2:6; cf. Jer. 22:3; Matt. 26:45). "Hand" can also substitute for a personal pronoun (Lev. 8:36; Isa. 35:3).

As a ritual the "laying on of hands" occurs frequently in the sacrificial cult (Lev. 16; Num. 8) and serves as a form of ordination (Num. 27:18; Deut. 34:9; 1 Tim. 4:14). It may also impart a blessing (Gen. 48:18; Isa. 44:3; Matt. 19:13). Healing the sick is closely associated with the hand in the NT, indicating the transference of spiritual and physical wholeness (Mark 5:23; Luke 13:13). The hand transmitted power, authority, and the Holy Spirit after baptism (Acts 8:7; 19:6; Heb. 6:2). It symbolizes betrayal (Matt. 26:23), apocalyptic power (Mark 1:31), ritual purity (Mark 7:2), and persecution (Luke 21:12; Acts 13:3). D.R.E.

handkerchief, a small piece of cloth used by the Romans primarily for wiping the face and hands. The Jewish community also used the handkerchief for this purpose, but several examples in the NT show that the cloth could serve other functions as well. In Luke 19:20, this word is used for a cloth in which money is stored (KJV and RSV: "napkin"). In John 11:44 and 20:7, the same word refers to a cloth that is placed over the face of a dead person (KJV: "napkin"; RSV: "cloth" in 11:44 and "napkin" in 20:7). In a different vein, handkerchiefs that had come into contact with Paul were believed to have healing power (Acts 19:11–12). ***See also*** Napkin. J.M.E.

hanging, a method of execution in which the victim is suspended from a rope around the neck. Hanging was not a method of execution in the Bible; rather, executed people were hung after death. Thus Joshua hung the corpse of the king of Ai (Josh. 8:29) and of the five anti-Gibeonite kings (Josh. 10:26), and David hung the corpses of Rechab and Baanah (2 Sam. 4:12). The custom was also known among the Egyptians, for Joseph predicted that Pharaoh would hang the baker (Gen. 40:19). Later on Persians were impaled (Herodotus 3.115, 159), and we do not know whether the hangings in the book of Esther (Esther 2:23; 5:14; 7:9, 10; 9:13–14) were hangings or impalings. Hanging is permitted in the book of Deuteronomy (Deut. 21:22–23) with the proviso that the corpse be taken down before evening to avoid contaminating the land; the corpses hung by Joshua were left only until evening (cf. the removal of Jesus from the cross, Matt. 27:57). There is a second Hebrew verb (*yoqi'a*) that may refer to either hanging or impaling; the procedure was used by the Philistines (1 Sam. 31:10) and the

Gibeonites (2 Sam. 21:10–14). According to Mishnah *Sanhedrin* 6:4, in later Israel only those criminals executed by stoning were hanged; according to the first-century historian Josephus (*Antiquities* IV viii 24), all executed criminals were. T.S.F.

hangings, the usual translation of a Hebrew term for the fabric forming the walls of the tabernacle court (Exod. 27:9–18; 35:9; 38:12–18; 39:40). Stretched along the perimeter of the 100 × 50 cubit enclosure (about 150 × 75 feet), the hangings were attached at intervals to pillars 5 cubits (about 7.5 feet) in height. Additional hangings flanked the courtyard gate. Like the material enclosing the tabernacle itself (RSV: "curtains") and that of the embroidered "screens" (RSV; cf. KJV: "hangings") at the door of the tent and at the courtyard gate, the hangings were made of a fine-twined linen (Heb. *shaysh*) which bespeaks an Egyptian origin; but the brilliant colors (blue, purple, and scarlet) of the hangings are more akin to color words and preferences of the Syro-Mesopotamian world.

Two other examples of hangings, for which the Hebrew word differs, occur in the Bible: in 2 Kings 23:7, women weave hangings for the Asherah, presumably to drape the goddess's cult image or pole; and Esther 1:6 describes blue hangings that adorn the royal garden for a magnificent banquet. ***See also*** Tabernacle. C.L.M.

Hannah (han´uh; Heb., "grace"), wife of Elkanah and mother of the prophet Samuel (1 Sam. 1:2, 20). On an annual pilgrimage to God's shrine at Shiloh, Hannah vowed that if she bore a son, she would dedicate him to God. This granted, she named him Samuel, and when she had weaned him, she fulfilled her vow. Hannah later bore three sons and two daughters (1 Sam. 2:21). To Hannah is attributed a prayer (1 Sam. 2:1–10) whose words constitute a song of praise to God, who metes out justice to all the world in accordance with his unique wisdom: abasement of the mighty and exaltation of the lowly, death and life God alone dispenses; his enemies are doomed, but his faithful ones are protected. The theme, the reversal of human fortunes, is encountered in other Psalms and in Wisdom literature (e.g., Ps. 113:5–9; Eccles. 10:5–7; cf. Luke 1:51–53). S.G.

Hanoch (hay´nok). **1** The son of Midian and grandson of Keturah and Abraham (Gen. 25:4; 1 Chron. 1:33). **2** The son of Reuben who went with Jacob to Egypt (Gen. 46:9; Exod. 6:14). **3** The head of the clan of the Hanochites who left Egypt with Moses (Num. 26:5).

Hanukkah (hahn´uh-kuh). ***See*** Dedication, Feast of.

Hanun (hay´nuhn; Heb., "gracious"). **1** The Ammonite king whose insult to David's servants led to war and defeat resulting in slavery (2 Sam. 10:1–19; 1 Chron. 19:1–19; 2 Sam. 11:1; 12:26–31). **2** A man of Zanoah who repaired the Jerusalem city wall and gate (Neh. 3:13, 30).

Haran (hair´uhn), a city located in northern Mesopotamia about sixty miles above the confluence of the Balikh and Euphrates rivers. Haran was an important center of religious and political activity for the Hurrians, who dominated this region in the middle of the second millennium B.C. Haran is well attested in the archives from Nuzi, which provide an ample picture of Hurrian life at this time. Haran becomes an important commercial center in the first millennium B.C. Activity there is mentioned in Ezek. 27:23. The city, sacred to the moon god, may have been the king's residence in the last decades of Assyrian rule, when the moon god's term was assumed to have begun.

In the period of Assyrian domination, the governor of Haran was a powerful official. He was the commander-in-chief of the Assyrian forces and was appointed by the king. In the practice of naming years after officials in the kingdom, the rotation of the commander-in-chief followed that of the king.

Following the fall of Nineveh in 612 B.C., the remaining Assyrians fled to Haran for refuge. In spite of support from the advancing forces of Pharaoh Neco, the Assyrians, under Ashuruballit (611–610 B.C.), were unable to stave off the attack from a coalition of Medes, Scyths, and Babylonians who were under the leadership of Nabopolassar. 2 Kings 19:12 mentions the destruction of Haran by this coalition.

Haran was an important center for the worship of the moon god, Sin. Two dedicatory stelae report the rebuilding of the Sin temple, Ehulhul, by Nabonidus (555–539 B.C.), the last native Babylonian king. This follows Nabonidus' ten-year absence from Babylon, reported in these stelae, at the command of Sin after the god decimated the populations of urban centers that had sinned against him. At the order of Sin, Nabonidus installed the cult figures of Sin and other lunar deities in Haran on a permanent dais. The biographical text of Adad-guppi, Nabonidus' mother, reports how Sin abandoned Haran. Her report includes a record of her devotion to the moon god's cult, in spite of his decline, and her procurement for Nabonidus of the right and distinction to return Ehulhul to its former glory and to restore the cult images to their proper places.

Haran figures prominently in the patriarchal narratives and in the attempts at historical reconstruction of the patriarchal period. In addition to Haran, the father of Lot and brother of Abram (Gen. 11:31), the names of several of Abram's relatives are the names of cities or towns in the region of Haran: Peleg, a distant

ancestor (Gen. 11:18); Serug, Abram's great-grandfather; Nahor, his grandfather and his brother; and Terah, his father (Gen. 11:22–29). Terah took his household to Haran after leaving Ur of the Chaldees (Gen. 11:31–32) and died in Haran. Abram left Haran for Canaan at God's instruction (Gen. 12:1), gathering with him his sizable household and considerable wealth, amassed while in Haran (Gen. 12:4–5). Abraham sent his servant back to the region of Haran to procure a wife for his son Isaac (Gen. 24:10).

Jacob is instructed by Rebecca to return to Haran as a place of refuge following his appropriation of Esau's birthright (Gen. 27:43; 28:10). In Haran, he took his wives and fathered the sons who would become the fathers of Israel's tribes. Laban (Heb., "white"), the name of Jacob's uncle, is attested in Mesopotamian texts of the sixteenth century B.C. as an epithet of the moon god.

The association of Haran with Ur of the Chaldees has fueled scholarly debate about the actual location of Ur. Some would locate Ur in the region of Haran, arguing that Ur does not become a Chaldean outpost until the late first millennium B.C., long after the patriarchal narratives occurred, and that Ur, in southern Mesopotamia, is too far from Haran. However, Ur, an important urban center in Sumerian times, was the center of worship of the moon god in southern Mesopotamia. Its ziggurat (temple with each higher level stepped in from the lower) to the moon god was built at the end of the third millennium B.C. The destruction of Ur by the Elamites in the early second millennium B.C. would have provided impetus for Terah's departure for Haran around this time along an established trade route. ***See also*** Abraham; Ur. L.E.P.

Hararite (hair'uh-r*i*t), name of a clan or a place from which some of David's elite guard ("Thirty") came. **1** Identification of the descent of Shammah, third of the three closest of David's bodyguards (2 Sam. 23:11). **2** Identification of the descent of Jonathan, son of Shammah (2 Sam. 23:33), and Ahiam, son of Sharar (2 Sam. 23:33), members of David's "Thirty." They are probably identical to Jonathan, son of Shagee, and Ahiam, son of Sachar (1 Chron. 11:34, 35).

hare, any herbivorous rodent of the family Leporidae, in Palestine either *Lepus europaeus judaeus* or *Lepus syriacus*. It was considered unclean (Lev. 11:6; Deut. 14:7) for an inaccurate reason, namely, the assumption that a hare chews the cud.

Harim (hair'im; Heb., "consecrated" or "dedicated"). **1** A priest, descendant of Aaron and head of the third group of priests (1 Chron. 24:8). Any of the following could be descendants of his family. **2** A family group ("sons of Harim") who returned from the Babylonian captivity with Zerubbabel (Ezra 2:32); this is probably the same family who had eight members condemned by Ezra for taking foreign wives (Ezra 10:31). **3** A much larger priestly family group who returned with Zerubbabel (Ezra 2:39); five members of this family took foreign wives (Ezra 10:21). The family group headed by Adna could be this group or 2 above (Neh. 12:15). **4** A member of the postexilic community who signed the covenant to keep the law (Neh. 10:5). **5** A leader of the people who also signed the covenant (Neh. 10:27). **6** The father (ancestor?) of Malchijah, one who helped repair the walls of postexilic Jerusalem (Neh. 3:11). He could be either one of the men above (4 or 5) or "son of Harim" may simply designate Malchijah as a member of the larger family group (1). D.R.B.

harlot, a prostitute, one who accepted money for the performance of sex. Several important characters in Israelite history were connected to harlots. The Jericho harlot Rahab sheltered Joshua's spies (Josh. 2), Jephthah was the son of a harlot (Judg. 11:1), and Tamar pretended to be a harlot to induce Judah to have sex with her (Gen. 38:14–18). None of these women were stigmatized, but prostitutes in general were considered an underclass. Priests could not marry harlots (Lev. 21:7), Israelites should not make their daughters harlots (Lev. 19:29), and a priest's daughter who became a harlot should be burned (Lev. 21:9). The payment a prostitute received was considered like the price of a dog: neither could be used to fulfill vows (Deut. 23:18). Like the death of children in battle, the turning of wives into harlots was considered a tragedy of destruction (Amos 7:17).

We know little of how harlots worked. Tamar waited at a crossroads, Rahab had a house. Tamar was veiled for her meeting with Judah, but this was more probably to conceal her identity than to indicate harlotry (note that in Assyria harlots were forbidden the veil). The phrases "act like a harlot" or "treat as a harlot" are not always literal: when Dinah's brothers complained that Shechem treated Dinah like a harlot (Gen. 34:31), they refer to the lack of proprieties rather than an offer of money. The point of the Deuteronomic order to stone a nonvirgin bride is that she acted wantonly while in her father's house (Deut. 22:20–21), not that she accepted money. Similarly, the personified Israel is called a "harlot" to indicate wanton, rather than mercenary behavior (Hos. 1:2); furthermore, such passages as Jer. 5:7 refer to the faithlessness of the nation rather than to rampant sex among the people.

The OT uses another term (Heb. *qedeshah*) to refer to sacred prostitutes. These were part of the fertility cult that Israel was trying to suppress (e.g., Judg. 8:33; Ezek. 16). In the NT, when Rome

is designated harlot (e.g., Rev. 17:1, 15) it is a term of general moral opprobrium and does not mean harlots were more common in Rome than elsewhere in the Greco-Roman world. T.S.F.

Harod (hair´uhd). **1** A rushing, copious spring, now 'Ain Jalud, on the northwesternmost spur of Mount Gilboa where the Jezreel Plain narrows to run down to Beth-shan and the Jordan—a crucial military location. Here Gideon's militia camped opposite the Midianites under Mount Moreh (Judg. 7:1). It is also "the spring in Jezreel," where Saul camped (1 Sam. 29:1). **2** The home of Shammah and Elika, two of David's "thirty" (2 Sam. 23:25; the name "Shammoth the Harorite" in 1 Chron. 11:27 is probably a corruption). ***See also*** Gilboa; Jezreel; Moreh. E.F.C.

Harosheth-ha-goiim (huh-roh´shith-huh-goi´im; Heb., "Harosheth of the Gentiles"), the home base of Sisera, the commander of the army of the Canaanite king Jabin (Judg. 4:2). There Sisera gathered his men and chariots and was defeated by Barak and Deborah (4:13–16). Harosheth-ha-goiim was strategically located near the Plain of Esdraelon southeast of Mt. Carmel, but its exact location remains unknown. It has been identified with modern Tell Amr or Tell Harbaj on the Kishon River, or with that general region, on the assumption that the name is related to the Hebrew root *hrsh* ("wooded height").

harp. ***See*** Music.

hart, the male (female, hind) of the red deer *Cervus elaphus,* viewed as clean (Deut. 12:15, 22; 14:5; 15:22). Its need for water is a metaphor for human longing for God (Ps. 42:1) and its jumps are a model of healthy life (Isa. 35:6), but without pasture it symbolizes hopeless confusion (Lam. 1:6).

harvest. ***See*** Farming.

Hashabiah (hash´uh-b*i*´uh; Heb., "Yah/Yahu [God] has considered/regarded"), a male personal name. It occurs in the OT principally in lists of names (1 Chron. 6:45; 9:14; Neh. 11:15; 1 Chron. 25:3, 19; 26:30; 27:17; 2 Chron. 35:9; 1 Esd. 1:9; Ezra 8:19, 24; 10:25; 1 Esd. 9:26; Neh. 3:17; 10:11; 11:22; 12:21, 24).

Hashum (hay´shuhm). **1** The name of a clan of returnees to Jerusalem in postexilic times. The clan numbered either 223 (Ezra 2:19), 7 of whom were found to have married foreign women (Ezra 10:33), or 328 (Neh. 7:22). **2** An individual who stood with Ezra at the reading of the law (Neh. 8:4). **3** A name that appeared on Nehemiah's sealed documents (Neh. 10:18).

Hasmoneans (haz´muh-nee´uhnz), derived from (Heb.) Hashmon, meaning "descendants of Hashmon," a Jewish family that included the Maccabees and the high priests and kings who ruled Judea from 142 to 63 B.C. ***See also*** Maccabees.

Hasshub (hash´uhb). **1** The father of Shemaiah, a Levite returnee to Judah (1 Chron. 9:14; Neh. 11:15). **2** The son of Pahath-moab who repaired "another section" of the wall of Jerusalem and the Tower of the Ovens (Neh. 3:11) as well as a section opposite his house (Neh. 3:23). **3** A person whose name appeared on Nehemiah's sealed documents (Neh. 10:23). Debate continues on the possible identity of any one of these with any of the others.

Hathach (hay´thak), the name of a royal eunuch appointed to attend Queen Esther. She dispatched him to Mordecai to find out what was happening and why (Esther 4:5), which he did (4:6). He then reported to Esther (4:9) and subsequently returned with her message for Mordecai (4:10).

Hattin (hah-teen´), **Horns of,** a prominent hill about 5 miles west of the Sea of Galilee. This extinct volcano was identified by the Crusaders—with little justification—as the Mount of the Beatitudes. The site controls a strategic segment of the ancient road from Egypt to northern Syria, near the point where the highway begins its descent to the Sea of Galilee. The remains of the important Canaanite city found on top of the hill have been identified with biblical Adamah (Josh. 19:36) or, alternately, with Madon (Josh. 11:1; 12:19).

Hattush (hat´uhsh). **1** A son of Shemaiah, and a descendant of David (1 Chron. 3:22). **2** The head of a house that accompanied Ezra on the return from the Babylonian exile, perhaps the same person as 1 (Ezra 8:2). **3** A son of Hashabneiah, who took part in restoring the walls of Jerusalem (Neh. 3:10). **4** One of the priests who sealed the covenant after the return from the Exile (Neh. 10:4). **5** A prominent priest who returned from the Exile in Babylon with Zerubbabel (Neh. 12:2).

Hauran (haw´ruhn), the northeast limit of Ezekiel's vision of the restored Israel, mentioned only in Ezek. 47:16, 18. Hauran was the broad Syrian plateau country south of Damascus, east of Jaulan (Golan Heights), west of the Jebel Druze, and north of the Yarmuk River. Ancient Egyptian texts speak of it as *Huruna,* and Assyrian records as *Haurana.* Easily invaded from the north, it was devastated by the Assyrian kings more than once: Shalmaneser III in 842 B.C., Tiglath-pileser III ten years later, and Ashurbanipal in his ninth campaign against the

Arabians. The Maccabeans conquered it in the second century B.C. and in the early first century it became part of the Nabatean Empire. The Roman name for the fertile southern region (OT Bashan, modern Hauran) was Auranitis. ***See also*** Assyria, Empire of; Bashan; Nabatea, Nabateans; Syria. D.B.

Havilah (hav´uh-luh; Heb., perhaps "sandy area"), the name given to more than one district east of Palestine. Gen. 2:11 places it in Eden, surrounded by the river Pishon; Gen. 10:7 and 1 Chron. 1:9 relate Havilah to Cush, suggesting a region in southern Mesopotamia. However, in Gen. 10:26–29 and 1 Chron. 1:20–23 Hazarmaveth, Sheba, Ophir, and Havilah are closely related as descendants of Shem, indicating an area somewhere in the east or southeast of Arabia. Gen. 25:18 places it in northeast Arabia, saying the Ishmaelites "dwelt from Havilah to Shur, which is opposite Egypt." In 1 Sam. 15:7 "Havilah" should probably read "Hachilah." ***See also*** Ethiopia; Hachilah; Ophir; Sheba. D.B.

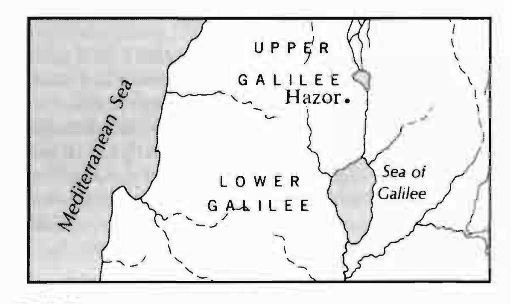
Havvoth-jair (hav´oth-jay´uhr; Heb., "villages of Jair"), sixty (Deut. 3:14) or thirty (Judg. 10:4) villages in Bashan in Gilead.

hawk, a common bird of prey in Palestine. The Hebrew term *nēṣ* applied to the sparrowhawk or the small but swift kestrel. As carnivorous birds, hawks were considered unclean and therefore inedible for the Hebrews (Deut. 14:11–18). Their raptorial habits make hawks valuable hunters of rodents and other small pests.

A symbol of speed and freedom, hawks are still seen soaring on updrafts above the Jordan Valley, a route of the fall southward migration (Job. 39:26). They frequent desolate areas, nesting in the rocky crags and cliffs of gorges. P.L.C.

Hazael (hay´zay-uhl; Heb., "God has seen"), an Aramean king of Damascus during the latter half of the eighth century B.C. According to the Bible, he was to have been anointed by Elijah (1 Kings 19:15). An officer of King Ben-hadad, he was sent to learn from Elisha whether his master would recover from an illness, at which time the prophet foresaw the troubles Hazael would bring to Israel (2 Kings 8). Hazael returned and murdered Ben-hadad, then ascended the throne (v. 15). Assyrian sources, which call him "son of nobody" because of his nonroyal background, note his unsuccessful confrontations with Shalmaneser III in 841 and again in 837. He was able to conquer Ramoth-gilead in the Transjordan (2 Kings 10:32; see also Amos 1:3), leaving the son of Israel's King Jehu with only limited forces (2 Kings 13:7). After conquering Gath, his attention turned to Jerusalem, which bought its freedom with tribute (2 Kings 12:17–18). He was succeeded by his son Ben-hadad, who lost to Israel's King Jehoash the cities Hazael had conquered (2 Kings 13:25). ***See also*** Aram; Ben-hadad. F.E.G.

Hazarshual (hay´zuhr-sh*oo*´uhl; Heb., meaning uncertain, possibly "the haunt of the fox"), a settlement in southern Judah counted as belonging to both the tribes of Judah (Josh. 15:28) and Simeon (Josh. 19:3). It was probably originally occupied by Simeon and then later occupied by Judah as the tribe of Simeon lost its identity and was absorbed into Judah (1 Chron. 4:28–31; note Gen. 49:5–7). It was later occupied by returning exiles (Neh. 11:27). Its exact location is unknown.



Hazeroth (huh-zihr´oth), one of the camping places of the Israelites as they left Egypt. According to the OT narrative it was located between Kibroth-hattaavah and Rithmah in the Wilderness of Paran (Num. 11:35; 33:17–18). At this site Aaron and Miriam criticized Moses' actions and leadership, which resulted in Miriam being struck with leprosy (Num. 12:1–16). The site is unknown although several locations in the northeastern Sinai have been suggested.

Hazor (hay´zor; Heb., "enclosed"). **1** A city in the northern reaches of the Holy Land. The main city had two components: an upper tell and a lower rectangular plateau (modern Tell el-Qedah or Tell Waqqas) both located four miles southwest of Lake Huleh, ten miles north of the Sea of Galilee, and covering 175 acres.

It was a major fortified Canaanite city that first figures in biblical stories of Joshua's battles. According to Joshua 11, Jabin, King of Hazor, responded to news of the Israelite presence by marshaling allies to meet the intruders. By hamstringing the horses and burning the chariots of the allies, Joshua defeated Jabin and burned the city of Hazor as well as defeating the allies (Josh. 11:6–15; 12:19).

According to Judg. 4:2–24, Jabin's commander, Sisera, fought Israelites under Deborah and Barak but was defeated by them (see also Judg. 5 for a poetic version of the encounter), an episode remembered as an act of divine deliverance, though sometimes in error (1 Sam. 12:9).

Solomon fortified Hazor (1 Kings 9:15), but Assyria captured it under Tiglath-pileser III (ca. 745–727 B.C.; 2 Kings 15:29), an event vividly

Reconstruction of the citadel gate at Hazor from the time of King Ahab, ninth century B.C.

evident in destroyed brick blockage of doors in the casemate defense walls of the upper city. If the territory under the city's control extended to Arab tribes east of the city, it may have been the subject of Jeremiah's oracle of warning (Jer. 49:28–33) in Neo-Babylonian times (sixth century B.C.).

Hazor was excavated extensively by Yigael Yadin from 1955 to 1972. It had been sounded by J. Garstang in 1928, but Yadin's reports are the definitive archaeological record of the site. Occupied first in the Early Bronze Age (3000–2000 B.C.; strata XXI–XIX), there was sparse architecture surviving, as there was for stratum XVIII (Middle Bronze I). Extensive architecture was recovered in both upper and lower cities for remaining Middle (2000–1500 B.C.) and Late Bronze periods (1500–1200 B.C.), and a thirteenth-century B.C. destruction by fire was attested. Minor construction marked the early Iron Age city (post 1200 B.C.), but Solomonic construction of defenses, both walls and gates, was massive, as at Gezer and Megiddo. Following another destruction by fire, major building again occurred. Public structures built in Iron Age II (900–600 B.C.) subsequently became living quarters (stratum VI) that were rebuilt (stratum V) after destruction by earthquake. The fiery destruction of this rebuilt city was attributed by Yadin to Assyria's Tiglath-pileser. A major water system comprising an entrance pit and horizontal tunnel to the source was also cleared and dated as a ninth century B.C. construction.

From both the extensive archaeological and topographical evidence, the literary records (eighteenth-century B.C. Mari Letters; fourteenth-century Amarna Letters; nineteenth-century execration texts; Egyptian topographical lists; thirteenth-century Papyrus Anastasi I) attesting its major importance in trade and politics of the ancient Near East are confirmed.

2 A city in the territory of Judah, modern el-Jebariyeh (Josh. 15:23).

3 A city in the territory of Benjamin, modern Khirbet Hazzur, some four miles north and slightly west of Jerusalem (Neh. 11:33). ***See also*** Assyria, Empire of; Solomon. R.S.B.

he (hay), the fifth letter of the Hebrew alphabet; its numerical value is five. The earliest proto-Canaanite form of the letter is a pictograph of a calling man. Phoenician and early Hebrew forms developed from this. The old form is still recognized in the Latin "E" and Greek epsilon. The classical Hebrew square script adapted a form of the Aramaic variant of this letter. In Judaism this letter is often used as an abbreviation of the divine name (the tetragrammaton). ***See also*** Writing.

ה

head, the first or foremost; anatomically the topmost part of the human body. The biblical words for "head" are employed in a variety of usages. "Head" can refer to an anatomical part of the body. Israel laid his hand "upon the head of Ephraim" (Gen. 48:14). Wagging the head in scorn or derision is decribed in Ps. 109:25 and Mark 15:29.

"Head" can also have transferred meanings. It can refer to a leader, such as the head of a family (Josh. 22:14) or province (Neh. 11:3). In Eph. 4:15, Jesus is described as the head of the church. In a phrase such as "on the top (Heb. *rosh*, "head") of the hill" (Exod. 17:9) it refers to a topographical feature. It can be used with an opposite noun to designate a limit: "from the sole of the foot even to the head" (Isa. 1:6); "from the beginning (Heb. *rosh*) to the end" (Eccles. 3:11). ***See also*** Anoint; Beards; Gestures; Hair. D.B.W.

heart, probably the most important anthropological word in the Hebrew scriptures, referring almost exclusively to the human heart (814 times; cf. "the heart of God," 26 times; "heart of the sea," 11 times). The physical activity of the heart, though rarely mentioned, is what caused the limbs to move. A stopped heart indicated paralysis, not death (1 Sam. 25:37; 2 Sam. 18:14). Eating strengthened one's heart (Gen. 18:5 [RSV "refresh yourselves"]; Judg. 19:5) and was associated with its recovery (1 Kings 21:7; Acts 14:17; James 5:5). The inaccessibility of the heart helps explain "heart of the sea" (Ezek. 27:25–27) and "heart of heaven" (Deut. 4:11), i.e., those areas incapable of exploration.

The heart is the center of emotions, feelings, moods, and passions. Equated with the heart are joy (Deut. 28:47; Acts 2:26), grief (Ps. 13:2; Lam. 2:11), ill-temper (Deut. 15:10), love (Phil. 1:7), courage (2 Sam. 17:10; Ps. 27:14), and fear (Gen. 42:28). A swollen heart breeds arrogance (Isa. 9:9), which is in marked contrast to the gentle and lowly heart of Jesus (Matt. 11:29).

The heart's function as the source of thought and reflection highlights its intellectual capacities (Isa. 6:10; Mark 7:21–23). The heart understands (Deut. 8:5; Isa. 42:25), provides wisdom to rule justly and wisely (1 Kings 3:12; 10:24), and discerns good and evil (1 Kings 2:49).

The heart also represents the idea of volition and conscience (1 Sam. 24:5; 2 Sam. 24:10). The request for a pure heart is the desire for a new and more perfect conscience (Ps. 51:10; Matt. 5:8). Since the heart is the center for decisions (2 Sam. 7:21), obedience, devotion, and intentionality, it represents the total human person. Within the heart, human beings meet God's word (1 Sam. 12:24; Jer. 32:40) and thus it is the location where conversion takes place (Ps. 51:10; Joel 2:12; Acts 2:37). D.R.E.

heathen. ***See*** Gentile; People, Peoples.

heaven, the firmament, the massive transparent dome that covers the earth in the world view of the ancient Hebrews. The blue color of the sky was attributed to the chaotic waters that the firmament separated from the earth (Gen. 1:7). The earth was thus surrounded by waters above and below (Deut. 5:8). The firmament was thought to be substantial; it had pillars (Job 26:11) and foundations (2 Sam. 22:8). When the windows of the firmament were opened, rain fell (Gen. 7:11–12).

In biblical Hebrew the word for heaven is always plural. Under that influence, the Greek word for heaven in the NT also frequently appears in the plural. The use of the plural probably does not mean that the ancient Hebrews conceived of more than one heaven. Heaven was the place of the stars, sun, and moon (Gen. 1:14–16) and of the birds (Gen. 1:20; Deut. 4:17). It is also the abode of God (1 Kings 8:30) and where God is enthroned (Isa. 66:1; Exod. 24:9–11). The prophet Elijah, doer of mighty deeds, was taken up to heaven in a whirlwind, according to 2 Kings 2:1–12.

In the myths of many ancient Near Eastern peoples, heaven appears as a god. The gods were called upon as witnesses of international treaties (covenants). Heaven and earth were often included in the list of divine witnesses. Heaven was apparently called upon to witness the covenant between God and the Israelites (Deut. 32:1). When the covenant was broken, God accused Israel before heaven (Isa. 2:1; Jer. 2:12).

The prophets of Israel claimed to have access to the heavenly court (1 Kings 22:19–23). In later Jewish writings, prophets and visionaries were granted visions of the heavenly world and even the opportunity to ascend to heaven, contemplate God, and travel about in the heavenly regions observing heavenly secrets, including the abodes of the righteous and the wicked dead and their respective rewards and punishments. Dreams and visions of the heavenly world and the future were attributed to Daniel (Dan. 7–12). Enoch, who had been taken up to heaven like Elijah (Gen. 5:24), is the subject and reputed author of a large body of revelatory literature dating from the third century B.C. to the third century A.D. (*1 Enoch, 2 Enoch, and 3 Enoch*). The NT book of Revelation stands in this tradition. An open door appears in heaven so that the early Christian prophet John may see heavenly secrets (Rev. 4:1). Apocryphal Christian apocalypses are especially concerned with the punishment of the wicked (*The Apocalypse of Peter, The Apocalypse of Paul*).

The pseudepigraphical Jewish and apocryphal Christian literatures contain many references to multiple heavens. Seven heavens is the most common notion (*2 Enoch, The Ascension of Isaiah*). ***See also*** Elijah; Enoch; Firmament; Hell; Vision. A.Y.C.

Heaven, Kingdom of. ***See*** Kingdom of God.

heave offering (Heb. *teruma*), an incorrect translation in the KJV whose proper meaning is "dedication" or "dedicated gift." It is used of the animal thigh of the well-being offering (Lev. 7:32–34), the tithe (Num. 18:24–29), sanctuary building materials (Exod. 25:2), land (Ezek. 48:8–21) and several other sacred donations. Dedication indicates the transference of an object from the owner to God. Unlike the so-called wave offering (more accurately "elevation offering"), dedication is not a ritual act done at the sanctuary but is a simple dedication effected outside its precincts. In Second Temple times the dedication offering became a definite ritual act, hence the translation "heave offering."

D.P.W.

Heber (heeˈbuhr; Heb., "enclave" a name occurring in several tribes). **1** The eponym of a clan in Asher (Gen. 46:17; Num. 26:45; 1 Chron. 7:31–32). **2** The father or founder of Soco in Judah (1 Chron. 4:18). **3** A family in Benjamin (1 Chron. 8:17; cf. Eber in v. 12). **4** In an early narrative, the Kenite ("smith") husband of Jael; Jael killed Sisera in her tent at The Oak in Zaananim, in north Galilee (Judg. 4:21; 5:24). This Heber had migrated to the territory of Naphtali, which had a common border with Asher, and had settled in peace with Jabin, king of Canaan at Hazor (Judg. 4:11, 17). ***See also*** Barak; Judges, The Book of; Sisera. R.B.

Hebrew (heeˈbr*oo*), the original language of the OT. It was the tongue spoken by the ancient Israelites. In the OT it is known as "Judean," "[language of the] Jews" (2 Kings 18:26, 28; Isa.

36:11, 13; 2 Chron. 32:18; Neh. 12:24). Once it is apparently called the "language [lit., lip] of Canaan" (Isa. 19:18).

Ancient Hebrew is a member of the Canaanite family of languages. Canaanite is known from the second millennium B.C. only in transcriptions into Egyptian hieroglyphs or in the cuneiform of the el-Amarna Tablets. Other Canaanite dialects (from the first millennium) are Phoenician and Moabite and probably also Edomite and Ammonite. The Canaanite tongues are part of the Northwest Semitic branch of the Semitic language family (so called after Shem, the father of the Semitic peoples, Gen. 10:1). Some of the other Northwest Semitic languages are Ugaritic (classed by some scholars as Canaanite because of certain similarities with Hebrew), Aramaic (in which a few passages of the OT are written), and Amorite (known only from personal names in Egyptian and cuneiform documents).

During postexilic times (mid-sixth century B.C. and later) the Jews used Aramaic in their contacts with the society around them because

it was the international language of the Persian Empire. But Hebrew continued to be used even into the Greco-Roman period (333 B.C.–A.D 325). It was especially important for the discussion of religious matters. The name "Hebrew" denoting the language first appears in the introduction to the Wisdom of Jesus the Son of Sirach (Ecclesiasticus). It is debated whether all the references to "Hebrew" in the Apocrypha and the NT (4 Macc. 12:7; 16:15; Acts 21:40; 22:2; 26:14) always mean Hebrew. In some cases, Aramaic may be meant. The Dead Sea Scrolls and the Bar-Kochba (A.D. 135) correspondence show that Hebrew was still in use for other than rabbinic discussions. The opinions of the rabbis, i.e., the Mishnah, is in late Hebrew and its Talmudic commentary (Gemara) is in Aramaic with some Hebrew parables. ***See also*** Aramaic; Hebrews; Israel; Old Testament. A.F.R.

Hebrews (hee´br*oo*z), an alternate designation for the people of Israel, the descendants of Abraham.

The Term: The Hebrew form translated "Hebrew" is *'ib̲rî*, grammatically an adjective created by the addition of the suffix *-iy*, which becomes long *i*, to a base presumed to be *'ib̲r-*. Without the suffix this base would take the form *'eb̲er*, a form that is in fact the personal name Eber, an ancestor of several Semitic peoples (Gen. 10:24–25; 11:14–15; 1 Chron. 1:18–19). If the term "Hebrew" is derived from Eber, then one might expect it to be applied to some of the other peoples descended from him, e.g., the Aramaeans, but this does not necessarily follow from the biblical genealogies in which Eber is mentioned. All that is required is the assumption that in the specific contexts where "Hebrew" is employed in the Bible, e.g., vis-à-vis Egyptians or Philistines, it is intended to designate the particular ethnic or national group Israel.

Other suggestions have been based on the assumption that the root word *'eb̲er* goes back to a form meaning, "one who has passed over." Such is the reasoning behind the Septuagint (LXX) rendering of "Abram the Hebrew" in Gen. 14:13. The Greek translation is, literally, "Abram, the one who crossed over." An ancient rabbinic view took it to mean that the Israelites were those who had crossed the Red Sea. Some scholars in modern times have linked the term to the statement that Abraham came from across the Euphrates (Josh. 24:2–3). Various other, mostly quite implausible, interpretations have been made, such as the nineteenth-century view that the "Hebrews" were those who had crossed the River Jordan.

As Ethnic Designation: Whatever the etymological derivation, the term "Hebrews" was clearly meant to be the designation of an ethnic or national group. This is clearly seen by its usage in juxtaposition to another such ethnic appellative, "Egyptian" (Heb. *miṣrî*). Genesis records that "the Egyptians might not eat bread with the Hebrews" (Gen. 43:32). Moses "saw an Egyptian beating a Hebrew" (Exod. 2:11), and elsewhere it was reported to Pharaoh that "the Hebrew women are not like the Egyptian women" (Exod. 1:19). A further indication that

the term is an ethnicon is its parallelism with "Israel." "The Lord, the God of Israel" (Exod. 5:1) is equated with "the God of the Hebrews" (Exod. 5:3). The biblical writers use the term "Hebrew" to designate the direct ethnic progenitors of the people who can later be called "Israel," or "the sons of Israel." The most striking example of this usage is its application to Abram. It was necessary to give him an ethnic designation to distinguish him from the other personages mentioned in the same context. Thus, we find "Abram the Hebrew" together with "Mamre the Amorite" (Gen. 14:13) and his brothers, Eshcol and Aner. Attempts to read into this passage a militaristic flavor to the term "Hebrew" because Abram had a fighting force (Gen. 14:14) ignore the fact that the other three heroes play a similar role in the story. "Abram the Hebrew" is purely an ethnic definition.

This latter example is the classic usage by a narrator wishing to distinguish between the Israelites or their forebears and some other nationality. Other cases are Gen. 43:32 cited above, where the reference is to the sons of Jacob, and the allusions to their own descendants who have grown into a numerous people in Egypt (Exod. 1:15; 2:11, 13). Even more specific is the usage with regard to the Israelites already settled in the land by the time of Saul's leadership. "The Hebrews who had been with the Philistines . . . turned to be with the Israelites who were with Saul and Jonathan" (1 Sam. 14:21). Attention is often called to this passage as proof that "Hebrews" can apply to people other than the Israelites, but, in fact, the very qualification of those with Saul and his son demonstrates that all of them were from the same nationality.

On other occasions, Israelites or their ancestors refer to themselves as Hebrews in discussions with foreigners. Joseph defines his country of origin as "the land of the Hebrews" (Gen. 40:15); the "land of Israel" is only applicable after the settlement of the tribes. Incidentally, Joseph's reference is to the land of Canaan and not to some special reserve to which the Hebrews were confined. Therefore, it is not legitimate to compare Joseph's expression with the "territory [lit., field] of the *'apirū*" mentioned in an ancient treaty between the king of the Hittites and the king of Ugarit. The latter is really a "reserve" where stateless persons were being allowed to live. The Hebrew midwives speak to Pharaoh of "Hebrew women" (Exod. 1:19), as does the sister of Moses when speaking to Pharaoh's daughter (Exod. 2:7). In the same semantic context one must understand Jonah's reply to the query of the sailors, "I am a Hebrew" (Jon. 1:9). The fact that Jonah adds, "and I fear the Lord, the God of heaven, who made the sea and the dry land," demonstrates that his ethnic reference is to the Israelite nation.

The same nuance prevails in the speech of foreigners referring to Israelites. Note, for example, Potiphar's wife in speaking of Joseph (Gen. 39:14, 17); likewise the chief butler (Gen. 41:12). The king of Egypt himself makes reference to the "Hebrew women" (Exod. 1:16) and his daughter recognizes the infant Moses as "one of the Hebrews' children" (Exod. 2:6). Such usage is prominent in 1 Samuel where the Philistines are often quoted as referring to the Israelites as Hebrews. There can be no doubt that the book of Samuel intends for the reader to understand that Hebrews means the people of Israel, e.g., in 1 Sam. 4:5–9 where the Philistines speak about "the gods who smote the Egyptians with every sort of plague" as having come (in the form of the Ark) to the camp of the Hebrews (v. 6; also v. 9). In like manner one must understand 1 Sam. 13:3 on the basis of comparison with the reading in LXX, ". . . and the Philistines heard of it saying, "The Hebrews have rebelled.' And Saul blew the trumpet throughout all the land," which is then naturally followed by the next verse: "And all Israel heard . . . " (1 Sam. 13:4). The present Hebrew text, followed by RSV, ignores the LXX and would have Saul calling to the Hebrews, not the Israelites. The equation of Hebrews with Israelites is further confirmed by the reference to the Philistine monopoly on metal smithing, "Lest the Hebrews make themselves swords or spears" (1 Sam. 13:19), because it goes on to say that "every one of the Israelites went down to the Philistines to sharpen his plowshare . . . " (v. 20). So there can be no doubt that the Philistines are speaking of the Israelites when they notice Jonathan coming toward them, "Look, Hebrews are coming out of the holes . . . " (1 Sam. 14:11).

Finally, the last such Philistine allusion to the Hebrews must be taken in the same way. When David and his fighting men appeared at Aphek, the Philistine commanders said, "What are these Hebrews doing here?" (1 Sam. 29:3). Just because David's band was composed of all sorts of renegades (1 Sam. 22:2), it has been assumed that the Philistines are using the term "Hebrew" as one would use the term *'apiru* in the Late Bronze Age. Though the sociological parallel between David's men and the outcasts and freebooters called *'apiru* during the second millennium B.C. is cogent, there is no justification for violating the clear semantic usage of the ethnicon, "Hebrew, Hebrews," in the book of 1 Samuel.

The Hebrew Slave: Special notice must be taken of the law pertaining to the "Hebrew slave" (Exod. 21:2). The rules for release of slaves in the seventh year and the special rules for female slaves (Exod. 21:7–11) were clearly predicated on the fact that they were truly Israelites. In Deut. 15:12 it is stressed that the slave referred to is "a Hebrew man, or a Hebrew woman." Jeremiah comments on this same law, and he makes it clear that the intention is the defense of native Is-

HEBREWS, THE LETTER TO THE

raelites. He defines the "Hebrew slaves, male and female" as a Judean (RSV: "Jew") brother (Jer. 34:9, 14). Again, comparison has been made with the *'apiru* who sold themselves into servitude to the Hurrian residents of Nuzi on the Tigris. In fact, the *'apiru* there are clearly foreigners, not from the local population at all. The situation is the direct opposite of the Hebrew slave.

In the Apocrypha: The usage of the term is the same in the Apocrypha as in the OT in the mouths of foreigners (Jth. 12:11; 14:18); by Jews speaking to non-Jews (Jth. 10:12; 2 Macc. 7:31); in narration, to distinguish the Jews from foreigners (2 Macc. 11:13; 15:37).

In the NT: The term "Hebrew" is used by the NT writers to denote those Jews who continued to maintain their traditional Judaic heritage, including their Hebrew (and Aramaic) language, in contrast to the hellenizing Jews who had adopted the Greek language and culture (Acts 6:1; 2 Cor. 11:22; Phil. 3:5).

Summary: There is nothing pejorative about the term "Hebrew" in the OT, the Apocrypha or the NT. It was adopted by the OT writers as the designation of their pre-Israelite forebears. Linguistically, the form is an ethnic appellative, built on a base that may go back to Eber as the eponymous ancestor or else reflect the tradition that the ancestors had come from "beyond" the Euphrates. *See also* Khapiru.

Hebrews, the Letter to the, an anonymous book appearing in the NT following the Letters attributed to Paul. Although the book came to be included among the Letters of Paul in the ancient church as "the Letter to the Hebrews," the absence of features common to the Letters of Paul distinguish it from the Pauline correspondence in two significant ways: first, Hebrews lacks the customary epistolary introduction identifying the author and recipients as well as subsequent references to their identity; and, second, the author's description of this work as a "word of exhortation" (13:22), a term used elsewhere for a sermon (cf. Acts 13:15), indicates that the book is not a letter, but a homily. The unique pattern of argumentation in Hebrews, with its alternation between scriptural exposition and exhortation, conforms to the pattern of argumentation of the homiletic works of the period. Other indications of non-Pauline authorship include vocabulary, style, and theology. Pauline authorship of Hebrews was debated even in the early church, and its general acceptance into the Christian canon came relatively late.

Contents: The unique literary form of Hebrews is evident in the opening words, a poetic declaration of the work of Christ in creation and redemption (1:1–4). This unit functions as the exordium to Hebrews, announcing the major themes of the book. The contrast of God's revelation in the past with God's revelation in a Son (1:1–2) anticipates the book's consistent comparison of the institutions and individuals of the OT with those of the new era inaugurated by Christ. The portrayal of the work of Christ as the making of "purification for sins" (1:3) anticipates the elaborate description of the priestly work of Christ in 5:1–10:39. The claim that Christ is exalted to God's right hand (1:3) is made in the words of Psalm 110 and becomes a consistent refrain throughout Hebrews (cf. 1:13; 8:1; 10:12). The announcement that Christ has become "greater than angels" (1:4) anticipates the book's repeated use of comparison to show the superiority of Christ (cf. 6:9; 7:7, 19, 22; 8:6; 9:23; 10:34; 11:16, 35, 40; 12:24) to the objects of comparison from the OT.

The remainder of the book consists of a series of expositions of the OT that serve as a basis for comparing Christian experience with that of Israel. According to 1:5–2:17, Christ is the Son who is greater than the angels, who merely serve. According to 3:1–6, he is the Son who is greater than Moses the servant. In 3:7–4:11, Christ is the forerunner (cf. 2:10) who leads his people to the promised rest that Israel never received. In 5:1–10:39, Christ is the great high priest like Melchizedek (cf. chap. 7), whose sacrifice was greater than that of the priesthood of Aaron (9:1–10:18). In chaps. 11–12, the church is the culmination of God's host of witnesses (cf. 12:1–2). It has approached the heavenly rather than the earthly Mount Zion (12:18–29). In each of the comparisons, Christian experience is "better" because it is equated with a reality that is transcendent and exalted. Christians have not approached "what may be touched" (12:18) or "seen" (11:1), and the priestly work of Christ was performed "through the greater and more perfect tent (not made with hands, that is, not of this creation)" (9:11). Thus, in the series of comparisons, the author employs a dualistic worldview in order to show that the OT institutions are "earthly" (cf. 9:1), while Christ is the exalted one who introduces Christians to transcendent reality.

Setting, Recipients, and Purpose: Although many interpreters have concluded from these comparisons that the purpose of Hebrews was to demonstrate the superiority of Christianity to Judaism for Jewish Christians who were tempted to return to the synagogue, the author's comments to his readers suggest a different purpose. The exhortations that are interspersed between the expositions of this homily allow one to draw a profile of the readers. They belong to the second generation of Christians (2:3; cf. 5:11–14; 10:32), and they suffer from "drooping

hands" and "weak knees" (12:12). Thus, their most pressing need is endurance (10:36–39). The expositions are intended to provide the foundation for the community's endurance. By emphasizing the greatness of the Christian possession, the author demonstrates that Christians have an "anchor of the soul" (6:19) to which they can hold.

The author does not indicate the location of the readers. The greetings from "those in Italy" (13:24) make Rome the most likely destination. The fact that Hebrews was first quoted by Clement of Rome (*1 Clem.* 36:1–4) further strengthens the case for a Roman audience.

Structure and Outline of Contents: The accompanying outline of Hebrews suggests the author's extraordinary rhetorical artistry. In the tripartite structure, the beginning and end of each unit correspond to each other in the first two units. The first section (1:1–4:13) begins and ends with reflection on the word of God. The beginning (4:14, 16) and end (10:21–22) of the central section (4:14–10:32) are symmetrical, with the words, "Having . . . a high priest, let us draw near . . . ". Although the same clear symmetry is lacking in the final section, it is distinguished by the call to remember at the beginning (10:32) and in 13:7, and by the call to faithful obedience. The final section thus functions as the climactic call to fidelity. ***See also*** Angel; Canon; Epistle; Melchizedek; Moses; Paul; Preaching; Priests; Worship.

OUTLINE OF CONTENTS

The Letter to the Hebrews

- I. The Revelation of the Word in the Son (1:1–4:13)
  - A. The Son greater than angels (1:1–2:18)
  - B. Exhortation to hear the voice of the Son (3:1–4:13)
- II. Christ the great high priest (4:14–10:31)
  - A. Exhortation to hold fast the confession (4:14–16)
  - B. Introduction of Christ the high priest (5:1–10)
  - C. Exhortation to endure and thereby obtain the promises (5:11–6:20)
  - D. Christ the great high priest (7:1–10:18)
  - E. Exhortation to hold fast the confession (10:19–31)
- III. Call to faithful obedience (10:32–13:25)
  - A. Exhortation to endurance (10:32–12:11)
  - B. Sinai and Zion (12:12–29)
  - C. Concluding exhortations to faithfulness (13:1–25)

Hebron (hee'bruhn), one of the "central" cities in the southern hill country of Judah some twenty miles south-southwest of Jerusalem. It is situated at one of the highest points (ca. 3,040 feet above sea level) on the central mountainous ridge and is one of the oldest continually inhabited cities in Palestine. It is in an area with an abundant water supply in the form of wells and springs and is a regional center of grape and olive production. A reference to its antiquity is found in Num. 13:22, where it is said to have been founded seven years before Zoan (Avaris, later Rameses) in Egypt, probably in the seventeenth century B.C. Hebron's original name (Gen. 23:2; Josh. 20:7) was Kiriath-arba (Heb., "four-fold city").

The city's current name, el-Khalil (Arabic, "the friend"), is an indication of its close connections with the traditions about Abraham (Gen. 13:18; 18:1), who is known as "the friend of God" (2 Chron. 20:7; Isa. 41:8; James 2:23). It was at Hebron that Sarah died and it was there that Abraham purchased the cave of Machpelah from Hittites in the area for use as a family tomb (Gen. 23:7–16), a site over which the current Haram el-Khalil (Arabic, "the sacred area of the friend") traditionally stands.

At the time of the entry of the Israelites, Hebron was held by three of the legendary Anakim, "the giants" (Num. 13:22), who apparently reestablished themselves there after the conquest (Josh. 14:12). After falling to Joshua (Josh. 10:1–27; 36–39; 11:21–23) and having been secured again by Caleb (Josh. 15:13–14) Hebron was allotted to Caleb (Josh. 14:12) and subsequently became a city of the Kohathite Levites and one of the six cities of refuge (Josh. 20:7).

Hebron also played a prominent role in the early years of David (ca. 1004–998 B.C.). It was one of the cities that aided him in his refugee years (1 Sam. 30:31), and it was there that he was anointed "king of Judah" (2 Sam. 2:11) and reigned for seven and a half years (2 Sam. 5:5), while Saul's son Ishbosheth ruled in the north. David's son Absalom began his revolt against his father at Hebron (2 Sam. 15:7–10).

In the period of the Divided Monarchy (924–586 B.C.) Rehoboam strengthened Hebron's defenses (2 Chron. 11:5, 10). A number of

stamped jar handles from storage jars of uniform capacity (2 baths, equal to about 10 gallons) dating to the eighth century B.C. bear the name of Hebron, where these jars were apparently made in a royal pottery.

Beginning in the Exile (586–ca. 538 B.C.), Hebron was occupied by the Edomites (Idumeans) until it was recaptured in 164 B.C. by Judas Maccabeus (1 Macc. 5:65). Although it is not mentioned in the NT, Hebron was the site of building by Herod the Great, some of whose characteristic construction can be seen today at the Haram el-Khalil. ***See also*** David; Machpelah; Mamre. F.S.F.

Hebronites (hee'bruh-nīts), name of a clan descended from the Levite Kohath (Num. 3:27; 26:58). The clan was a source of treasury guards (1 Chron. 26:23) and supervised territory west of the Jordan through Hashabiah (26:30) under the clan chief Jerijah (26:31). The name is associated with the Judean city of Hebron and its people, nineteen miles southeast of Jerusalem. ***See also*** Hebron.

hedge, a barrier or boundary, sometimes of live plants such as thorny bush (Mic. 7:4; Hos. 2:6), used to protect vineyards (Mark 12:1; Matt. 21:33) or to mark off roads and fields (Luke 14:23). It symbolizes God's protection (Job 1:10) or his restriction (Job 3:23).

hedgehog (KJV: "bittern"), a small mammal, also designated as "porcupine." The Hebrew word (*qippōd*) is used for the hedgehogs *Erinaceus auritus* or *Erinaceus sacer.* In Isa. 14:23 it is a metaphor for the desolation of a place under divine judgment that a city is the "possession of " such an animal. The same is true in an oracle against the nations in Isa. 34:11. Similar negative desolation is involved in Zeph. 2:14, where Nineveh's destruction is described.

heel, the rear of the human foot, below the ankle and behind the arch. Literal references include a likely zone of snakebite (Gen. 3:15), anatomical contact of twins at birth (Gen. 25:26), and appropriate vulnerability to traps (Job 18:9). Symbolic of treacherous betrayal, it is used in Ps. 41:9 for the betrayal of a close friend, and in John 13:18 for Jesus' assessment of Judas's betrayal (lifting the heal "against" one). Plural uses show close proximity in pursuit (e.g., "they rushed out at his heels," Judg. 5:15).

Hegai (heg'ī), a eunuch of King Ahasuerus of Persia; he was in charge of the royal harem and Esther was placed in his custody before she was called before the king (Esther 2:3, 8, 15).

heifer, a young cow; it was used for ploughing (Judg. 14:18), trained to thresh grain (Hos. 10:11; Jer. 50:11; Deut. 21:3), and valued for its milk (Isa. 7:21).

It was one of the sacrificial animals (1 Sam. 16:2) and appears in three significant rites: it was divided to ratify a covenant (Gen. 15:9); it was killed to expiate murder by an unknown person (Deut. 21:1–9); and it was burned and its ashes used to counteract uncleanness caused by contact with a corpse (Num. 19:1–10; cf. Heb. 9:13). Although a different Hebrew word is used here, a young cow seems to be intended.

The heifer's beauty was much appreciated, so the word could be used figuratively of a woman (Judg. 14:18; the female name Eglah, 1 Sam. 3:5, is the same word) and of the splendor of Egypt (Jer. 46:20). Obedient Ephraim is compared to a trained heifer (Hos. 10:11), disobedient Israel to a stubborn one (Hos. 4:16, though again the Hebrew word is different). J.R.P.

heir. ***See*** Inheritance.

Heldai (hel'dī). **1** David's captain for the twelfth month (1 Chron. 27:15). **2** A Jew who returned from Babylon (Zech. 6:10).

Helez (hee'liz; Heb., "vigor" or "strength"). **1** An Ephraimite, one of David's fighting men who later served him as the commander of a division of twenty-four thousand men (2 Sam. 23:26; 1 Chron. 27:10). **2** A descendant of Judah (1 Chron. 2:39).

Heli (hee'lī; Gk. form of the Heb. *Eli* [ee'lī], "[the Lord is] exalted"). **1** In the OT, the priest (Eli) before whom Samuel ministered at Shiloh (1 Sam. 1–4). **2** In the NT, Heli is the name of the father of Joseph in Luke's genealogy of Jesus (Luke 3:23).

Heliopolis (hee'lee-op'uh-lis). ***See*** On.

hell, an English word used to translate Heb., Sheol; Gk., Hades; and Heb., Gehenna. In Christian tradition it is usually associated with the notion of eternal punishment, especially by fire. This idea appears in Isa. 66:24, but it is not clearly associated with a place. Jewish writings from the third century B.C. onward speak of places of punishment by fire for evil spirits and the wicked dead (1 Enoch 18:11–16; 108:3–7, 15; 2 Esd. 7:36–38). The book of Revelation describes a lake that burns with fire and brimstone in which the wicked will be eternally punished (Rev. 19:20; 20:14–15; 21:8). ***See also*** Gehenna; Hades; Punishment, Everlasting; Sheol.

Hellenists (hel'uh-nists; KJV: "Grecians"), a term found in Acts 6:1 and 9:29, probably denoting Greek-speaking Jewish Christians in the early church in Jerusalem. The Hellenists probably interpreted the Torah less stringently than did the "Hebrews," the Aramaic-speaking Jewish Christians in the Jerusalem church. The presence of these Hellenists may have served as an intermediate point of transition for the Christian movement

in its spread into the Greek-speaking Gentile world. ***See also*** Greeks; Hebrews.

helmet, a leather or metal protective covering for the head worn by soldiers. The word used in the OT for "helmet" is of foreign origin, and foreigners attacking Israel are often reported as wearing helmets (1 Sam. 17:5 [Goliath]; Jer. 46:4; Ezek. 23:24). Later Israel's armies were similarly equipped (2 Chron. 26:14), but the reference to Saul's helmet in 1 Sam. 17:38 may be an anachronism. The helmet worn by God as he marches against his enemies (Isa. 59:17) is envisioned as part of the armor given to Christians to protect themselves against evil (1 Thess. 5:8; Eph. 6:17).

Bronze helmet of the type worn by Roman soldiers stationed in Judea; first century A.D.

Helon (hee'lon; Heb., possibly "strong"), the father of the Zebulunite leader Eliab. Helon is mentioned in Numbers (1:9; 2:7; 7:24, 29; 10:16) in connection with his son's status and activities.

hem, the edge, border, or "skirts" of a garment. Pomegranates of blue, purple, and scarlet stuff were placed between bells of pure gold all around the hem of the blue priestly robe of Aaron (Exod. 28:31–35; 39:22–26). So great was the healing power of Jesus that the mere touching of the hem of his garment resulted in the immediate and miraculous healing of the hemorrhaging woman (Matt. 9:20; Luke 8:44) and the crowds of sick people at Gennesaret (Matt. 14:36; Mark 6:56). ***See also*** Fringes.

Heman (hee'muhn; Heb., "faithful"). **1** A grandson of Jacob and son of Zerah (1 Chron. 2:6). **2** A wise man in the time of Solomon (1 Kings 4:31). **3** A grandson of Samuel and son of Joel, whom David put in charge of the service of song (1 Chron. 6:31–33). He is identified as the "singer" and as the first in the list of three appointed by David may have been the chief musician. Psalm 88 is probably attributed to him.

Hemath (hee'math). ***See*** Hamath; Hammath.

hemlock. ***See*** Gall.

hen, common fowl mentioned in the Bible only in Matt. 23:37 and Luke 13:34. ***See also*** Fowl.

Henadad (hen'uh-dad; Heb., "Hadad [a deity] is gracious"); a shortened form of Henhadad. **1** The "father" of two postexilic inhabitants of Jerusalem, Bavvai and Binnui, who helped repair the city walls. It is almost certain that the ancestral head of the family group is meant here rather than the actual father, with "son" of Henadad meaning "descendant" (Neh. 3:18, 24; 10:9); possibly the head of the family group in 2. **2** A levitical family group ("sons of Henadad") who helped supervise the workmen in the rebuilding of the Temple following the Exile (Ezra 3:9).

henotheism (hen'uh-thee-iz'uhm). ***See*** Polytheism.

Hepher (hee'fuhr). **1** A town west of the Jordan (Josh. 12:17). **2** A son of Gilead (Num. 26:32; 27:1; Josh. 17:2, 3). **3** A man of Judah (1 Chron. 4:6). **4** One of David's mighty men (1 Chron. 11:36).

Hephzibah (hef'zi-buh; Heb., "my delight rests in her," said by the delighted parent). **1** A wife of Hezekiah, king of Judah (715–687 B.C.), and the mother of Manasseh (687–642 B.C.; 2 Kings 21:1). **2** The name given by the Lord to restored Jerusalem in Isa. 62:4.

Heptateuch (hep'tuh-t*oo*k), the first seven books (Genesis through Judges) in the OT, which carry the story of Israel through the time of the conquest of Canaan. ***See also*** Hexateuch; Pentateuch.

herald, one who carries and announces messages on behalf of another. In Isa. 40:9 and 41:27 the herald is to bring "good tidings" to Zion and Jerusalem as commanded. In Dan. 3:4 a herald announces the demands for allegiance to the golden statue on behalf of Babylon's king Nebuchadnezzar. In 2 Pet. 2:5 Noah is characterized as a "herald of righteousness."

herbs, plants gathered for flavor, aroma, or medicinal value (2 Kings 4:39). Used at Passover, they were a symbol of suffering (Exod. 12:8; Num. 9:11), but they could comprise a modest meal (Prov. 15:17).

heresy, a term derived from the Greek word *hairesis,* originally an opinion or way of thinking. It was used as a designation of a sect, party, or philosophical school. It is used in this sense of the Sadducees and Pharisees in Acts 5:17 and 15:5. Later Christian usage (from late second century A.D.) understood "heresy" to indicate deviation from the accepted teaching or practice of the dominant Christian community. Something of this sense may be found in the treatment of Christians as a "sect of the Nazarenes" in Acts 24:5, 14 and 28:22, where Christianity is opposed by Jewish religious authorities. Paul used the word for an internal faction within the Christian community (Gal. 5:20; 1 Cor. 11:19). P.P.

Hermas (huhr´muhs), a Christian to whom, along with others, Paul sends greetings in Rom. 16:14. Perhaps the added words, "and the brethren who are with them," refer to a small house-church.

hermeneutics (huhr´muh-ny*oo*´tiks), an English transliteration, based on a family of Greek words which, in its broadest sense, means "interpretation." Other shades of meaning include "explanation," "exposition," "expression," "intelligible rendition," or even "translation." This range of uses is reflected in classical Greek as well as in the Greek OT, or Septuagint, and in the NT, where the word family designates the act of explaining difficult or unfamiliar terms or even translating from one language into another (e.g., Gen. 42:23; Ezra 4:7; 2 Macc. 1:36; John 1:38, 42; 9:7; Heb. 7:2; cf. Acts 9:36). It can also mean "interpretation" as making sense of an otherwise unintelligible utterance (e.g., 1 Cor. 12:10, 30; 14:5, 13, 26, 27, 28) or explaining an obscure saying (Eccles. 47:17). It may also refer specifically to the act of interpreting a sacred text in the sense of unfolding hidden, obscure meanings in Scripture or expounding its full significance (e.g., Luke 24:27).

In the broadest sense, hermeneutics is the field of theological study that deals with the interpretation of Scripture. Often, it is characterized as being primarily concerned with the theory or theories of interpretation, and in this respect it can be distinguished from exegesis, which may be thought of as the practical application of hermeneutical principles. As compared with exegesis, hermeneutics is more comprehensive in its scope as well as more theoretical in its orientation. It encompasses both the study of the principles of biblical interpretation and the process through which such interpretation is carried out.

In the ancient and medieval periods, a primary concern was to articulate proper principles or rules for biblical interpretation. In the Jewish tradition, rabbis devised sets of rules for interpretation, such as the seven rules of Rabbi Hillel or the thirteen rules of Rabbi Ishmael. Among Christians, two fundamentally different hermeneutical approaches emerged in the late second and early third centuries A.D., one associated with Alexandria (Clement, Origen), which gave primacy to allegory as the fundamental hermeneutical principle, and another associated with Antioch (Theodore of Mopsuestia, John Chrysostom), which attached greater importance to typology and the literal meaning of Scripture.

Through the medieval period, the dominant hermeneutical approach was the fourfold meaning of Scripture, a scheme allowing a text to be understood in at least four senses: literal, allegorical, moral, and heavenly. The Reformation saw a shift in emphasis but still continued to debate principles of interpretation, such as whether Scripture is its own best interpreter or whether it must be interpreted in light of the church's received tradition.

The modern period became less concerned with devising rules, norms, and principles of interpretation and more concerned with rethinking, clarifying, and making explicit the process of interpretation itself. In the nineteenth century, philosophical analysis was applied to hermeneutics, resulting in new questions: what is involved in the process of understanding an ancient text from another time and culture? How are a single passage and a whole work interrelated? How does a written text reveal the psychological personality of the writer? In what sense is a text an "expression" of human experience? In the twentieth century, other questions were pressed: how is the essential biblical message (Gk. *kerygma,* "proclamation") mediated through Scripture? How is this understood and appropriated by modern readers or hearers? What is the relationship between language as a vehicle through which communication occurs and language as a communicative act itself, a "word-event"? The hermeneutical process has also been visualized as the fusion of two horizons, that of the interpreter and that of the text itself. In more recent times, the hermeneutical process has been explored from a variety of other perspectives, such as modern literary criticism, structuralism, and the social sciences. ***See also*** Bible; Biblical Criticism; Canon; New Testament; Old Testament. C.R.H.

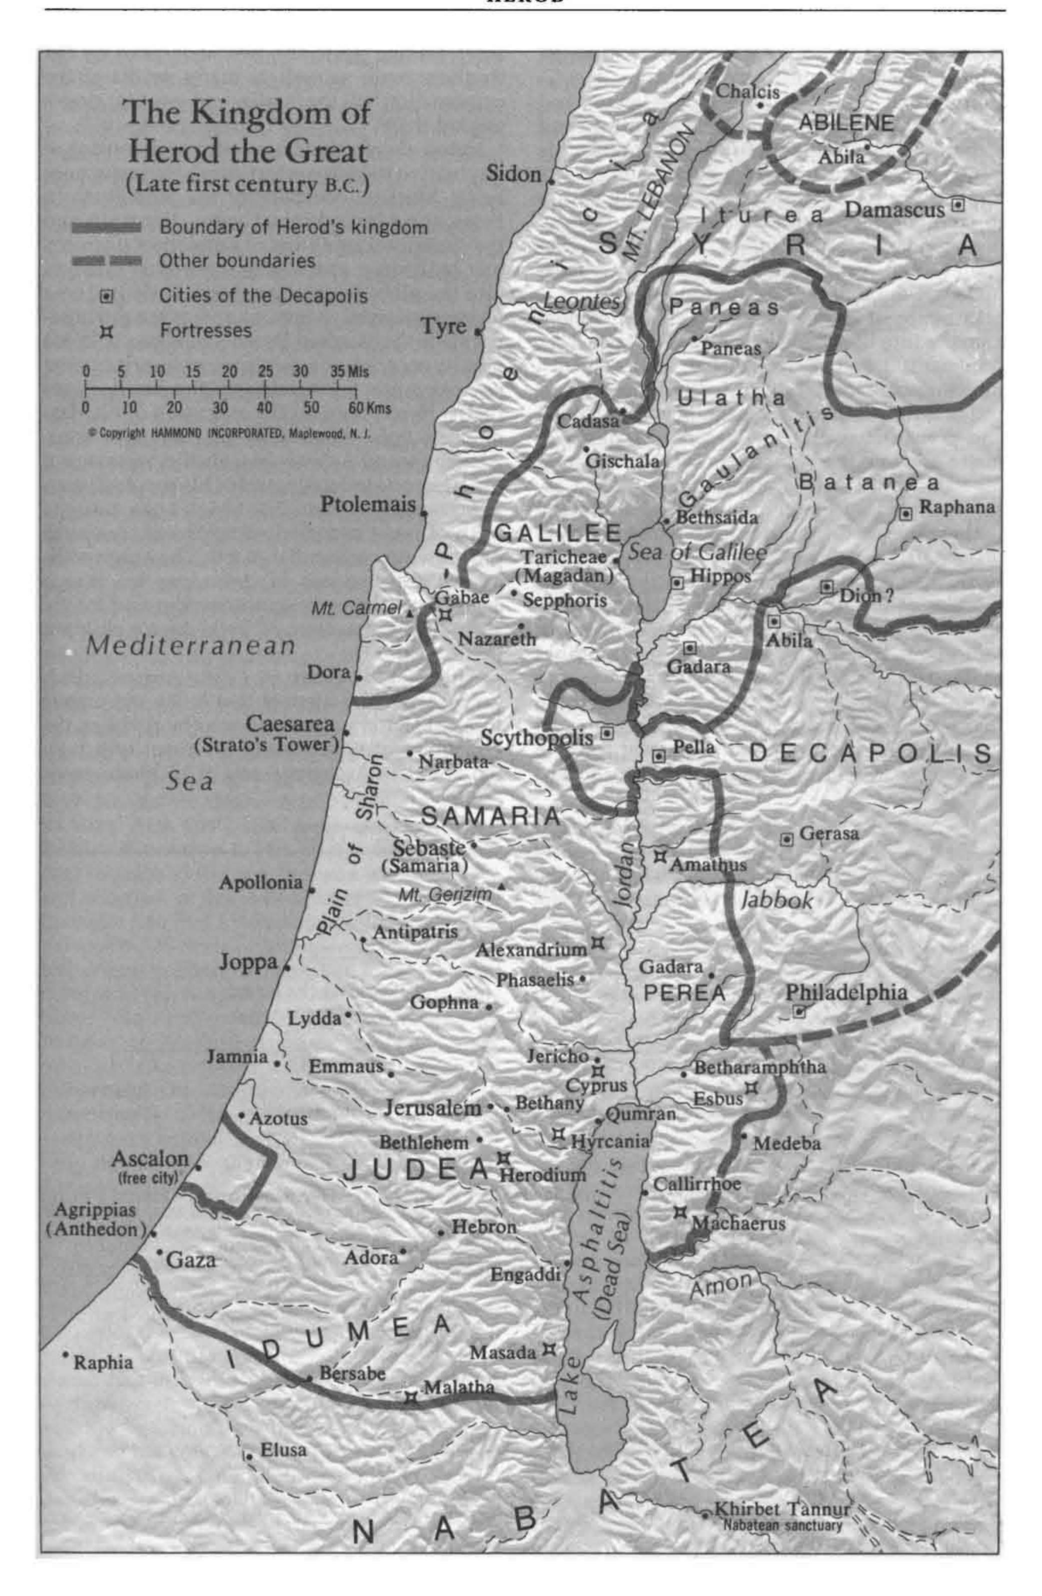
Hermes (huhr´meez). **1** The divine messenger of the Greek gods. Originally a demon that

haunted the piles of stones set up as roadside markers, Hermes was the messenger of the greater gods, especially Zeus. He was also a trickster who stole Apollo's cattle and was thought to have invented the lyre. Paul and Barnabas are mistaken for Hermes and Zeus when they visit Lystra and Paul heals a cripple there (Acts 14:12). **2** A Christian greeted in Rom. 16:14.

Hermogenes (huhr-moj´uh-neez), Asian Christian known only as one who deserted Paul (2 Tim. 1:15). ***See also*** Phygelus.

Hermon (huhr´muhn; Heb., "sacred" or "forbidden"), the three-peaked summit at the southern end of the Anti-Lebanon range. It rises 9,230 feet (2,814 m.) above sea level and is the highest point in the entire Levant, 1,968 feet (600 m.) higher than any part of the Lebanon mountains and towering above the Bashan plateau and upper Jordan valley. According to Deut. 3:9, "the Sidonians call Hermon Sirion, while the Amorites call it Senir," and these three names are sometimes used together in the OT (Deut. 4:48; 1 Chron. 5:23). Ps. 42:6 speaks of the "Hermons," which may refer to the three peaks.

Heavy precipitation, well over 40 inches (1,000 mm.), mainly in the form of snow, falls on the summit and western slopes and sinks through the porous sandstone to supply the powerful sources of the Jordan and Litani rivers and the oasis of Damascus. Snow covers the upper regions during the entire winter and early spring and in sheltered crevices may persist even as late as the end of October. Villages with vineyards and orchards are plentiful on the western slope up to about 3,300 feet (1,000 m.). In the ancient past these slopes were thickly forested (Ezek. 27:5) and the home of lions and leopards (Song of Sol. 4:8). Earlier in this century the Syrian bear was still to be found here. Evidently a sacred mountain (Judg. 3:3 calls it "Baal-hermon"), it formed the northernmost limit of Joshua's conquests (Josh. 11:3, 17; 12:1, 5; 13:5, 11). Some have speculated that it may have been the scene of the transfiguration of Jesus, since Caesarea Philippi lies at its foot. ***See also*** Anti-Lebanon; Bashan; Caesarea Philippi; Damascus; Jordan River, The; Transfiguration, The; Transjordan. D.B.



Mt. Hermon rises 9,230 feet above sea level and towers above the upper Jordan Valley.

Herod (hair´uhd), name of a family of Idumean origin with strong connections with the Roman government who, from the time of Queen Alexandra (76–67 B.C.), became centrally involved in the affairs of the Jewish state. Members of the family, under a variety of titles, governed Palestine and adjacent areas from ca. 55 B.C. until near the close of the first century A.D. The name "Herod" is Greek and originated with a shadowy ancestor about whom, even in antiquity, little was known. Two ancient traditions make him either a descendant of a notable Jewish family with a lineage traceable to the Babylonian exile or a slave in the temple of Apollo in the Philistine city of Ashkelon. Neither can be proved.

The first Antipater, the grandfather of Herod the Great, rose to the position of military commander of his native Idumea under the Hasmonean rulers Alexander Jannaeus (103–76 B.C.) and Alexandra. The Idumeans had been forcibly converted to Judaism by John Hyrcanus (134–104 B.C.), and thus the family of Herod was, at least technically, Jewish. Herod's father, also named Antipater (or Antipas), was by all accounts not only a skilled soldier but also a shrewd politician and diplomat. His successful intervention in favor of Hyrcanus II in the latter's struggle for supremacy with his brother Aristobulus, coupled with the outstanding services he rendered to Pompey and Julius Caesar in their campaigns, earned him Roman citizenship and the post of procurator of Judea, granted by Caesar in 47 B.C. Antipater and his Nabatean wife, Cypros, had four sons and a daughter, and the two eldest, Phasaelus and Herod, were nominated by their father as governors (Gk. *stratēgoi*), the former of Judea and the latter of Galilee. The following members of the family appear in the NT:

1 Herod I (Herod the Great), king of the Jews. He was probably about twenty-five years old when, as governor of Galilee, he successfully campaigned against Galilean bandits, executing the leaders and coming out of the subsequent showdown with the Jewish Sanhedrin in Jerusalem not only politically stronger but also with enhanced status in the eyes of Rome. When, in 40 B.C., the Roman Senate appointed Herod king of the Jews, he was given a prize still requiring conquest, for on the throne of Judea sat Antigonus II, the last of the Hasmonean rulers, newly placed there by Rome's enemies, the Parthians. Herod succeeded, with the backing provided by his friend Mark Antony, in taking Jerusalem in 37 B.C. Antigonus was executed by the Romans at Herod's request, and, in the same year, Herod

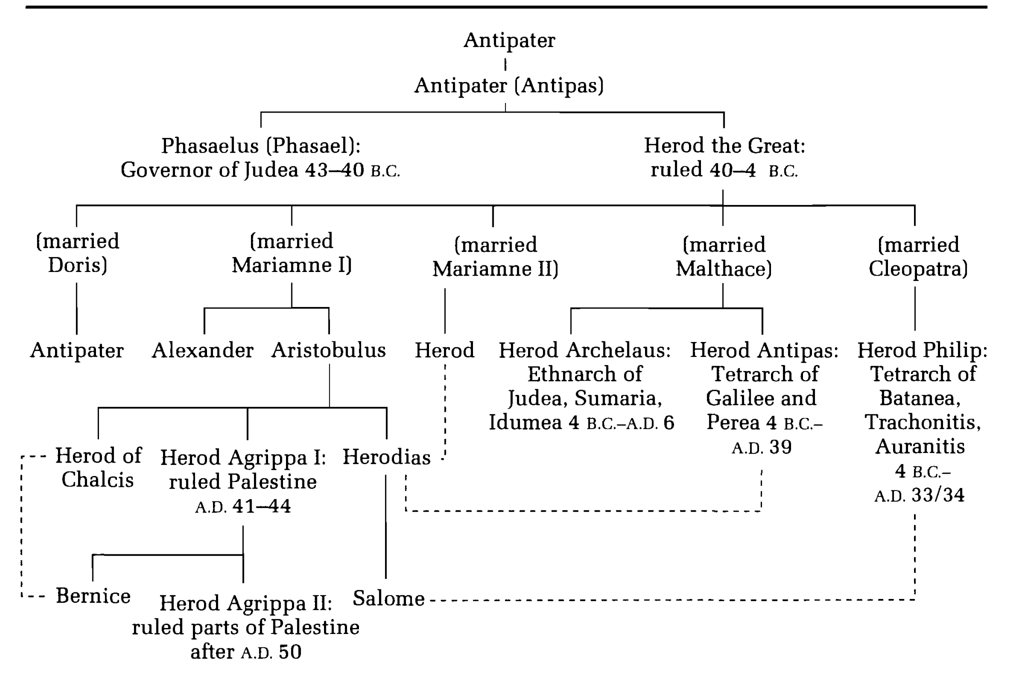
married Mariamne I, a Hasmonean (one of ten wives). From 37 until his death in 4 B.C., Herod ruled as king of the Jews, a reign marked by his total loyalty to Rome, his grandiose and sometimes magnificent building programs, his family strife, and his harsh repression of any opposition. Herod showed an uncanny ability to maintain favor with the Roman leadership, managing, for example, to switch his allegiance from Antony to Octavian (later Augustus) after the Battle of Actium in 31 B.C.



In honor of Augustus, Herod rebuilt ancient Samaria into the Hellenistic city of Sebaste (Gk., "Augustus"), and he constructed, on the site of a minor anchorage on the Mediterranean coast called Strato's Tower, the magnificently planned and constructed city of Caesarea Maritima, a major port and the Roman administrative center for Palestine. There is much to admire in Caesarea, including the enormous blocks of stone with which a breakwater was constructed to make a harbor, the sewers that were designed to be flushed out by the sea, and the theaters and temples of the city. The crown of Herod's constructions, however, was the Temple in Jerusalem, which he rebuilt on a grandiose scale. The project, begun in 20 B.C., was not completed until A.D. 62, and it is this Temple that Jesus and his disciples knew. Recent excavations along the south and southwest walls of the Temple Mount have revealed the broad stairways leading up to the two wide gates on the southern wall, as well as many details of the construction of the walls and of the streets around them.

Herod also fortified his realm with a string of impressive wilderness fortresses, the major ones being Masada, Machaerus, the Herodium in Perea, the Alexandrium, Cypros, Hyrcania, and the Herodium southeast of Bethlehem (the only one built on a previously unfortified site and also the place where Herod was buried). These fortresses served as prisons and, given the internal strife that marked Herod's relations with his family, occasionally as places of imprisonment and execution for members of the family. Eventually, Herod ordered the execution of his Hasmonean wife, Mariamne, of their two sons, Alexander and Aristobulus, of other members of the Hasmonean family, and of his son Antipater.

According to Matt. 2:1–18 (cf. Luke 1:5), the birth of Jesus occurred while Herod was king, probably no earlier than 6 B.C. The king's well-known ruthlessness in defending his throne against any threat forms the background for the story of the massacre of Bethlehem's children (Matt. 2:16–17).

After Herod's death in 4 B.C., Augustus Caesar resolved the dispute that broke out among three of Herod's surviving sons by dividing the kingdom but withholding the royal title from the heirs. To Archelaus, son of Malthace, went

THE HERODS: A SIMPLIFIED FAMILY TREE

the title "ethnarch" and half of the territory (Judea, Idumea, and Samaria). The other half was split into two tetrarchies: Antipas, younger brother of Archelaus, received Galilee and Perea; Philip, son of Cleopatra, received Batanea, Trachonitis, and Auranitis. ***See also*** Augustus; Caesarea; Ethnarch; Idumea; Maccabees; Phasael; Samaria, City of; Temple, The; Tetrarch.

2 Herod Archelaus, son of Herod the Great and ethnarch of Judea, Samaria, and Idumea (4 B.C.–A.D. 6). ***See also*** Archelaus.

3 Herod Philip, son of Herod the Great and tetrarch of Batanea, Trachonitis, and Auranitis (4 B.C.–A.D. 33/34). He ruled uneventfully and apparently successfully in his northern domains. His name is remembered in that of Caesarea Philippi (see Matt. 16:33; Mark 8:27), which was his rebuilding of the ancient Panias near the springs of the Jordan River. Philip apparently married his niece Salome, daughter of Herodias and of Philip's half-brother Herod the son of Mariamne (Mark 6:17 and Matt. 14:3 apparently confuse Philip and Herod). ***See also*** Caesarea Philippi; Herodias; Salome.

4 Herod Antipas, son of Herod the Great and tetrarch of Galilee and Perea (4 B.C.–A.D. 39). He is "that fox" of Luke 13:31–32 and the Herod most frequently mentioned in the NT. Both Jesus and John the Baptist were his subjects and carried out their public careers mostly in his territories (Matt. 14:1–12; Mark 6:14–29; Luke 3:19–20; 9:7–9; Mark 8:15; Luke 13:31–32; 23:6–16; Acts 4:27). His career was dominated by his relationship to Herodias, whom he married in spite of the fact that she was his niece and married to his half-brother Herod when they met and that he was compelled to divorce a daughter of Aretas, the powerful king of the Nabateans, in order to marry her. John, who, according to the Gospels, had criticized this marriage, was imprisoned and later executed by Antipas at Machaerus (Matt. 14:1–12; Mark 6:14–29; Luke 3:19–20; 9:7–9). According to the Gospel of Luke, Antipas also played a role in the trial of Jesus (Luke 23:6–16; Acts 4:27).

Antipas's capital was Tiberias, characteristically named after the Roman emperor, which Antipas built on the shore of the Sea of Galilee and which was later to play a central role in the history of Judaism. Antipas's star set as that of his nephew and brother-in-law Agrippa was rising. When Gaius Caligula became emperor, he granted to Agrippa Philip's former territories, but with the title of king. Under Herodias's prodding, Antipas went to Rome to seek royal status. Not only did he fail, but the agents of Agrippa accused him of crimes against Rome, and the outcome for him was deportation to Gaul and the grant of his territories to Agrippa. Herodias, to her credit, followed him into exile. ***See also*** Herodias; John the Baptist; Tiberias.

5 Herod Agrippa I. ***See*** Agrippa I.

6 Herod Agrippa II. ***See*** Agrippa II. F.O.G.

Herodians (hi-roh´dee-uhnz), a term found twice in Mark (3:6; 12:13; also 8:15 in some manuscripts) and once in Matthew (22:16 = Mark 12:13) but never in Luke or John, designating a group who, together with the Pharisees, opposed Jesus. If the name refers to an actual party or faction, it may have been the supporters of the rule and policies of Herod Antipas. Both Matthew and Mark associate them with the Pharisees in putting before Jesus the difficult question regarding paying taxes to Caesar (Matt. 22:15–22; Mark 12:13–17). ***See also*** Herod; Pharisees.

Herodias (hi-roh´dee-uhs), the daughter of Aristobulus and Bernice and thus a granddaughter of Herod the Great and sister of Herod Agrippa I. She was married twice: first, to her paternal half-uncle Herod (erroneously called Philip in Matt. 14:3, not all manuscripts, and Mark 6:17), to whom she bore a daughter, Salome; then, once again to a half-uncle, Herod Antipas. The second marriage, carried out after she abandoned her first husband and Antipas divorced his royal Nabatean wife, brought about their public condemnation, according to the Gospels, by John the Baptist and Herodias's retaliation by having her daughter Salome ask for John's head as a prize (Matt. 14:3–12; Mark 6:17–29; cf. Luke 3:19–20; 9:7–9). ***See also*** Herod; John the Baptist; Salome. F.O.G.

heron, any of the family *Ardeidae* of wading birds with long thin legs and necks who feed on fish and other marine life. The Hebrews considered them unclean (Lev. 11:19; Deut. 14:18).

Heshbon (hesh´bon), a city of northern Moab captured by the Amorite king Sihon, who made it his capital (Num. 21:26–30). The Israelites defeated Sihon in their first battle in Transjordan (Num. 21:21–24; Josh. 12:2) and distributed his territory to Reuben and Gad, assigning Heshbon to Reuben (Num. 32:37). Later, Heshbon was considered Gad's inheritance (Josh. 13:27) and allotted to the Levites (Josh. 21:39). Prophetic oracles against Moab mention Heshbon (probably restored by Mesha, ca. 830 B.C.) falling before unnamed enemies. Heshbon reappears (as Esbus) in documents of the Hellenistic and Roman periods, but it is not mentioned in the NT.

Excavations undertaken by Andrews University (1968–1976) at the tell near the modern Jordanian village of Hesban reveal successive occupations from the early Iron Age through Late Mamluk (ca. 1200 B.C.–A.D. 1456) with a gap from ca. 500 to 250 B.C. Lack of Bronze Age remains and sparse evidence for early Iron Age settlement suggest necessary reassessment either of the site identification or of the historical reliability of the Sihon tradition. ***See also*** Gad; Moab; Moabite Stone, The; Reuben; Sihon. P.A.B.

Heth (heth), in the Table of Nations (Gen. 10:15; 1 Chron. 1:13) the son of Canaan and great-grandson of Noah, and the eponymous ancestor of the Hittites. The "sons of Heth" witnessed Abraham's purchase of the Cave of Machpelah from Ephron (Gen. 23:6, 16, 18). Rebekah was annoyed by Esau's marriage to a "daughter of Heth" (Gen. 27:46). Ezekiel describes Jerusalem's ancestry with the words "your father was an Amorite, and your mother a Hittite" (Ezek. 16:3, 45). ***See also*** Canaan, Canaanites; Hittites; Noah.

Hexateuch (hek'suh-t*oo*k), the first six books of the OT. The term connotes a theological unity, exposed by a specialized method of biblical study (form criticism), in contrast to the canonical unity defined by the term Pentateuch (the first five books of the OT). The structure of the Hexateuch corresponds to the structure of several brief, credo-like speeches set in a context of worship (e.g., Deut. 26:5–11; Josh. 24:1–28). These speeches recite God's acts on behalf of Israel in four units: promise for progeny and land in Canaan to the patriarchs, exodus from oppression in Egypt, leadership through the dangers of the wilderness, and conquest of the land in Canaan. Each section begins with its own theologically oriented introduction. Each narrates a span of traditions in order to show the completion of the theological theme introduced at the head of the unit.

The four units in the credo speeches exclude reference to God's gift of the law at Sinai, suggesting that the Sinai traditions were originally distinct from the credo traditions. They belonged perhaps to a different group of people whose sacred traditions became a part of the OT story when they became a part of the people who remembered a common past. It is also possible to explain the absence of the Sinai tradition from the credo speeches in other ways, however. Perhaps Sinai was not included in the recitation of God's deeds because the events at Sinai were conceived in a totally different way from the patterns of the other four. Perhaps the Sinai narratives, not attached to a special introduction as the other four are, were conceived as part of the wilderness theme of traditions rather than as a distinct theme or an independent narrative. In that case, the structure of the Hexateuch would reveal its theological connections, not simply in the patterns of the cultic credo with their confessions about God's acts on Israel's behalf, but in its alternation between stories about God's acts on behalf of Israel and stories about God's gift of the law that defines Israel's response to those acts. The alternation, intrinsic for the character of the Hexateuch, depicts interaction between grace and law. To isolate the law (Sinai) from the grace (the credo traditions) violates the present structure of the Hexateuch.

The relationship between law and grace in these traditions is, moreover, of greater importance than would be implied by a simple juxtaposition of narratives about God's acts and narratives about the gift of the law. The acts of God described by the traditions about the patriarchs, exodus, wilderness, and conquest already imply the law defined by the Sinai narratives. To be redeemed from the house of bondage is to hear the imperative from God to respond in particular ways. To receive the grace resident in the descriptions of God's acts without receiving the law that follows is to deny the grace and its claims on its audience.

The theological structure of the Hexateuch focuses not only on God's mighty acts but also on the critical leadership of the people chosen by God to stand at the head of his flock. For the theology of the Hexateuch, to believe in God, to draw identity as the people of God from the covenant relationship established for the people by God, is at the same time to believe in Moses (Exod. 14:31), or with other particular traditions, to believe in Abraham or Joshua. The Hexateuch reveals a dual character in both its theological affirmations and its literary structure: God redeems his people; his chosen servants contribute substantively to the process.

The contrast between Hexateuch and Pentateuch can be defined in another manner. The Pentateuch comprises the Moses saga in relationship to the sagas about the patriarchs and the primeval period. A critical problem in defining the structure of the Pentateuch/Hexateuch lies in the relationship between the Moses traditions and the patriarchal traditions, between stories about Israel in Egypt and the stories about the fathers of Israel in Canaan. The Hexateuch comprises the Moses saga in relationship to the sagas about the patriarchal age, thus encompassing the same problem in the history of the traditions as found in the Pentateuch, plus the Moses saga in relationship to the Joshua saga. The Hexateuch thus unites a broader range of traditions than does the Pentateuch by including in its history the traditions about the conquest of the Promised Land. ***See also*** Sources of the Pentateuch.

Hezekiah (hez'uh-k*i*'uh; Heb., "God strengthens"), the son of Ahaz and king of Judah (727–698 B.C.). He was considered by the author of the book of Kings to have been utterly loyal to the Lord, God of Israel; "there was no one like him among all the kings of Judah after him, nor among those who were before him" (2 Kings 18:3–6). This commendation is based on

Hezekiah's attention to ritual matters in his kingdom: he closed down all rural cult sites ("high places") throughout Judah, thereby centralizing sacrifice at the altar of the Temple in Jerusalem (cf. 2 Kings 18:22). He also banned many fetishes that had become common practice: the use of sacred pillars and trees (asherah) and the reverencing of the "bronze serpent" (Heb. *nehushtan*) associated with Moses and the miraculous healing of the people attacked by scorpions in the desert (Num. 21:4–10).

Hezekiah's Reign: Hezekiah's reign fell during the age of major Assyrian military and commercial activity in Phoenicia and the Philistian coast. Shalmaneser V campaigned twice in the area and in 722 conquered Samaria. His successor, Sargon II, reconquered Samaria in 720 and marched as far as Rapiah, where he engaged an Egyptian force supporting the local rulers in their rebellion against Assyria. Four years later, Sargon appeared again, this time founding a trading colony south of Gaza, based in part on cooperation with local Arab tribes of the western Negev. The rebellion in Gaza in 713 was quelled by Sargon's commander-in-chief ("Tartan," see Isa. 20:1, KJV) in 712 and the city was annexed to the Assyrian Empire.

A section of the tunnel that brought water from the Gihon spring to the Pool of Siloam, built during the reign of King Hezekiah (727–698 B.C.) to ensure Jerusalem's water supply during a siege.

Throughout this decade, Hezekiah remained a vassal of Assyria, a status he inherited from his father Ahaz and accepted as the prudent course of state. But in his fourteenth year as king, in 713, Hezekiah received the Babylonian delegation of Merodach-baladan (2 Kings 18:13; 20:12–13) and this diplomatic dealing with the sworn enemy of Sargon is indicative of an anti-Assyrian undercurrent in Judah. Hezekiah was likely involved in the political stirrings in Philistia. Although Sargon does not claim to have engaged Judah outright, several fortresses in the Judean Shephelah (Ekron, Gibbethon and perhaps Azekah) did fall to the Assyrian armies.

Rebellion Against Assyria: Hezekiah openly broke with Assyria in 705; the death of Sargon had been the signal for rebellion throughout the empire. In the west, Hezekiah was the driving force behind the military coalition that was to face the new monarch Sennacherib. Hezekiah moved into the coastal plain with force (2 Kings 18:8) and he ousted rulers who were hostile to his policies. As part of his plans for preparedness, Hezekiah secured Jerusalem's water supply in the event of siege by the drilling of the Siloam tunnel (2 Kings 20:20; 2 Chron. 32:3–4). But Hezekiah's efforts were no match for Sennacherib's superior forces. In 701, Sennacherib campaigned in the west. The Phoenician cities succumbed quickly and the allies in Philistia were defeated, despite the support lent them by an Egyptian expeditionary force (2 Kings 19:9). A biblical chronistic extract reports: "Sennacherib king of Assyria came up against all the fortified cities of Judah and took them" (2 Kings 18:13). Sennacherib's inscription concurs: "As for Hezekiah of Judah, who did not submit to my yoke, I laid siege to 46 of his strong cities, walled forts and to the countless small villages in their vicinity, and conquered them. . . . I drove out 200,150 people, young and old, male and female, horses, mules, donkeys, camels, big and small cattle, beyond counting and considered them booty."

Jerusalem came under siege and negotiations were conducted by a high-level Assyrian team and Hezekiah's advisors for Hezekiah's total surrender. Sennacherib claims that he "made him a prisoner in Jerusalem, his royal residence, like a bird in a cage." Though the prophet Isaiah counseled holding out, for the Lord "will defend this city to save it" (2 Kings 19:34), Hezekiah submitted to the Assyrian demands and paid a heavy indemnity (2 Kings 18:14–16). Jerusalem did not, however, become prey to the Assyrians and in prophetic circles this "salvation" was celebrated as vindication of Isaiah's prophecy of divine intervention. It was told: "That night an angel of the Lord went forth, and slew one hundred and eighty-five thousand in the camp of the Assyrians, and . . . early in the morning, behold, these were all dead bodies" (2 Kings 19:35). Much of Judah's territory was transferred to the

coastal city-states loyal to Assyria, and Hezekiah resumed his vassal status as king of Jerusalem and its immediate environs.

Though Hezekiah is highly praised in the book of Kings, a later generation criticized him for his Babylonian entanglements; they saw in these moves the seed of the Babylonian exile over a century later (2 Kings 20:16–19). In the NT, Hezekiah is listed in the genealogy of Jesus (Matt. 1:9–10). ***See also*** Isaiah, The Book of; Kings, The First and Second Books of the; Sennacherib. M.C.

Hezron (hez´ruhn). **1** The father of a Reubenite tribe (Gen. 49:6; Exod. 6:14; Num. 26:6; 1 Chron. 5:3). **2** The father of a Judean tribe (Gen. 46:12; Ruth 4:18–19; Matt. 1:3; Luke 3:33). **3** A city on the south border of Judah (Josh. 15:3).

Hiddekel (hid´uh-kel), the term in the KJV for the RSV's "Tigris," the major eastern river in Mesopotamia (modern Iraq; Dan. 10:4; Gen. 2:14). ***See also*** Tigris River.

Hiel (h*i*´uhl; Heb., "God is brother"), a man from Bethel whose two sons died when he violated Joshua's curse (Josh. 6:26) by rebuilding Jericho (1 Kings 16:34).

Hierapolis (h*i*´uh-rap´uh-lis), a city of Asia Minor located in the upper Lycus valley close to the hot springs of Pamukkale. It is one hundred miles east of Ephesus, twelve miles from Colossae, and six miles from Laodicea. Although originating probably as the village center of a temple estate dedicated to the Phrygian mother goddess, Hierapolis grew and finally received formal status as a city from the King of Pergamum in the early second century B.C. In 133 B.C. Rome took control of Hierapolis and made it part of the province of Asia. Its subsequent prosperity was largely based on its famous textile and cloth dyeing industry. Both grave inscriptions and literary evidence (Cicero, *Pro Flacco 68;* see Josephus, *Antiquities* 12.147–53) indicate a substantial Jewish presence around Hierapolis. Col. 4:13, the sole NT reference, reports that Epaphras "labored much" for the Christians in Colossae, Laodicea, and Hierapolis. Hierapolis' extensive remains include a Roman theater (now restored), baths, city walls, and a necropolis. ***See also*** Asia; Colossae; Epaphras; Ephesus; Laodicea; Pergamum. R.A.W.

higgaion (hi-gay´yon), a Hebrew word that appears in three Psalms. In two of them it seems to have some sort of musical connotation: in Ps. 9:16, where it occurs with the unknown word Selah and is simply transliterated, and in Ps. 92:3, where it is translated "melody" (KJV: "solemn sound"). In Ps. 19:14, it is translated "meditation."

high place, an elevated location used for religious rites. "High place" in the OT translates the Hebrew *bamah,* pl. *bamoth,* a rendering deriving from the Septuagint and Vulgate. The plural means "heights" (of the earth) in a number of passages (e.g., Deut. 32:13; Isa. 58:14; Amos 4:13) and usually bamoth were situated on high ground, as in the regular Deuteronomic description of them as "upon the high mountains and upon the hills and under every green tree" (Deut. 12:2). But there were also bamoth within towns (2 Kings 17:9) and in valleys (Jer. 7:31; 32:35; Ezek. 6:3), and they are commonly spoken of as being "built" (e.g., 1 Kings 14:23) and, when removed, "broken down" (e.g., 2 Chron. 31:1). Thus the *bamah* was not simply a natural shrine and it is now generally agreed that, in its religious sense, the word means an artificially constructed platform on which sacrifices were offered and cultic objects placed, though it always seems to have been in the open air.

The high place was a common feature in the religions of the small states surrounding Israel, such as Moab (Jer. 49:35), where the word occurs in line 3 of the victory stele of the ninth-

A bronze model of an Elamite sanctuary, or "high place," found at Susa, twelfth century B.C.

Ten large stelae at Gezer may have been a Canaanite "high place" (cf. 2 Kings 18:4); Middle Bronze Age.

century B.C. Moabite king Mesha, and Ammon (1 Kings 11:7), and its use appears to be confined to this area. In the OT, it is characteristic of the Canaanite fertility religion and the worship of Baal (Jer. 19:5; 32:35), so it is generally strongly condemned, especially in Deuteronomic passages in the book of Kings, in Chronicles, and in the Prophets, and reforming kings destroyed the high places (2 Kings 18:4; 23:8, 13, 15, 19). The rites practiced at the high places and the cultic objects found there are typically Canaanite: ritual prostitution (1 Kings 14:23–24; Ezek. 16:16), child sacrifice (Jer. 7:31; 19:5; 32:35; Ezek. 16:20), sacrifices and the burning of incense (1 Kings 22:43; 2 Kings 12:3), the stone pillar symbolizing Baal, and the wooden pole symbolizing the goddess Asherah (1 Kings 14:23; 2 Kings 17:10). It has been suggested that the *bamah* was a burial mound and that the high place was where rites of the dead were celebrated, but there is no real evidence for this.

Role in Popular Religion: From the OT denunciations, it is clear that the high places had a central part in popular religion and, before the Deuteronomic demand for their destruction and the centralization of worship at a single sanctuary, they were considered a legitimate feature of the worship of Yahweh. In 1 Sam. 9:12–24, we find Samuel sacrificing and presiding at the attendant meal at the high place of Ramah, which was situated above the town, and in 1 Sam. 10:5 a band of prophets has clearly been worshiping at the high place of Gibeath-elohim. Cultic platforms, either circular or rectangular in shape, which were used for sacrifice, have been recognized as *bamoth* by archaeologists at several Palestinian sites during the period of Israelite occupation, among them Hazor and Arad; the one discovered at Dan was almost certainly built by Jeroboam I (1 Kings 13:32).

The word *bamah,* however, is also used in the OT in a wider sense to denote the whole of a sanctuary or shrine and the complex of buildings it contained, such as the hall of Ramah (1 Sam. 9:22) or other cultic structures (1 Kings 13:32). Before the Deuteronomic reform (ca. 630 B.C.), a number of these sanctuaries, such as Shechem, Bethel, Gilgal, Shiloh, and above all Jerusalem, achieved a far greater importance than the small local high places, and their individual traditions are very significant for Israel's religion in the period of the monarchy (ca. 1025–586 B.C.). Characteristic of these are stories that ascribe their foundation to great figures of the past, who are often said to have erected an altar or some other cultic object at the place and to inaugurate the worship of Yahweh there. So Abraham founded Hebron (Gen. 13:18); both he and Isaac are said to have founded Beer-sheba (Gen. 21:33; 26:23–25). Jacob founded Bethel (Gen. 28:18–22; 35:7, 14–15) and Shechem (Gen. 33:18–20), with which Joshua is also associated (Josh. 8:30–35). Joshua erected the twelve stones marking the shrine at Gilgal (Josh. 4:20–24), while 2 Samuel 24 is the sacred legend of the Jerusalem sanctuary, telling how it was inaugurated by David.

Importance: However, the real reason for the great attention paid to these sanctuaries is that they were originally important Canaanite centers, both before and after the first arrival of the Israelites. The stories of their founding by the patriarchs and other heroes are intended to legitimize their adoption by Israel, to claim that they had always been Israelite. The details of Gen. 28:10–22, especially v. 19, show that Bethel was not a deserted spot but an ancient Canaanite city and sanctuary. Shechem remained Canaanite long after the time of Jacob and the center of a non-Yahwistic religion (Judg. 9:4, 27, 46), and the pillar and the tree in the sanctuary there are the regular features of a Canaanite high place (Josh. 24:26; Judg. 9:6). Again, it should be noted how often the patriarchs invoke Yahweh by titles of the great Canaanite deity El, by which he was known at different sanctuaries (El Elyon, Gen. 14:22; El Olam, Gen. 21:33; El Bethel, Gen. 31:13; cf. Jer. 48:13). Inevitably, this brought about a degree of fusion between Yahwism and Canaanite religion and even worship by Israelites of the fertility deity Baal, which incurred the condemnation of Deuteronomists and prophets (Hos. 2:2–20). But the influence of Canaan through the sanctuaries was not wholly negative: Shechem's deity was called the "god of the covenant" and this encouraged the development there of a great Israelite celebration of the renewal of the Sinai covenant and the reading of the law (Deut. 27). And Israel's three great annual pilgrimage feasts (Exod. 23:14–18) were agricultural occasions originally held at the Canaanite shrines. Another reason for the importance of certain high places was that they were the sanctuaries of particular tribes, as may be seen in the case of the one founded by the tribe of Dan, though again on an old Canaanite site (Judg. 18:27–31). It is possible

that, in the premonarchical period, a sanctuary like Shiloh functioned as a center for the whole tribal confederation, marked by the presence of the Ark as a national symbol (1 Sam. 4:1–4). With the establishment of the monarchy, the sanctuaries that enjoyed royal patronage achieved outstanding importance. This was particularly the case with Jerusalem in the south and with Bethel in the Northern Kingdom (Amos 7:13).

It was the great prestige of Jerusalem that enabled the implementation of Deuteronomy's program by Josiah, who destroyed all the numerous high places in both the south and north (2 Kings 23:4–20) and left the Temple at Jerusalem as the sole place where Yahweh could be worshiped. The Babylonian invasion a few years later (early sixth century B.C.) probably brought about the destruction of any high places that may have lingered on. From this time on, nothing further is heard of them, and on the return from Exile it was only the Jerusalem sanctuary that was reestablished (Ezra 3). ***See also*** Ark; Covenant; Deuteronomy; Josiah.

high priests. ***See*** Priests.

Hilkiah (hil-kī´uh; Heb., "God is my portion"). **1** A Levite from the line of Merari (1 Chron. 6:45). **2** The son of Hosah, a Merarite Levite in the time of David (1 Chron. 26:11). **3** The father of Eliakim, a royal official in the time of King Hezekiah (2 Kings 18:18; see Isa. 22:20). **4** The father of Jeremiah, a priest (Jer. 1:1). **5** A high priest in the late seventh century B.C. who reported that a book of the law had been found at the Temple (2 Kings 22–23; see 2 Chron. 35:8). He appears to have been an ancestor of Ezra (Ezra 7:1, see 1 Chron. 6:13–15). **6** The name of several other OT figures (see Jer. 29:3; Neh. 8:4; 12:7; Bar. 1:1; Sus. 2). F.E.G.

hill country, a general designation in the Bible for those parts of the Holy Land that are hilly rather than flat. Since the land of Palestine has a mountainous spine running its length between the Jordan River to the east and the Mediterranean Sea to the west, any area along that spine can be designated "hill country." In addition, the hills found along the east bank of the Jordan River also constitute an upland area, any part of which can be termed "hill country."

Among the areas identified as "hill country" are parts of Seir, south of the Dead Sea (Gen. 36:8); the area of the Jebusites (Josh. 11:3); the dwelling place of the Anakim (Josh. 11:21); areas in both Judah and Israel (Josh. 11:21); and the tribal areas of Naphtali and Ephraim (Josh. 20:7), among many others. Indeed, hill country could be identified from as far south as the Wilderness (1 Sam. 23:14) to as far north as the land of the Amorites, near the head of the Euphrates River (Num. 13:29). In the NT, the story of Jesus begins in the hill country of Judah (Luke 1:39, 65). D.B.

hind, the female adult red deer, a symbol of beauty (Prov. 5:19) and desperate loyalty (Jer. 14:5). ***See also*** Hart.

Hinnom (hin´uhm), **Valley of,** a valley known also as the "Valley of the Son, or Sons, of Hinnom." It was probably the Wadi er-Rababi, beginning west of Jerusalem near the present Jaffa Gate, and curving round south of the Old City to join the Kidron Valley. It was entered from the "Potsherd Gate" (Jer. 19:2, 6) and formed part of the boundary between Judah and Benjamin (Josh. 15:8; 18:16; Neh. 11:30). It is notorious in the OT as the scene of much idolatry, including the sacrifice of children, especially under Ahaz and Manasseh (mid-eighth to mid-seventh century B.C.; 2 Chron. 28:3; 33:6) and again in Jeremiah's day (Jer. 7:30–34; 32:35), despite the abolition of such practices by Josiah (2 Kings 23:10). Such evil associations caused its Hebrew name gehinnom (hence "Gehenna") to be identified with hell (e.g., Matt. 5:22, 29; 23:15, 33; Mark 9:43, 47; James 3:6). ***See also*** Ahaz; Gehenna; Josiah; Manasseh. D.B.

Hiram (hī´ruhm; shortened from Heb. *Ahiram,* "my brother [god] is exalted" or "brother of the exalted one"; alternatively Huram [Chronicles]). **1** The king of Tyre, and a contemporary of David and Solomon. Hiram I, son of Abibaal, was nineteen years old when he ascended the throne, and he reigned thirty-four years (ca. 969–935 B.C.). The kingdom he established is vividly pictured by Ezekiel (chaps. 26–27). Under Hiram's rule Tyre became the leading city of Phoenicia, which launched a colonial empire that spread over the whole of the Mediterranean. He enlarged the island city of Tyre by uniting it with a smaller island and undertook extensive building programs.

The power of the Philistines was apparently broken by an alliance between the Tyrian kings Abibaal and Hiram on the one hand (at sea) and David on the other (on land). David traded with Hiram for materials and craftsmen to build his royal palace in Jerusalem (2 Sam. 5:11; 1 Chron. 14:1). David established a treaty with Hiram, which was renewed by Solomon who also

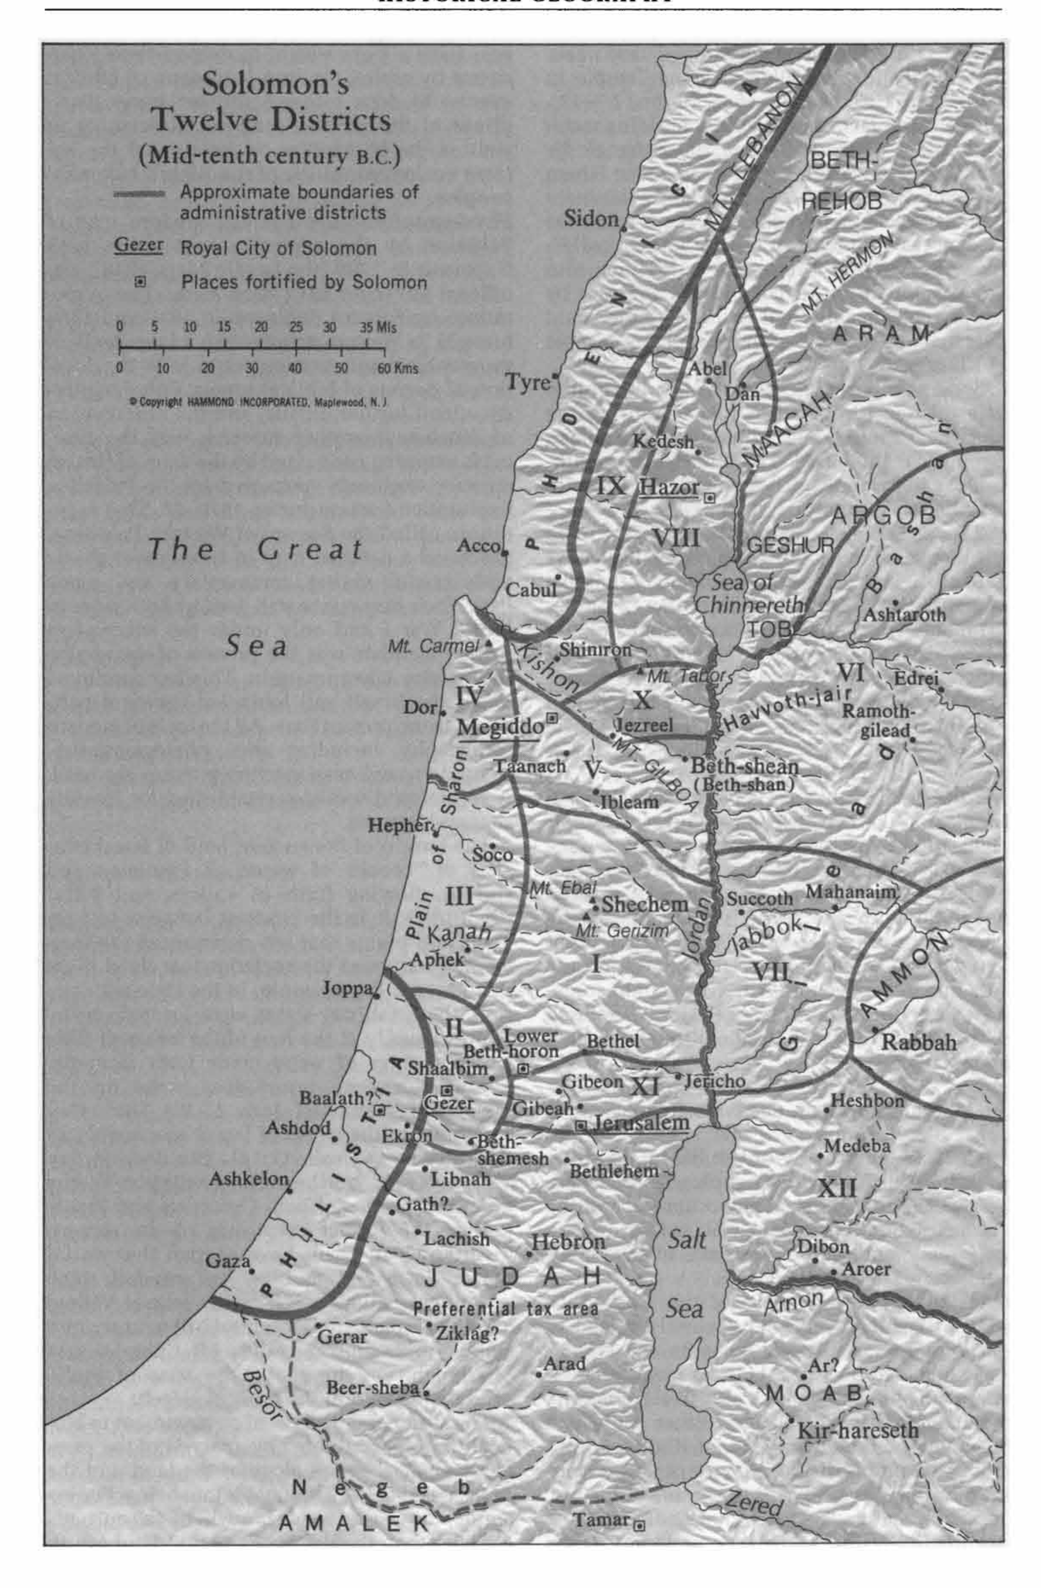
traded with him for materials and craftsmen, particularly in the building of the Temple in Jerusalem (1 Kings 5:12–18; 2 Chron. 2:3–12). Hiram supplied cedar and other building materials, along with craftsmen, in exchange for wheat and olive oil. Some years later Hiram gave Solomon gold and another larger shipment of cedar and other woods and received in exchange twenty towns in Galilee known collectively as Cabul (1 Kings 9:10–13). Hiram also aided Solomon in his commercial ventures by supplying both ships and sailors for a merchant fleet that operated out of the port of Ezion-geber (1 Kings 9:26–28).

Some scholars have suggested the possibility of a relationship between this Hiram of Tyre and the famous King Ahiram of Phoenician Byblos (ca. 1000 B.C.). There is also an eighth-century King Hiram of Tyre mentioned in an inscription of Tiglath-pileser III.

2 An artisan sent by King Hiram of Tyre to do the bronze work for the Temple in Jerusalem (1 Kings 7:13–14). The son of a woman of the tribe of Naphthali (1 Kings 7:14) or of Dan (2 Chron. 2:14) and a man of Tyre, he was responsible for casting the bronze pillars, the molten sea, and other Temple furnishings in a specially suited clay which was found between Succoth and Zarethan (1 Kings 7:40–46). ***See also*** David; Solomon; Tyre. D.L.C.

hireling, a servant who is paid wages (Job 7:2; Mal. 3:5; Luke 15:17). The Law protected their rights (Deut. 24:14–15), and terms of service might be specified (Isa. 16:14; Job 7:1). John 10:12–13 contrasts the cowardice of a hired shepherd with the owner's concern for the sheep. The Mishnah stipulated that a hired servant had to compensate the owner for any loss due to negligence. "Hireling" could sometimes be used to imply "inferior" (Plutarch *Moralia* 37C). It is also used of hired fishermen (Mark 1:20).

historical criticism. *See* Biblical Criticism.



historical geography of the Bible, the study of historical events and peoples in their geographical and ecological environment, and the reconstruction of sociological and economic patterns in antiquity on the basis of geographical data.

Of all the sacred books of the world religions, the Bible is the most closely linked to geographical settings. It recounts the experience of a historical people in its physical environment, and biblical faith sees in all of nature, particularly the weather and other ecological phenomena, the expression of divine power. Both Jews and Christians have a profound concern for the physical setting of biblical history. In traditional Judaism, many commandments are predicated on one's very presence in the land of Israel. Christians down through the ages have always sought to deepen their experience by seeing the true landscape of biblical events. Modern research utilizes many disciplines of the physical and social sciences as well as the humanities to reconstruct the ancient ecological milieu of the Bible's historical peoples.

Physiography: Since the first modern map of Palestine by the engineers who came with Napoleon in 1799 (the Jacotin Map, 1810), significant advances have been made. The explorations by Edward Robinson in 1838 and 1853 brought to Western scholarship a large body of geographical information, especially the location of dozens of biblical towns. Other explorers added further details, and the culmination of nineteenth-century research was the thorough mapping conducted by the team of British military engineers sponsored by the Palestine Exploration Society during 1870–76. That expedition, called the Survey of Western Palestine, produced a detailed map in twenty-two sheets with accompanying commentary and name lists. Their maps were still used by both sides in World War I and only under the subsequent British mandate was the process of remapping the country taken up again. This has continued under the Israeli and Jordanian survey departments to the present time. All the tools of modern cartography, including areal photogrammetry, computers, and even satellite pictures are used. A special grid was also established for locating sites and features.

The terrain of the ancient land of Israel consists of "brooks of water, of fountains and springs, flowing forth in valleys and hills" (Deut. 8:7). It is the contrast between hill regions and plains that has determined the fragmented nature of the societies that lived there in antiquity. For example, in the Canaanite period, the small city-states were located on the plains, usually at the foot of the adjacent hills where springs of water come forth from the porous limestone layers that make up the ranges of Palestine (cf. Josh. 17:16). The initial area open to the tribes of Israel was mainly in the hilly areas (Josh. 17:18). The deep Jordan Valley gave a north-south orientation to the mountain ranges of both Cisjordan and Transjordan; the former coastlines of the eastern Mediterranean basin have shaped the coastal plains. East-west faulting has created some prominent valleys (such as the Jezreel Valley) and thus broken up the central hill country into smaller units such as Galilee, Mt. Ephraim, and Mt. Judah. On the south, the zone of aeolic sand deposits form the biblical Negeb.

The study of the physical environment in biblical times is facilitated by analysis of the present geological morphology of the land and the processes that have brought it into being. For example, the coastal sands brought by the currents are later than the Byzantine period (mid-fourth century A.D.–1453) because they cover ancient

sites from that era. But the coastal sandstone ridges are much earlier, being the petrified sand dunes of more ancient times. The level of erosion from the hills onto the plains can be dated by the age of the sites from antiquity still on the surface. The flora of prehistoric and historic periods can be determined by pollen studies from cores bored in lake and river bottoms. The organic remains, including plant and animal (bone) remains from archaeological digs, can tell the botanist and the zoologist about the ecology of more closely dated ages in the historical record. Thus, they reveal the ways in which ancient people provided food for their communities. Patterns in the flora, compared with similar regimes in modern times, help to define the weather patterns for the ancient periods.

Generally speaking, the grain crops, wheat and barley, were cultivated on the plains: the Jezreel Valley, the Philistine plain, the table land of Moab, and the plateau of Bashan. The hilly slopes were especially good for the development of orchards and vineyards, often by means of terraces built on the natural limestone strata. The Judean steppe land (the so-called "wilderness," Josh. 15:61) was good for grazing, as was the Negeb and the central Sharon Plain. Vineyards were often cultivated on the sandstone coastal ridges. Fishing was possible both in the Mediterranean and in the fresh-water Sea of Chinnereth (Sea of Galilee). The grain crops were dependent upon the rains of the winter season while the vineyards and orchards were dependent upon the dews of the summer months. There was never a sterile season in the annual cycle. The real fear of the ancient farmer was of a prolonged drought (1 Kings 17:1; 18:1–5). In years of good rain even the semi-arid Negeb could bring forth abundant crops (Gen. 26:12). A proper curse on the land meant the cessation of both the dew and the rain (2 Sam. 1:21).

A major task of historical geography is to establish the proper biblical names of the physical features on the terrain. Since the beginning of modern research there has been considerable looseness in the application of ancient terms. Modern maps of Israel include the "wilderness of Beer-sheba" (Gen. 21:14) and the "wilderness of Zin" (Num. 13:21) in the Negev (Israeli Hebrew spelling). The biblical Negeb was actually limited to its northern zone (cf. Num. 13:22, 29). Such features as the brook Besor (1 Sam. 30:10), now identified with the Wadi Ghazzeh, and the "waters of the Jarkon" (RSV: "Me-jarkon," Josh. 19:46), now equated with the Wadi el-'Aujeh, are based on the interpretation of their biblical contexts, sometimes with the help of later Jewish or Christian sources. In the case of the Jarkon, the Septuagint (LXX) version of Josh. 19:46 suggests that another stream is meant, Wadi Musrarah, now called Nahal Ayalon on Israeli maps. The study of physical geography will have little meaning for the Bible student if ancient regional names are not applied to their original terrain.

Map opposite: Solomon's twelve districts: from 1 Kings 4:7–19, an "administrative text," it is possible to derive the approximate territories of Solomon's "district commissioners," but the boundaries between the districts can only be drawn in a general way.

Philology: Geographical details in the ancient narratives can usually be counted on for reliability. Many geographical texts are of an administrative nature reflecting true-to-life situations. Even in hero stories such as 1 Sam. 17, the details regarding features and towns in the vicinity of the action must derive from the local population.

An interest in historical geography is as old as the Bible itself. A chapter such as Genesis 14 reveals that the author knew of a pre-Israelite tradition of place names (Bela, Enmishpat, etc.); he keeps them in the narrative with updated glosses so the reader will know the proper locations in the Israelite period.

The Masoretic Text (MT) must be compared with the LXX and sometimes other versions to get the most accurate text of any geographical passage being studied. The decision as to which version is more ancient may even be made on the basis of which one makes the best sense in the relevant landscape (cf. the problem of the Jarkon in Josh. 19:46 discussed above).

Some examples of administrative texts are the town lists in the book of Joshua and the genealogical tables of the various tribes in 1 Chronicles. The most explicit document of this type is the roster of Solomon's district commissioners and their respective territories (1 Kings 4:7–19). The enumeration of towns fortified by Solomon (1 Kings 9:15–19; also 2 Chron. 8:1–6) and by Rehoboam (2 Chron. 11:5–12) may also derive from the administrative archives that were later incorporated into the royal Chronicles. Other passages are more purely historiographical in nature, e.g., the unconquered Canaanite cities (Judg. 1:21, 27–35) or the "land that yet remains" (Josh. 13:1–6). The itinerary of the wandering Israelites (Num. 33) probably is based on itineraries for caravans operating across the Sinai deserts during the monarchical period (mid-eleventh century to 586 B.C.). Even prophetic oracles were sometimes geographic in nature: Isaiah's "march through Benjamin" (Isa. 10:28–32); Micah's lament over his homeland, the Shephelah (Mic. 1:10–15); the denunciations of Philistia (Amos 1:6–8; Jer. 47:1–7), of Moab (Isa. 15–16; Jer. 48) and of Edom (Jer. 49:7–22). The "Table of Nations" (Gen. 10) records a geographical world view (cf. Ezek. 27:1–25).

In the Greco-Roman period (333 B.C.–A.D. 324) the Hellenistic spirit of inquiry about the world we live in led to the composition of many geographical works such as those of Strabo, Ptolemy, and Pliny. But within the rabbinic literature of Judaism there are many

detailed geographic references to OT sites and their Roman period equivalents. This was because of the need to determine the exact extent of the land of Israel so as to know where the commandments pertaining to life on the land were in force. A new copy of such a Judaic geographical text has been found on the mosaic floor of a synagogue near Beth-shean. The Gospels, Acts, and many of the Letters make reference to places in Palestine and the rest of the Roman Empire but no passages occur with a purely geographical intent. The church fathers, particularly the research center at Caesarea (Origin, Eusebius), produced works of major geographical import because of their deep interest in Bible study. Their surviving works are essential tools for locating sites from the biblical period. The Madeba Map, a mosaic in the floor of a church in Transjordan, exemplifies the Christian interest in sites where the events of sacred history took place. It also provides abundant details about the size and status of various towns in the Byzantine period.

The accounts of later pilgrims and of the Crusaders are less reliable. Accurate sources for Palestinian geography are the works of the Arab geographers but their interest was mainly descriptive and not biblical. Eshtori Haparhi, a Jewish scholar of the early thirteenth century, came to Palestine and made extensive geographical inquiries in search of OT sites. His work remained in obscurity for centuries until Edward Robinson discovered that Eshtori had preceded him in many discoveries.

Today, scholars have at their disposal a corpus of geographical texts from Egyptian records, on papyrus and stone, and also from cuneiform inscriptions. The Palestinian epigraphic finds (i.e., inscriptions) have been few and mostly of less geographical import. The Mesha stele and the Samaria ostraca are notable exceptions. Of the outside sources for the Canaanite period, the most detailed are the topographic lists of Pharaoh Thutmose III and the letters in cuneiform from the archive from the site of Tell el-Amarna in Egypt. For the age of the Israelite monarchy, the records of the kings of Assyria and Babylon are of major importance.

Toponymics: The primary link between our times and antiquity is the corpus of Arabic place names in Palestine that still preserves the forms, albeit with some linguistic shifts, of names in the Bible. By the end of the nineteenth century, scholars had succeeded in recording most, if not all, of the surviving Arabic names and the rules of transmission had been formulated. One could usually trace the transformation of a Hebrew name to the Arabic form still used by Palestinian peasants.

The study of the ancient names from the Bible and contemporary sources, including the spellings in the MT and LXX, is a special branch of research that can shed light on the society and psychology of the Canaanites and the people of Israel. Greek and cuneiform spellings

The lower Jordan River on the mosaic Madeba Map; it flows south (right) into the Dead Sea.

may contribute to the linguistic history of the Hebrew language.

The search for biblical towns is seldom easy unless the Arabic name is a true reflex of the ancient one. In areas where there was a fairly continuous sedentary population, the geographical nomenclature may be reasonably preserved. Some of the Arabic and biblical equations are obvious, e.g., Esdud is Ashdod, Yafa is Joppa (Heb. *Yafo*), 'Arad is Arad, and so on. In other instances the change is only slight, e.g., Beisan for Beth-shean. The ancient name may, however, have become transformed into an entirely different Arabic phrase such as *'Eid el-Ma,* "Festival of the Water," which has developed from the Hebrew *Adullam.* A special case of religious modification is the alteration of the theophoric component *-el* into the pseudo plural *-in* (from Arabic); thus Bethel became Beitin, Jezreel became Zer'in and even a valley named after Ishmael became the Wadi Isma'in. Names having as their root the three consonants *ayin, pe,* and *resh,* such as Ophrah or Ephraim (2 Sam. 13:23), were changed because they were too close to the Arabic *'ifrit,* "demon." The new name given was just the opposite, et-Tayibeh, "The Favored." Place names with the consonants *heth, pe,* and *resh* also underwent this same process, probably because the Hebrew guttural consonants such as *ayin* and *heth* were not being pronounced properly by the late Talmudic period when the Arab conquest took place (seventh–eighth centuries A.D.).

When a biblical town with a biblical name was given a new Greco-Roman name, e.g., when Aphek became Antipatris (Acts 23:31) or Acco became Ptolemais (Acts 21:7), the local population usually continued to speak their own Semitic language and called their town by its old name. When the Byzantines left, the people at a town like Lod/Lydda no longer used the imperial name Diospolis; so in Arabic, the name became Ludd. In contrast, the Herodian name Sebastia survived as Sebastiyeh while the Semitic name, Samaria (Heb. *Shomron*), was lost; the real Semitic-speaking Samaritans had been expelled or killed during the reign of Alexander the Great, so the non-Semitic population preserved the Greek name given by Herod. Caesarea was a new foundation, as was Tiberias; thus, their Greco-Roman names also survived in Arabic. On occasion, the biblical name underwent a transformation, becoming the name of a Moslem saint whose grave is venerated on or near the site, e.g., ancient Rehob south of Beth-shean survives as the tomb of Sheikh Rihab on the site.

Archaeology: The older explorers were often fooled by the fact that the biblical name had been moved from the mound of the OT town to a nearby site where the Roman and/or Byzantine town was located. Therefore, it became imperative to devise some means of identifying the debris and ruins of an OT city as against those of a Greco-Roman or Byzantine one. It was Sir William Flinders Petrie who demonstrated in 1890 at Tell el-Hesi that the artificial mounds were built up by successive building and destruction of settlements. The artifacts and structures in the respective layers of debris (strata) were seen to reflect typological features that developed through time. Eventually, archaeologists were able to give relative dates and sometimes more absolute dates to the finds in particular strata. Field archaeology became another discipline contributing to reconstruction of the ancient way of life in the various periods of antiquity.

Very seldom has an epigraphic discovery confirmed an identification. Usually it is a case of a site where the Arabic name had already pointed to the proper equation, e.g., Arad, Gezer. The name of Beth-shean found in an Egyptian text on a stele at the mound of Tell el-Husn proved what scholars had already deduced, namely, that this was the site of OT Beth-shean, the name of which was preserved in the adjacent town of Beisan (with a slight corruption already evident in Talmudic times). The Mesha stele mentions Dibon; its find spot was the Arabic town of Dhiban and the equation was not difficult to make. Doubts about the identification of el-Jib with ancient Gibeon were dispelled when jar handles with *gb'n* incised on them were found there in a great water shaft. The name of Arad appears on some of the ostraca found at Tell 'Arad. In the case of Lachish, the name also showed up in an ostracon from Tell ed-Duweir, which site was already assumed by the excavators to be Lachish, but without an Arabic name. The same can be said for the cuneiform tablet found by a tourist in the plowed field on Tell Waqqaṣ. It contained the name of Hazor, and thus it confirmed the identification of that huge site with the most prominent city of Galilee (Josh. 11:10). There are still many sites from antiquity for whom the ancient name is still unknown in spite of modern excavations, e.g., Tell Kisan in the plain of Acco, Tell Jerisheh in north Tel Aviv, and Tell el-Hesi in the southern coastal plain.

At least from excavations, a proper idea of the size, function, and importance of a site can be obtained, that is, if the excavations are not confined to a narrow trench. The successive layers of occupation can show when the site was occupied. Of course, some chapters in a city's history may accidentally not be mentioned in the written sources while some documented periods may not be represented in the archaeological stratigraphy. One cannot necessarily expect a perfect correlation between the two kinds of evidence.

Archaeological survey, the examination of as many sites as possible on the surface of a well-defined geographical region, is now contributing even more to the reconstruction of

the ancient life of Israel in its ecological environment. The plotting of the sites reveals their pattern of distribution in relation to the types of rock and soil and the local water sources. The use of collected pottery to date the sites and the accurate description of their physical shape (high mound, low circle of debris, and so forth) can tell much about the density of population centers in a given area and during particular historical periods. Ecological factors, including the nature of the terrain, water sources, and the evidence of organic remains from excavation can be synthesized to give a clear picture of the quality of life in the region being studied. Coupled with an analysis of the historical sources, this information serves to illumine the role of the individual regions in both the political and the economic history of the country. ***See also*** Archaeology, History, and the Bible.

Hittites (hit′tīts), an Indo-European people who established a strong kingdom in east central Anatolia in the second millennium B.C. The Hittites, named after the non-Indo-European Hattians whom they displaced, spoke several different Indo-European languages. The official language of the kingdom, written in a cuneiform (i.e., wedge-shaped) script adapted from Akkadian, is called Cuneiform Hittite. In the outlying regions a hieroglyphic system was used to write a related language, referred to as Hieroglyphic Hittite. Luwian, which is very close to Hieroglyphic Hittite, and Palaic were also spoken within the kingdom.

History: The history of the Hittites can be divided into three periods: the Old Kingdom, the New Kingdom, and the Neo-Hittite kingdoms. Sometime around 1650 B.C. Hattusilis I pushed out of Anatolia into north Syria and captured Aleppo, and his successor, Mursilis I, sacked Babylon. Following these two great rulers of the Old Kingdom, the Hittite empire declined, due both to internal difficulties and to the growing power of the Hurrians under the rulers of Mitanni.

The revival of the New Kingdom began in the fifteenth century B.C., but it was Suppiluliuma (1375–1335 B.C.) who made it a major power by his conquest of Mitanni and northern Syria. All the small states of north and central Syria, including most of Lebanon, became vassals of the Hittites. This area became a battleground between the Egyptians and the Hittites until the peace treaty between Ramesses II and Hattusilis III (ca. 1280 B.C.), but the Hittites remained in control of the region. After this treaty, the main threat to Hittite hegemony in Syria came from Assyria, and Carchemish, the capital of the Hittite vice-regent in the east, gained in importance. It was the Sea Peoples (i.e., people from the Greek islands, including Crete) from the west, however, who destroyed the Hittite empire. The Hittite homeland collapsed first, and then the coastal areas under its control, from Ugarit to Amurru, fell to these invaders about 1200 B.C.

The devastation did not reach too far inland, however, and the remnants of the Hittite empire formed Neo-Hittite kingdoms in Carchemish, Hamath, and a number of other inland sites, particularly in the Taurus region and in northern Syria. Hieroglyphic Hittite and Neo-Hittite culture continued in many of these sites even after the Aramean influx at the end of the second millennium led to Aramean dynasties gaining power.

The Assyrians continued to refer to the inhabitants of these new kingdoms as Hittites. From the time of Tiglath-pileser I (1115–1070 B.C.) onward, the Assyrians called all the territory between the Euphrates and northern Lebanon the Land of Hatti. With Assyrian expansion into southern Syria and Palestine, the term was expanded to include those regions. Shalmaneser III (858–824 B.C.) lists Ahab among the Hittite kings, and Esarhaddon (680–669 B.C.) includes the kings of Judah, Edom, Moab, Ammon, and a couple of Philistine rulers among the kings of Hatti. The term "Hatti" continued to be used into the Neo-Babylonian period (sixth century B.C.) as a geographical designation that included Palestine.

In the Bible: The biblical use of the term "Hittite" is probably dependent, at least in part, on this cuneiform usage. Canaan is listed as the father of Heth in the Table of Nations (Gen. 10:15), and many texts (e.g., Gen. 15:20; Exod. 23:28) list the Hittites among the pre-Israelite inhabitants of Canaan, but there is no evidence that the Hittites of the empire ever penetrated that far south, much less settled there. Ezekiel makes the mother of Jerusalem a Hittite (16:3, 45), and the Priestly writer mentions Hittites in his accounts of the patriarchs (Gen. 23; 25:9; 26:34; 27:46), but both were probably just following the Neo-Babylonian geographical terminology of their time when they designated these inhabitants of Canaan as Hittites.

The attempt to prove that Abraham's purchase of the cave of Machpelah (Gen. 23) followed imperial Hittite law is not compelling, and all of the Hittites mentioned by name in the OT—Ephron, Zohar, Beeri, Elon, Ahimelech, and Uriah—bear Semitic, not Hittite, names. If they were of Hittite or Neo-Hittite stock, they had assimilated into the dominant Semitic culture of the region. On the other hand, Ahimelech (1 Sam. 26:6) and Uriah (2 Sam. 11:3) are both designated Hittites in written sources that antedate strong Assyrian influence on Judah. That suggests that they may indeed have been assimilated descendants of Hittite or, more likely, Neo-Hittite stock. The references to the

land of the Hittites (Judg. 1:26) and the kings of the Hittites (1 Kings 10:29; 2 Kings 7:6) probably refer specifically to the Neo-Hittite states of Hamath and northern Syria, and thus also reflect an earlier usage than that of the Priestly writer (P) or Ezekiel (sixth century B.C.). ***See also*** Horites; Mitanni. J.J.M.R.

Hivites (hiv'*ī*ts). ***See*** Horites.

Hobab (hoh'bab), one of three names for Moses' father-in-law (Judg. 4:11). With Jethro (Exod. 3:1; 18:1) and Reuel (Exod. 2:18), the name belongs to a complex tradition about Moses' family. Num. 10:29 defines Hobab as the son of Reuel, the founding father of the Kenites.

Hodaviah (hod'uh-v*ī*'uh; Heb., "praise Yahweh"). **1** A son of Elioenai; a descendant of Judah and the royal lineage through Zerubbabel (1 Chron. 3:24). **2** A clan leader of the eastern half-tribe of Manasseh (1 Chron. 5:24). **3** A descendant of Benjamin (1 Chron. 9:7). **4** A levitical family group ("sons of Hodaviah") who returned from the Babylonian captivity with Zerubbabel (Ezra 2:40); a corresponding passage (erroneously?) reads "sons of Judah" (Ezra 3:9). The family group is also called Hodevah, a variant spelling of the same name (Neh. 7:43).

Hodiah (hoh-d*ī*'uh; Heb., "Yah [god] is my splendor"). **1** A descendant of Judah (1 Chron. 4:19). **2** A Levite who helped explain to the people the law read by Ezra (Neh. 8:7); this is probably the same Levite who took part in the covenant renewal ceremonies and signed the covenant to keep the law (Neh. 9:5; 10:10). **3** A second Levite who signed the renewed covenant (Neh. 10:13). **4** A leader of the people who also signed the covenant (Neh. 10:18).
